E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity:_____(Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity:_____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

      Lusese Conservancy, Zambezi Region Caprivi, Nearest City Katima Muhlo

   b. Date wildlife was hunted: 6 Oct 2014

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

      1 ear,2 feet,2 tusks, 1 tail & 1 cape backskin

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

      Kobus Honiball : Farm Otjiru 139 , Outjo Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Name:	Kobus Honiball
Address:	Farm Otjiru 139
City:	Outjo
State/Province:	Namibia
Country, Postal Code:	

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature:_____ **Date:** _____

7. **If you are the hunter applying to import your own trophy, please read and sign the following statement.**

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: (X) (b) (6) [redacted] Date: 3-9-17

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):
Richard Walters (b) (6) [redacted]

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☐ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

BRANCH OF PERMITS, MS: IA
5275 LEESBURG PIKE
FALLS CHURCH VA 22041-3803

CHIEF, BRANCH OF PERMITS, DMA

Permittee:

RICHARD N. WALTERS

(b) (6) [redacted]

LAUREL, MS 39443
U.S.A.

Authority: Statutes and Regulations: 16 USC 1539 (a); 50 CFR 17.40 (e).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Conditions and Authorizations:

A. Authorized to import the sport-hunted trophy of one African elephant (*Loxodonta africana*), taken in Namibia for the purpose of enhancement of the survival of the species.

B. Specimen may not be sold or transferred for any financial remuneration.

C. U.S. Threatened Species: tusks must be marked as per [50 CFR 17.40(e)]. In accordance with the African Elephant Conservation Act, raw ivory, including sport-hunted trophies that are wholly or partially ivory, may not be re-exported from the U.S.

D. **Trophy must have been taken during the 2014 hunting season.**

E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit issued by the Management Authority of Namibia.

F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.

G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. **This permit can be photocopied.**

H. Valid for use by permittee named above.

I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for a lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to these application types to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
Richard Walters (b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

   ☒ No ☐ Yes

   If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. **Permit number.** Enter the permit number to be reissued/renewed/amended. Prt#: MA27652C-0

5. Submit the original permit with this application.

6. **Past activities.**

   a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit.
   b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal.

7. **Annual Report**. If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.)

8. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form.

9. **Certification -** Complete one of the statements below and supply any additional documentation requested: (original signature is required)

   a. For **NO CHANGES** to original application:

      I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

      Permittee's signature (b) (6) Date: 01/4/2019

   b. For **CHANGES** to original application:

      On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we may need to request additional information regarding the changes after reviewing your initial request.

      I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

      Permittee's signature: _____ Date: _____

All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

6. Past activities

b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal.

We have been awaiting export from Namibia. Shipment is now ready for export but my import permit has expired.

D. **Trophy must have been taken during the 2014 hunting season.**

E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit issued by the Management Authority of Namibia.

F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.

G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. **This permit can be photocopied.**

H. Valid for use by permittee named above.

I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: N/A (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: Namibia, Otjozundjupa Region, N#A JAQNA Conservancy, "Bushmanland",

   b. Date wildlife is to be hunted:
      July 15, 2017 to July 31, 2017

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).
      Skin, Skull, Teeth, Tusks, Bones, Feet

3. **IF THE ANIMAL IS DEAD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: N/A

   b. Date wildlife was hunted:
      N/A

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

N/A

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

N/A

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	Thormahlen & Cochran Safaris Namibia
Address:	92 Nelson Mandela Avenue
Address:	Stillwaters no 5
City:	Klein Windhoek
State/Province:	Namibia
Country, Postal Code:	(Namibia does not have postal codes)

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: (b) (6) [redacted] Date: 03/21/2017

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

I PLAN TO USE LOUISVILLE, KY

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

Danny M Spindler
(b) (6)
Evansville, IN 47715
USA

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☑ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Danny M Spindler
(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Yes ☑ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: MA28045C-0 No ☐

3. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the [illegible] herein may subject me to the criminal penalties of 18 U.S.C. 1001.
(b) (6) [redacted]
Signature (**in blue ink**) of applicant/person responsible for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 03/26/2018

Response to Page 2 of 10, Question 3 (a):
There are no cleared documents or form 3-177 associated with this permit yet. See (b) response.

Response to Page 2 of 10, Question 3 (b):
I hunted elephant in Namibia from July 15, 2017 through July 22, 2017. I hunted in Namibia, Otjozundjupa Region, N#A JAQNA Conservancy, "Bushmanland". This information was provided for in my application for permit MA28045C-0. I received all the required Namibian government permits and on July 22, 2017 I legally harvested a male elephant. Since that time the skin, skull, teeth, tusks, bones, and feet have been properly salted, quarantined for the required 60 day time, and inspected by officials of the Namibian government. These items have been released from quarantine and delivered to Casper's Taxidermy located in Grootfontein, Namibia, where they are currently being dipped and certified by a veterinarian. Casper's Taxidermy has also applied to the Namibian government for the CITES, export permit and other documentation necessary for export. The tusks are also being ISO coded. Casper's Taxidermy tells me the trophy will not be dry from the dipping process until perhaps the first week of April, 2018.

Provided the trophy is dry enough for shipping by the first part of April, 2018, it can then be crated and picked up by the shipper (The Yellow Shark Holdings (Pty) Ltd.) and delivered to their warehouse in Windhoek, Namibia. I have been in contact with the shipping company and they have already applied to the South African government for a veterinarian permit. The shipment will have to first go to Johannesburg, South Africa and then can be forwarded on to the United States for clearing by the USFWS in Louisville, Kentucky. Namibia does not have direct shipping to the United States so everything must first go to Johannesburg, South Africa.

I spoke with my US importer in Louisville, KY and he informed me that he currently sees US shipping from Johannesburg being backed up for at least 2 weeks. My permit MA28045C-0 expires on Aril 19, 2018. Although everyone has been diligently working to meet that deadline, the realty is there are some items that cannot be controlled. Therefore, I am asking the USFWS to renew this permit to allow sufficient time to properly import this legally harvested trophy into Louisville, KY and be cleared by the USFWS office in that port.

Conservation Matters:
Because of my belief in conservation, I spent a great deal of time researching areas and outfitters before booking this elephant hunt. I wanted to hunt in an area where my permit and the money I needed to spend would go to improve habitat, contribute to anti-poaching programs, and work with those living in the area for a sustainable existence with the elephants. After much research, I selected Namibia and Thormahlen & Cochran as the outfitter. Specifically the area within Namibia was the N#A JAQNA Conservancy which is occupied by the Bushman (San) peoples. N#A JAQNA is located in the north east part of Namibia and is the largest Conservancy in the country. I also received the USFWS elephant import permit before hunting.

My outfitter, Thormahlen & Cochran, uses four approaches for conservation....(1) work with the Namibian government to limit the harvest in a way to insure sustainable elephant numbers, (2) improve habitat, (3) reduce illegal hunting, and (4) assist the government with anti-poaching programs. By working with the government, the harvest of trophy elephants is limited to two per year within the Conservancy. I saw at least 60 bull elephants during the time I was hunting and I only saw maybe a third of the area in the entire N#A JAQNA Conservancy.

I also observed at least three water pans built by the outfitter for elephants and other wildlife. The outfitter is also working to eliminate the unreliable windmills and replace them with solar panels at all water pans in the Conservancy, again improving the habitat for wildlife.

Improving relations, hiring, and educating the local people all contribute to stopping illegal hunting. The outfitter donates their own funds and uses money collected from their hunters to purchase school supplies for the local school children, contribute food to the villages, and hire local Bushman people. After harvesting the elephant, we (assisted by the government game scout and hired local people) spent two days hauling meat as far away as 250-350 km to the villages for consumption. Once the elephant retrieval was finished, nothing remained in the habitat. I observed many local people employed by the outfitter. The local people understand they would not have a reliable income source except for the work provided by <u>legal</u> hunting.

15-20 local people are hired by the outfitter to assist in the anti-poaching programs. Part of the fees I paid to the outfitter and for the Namibian government's permit is used to implement anti-poaching programs. While I was in Namibia, the outfitter met with leaders from the various villages and government officials in an all-day meeting to review the anti-poaching programs that are in place and make any necessary changes to improve the program. I was told this meeting happens on a regular basis to improve and monitor conservation efforts.

In summary I am asking for a renewal of my U.S. import permit for an elephant which was legally harvested at a time and place that was then allowed by the US government. This trophy would have been allowed by USFWS to be imported into the US except for the fact it could not finish drying in time and a backup in shipping occurred before the current USFWS import permit expires. Denying the renewal will not change the fact the elephant has already been legally harvested and in a country recognized as legal to harvest by the USFWS at the time of the hunt. The trophy is currently locked in storage in Namibia. I feel leaving this trophy in Namibia contributes to wanton waste of this animal. Thank you for your time and consideration. Please feel free to call me at (812)499-8951 should you have questions.

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 (http://www.fws.gov/forms/3-200-2.pdf) and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 (http://www.fws.gov/forms/3-200-3.pdf) and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66, http://www.fws.gov/international/pdf/permit-application-form-3-200-66-replacement-document.pdf. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to http://www.fws.gov/international/permits/by-form-number/index.html to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. **Permit number.** Enter the permit number to be reissued/renewed/amend MA28045C-0.

2. Submit the original permit with this application.

3. **Past activities.**
   a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit.
   b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal. ATTACHED

4. **Annual Report.** If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.)

5. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form.

6. **Certification** - Complete one of the statements below and supply any additional documentation requested: (original signature is required)

   a. For **NO CHANGES** to original application:

   I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

   Permittee's signature: (b) (6) [redacted] Date: 03/26/2018

   b. For **CHANGES** to original application:

   On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we need to request additional information regarding the changes after reviewing your initial request.

   I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

   Permittee's signature: _____ Date: _____

7. All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

8. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

   Same address as page 1

9. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

   ☒ If a permit is issued, please send it via a courier service to the address on page 1 or question 8. I understand that you will contact me for my credit card information once the application has been processed.

   PREPAID FED EX LABEL IS ATTACHED TO THIS APPLICATION

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Danny M Spindler, (b) (6) [redacted]

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. [50 CFR 13.21(c)]. Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

C. U.S. Threatened Species: tusks must be marked as per [50 CFR 17.40(e)]. In accordance with the African Elephant Conservation Act, raw ivory, including sport-hunted trophies that are wholly or partially ivory, may not be re-exported from the U.S.

D. **Trophy must have been taken during the 2017 hunting season.**

E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit issued by the Management Authority of Namibia.

F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.

G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. **This permit can be photocopied.**

H. Valid for use by permittee named above.

I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

Dear Mr. Spindler,

In response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service is revising its procedure for assessing applications to import certain hunted species like African elephants. We are withdrawing our countrywide enhancement findings for a range of species across several countries. In their place, the Service intends to make findings for trophy imports on an application- by-application basis. Please be aware that we continue to seek additional information directly from the relevant foreign Government Authorities to support our permit findings, therefore, these applications are still under review.

Sincerely

Anna Barry

Thank you Anna for the response. I would appreciate being kept informed on the status so I can let everyone in Namibia, South Africa, and my US importer know of the status. I am having a hard time understanding how a renewal vs a new application are being treated the same but realize this is out of your control. If there is additional information you need from me or the Namibian government to assist in the determination, please let me know. The folks in Namibia have said they will assist wherever possible. Thank you Anna for your time.

Dear Mr. Spindler,

Because each application now requires an individual finding under the Endangered Species Act, all application both new and ones submitted for renewal, cannot be finalized until this review process has been finalized. Unfortunately I do not have a timeframe.

> Thank you Anna
> I am not exactly sure what your email was explaining. I understand if this was an application for a new permit however it is not. The application is simply asking for a renewal in order to bring an already hunted trophy into the US. The trophy was legally hunted at a time and place recognized by the USFWS and issued an import permit. Through no ones fault the trophy simply could not be shipped into the US in time. The trophy has been ready to be shipped since the end of March but was stopped by me because of a April 18th import permit expiration. Please advise in order that I can let those individuals and companies in Namibia and South Africa know about this pending shipment. USFWS folks had advised me to apply for a renewal and not chance the shipment arriving after the import permit deadline.

Anna

Good morning. Would you please update me with the status of this permit renewal? I have been contacted from Namibia and South Africa folks regarding their paperwork which apparently has a me limit on it.

Thank you

1. Name of area operator: Peter Thormahlen

   a. Years in business: 18

   b. Name of company conducting hunt: Thormahlen & Cochran Safaris

   2. Name of concession: **N#a Jagna Conservancy** Size in km^2: 9,120 or 900,120 ha

   a. Land tenure: __ Government lease _X_ Community __ Private ranch __ Private conservancy

   b. Length of concession agreement: 2016-2024 Can it be renewed? _X_ Yes __ No

   c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:

CONTRACTUAL OBLIGATIONS

- ANNUAL REPORTING -The Trophy Hunting Operator must submit an Annual Report Yearly within 30 days after the hunting season ends, which is 30 November. These Annual Reports are handed in at the Ministry of Environment & Tourism, as well as a copy at the Conservancy office, and the WWF office. Failure to submit the report timeously is punishable with a fine of N$5,000.

- MEAT DISTRIBUTION – All hunted Trophy, as well as Non-Trophy game meat is distributed to villages in the concession within 24 hours after being hunted. As a company Policy we do not leave any remains of elephant where it was hunted - no bones, skin, meat etc. After 2 days diesel is poured onto the stomach content and blood at the slaughtering site, wood stacked on top and burned. This is done to cause as little as possible stress on the elephants as there is no smell left of the hunted elephant or its remains. Elephant gets stressed seriously when bones and skin is left at the site!

VOLUNTARY DEVELOPMENTS /INVESTMENTS

- COMMUNITY INVESTMENT – We donate school stationary supplies for the local school through the SCI Blue Bag system in the amount of **N$54,000** per annum, buy uniforms for community game scouts and community camp staff to the value of **N$84,500**.
  We donate the trophy hunting camp which was built at a cost of **N$994,280** after a three-year period, back to the community and lease it from them so they can generate a monthly income from the trophy hunting camp. All maintenance is done by the Trophy Hunting Operator. The trophy hunting camp consist of 4 x client tents, dining area, kitchen tent, and 5 staff tents to the community.

The Daily Rent paid to the community in the Trophy Hunting Camp is **N$350** per person per day visiting.

- WILDLIFE WATER POINT DEVELOPMENT - Drilling and maintaining of the boreholes in the concession to establish Permanent Wildlife Water Points is a crucial part of the concession development as water allows the elephants to become resident in the concession compared to the previous yearly migration into the concession when the natural pans fill up with water during the rainy season. After which the elephants move back into Khadoum National Park and Nyae Nyae Conservancy where there is Permanent Wildlife Water Points.

  Currently 4 PWWP's (Permanent Wildlife Water Point's) have been established at a cost of **N$905,131** in the N#a Jaqna Concession Block.

  Installation of solar pump for water supply to the community members is also a crucial part of the community development program. Community members feel they are rewarded by the Conservation Developments when they receive fresh clean drinking water at their villages. This results in Wildlife Water Points being left alone and not damaged or settled around them, which chases the game away. **Attachment 1 – Wildlife Water Point Development Schedule**

- COMMUNITY EMPLOYMENT - We permanently employ 5 Community Members as Camp Staff, and 10-20 community members as Casual labor in the concession. The Casual Workers are employed 10 months per year to open roads in the concession, open the concession boundaries (Cutlines), and to skin elephants when hunted. The Permanent Staff gets a basic salary of N$2,000 per month which totals to **N$120,000** per annum.
  The Casual workers get a monthly salary of N$1,350 per month. On average **N$180,000** salary is paid per annum to Casual Workers who are community members, which is a great inflow of funds in the poor community.

- ANTI POACHING PROGRAM – Establishment of Wildlife Water Points is the first and most crucial development in the concession so that existing game becomes resident in the concession! After Permanent Wildlife Water Points (PWWP's) are established we start our Anti-Poaching program to protect the PWWP Equipment as well as the existing game. Currently all personnel are utilized as anti-poaching staff when no safaris take place. Community Game Scouts are on permanent anti-poaching patrols. Equipment and funding remain the biggest challenges as equipment is expensive.

  A serious Anti-Poaching program is needed. Funding major constraint, as Operator is spending every possible cent in the development of Wildlife Water Points. The idea is to establish the wildlife water points first so that there is permanent water in the concession, then start with an intensive Anti-poaching program. Mobility is a serious constraint in the anti-poaching effort as the area is

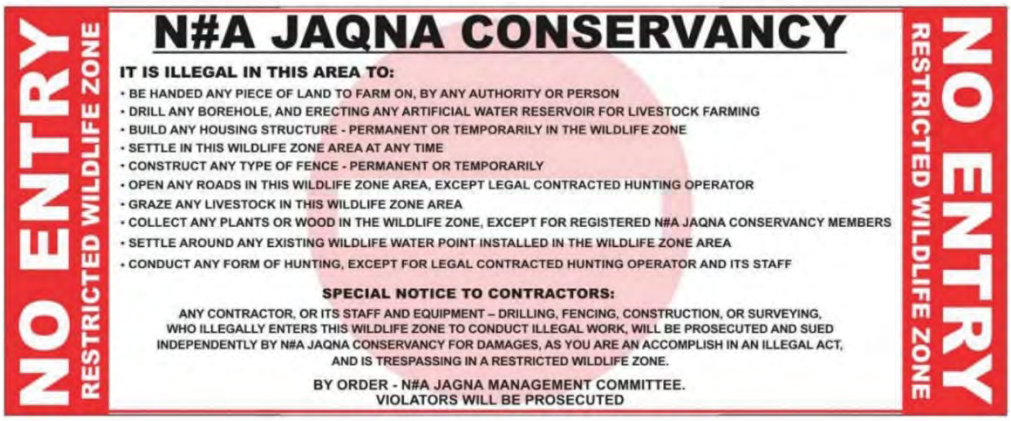
2,25 million acres big. In order to cover the concession properly four-wheeler quad bikes are needed, as well as several anti-poaching bases especially on the northern, and southern borders of the concession area, and radio communication equipment.

Now funding is done from Operators personal funds, and some small donations by hunters. We applied for a Grant from the DSCF (Dallas Safari Club Foundation) and will hopefully receive much needed funds to run a proper anti-poaching and PWWP establishment program. However, our Guides move around a lot in the area, visiting villages, and water holes to discourage poaching. With very positive results as much more game is visible since we got the concession in 2016, because of a higher visibility in the concession, hence less poaching.

However Solar Panels have been stolen by poachers on horseback on our southern border. Which means they come in from our neighboring Ondjou Conservancy as the San people are nomads without horses and livestock. To prevent any further theft, we installed trail cameras powered by a solar panel, and put up 12 feet high on a steel post with barbed wire around the pole preventing thieves to climb up the pole to destroy the cameras. It is small communities, so it will be easy to catch the perpetrator once we have their photos taken!

This area could be a dream concession if funding is available to drill for more water holes, open roads to be able to run an intensive anti-poaching program, and re-introduce game species shot out by the previous SA Army, neighboring and local poachers, i.e. red hartebeest, springbuck, Burchell's zebra, roan, sable, blue wildebeest, and warthog occurred in herds of thousands with none left today.

- NO ENTRY SIGNS



SIGN PERMISSION LETTER

Thormahlen & Cochran Safaris asked for permission to put up NO ENTRY signs at strategic positions to stop illegal land grabbing, and illegal drilling in the concession.

Approval was given by the N#a Jaqna Conservancy Management Committee and the first phase of the signs project is nearly completed. The first phase will be completed in 2019, and the secondary phase will be completed partly in 2019, and finally in 2020 due to the excessive logistics to put the signs up over the whole concession, the and the huge cost of the signs

December 5, 2017

The Chairperson
Me. Sarah Sungu
Conservancy Management Committee
N#a Jagna Conservancy
Mangetti Dune

Dear Sir/Madam

RE: LETTER-CHANGE OF CURRENT "NO ENTRY" SIGNS WORDING

We refer to the meeting held between N#a Jagna Management Committee and Trophy Hunting Operator Thormahlen & Cochran Safaris Namibia Pty Ltd on 1 December, 2017 at the N#a Jagna Conservancy Office at Mangetti Dune.

During our meeting the current NO ENTRY Signs placed at Border Cutlines entry points between Nohma and Nyae Nyae conservancy, were discussed. The Nyae Nyae conservancy as well as the Nohma San Community raised their concern regarding the NO ENTRY signs as they felt that the purpose was to keep San people from these two communities out of the N#a Jagna conservancy.

Thormahlen & Cochran explained in detail that the signs were placed to safeguard the conservancy Wildlife Areas land from the possibility of people from outside the San community illegally entering and building houses, or fencing the Wildlife areas due to the new roads and borders being opened. The N#a Jagna Management Committee

The N#a Jagna management Committee agreed with the Trophy Hunting Operator that this is a big threat considering the illegal land grabbing going on in the Conservancy. It was agreed that additional information will b added onto the existing NO ENTRY signs so that the San communities can feel free to move into and out of the areas.

N#a Jagna Conservancy Management Committee undertook to meet and decide on the additional information's wording, and that the Management Committee will inform Thormahlen & Cochran Safaris Namibia accordingly so that the correct sign information can be added by the Trophy Hunting Operator.

Thormahlen & Cochran Safaris will pay for the additional information needed to be added to the current NO ENTRY Signs, as well as the installation thereof.

We trust that our request will be looked at favorably for both the N#a Jagna Conservancy community, as well as the Trophy Hunting Operator of N#a Jagna Conservancy.

Thank you

Peter Thormahlen
CEO-Thormählen & Cochran Safaris Namibia Pty Ltd

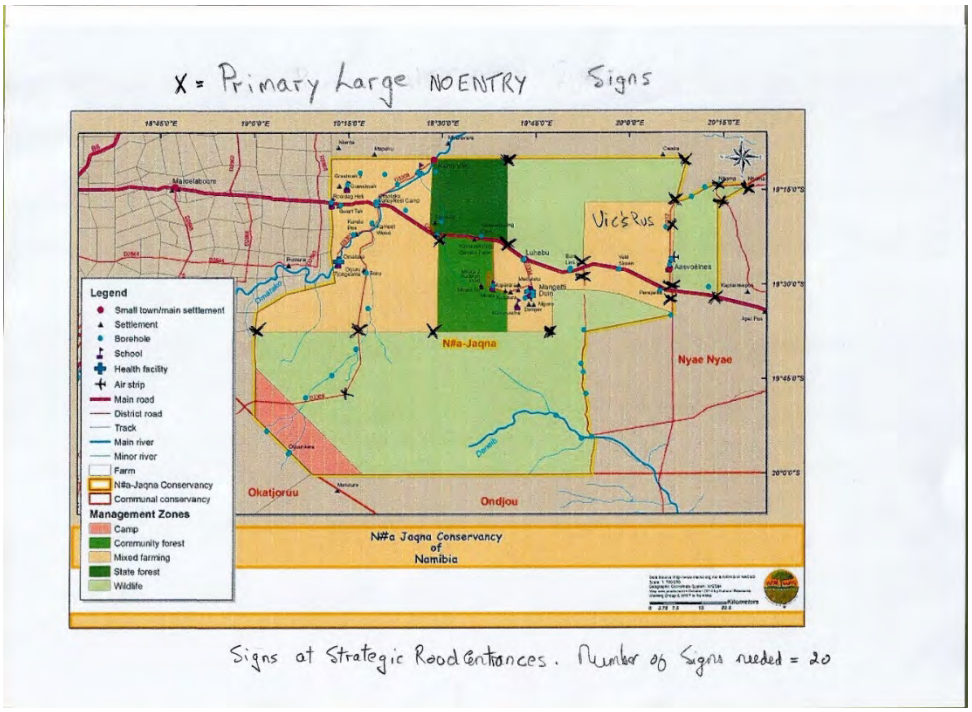
PRIMARY SIGNS

In order to stop the illegal settling and land grabbing of land in the Wildlife Zones of the N#a Jaqna Conservancy, Thormahlen & Cochran Safaris designed NO ENTRY signs with the written permission of the N#a Jaqna Management Committee.

Twenty Primary (Large) Signs will be put up at Strategic points - strategic roads and ploints where illegal land grabbers enter the Wildlife Zones to drop off workers, material, and equipment. It is especially important to have these signs visible so that Drilling Contractors can see them when illegally entering the Wildlife Zones, to illegally drill boreholes for illegal settlers.

A Special Notice on the sign refers to **Drilling Contractors** Illegally entering, and drilling in the Wildlife Zone.

"Ignorance is not an excuse to break the law", according to our Laws in Namibia.



Thus, by putting the signs at strategic entrances to the Wildlife Zone Areas, there is no excuse for a contractor of any kind, to enter a Wildlife Zone. When the signs are put up, a newspaper is used to establish the date when the sign was erected. No excuse as to when the illegal settlers entered the Wildlife Zone.

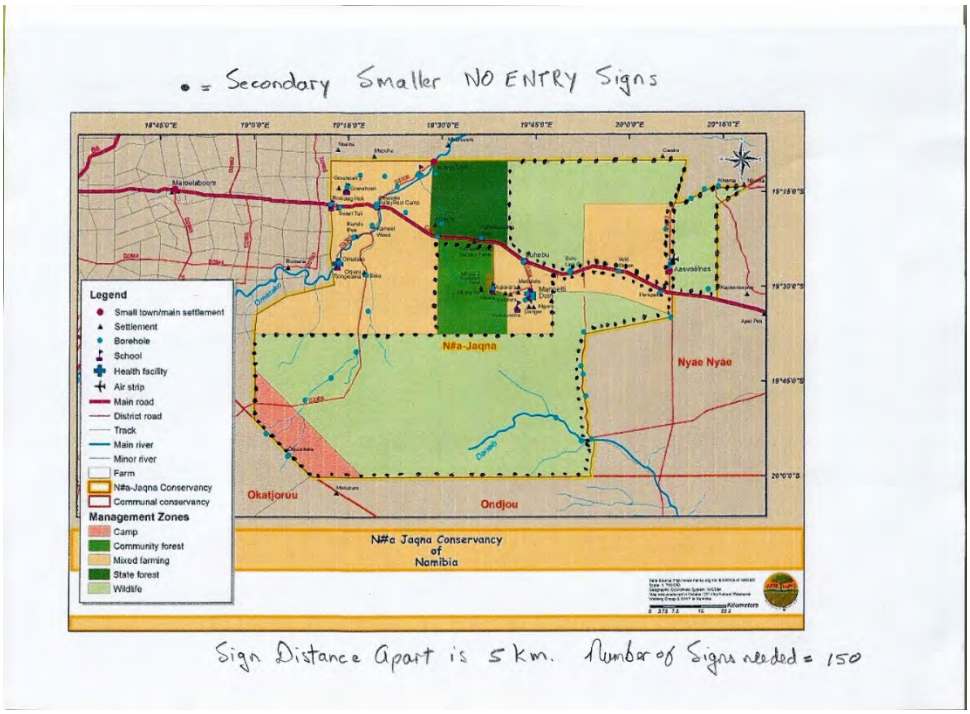
Thormahlen & Cochran Safaris is consulting with Lawyers in Windhoek in order to send a Legal Notice per registered mail, to all Drilling Contractors in Namibia, indicating the Wildlife Zone Areas in N#a Jaqna.

In the event any Drilling Contractor enters a Wildlife Zone to drill, we will get a Court Order against them to prohibit them from drilling boreholes in the Wildlife Zones, as they are obstructing our Contractual Obligation to develop the Wildlife Zones for Game.

It will be much easier, more efficient, and achieve better results, to go after the core of the illegal settling – the Drilling Contractors – than try and evict illegal land grabbers!

SECONDARY SIGNS

In order to have signs visible along all roads and borders of the N#a Jaqna Wildlife Zones, Thormahlen & Cochran Safaris will also erect smaller (Secondary) NO ENTRY signs Five Kilometres apart. Around 150 signs & frames will be needed for this exercise.



Without water no illegal settling can take place, as no one can farm without water for human and livestock!!

Drastic and outside the box measures, and funding, are needed to stop the illegal settling in the N#a Jaqna Conservancy Wildlife Zone.

COST OF CURRENT NO ENTRY SIGNS - 2018

- Invoice 10 x Primary Signs – N$9,890

- N#A JAQNA AIRSTRIP REHABILITATION

Thormahlen & Cochran Safaris strive to develop the N#a Jaqna conservancy as much as possible. The N#a Jaqna Airstrip at Mangetti Dune was built by the South African Military during the Bush War period in Namibia. The airstrip is a huge asset, just being neglected, and is worth millions of Namibian Dollars if it had to be built today.

Instead of using the Tsumkwe Airstrip in Nyae Naye Conservancy, we opted to rehabilitate the Mangetti Dune airstrip. The Cost to rehabilitate the Airstrip is huge, but is worth it for us, as we feel that we must fly our clients into the concession where they hunt. The location of the Airstrip close to Mangetti Dune enables us to let clients see and experience the Mangetti Dune community.

We finished clearing the Airstrip, removed all trees and obstacles that gathered over the last 28 years since the end of the war.

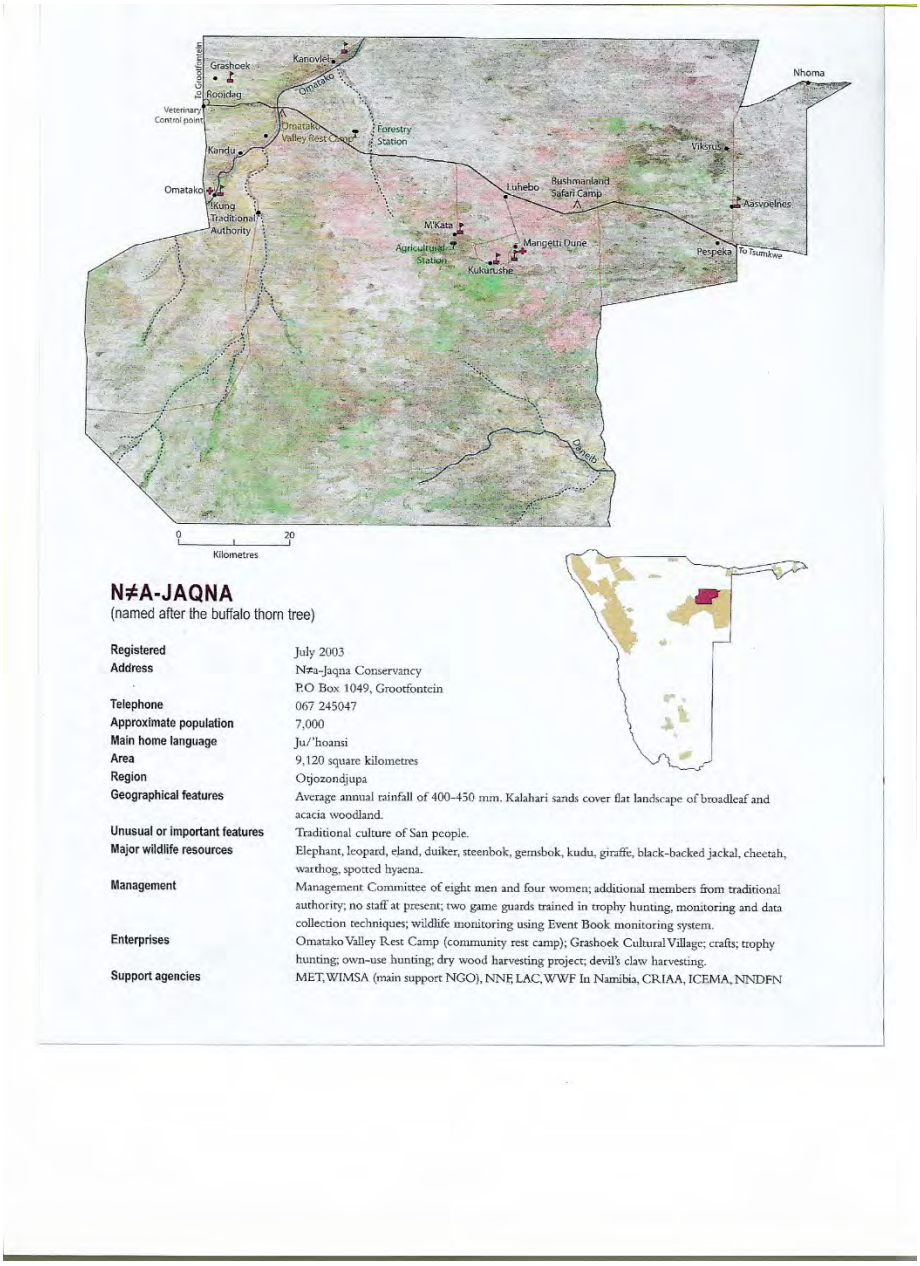
AIRSTRIP REHABILITATION COST-2018

- Casual Labor Cost – N$54,000
- Grader Cost – N$6,000
- Vehicle Cost -N$40,000
- Big Game PH Salary Cost – N$50,000
- Steel Wire to fence off Airstrip for Airplane Safety – N$33,000
- Anchor Poles – N$12,000
- Dropper Poles – N$21,700
- Trailer Rental -N$8,500
- Steel Gate – N$1,000
- Windsock -N$3,500
- Windsock steel post -N$1,000
- Cement -N$2,000
- Molopo Tree Poison – N$3,600

TOTAL AIRSTRIP COST – N$236,300

d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city:

Concession Location: Located in the Bushmanland of Namibia.
South of the Kavango Region boundary of Namibia
West of Nyae Nyae Conservancy block
North of Ondjou Conservancy block
Closest Town: Tsumkwe town in Nyae Nyae conservancy
Closest City -Windhoek the capitol of Namibia which is 650 km away.



N≠A-JAQNA
(named after the buffalo thorn tree)

Registered	July 2003
Address	N≠a-Jaqna Conservancy P.O Box 1049, Grootfontein
Telephone	067 245047
Approximate population	7,000
Main home language	Ju/'hoansi
Area	9,120 square kilometres
Region	Otjozondjupa
Geographical features	Average annual rainfall of 400–450 mm. Kalahari sands cover flat landscape of broadleaf and acacia woodland.
Unusual or important features	Traditional culture of San people.
Major wildlife resources	Elephant, leopard, eland, duiker, steenbok, gemsbok, kudu, giraffe, black-backed jackal, cheetah, warthog, spotted hyaena.
Management	Management Committee of eight men and four women; additional members from traditional authority; no staff at present; two game guards trained in trophy hunting, monitoring and data collection techniques; wildlife monitoring using Event Book monitoring system.
Enterprises	Omatako Valley Rest Camp (community rest camp); Grashoek Cultural Village; crafts; trophy hunting; own-use hunting; dry wood harvesting project; devil's claw harvesting.
Support agencies	MET, WIMSA (main support NGO), NNF, LAC, WWF In Namibia, CRIAA, ICEMA, NNDFN

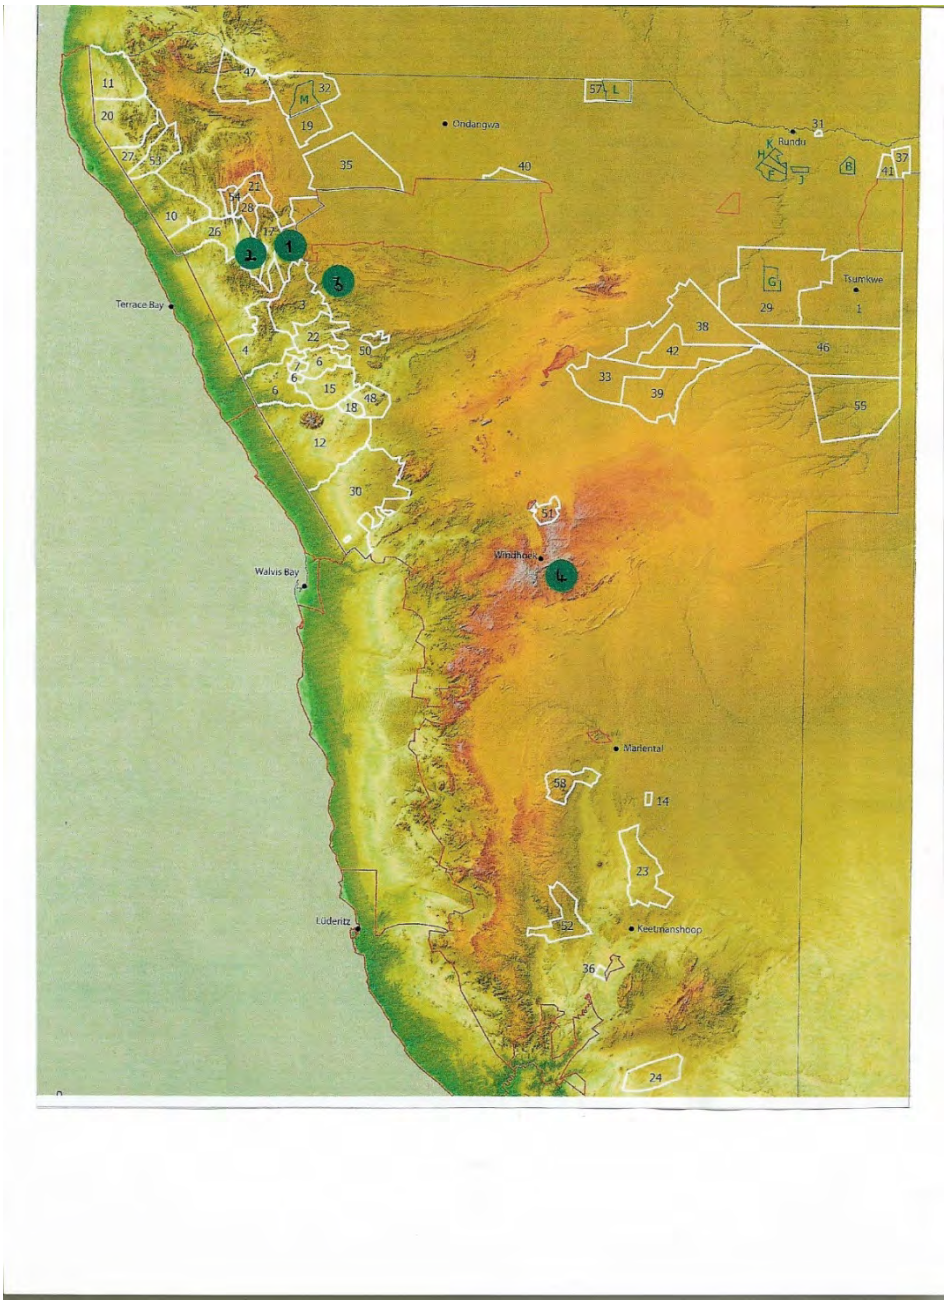
Kilometers

The N#a Jaqna block is number 29 on the below map.



e. If the concession borders a national park, please provide the park name: Concession does not border the Khaudum National Park, but lies 30 km south west of the Park

f. Description of general and distinctive habitat features and any water features:

Habitat:

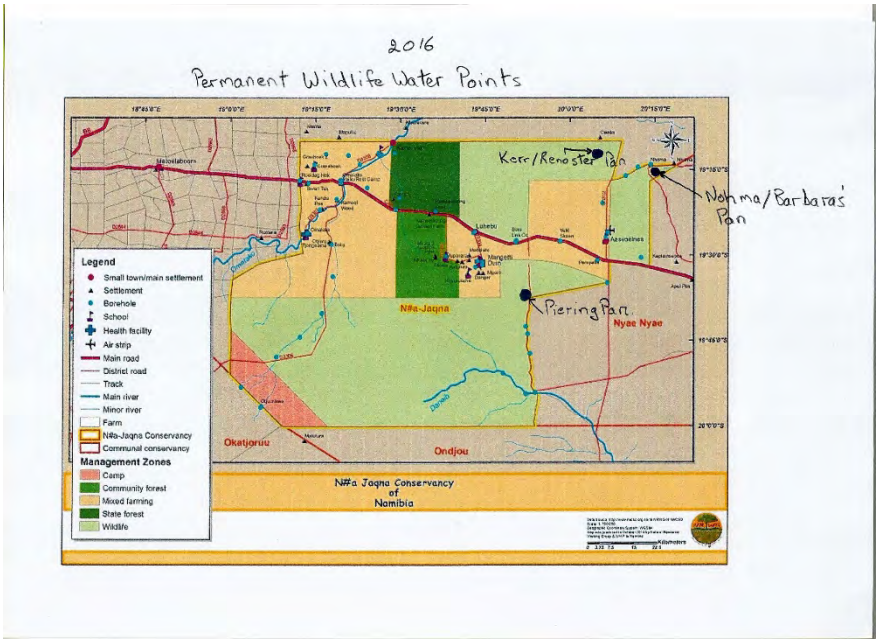
Average annual rainfall of 400-450 mm.

Kalahari sands cover flat landscape of broadleaf and acacia woodland.

Prehistoric dunes formed by Eolic sands blown in from the west coast of Namibia offers excellent habitat of broadleaf trees, yearly grass, rose thorn and raisin bush on the dunes while the area between the dunes ("dune streets") have plenty of climax grass species, black & white thorn acacia, and silverleaf terminalia trees offering a big variety of food for herbivores (browsers) as well as elephant. Some huge grass plains exist in the concession making it the ideal habitat for grass feeding species like springbuck, Burchell zebra, and red hartebeest as well as predators like cheetah which needs open spaces to hunt.

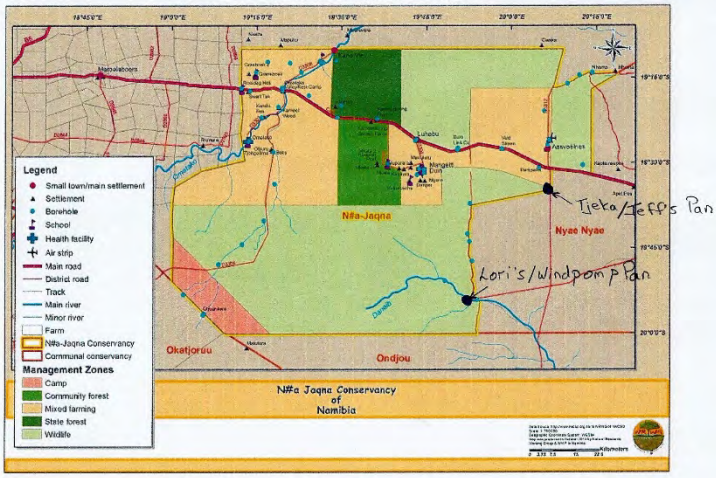
Water Features:

A number of Permanent Wildlife Water points (PWWP's) have been established in the N#a Jaqna Concession Block since 2016 when we started operating in the block.



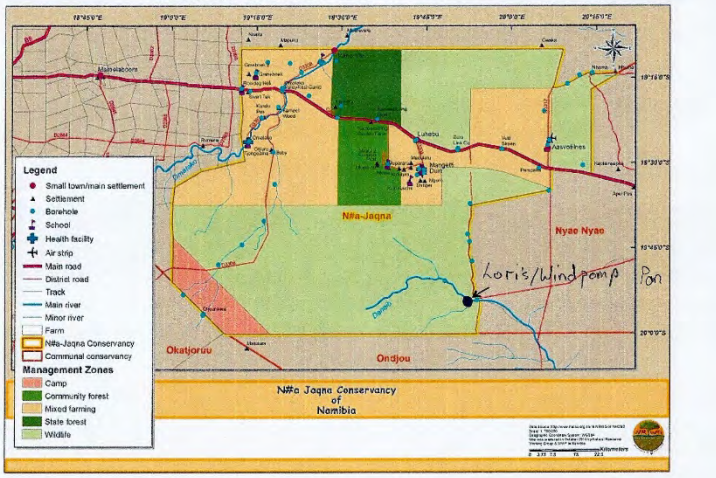
2017

Permanent Wildlife Water Points

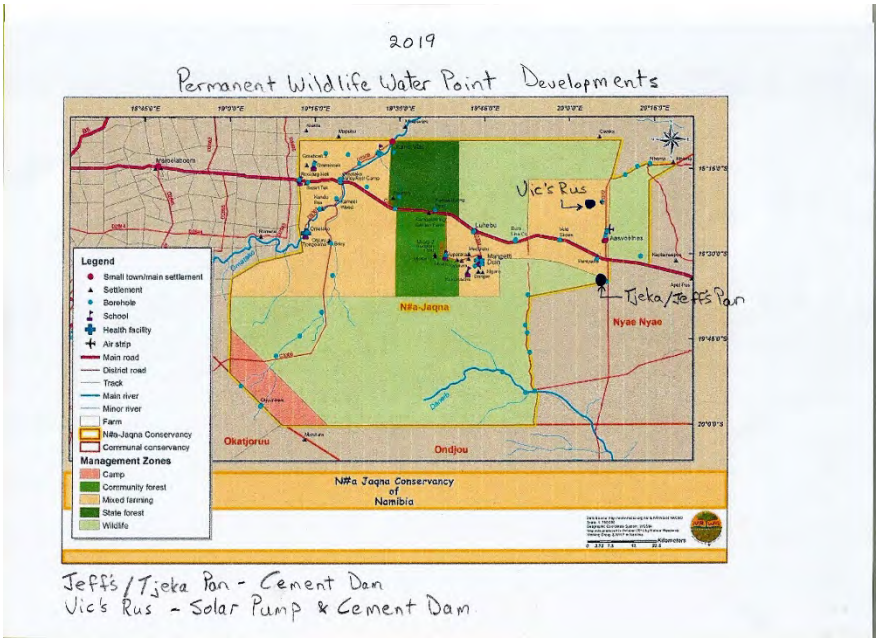


2018

Permanent Wildlife Water Points



Lori's Pan Repaired and Solar System re-installed.



TOTAL WATER DEVELOPMENT COST – 2018

Thormahlen & Cochran Safaris removed the entire Solar Panels and Pump at Lori's Pan and transported it back to Windhoek to be repaired.

Total invested in Wildlife Water Points in 2018 in N#a Jagna Conservancy is:

- Company Vehicle Transportation of Solar's to Windhoek and back – N$19,536
- Repair Cost at Cedar Solar – N$26,000
- Cement Cost – N$1,000
- Casual Labour Cost – N$6,000
- PH Labour Cost – N$11,666
- Steel Pipe, Welding Rods, Grinder blades etc. – N$1,200
- Petrol for Generator Welder– N$4,000
- Trailer Rental -N$13,600

TOTAL COST INCURRED 2018– N$83,002

Total Invested in Wildlife water Points from 2016-2018 in N#a Jaqna Conservancy:
Wildlife Water Point Cost 2016 – N$590,129
Wildlife Water Point Cost 2017 – N$232,000
Wildlife Water Point Cost 2018 – N$83,002
TOTAL COST INCURRED 2016-2018 – N$905,131

3. Are there any communities living in the concession? _X_ Yes __ No

   a. If so, estimated number of people or villages in the concession?

Approximate San (Bushman) Population- 7,000

4. Are there communities bordering this concession? _X_ Yes __ No

   a. If so, estimated number of people or villages around the concession?

Approximate Populations:
Nyae Nyae Conservancy on Eastern border- 2,300 San tribe
Ondjou Conservancy on southern border- 2,000 Otjiherero tribe
Kavango Region on northern border– Cattle Farms -Kavango tribe
Western Border- Cattle Farms – Mostly White Farmers

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	Dense	450-550	Rapidly Upwards due to PWWP (permanent wildlife water point) installations	Trail cameras at Water Points /Game Scout Sightings / Sightings by Hunting Guides / Tracks /MET
Lion	None	None	None	N/A
Leopard	Abundance	112-120 Average territory size is 8,000 ha	Stable	Trail Cams /Tracks/Sightings in Daytime
Cheetah	Sparse	20	Stable over last 3 years. Would like to relocate some cheetah with into the concession with collars when more game is available	Tracks / Sightings
African Wild dog	Dense	22-25	Stable over last 3 years. Would like to collar some Wild Dog when more game is available	Tracks/Sightings on the road and at waterholes
Caracal	Dense	100 +	Stable	Tracks / Sightings
African Wildcat	Dense	100 +	Stable	Tracks / Sightings
Spotted Genet Cat	Dense	100 +	Stable	Tracks / Sightings
Spotted Hyena	Average	30 +	Stable	Tracks / Sightings / Trail Cams

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Brown Hyena	Dense	75 +	Upwards	Tracks / Sightings / Trail Cams
Giraffe	Sparse	4-5	Stable	Tracks/Sightings
Cape Eland	Average	400 +	Upwards	Tracks/Sightings
SG Kudu	Sparse	100	Stable	Tracks/Sightings
Blue Wildebeest	Sparse	20	Stable	Tracks / Game Scouts
Steenbuck	Dense	1,000	Stable	Sightings / Tracks
Common Bush Duiker	Dense	1,000	Stable	Sightings / Tracks
Gemsbuck	Average	400 +	Upwards	Sightings / Tracks
Roan Antelope	Sparse	32 - 37	Upwards – Roan coming in from Nyae Nyae due to PWWP's installed on our Nyae Nyae border	Sightings / Tracks
Porcupine	Abundance	1,000 +	Stable	Sightings / Tracks
Guineafowl	Abundance	1,000 +	Stable	Sightings / Tracks
Francolin	Abundance	2,000 +	Stable	Sightings / Tracks
Doves	Abundance	10,000 +	Stable	Sightings / Tracks

6. Total employment number:

   Permanent Camp Staff – 6

Other: _____				

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? _X_ Yes __ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution

Communities gets 100% of money contributed by Hunters for non-exportable game (Own Use Quota). The Donation for a Non-Exportable elephant is US$15,000 of which US$3,500 goes to the community, and the rest is used to establish PWWP's in the concession as wildlife water points is our primary development goal. Without water the concession is just a "Green Desert" because all surface water seeps into the sandy soil. Two non-exportable elephant is on quota yearly. The Communal fee is a contractual fee.

Our clientele is primarily USA citizens who donate SCI Blue Bags with school stationary supplies. Each hunter hunting in the conservancy donates between one and two SCI Blue bags with school stationary at a value of US$200 each bag. Hence a minimum of 5-10 SCI Blue Bags is donated at a value of N$13,500 to N$27,000. The SCI Blue Bag donations is a Voluntary fee.

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

c. Does the company provide game meat to nearby communities? _X_ Yes __ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:

All the meat from trophy animals hunted, as well as the two Own Use Elephants on quota, must be delivered to community villages in the concession within 24 hours. The Conservancy Management Committee hands the trophy hunting operator a list of villages that need to get meat. Every villages have a representative that has to sign for the meat when delivered.

This is an Obligation stipulated in the Trophy Hunting Agreement. Failure to do so is punishable with a fine of N$22 per kilogram of the average carcass weight of the different animals. Failure to pay the fine is a breech of contract with immediate suspension.

Meat Value – N$:
Elephant x 4 @ 4,500 kg carcass weight @ N$22 / kg = N$396,000
Eland x 1 @ 350 kg carcass weight @ N$22 /kg = N$7,700
Gemsbuck x 2 @ 100 kg carcass weight @ N$22 = N$4,400
Warthog x 1 @ 30 kg carcass weight @ N$22 /kg = N$660
Steenbuck x 4 @ 7 kg carcass weight @ N$22 /kg = N$616
Duiker x 2 @ 10 kg carcass weight @ N$22 / kg =N$440
Total Annual Meat Value = N$409,816.00

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.

Very little fields in the concession area. Up till now no PAC animals declared.

The N#a Jaqna Concession block is not a horticulture area, and very little crops are raised. Mainly cattle, goats, donkey, and horses are raised by community members.

When an elephant damages any property, problem elephant situations are raised by the local community and it is addressed with the Chairman of the Community. The chairman then reached out to the Minister of Environmental and Tourism, who investigates the Wildlife Human conflict, and approves the problem animal permit in writing when enough evidence is collected by the Ministry. The Chairman then reached out to the Hunting Operator to provide a client. If a suitable client is found, there is a certain time limit to hunt the animal and the permit will be issued with the client's details.

The Operator must pay the community a predetermined contractual fee for the problem animal, and the meat has to be distributed to villages on the meat delivery list as per contract

f. Please describe any consolation payments made to residents damaged by game species. What currency are the expenditures reported in?

No consolation payments made to residents as the only cattle in the concession is owned by illegal landgrabbers. Court eviction case was won by the Conservancy in November 2017, some of the illegal farmers left, but some is still hanging in there. Any damages on livestock is welcomed by the San community in the concession.

EXECUTIVE INVESTMENT / COST SUMMARY

TOTAL SALARIES & TRAINING COST- 2018

Thormahlen & Cochran Safaris spent the following amounts on training and labour in 2018:

- **Training of Camp Staff-N$75,500**
- **Camp Staff Salaries – N$120,000**
- **Casual Labour Salaries – N$108,000**
- **TOTAL COST – N$303,000**

TOTAL WATER DEVELOPMENT COST – 2018

Thormahlen & Cochran Safaris removed the entire Solar Panels and Pump at Lori's Pan and transported it back to Windhoek to be repaired.

Total invested in Wildlife Water Points in 2018 in N#a Jagna Conservancy is:

- Company Vehicle Transportation of Solar's to Windhoek and back – N$19,536
- Repair Cost at Cedar Solar – N$26,000
- Cement Cost – N$1,000
- Casual Labour Cost – N$6,000
- PH Labour Cost – N$11,666
- Steel Pipe, Welding Rods, Grinder blades etc. – N$1,200

- Petrol for Generator Welder– N$4,000
- Trailer Rental -N$13,600

TOTAL COST INCURRED – N$83,002

Total Invested in Wildlife water Points from 2016-2018 in N#a Jaqna Conservancy:
Wildlife Water Point Cost 2016 – N$590,129
Wildlife Water Point Cost 2017 – N$232,000
Wildlife Water Point Cost 2018 – N$83,002
TOTAL COST INCURRED 2016-2018 – N$905,131

Proposed Wildlife Water Point Investment on Tender:
Wildlife Water Point Cost Proposed 2016 -N$200,000
Wildlife Water Point Cost Proposed 2017 -N$250,000
Wildlife Water Point Cost Proposed 2018 -N$250,000
TOTAL PROPOSED WWP COST – N$700,000
(WWP-Wildlife Water Point)
This leaves us with a credit balance of N$204,631 compared to our proposed goal of N$700,000 in the first three years.

- Windsock steel post -N$1,000
- Cement -N$2,000
- Molopo Tree Poison – N$3,600

TOTAL AIRSTRIP COST – N$236,300

TOTAL DEVELOPMENT / INVESTMENT COST - 2018

TOTAL INVESTMENT - N$783,385

was invested in N#a Jagna conservancy in 2018 in order to develop the previously marginal concession into a prime trophy hunting concession.

We saw the potential and took the risk to invest an enormous amount of money, time, and labor into the concession in 2016. Something no trophy hunting operator was willing to do in the last 11 years prior to us getting involved. And it is paying off as huge amounts of game is moving into the area!!

- Wildlife water points x 5 are now operational with Solar Pumps Installed.
- Cutline's of over 50 km were made.
- An additional 40 km of Hunting Roads were cleared.
- A super luxury Trophy hunting camp was built.
- Camp is fully Operational.

With five San community members trained to run and manage

11. How many U.S. clients did the company have in the past three years, and what percentage of the company's clients were from the U.S.?

We operate in South Africa and Namibia, and the figures below, is for the whole operation. In N#a Jaqna we only hunt what is allocated on quota, and it is fixed by the Government. The Namibian Government, specifically the Minister of Environment and Tourism, set strict quotas at the beginning of every three years, revising it at the end of each year when the Hunting operator must submit a Hunting Report on that specific year. So, before the client arrives, the hunting operator must take out a hunting permit – and this is only available if it falls within the quota that was pre-approved.

Current N#a Jaqna Trophy quota: 2 x trophy elephant, 2 x own use elephant, 4 x Steenbuck, 3 x leopard, 2 x Oryx, 1 x warthog. 1 x duiker.

The table below is for the total of Thormahlen & Cochran's concessions:

	Hunting elephant	Hunting lion	Hunting leopard	Hunting all other species
Number of U.S. clients	2015: 4 clients 2016: 9 2017: 5 2018: 4	2015: 2016: 2017: 2018: 1	2015: 2 clients 2016: 9 2017: 9 2018: 10	2015: 126 clients 2016: 110 2017: 141 2018: 83
Percentage of U.S. clients	2015: 99 % 2016: 98 % 2017: 100 % 2018: 98 %	2015: 2016: 2017: 2018: 100 %	2015: 100 % 2016: 98 % 2017: 99 % 2018: 100 %	2015: 95 % 2016: 96 % 2017: 97 % 2018: 95 %
Trophy fees paid by U.S. clients – US$	2015: $220,000 2016: $495,000 2017: $275,000 2018: $260,000	2015: 2016: 2017: 2018: $75,000	2015: $42,000 2016: $225,000 2017: $256,000 2018: $265,000	2015: $303,715 2016: $1,075,000 2017: $997,375 2018: $410,110

12. Dollar amount and percentage of the company's revenue from U.S. clients:

    95 %

13. Other information: Please provide a narrative of other enhancement information about the company, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes, restocking), management activities, research, etc.

    ENHANCEMENT INFORMATION

    Hunting Policies:

    Elephant – Our Company policy is to hunt only bulls older than 55 years of age. We work hard not to hunt elephant under 50 years of age, irrespective if it is a Trophy Bull, or Own Use bulls. We would like to change the Own Use bulls on quota to Trophy Bulls as it is financially much more lucrative for both the community and the hunting Operator. At the moment Own Use Bulls is hunted with no payment towards the community. All monies made from the Own Use Bulls is invested back into the hunting concession by the operator for the instalment of Wildlife Water Points. Hunting post productive bulls ensures that the breeding is not disturbed and enhances trophy quality.

    We follow the Aging Policy adopted and used with great success by the APNR - Association of Private Nature Reserves which is the Private Reserves adjacent of the Kruger National Park. The APNR uses the Aging Policy of the Kruger National Park in South Africa with great success and accuracy to determine tusk weight and bull age.

    Leopard – Our Outfit policy is to hunt male leopard of only 8 years and older, with a minimum year boundary of 6 years of age. This ensures that the breeding males can breed till they are 8 years old, without any disturbance. It works well as our trophy quality in the N#a Jagna Conservancy is improving every year as we adopted this policy since we started in the concession in 2016. We also see much more big cats in the concession as it seems that by taking out the old males it gives the breeding males more freedom and less competition from post productive males.

    Resting Areas

    There are two huge areas in the center north and south of the concession that has no roads and is used as resting / breeding areas. The concern however is that these two areas are used by poachers to operate from. We decided to open roads in these two areas, however conduct no hunting in these two areas, yet do anti-poaching patrols to keep poachers at bay.

CONCESSION IMPROVEMENTS

Trophy Hunting Camp

Please see the Annual Report for a detailed cost outlay of the Trophy Hunting Camp built, and donated back to the community after the third year, so the community can lease it to us to create a yearly income from the asset.

Airstrip

There are 2 Military Airstrips in the N#a Jagna Conservancy, which was used by the South African Defense Force in the 80's – ONE AT the main village Mangetti Dune, and the second at another small village called Aasvoelnes. The Trophy Hunting Camp is located 19 kilometers from the airstrip at Mangetti Dune. We opened the airstrip , got permission to fence it off from the Traditional Authority, and graded it so we can charter our clients to this strip. Previously we are used the Tsumkwe airstrip in Nyae Nyae conservancy which is 70 km from the trophy hunting camp.

Roads

Please see Annual Report for Roads opened, and Cutlines (borders) opened between N#a Jagna Conservancy and Nyae Nyae Conservancies

Wildlife Water Points

Please see annual report for detailed outlay of Wildlife Water points installed in the concession.

Anti-Poaching Program

The N#a Jagna Conservancy Concession was a "green desert" up until we started operating in it. It was even advertised for closed bidding by the WWF as a "marginal" concession, with lot of challenges, i.e. illegal landgrabbers, illegal fencing, and no very limited water holes in the concession. The previous operator called "Eden Safaris", did nothing in the concession for 11 years it operated in the concession.

When we won the bid for the concession, we used own funds and drilled 2 strategic boreholes on the border with Nyae Nyae and the Kavango region. Within 10 months we had two resident herds of elephant and lots of other game – please see Annual Report for detailed outlay and maps. We also installed solar pumps at three existing boreholes to supply a constant supply of water which is very important to get game to become resident in the concession.

Our enhanced activity in the concession is deterring poachers at the moment, yet we see more and more horse and dog tracks as the poachers is entering from the neighboring Ondjou Conservancy, which is also one of our concessions we acquired at the beginning of this year! So we will have to start a very well-coordinated and managed anti-poaching program ASAP in both concessions. At the moment we use 20 casual workers to clear roads, and the same xasuals work as an anti -poaching squad during December, January and February while the season is closed (December & January), and in February we are still at the USA Hunting Conventions.

Our biggest constraint is funding! This concession is a pristine area of 2,25 million acres with the Wildlife Area being at least 750,000 acres big. The lack of funds is a big problem. We have approached SCI but they said they don't finance such programs. I am currently working on completing a Concession Grant Request to submit to DSCF- Dallas safari Club Foundation in the hope that we can get a grant to install more water points, open roads, and re-introduce game species so much needed by the San Community.

Up until then all our efforts are self-financed with contributions from hunters.

Restocking of Game

During the eighties locals, as well as white Namibian hunters say that Springbuck, Red Hartebeest, Warthog, Blue Wildebeest, Southern Impala, Ostrich, Eland, Tsessebe, Gemsbuck, Kudu, Giraffe, even Sable, and Roan occurred through the whole area in herds of hundreds and thousands. Today there are only eland, gemsbuck, and kudu left. We will have to re-introduce the species wiped out!

For that we need assistance with financing!

COMMUNITY UPLIFTMENT

SCI Blue Bag Donations

Thormahlen & Cochran Safaris prides ourselves that we motivate our clients to donate a " SCI Blue Bag" full of school stationary worth US$200 at a local school in the communal areas. Last year we donated around 70 blue bags at schools.

Food for School Children

Poverty in the Communal Areas is a way of live. It is disturbing to see school children who only get one meal a day at the school, consisting of grits and soya sauce. We have clients who donate funds towards the purchase of maize meal and soya sauce which we donate at the local schools so the children can be fed.

Meat Delivery

We pride ourselves that we deliver all meat, and intestines of all hunted animals within 24 hours to the list of villages supplied by the Management Committee. Even the remotest villages is served with meat to ensure that the community benefits from the hunted animals.

MANAGEMENT ACTIVITIES

RESEARCH

African Wild Dogs

There are around 22-25 African Wild Dogs in the N#a Jagna concession. We would like to put satellite collars on some of the dogs to be able to monitor their movement in the area. They are critically endangered as a species, and we would like to assist in securing their future by constantly monitoring them in our concession area. This will provide valuable research information as to their hunting success, and movement in the concession area.

Cheetah

A very small number of cheetah is present in the concession area. After securing the Wildlife Water Points; when re-located game species numbers are high enough, we would like to release cheetahs in the concession area. Some of the cheetah will also get satellite tracking collars to monitor and study their progress.

14. I declare that the foregoing is true and correct.

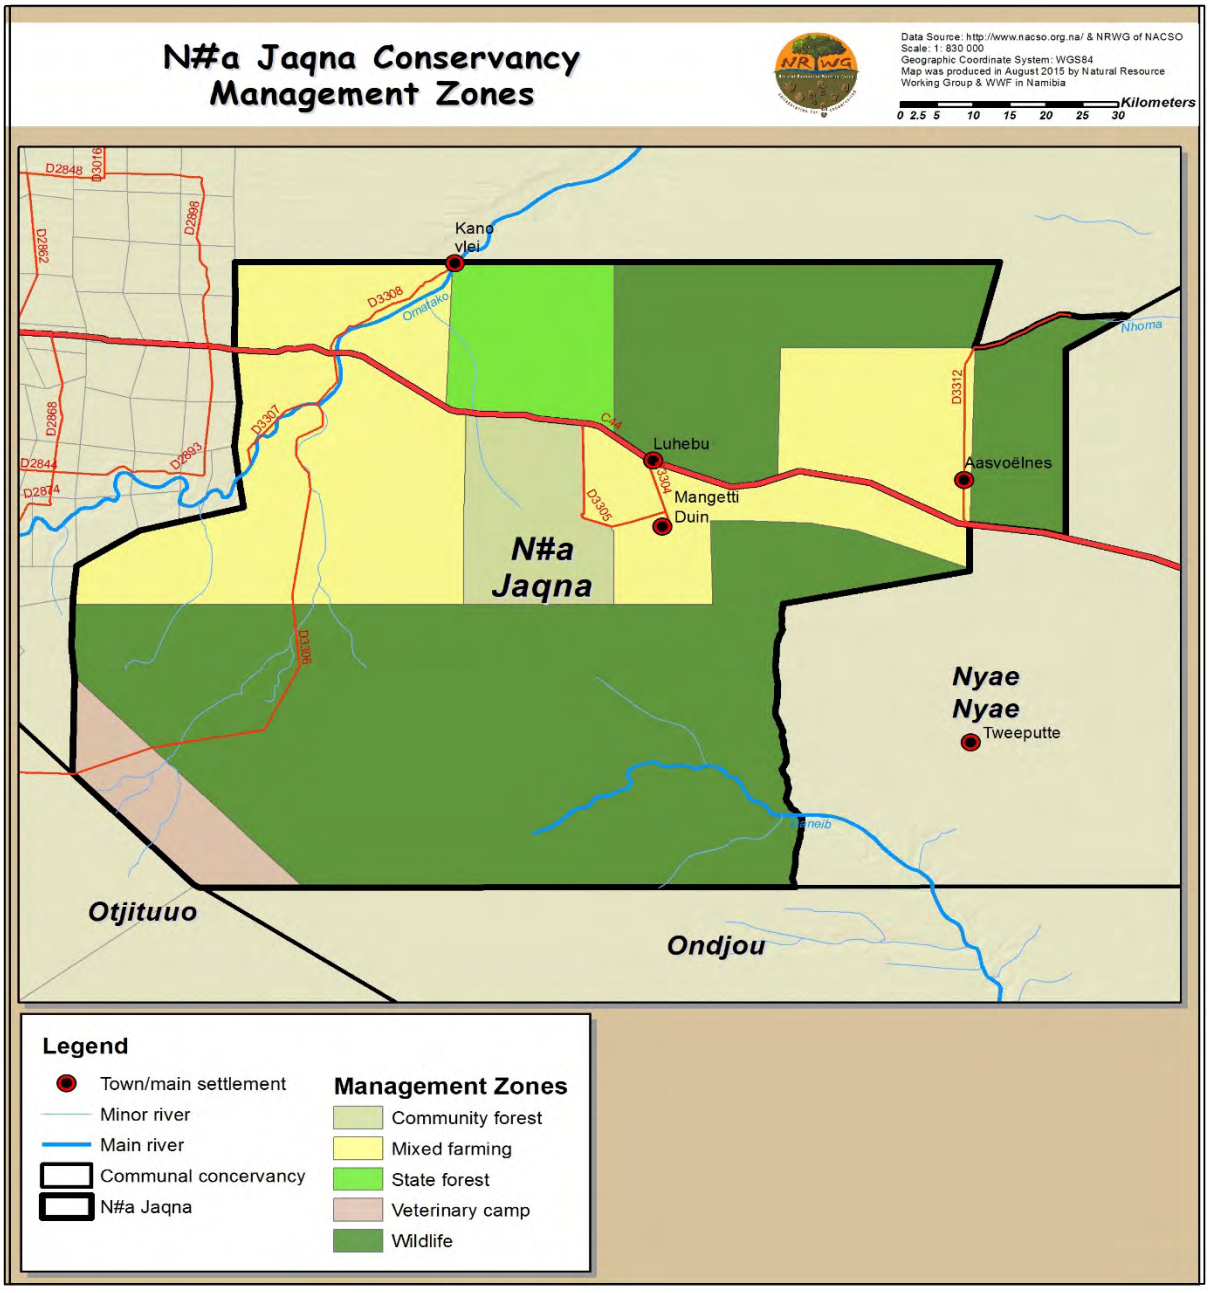
Signature:

Name: **Peter Thormahlen** Title: **Mr**

ATTACHMENT – 1 - Wildlife Water Point Development Schedule

1 **SCHEDULE 4**

Pledged activities and development;



2 **SCHEDULE 4**

Pledged activities and development;

Thormahlen & Cochran shall carry out all the items as stated in the Proposal to Na Jaqna for the first phase of the first three (3) years of the contract and attached as part of this agreement.

1. TROPHY HUNTING CAMP

T&C Safaris will build a Trophy Hunting Camp in N#a Jagna conservancy to Operate from. This camp will be built after an intensive study of the concession area keeping in mind water availability, impact on the concession, accessibility to hunting camp, distance from conservancy office etc. As well as recommendations from the N#a Jagna conservancy committee.

The Trophy Hunting Camp's permanent Structures will become the property of the Conservancy after the 3 year period expired.

2. WILDLIFE WATER POINTS

Please see Attached Map of N#a Jagna Conservancy.

The Wildlife Area of the concession was divided in three Zones:

- Block A
- Block B
- Block C

The Tender period is three years. Although it is understandable why an initial 3 year period is granted by the MET and WWF, it puts a lot of challenges in the road for a proper development program. The period is just too short for an operator to invest capital and to recover it before the tender period expires. On the other hand if the operator takes his chance and develops the conservancy as it should be developed, then I assume that his lease will be extended giving the opportunity to get the capital investment back over time. And hopefully the trophy quota will be raised due to more elephant in the concession which allows for more income and profits allowing capital investment to be recovered.

However given the limitations T&C Safaris proposes the following development plan:

BLOCK A

PHASE 1

Year One of Tender - 2016

Development of Block A would take part first as there are boreholes already in this block, but they are not in working order. It is also the block that borders Nyae Nyae conservancy which gives us the biggest opportunity to attract elephant into N#a Jagna, and to get them to become resident over time.

- Four existing Boreholes marked **+1, +2, +3, +4** on the Map in Block A will be cleaned out and Solar pumps installed with a watering hole. Two holes on the eastern border of N#a Jagna**(+1, +2)** bordering Nyae Nyae, and two boreholes in the western side of Block A **(+3, +4).** We budget on N$50,000 per solar pump and panels if the boreholes still have water and just need to be repaired and a solar pump and watering hole installed. If boreholes are dry we will still invest the N$200,000 for the year by drilling waterholes close to the old ones and installing solar pumps. **Reason being that + waterholes are located in river beds which are natural feeding areas for migrating elephant bulls. So by installing waterholes here enlarges the chance for migrating elephant bulls to smell the water while feeding in the riverine area so that they can discover the watering holes, use them and get used to them being permanent.**
- **Hence a Total of N$200,000 for 2016 will be invested**

PHASE 2

Year Two of Tender – 2017

- During this Phase Two strategic waterholes will be drilled in Block A. Depending on where the most elephant activity is the two holes will be drilled and solar pumps and watering holes installed. Our budget is N$125,000 per waterhole. Possibilities are Numbers **1, 2, or 3** on the map. **Reason being that numbers 1 & 2 is river beds which is natural feeding areas for migrating elephant bulls. So by installing waterholes here enlarges the chance for migrating elephant bulls to smell the water while feeding in the riverine area so that they can discover the watering holes, use them and get used to them being permanent.**
- **Hence a Total of N$250,000 for 2017 will be invested**

PHASE 3

Year Three of Tender – 2018

- During this Phase another Two strategic waterholes will be drilled in Block A. Depending on where the most elephant activity is the two holes will be drilled and solar pumps and watering holes

installed. Our budget is N$125,000 per waterhole. Possibilities are Numbers **4, 5, or 6** on the map. Number 5 waterhole is once again a riverine area which enhances the chance of elephant to bump into the waterhole. However now we go one step further and install watering holes **4,** and **6** in a "dead" zone where there may never have been even temporary water due to the Kalahari sand. With watering holes **1, 2, 5,** and **+ 3**, and **+ 4** having permanent all year water elephant will start wondering into this previously "dead "zone and back to the watering holes they know –numbers **1, 2, 5**, and **+ 3**, and **+ 4** to drink**.** Eventually they will discover watering **holes 6**, and **4** and the whole block will start to be utilized by migrating elephant which will over time turn into resident elephant.

- **Hence a Total of N$250,000 for 2017 will be invested**
- We will **drill Boreholes** and **install Solar Pumps** with watering holes – please see Development & Management plan outlay.

- **Transportation** is very important for the community due to the remoteness of the conservancy in the Bushmanland. However Wildlife Water Points is also a very high priority! Thormahlen & Cochran Safaris undertakes to let the N#a Jagna conservancy choose between either the Drilling of boreholes for Wildlife Water points, or a Vehicle in one of the three years. It is a difficult choice because the community may need a vehicle to transport community members, but on the other hand the only way we can develop the trophy hunting concession is by installing wildlife water points to attract elephant and other game into the conservancy.

- However, in the event that MET decides to enlarge the trophy quota, or if a Problem Elephant comes up and we sell it to a hunter, we undertake into buying of **a vehicle** for the conservancy. In the event of **a Problem elephant** we undertake to buy the vehicle in that year with the money made from hunting the bull with a foreign hunter, while we still proceed with the Wildlife Water Point Development & Management Plan. We do not encourage the declaring of a problem elephant just for the sake to buy a vehicle for the community! In the event that an elephant becomes a problem we undertake to use the funds made from the selling of that specific bull to buy a community vehicle.

- If there is a need for **a Satellite Dish & Television**, we undertake to buy a television with Satellite TV for the community hall as recreation, if a Community Hall does exist. If there is no **Nampower** we will also install **a Solar Power system with Batteries** for the community.

- If a **Community Hall** does not exist T&C Safaris undertakes to liaise with the N#a Jagna community into the building of a Community Hall if we are the successful bidder and we get another 2 years extension on the lease, so that we have a Five Year Contract..

- We will **Train and Sponsor the Training** of the members of the community as specified.

- In the event that the community needs **Salt Blocks** for their Cattle & Goats T&C Safaris will buy one ton of Salt Blocks per year for the community cattle.

- Training of the appointed Tracker to become **a Hunting Guide** in Year 3 (hence in October of the second year he will be sent to the hunting academy) of the Contract by sending him to the Volker Gruellmann Hunting Academy. The reason for sending him to the hunting academy in year 3 is for the member to gain hunting experience – on elephant, as well as baiting and hunting of leopard. It will be fruitless to send the member to the hunting academy if he has no trophy hunting experience. T&C Safaris undertakes to utilize the community member Hunting Guide so that he gain experience to become a master Hunting Guide and eventually a PH. With enough experience and if the potential exists the member could eventually qualify as a Big Game PH.

- When the N#a Jagna appointed Tracker qualifies T&C Safaris will appoint another **Tracker** in the community so that a Total of Six community members are permanently employed from year 3 onwards

- **Trophy Hunting Camp** will be built to conduct hunts from. Camp will consist of One Guest tent with en-suite bathroom, one Dining Tent / Lapa, one Kitchen tent, One Manageress / PH tent (tent will be divided in half to accommodate separate rooms), one PH /manageress Bathroom, and Five Staff Tents. A Skinning Area & Salt Room will be built for trophy skins. In the event that the Trophy Hunting Quota is enlarged a Second Guest Tent will be erected. The permanent fixed structures in the trophy hunting camp will become the property of the N#a Jagna community after the 3 year contract expires. In the event that our lease is extended we will negotiate with the community to Pay Rent to the community.

- **Donating of school supplies**. Our foreign hunting clients bring school supplies on a regular basis to Namibia – pencils, rubbers, etc.

3 SCHEDULE 5A

Envisaged Employment and Salaries:

Type of Local Staff To Be Employed	Estimated Number To Be Employed	Estimated Duration of Employment (please specify the number of days.)	Estimated Salary per Time of Employ (days)
Camp Staff- Trainee Chef/Manager-Female	1	365 days/12 months	N$65.75 p day/N$2000 p month
Skinner-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
Tracker-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
Other 1. Camp Attendant-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
2. Camp Lady -Female	1	365 days/12 months	N$65.75 p day/N$2000 p month
3.			

4 THE OPERATOR SHALL PROIVIDE FOOD TO ALL THE STAFF DURING THE PERIOD WHEN THEY ARE ON DUTY

5 SCHEDULE 5B

Types of training by operator:

Number of Local People to be Trained	Types of Training To Be Provided	Estimated Length of Training	Proposed Training Site	Commencement of training
1	Chef/Manager training	12 months (see below)	Windhoek Politec and in camp	Feb /March 2016
1	Tracker	See below		March 2016
1	Skinner	See below		March 2016
1	Camp Attendant	12 months	In house training	March 2016
1	Camp Lady	12 months	In house training	March 2016

Dear Mr. Spindler,

Currently all of the applications within our office for the import of a elephant trophy are pending. Most of the African lion applications are gradually being finalized.

Sincerely,

Type of Activity:
Import of Sport-hunted Trophies of Southern African Leopard, African Elephant, and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Ham	Garrett	Scott	

2. Date of birth (mm/dd/yyyy)	3. Occupation	4. Affiliation/ Doing business as (see instructions)	
(b) (6)			

5.a. Telephone number	5.b. Alternate telephone number	5.c. Fax number	5.d. E-mail address
(b) (6)			(b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		

2. Tax identification no.	3. Description of business, agency, Tribe, or institution		

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name		

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Sahuarita	Az	85629	Pima	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☑ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: 156171 No ☐

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my kn[redacted] that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6)

Signature of a[redacted] permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 11-29-2017

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity:_____(Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity:__1__(Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity:_____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

      S17 56'3.77" E23 44'7.63" Sobbe Camp Katima Mulilo, Namibia

   b. Date wildlife was hunted: Hunted March 18th. Through April 8th 2016

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

      Tanned skin and ears, Tusks, Finished foot stools, Hair, Skull

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

      Yellow Shark Holdings
      PO Box 81413, Olympia
      Windhoek, Republic of Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business	Yellow Shark Holdings
Name: Address:	PO Box 81413, Olympia
Address:	Windhoek, Republic of Namibia
City:	
State/Province:	
Country, Postal Code:	

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: (b) (6) Date: 11-29-2017

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Garrett Ham
(b) (6)

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Ndumo Safaris (Namibia) motivational letter for Enhancement permits for elephant and leopard imports into the USA:

Ndumo Safaris Ltd is a northeast Namibia based outfitter striving to combine sustained big game hunting with a focus on wildlife conservation within 3 vast concessions of land. The concession is managed in an integrated approach with both the Namibian Government and local communal conservancies to enhance and benefit wildlife through conservation. This partnership approach with Ndumo and the communal conservancies, which have been awarded hunting quotas on 3 hunting blocks.

This communal conservancies' model of adopted by Namibia, especially those with a hunting quota awarded, works very well in helping local, impoverished communities to:

1) Co- exist on land that has elephants and leopard on them
2) Derive an income from the animals that occur on their communal land, sometimes on land that is not really suitable for eco-tourism
3) Create core hunting areas where no or very few livestock enters, thus creating a wildlife only zone
4) Create buffer zones around dedicated National Parks and human habitation
5) Decrease human/ wild game conflict
6) Create employment opportunities for local communities
7) Provide local communities, that are often live below the bread line, with much needed protein in the form of game meat
8) Create funds for these communities to do their own anti-poaching
9) Create funds for the Game Products trust fund, which helps them in developing the areas for wildlife, compensate them for wildlife conflicts and educate them on the value of wildlife in the area.

Currently, we own and operate the following concessions in the Caprivi / Zambezi region of Namibia:

- Sobbe communal conservancy
- Sikunga communal conservancy
- The joint venture area called Bwabwata East or Kwando core area, inside the Bwabwata National Park.

The Namibian government has adopted integrated park management with the residents of the land on which the National Park is situated. Park residents are mostly from the Barakwena tribe, a Khwe San bushmen minority group. The residents have formed the Kyaramachan Association to represent them and manage income from tourism and trophy hunting. Ndumo has been awarded the trophy hunting concession from the Association. Ndumo Safaris pays close to US$ 550,000 to both the Namibian government and local communities in concession and license fees per annum.

We currently employ 33 people from the region, paying them around double what the minimum requirements are. These jobs thus support 33 families from the region, where any type of permanent employment is scarce.

We further provide over a 100 metric tonnes of meat to the local communities per annum, in the form of game meat from the animals harvested.

Dear Mr. Garrett Ham,

The following is in response to your phone call received earlier today.

In response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service is revising its procedure for assessing applications to import certain hunted species like African elephants. We are withdrawing our countrywide enhancement findings for a range of species across several countries. In their place, the Service intends to make findings for trophy imports on an application- by-application basis. Please be aware that we continue to seek additional information directly from the relevant foreign Government Authorities to support our permit findings, therefore, applications are still under review.

Sincerely,

Anna Barry
Senior Biologist
USFWS/Division of Management Authority
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803
1-800-358-2104, ext. 1976 or 703-358-1976
Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT You may have noticed that our application forms expired 5/31/2017 . The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted. We do not accept applications via fax or e-mail.

To: "Barry, Anna" <anna_barry@fws.gov>

Anna, thanks for the update. I really appreciate your quick reply. I know you don't know an exact time frame for issuing permits again but I am trying to make a decision on what I should do with my trophy. Do you think it will be more than six months? The trophy Is currently sitting in Namibia and I am paying storage fees. My question to you is, if I export the trophy to South Africa to get started on some of the taxidermy (I want to make some leather products out of the currently tanned leather). Upon completion assuming I get my permit I would then export it from South Africa to the United States. Can I do this? And if so do I need to modify my current Cites permit that you have currently to review?

Thanks,
Garrett Ham

Dear Mr. Ham,

If the trophy will be exported from South Africa then you would want to provide us the address of the shipping company in South Africa. If you are not sure of the address at this time then I can put a note in the file to contact you before finalizing your application to confirm the shipping address. Unfortunately, I am not sure of the time frame for finalizing these applications.

Sincerely,

Anna Barry

To: "Barry, Anna" <anna_barry@fws.gov>

Please do note the file to contact me. Since it doesn't seem to be a problem to move the Elephant trophy from Namibia to South Africa for Taxidermy work then on to the US I may as well use this down time to get the work done. Thanks again for your quick feedback.

Thanks,
Garrett Ham

Ok, but just remember, if the trophy will be shipped from South Africa then the permits must show an U.S. and South Africa address. If the trophy is being shipped from Namibia, then the permits must show an U.S. and Namibia address.

Sincerely,

Anna Barry

Department of the Interior
U.S. Fish and Wildlife Service

Federal Fish and Wildlife Permit Application Form

OMB No. 1018-0093
Expires 05/31/2017

RCVD DEC 15 2017

Return to: U.S. Fish and Wildlife Service
Division of Management Authority (DMA)
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803
1-800-358-2104 or 703-358-2104

Type of Activity:
Import of Sport-hunted Trophies of Southern African Leopard, African Elephant, and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
KOBRIN	BRUCE	NICHOLAS	

2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
(b) (6)			

6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Las Vegas	Nevada	89117	CLARK	U.S.A

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No ☒

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the ...ement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: SOUTH AFRICA. GPS CO-ORDS IS 24 DEGREES 15' 35.40" SOUTH AND 30 DEGREES 55' 06.89" EAST. AREA/REGION OR PROVINCE IS LIMPOPO PROVINCE. CLOSEST TOWN OR CITY IS Hoedspruit
   b. Date wildlife is to be hunted: MARCH 19th THRU MARCH 26th 2018

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks). SKIN, TUSKS, TAIL, feet, ears

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):
SKINS TUSKS TAIL FEET EARS

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
SOUTH AFRICA, TOWN OR CITY IS Hoedspruit

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

152-31 135th Avenue, Jamaica, New York 11434
FAX 718-276-3300

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

SAME AS Listed

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Mike Red KOBRIN (b) (6) Las Vegas, Nevada
(b) (6)
(b) (6)

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☒ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

(b) (6) [redacted]

James Blake

Lake Havasu, AZ. 86406

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

James A. Blake (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name. Loxodonta Africana

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   Zeekoepan Game Farm P.O. Box 696 Pongola 3170
   Magudu Vergelegen Farm 639 R69 Magudu
   District Paulpietersburg Province=KwaZulu-Natal

   b. Date wildlife is to be hunted: April 1 2018 to Sept 1 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   Mr. W.D. Basson
   ID #: 6003065009084

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   NA

   b. Date wildlife was hunted:
   NA

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

NA

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

NA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). NA Have not hunted yet Ordinary Permit OP 1121/2018

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: NA
Address:
City:
State/Province:
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

no

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

no

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted no

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: N/A Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) Date: 4-17-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name. Loxodonta Africana

   b. Sex (if known). Male Age 5 years

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   N/A

   b. Date wildlife is to be hunted: N/A

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   Namibia, NYAE NYAE Conservancy, otjozondjupa region

   b. Date wildlife was hunted:

   23 October 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Stefan M Jacobs
SMJ Safaris

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Farm AAndster #915, P.O BOX 601
Grootfontein
Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: S.M. Jacobs
Business Name: SMJ safaris
Address: Farm AAndster #915, PO BOX 601
City: Grootfontein
State/Province:
Country, Postal Code: Namibia

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

N/A

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

N/A

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

N/A

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) Date: 4/17/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Botts	Michael	Richard	Mr.

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number
(b) (6) [redacted]	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/Initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #, P.O. Box)				
(b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Durango	Colorado	81303	La Plata	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
same				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Michael R Botts
(b) (6) [redacted]
Durango, CO. 81303

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Michael R Botts
(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   Loxodonta africana, African Elephant

   b. Sex (if known).
   male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   Zimbabwe, Mokore Ranch, Save Valley Conservancy

   b. Date wildlife was hunted:
   April 27TH → May 8TH

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
Mokore Safaris, Gary Duckworth

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
7 stable Close
Off Hunt Road
Borrowdale
Harare, Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Tammy
Business Name: Coppersmith
Address: 114 Southfield Parkway, Suite 170
City: Forest Park
State/Province: Georgia
Country, Postal Code: 30297

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?
see attached documents

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
$15,000 trophy fee - landowner & government fees
$20 per day per hunting client - conservation fees

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
Mokore Safaris has implanted and fully funded anti-poaching units in their areas. See their website for more information, http://www.mokoresafaris.com/conservation.html

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

Import of Sport-hunted Trophies of Southern African Leopard, African Elephant, and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Sanson	David	B	

2. Date of birth (mm/dd/yyyy)	3. Occupation	4. Affiliation/ Doing business as (see instructions)	
(b) (6)			
5.a. Telephone number	**5.b. Alternate telephone number**	**5.c. Fax number**	**5.d. E-mail address**
(b) (6)			(b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Walnut Creek	CA	94596	Contra Costa	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)
(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country
Concord	CA	94520	Contra Costa	USA

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue:_____ No ☑

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other applica(b) (6) 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of m false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: n/a (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: n/a (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: n/a

   b. Date wildlife is to be hunted: n/a

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

n/a

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:
   b. Date wildlife was hunted: 10/13/2017 - Concession - N#a Jagna Conservancy, Closest town is Tsumkwe. Namibia, Bushmanland Region, GPS coordinates - S 19 11 47.6 / E 020 04 17.0
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

      skin, claws, horn, tusks

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

      Caspers Taxidermy, Industrial Area, Grootfontein, Namibia / P.O. Box 1322 Grootfontein, Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Name:	Caspers Taxidermy
Address:	Industrial Area (P.O. Box 1322, Grootfontein, Namibia)
City:	Grootfontein
State/Province:	Namibia
Country, Postal Code:	(Professional Hunter - Anton Mynhardt Alberts, 92 Nelson Mandela Avenue, Stillwater #5 Klein Windhoek, City of Windhoek, Namibia)

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: (b) (6) [redacted] Date: 1/12/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

San Francisco

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☑ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Jessica Moraes (b) (6) [redacted]

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

[EXTERNAL] Supplement to Import permit Application for Dave Sanson - Elephant taken from Namibia

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Ms. Brisendine,

I have attached the supplemental information for Mr. Dave Sanson's import permit application for the elephant that he took in Namibia in 2017.

We were never given a PRT #- so I wanted to send this to you directly to ensure that it gets put where it needs to go. Can you kindly provide the PRT # also when you get a chance.

Please let me know if you have any questions and that you have received this information.

Kindest Regards,

Aimée *Korver*

RE:	**PRT # ? - Elephant Import Permit Application for Namibia**
Applicant:	**Dave Sanson**

Ms. Brisendine:

Please see attached the Notice of Representation and the Import Permit application (that has been previously filed) for Mr. Dave Sanson. Mr. Sanson took an elephant in Namibia in October of 2017. We would like to submit this document, and the ones attached, as supplemental information for his import permit application.

Due to COVID-19 the trophy for this applicant was moved from the location that was on the original application.

The new information is as follows:

The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

African Shipping Services, Windhoek Namibia

Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: **African Shipping Services**
Address: **46 Tv More St.**
City:State/Province: **Southern Industrial Area**
Country, Postal Code: **Windhoek, Namibia**

Professional Hunter: **Anton Mynhardt Alberts, 92 Nelson Mandela Avenue, Stillwater, #5, Klein Windhoek, City of Windhoek, Namibia.**

In order to show that this hunt enhanced and benefitted the wild elephant population in Namibia we have included the very detailed Operator Enhancement Report for the N # Jagna Conservancy, a report on the

"Growth in Agricultural Commodities: Wildlife and Tourism" provided by the Namibian Chamber of Environment, and the "Keep Namibia's Wildlife on the land!" document.

In all of these documents you will find that it is well documented and backed up with science-based evidence that regulated hunting has enhanced the elephant and wildlife population of Namibia and has also given the country and its people a commodity to help support this conservation. The Elephant population as a result is steady and growing in Namibia.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver
Permits Paralegal Conservation Force

e. Hunting Permits
f. Supplemental Letter with information – this letter

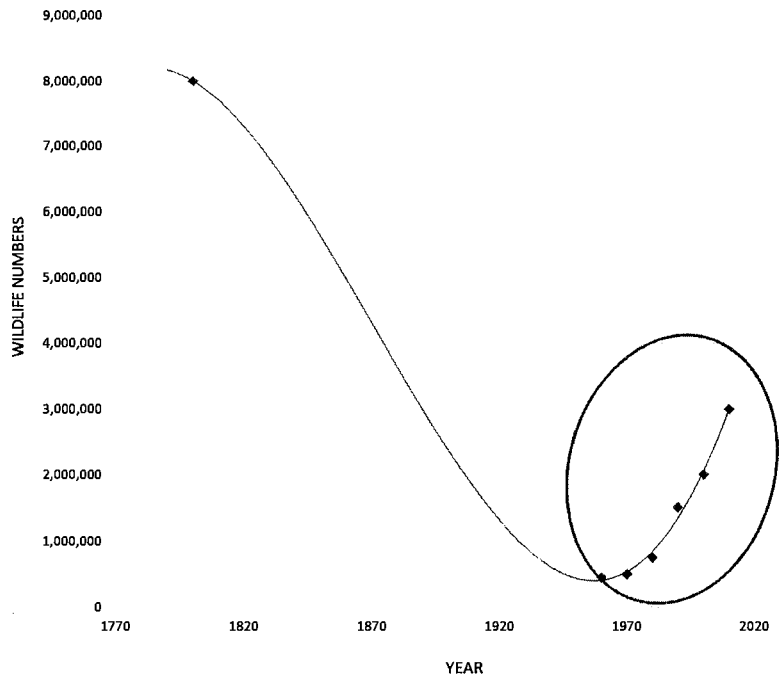
Growth in agricultural commodities:

- Wildlife & Tourism -

Chris Brown

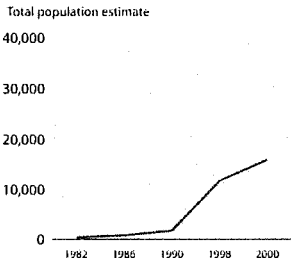
NCE
Namibian Chamber of Environment

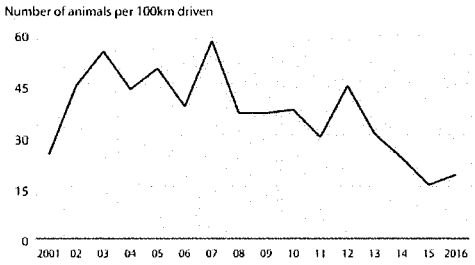
Changing wildlife number in Namibia over past 240 years



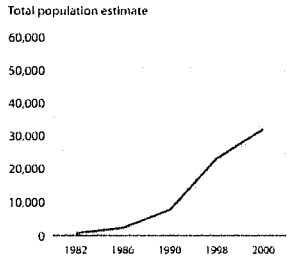
- ✓ State devolved rights over wildlife to land owners & custodians
- ✓ Wildlife became part of the rural economy
- ✓ Led to a multi-purpose wildlife economy comprising tourism, trophy hunting, meat harvesting, own use and live sale

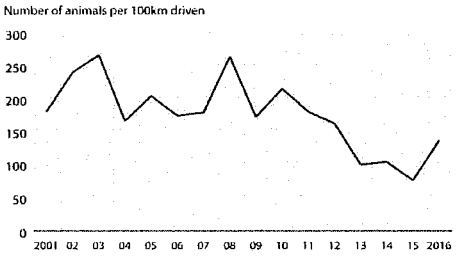
Oryx



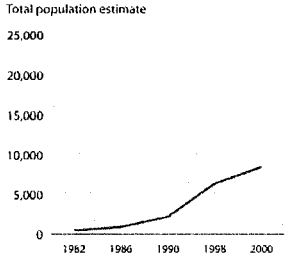


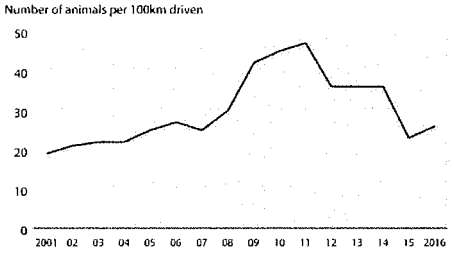
Springbok



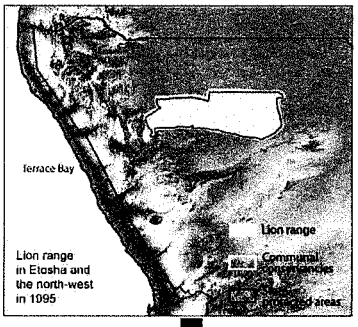


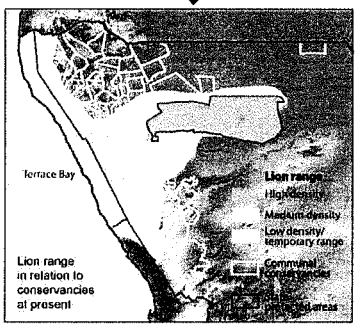
Mountain Zebra





Lion 1995 - 2015





Trends in iconic species

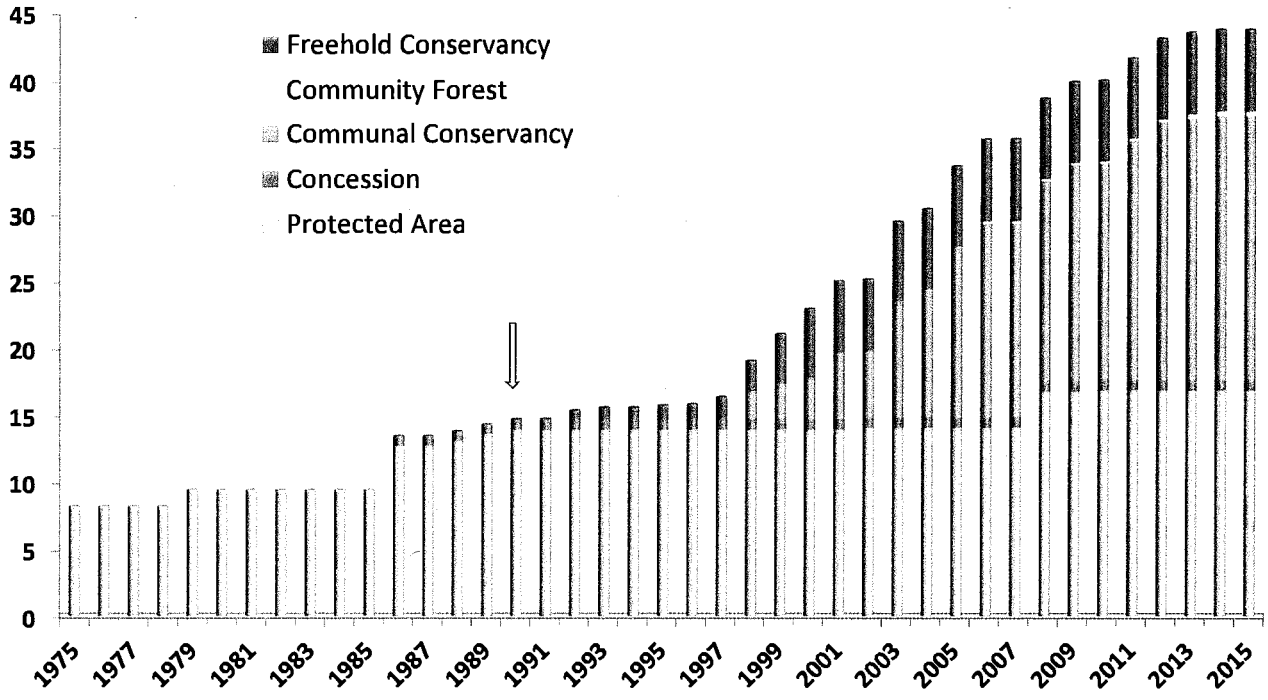
Elephant

- **1995: 7,600**
- **2017: 23,000+**

Black Rhino

- **1980: Near extinct**
- **2015: Largest national population & largest population outside state parks in world**

Land under various forms of wildlife management



Types of land management systems and percentage of country

Land under wildlife	Percent
State protected areas	18
Privately protected areas	1
Wildlife & tourism concession areas	1
Communal conservancies	20
Freehold "conservancies"	6
State & community forests	1
Registered hunting farms	4
Informal – farms using wildlife	?
Total	51+

Namibia's land-tenure systems wrt wildlife

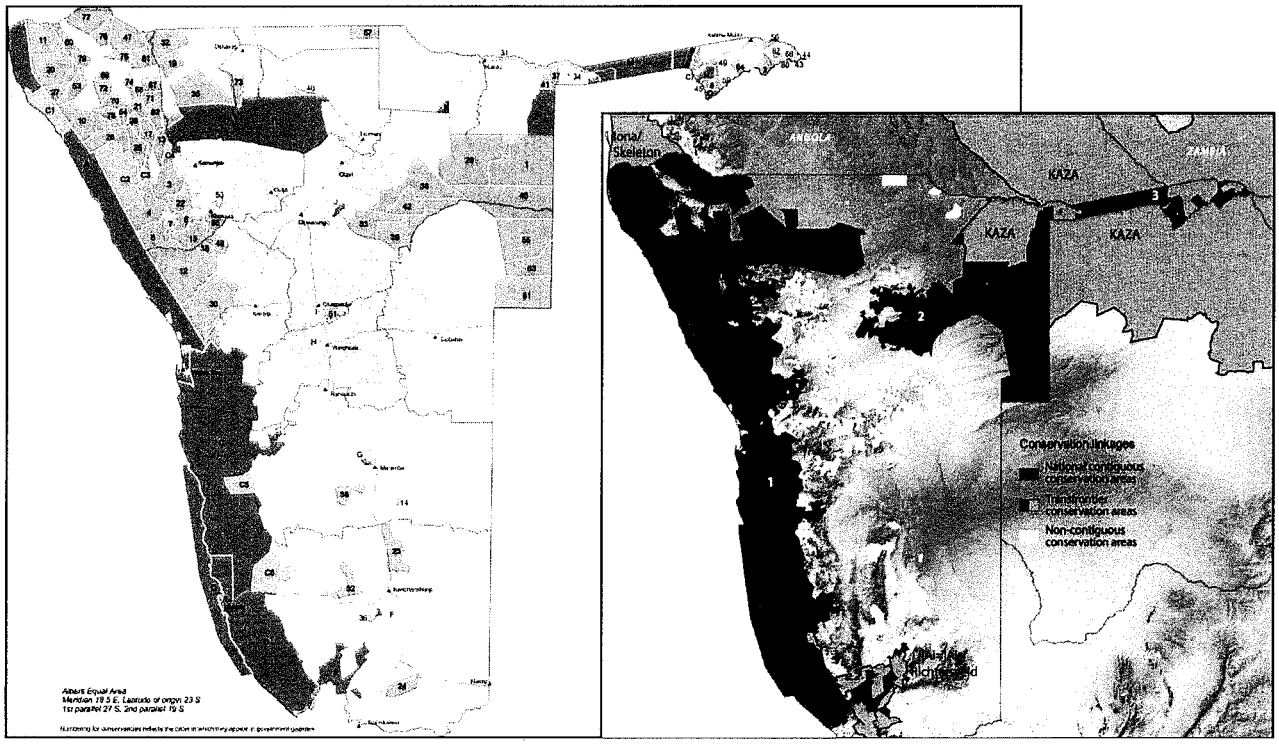
Land tenure units	Land area	Wildlife
Freehold (privately owned) land	42%	82%
Communal land	40%	12%
National Parks	17%	6%

Freehold – conditional use rights since mid-1960s – based on surveyed farms – private ownership & management

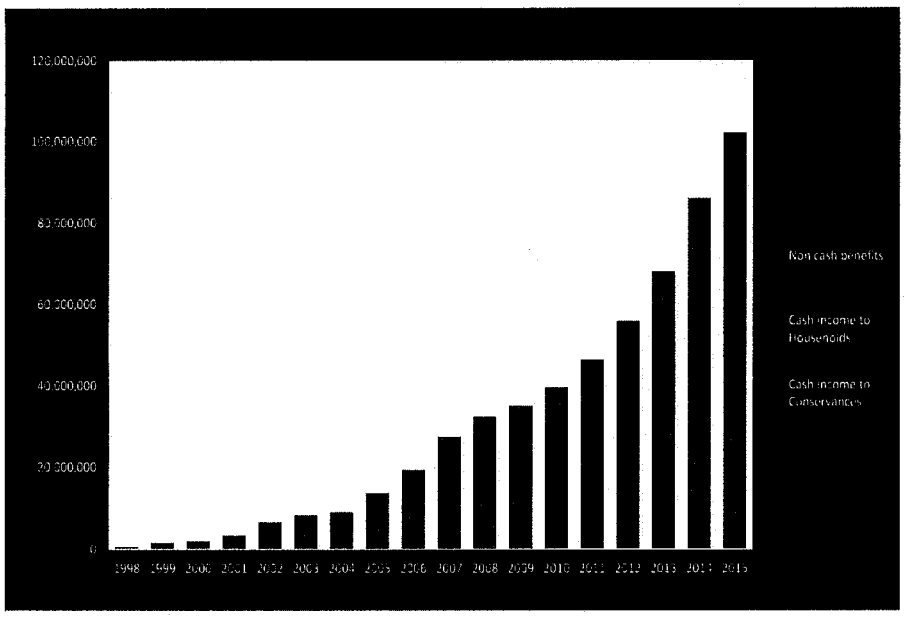
Communal – conditional use rights since mid-1990s – based on registration of a "conservancy" – communal ownership & management

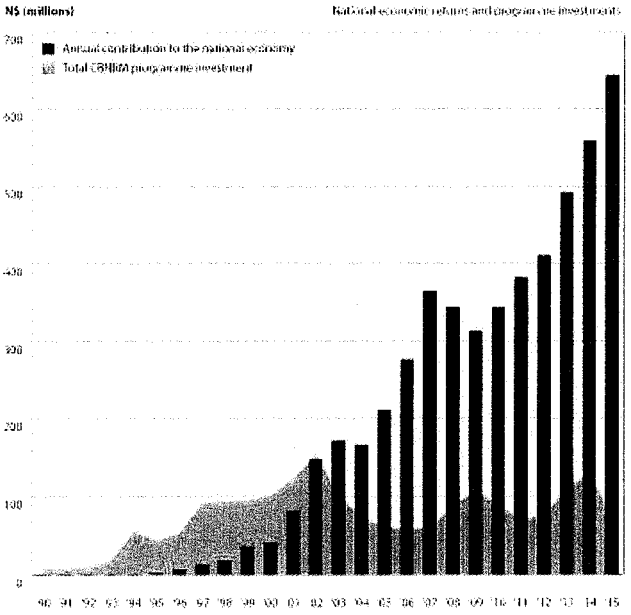
National Parks – based on Nature Conservation Ordinance – State held (on behalf of the nation) and State managed.

What this means at a landscape level

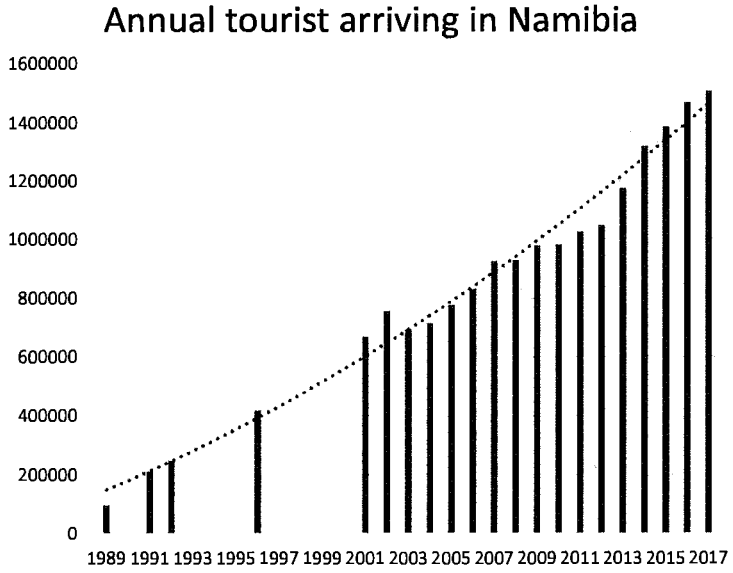


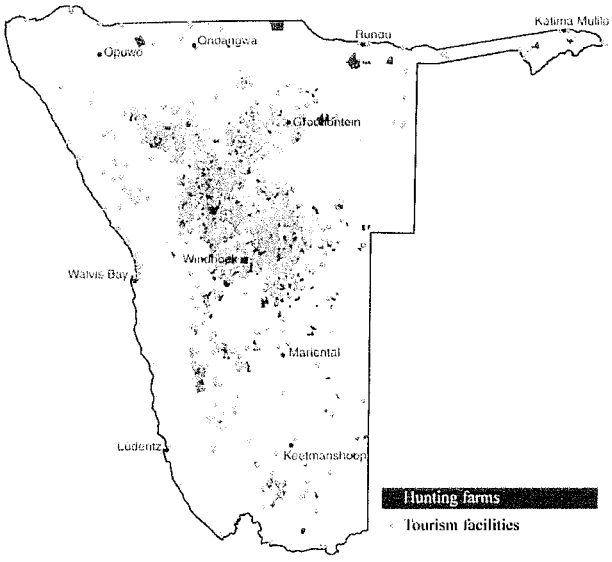
Changing contribution of wildlife on communal land …



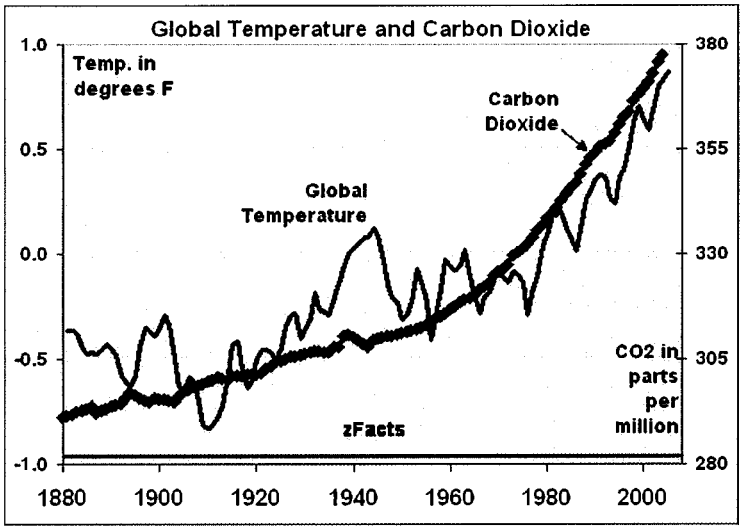


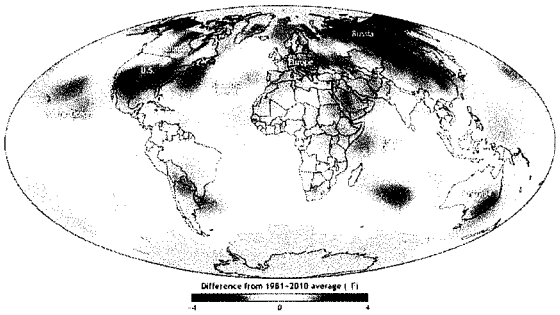
Tourism growth and distribution of tourism facilities

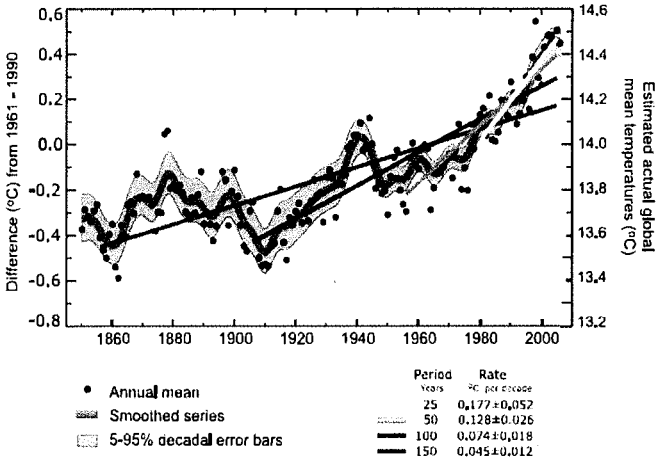




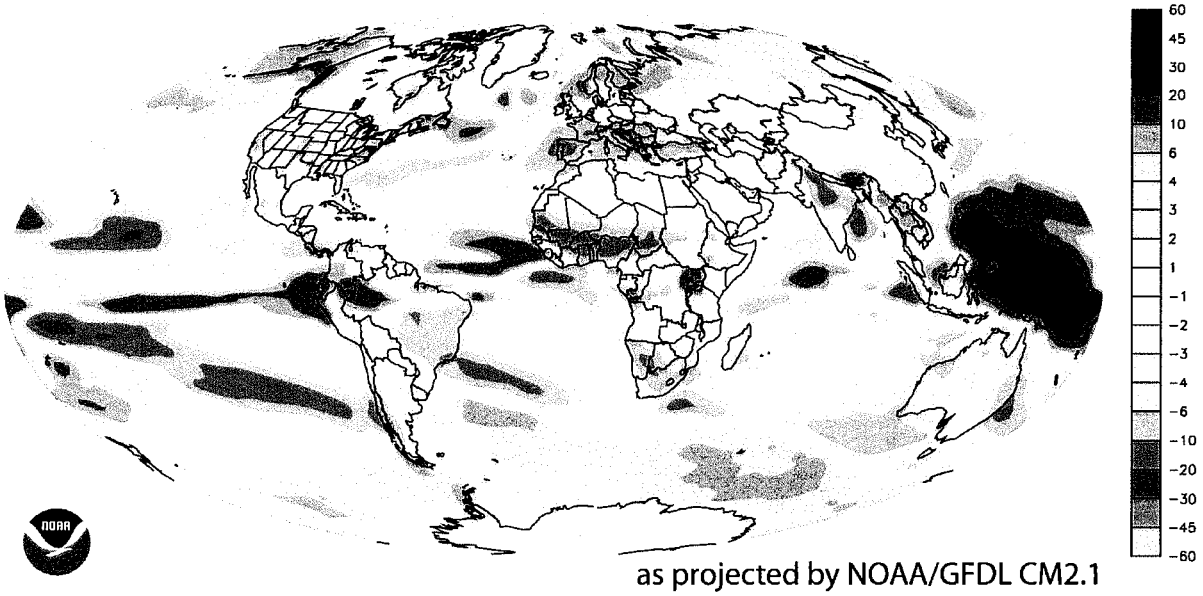
Implications of climate change on land use and productivity







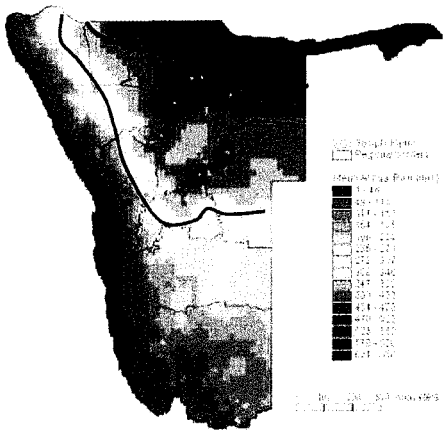
CHANGE IN PRECIPITATION BY END OF 21st CENTURY
inches of liquid water per year



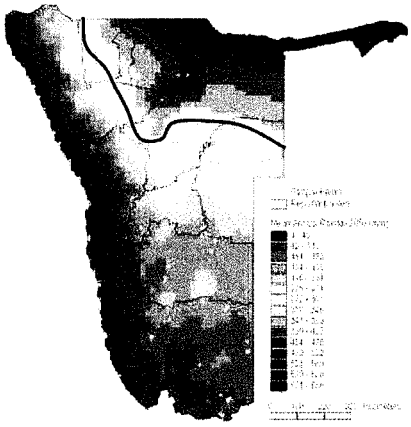
as projected by NOAA/GFDL CM2.1

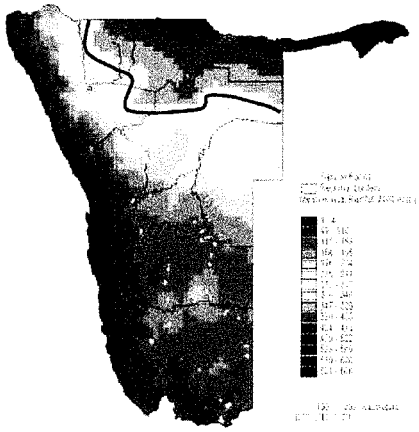
Climate change

Median Climate change projections ... (in reality – happening faster)



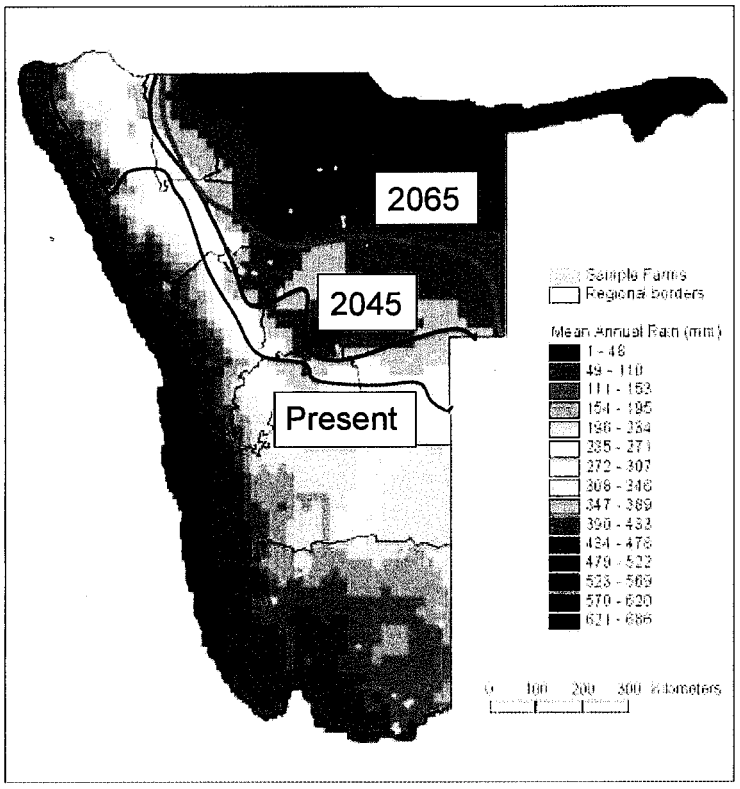
Current mean annual rainfall across Namibia



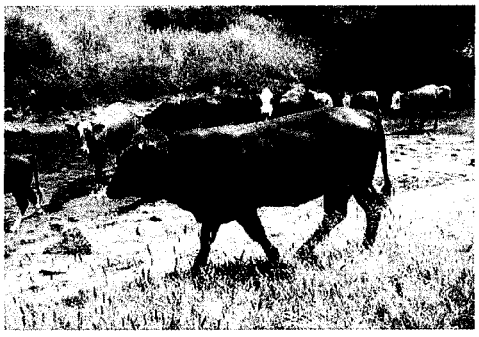


Projected mean annual rainfall across Namibia by 2045 and 2065, according to predictions generated by the HADCM3 general circulation model

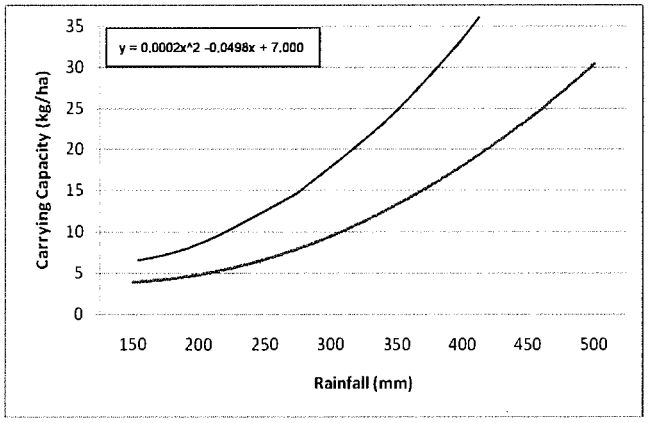
Economic viability under commercial cattle farming



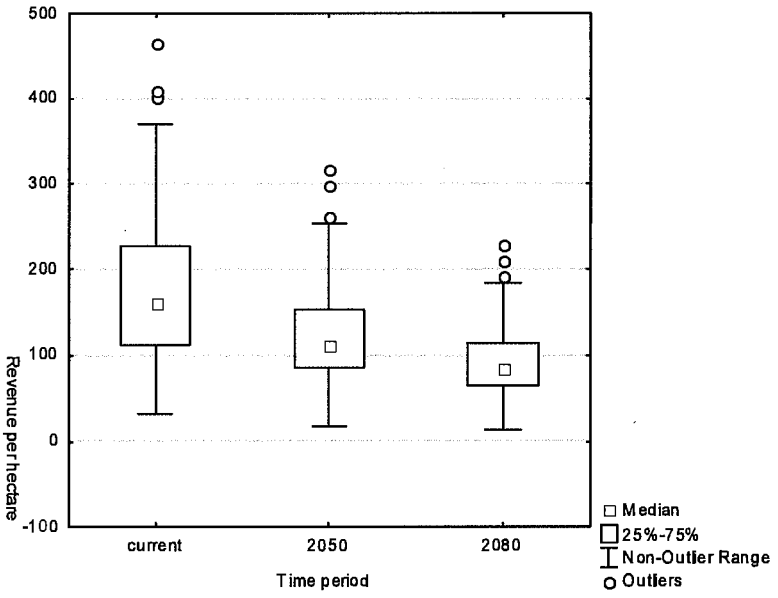
Large-stock areas lost	
By 2045	By 2065
9 million ha	**18 million ha**



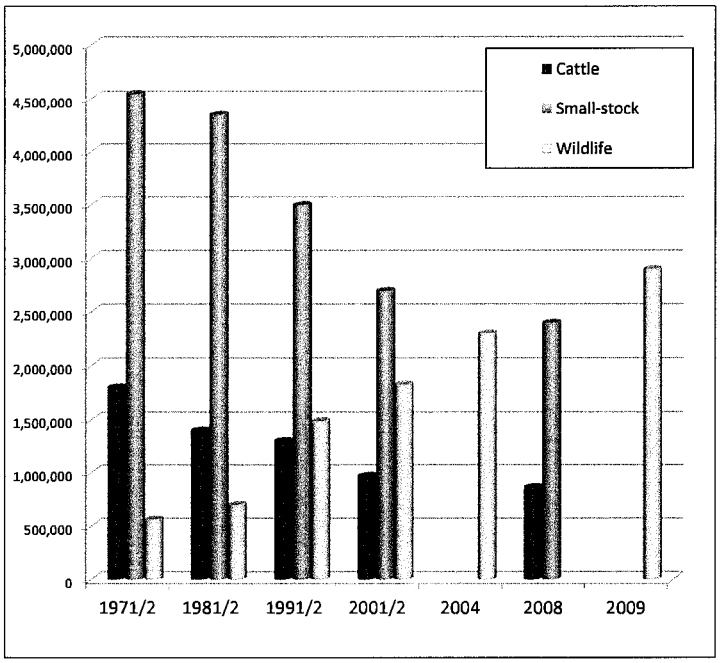
Relationship between rainfall and carrying capacity



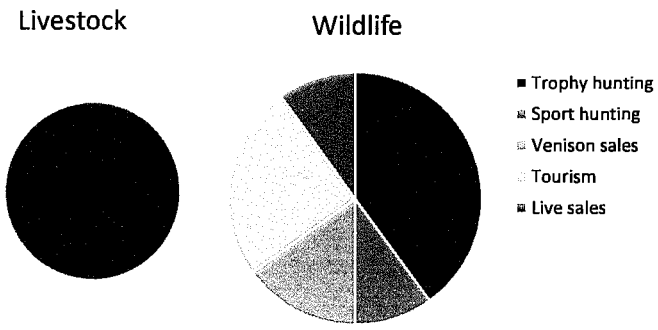
Livestock farming revenue is strongly linked to annual rainfall. 1% change in rainfall = 1.36% change in revenue: 20% decline in rainfall = 27% drop in revenue = unviable.



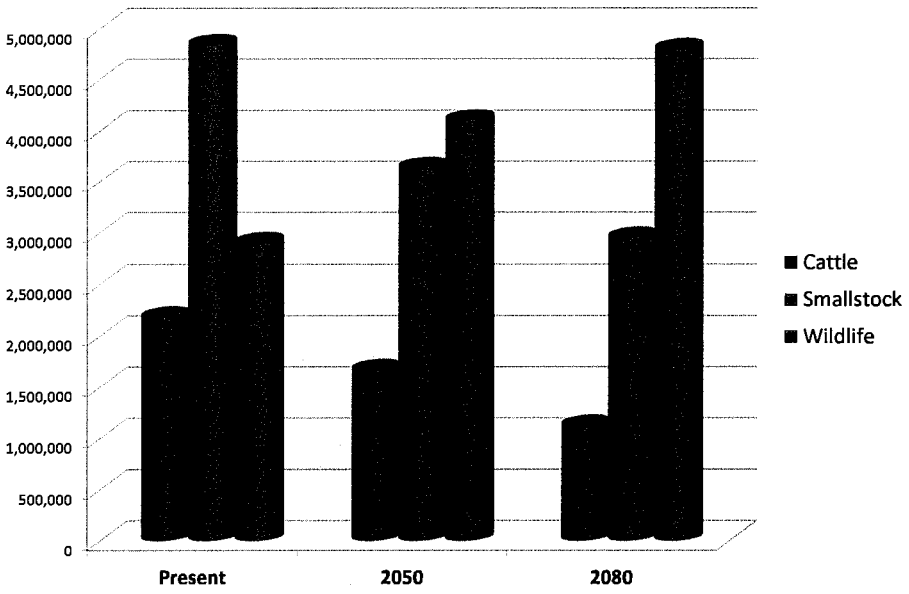
Changing contribution of livestock & wildlife on freehold land ...



Financial returns – central Namibia

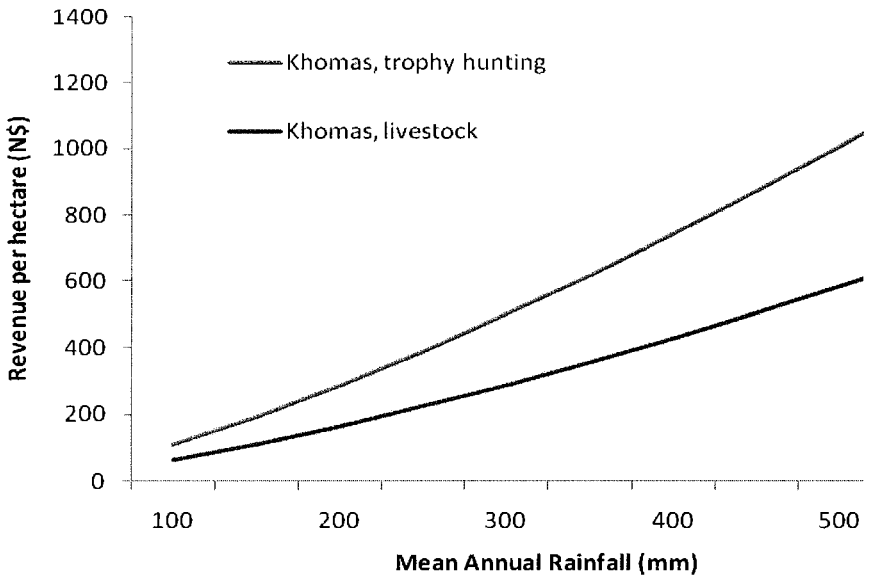


Projected livestock and wildlife numbers on freehold land in response to climate change



Trophy hunting

- Takes off about 1% of the national wildlife herd per year
- Contributes about 20% more to GDP than the small-stock sector

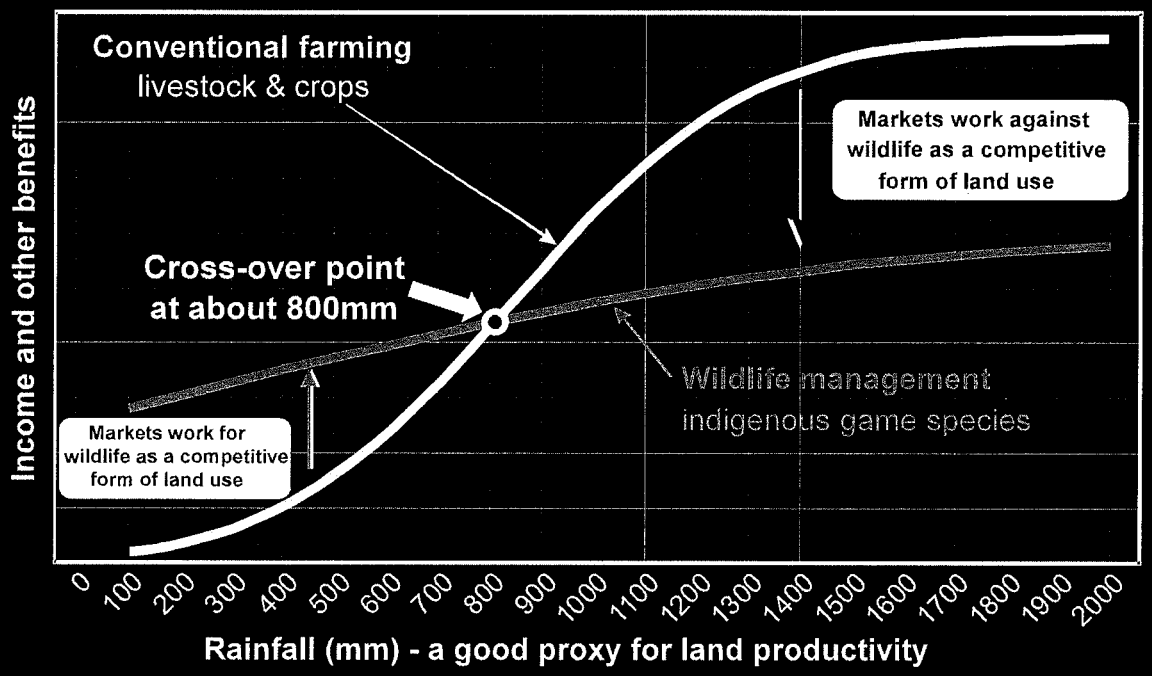


Tourism

Region	Land use	Employees per 1,000 ha	Gross Value Added (GNI) per ha (N$)	Net Value Added (NNI) per ha (N$)
Karas (Karoo)	Communal livestock	0.85	3	2
Karas (Karoo)	Freehold livestock	0.17	2	0.8
Karas (Karoo)	Tourism	0.76	83	69
Hardap (Namib)	Tourism	5	601	516
Hardap (Kalahari)	Tourism	4	504	342

Region	Land use	Employees per 150 ha	GNI per ha (N$)	NNI per ha (N$)
Zambezi	Communal livestock	0.8	60	50
Zambezi	Communal cropping	75	626	443
Zambezi	Tourism	45	18,968	18,394

Why are land owners moving into wildlife and out of livestock?

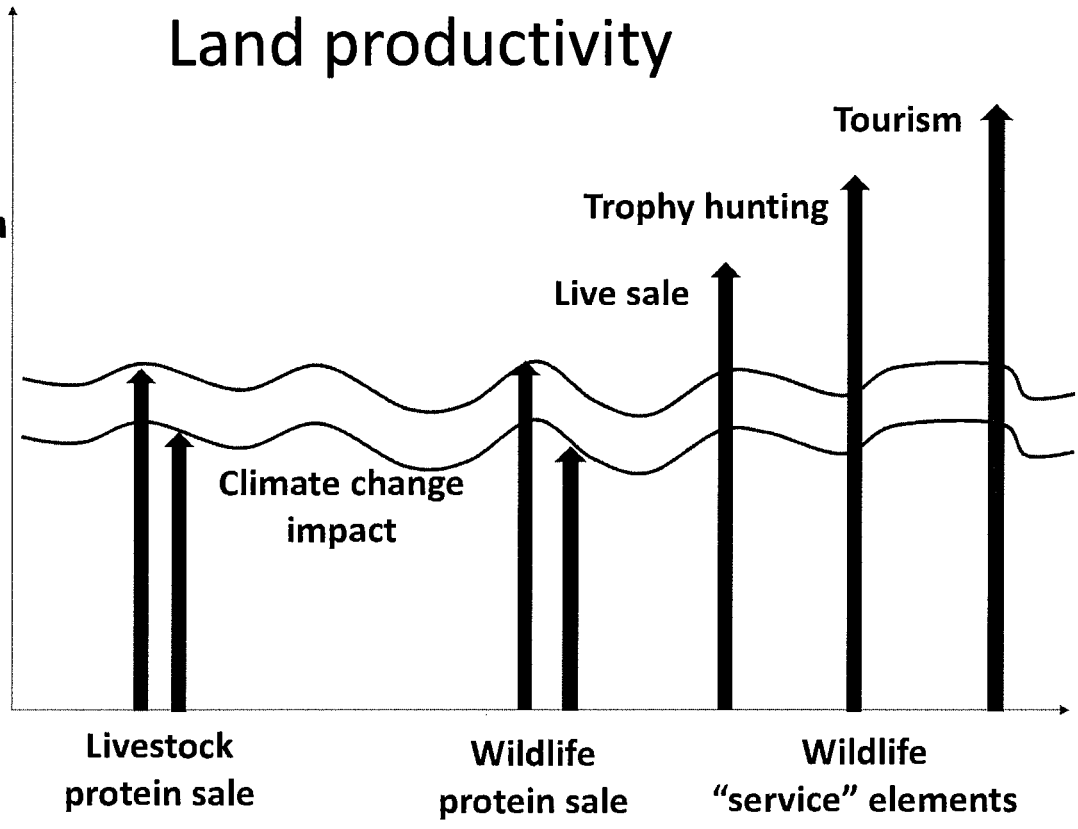


Economic returns to conventional farming (yellow line) and to wildlife management (green line) in areas of different land productivity, with rainfall being a good proxy for productivity

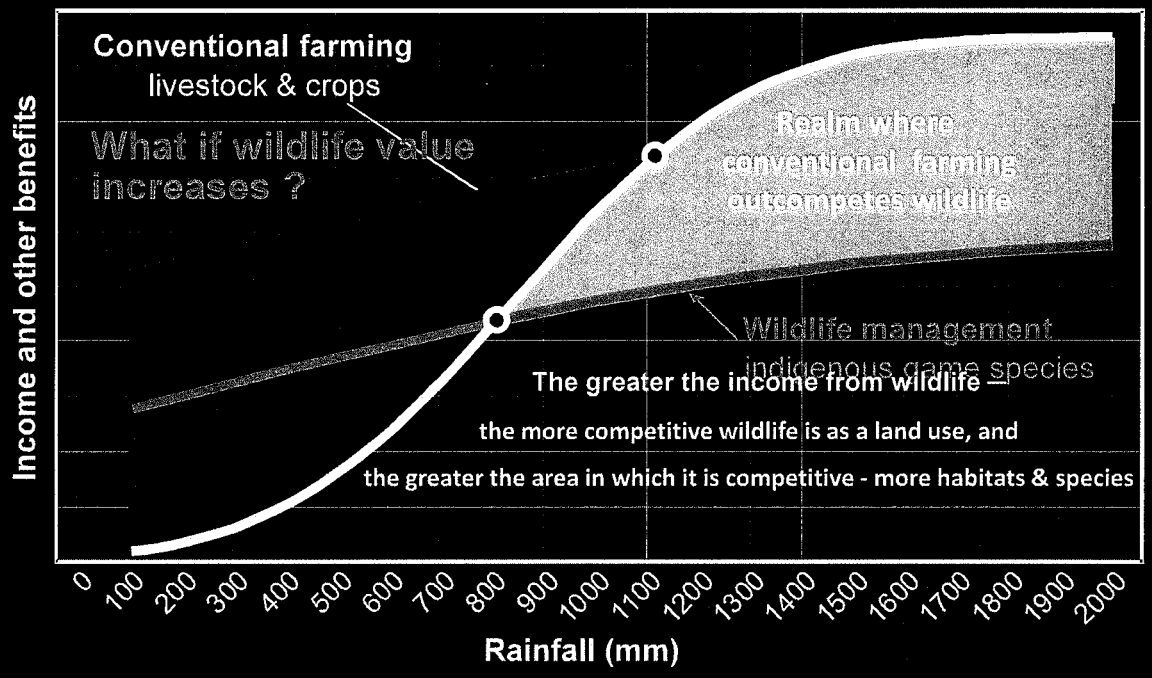
Service industries break through low primary production ceiling

Primary production ceiling

- Protein price
- Protein biomass
- Protein quality
- Area
- Soil
- Rainfall
- Management
- Agricultural policy
- Production costs



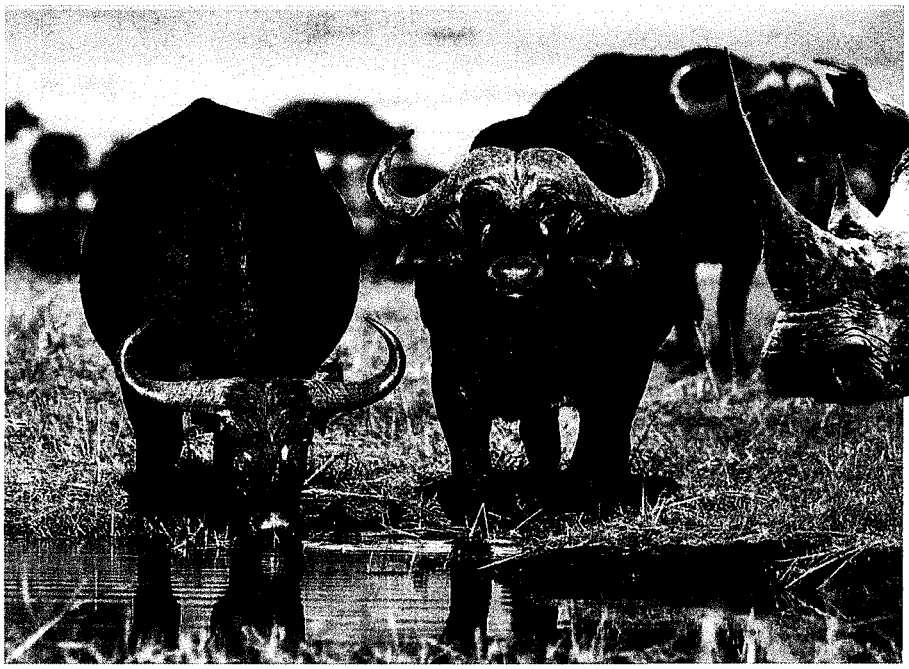
How could wildlife be even more attractive as a land use?

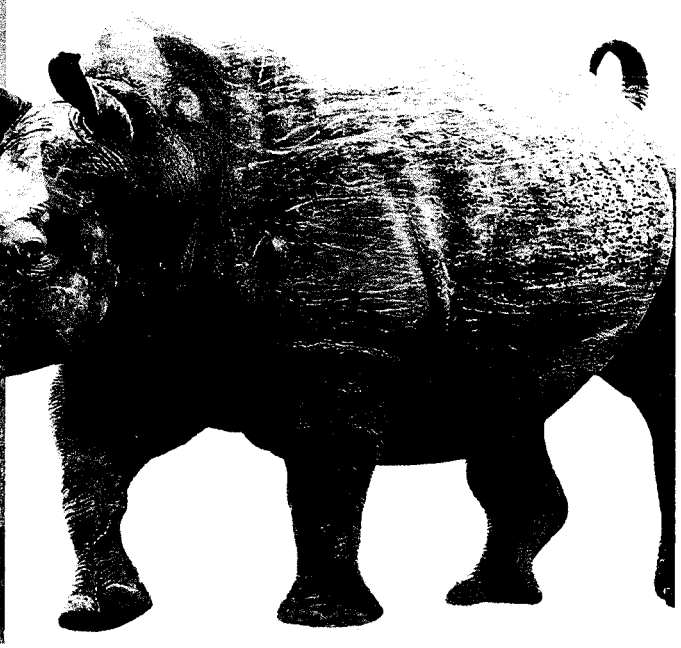


Improving economic returns to wildlife management over conventional farming in areas of different land productivity, with rainfall being a good proxy for productivity

How to increase value of wildlife?

1: Bring high value species into production



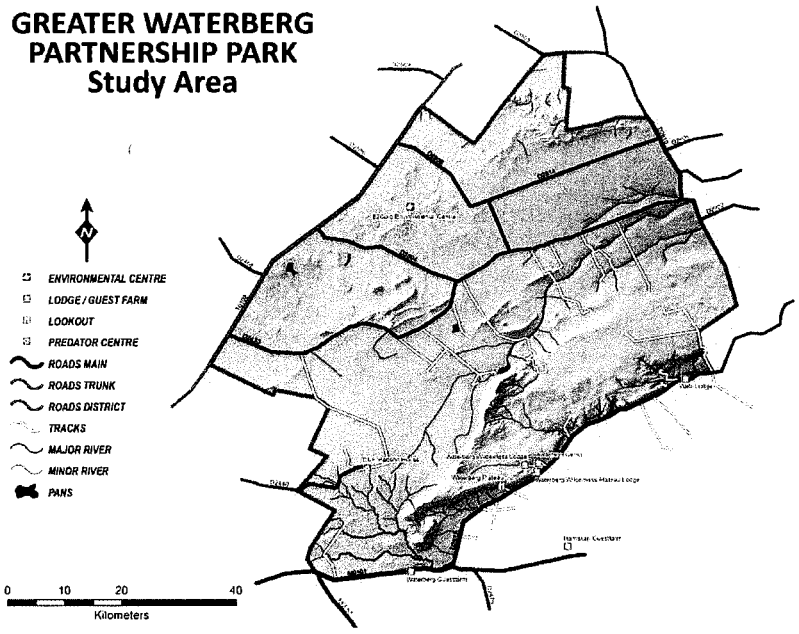


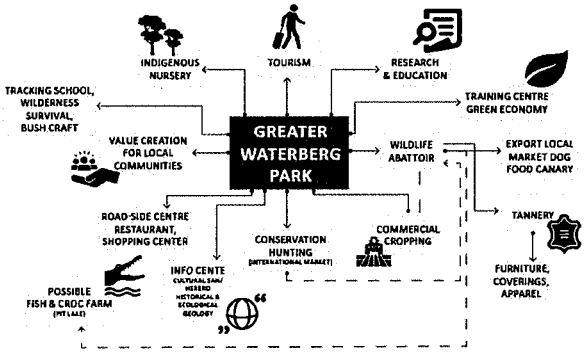
Why wildlife is a strategic response to climate change

- Wildlife is arid adapted
- Wildlife makes more $ / ha than conventional farming under our conditions
- Wildlife revenue per ha could be increased 4-5 times by adding in all wildlife species (especially buffalo and rhino)
- Wildlife has service elements (tourism & trophy hunting) that break through the low primary production / protein value ceiling
- Wildlife lends itself to working at scale – more efficient and productive
- Wildlife would be the largest renewable economy in Namibia
- Namibia could essentially climate-proof itself, and out-perform its land productivity levels prior to climate change
- Namibia could be an example to Africa, following this model to rewild the continent driven by market forces

How to increase value of wildlife?

2: Work at scale and diversity



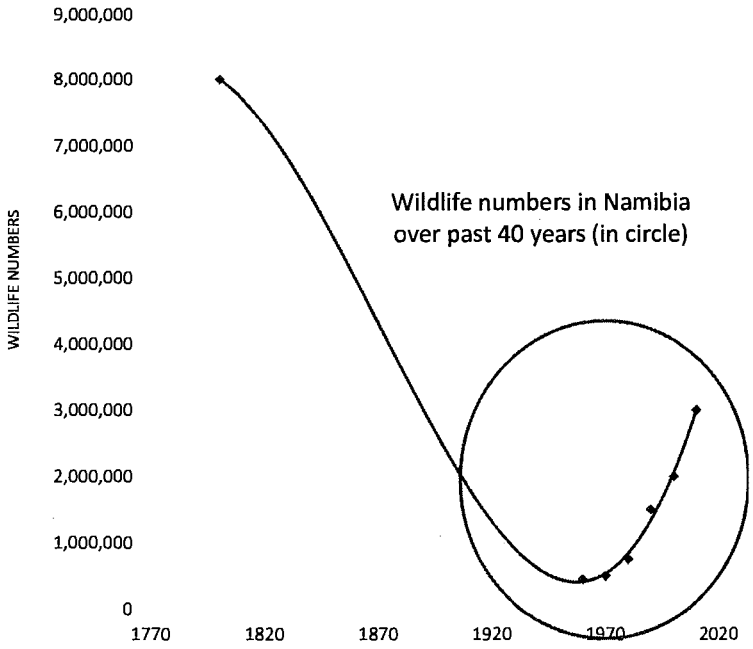


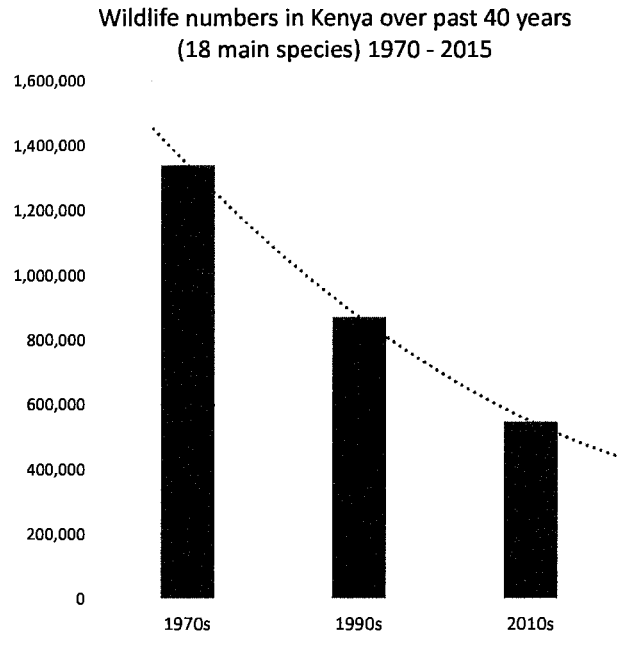
Why scale is important

- Large unfenced landscapes offer more economic opportunities
- Land value immediately increases when land is part of a larger vision and programme / story
- Tourism is enhanced – marketability, diversity, occupancy, pricing (and willingness to pay) because of a better product and experience
- Trophy hunting is enhanced because of the large open African landscape – no fences – better experiences and thus higher prices
- More diversity of wildlife – including predators and elephant, thus better marketability and revenue
- More diversity of enterprises – abattoir / meat processing facility, tannery, cannery, commercial outlets, etc.
- More institutional / organisational options, e.g. management agreements, shareholding (land Co, game Co, cattle Co, tourism Co) giving flexible options
- Financial diversification (land owners are also benefit financially from all enterprises), and more financing options

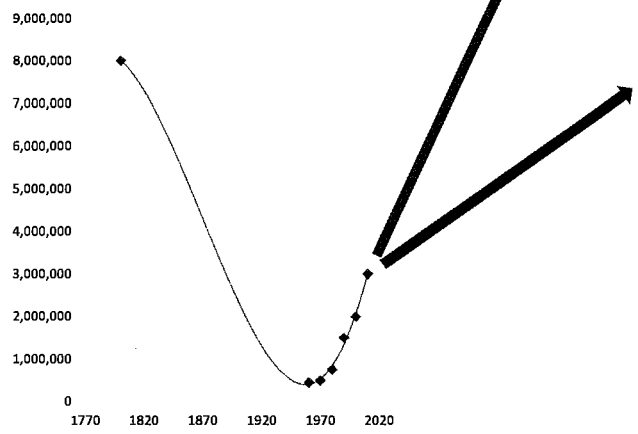
How to increase value of wildlife?

3: Protect our global competitive advantage





Where to from here?



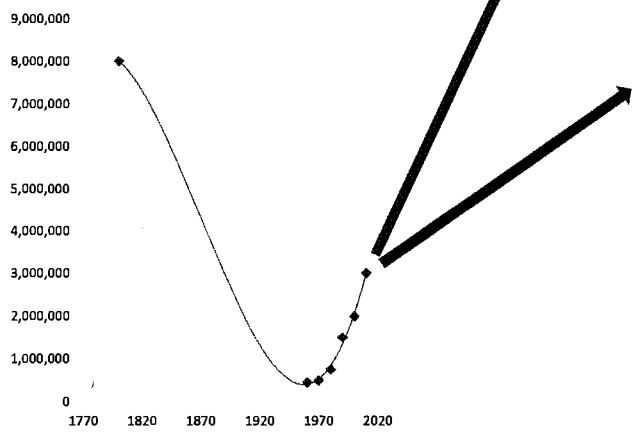
High road

- Open systems – landscape approach
- Indigenous species
- Natural ecological & evolutionary processes
- Good rangeland management and condition

Low road

- Intensification (small camps)
- Land fragmentation
- Selective breeding – colour morphs, hybrids
- Exotic species
- Cage breeding & hunting
- Land degradation

Where to from here?



High road

- National opportunities (all land owners & custodians)
- Long-term perspective
- Environmental integrity & resilience
- Drought-proofs and adapts to climate change
- Major conservation benefits - biodiversity, landscapes, connectivity
- Promotes Namibia's international conservation standing
- Enhances Namibia's economic competitiveness

Low road

- Get rich quick for a few
- Short-termism
- Environmental degradation
- No contribution to conservation values
- Compromises Namibia's conservation integrity
- Diminishes Namibia's economic competitiveness

Conclusions

1. Build on Namibia's comparative and competitive wildlife advantages
2. Link wildlife as a land-use to economic development and to biodiversity conservation - they are all aligned (marketing value)
3. Align markets to work for sustainable use of wildlife, conservation of biodiversity and indigenous ecosystems through focused policies and legislation (including export of game meat and landscape approach)
4. Devolve rights and responsibilities over sustainable wildlife use still further to local level (reduce bureaucracy)
5. Use protected areas to create incentives for compatible adjacent landscapes and as "engines" for landscape development
6. Limit the role of government to that of creating a conducive environment, regulating for equity and providing extension and capacity-building services to those who need them

Thanks you

ceo@n-c-e.org

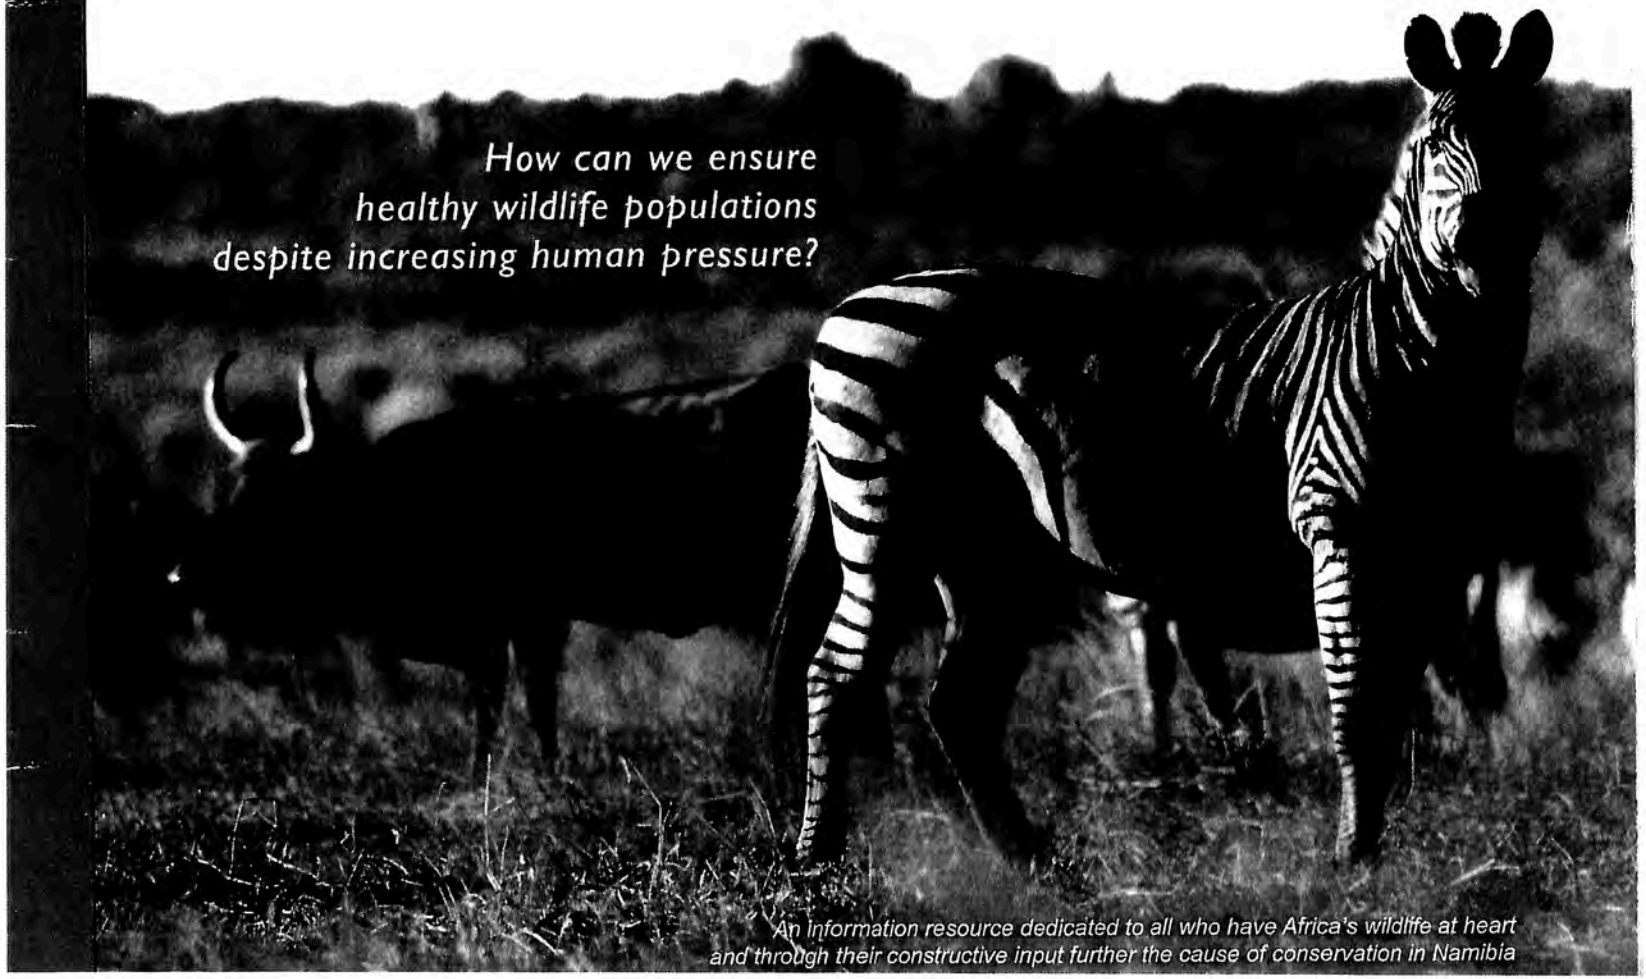
Keep Namibia's wildlife on the land!



How can we ensure healthy wildlife populations despite increasing human pressure?

An information resource dedicated to all who have Africa's wildlife at heart and through their constructive input further the cause of conservation in Namibia

What is really happening to our wildlife?

WILDLIFE IS RAPIDLY DECLINING ACROSS MUCH OF AFRICA AND OTHER PARTS OF THE WORLD

Over the last century, **lions** *were actively eradicated as a threat to human safety and to livestock from most land used by people; lions from the remaining populations continue to be killed over livestock losses and safety concerns in communal areas and along the periphery of parks today.*
Southern African **rhinos** *were driven to the brink of extinction a century ago, but populations were rebuilt through effective conservation activities; rhinos are now being decimated again by ruthless commercial poaching for their horns.*
A century ago, **Elephants** *were drastically reduced by the uncontrolled ivory trade, and displaced as a threat to crops and safety; today most of the remaining southern African populations are healthy and growing, but ruthless commercial poaching for ivory is again having an impact.*
Many other species *are experiencing similar declines, mostly due to land conversion to agriculture and incompatible land uses.*

- ***Widespread concern over wildlife declines is motivating ongoing global calls for action*** *– yet interventions do not differentiate between countries with an excellent conservation track record, and those with declining wildlife populations.*
- ***Attempts by foreign organisations to stop declines through field interventions often do not address the actual problems*** *– interventions often ignore the needs of local people and conservation priorities on the ground.*
- ***The public is unfortunately not informed accurately about the main causes for large-scale wildlife declines*** *– media reports, social media hype and calls for donations tend to focus on the gruesome death of individual animals as indicators of decline, rather than actual causes.*
- ***People are confusing the welfare of individual animals with the health of entire populations of the same species*** *– through passionate but misguided social media outcries, many people want to prevent all animal deaths in order to stop perceived cruelty to animals and wildlife declines.*

PREVENTING ALL WILDLIFE DEATHS FORCES PEOPLE TO REPLACE WILDLIFE HARVESTING WITH OTHER LAND USES

Namibia's **Elephant** *population has tripled since independence and elephants have re-colonised former ranges, largely facilitated by com conservation and benefits to local communities.*

Most other large wildlife species *in Namibia have healthier populations today than at any time over the last 150 years.*

- *Differentiating between countries with successful conservation approaches and those without is essential – conservation is a sc based management activity and successful approaches should not be undermined by generalised emotional responses and inappropriate a*
- *Conservation by the people for the people is extremely successful in Namibia – by conferring rights to own and manage wildlife t communities, the Namibian government has empowered land holders to conserve wildlife in a healthy balance with other land uses.*
- *Namibians embrace wildlife management as a land use, thereby safeguarding wildlife habitat throughout the country – Namit documented significant wildlife recoveries in parks and on communal and freehold land throughout the country for several decades.*
- *By harvesting small percentages of various populations, Namibia is keeping overall wildlife stocks healthy, just as farmers anywher world keep their overall livestock herds, gardens and fields healthy while harvesting an annual crop to generate income and enable develo*

PROMOTING WILDLIFE USE CREATES INCENTIVES TO KEEP WILDLIFE ON THE LAND AS AN ECONOMIC ASSET

The main causes of large scale wildlife declines:

HABITAT LOSS THROUGH HUMAN LAND USES THAT ARE INCOMPATIBLE WITH WILDLIFE is the largest single cause of wildlife declines around the world.

Displacement of wildlife by agriculture – *wildlife is not tolerated in crop fields and competes with or threatens livestock.*

Degradation of habitat by unsuitable land uses – *overgrazing, indiscriminate burning, logging, mining etc. may all severely degrade habitats.*

Destruction of habitat through infrastructure development – *urban spread, roads, power lines, dams etc. may all destroy habitats.*

Disturbance by human activity – *excessive presence and movement of people, stray dogs, traffic, noise etc. may all displace wildlife.*

UNCONTROLLED EXPLOITATION AND COMMERCIAL POACHING are causing rapid declines amongst already isolated wildlife populations in many African countries.

Poaching of animals for trade in animal parts – *trade in ivory, rhino horn, skins, bones etc. is fuelling ruthless commercial poaching.*

Ruthless exploitation for personal gain – *uncontrolled over-harvesting veiled as 'legal use' is rampant in countries with poor governance.*

Proven ways to stop wildlife declines and rebuild populations:

HABITAT PROTECTION AND EXPANSION THROUGH COMMUNITY CONSERVATION BASED ON WILDLIFE USE **enables large-scale wildlife recoveries, mitigates human impacts and facilitates the health of ecosystems.**

Tourism *motivates conservation in scenic areas, especially along major tourism routes, by generating most jobs and some conservation funds.*

Conservation hunting *motivates conservation in vast areas of low tourism potential by generating most conservation funds and providing food.*

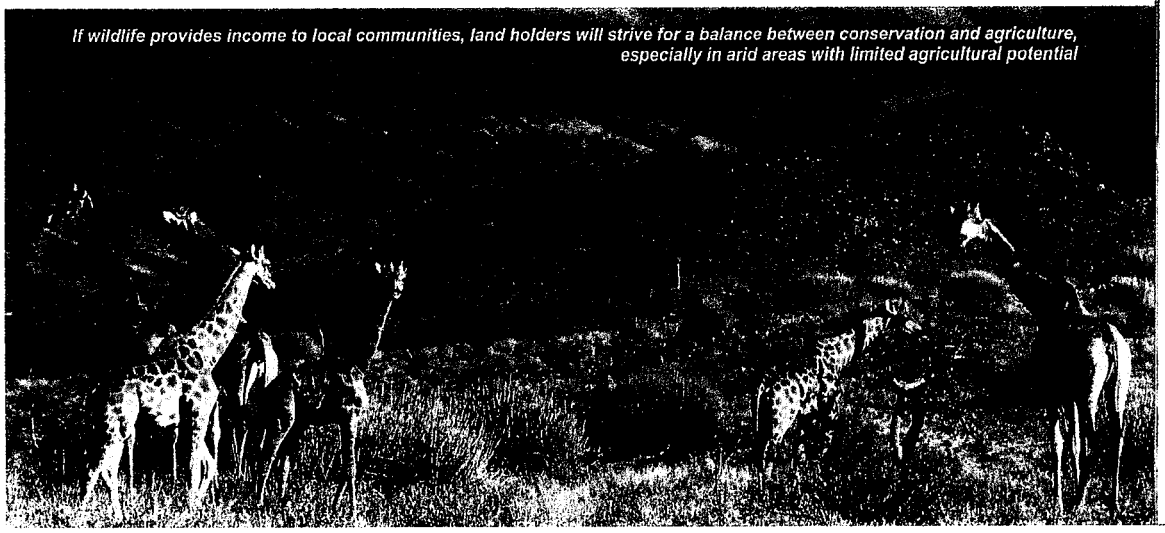
Meat harvesting *motivates increasing wildlife populations by providing food and generating additional income.*

Live capture and sale *enables restocking in areas with low populations and provides further income from wildlife.*

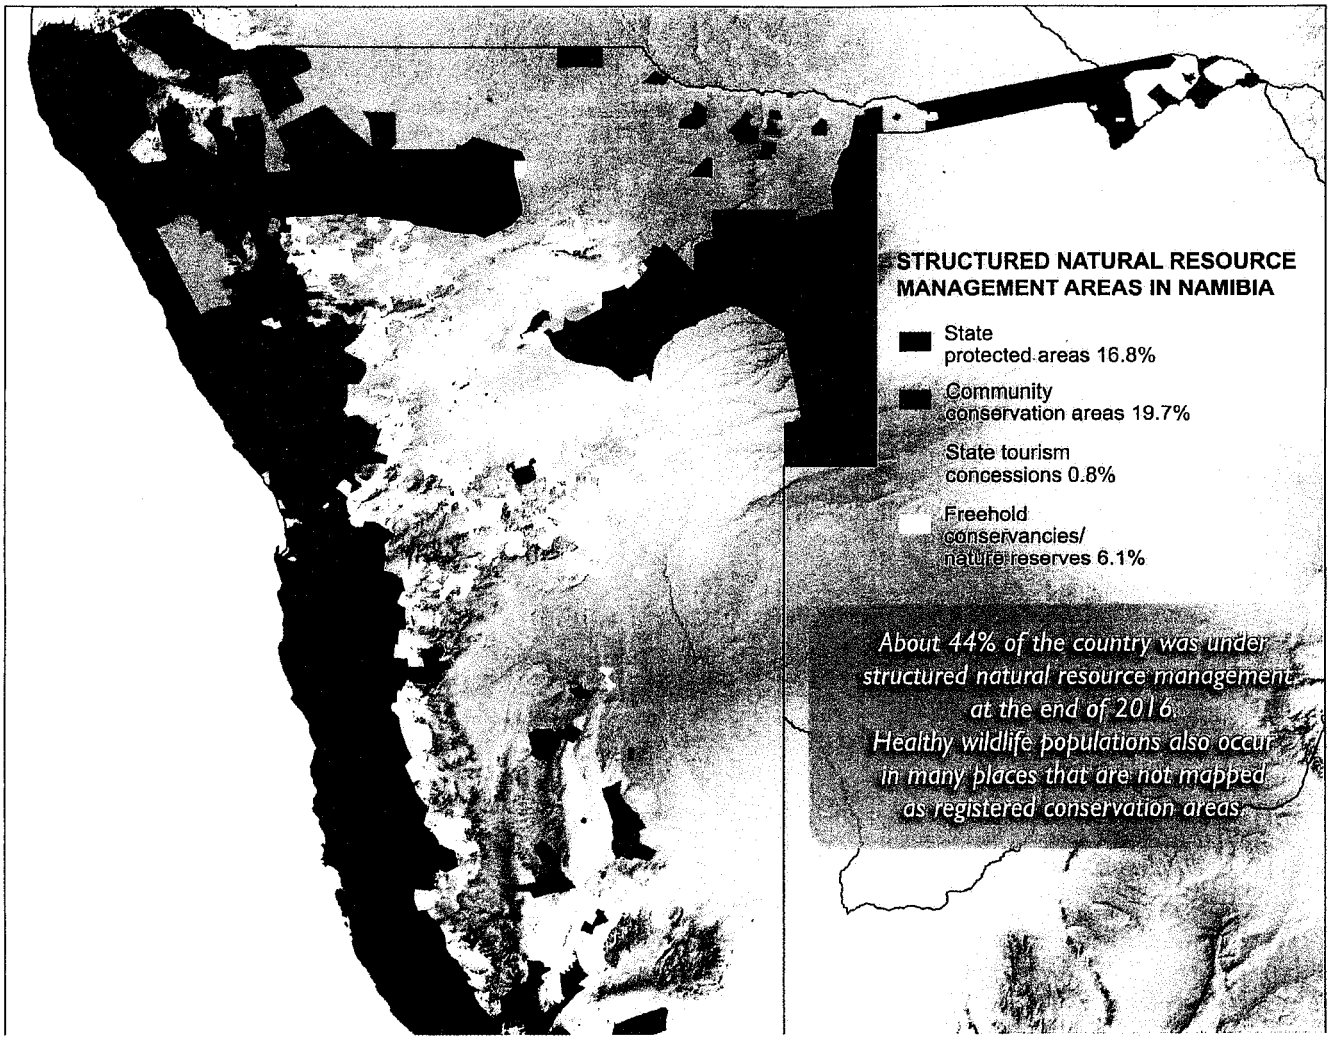
All of these uses can and should be combined where possible to maximise returns and provide a variety of benefits to different people in each community.

ACTIVE AND COLLABORATIVE WILDLIFE CRIME PREVENTION **limits impacts from commercial poaching by teaming up relevant stakeholders including local communities, tourism and hunting operators, NGOs and government agencies.**

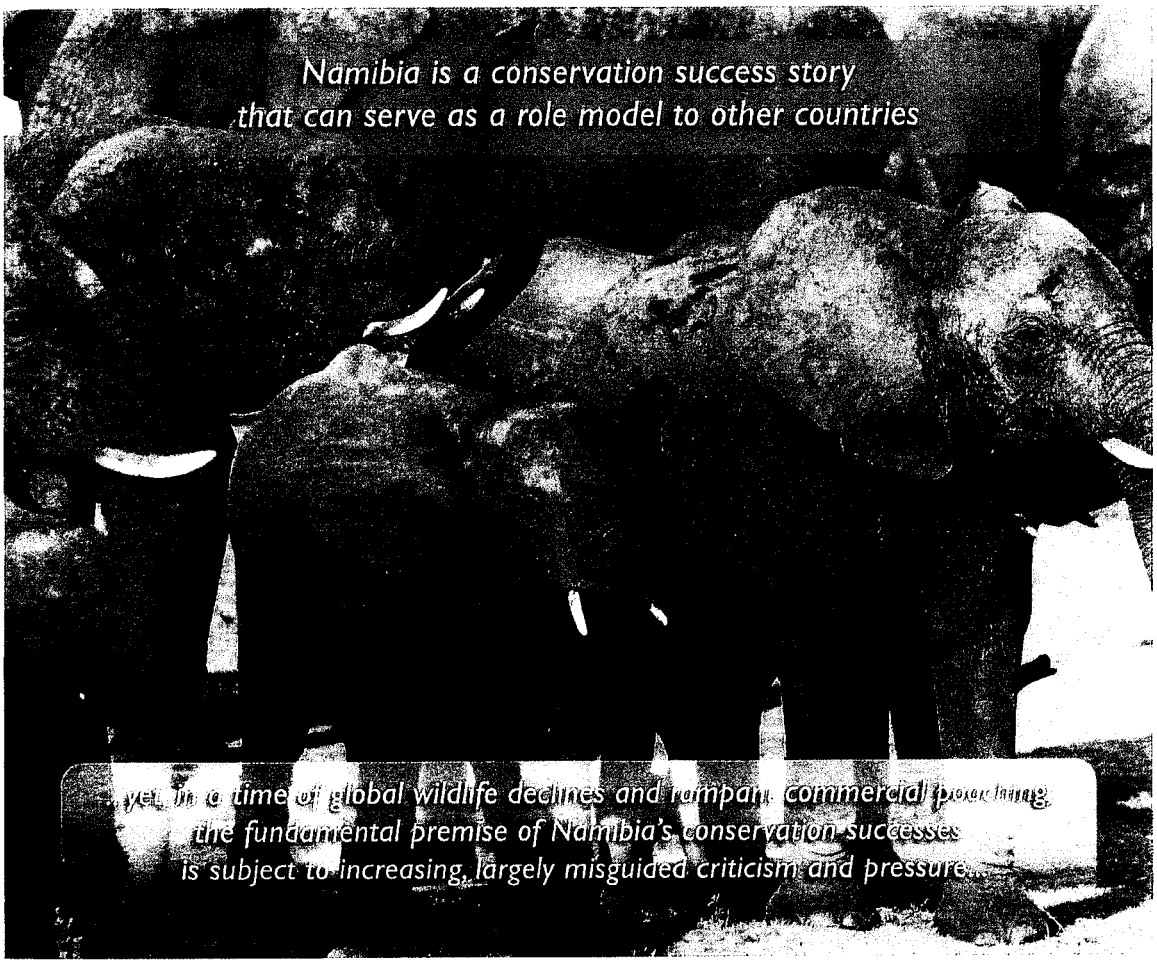
STRINGENT CONTROL MECHANISM FOR ALL WILDLIFE USE **prevent uncontrolled exploitation and over-harvesting.**



If wildlife provides income to local communities, land holders will strive for a balance between conservation and agriculture, especially in arid areas with limited agricultural potential



STRUCTURED NATURAL RESOURCE MANAGEMENT AREAS IN NAMIBIA
State protected areas 16.8%
Community conservation areas 19.7%
State tourism concessions 0.8%
Freehold conservancies/ nature reserves 6.1%
About 44% of the country was under structured natural resource management at the end of 2016.
Healthy wildlife populations also occur in many places that are not mapped as registered conservation areas.



Namibia is a conservation success story
that can serve as a role model to other countries
yet, in a time of global wildlife declines and rampant commercial poaching,
the fundamental premise of Namibia's conservation successes
is subject to increasing, largely misguided criticism and pressure...

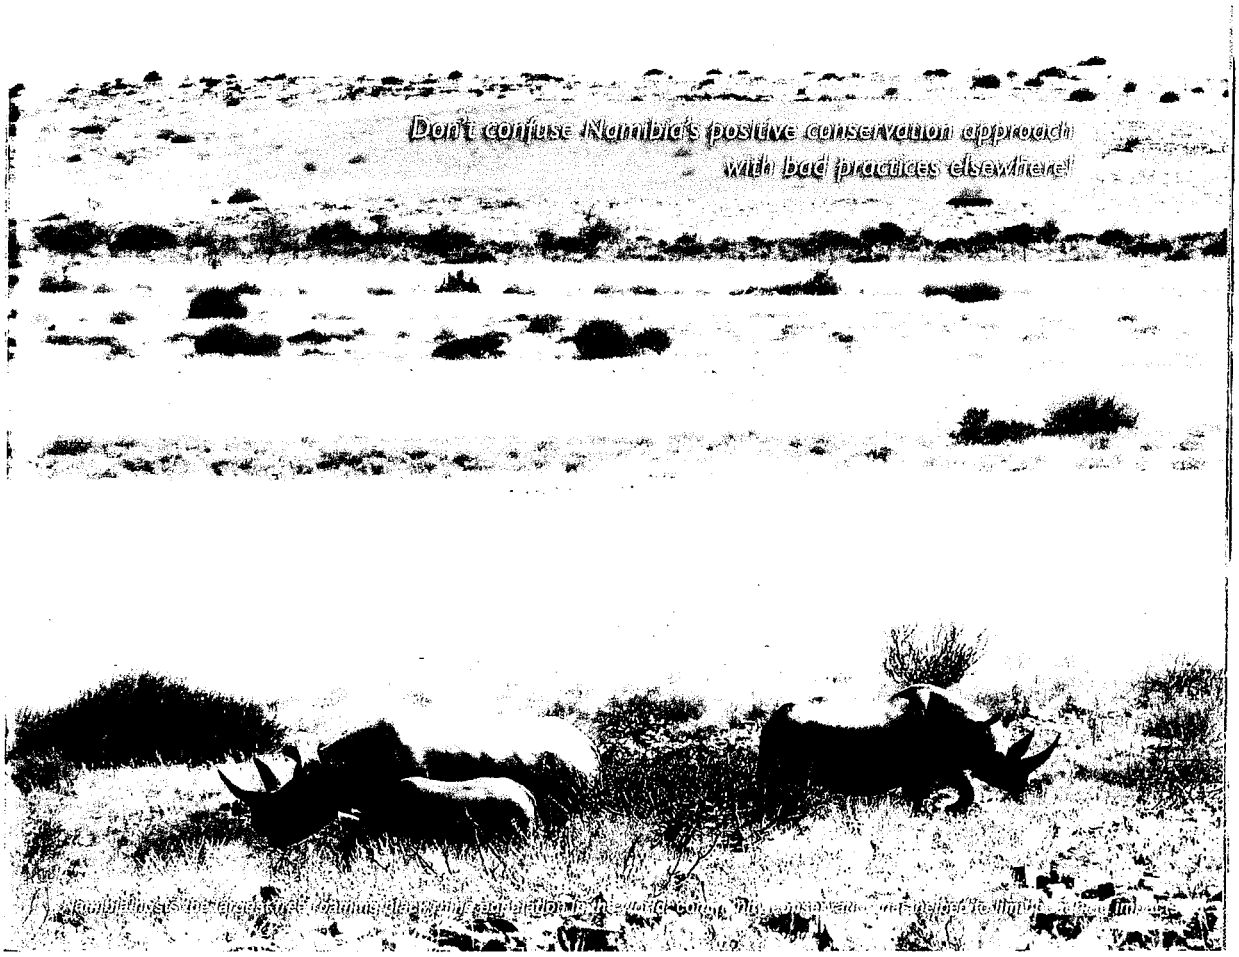
Namibia is a conservation success story:

Background information:

1. Namibia's economy is largely reliant on natural resources; about two-thirds of the human population live in rural areas and are directly dependent upon natural resources for their livelihoods.
2. Wildlife populations have shown dramatic recoveries on both freehold and communal farmland after drastic declines prior to independence due to drought, poaching and detrimental policies.
3. Healthy populations of nearly all historically-occurring species now roam suitable habitat; species of particular conservation concern are receiving special attention.
4. Agricultural policies and approaches, rather than conservation practices, have limited the population health of some species such as buffalo and wild dog.
5. Wildlife is managed and protected in national parks, in community conservation areas and on freehold land across more than half of Namibia.
6. The success is based on giving wildlife a real value for the local people who manage and protect it – and bear the cost of living with it.
7. Community conservation generated over N$ 111 million in returns for rural communities and facilitated around 5,147 jobs during 2016.
8. Community conservation contributed about N$ 692 million in net national income to Namibia's economy in 2016.
9. The sustainable use of wildlife and other natural resources is enshrined in Namibia's constitution; natural resources are a part

Conservation highlights:

1. Namibia has healthy populations of black and white rhinos, including the largest free-roaming black rhino population outside parks in the world.
2. Namibia's elephant population has grown from an estimated 7,500 animals in 1995 to around 22,000 today – a large percentage occurs outside parks.
3. Namibia has healthy lion populations in several national parks, and an expanding lion population outside parks, which has grown in north-western Namibia from an estimated 25 animals in 1995 to around 150 today.
4. Namibia has the largest population of free-roaming cheetahs in the world – the vast majority of which live outside parks.
5. Namibia has healthy giraffe populations in several national parks and an expanding giraffe population outside parks.
6. Namibia has healthy leopard populations in several national parks and leopards occur across much of Namibia's freehold and communal farmland.
7. Namibia has a healthy crocodile population with a large percentage occurring outside parks.
8. Namibia has translocated more than 10,000 animals of 15 different game species – including rare and valuable species such as black rhino, sable and giraffe – out of parks into communal and freehold areas to boost populations there.
9. Namibia has reinstated several species that had become locally extinct in communal and freehold areas.



Don't confuse Namibia's positive conservation approach
with bad practices elsewhere!

Namibia's CBNRM solutions for wildlife inside and outside parks

Namibia balances conservation priorities and the needs of rural communities:

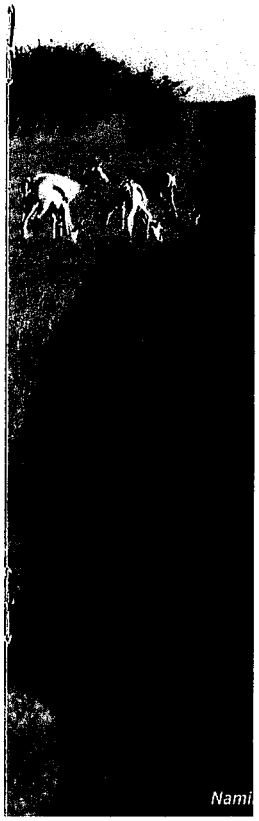
In Namibia, most communal land (around 40% of the country) and privately-owned or freehold land (around 43% of the country) is used to generate a living for the land holders. Livestock herding, crop production and game management are the main land uses.

Conservation outside national parks therefore depends on giving wildlife a tangible value so that people keep it on the land – rather than eradicating it in favour of livestock, crops or other land uses.

Keeping wildlife on the land also means living with wildlife – wildlife that can be dangerous and destructive.
Disney is not reality – in real life...

- ***... lions**, crocodiles and other predators eat livestock and sometimes kill people*
- ***... elephants** raid crops and destroy water installations and also sometimes kill people*
- *... many other wild animals such as hippos, buffaloes and rhinos can also be difficult and dangerous to live with.*

- *Wildlife use is a traditional and integral part of life in rural Africa – hunting is a part of African culture. This was the same in Europe and America – when people still lived from the land and the wildlife was still there.*
- *Namibia protects around 17% of its land in national parks – that's more than most countries.*
- *Community conservation areas cover about 20% of Namibia and embrace around 195,000 people.*
- *Tourism concessions in parks provide important income for neighbouring communities, promoting conservation.*
- *Wildlife conservation outside parks must be seen as wildlife management for the benefit of the people – not wildlife preservation for the benefit of an urban ideal.*
- *Rural people need the land to survive – for livestock herding, for crop production and for wildlife management.*
- *Wildlife management outside parks is an economic activity – just like farming – otherwise wildlife will be pushed out by land uses that generate better returns from the same land at lower costs.*
- *Photographic tourism is an ideal use of intact ecosystems with healthy wildlife populations, but can only be practiced in accessible areas with enough scenic interest and/or high wildlife densities – this leaves large areas without tourism value or income.*
- *Conservation hunting funds community conservation structures – including 83 communal conservancies and around 584 community game guards and resource monitors.*
- *Conservation hunting funds anti-poaching activities by government agencies, community conservation organisations and private sector initiatives.*



Namibia balances wildlife management outside parks with other land uses such as livestock herding and crop production

Namibia's conservation success is based on science and proof!

Namibia has one of the most intensive wildlife monitoring and utilisation control systems in Africa and the world:

Namibia uses a variety of systems to monitor and manage wildlife populations. The systems differ between national parks, community conservation areas and private farmland and are tailored to meet local needs. Management is by no means perfect in all areas or at all times. Yet the general approach of actively using wildlife outside parks for the benefit of rural communities has proven to be very successful, enabling healthy wildlife populations and strengthening local livelihoods. Namibia's dynamic conservation community ensures that environmental concerns are publicly recognised. While a balance between economic development and conservation in rural Africa is often problematic, most stakeholders strive to address issues. Collaboration between government, local communities, support NGOs and the private sector is a key to Namibia's conservation success.

- *No single approach or system is perfect. The flexibility to adapt to changing needs and circumstances is more important than any one system or approach.*
- *Namibia has excellent knowledge of its wildlife populations through ongoing research and regular, rigorous monitoring activities and systems, including aerial surveys, road counts, foot patrols and remote wildlife tracking using cutting-edge technology.*
- *The Ministry of Environment and Tourism has clear compliance requirements for wildlife management*
- *Stringent monitoring and control systems for all wildlife harvesting facilitate effective management and minimise misuse.*
- *Offtakes are carried out according to annual quotas based on sustainable harvest rates and are controlled through permits and reporting requirements.*
- *The effects of offtakes over time are monitored and harvest rates are adapted to keep populations healthy if population changes occur.*
- *Regular quota revisions for wildlife harvesting are based on monitoring data and scientific guidelines.*
- *Land use objectives differ between national parks, community conservation areas and private farmland, resulting in varying wildlife densities in different areas.*
- *Challenges are a part of wildlife management, especially when attempting to balance the needs of large, dangerous wildlife with the needs of poor rural communities.*
- *Increasing human-wildlife conflict is a result of increasing game numbers and a sign of successful conservation; it is also one of the biggest challenges for wildlife management outside parks.*
- *Wildlife in open, unfenced systems is free to roam and is susceptible to drought and disease, resulting in natural population fluctuations.*
- *Continually adapting activities to changing circumstances facilitates sustainability.*

Namibia uses scientific principles and cutting-edge technology to monitor and manage wildlife populations

Sustainable wildlife harvesting promotes conservation!

What exactly is sustainable wildlife harvesting?

Sustainable wildlife harvesting means harvesting a limited percentage of wildlife stocks without compromising the health of the overall population, in order to generate income for local communities and enable wildlife management as a viable land use. When this is legally-entrenched, well-controlled and based on scientific principles and sound knowledge, it is fully sustainable.

Wildlife harvesting has been a natural factor controlling game populations throughout human evolution, just like the impact of lions and other predators.

Sustainable wildlife harvesting...

- *Is carried out by local land holders.*
- *Creates incentives to keep wildlife on the land.*
- *Keeps natural habitats intact.*
- *Provides alternative income and strengthens rural livelihoods, especially in remote, arid environments.*
- *Enables a mix of land uses including livestock and cropping.*
- *Strengthens resilience against impacts from climate change.*
- *Strengthens resilience against external economic or political influences and reduces dependency on agriculture.*
- *Pays for conservation structures and anti-poaching activities.*
- *Provides meat for rural communities.*
- *Ensures stakeholders have a real interest in conserving wildlife.*
- *Reinforces traditional cultural values related to wildlife.*
- *Safeguards indigenous knowledge about wildlife.*

Sustainable wildlife harvesting includes these activities:

- *Conservation hunting (hunting with clear conservation outcomes targeting a very small percentage of the total population).*
- *Meat harvesting (using minimum-impact methods and offtake rates well below natural population growth rates).*
- *Live capture and sale (moving surplus animals from high density areas to low density areas within their natural range).*

What exactly is conservation hunting?

Conservation hunting consists of harvesting small numbers of indigenous wildlife as part of a personal wilderness experience based on traditional human survival skills. Conservation fishing harvests indigenous fish according to the same principles. These activities have verifiable prerequisites and outcomes (see opposite page) while focussing on wilderness experiences and participation in natural dynamics through regenerative pursuits. They can be combined under the term wildernessing and promote the protection of free-roaming indigenous species in their natural habitat.

The Namibian conservation hunting fraternity adheres to guidelines for ethical hunting, including:

- *Stalking game in natural habitat to ensure a wilderness experience and fair chase.*
- *Ensuring minimum suffering for hunted animals.*
- *Targeting mature animals that can be harvested without negative impacts on the overall population.*
- *Ensuring that all meat and other products of all hunted animals are used.*
- *Hunting predators in an ethical manner only as part of predator management.*

Clear distinction between conservation hunting and other sustainable wildlife harvesting with low or high intensity shooting practices

CONSERVATION HUNTING HAS THE FOLLOWING VERIFIABLE PREREQUISITES AND OUTCOMES:

1. It is governed by a national legal framework with clear systems of controls and reporting requirements.
2. It meets all CITES and IUCN species conservation criteria.
3. It targets only free-roaming, indigenous species in natural habitats large enough to ensure healthy population dynamics.
4. Wildlife population trends in the greater landscape are closely monitored and offtakes are adapted as needed to ensure the population health of all targeted species.
5. Offtakes are sustainable, based on species-specific, scientifically-accepted annual quotas for the hunted population.
6. It promotes the natural diversity of all indigenous fauna and flora in the hunting area.
7. It safeguards wildlife habitat (the hunting area) against destructive land uses.
8. A major portion of generated income goes back to the land holders and is spent on the conservation and human development needs of the hunting area.
9. It employs local people to carry out conservation activities in the hunting area, including wildlife monitoring and anti-poaching activities.
10. It mitigates human-wildlife conflict amongst local communities if these occur in, or adjacent to, the hunting area.

Through these criteria, conservation hunting creates clear incentives to adopt wildlife management as a land use.

Conservation hunting promotes the protection of free-roaming, indigenous wildlife and its natural habitat

Habitat loss and crime are the biggest killers of wildlife!

WILDLIFE PRESERVATION WITHOUT HABITAT CONSERVATION IS MEANINGLESS!

Land conversion and resultant habitat loss is mostly overlooked by the public, but is the biggest killer of wildlife!

Wildlife needs large areas of intact habitat to ensure healthy populations:

- *Most game needs undisturbed access to water, which it does not have if pressure by people, their livestock or their dogs is too high.*
- *Many species need to be able to roam widely in search of food, especially in areas with highly variable rainfall; fences, roads, settlements and other infrastructure all fragment habitat and inhibit the ability of wildlife to respond to seasonal food availability.*
- *Wild animals need shelter to which they can retreat when chased by natural predators or disturbed by people.*
- *Game needs large enough areas to engage in natural interactions, especially breeding and rearing of young.*
- *Wildlife can coexist with livestock, but is often eradicated by farmers who see it as grazing competition or a threat to infrastructure or safety.*
- *Wildlife is not tolerated in crop fields or gardens; effective zoning of crops into land use mosaics can leave adjacent wildlife habitats intact.*

PEOPLE ONLY MAKE THE EFFORT TO KEEP WILDLIFE HABITATS INTACT IF THEY HAVE A TANGIBLE INCENTIVE TO DO THIS.

POACHING AND UNCONTROLLED EXPLOITATION DECIMATE WILDLIFE!

Poaching and uncontrolled exploitation should never be confused with legal, sustainable wildlife harvesting!

Poaching...

- *Is stealing from the rightful owners – the local communities.*
- *Steals valuable wildlife products for sale in other areas or other countries.*
- *Takes the wildlife value out of the country and provides no local income or benefits.*
- *Undermines conservation activities and harms the resource base.*
- *Undermines tourism and other legal wildlife uses.*
- *Has a severe impact on high value species.*

Uncontrolled exploitation...

- *Places immediate financial gain over sustainability*
- *Abuses legal loopholes to exploit resources.*
- *Takes advantage of weak control mechanisms.*
- *Relies on weak governance and corruption.*
- *Benefits only a small number of individuals.*
- *Undermines conservation activities and harms the resource base.*
- *Undermines tourism and other legal wildlife uses.*
- *Is not sustainable.*

COMMERCIAL POACHING, ESPECIALLY OF RHINOS AND ELEPHANTS, IS A HUGE THREAT TO NAMIBIA'S VALUABLE WILDLIFE AND TO A VARIETY OF INDUSTRIES BASED ON IT.

TROPHY BREEDING AND SHOOTING DISCREDITS ALL SUSTAINABLE WILDLIFE HARVESTING!

Trophy shooting activities motivated only by financial gain should not be confused with conservation hunting!

These and similar practices make no conservation contributions and are not part of conservation hunting:

- *Canned shooting (shooting animals in small enclosures).*
- *Put-and-take shooting (releasing captured trophy animals for the sole purpose of shooting them).*
- *Breeding lions and other predators for trophy shooting.*
- *Breeding rarities such as black springbok, golden oryx etc. for the trophy trade.*
- *Introducing exotic species such as blesbok, nyala etc. for trophy shooting.*
- *Unethical shooting of animals based only on their trophies (rather than fair chase hunting based on a wilderness experience).*
- *Genetic manipulation of the gene pools of species to enhance trophy quality.*

GAME USE MUST BE ABLE TO PROVE CONSERVATION OUTCOMES TO BE ACCEPTED AS A VIABLE CONSERVATION ACTIVITY

EMOTIONAL ANTI-HUNTING CAMPAIGNS UNDERMINE CONSERVATION!

Anti-hunting campaigns based on emotional opinions should not derail proven conservation approaches!

In a modern world of inter-connectivity, social media and concerned global citizens, well-meaning but at times misguided international opinion and pressure don't always bring positive change – they also have the ability to influence and change legitimate local activities for the worse. Local communities and environments are often the worst-affected.

- *Calls for a hunting ban in Namibia are based on urban values and opinions, not on rural conditions and needs, and are often orchestrated by animal welfare organisations and misguided followers.*
- *A small, economically secure urban elite is challenging legal and highly beneficial activities in Africa from an idealistic moral standpoint.*
- *A hunting ban dispossesses and disempowers local decision-making and enforces a foreign moral view upon Africans.*
- *A hunting ban would have the most negative impacts on the elements that the international public is attempting to support – wildlife populations and local people outside national parks.*
- *In-depth understanding of wildlife dynamics, based on scientific principles, should not be dismissed by emotional, misguided external public opinions.*

NAMIBIA'S WELL-DOCUMENTED, SUCCESSFUL APPROACH TO CONSERVATION SHOULD NOT BE JEOPARDISED BY OUTSIDERS

What would be lost, if wildlife could not be used to generate income for local communities outside parks?

Hunting bans, which could consist either of Namibia stopping the activity of hunting, or of other countries stopping the import of hunting authentica – thereby closing the market – would have detrimental effects for wildlife outside parks, and for people currently benefitting from that wildlife.

- *The loss of income to the national economy is currently not quantified, but is likely to be over a billion Namibia Dollars.*
- *A hunting ban would result in at least N$ 43 million of lost annual returns for conservancies if all wildlife harvesting were banned, and would have a direct impact on at least 55 of the 62 conservancies currently generating returns from natural resources.*
- *Loss of conservation hunting income would result in at least 32 conservancies becoming financially unsustainable.*
- *If no immediate alternative income streams could be secured, a large percentage of the currently 584 community game guards and resource monitors employed in conservancies across Namibia would stand to lose their jobs.*
- *The loss of natural resource management structures would have immediate negative effects on wildlife populations and the health of other natural resource stocks.*
- *The loss of community game guards would significantly reduce Namibia's ability to combat poaching, especially of free-roaming rhino and elephant.*
- *Discontinuing regular wildlife monitoring and annual game counts would seriously undermine effective wildlife management.*
- *The loss of natural resource returns for local communities would result in an immediate reduction in people's tolerance of problematic wildlife such as elephants, lions and other predators.*
- *Reduced tolerance of wildlife would lead to an increase in retaliatory killing of problematic animals.*
- *A reduced sense of ownership over wildlife would lead to increased bush-meat poaching as well as poaching of high-value species.*
- *Across much of the currently 165,182 square kilometres of community conservation area, wildlife would no longer be considered a land-use priority and would be displaced by other uses such as livestock.*
- *On a large percentage of freehold farms with limited or no tourism potential, wildlife would also be displaced.*

MOST LARGER WILDLIFE SPECIES WOULD BE DISPLACED FROM MUCH OF NAMIBIA IF THEY COULD NOT BE USED TO GENERATE INCOME

Using wildlife ensures its value for land holders and KEEPS IT ON THE LAND!

The economic value of wildlife creates the incentive for land holders to include wildlife as a land use. If wildlife is not used, but preserved only for its own sake, it has little place outside parks, because land outside parks is used to generate rural livelihoods and contribute to the national economy.

- *Eat game meat to keep wildlife on the land – eat beef, and put more cattle on the land.*
- *Harvesting sustainable numbers of wildlife keeps overall populations healthy and avoids over-stocking.*
- *Conservation hunting promotes wildlife conservation and habitat protection.*

Don't confuse wildlife loss
with wildlife use!
Animals are merely poor animals unless people value their existence without generating benefits, they will be eradicated.

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III, of the non-profit firm CONSERVATION FORCE as my attorney and legal representative for all matters concerning my application for a Permit to Import a threatened-listed Elephant Trophy from Namibia

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that this attorney be copied with all correspondence, acknowledgements, notices and decisions concerning my application at the following address:

DATE

1. Name of area operator: Peter Thormahlen

   a. Years in business: 20

   b. Name of company conducting hunt: Thormahlen & Cochran Safaris

   2. Name of concession: **N#a Jagna Conservancy** Size in km^2: 9,120 or 900,120 ha

   a. Land tenure: __ Government lease _X_ Community __ Private ranch __ Private conservancy

   b. Length of concession agreement: 2016-2024 Can it be renewed? _X_ Yes __ No

   c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:

CONTRACTUAL OBLIGATIONS

- ANNUAL REPORTING -The Trophy Hunting Operator must submit an Annual Report Yearly within 30 days after the hunting season ends, which is 30 November. These Annual Reports are handed in at the Ministry of Environment & Tourism, as well as a copy at the Conservancy office, and the WWF office. Failure to submit the report timeously is punishable with a fine of N$5,000.

- MEAT DISTRIBUTION – All hunted Trophy, as well as Non-Trophy game meat is distributed to villages in the concession within 24 hours after being hunted. As a company Policy we do not leave any remains of elephant where it was hunted - no bones, skin, meat etc. After 2 days diesel is poured onto the stomach content and blood at the slaughtering site, wood stacked on top and burned. This is done to cause as little as possible stress on the elephants as there is no smell left of the hunted elephant or its remains. Elephant gets stressed seriously when bones and skin is left at the site!

VOLUNTARY DEVELOPMENTS /INVESTMENTS

- COMMUNITY INVESTMENT – We donate school stationary supplies for the local school through the SCI Blue Bag system in the amount of **N$54,000** per annum, buy uniforms for community game scouts and community camp staff to the value of **N$84,500**.
  We donate the trophy hunting camp which was built at a cost of **N$994,280** after a three-year period, back to the community and lease it from them so they can generate a monthly income from the trophy hunting camp. All maintenance is done by the Trophy Hunting Operator. The trophy hunting camp consist of 4 x client tents, dining area, kitchen tent, and 5 staff tents to the community.

The Daily Rent paid to the community in the Trophy Hunting Camp is **N$350** per person per day visiting.

- WILDLIFE WATER POINT DEVELOPMENT - Drilling and maintaining of the boreholes in the concession to establish Permanent Wildlife Water Points is a crucial part of the concession development as water allows the elephants to become resident in the concession compared to the previous yearly migration into the concession when the natural pans fill up with water during the rainy season. After which the elephants move back into Khadoum National Park and Nyae Nyae Conservancy where there is Permanent Wildlife Water Points.

  Currently 4 PWWP's (Permanent Wildlife Water Point's) have been established at a cost of **N$905,131** in the N#a Jaqna Concession Block.

  Installation of solar pump for water supply to the community members is also a crucial part of the community development program. Community members feel they are rewarded by the Conservation Developments when they receive fresh clean drinking water at their villages. This results in Wildlife Water Points being left alone and not damaged or settled around them, which chases the game away. **Attachment 1 – Wildlife Water Point Development Schedule**

- COMMUNITY EMPLOYMENT - We permanently employ 5 Community Members as Camp Staff, and 10-20 community members as Casual labor in the concession. The Casual Workers are employed 10 months per year to open roads in the concession, open the concession boundaries (Cutlines), and to skin elephants when hunted. The Permanent Staff gets a basic salary of N$2,000 per month which totals to **N$120,000** per annum.
  The Casual workers get a monthly salary of N$1,350 per month. On average **N$180,000** salary is paid per annum to Casual Workers who are community members, which is a great inflow of funds in the poor community.

- ANTI POACHING PROGRAM – Establishment of Wildlife Water Points is the first and most crucial development in the concession so that existing game becomes resident in the concession! After Permanent Wildlife Water Points (PWWP's) are established we start our Anti-Poaching program to protect the PWWP Equipment as well as the existing game. Currently all personnel are utilized as anti-poaching staff when no safaris take place. Community Game Scouts are on permanent anti-poaching patrols. Equipment and funding remain the biggest challenges as equipment is expensive.

  A serious Anti-Poaching program is needed. Funding major constraint, as Operator is spending every possible cent in the development of Wildlife Water Points. The idea is to establish the wildlife water points first so that there is permanent water in the concession, then start with an intensive Anti-poaching program. Mobility is a serious constraint in the anti-poaching effort as the area is

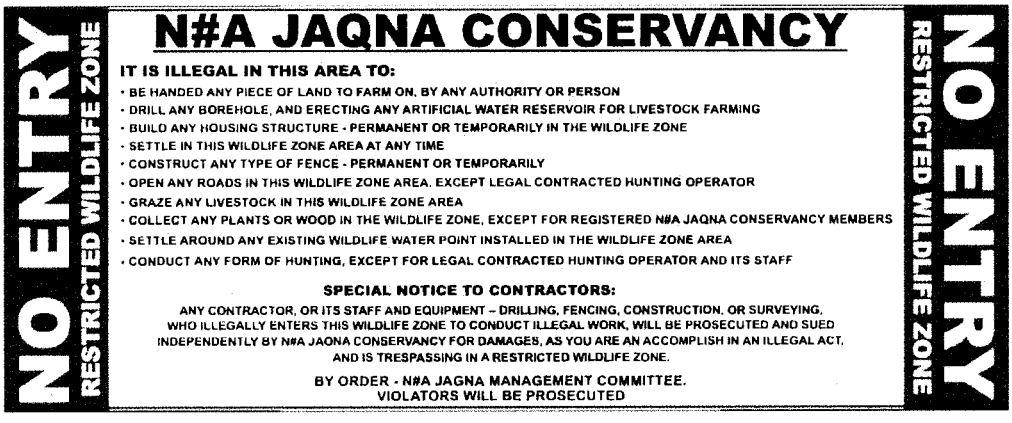
2,25 million acres big. In order to cover the concession properly four-wheeler quad bikes are needed, as well as several anti-poaching bases especially on the northern, and southern borders of the concession area, and radio communication equipment.

Now funding is done from Operators personal funds, and some small donations by hunters. We applied for a Grant from the DSCF (Dallas Safari Club Foundation) and will hopefully receive much needed funds to run a proper anti-poaching and PWWP establishment program. However, our Guides move around a lot in the area, visiting villages, and water holes to discourage poaching. With very positive results as much more game is visible since we got the concession in 2016, because of a higher visibility in the concession, hence less poaching.

However Solar Panels have been stolen by poachers on horseback on our southern border. Which means they come in from our neighboring Ondjou Conservancy as the San people are nomads without horses and livestock. To prevent any further theft, we installed trail cameras powered by a solar panel, and put up 12 feet high on a steel post with barbed wire around the pole preventing thieves to climb up the pole to destroy the cameras. It is small communities, so it will be easy to catch the perpetrator once we have their photos taken!

This area could be a dream concession if funding is available to drill for more water holes, open roads to be able to run an intensive anti-poaching program, and re-introduce game species shot out by the previous SA Army, neighboring and local poachers, i.e. red hartebeest, springbuck, Burchell's zebra, roan, sable, blue wildebeest, and warthog occurred in herds of thousands with none left today.

- NO ENTRY SIGNS



SIGN PERMISSION LETTER

Thormahlen & Cochran Safaris asked for permission to put up NO ENTRY signs at strategic positions to stop illegal land grabbing, and illegal drilling in the concession.

Approval was given by the N#a Jaqna Conservancy Management Committee and the first phase of the signs project is nearly completed. The first phase will be completed in 2019, and the secondary phase will be completed partly in 2019, and finally in 2020 due to the excessive logistics to put the signs up over the whole concession, the and the huge cost of the signs

December 5, 2017

The Chairperson
Me. Sarah Sungu
Conservancy Management Committee
N#a Jagna Conservancy
Mangetti Dune

Dear Sir/Madam

RE: LETTER-CHANGE OF CURRENT "NO ENTRY" SIGNS WORDING

We refer to the meeting held between N#a Jagna Management Committee and Trophy Hunting Operator Thormahlen & Cochran Safaris Namibia Pty Ltd on 1 December, 2017 at the N#a Jagna Conservancy Office at Mangetti Dune.

During our meeting the current NO ENTRY Signs placed at Border Cutlines entry points between Nohma and Nyae Nyae conservancy, were discussed. The Nyae Nyae conservancy as well as the Nohma San Community raised their concern regarding the NO ENTRY signs as they felt that the purpose was to keep San people from these two communities out of the N#a Jagna conservancy.

Thormahlen & Cochran explained in detail that the signs were placed to safeguard the conservancy Wildlife Areas land from the possibility of people from outside the San community illegally entering and building houses, or fencing the Wildlife areas due to the new roads and borders being opened. The N#a Jagna Management Committee

The N#a Jagna management Committee agreed with the Trophy Hunting Operator that this is a big threat considering the illegal land grabbing going on in the Conservancy. It was agreed that additional information will b added onto the existing NO ENTRY signs so that the San communities can feel free to move into and out of the areas.

N#a Jagna Conservancy Management Committee undertook to meet and decide on the additional information's wording, and that the Management Committee will inform Thormahlen & Cochran Safaris Namibia accordingly so that the correct sign information can be added by the Trophy Hunting Operator.

Thormahlen & Cochran Safaris will pay for the additional information needed to be added to the current NO ENTRY Signs, as well as the installation thereof.

We trust that our request will be looked at favorably for both the N#a Jagna Conservancy community, as well as the Trophy Hunting Operator of N#a Jagna Conservancy.

Thank you

Peter Thormahlen
CEO-Thormählen & Cochran Safaris Namibia Pty Ltd

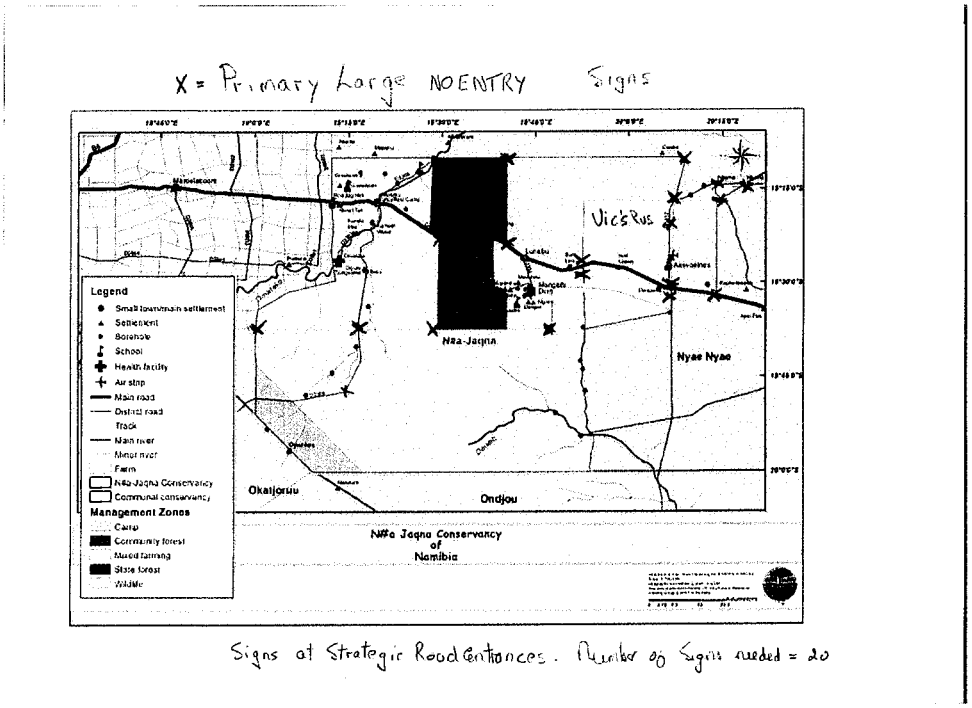
PRIMARY SIGNS

In order to stop the illegal settling and land grabbing of land in the Wildlife Zones of the N#a Jaqna Conservancy, Thormahlen & Cochran Safaris designed NO ENTRY signs with the written permission of the N#a Jaqna Management Committee.

Twenty Primary (Large) Signs will be put up at Strategic points - strategic roads and ploints where illegal land grabbers enter the Wildlife Zones to drop off workers, material, and equipment. It is especially important to have these signs visible so that Drilling Contractors can see them when illegally entering the Wildlife Zones, to illegally drill boreholes for illegal settlers.

A Special Notice on the sign refers to **Drilling Contractors** Illegally entering, and drilling in the Wildlife Zone.

"Ignorance is not an excuse to break the law", according to our Laws in Namibia.



Signs at Strategic Road Entrances. Number of Signs needed = 20

Thus, by putting the signs at strategic entrances to the Wildlife Zone Areas, there is no excuse for a contractor of any kind, to enter a Wildlife Zone. When the signs are put up, a newspaper is used to establish the date when the sign was erected. No excuse as to when the illegal settlers entered the Wildlife Zone.

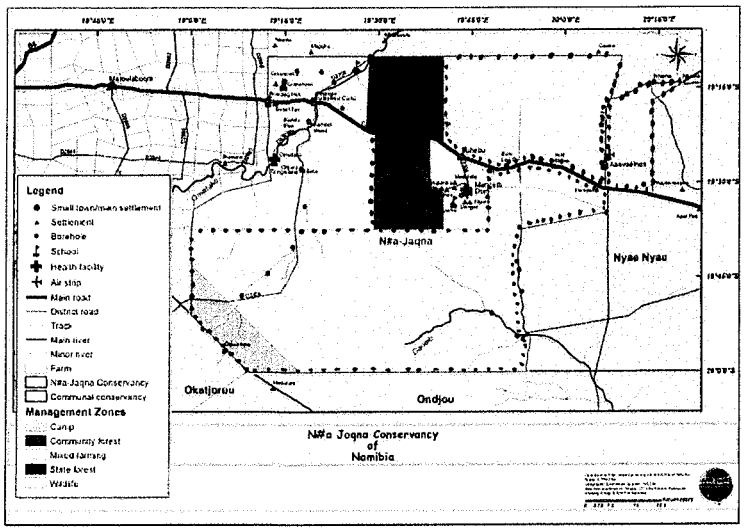
Thormahlen & Cochran Safaris is consulting with Lawyers in Windhoek in order to send a Legal Notice per registered mail, to all Drilling Contractors in Namibia, indicating the Wildlife Zone Areas in N#a Jaqna.

In the event any Drilling Contractor enters a Wildlife Zone to drill, we will get a Court Order against them to prohibit them from drilling boreholes in the Wildlife Zones, as they are obstructing our Contractual Obligation to develop the Wildlife Zones for Game.

It will be much easier, more efficient, and achieve better results, to go after the core of the illegal settling – the Drilling Contractors – than try and evict illegal land grabbers!

SECONDARY SIGNS

In order to have signs visible along all roads and borders of the N#a Jaqna Wildlife Zones, Thormahlen & Cochran Safaris will also erect smaller (Secondary) NO ENTRY signs Five Kilometres apart. Around 150 signs & frames will be needed for this exercise.



Without water no illegal settling can take place, as no one can farm without water for human and livestock!!

Drastic and outside the box measures, and funding, are needed to stop the illegal settling in the N#a Jaqna Conservancy Wildlife Zone.

COST OF CURRENT NO ENTRY SIGNS - 2018

- Invoice 10 x Primary Signs – N$9,890
- Invoice 26 x Secondary Signs – N$11,143.50
- Cost of Steel for 36 x Frames @ N$955 ea – N$35,820
- Welding Rods @ 5 kg -N$600
- Petrol for Generator to weld @ 200 litre – N$3,200
- Labour to manufacture Frames x 6 days x 2 staff @ N$75 ea pd – N$900
- Labour to manufacture Frames by Guide C Joubert @ N$500 pd – N$3,000
- Cement x 10 bags @ N$100 – N$1,000
- Staff Labour to put up signs x 5 days x 2 staff @ N$75 pd ea – N$750
- Guide C Joubert Labour to put up signs x 5 days @ N$500 pd -N$2,500
- Vehicle to put up signs x 1,500 km @ N$6 per km -N$9,000

TOTAL COST TO PUT UP CURRENT SIGNS – N$77,803

PROJECTED COST OF FUTURE NO ENTRY SIGNS

- Invoice 10 x Primary Signs – N$9,890
- Invoice 130 x Secondary Signs – N$55,717.5
- Cost of Steel for 130 x Frames @ N$955 ea – N$129,350
- Welding Rods @ 25 kg -N$3,000
- Petrol for Generator to weld @ 1,000 litre – N$16,000
- Labour to manufacture Frames x 21 days x 2 staff @ N$75 ea pd – N$3,150
- Labour to manufacture Frames by Guide C Joubert @ N$500 pd – N$10,500
- Cement x 50 bags @ N$100 – N$5,000
- Staff Labour to put up signs x 25 days x 2 staff @ N$75 pd ea – N$3,750
- Guide C Joubert Labour to put up signs x 25 days @ N$500 pd -N$12,500
- Vehicle to put up signs x 2,500 km @ N$6 per km -N$15,000

TOTAL PROJECTED COST TO PUT UP FUTURE SIGNS – N$263,857.50

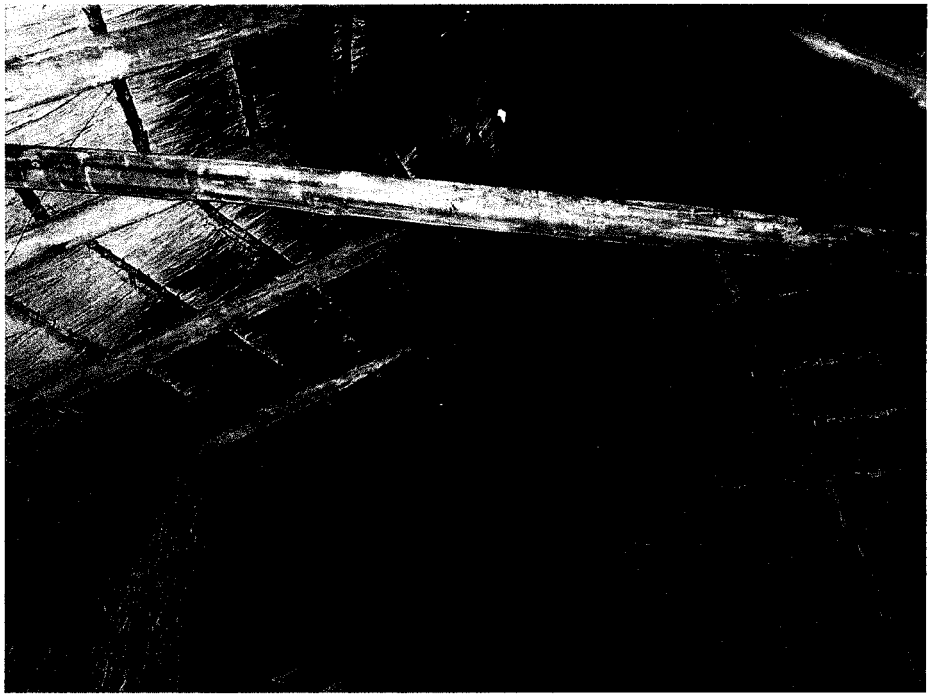
- CAMP DINING AREA REPERATION COST

COST CALCULATIONS

- Vehicle Cost -N$6,480
- Thatching Grass – N$25,000
- Trailer Rental Cost – N$6,800

- Thatching Cost – N$3,000
- Thatcher Salary -N$4,500
- Casual Workers' Salaries -N$22,500
- PH Salary -N$15,000

TOTAL REPERATION COST – N$83,280



- N#A JAQNA AIRSTRIP REHABILITATION

Thormahlen & Cochran Safaris strive to develop the N#a Jaqna conservancy as much as possible. The N#a Jaqna Airstrip at Mangetti Dune was built by the South African Military during the Bush War period in Namibia. The airstrip is a huge asset, just being neglected, and is worth millions of Namibian Dollars if it had to be built today.

Instead of using the Tsumkwe Airstrip in Nyae Naye Conservancy, we opted to rehabilitate the Mangetti Dune airstrip. The Cost to rehabilitate the Airstrip is huge, but is worth it for us, as we feel that we must fly our clients into the concession where they hunt. The location of the Airstrip close to Mangetti Dune enables us to let clients see and experience the Mangetti Dune community.

We finished clearing the Airstrip, removed all trees and obstacles that gathered over the last 28 years since the end of the war.

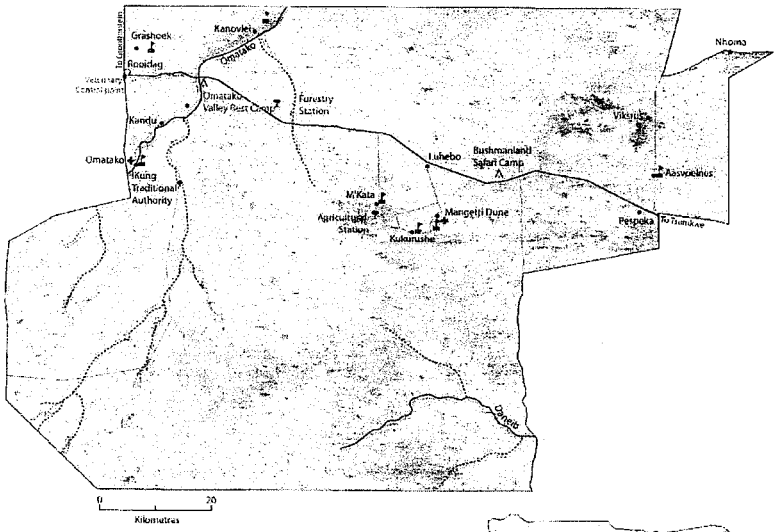
AIRSTRIP REHABILITATION COST-2018

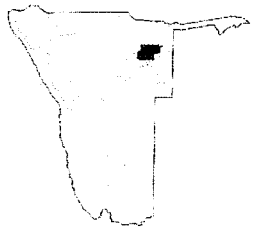
- Casual Labor Cost – N$54,000
- Grader Cost – N$6,000
- Vehicle Cost -N$40,000
- Big Game PH Salary Cost – N$50,000
- Steel Wire to fence off Airstrip for Airplane Safety – N$33,000
- Anchor Poles – N$12,000
- Dropper Poles – N$21,700
- Trailer Rental -N$8,500
- Steel Gate – N$1,000
- Windsock -N$3,500
- Windsock steel post -N$1,000
- Cement -N$2,000
- Molopo Tree Poison – N$3,600

TOTAL AIRSTRIP COST – N$236,300

d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city:

Concession Location: Located in the Bushmanland of Namibia.
South of the Kavango Region boundary of Namibia
West of Nyae Nyae Conservancy block
North of Ondjou Conservancy block
Closest Town: Tsumkwe town in Nyae Nyae conservancy
Closest City -Windhoek the capitol of Namibia which is 650 km away.





N≠A-JAQNA
(named after the buffalo thorn tree)

Registered	July 2003
Address	N≠a-Jaqna Conservancy P.O Box 1049, Grootfontein
Telephone	067 245047
Approximate population	7,000
Main home language	Ju/'hoansi
Area	9,120 square kilometres
Region	Otjozondjupa
Geographical features	Average annual rainfall of 400–450 mm. Kalahari sands cover flat landscape of broadleaf and acacia woodland.
Unusual or important features	Traditional culture of San people.
Major wildlife resources	Elephant, leopard, eland, duiker, steenbok, gemsbok, kudu, giraffe, black-backed jackal, cheetah, warthog, spotted hyaena.
Management	Management Committee of eight men and four women, additional members from traditional authority; no staff at present; two game guards trained in trophy hunting, monitoring and data collection techniques; wildlife monitoring using Event Book monitoring system
Enterprises	Omatako Valley Rest Camp (community rest camp); Grashoek Cultural Village; crafts; trophy hunting; own-use hunting; dry wood harvesting project; devil's claw harvesting.
Support agencies	MET,WIMSA (main support NGO), NNF, LAC, WWF In Namibia, CRIAA, ICEMA, NNDFN

Wildlife
N#a Jaqna Conservancy
of
Namibia

The N#a Jaqna block is number 29 on the below map.

e. If the concession borders a national park, please provide the park name: Concession does not border the Khaudum National Park, but lies 30 km south west of the Park

f. Description of general and distinctive habitat features and any water features:

Habitat:

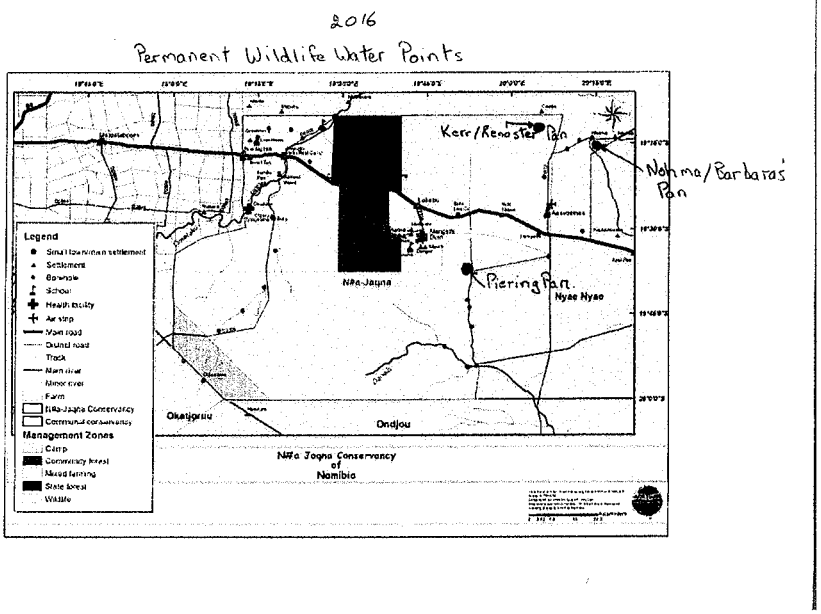
Average annual rainfall of 400-450 mm.

Kalahari sands cover flat landscape of broadleaf and acacia woodland.

Prehistoric dunes formed by Eolic sands blown in from the west coast of Namibia offers excellent habitat of broadleaf trees, yearly grass, rose thorn and raisin bush on the dunes while the area between the dunes ("dune streets") have plenty of climax grass species, black & white thorn acacia, and silverleaf terminalia trees offering a big variety of food for herbivores (browsers) as well as elephant. Some huge grass plains exist in the concession making it the ideal habitat for grass feeding species like springbuck, Burchell zebra, and red hartebeest as well as predators like cheetah which needs open spaces to hunt.

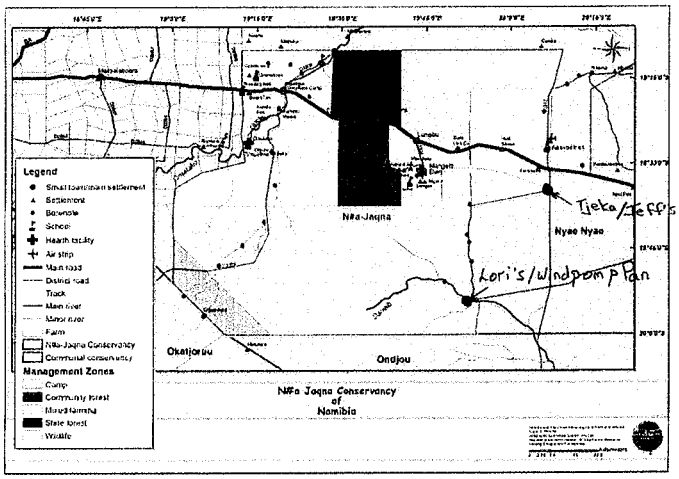
Water Features:

A number of Permanent Wildlife Water points (PWWP's) have been established in the N#a Jaqna Concession Block since 2016 when we started operating in the block.



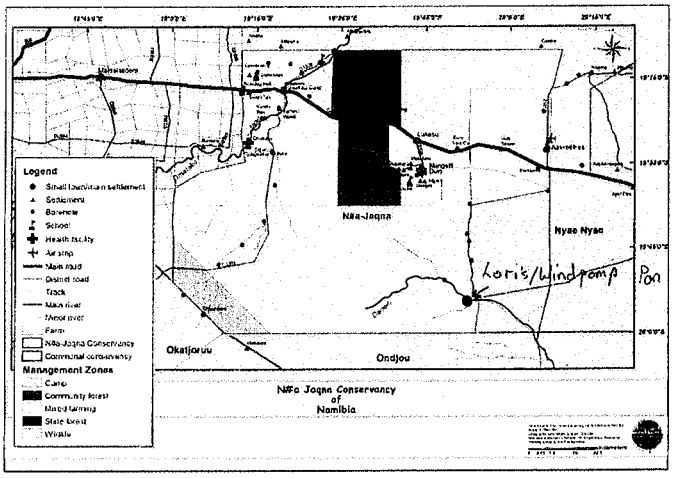
2017

Permanent Wildlife Water Points



2018

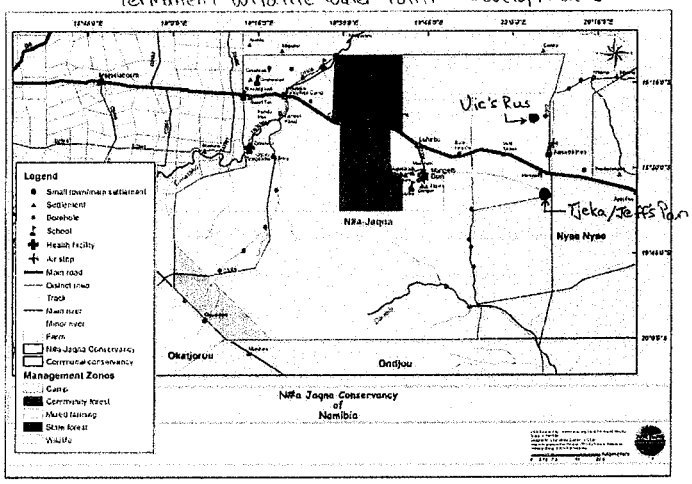
Permanent Wildlife Water Points



Lori's Pan Repaired and Solar System re-installed

2019

Permanent Wildlife Water Point Developments



Jeffs / Tjeka Pan - Cement Dam
Vic's Rus - Solar Pump & Cement Dam

TOTAL WATER DEVELOPMENT COST – 2018

Thormahlen & Cochran Safaris removed the entire Solar Panels and Pump at Lori's Pan and transported it back to Windhoek to be repaired.

Total invested in Wildlife Water Points in 2018 in N#a Jagna Conservancy is:

- Company Vehicle Transportation of Solar's to Windhoek and back – N$19,536
- Repair Cost at Cedar Solar – N$26,000
- Cement Cost – N$1,000
- Casual Labour Cost – N$6,000
- PH Labour Cost – N$11,666
- Steel Pipe, Welding Rods, Grinder blades etc. – N$1,200
- Petrol for Generator Welder– N$4,000
- Trailer Rental -N$13,600

TOTAL COST INCURRED 2018– N$83,002

Total Invested in Wildlife water Points from 2016-2018 in N#a Jaqna Conservancy:
Wildlife Water Point Cost 2016 – N$590,129
Wildlife Water Point Cost 2017 – N$232,000
Wildlife Water Point Cost 2018 – N$83,002
TOTAL COST INCURRED 2016-2018 – N$905,131

3. Are there any communities living in the concession? _X_ Yes __ No

   a. If so, estimated number of people or villages in the concession?

   Approximate San (Bushman) Population- 7,000

4. Are there communities bordering this concession? _X_ Yes __ No

   a. If so, estimated number of people or villages around the concession?

   Approximate Populations:
   Nyae Nyae Conservancy on Eastern border- 2,300 San tribe
   Ondjou Conservancy on southern border- 2,000 Otjiherero tribe
   Kavango Region on northern border– Cattle Farms -Kavango tribe
   Western Border- Cattle Farms – Mostly White Farmers

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	Dense	450-550	Rapidly Upwards due to PWWP (permanent wildlife water point) installations	Trail cameras at Water Points /Game Scout Sightings / Sightings by Hunting Guides / Tracks /MET
Lion	None	None	None	N/A
Leopard	Abundance	112-120 Average territory size is 8,000 ha	Stable	Trail Cams /Tracks/Sightings in Daytime
Cheetah	Sparse	20	Stable over last 3 years. Would like to relocate some cheetah with into the concession with collars when more game is available	Tracks / Sightings
African Wild dog	Dense	22-25	Stable over last 3 years. Would like to collar some Wild Dog when more game is available	Tracks/Sightings on the road and at waterholes
Caracal	Dense	100 +	Stable	Tracks / Sightings
African Wildcat	Dense	100 +	Stable	Tracks / Sightings
Spotted Genet Cat	Dense	100 +	Stable	Tracks / Sightings
Spotted Hyena	Average	30 +	Stable	Tracks / Sightings / Trail Cams

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Brown Hyena	Dense	75 +	Upwards	Tracks / Sightings / Trail Cams
Giraffe	Sparse	4-5	Stable	Tracks/Sightings
Cape Eland	Average	400 +	Upwards	Tracks/Sightings
SG Kudu	Sparse	100	Stable	Tracks/Sightings
Blue Wildebeest	Sparse	20	Stable	Tracks / Game Scouts
Steenbuck	Dense	1,000	Stable	Sightings / Tracks
Common Bush Duiker	Dense	1,000	Stable	Sightings / Tracks
Gemsbuck	Average	400 +	Upwards	Sightings / Tracks
Roan Antelope	Sparse	32 - 37	Upwards – Roan coming in from Nyae Nyae due to PWWP's installed on our Nyae Nyae border	Sightings / Tracks
Porcupine	Abundance	1,000 +	Stable	Sightings / Tracks
Guineafowl	Abundance	1,000 +	Stable	Sightings / Tracks
Francolin	Abundance	2,000 +	Stable	Sightings / Tracks
Doves	Abundance	10,000 +	Stable	Sightings / Tracks

6. Total employment number:

   Permanent Camp Staff – 6

   Casual Workers -20

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	6	2
Trackers	7	1
Anti-poaching scouts/rangers	Scouts -8 / Anti-poaching - 8	8
Other anti-poaching	Anti-poaching Casuals -20	20
Cooks/housekeepers	Cook / Housekeepers - 2	2
Community coordinators	Management Committee - 9	9
Managers	2	1
Biologists		
Skinner	1	1
Tracker & Trainee Guide	1	1
Camp Attendant	1	1

7. Number of staff employed in the off-season:

   Camp Staff Permanently employed – 6

   Community Game Scouts employed -8

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	Community Game scouts x 8	8	Jan-Dec
Casuals Anti-Poaching Staff	Casual Workers x 20	20	Dec-Feb
Managers	2	1	Dec-Feb
Maintenance			
Road opening/construction	Casuals x 20	20	March-Nov
Community relations personnel			
Others: _____			

8. Anti-poaching efforts:[2]

   a. Number of anti-poaching staff:

      Community Game Scouts – Permanent -8

      Casual Anti-poaching Squad - 20

   b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? During & Off Seasons patrols are done on foot, and with landcruiser vehicle.

   c. Months during which anti-poaching patrols are conducted: Jan - Dec

   d. Number of anti-poaching patrols per month: 4

   e. Description of anti-poaching equipment, vehicles, etc.: Operator allocates a landcruiser hunting vehicle to anti-poaching during the off season. Done mostly on foot during the

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

hunting season, plus guides moving around in the concession during the hunting season. **Need funding to buy four-wheeler quad bikes**

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? Operator & Conservancy Management Committee

g. Do you offer rewards to poaching informants leading to arrest? _X_ Yes __ No

h. Do you offer rewards to poaching informants upon conviction? _X_ Yes __ No

i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? **Namibian Dollar – N$**

Type of expense	Spending 2016	Spending 2017	Spending 2018	Remarks
Salaries for anti-poaching scouts	Game Scouts: 8 @ N$1,000 pm -N$96,000 Casual Team: 20 @ N$1,000 pm - N$40,000	Game Scouts: 8 @ N$1,000 pm -N$96,000 Casual Team: 20 @ N$1,000 pm - N$40,000	Game Scouts-: 8 @ N$1,000 pm N$96,000 Casual Team-: 20 @ N$1,000 pm N$40,000	Game Scouts-12 months Casual Scouts – 2 months

Carcasses observed	2	1	1	Gemsbuck & Eland
Other: _____				

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? _X_ Yes __ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution

Communities gets 100% of money contributed by Hunters for non-exportable game (Own Use Quota). The Donation for a Non-Exportable elephant is US$15,000 of which US$3,500 goes to the community, and the rest is used to establish PWWP's in the concession as wildlife water points is our primary development goal. Without water the concession is just a "Green Desert" because all surface water seeps into the sandy soil. Two non-exportable elephant is on quota yearly. The Communal fee is a contractual fee.

Our clientele is primarily USA citizens who donate SCI Blue Bags with school stationary supplies. Each hunter hunting in the conservancy donates between one and two SCI Blue bags with school stationary at a value of US$200 each bag. Hence a minimum of 5-10 SCI Blue Bags is donated at a value of N$13,500 to N$27,000. The SCI Blue Bag donations is a Voluntary fee.

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

c. Does the company provide game meat to nearby communities? _X_ Yes __ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:

All the meat from trophy animals hunted, as well as the two Own Use Elephants on quota, must be delivered to community villages in the concession within 24 hours. The Conservancy Management Committee hands the trophy hunting operator a list of villages that need to get meat. Every villages have a representative that has to sign for the meat when delivered.

This is an Obligation stipulated in the Trophy Hunting Agreement. Failure to do so is punishable with a fine of N$22 per kilogram of the average carcass weight of the different animals. Failure to pay the fine is a breech of contract with immediate suspension.

Meat Value – N$:
Elephant x 4 @ 4,500 kg carcass weight @ N$22 / kg = N$396,000
Eland x 1 @ 350 kg carcass weight @ N$22 /kg = N$7,700
Gemsbuck x 2 @ 100 kg carcass weight @ N$22 = N$4,400
Warthog x 1 @ 30 kg carcass weight @ N$22 /kg = N$660
Steenbuck x 4 @ 7 kg carcass weight @ N$22 /kg = N$616
Duiker x 2 @ 10 kg carcass weight @ N$22 / kg =N$440
Total Annual Meat Value = N$409,816.00

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.

Very little fields in the concession area. Up till now no PAC animals declared.

The N#a Jaqna Concession block is not a horticulture area, and very little crops are raised. Mainly cattle, goats, donkey, and horses are raised by community members.

When an elephant damages any property, problem elephant situations are raised by the local community and it is addressed with the Chairman of the Community. The chairman then reached out to the Minister of Environmental and Tourism, who investigates the Wildlife Human conflict, and approves the problem animal permit in writing when enough evidence is collected by the Ministry. The Chairman then reached out to the Hunting Operator to provide a client. If a suitable client is found, there is a certain time limit to hunt the animal and the permit will be issued with the client's details.

The Operator must pay the community a predetermined contractual fee for the problem animal, and the meat has to be distributed to villages on the meat delivery list as per contract

f. Please describe any consolation payments made to residents damaged by game species. What currency are the expenditures reported in?

No consolation payments made to residents as the only cattle in the concession is owned by illegal landgrabbers. Court eviction case was won by the Conservancy in November 2017, some of the illegal farmers left, but some is still hanging in there. Any damages on livestock is welcomed by the San community in the concession.

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant	N/A			
Lion	N/A

EXECUTIVE INVESTMENT / COST SUMMARY

TOTAL SALARIES & TRAINING COST- 2018

Thormahlen & Cochran Safaris spent the following amounts on training and labour in 2018:

- **Training of Camp Staff-N$75,500**
- **Camp Staff Salaries – N$120,000**
- **Casual Labour Salaries – N$108,000**
- **TOTAL COST – N$303,000**

TOTAL WATER DEVELOPMENT COST – 2018

Thormahlen & Cochran Safaris removed the entire Solar Panels and Pump at Lori's Pan and transported it back to Windhoek to be repaired.

Total invested in Wildlife Water Points in 2018 in N#a Jagna Conservancy is:

- Company Vehicle Transportation of Solar's to Windhoek and back – N$19,536
- Repair Cost at Cedar Solar – N$26,000
- Cement Cost – N$1,000
- Casual Labour Cost – N$6,000
- PH Labour Cost – N$11,666
- Steel Pipe, Welding Rods, Grinder blades etc. – N$1,200

- Petrol for Generator Welder– N$4,000
- Trailer Rental -N$13,600

TOTAL COST INCURRED – N$83,002

Total Invested in Wildlife water Points from 2016-2018 in N#a Jaqna Conservancy:
Wildlife Water Point Cost 2016 – N$590,129
Wildlife Water Point Cost 2017 – N$232,000
Wildlife Water Point Cost 2018 – N$83,002
TOTAL COST INCURRED 2016-2018 – N$905,131

Proposed Wildlife Water Point Investment on Tender:
Wildlife Water Point Cost Proposed 2016 -N$200,000
Wildlife Water Point Cost Proposed 2017 -N$250,000
Wildlife Water Point Cost Proposed 2018 -N$250,000
TOTAL PROPOSED WWP COST – N$700,000
(WWP-Wildlife Water Point)
This leaves us with a credit balance of N$204,631 compared to our proposed goal of N$700,000 in the first three years.

"NO ENTRY" SIGNS COST - 2018

- Invoice 10 x Primary Signs – N$9,890
- Invoice 26 x Secondary Signs – N$11,143.50
- Cost of Steel for 36 x Frames @ N$955 ea – N$35,820
- Welding Rods @ 5 kg -N$600
- Petrol for Generator to weld @ 200 litre – N$3,200
- Labour to manufacture Frames x 6 days x 2 staff @ N$75 ea pd – N$900
- Labour to manufacture Frames by Guide C Joubert @ N$500 pd – N$3,000
- Cement x 10 bags @ N$100 – N$1,000
- Staff Labour to put up signs x 5 days x 2 staff @ N$75 pd ea – N$750
- Guide C Joubert Labour to put up signs x 5 days @ N$500 pd -N$2,500
- Vehicle to put up signs x 1,500 km @ N$6 per km -N$9,000

TOTAL COST TO PUT UP CURRENT SIGNS – N$77,803

PROJECTED COST OF FUTURE NO ENTRY SIGNS

- Invoice 10 x Primary Signs – N$9,890
- Invoice 130 x Secondary Signs – N$55,717.5
- Cost of Steel for 130 x Frames @ N$955 ea – N$129,350
- Welding Rods @ 25 kg -N$3,000
- Petrol for Generator to weld @ 1,000 litre – N$16,000
- Labour to manufacture Frames x 21 days x 2 staff @ N$75 ea pd – N$3,150

- Labour to manufacture Frames by Guide C Joubert @ N$500 pd – N$10,500
- Cement x 50 bags @ N$100 – N$5,000
- Staff Labour to put up signs x 25 days x 2 staff @ N$75 pd ea – N$3,750
- Guide C Joubert Labour to put up signs x 25 days @ N$500 pd -N$12,500
- Vehicle to put up signs x 2,500 km @ N$6 per km -N$15,000

TOTAL PROJECTED COST TO PUT UP FUTURE SIGNS – N$263,857.50

CAMP DINING AREA REPARATION COST

- Thatching Grass – N$25,000
- Vehicle Cost -N$6,480
- Trailer Rental Cost – N$6,800
- Thatching Cost – N$3,000
- Thatcher Salary -N$4,500
- Casual Workers' Salaries -N$22,500
- PH Salary -N$15,000

TOTAL REPERATION COST – N$83,280

N#A JAQNA AIRSTRIP REHABILITATION COST

- Casual Labor Cost – N$54,000
- Grader Cost – N$6,000
- Vehicle Cost -N$40,000
- Big Game PH Salary Cost – N$50,000
- Steel Wire to fence off Airstrip for Airplane Safety – N$33,000
- Anchor Poles – N$12,000
- Dropper Poles – N$21,700
- Trailer Rental -N$8,500
- Steel Gate – N$1,000
- Windsock -N$3,500
- Windsock steel post -N$1,000
- Cement -N$2,000
- Molopo Tree Poison – N$3,600

TOTAL AIRSTRIP COST – N$236,300

TOTAL DEVELOPMENT / INVESTMENT COST - 2018

TOTAL INVESTMENT - N$783,385

was invested in N#a Jagna conservancy in 2018 in order to develop the previously marginal concession into a prime trophy hunting concession.

We saw the potential and took the risk to invest an enormous amount of money, time, and labor into the concession in 2016. Something no trophy hunting operator was willing to do in the last 11 years prior to us getting involved. And it is paying off as huge amounts of game is moving into the area!!

- Wildlife water points x 5 are now operational with Solar Pumps Installed.
- Cutline's of over 50 km were made.
- An additional 40 km of Hunting Roads were cleared.
- A super luxury Trophy hunting camp was built.
- Camp is fully Operational.

With five San community members trained to run and manage

11. How many U.S. clients did the company have in the past three years, and what percentage of the company's clients were from the U.S.?

    We operate in South Africa and Namibia, and the figures below, is for the whole operation. In N#a Jaqna we only hunt what is allocated on quota, and it is fixed by the Government. The Namibian Government, specifically the Minister of Environment and Tourism, set strict quotas at the beginning of every three years, revising it at the end of each year when the Hunting operator must submit a Hunting Report on that specific year. So, before the client arrives, the hunting operator must take out a hunting permit – and this is only available if it falls within the quota that was pre-approved.

    Current N#a Jaqna Trophy quota: 2 x trophy elephant, 2 x own use elephant, 4 x Steenbuck, 3 x leopard, 2 x Oryx, 1 x warthog. 1 x duiker.

The table below is for the total of Thormahlen & Cochran's concessions:

	Hunting elephant	Hunting lion	Hunting leopard	Hunting all other species
Number of U.S. clients	2015: 4 clients 2016: 9 2017: 5 2018: 4	2015: 2016: 2017: 2018: 1	2015: 2 clients 2016: 9 2017: 9 2018: 10	2015: 126 clients 2016: 110 2017: 141 2018: 83
Percentage of U.S. clients	2015: 99 % 2016: 98 % 2017: 100 % 2018: 98 %	2015: 2016: 2017: 2018: 100 %	2015: 100 % 2016: 98 % 2017: 99 % 2018: 100 %	2015: 95 % 2016: 96 % 2017: 97 % 2018: 95 %
Trophy fees paid by U.S. clients – US$	2015: $220,000 2016: $495,000 2017: $275,000 2018: $260,000	2015: 2016: 2017: 2018: $75,000	2015: $42,000 2016: $225,000 2017: $256,000 2018: $265,000	2015: $303,715 2016: $1,075,000 2017: $997,375 2018: $410,110

12. Dollar amount and percentage of the company's revenue from U.S. clients:

    95 %

13. Other information: Please provide a narrative of other enhancement information about the company, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes, restocking), management activities, research, etc.

    ENHANCEMENT INFORMATION

    Hunting Policies:

    Elephant – Our Company policy is to hunt only bulls older than 55 years of age. We work hard not to hunt elephant under 50 years of age, irrespective if it is a Trophy Bull, or Own Use bulls. We would like to change the Own Use bulls on quota to Trophy Bulls as it is financially much more lucrative for both the community and the hunting Operator. At the moment Own Use Bulls is hunted with no payment towards the community. All monies made from the Own Use Bulls is invested back into the hunting concession by the operator for the instalment of Wildlife Water Points. Hunting post productive bulls ensures that the breeding is not disturbed and enhances trophy quality.

    We follow the Aging Policy adopted and used with great success by the APNR - Association of Private Nature Reserves which is the Private Reserves adjacent of the Kruger National Park. The APNR uses the Aging Policy of the Kruger National Park in South Africa with great success and accuracy to determine tusk weight and bull age.

    Leopard – Our Outfit policy is to hunt male leopard of only 8 years and older, with a minimum year boundary of 6 years of age. This ensures that the breeding males can breed till they are 8 years old, without any disturbance. It works well as our trophy quality in the N#a Jagna Conservancy is improving every year as we adopted this policy since we started in the concession in 2016. We also see much more big cats in the concession as it seems that by taking out the old males it gives the breeding males more freedom and less competition from post productive males.

    Resting Areas

    There are two huge areas in the center north and south of the concession that has no roads and is used as resting / breeding areas. The concern however is that these two areas are used by poachers to operate from. We decided to open roads in these two areas, however conduct no hunting in these two areas, yet do anti-poaching patrols to keep poachers at bay.

CONCESSION IMPROVEMENTS

Trophy Hunting Camp

Please see the Annual Report for a detailed cost outlay of the Trophy Hunting Camp built, and donated back to the community after the third year, so the community can lease it to us to create a yearly income from the asset.

Airstrip

There are 2 Military Airstrips in the N#a Jagna Conservancy, which was used by the South African Defense Force in the 80's – ONE AT the main village Mangetti Dune, and the second at another small village called Aasvoelnes. The Trophy Hunting Camp is located 19 kilometers from the airstrip at Mangetti Dune. We opened the airstrip , got permission to fence it off from the Traditional Authority, and graded it so we can charter our clients to this strip. Previously we are used the Tsumkwe airstrip in Nyae Nyae conservancy which is 70 km from the trophy hunting camp.

Roads

Please see Annual Report for Roads opened, and Cutlines (borders) opened between N#a Jagna Conservancy and Nyae Nyae Conservancies

Wildlife Water Points

Please see annual report for detailed outlay of Wildlife Water points installed in the concession.

Anti-Poaching Program

The N#a Jagna Conservancy Concession was a "green desert" up until we started operating in it. It was even advertised for closed bidding by the WWF as a "marginal" concession, with lot of challenges, i.e. illegal landgrabbers, illegal fencing, and no very limited water holes in the concession. The previous operator called "Eden Safaris", did nothing in the concession for 11 years it operated in the concession.

When we won the bid for the concession, we used own funds and drilled 2 strategic boreholes on the border with Nyae Nyae and the Kavango region. Within 10 months we had two resident herds of elephant and lots of other game – please see Annual Report for detailed outlay and maps. We also installed solar pumps at three existing boreholes to supply a constant supply of water which is very important to get game to become resident in the concession.

Our enhanced activity in the concession is deterring poachers at the moment, yet we see more and more horse and dog tracks as the poachers is entering from the neighboring Ondjou Conservancy, which is also one of our concessions we acquired at the beginning of this year! So we will have to start a very well-coordinated and managed anti-poaching program ASAP in both concessions. At the moment we use 20 casual workers to clear roads, and the same xasuals work as an anti -poaching squad during December, January and February while the season is closed (December & January), and in February we are still at the USA Hunting Conventions.

Our biggest constraint is funding! This concession is a pristine area of 2,25 million acres with the Wildlife Area being at least 750,000 acres big. The lack of funds is a big problem. We have approached SCI but they said they don't finance such programs. I am currently working on completing a Concession Grant Request to submit to DSCF- Dallas safari Club Foundation in the hope that we can get a grant to install more water points, open roads, and re-introduce game species so much needed by the San Community.

Up until then all our efforts are self-financed with contributions from hunters.

Restocking of Game

During the eighties locals, as well as white Namibian hunters say that Springbuck, Red Hartebeest, Warthog, Blue Wildebeest, Southern Impala, Ostrich, Eland, Tsessebe, Gemsbuck, Kudu, Giraffe, even Sable, and Roan occurred through the whole area in herds of hundreds and thousands. Today there are only eland, gemsbuck, and kudu left. We will have to re-introduce the species wiped out!

For that we need assistance with financing!

COMMUNITY UPLIFTMENT

SCI Blue Bag Donations

Thormahlen & Cochran Safaris prides ourselves that we motivate our clients to donate a " SCI Blue Bag" full of school stationary worth US$200 at a local school in the communal areas. Last year we donated around 70 blue bags at schools.

Food for School Children

Poverty in the Communal Areas is a way of live. It is disturbing to see school children who only get one meal a day at the school, consisting of grits and soya sauce. We have clients who donate funds towards the purchase of maize meal and soya sauce which we donate at the local schools so the children can be fed.

Meat Delivery

We pride ourselves that we deliver all meat, and intestines of all hunted animals within 24 hours to the list of villages supplied by the Management Committee. Even the remotest villages is served with meat to ensure that the community benefits from the hunted animals.

MANAGEMENT ACTIVITIES

RESEARCH

African Wild Dogs

There are around 22-25 African Wild Dogs in the N#a Jagna concession. We would like to put satellite collars on some of the dogs to be able to monitor their movement in the area. They are critically endangered as a species, and we would like to assist in securing their future by constantly monitoring them in our concession area. This will provide valuable research information as to their hunting success, and movement in the concession area.

Cheetah

A very small number of cheetah is present in the concession area. After securing the Wildlife Water Points; when re-located game species numbers are high enough, we would like to release cheetahs in the concession area. Some of the cheetah will also get satellite tracking collars to monitor and study their progress.

14. I declare that the foregoing is true and correct.

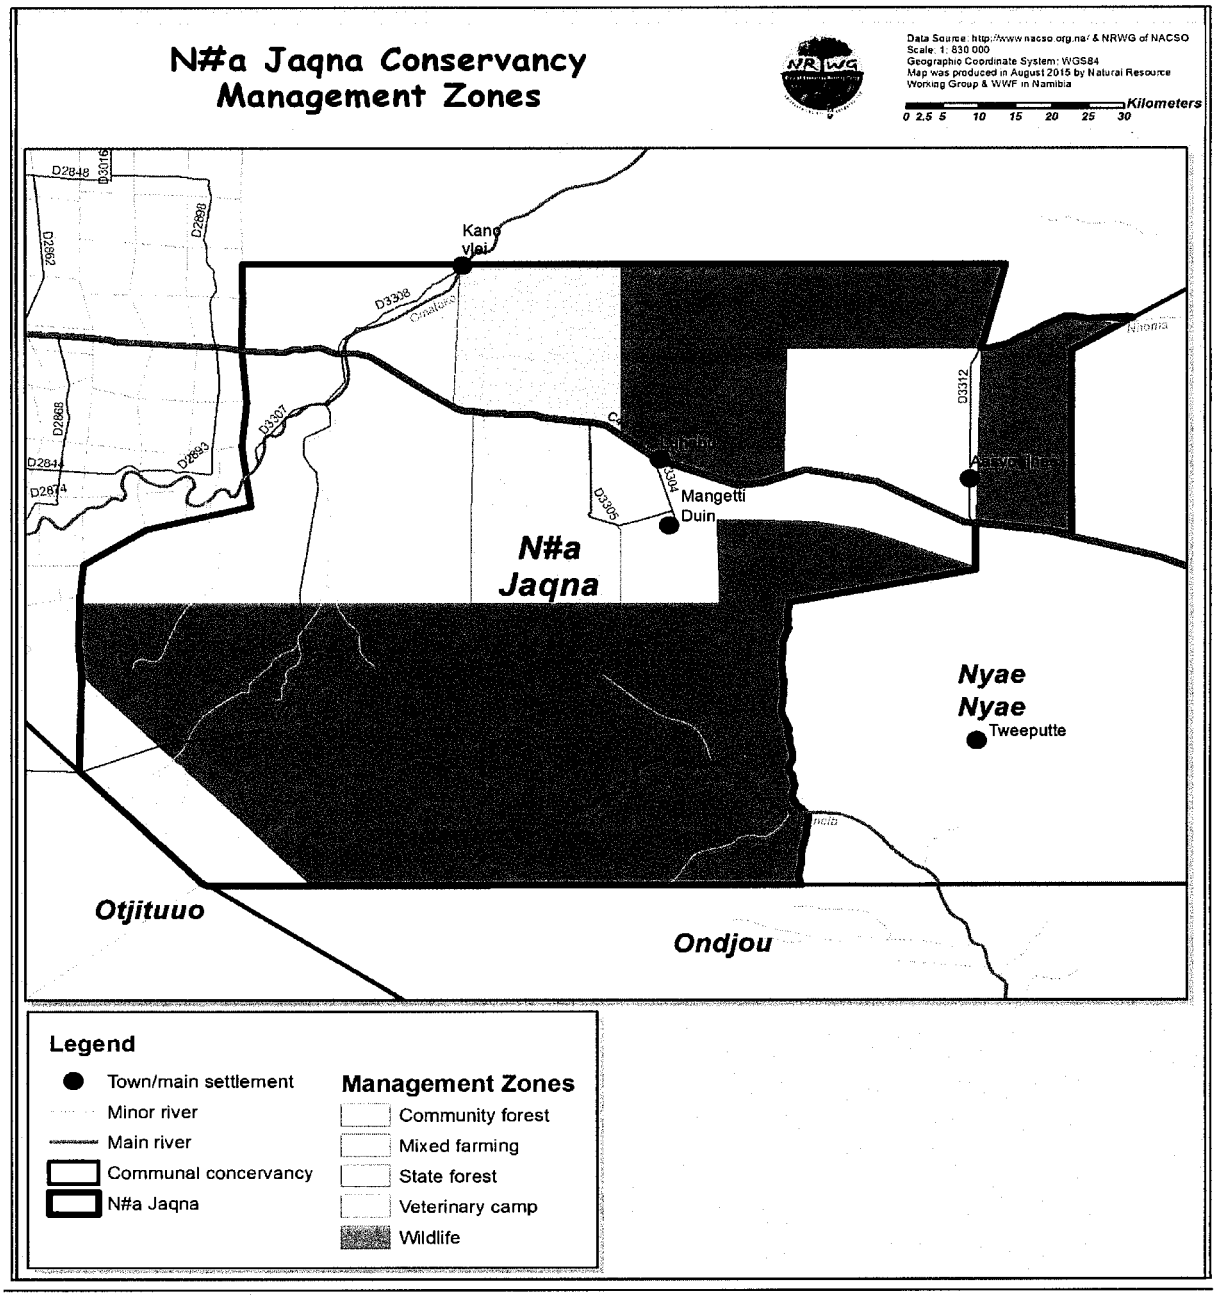
Name: **Peter Thormahlen** Title: **Mr**

ATTACHMENT – 1 - Wildlife Water Point Development Schedule

1 **SCHEDULE 4**

Pledged activities and development;



2 **SCHEDULE 4**

Pledged activities and development;

Thormahlen & Cochran shall carry out all the items as stated in the Proposal to Na Jaqna for the first phase of the first three (3) years of the contract and attached as part of this agreement.

1. **TROPHY HUNTING CAMP**

T&C Safaris will build a Trophy Hunting Camp in N#a Jagna conservancy to Operate from. This camp will be built after an intensive study of the concession area keeping in mind water availability, impact on the concession, accessibility to hunting camp, distance from conservancy office etc. As well as recommendations from the N#a Jagna conservancy committee.

The Trophy Hunting Camp's permanent Structures will become the property of the Conservancy after the 3 year period expired.

2. **WILDLIFE WATER POINTS**

Please see Attached Map of N#a Jagna Conservancy.

The Wildlife Area of the concession was divided in three Zones:

- Block A
- Block B
- Block C

The Tender period is three years. Although it is understandable why an initial 3 year period is granted by the MET and WWF, it puts a lot of challenges in the road for a proper development program. The period is just too short for an operator to invest capital and to recover it before the tender period expires. On the other hand if the operator takes his chance and develops the conservancy as it should be developed, then I assume that his lease will be extended giving the opportunity to get the capital investment back over time. And hopefully the trophy quota will be raised due to more elephant in the concession which allows for more income and profits allowing capital investment to be recovered.

However given the limitations T&C Safaris proposes the following development plan:

BLOCK A

PHASE 1

Year One of Tender - 2016

Development of Block A would take part first as there are boreholes already in this block, but they are not in working order. It is also the block that borders Nyae Nyae conservancy which gives us the biggest opportunity to attract elephant into N#a Jagna, and to get them to become resident over time.

- Four existing Boreholes marked **+1, +2, +3, +4** on the Map in Block A will be cleaned out and Solar pumps installed with a watering hole. Two holes on the eastern border of N#a Jagna**(+1, +2)** bordering Nyae Nyae, and two boreholes in the western side of Block A **(+3, +4).** We budget on N$50,000 per solar pump and panels if the boreholes still have water and just need to be repaired and a solar pump and watering hole installed. If boreholes are dry we will still invest the N$200,000 for the year by drilling waterholes close to the old ones and installing solar pumps. **Reason being that + waterholes are located in river beds which are natural feeding areas for migrating elephant bulls. So by installing waterholes here enlarges the chance for migrating elephant bulls to smell the water while feeding in the riverine area so that they can discover the watering holes, use them and get used to them being permanent.**
- **Hence a Total of N$200,000 for 2016 will be invested**

PHASE 2

Year Two of Tender – 2017

- During this Phase Two strategic waterholes will be drilled in Block A. Depending on where the most elephant activity is the two holes will be drilled and solar pumps and watering holes installed. Our budget is N$125,000 per waterhole. Possibilities are Numbers **1, 2, or 3** on the map. **Reason being that numbers 1 & 2 is river beds which is natural feeding areas for migrating elephant bulls. So by installing waterholes here enlarges the chance for migrating elephant bulls to smell the water while feeding in the riverine area so that they can discover the watering holes, use them and get used to them being permanent.**
- **Hence a Total of N$250,000 for 2017 will be invested**

PHASE 3

Year Three of Tender – 2018

- During this Phase another Two strategic waterholes will be drilled in Block A. Depending on where the most elephant activity is the two holes will be drilled and solar pumps and watering holes

installed. Our budget is N$125,000 per waterhole. Possibilities are Numbers **4, 5, or 6** on the map. Number 5 waterhole is once again a riverine area which enhances the chance of elephant to bump into the waterhole. However now we go one step further and install watering holes **4,** and **6** in a "dead" zone where there may never have been even temporary water due to the Kalahari sand. With watering holes **1, 2, 5,** and **+ 3,** and **+ 4** having permanent all year water elephant will start wondering into this previously "dead "zone and back to the watering holes they know –numbers **1, 2, 5**, and **+ 3**, and **+ 4** to drink. Eventually they will discover watering **holes 6**, and **4** and the whole block will start to be utilized by migrating elephant which will over time turn into resident elephant.

- **Hence a Total of N$250,000 for 2017 will be invested**
- We will **drill Boreholes** and **install Solar Pumps** with watering holes – please see Development & Management plan outlay.

- **Transportation** is very important for the community due to the remoteness of the conservancy in the Bushmanland. However Wildlife Water Points is also a very high priority! Thormahlen & Cochran Safaris undertakes to let the N#a Jagna conservancy choose between either the Drilling of boreholes for Wildlife Water points, or a Vehicle in one of the three years. It is a difficult choice because the community may need a vehicle to transport community members, but on the other hand the only way we can develop the trophy hunting concession is by installing wildlife water points to attract elephant and other game into the conservancy.

- However, in the event that MET decides to enlarge the trophy quota, or if a Problem Elephant comes up and we sell it to a hunter, we undertake into buying of **a vehicle** for the conservancy. In the event of **a Problem elephant** we undertake to buy the vehicle in that year with the money made from hunting the bull with a foreign hunter, while we still proceed with the Wildlife Water Point Development & Management Plan. We do not encourage the declaring of a problem elephant just for the sake to buy a vehicle for the community! In the event that an elephant becomes a problem we undertake to use the funds made from the selling of that specific bull to buy a community vehicle.

- If there is a need for **a Satellite Dish & Television**, we undertake to buy a television with Satellite TV for the community hall as recreation, if a Community Hall does exist. If there is no **Nampower** we will also install **a Solar Power system with Batteries** for the community.

- If a **Community Hall** does not exist T&C Safaris undertakes to liaise with the N#a Jagna community into the building of a Community Hall if we are the successful bidder and we get another 2 years extension on the lease, so that we have a Five Year Contract..

- We will **Train and Sponsor the Training** of the members of the community as specified.

- In the event that the community needs **Salt Blocks** for their Cattle & Goats T&C Safaris will buy one ton of Salt Blocks per year for the community cattle.

- Training of the appointed Tracker to become **a Hunting Guide** in Year 3 (hence in October of the second year he will be sent to the hunting academy) of the Contract by sending him to the Volker Gruellmann Hunting Academy. The reason for sending him to the hunting academy in year 3 is for the member to gain hunting experience – on elephant, as well as baiting and hunting of leopard. It will be fruitless to send the member to the hunting academy if he has no trophy hunting experience. T&C Safaris undertakes to utilize the community member Hunting Guide so that he gain experience to become a master Hunting Guide and eventually a PH. With enough experience and if the potential exists the member could eventually qualify as a Big Game PH.

- When the N#a Jagna appointed Tracker qualifies T&C Safaris will appoint another **Tracker** in the community so that a Total of Six community members are permanently employed from year 3 onwards

- **Trophy Hunting Camp** will be built to conduct hunts from. Camp will consist of One Guest tent with en-suite bathroom, one Dining Tent / Lapa, one Kitchen tent, One Manageress / PH tent (tent will be divided in half to accommodate separate rooms), one PH /manageress Bathroom, and Five Staff Tents. A Skinning Area & Salt Room will be built for trophy skins. In the event that the Trophy Hunting Quota is enlarged a Second Guest Tent will be erected. The permanent fixed structures in the trophy hunting camp will become the property of the N#a Jagna community after the 3 year contract expires. In the event that our lease is extended we will negotiate with the community to Pay Rent to the community.

- **Donating of school supplies**. Our foreign hunting clients bring school supplies on a regular basis to Namibia – pencils, rubbers, etc.

3 SCHEDULE 5A

Envisaged Employment and Salaries:

Type of Local Staff To Be Employed	Estimated Number To Be Employed	Estimated Duration of Employment (please specify the number of days.)	Estimated Salary per Time of Employ (days)
Camp Staff- Trainee Chef/Manager-Female	1	365 days/12 months	N$65.75 p day/N$2000 p month
Skinner-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
Tracker-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
Other 1. Camp Attendant-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
2. Camp Lady -Female	1	365 days/12 months	N$65.75 p day/N$2000 p month
3.			

4 THE OPERATOR SHALL PROIVIDE FOOD TO ALL THE STAFF DURING THE PERIOD WHEN THEY ARE ON DUTY

5 SCHEDULE 5B

Types of training by operator:

Number of Local People to be Trained	Types of Training To Be Provided	Estimated Length of Training	Proposed Training Site	Commencement of training
1	Chef/Manager training	12 months (see below)	Windhoek Politec and in camp	Feb /March 2016
1	Tracker	See below		March 2016
1	Skinner	See below		March 2016
1	Camp Attendant	12 months	In house training	March 2016
1	Camp Lady	12 months	In house training	March 2016

Type of Activity:
Import of Sport-hunted Trophies of Southern African Leopard, African Elephant, and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Johnson	David	Gary	

2. Date of birth (mm/dd/yyyy)	3. Occupation	4. Affiliation/ Doing business as (see instructions)
(b) (6)		

5.a. Telephone number	5.b. Alternate telephone number	5.c. Fax number	5.d. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Spicewood	Texas	78669	Travis	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No ☑

3. (b) (6)
...r with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ...nd I certify that the information submitted in this application for a permit is complete and accurate to the ... statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/person responsible for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 01-19-2018

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: NA (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: NA (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: NA

   b. Date wildlife is to be hunted: NA

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks). NA

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Namibia, Otimbojo/Uhungu, Africa
   b. Date wildlife was hunted: September 19, 2017
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): 4 Elephant feet mounted as bar stools, tanned skin panels as leather, tanned face panel, tanned trunk, 2 tanned ears, tail as a flyswatter, 2 tusks
   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
   Reisec Taxidermy
   Plot 43, Brakwater, Windhoek, ~~Namibia~~ Africa Namibia 9000

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name: Business: Reisec Taxidermy
   Name: Address: Sven Baard
   Address: Plot 43, Brakwater
   City: Windhoek
   State/Province:
   Country, Postal Code: Namibia 9000

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, trade, barter, donation, or exchange that is reasonably likely to result in economic gain). I understand that I may only import two leopard trophies in one calendar year. I understand that I may not import more than two trophies in one calendar year. In addition, I understand that raw ivory may not be re-exported.

(b) (6) [redacted]

Applicant's signature _____ Date: 01-18-2018

Be aware that this activity may require permits or other requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information: you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

RE: Namibia Africa Elephant Hunt September 19, 2017

Nick Nolte Hunting was contacted by the Namibia Ministry Of Environment and Tourism on or about September 17, 2017 to help in the removal of a problem/rogue bull elephant in the Otjimbojo/Uhungu (see attached Permit To Hunt For Trophies) area of Namibia, Africa. The Namibia Ministry Of Environment and Tourism stated that the Elephant was responsible for the deaths of two people and destroying approximately 20 huts in a village. The Namibia Ministry Of Environment and Tourism was seeking a hunter to pay to hunt the Elephant and the funds they were seeking would go to help the victims and their family's. The Namibia Ministry Of Environment and Tourism stated that if no paying hunter could be found the Elephant would be killed within 2-3 days time. The meat from the Elephant would go to the people of the village once it was dead.

RE: Namibia Africa Elephant Hunt September 19, 2017 (FWS Ref #PRT74826C

Paragraph 9.a.:

Following information provided by Namibia Ministry of Environment Elephant Study of 2017:

“Since 1975, elephant population has increased an average of 4.5% per year. In 1975 Elephant population was 7500. In 2017 Elephant population was over 22,700. It is estimated that sustainable population is a maximum of 22,000.” Therefore, reduction in Elephant population is necessary to prevent overpopulation and habitat destruction. In my case, the removal of this Elephant was necessary to protect the Villagers since this Elephant had already killed 2 people.

Paragraph 9.b.
I traveled to Namibia, Africa September 15, 2017 to hunt Leopard and plains game Nick Nolte Hunting Safaris (NNHS) for 14 days. I had no plans to hunt Elephant. When hunting in second and third world Countries many people benefit from the American dollars we bring into the economy. They have no social welfare systems and must subsist off the land and from what ever work they can find or products they can make a sell to tourist. When hunter’s are present not only do we inject American Dollars into the economy but, the majority of the meat from the animals harvested feeds the many workers supporting the Safari operations and area villagers when hunting government concessions.

Nick Nolte Hunting Safaris (NNHS) was contacted by the Namibia Ministry Of Environment and Tourism on or about September 17, 2017 to help in the removal of a problem/rogue bull Elephant in the Otjimbojo/Uhungu (see attached Permit To Hunt For Trophies) area of Namibia, Africa. The area where the Elephant lived was in a Park where there are several Tourist lodges. The Tourism Ministry had recently made the Lodges require their guest not feed the Elephants people food any longer because the Tourism Ministry had determined the Elephants were becoming to dependent on the people food (ie: oranges, lettuce, apples) and not feeding on their native/natural forge enough. The lodges have man made barriers around them that keep the Elephants and other native animals from just walking into the lodge grounds.

It was to late the Elephants had become used to eating the people food so they started looking for other sources of people food in native villages located in the Park. Even though the villages are located many miles from the river bottoms where the Elephants mostly live the Elephants were waiting for the cool night air to set in then leaving the river and walking to the villages. They were following the scent of the people food in the air. The huts the villagers live in are constructed with what ever sticks, logs, rock,

cardboard and metal panels they can find. When the Elephants arrived in the village in the middle of the night they started crushing the huts, with sleeping people inside, trying to get the people food.

The Namibia Ministry Of Environment and Tourism stated that the bull Elephant was responsible for the deaths of two people and destroying approximately 20 huts in the village. Two days prior to our arrival to hunt the Elephant the villagers had moved out of their village to a mountain top several miles away. They refused to walk to their village when they needed something and the Park management was having to drive the villagers from the mountain to their village and back to the mountain.

The Namibia Ministry Of Environment and Tourism was seeking a hunter to pay to hunt the Elephant and the funds they were seeking ($15,000.00 USD) would go to compensate the family's whose loved ones had been crushed to death and other victims and their family's rebuild and refurbish their huts. The Namibia Ministry Of Environment and Tourism stated that if no paying hunter could be found the Elephant would be killed within 2-3 days time. The meat from the Elephant would go to the people of the village once it was dead. Within 1 1/2 hours of having the Elephant on the ground the villagers started showing up on their Donkey Carts, on foot and in Park vehicles for their share of the Elephant meat. They all wanted to shake my hand and thank me for helping them with the Elephant, feed their family's and making it safe for them to move back to their village.

Leopard hunt daily fees total:	$10,465.00
Leopard License:	$115.00
Leopard Tag:	$1150.00
Plains Game Permit:	$115.00
Bait game charges:	$2070.00
Transportation:	$850.00
Elephant:	$15,000.00
Elephant Taxidermy:	$8860.00
Tips to 2 trackers, 3 house helpers, 3 skinners, 1 driver, 1Professional Hunter:	$3750.00
Total USD Spent In Namibia Economy:	$42,375.00

Paragraph 9.c.
The Professional Hunter I hunted with has orchards in the northern part of Namibia that he runs year round. He told me his average worker is paid $120.00 USD per month, is provided a hut without running water or electricity and all the fruit they can eat on site while working. I tipped the head tracker $350.00 and the learner tracker $150.00. When they are working at the hunting lodge they also get 3 meals a day, fresh water, clothing, and a hut with electricity, running water and inside restroom.

Thank you
David Johnson

U.S. Fish and Wildlife Service

Federal Fish and Wildlife Permit Application Form

OMB No. 1018-0093
Expires 05/31/2017

FEB 7 2018

Return to: U.S. Fish and Wildlife Service
(Enter address from pages 5 and 6 of application)

Type of Activity:
REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT
(For this application, all permits, registrations, and certificates are referred to as a permit.)

Complete Sections A or B, C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Coker	Howard	C.	N/A

(b) (6) [redacted]

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)
N/A	N/A

2. Tax identification no	3. Description of business, agency, Tribe, or institution
N/A	N/A

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
N/A	N/A	N/A	N/A

5. Principal officer title	6. Primary contact name
N/A	N/A

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address
N/A	N/A	N/A	N/A

C. All applicants complete address information

(b) (6) [redacted] #, Suite #, or Room #, no P.O. Boxes)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Jacksonville	FL	32207-2119	Duval	USA

(b) (6) [redacted] different than physical address, include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Jacksonville	FL	32201	Duval	USA

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount indicated on pages 6 and 7**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☑ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: MA10501C-0 No ☐

3. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6) [redacted]

(Do not submit photocopied or stamped signatures) Date of signature (mm/dd/yyyy): 01/30/2018

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 (http://www.fws.gov/forms/3-200-2.pdf) and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 (http://www.fws.gov/forms/3-200-3.pdf) and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66, http://www.fws.gov/international/pdf/permit-application-form-3-200-66-replacement-document.pdf. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to http://www.fws.gov/international/permits/by-form-number/index.html to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. **Permit number.** Enter the permit number to be reissued/renewed/amend MA10501C-0.

2. Submit the original permit with this application.

3. **Past activities.**
   a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit. N/A
   b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal. ATTACHED

4. **Annual Report.** If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.)

5. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form.

6. **Certification** - Complete one of the statements below and supply any additional documentation requested: (original signature is required)

   a. For **NO CHANGES** to original application:

   I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

   Permittee's signature: (b) (6) Date: 01/30/2018

   b. For **CHANGES** to original application:

   On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we need to request additional information regarding the changes after reviewing your initial request.

   I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

   Permittee's signature: N/A Date: N/A

7. All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

8. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

9. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

   ☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 8. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email): James L. Boone

(b) (6) [redacted]

12. **Disqualification Factor:** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. [50 CFR 13.21(c)]. Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Renewal Application Addendum
Permittee: Howard C. Coker
Permit #: MA10501C-0

In response to the requirements of Section E, 3b, a successful elephant hunt was conducted and the trophy is still being prepped by the Namibian taxidermist. They have indicated the shipment will not be ready prior to the expiration date of the existing permit.

Original, Unused Permit Returned

Authority: Statutes and Regulations: 16 USC 1539 (a); 50 CFR 17.40 (e).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Conditions and Authorizations:

A. Authorized to import the sport-hunted trophy of one African elephant (*Loxodonta africana*), taken in Namibia for the purpose of enhancement of the survival of the species.

B. Trophy must have been taken during the 2017 hunting season.

C. U.S. Threatened Species: tusks must be marked as per [50 CFR 17.40(e)]. In accordance with the African Elephant Conservation Act, raw ivory, including sport-hunted trophies that are wholly or partially ivory, may not be re-exported from the U.S.

D. Valid for use by permittee named above.

E. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.

G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law.

H. Specimen may not be sold or transferred for any financial remuneration.

I. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II expot permit issued by the Management Authority of Nambia.

Barry , Anna <anna_barry@fws.gov> Thu, May 17, 2018 at 10:40 AM
To (b) (6)

Dear Mr. Jim Boone,

In response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service is revising its procedure for assessing applications to import certain hunted species like African elephants. We are withdrawing our countrywide enhancement findings for a range of species across several countries. In their place, the Service intends to make findings for trophy imports on an application- by-application basis. Please be aware that we continue to seek additional information directly from the relevant foreign Government Authorities to support our permit findings, therefore, applications are still under review.

Because each application now requires an individual finding under the Endangered Species Act, all application both new and ones submitted for renewal, cannot be finalized until this review process has been finalized.

Sincerely

Anna Barry
Senior Biologist
USFWS/Division of Management Authority
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803

Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT You may have noticed that our application forms expired 5/31/2017 . The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted. We do not accept applications via fax or e-mail.

Sign up for our e-newsletter to learn how we're working around the globe to protect species and their habitats!

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: Namibia; Zambezi Region; Katima Mulilo District; Bwabwata National Park East; near the village of Kongola; GPS coordinates: S17°44.408' E023°21.743'
   b. Date wildlife is to be hunted:
   6/1/2017 - 6/17/2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).
Elephant - hide, feet, ears, tusks, shoulder mount, skull
Leopard - life size mount, skull, hide

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: N/A
   b. Date wildlife was hunted: N/A
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): N/A
   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]: N/A

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Ndumo Safaris Ltd.
Name: Address: Karl Stumpf | Frederick Bezuidenhout
Address: P.O. Box 1667
City:
State/Province:
Country, Postal Code: Ngweze, Namibia

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.
Please see attached page

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: N/A Date: N/A

7. **If you are the hunter applying to import your own trophy,** please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivo[redacted]s, cannot be re-exported.

Applicant's signature: (b) (6) [redacted] Date: 8/30/16

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

ATLANTA, GA

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

SAME AS MAILING ADDRESS ON PAGE 1

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Jim Boone
(b) (6) [redacted]

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☒ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Ndumo Safaris Enhancement Letter

Ndumo Safaris Ltd is a northeast Namibia based outfitter striving to combine sustained big game hunting with a focus on wildlife conservation within a vast concession of land. The concession is managed in an integrated approach with both the Namibian Government and local communal conservancies to enhance and benefit wildlife through conservation. This partnership approach with Ndumo and the communal conservancies which have been awarded a hunting quota have developed a successful model to help benefit both wild populations of target species and the local, impoverished communities to:

1) Co-exist on land with elephants and leopard
2) Derive a hunting based income from animals on land unsuitable for eco-tourism
3) Create core hunting areas with limited livestock entry, thus creating enhanced wildlife zones
4) Create 33 jobs with wages close to double the local standard
5) Provide communities with over 100 metric tons of much needed protein

Ndumo currently owns/operates two communal conservancies in the Caprivi/Zambezi region of Namibia:

- Sobbe conservancy
- Sikunga conservancy

Additionally, we operate Bwabwata East or Kwando Core area inside the Bwabwata National Park. The Namibian government has adopted integrated park management with the residents of the land on which the National Park is situated. Park residents are mostly from the Barakwena tribe, a Khwe San bushmen minority group. The residents have formed the Kyaramacan Association to represent them and manage income from tourism and trophy hunting. Ndumo has been awarded the trophy hunting concession from the Association.

Ndumo Safaris pays close to US$ 550,000 to both the Namibian government and local communities in concession and license fees. Fully 60% of these fees generated by elephant and leopard hunting support conservation through local communities and the Game Products Trust Fund (GBTF). GBTF revenue is reinvested into wildlife management, conservation, rural development, and activities that are aimed at promoting the coexistence of humans and wildlife. Additionally, Ndumo pays the communities another US $ 50,000 to further enhance and benefit wildlife by drilling bore holes, empowering local communities through anti-poaching efforts, purchasing game scout uniforms, and managing risks in areas of possible human/wildlife conflict further ensuring wild population sustainment.

The International Union for Conservation of Nature (IUCN) believes well-managed trophy hunting can "assist in furthering conservation objectives by creating the revenue and economic incentives for the management and conservation of the target species and its habitat, as well as supporting local livelihoods" and, further, that well-managed trophy hunting is "often a higher value, lower impact land use than alternatives such as agriculture or tourism." When a trophy hunting program incorporates the following Guiding Principles, IUCN considers that trophy hunting can serve as a conservation tool: biological sustainability; net conservation benefit; socio-economic-cultural benefit; adaptive management—planning, monitoring, and reporting; and accountable and effective governance. We support this approach and are taking an active role in its implementation.

ELEPHANT IMPORT FROM NAMIBIA

Permit Number: MA10501C-0

Effective: 03/13/2017 Expires: 03/12/2018

Issuing Office:

CHIEF, BRANCH OF PERMITS, DMA

Permittee:

HOWARD C. COKER
(b) (6) [redacted]
JACKSONVILLE, FL 32207-2119
U.S.A.

Authority: Statutes and Regulations: 16 USC 1539 (a); 50 CFR 17.40 (e).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Conditions and Authorizations:

A. Authorized to import the sport-hunted trophy of one African elephant (*Loxodonta africana*), taken in Namibia for the purpose of enhancement of the survival of the species.

B. Trophy must have been taken during the 2017 hunting season.

C. U.S. Threatened Species: tusks must be marked as per [50 CFR 17.40(e)]. In accordance with the African Elephant Conservation Act, raw ivory, including sport-hunted trophies that are wholly or partially ivory, may not be re-exported from the U.S.

D. Valid for use by permittee named above.

E. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.

G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law.

H. Specimen may not be sold or transferred for any financial remuneration.

I. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II expot permit issued by the Management Authority of Nambia.

Federal Fish and Wildlife Permit Application Form

OMB No. 1018-0093
Expires 05/31/2017

FEB 7 2018

Return to: U.S. Fish and Wildlife Service
(Enter address from pages 5 and 6 of application)

Type of Activity:
REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT
(For this application, all permits, registrations, and certificates are referred to as a permit.)

Complete Sections A or B, C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Coker	Howard	C.	N/A

(b) (6)

(b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)
N/A	N/A

2. Tax identification no	3. Description of business, agency, Tribe, or institution
N/A	N/A

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
N/A	N/A	N/A	N/A

5. Principal officer title	6. Primary contact name
N/A	N/A

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address
N/A	N/A	N/A	N/A

C. All applicants complete address information

(b) (6) #, Suite #, or Room #, no P.O. Boxes)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Jacksonville	FL	32207-2119	Duval	USA

(b) (6) different than physical address, include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Jacksonville	FL	32201	Duval	USA

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount indicated on pages 6 and 7**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☑ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: MA10501C-0 No ☐

3. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6)

(Do not submit photocopied or stamped signatures) Date of signature (mm/dd/yyyy): 01/30/2018

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 (http://www.fws.gov/forms/3-200-2.pdf) and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 (http://www.fws.gov/forms/3-200-3.pdf) and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66, http://www.fws.gov/international/pdf/permit-application-form-3-200-66-replacement-document.pdf. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to http://www.fws.gov/international/permits/by-form-number/index.html to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. **Permit number.** Enter the permit number to be reissued/renewed/amend MA10501C-0.

2. Submit the original permit with this application.

3. **Past activities.**
   a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit. N/A
   b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal. ATTACHED

4. **Annual Report.** If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.)

5. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form.

6. **Certification** - Complete one of the statements below and supply any additional documentation requested: (original signature is required)

   a. For **NO CHANGES** to original application:

   I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

   Permittee's signature: (b) (6) Date: 01/30/2018

   b. For **CHANGES** to original application:

   On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we need to request additional information regarding the changes after reviewing your initial request.

   I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

   Permittee's signature: N/A Date: N/A

7. All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

8. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

9. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

   ☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 8. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email): James L. Boone
(b) (6) [redacted]

12. **Disqualification Factor:** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. [50 CFR 13.21(c)]. Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Renewal Application Addendum
Permittee: Howard C. Coker
Permit #: MA10501C-0

In response to the requirements of Section E, 3b, a successful elephant hunt was conducted and the trophy is still being prepped by the Namibian taxidermist. They have indicated the shipment will not be ready prior to the expiration date of the existing permit.

Dear Mr. Jim Boone,

In response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service is revising its procedure for assessing applications to import certain hunted species like African elephants. We are withdrawing our countrywide enhancement findings for a range of species across several countries. In their place, the Service intends to make findings for trophy imports on an application- by-application basis. Please be aware that we continue to seek additional information directly from the relevant foreign Government Authorities to support our permit findings, therefore, applications are still under review.

Because each application now requires an individual finding under the Endangered Species Act, all application both new and ones submitted for renewal, cannot be finalized until this review process has been finalized.

Sincerely

Anna Barry

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND SOUTHERN WHITE RHINOCEROS

Below is the details of Save Valley etc
Address is P.O. Box CH381 Chispite Harare
Area hunted Save Valley Conservancy
Area:Nyika Region: Masvingo
Ranch Matendere and Mapari
Nearest City Masvingo
Co ordinates 20.516985 32.096167

ies that you did not use, please **return the unused original**
ecause you have taken a trophy, but were unable to import it
ewal form (3-200-52;
nber/index.html) and return your original permit with that

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: SAVE VALLEY CONSERVANCY, P.O. BOX CH381 CHISPITE HARARE, ZIMBABWE AREA: NYIKA REGION: MASVINGO RANCH: MATENDERE AND MAPARI NEAREST CITY: MASVINGO, COORDINATES 20.516985 & 32.096167
   b. Date wildlife is to be hunted: 06/25/2018 – 07/14/2018
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).
      SKIN, SKULL, TASKS, FEET
3. **IF THE ANIMAL IS DEAD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:
   b. Date wildlife was hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: GAVIN RORKE PROFESSIONAL HUNTER LICENSE 318
Business Name: SAFARI SERVICES AFRICA LLC
Address: 6 MILLAR ROAD,
Address:
City: BORROWDALE HARARE
State/Province:
Country, Postal Code: ZIMBABWE

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, ca

Applicant's signature: (b) (6) Date: 01/28/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

NEW York, NEW York

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

RALPH W. DE NATALE (b) (6) [redacted]

email: (b) (6) [redacted]

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☒ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

KNOW ALL MEN BY THESE PRESENTS: That, ✓ Richard L. Pahlau (Full name of individual, partnership, corporation, sole proprietorship, or limited liability company) (Identity) doing business as a ✓ INDIVIDUAL (Individual, partnership, corporation, sole proprietorship) under the laws of the State of ✓ Ohio, residing or having a principal place of business at ✓ (b) (6) [redacted], Massillon, OH 44646 hereby constitutes and appoints ✓ D & L CHB (Grantee's Name), its officers, employees, and/or specifically authorized agents, to act for and on its behalf as a true and lawful agent and attorney of the grantor for and in the name, place and stead of said grantor, from this date, in the United States (the "territory") either in writing, electronically, or by other authorized means, to:

Make, endorse, sign, declare, or swear to any customs entry, withdrawal, declaration, certificate, bill of lading, carnet or any other documents required by law or regulation in connection with the importation, exportation, transportation, of any merchandise in or through the customs territory, shipped or consigned by or to said grantor;

Perform any act or condition which may be required by law or regulation in connection with such merchandise deliverable to said grantor; to receive any merchandise;

Make endorsements on bills of lading conferring authority to transfer title; make entry or collect drawback; and to make, sign, declare, or swear to any statement or certificate required by law or regulation for drawback purposes, regardless of whether such document is intended for filing with U.S. Customs and Border Protection;

Sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits or statements in connection with the entry of merchandise;

Sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated by said grantor;

Authorize other Customs Brokers duly licensed within the territory to act as grantor's agent; to receive, endorse and collect checks issued for CBP duty refunds in grantor's name drawn on the Treasurer of the United States if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor;

And generally to transact Customs business, including filing of claims or protests under section 514 of the Tariff Act of 1930, or pursuant to other laws of the territories, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney;

Giving to said agent and attorney full power and authority to do anything whatever requisite necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents;

This power of attorney to remain full force and effect until revocation in writing is duly given to and received by grantee (if the donor of this power of attorney is a partnership, the said power shall in no case have any force or effect in the United States after the expiration 2 years from the dates of its execution);

Grantor acknowledges receipt of ✓ D & L CHB (Grantee's Name) Terms and Conditions of Service governing all transactions between the Parties.

If the Grantor is a Limited Liability Company, the signatory certifies that he/she has full authority to execute this power on behalf of the Grantor.

IN WITNESS WHEREOF, the said ✓ Richard L. Pahlau

caused these presents to be sealed and signed: (Signature) (b) (6) [redacted]

(Capacity) ✓ N/A Date: 03/23/2017

Witness: (if required) N/A

If you are the importer of record, payment to the broker will not relieve you of liability for CBP charges (duties, taxes or other debts owed CBP) in the event the charges are not paid by the broker. Therefore, if you pay by check, CBP charges may be paid with a separate check payable to "U.S. Customs and Border Protection" which shall be delivered to CBP by the broker. Importers who wish to utilize this procedure must contact our office in advance to arrange timely receipt of duty checks.

To: Ailteas Braxton <ailteas_braxton@fws.gov>, Luis Rivera <luis_rivera@fws.gov>, "MacDonald, Tim" <tim_macdonald@fws.gov>, Miguel Richardson/ARL/R9/FWS/DOI <Miguel_Richardson@fws.gov>, Rogelio Hubbard <rogelio_hubbard@fws.gov>, "Whitley, Stephanie" <stephanie_whitley@fws.gov>, "Williams, Robert" <robert_williams@fws.gov>, Caroline Harlow <caroline_harlow@fws.gov>, Kathleen Moore <kathleen_moore@fws.gov>, Anna Barry/ARL/R9/FWS/DOI <Anna_Barry@fws.gov>

Dear Team Mates:

D & L Customs House Brokers has moved and has a new address. There are several applications here that when the permit(s) is(are) issued must be mailed to D & L's new address. That new address is:

D&L CHB, LLC
2015 S. ARLINGTON HEIGHTS, SUITE 123
ARLINGTON HEIGHTS, IL 60005

The file numbers and person assigned the file(s) are:

98157C	AB
75906C	AB
80967C	MR
80975C	MR
11485C	MR
98158C	SDW
98120C	SDW
98119C	SDW
98118C	SDW
98117C	SDW
98115C	SDW
46993C	SDW
42537C	TM
80972C	RH
75883C	RW
75905C	RW
75904C	RW

A couple of these files show that they have been recently issued but not yet mailed.

Please make these changes to the application package that you are working on and add this e-mail to the administrative record of the file(s) assigned to you.

Respectfully,

George D. Villavicencio

Type of Activity:
IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Hadden	David	Alexander	

2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
(b) (6)			

6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address
(b) (6)			swhadd46@yahoo.com

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Corpus Christi	TX	78414	Nueces	United States

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No ☑

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other [illegible] and I certify that the information submitted in this application for a permit is complete and accurate to the [illegible] statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES* and/or *ESA)*

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 3: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 4: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:
   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   - Panthera Pardus Pardus, African Leopard
   - Loxodonta Africana African Elephant
   b. Sex (if known).
   - Male - African Leopard
   - Male - African Elephant
2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
   N/A
   b. Date wildlife is to be hunted:
   N/A
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).
   N/A
3. **IF THE ANIMAL IS DEAD,** please enter the following:
   a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):

Leopard - Zimbabwe, Matetsi Unit 3 - Nearest City Victoria Falls
Elephant - Zimbabwe, Matetsi Unit 3 - Nearest City Victoria Falls

   b. Date wildlife was hunted:
   6-29-2016 - Elephant
   7-4-2016 - Leopard

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).
Elephant - Tusks, Skin, Ears, Feet, Tail, Trunk
Leopard - Life size mount

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:
47 Goud St. Laboria
Polokwane, Limpopo Province, RSouth Africa 0704

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name: David Alexander Hadden
Business Name: Safari Taxidermy
Address: 47 Goud Street Laboria
Address:
City: Polokwane
State/Province: Limpopo Province
Country, Postal Code: RSA 0704

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if [redacted] ivory, once imported into the United States, cannot be re-exported

Applicant's signature [redacted] Date: 1-19-2018

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2). Houston, TX

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

N/A

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

N/A

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

David Hadden, (b) (6) [redacted]

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity:_____(Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity:__1__(Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity:_____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted: Namibia, Concession Area Baleyrwa, GPS Coorinates -18.2912270 23.6067500 21 September 2017

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

   2 x tusks, 4 x feet, skull, 2 x ears, 6 x panels, 2 x femur bones, trunk, tail, 2x eye panels, penis.

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   Trophaendienste CC, Plot 65/16, Kappsfarm, Windhoek, Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Name: Address:	Trophaendienste CC; Louw Nel; Telephone +264 232 236
Address:	Plot 65/16
City:	Kappsfarm
State/Province:	PO Box 21068
Country, Postal Code:	Windhoek Namibia

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

Please see current enhancement finding for Namibia.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: N/A _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature (b) (6) Date: 2/9/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Conservation Force, 504-837-1233, cf@conservationforce.org ---------and---------
Lorna Hamblin (b) (6)

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

RE: Elephant Import Permit

To Whom it Concerns,

My name William Chad Perry, shortly after I heard of the President of the United States signing a bill to legally import elephants from Zimbabwe I booked a hunt. I did harvest a mature elephant shortly before Christmas 2017. It was a very joyous and happy occasion for the village that the elephant was taken by and for myself.

Several hundred people from the village showed up when the elephant was being butchered. 141 families in the village benefited from the meat from the elephant.

There was a financial benefit from the cost of the hunt that was distributed to the people in the village as well.

Your consideration for this permit would be greatly appreciated.

Sincerely,

(b) (6)

William Chad Perry

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

(b) (6) [redacted]

WICHITA, KANSAS 67211

ATT: WILLIAM CHAD PERRY

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

WILLIAM CHAD PERRY

(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

   a. Leopard (*Panthera pardus*) Quantity: ____ (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.

   b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: ____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, Please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE ANIMAL HAS ALREADY BEEN TAKEN**, please enter the following:

   d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

ZIMBABWE GPS - SE 182526
PROPERTY - MASIKILI VICTORIA FALLS

   e. Date wildlife is to be hunted:

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

COLLETTS WILDLIFE ARTISTRY
15 JOSIAH CHINAMANO ROAD
BELMONT, BULAWAYO +263 9 885868

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

   a. If you are applying to import a trophy directly from **Namibia**, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: RIANA LIGTHELM
Business Name: SAFARI TAXIDERMY
Address: 47 GOUD STREET
Address: LABORIA
City: POLOKWANE
State/Province:
Country, Postal Code: RSA, 0704

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) Date: 2/28/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. **All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).**

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity:_____(Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity:_____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Klaserie Private Nature Reserve, South Africa

   b. Date wildlife was hunted: August 4, 2018

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

   Skull, 2x Skin panels, 4x Feet, 2x Ears, Tail, Trunk, 2x Tusks (ZA/17/2656/16.30MP;ZA/17/2655/14.95MP)

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   Safari Taxidermy
   47 Goud Street, Laboria, Polokwane, RSA

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business	Safari Taxidermy
Name: Address:	PO Box 235, Ladanna, 0704
Address:	47 Goud Street
City:	Laboria
State/Province:	Polokwane
Country, Postal Code:	RSA

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature: Atty. In Fact for Ernest P. Bundrant Date: 02/28/2018

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:_____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

HUNTER INT'L BROKERAGE SERVICES, INC.
5674 Stoneridge Drive, Suite 209
Pleasanton, CA 94588

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Vanessa Tabugan
Tel# (925) 417 5270 ext 104 / E-mail: import@b.hunter-international.net

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Know all men by these presents: That, ERNEST PATTON BUNDRANT
(Full legal name of individual)

residing at (b) (6) [redacted] PERALTA NEW MEXICO 87042
(Residential or physical mailing address, P.O. Box is not accepted)

hereby constitutes and appoints: **HUNTER INTERNATIONAL BROKERAGE SERVICES, INC., its officers, authorized employees and duly appointed sub-agents** to act for and on its behalf as a true and lawful agent and attorney of the grantor named above for and in the name, place, and stead of said grantor from this date and in all Customs Districts, and in no other name to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, carnet or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandise shipped or consigned by or to said grantor, to perform any act or condition which may be required by law or regulation in connection with such merchandise to receive any merchandise deliverable to said grantor:

To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make sign, declare, or swear to any statement, supplemental statement, schedule, supplemental schedule, certificate of delivery, certificate of manufacture, certificate of manufacture and delivery, abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district:

To sign, seal and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise;

To sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated by said grantor;

To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantor's name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor;

To waive the requirement of other Customs Brokers transmitting a copy of the customs entry CF7501 and the Customs Broker's bill of services directly to the undersigned grantor in accordance with CF 111.36(a) & (b). Such entry summary and bill will be transmitted through Hunter International Brokerage Services, Inc. It is also understood that the agreement between Hunter International Brokerage Services, Inc. and other Customs Brokers does not forbid or prevent the Customs Broker from having direct contact with the grantor in accordance with CFR 111.36(c)(3).

To generally to transact at the customs houses in any district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent and attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents the forgoing power of attorney to remain in full force until notice of revocation in writing is duly given to and received by a District Director of Customs.

The undersigned grantor of this power of attorney hereby agrees to HUNTER INTERNATIONAL BROKERAGE SERVICES, INC. Terms and Conditions of Service, which are attached hereto and incorporated herein by reference.

IN WITNESS WHEREOF, the said (Print full legal name) ERNEST PATTON BUNDRANT

has caused these presents to be sealed and signed: (Signature) (b) (6) [redacted]

(Capacity) _____ (Date) FEBRUARY 16 2018

Important note: If you are the importer of record, payment to the broker will not relieve you of liability for Customs charges (duties, taxes or other debts owed Customs) in the event the charges are not paid by the broker. Therefore, if you pay by check, Customs charges may be paid with a separate check payable to the "U.S. Customs Service" which shall be delivered to Customs by the broker. Importers who wish to utilize this procedure must contact our office in advance to arrange timely receipt of duty checks.

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted _Bull Elephant____ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA
T: (504) 837-1233
F: (504) 837-1145

Type of Activity:

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Miloff	Dwight	Lee	

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Billings	Montana	59101	Yellowstone	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

Same as above

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

   Same Address

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Dwight Miloff (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Loxodonta Africana African Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   Matetsi Unit 1 in Zimbabwe . Nearest City is Victoria Falls.

   b. Date wildlife is to be hunted: 10/5/2018 thru 10/18/2018

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   KLIPKRAAL SAFARI SERVICES & AGENCIES. Gary Hopkins PH.

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). N/A

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name:
   Business Name:
   Address: Collette's,15 Josiah Chinamano Road, Bulawayo Zimbabwe.
   City:
   State/Province:
   Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   See attached sheet

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   See attached sheet

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

   See attached sheet

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature (b) (6) _____ Date: 3/8/18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

.

A. Do you have any information regarding the population status or trend data on the species hunted?

The Matetsi Safari Area Elephant populations are basically overflow populations from two major populations being that of the Greater Hwange Areas and Greater Chobe Areas. Counts from both these populations combined is over 50000 Elephants.

B. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by the landowner, community, or government?

Funds generated from the Safaris directly work for the whole safari operation. Being employment of Professional Hunters, trackers, skinners, cooks, waiters, camp staff etc., plus also providing employment to National Parks employees as well; in the form of Permits Officers Warden, Game Rangers etc. Indirectly helping with economy of the nearest local town (Victoria Falls) with food, general supplies, fuel etc. all being purchased from here, thus again stimulating the country economy by providing jobs etc. Meat that is harvested from the animals taken also used to help feed the people in the Safari area.

C. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?
Rev.

Funding again generated from safaris also are allocated to anti-poaching activities that not only benefit elephant (although Elephant are always a priority) but other game as well.

CURRENT ISSUES

Poaching of elephants for ivory has escalated in the past ten years and has become a major problem in Zimbabwe. A worrying recent development has been the emergence of poisoning as a poaching technique. Just over 100 elephants were killed in a single cyanide poisoning incident in Hwange National Park in late 2013 (Muboko et al., 2014). The impact of poaching has been highest in the north of the country, particularly in the Sebungwe Region to the south of Lake Kariba, and the Lower Zambezi Region (Dunham et al., 2015c). Although elephant numbers have increased in Gonarezhou National Park, it too experienced an increase in poaching in 2015 (Dunham & van der Westhuizen, 2015).

Concern has been expressed about the impact of high numbers of elephants on vegetation and other biodiversity in Zimbabwe's protected areas. Despite the increase in poaching, this remains a problem in protected areas such as Hwange NP, where the provision of artificial water supplies has led to high elephant densities (ZPWMA, 2015).

Zimbabwe published a national elephant management plan covering the period 2015 to 2020 (ZPWMA, 2015).

In 2008, Zimbabwe undertook an approved one-off sale of 3,764 kg of ivory to Japan and China, at a price of USD $487,162 (Wijnstekers, 2011).

Zimbabwe's annual declared export quota of elephant trophies remains unchanged since 2007 at 1,000 (tusks as hunting trophies from 500 animals) (CITES, n.d.-b). In 2015, the US Fish and Wildlife Service removed its 'non-detriment' finding, thus banning the import of elephant trophies into the USA (USFWS, 2015a).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Zimbabwe is 82,630 ± 8,589 at the time of the last survey for each area. There may be an additional 1,635 to 1,805 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 78,839 km^2, which is 97% of the estimated known and possible elephant range. There remains an additional 3% of the estimated range for which no elephant population estimates are available.

There has been a decline of just over 10,000 elephants from surveyed populations since the AESR 2007 and an increase of about 1,000 in guesses, mostly from previously unsurveyed areas in North West Matabeleland. Although there have been large losses from the Sebungwe and Lower Zambezi populations, these have been partially compensated by increases in Gonarezhou and North West Matabeland.

The major populations of the Lower Zambezi Valley (including Mana Pools National Park), Sebungwe (including Matusadona and Chizarira National Parks), North-west Matabeleland (including Hwange and Zambezi National Parks) and the south-east Lowveld (including Gonarezhou NP) were surveyed in 2014 using **aerial sample counts** (including block counts in hilly areas) as part of the Great Elephant Census.

The estimate from the Lower Zambezi Valley in 2014 was 11,656 ± 2,259 (Dunham et al., 2015c). The previous comparable estimate was 19,297 ± 2,527 in 2001 (Mackie, 2002). The 2014 figure replaces an estimate from the AESR 2007 of 19,981 ± 2,392 from 2003 (Dunham, 2004). This survey was less comparable than the 2001 one because it covered a slightly smaller area. There was an approximately 40% decline in the 13 years between 2001 and 2014. The observed carcass ratio of 6% is not as high as one would expect given the rate of population reduction and might suggest that the level of poaching has reduced in recent years. The corridor between the Mavuradonha Wilderness Area and the rest of the Zambezi Valley range has been changed to **possible range** (Packenham quoting Varden, pers. comm., 2016).

The 2014 estimate for Sebungwe was 3,407 ± 1,215 (Dunham et al., 2015b) which replaces an estimate of 15,024 ± 2,133 from a 2006 survey (Dunham et al., 2006a). The observed carcass ratio of 30% indicates an unsustainably high offtake of elephants. There were almost no elephants left in the communal areas, with the main surviving sub-populations in Matusadona and Chizarira National Parks and the Chirisa Safari Area. Wildlife scouts reported 70-100 elephants in Kavira Forest Land at the western end of Sebungwe (M. Sebele pers. comm. in Dunham et al., 2015b).

The 2014 estimate for North-west Matabeleland was 53,991 ± 7,711 (Dunham et al., 2015a), which replaces an estimate of 49,310 ± 7,051 from 2001 (Dunham & Mackie, 2002). There was no significant difference between the totals although the increased carcass ratio of 7% from 3% in 2001 is a worrying sign. Other aerial sample counts were carried out in 2006 and 2007 but they were not

suitable for comparative purposes (Dunham et al., 2007; Dunham et al., 2006b). Since the 2014 Botswana survey was carried out a month earlier than the north-west Matabeleland survey there is a possibility of double-counting or missing animals that had moved from Hwange into Botswana. There was a surprisingly large number of elephants seen in the Ngwasho/Sepako stratum in Botswana adjoining the southern half of Hwange NP (estimate 11,744) (Chase et al., 2015) and evidence from radio-tracking shows that elephants do move out of Hwange into adjoining areas of Botswana (Chamaillé-Jammes, pers. comm., 2016; Ferguson & Chase, 2010).

Elephant range in North-west Matabeleland has probably increased. Water hole counts and scout reports indicated 308 elephants in the Fuller Forest Land, 165 in Gwaai, Bembezi and Umguza Forest Lands (which has been marked as new **known range**) and 150 in Gwampa/Lake Alice Forest Reserves (M. Sebele pers. comm in Dunham et al., 2015a) which are all recorded as **new populations**. I. Du Preez (pers. comm. in Dunham et al., 2015a) reported an **informed guess** of 36 elephants in the privately owned Stanley & Livingstone Game Reserve (Nakavango).

The estimate for Gonarezhou NP from the 2014 survey was 11,120 ± 2,709 (Dunham & van der Westhuizen, 2015). This replaces an estimate of 4,987 ± 1,577 from a comparable 2001 survey. Another survey in 2009 gave an estimate of 9,123 ± 1,898 (Dunham et al., 2010). The elephant population of Gonarezhou NP is continuing to increase, and is at its highest level since surveys started in 1980. There was a relatively low carcass ratio of 4%. There are limited movements of elephants from Gonarezhou into adjoining parts of Mozambique, and one radio-collared elephant moved from Kruger to Gonarezhou (Henley, 2011).

The 2014 survey of the south east Lowveld included some neighbouring areas. No elephants were observed in the Malapati Safari Area immediately south-west of Gonarezhou but there was an estimate of 332 ± 519 in the Mahenye communal land to the north-east of Gonarezhou, which replaces a zero estimate from the 2001 survey. The 2014 survey gave an estimate of 1,585 ± 1,295 for the Savé Valley Conservancy. This replaces an estimate of 527 ± 310 (Dunham, 2003). There is no statistical difference between the two results. Aerial total counts were carried out in 2013 and 2015 (Jooste & Lenton, 2015; Joubert & Joubert, 2013), which did not cover the entire area: 1,538 and 1,490 elephants were counted respectively. Sengwe, further to the south-west, adjoining the northern boundary of Kruger National Park in South Africa, was not counted in the 2014 survey, but there was an estimate of 35 ± 99 in 2013 (Dunham et al., 2013). In the Malilangwe Conservancy 272 elephants were counted using a helicopter in 2013 (Clegg, 2013). This replaces an estimate of 116 from an aerial total count in 2001 (Dunham, 2002). There was an estimate of 55 in 2014 for the Chiredzi River Conservancy (Warth in Dunham & van der Westhuizen, 2015) compared to 28 in 2001 (Dunham, 2002). Although Chipinge Safari Area is marked as possible elephant range, this is now highly unlikely.

There are a number of small isolated populations in other parts of Zimbabwe, which have updated estimates for 2014. There is an informed guess of 150 elephants for Chegutu Safari Area (Mwale, pers. comm. in Dunham, 2015), formerly Hartley Safari Area, west of Harare and this replaces a guess of 100 from 2001 (Dunham & Mackie, 2002). Some 30 elephants reportedly move from the Nyatana Wildlife Management Area in the north east of the country into Mozambique and this replaces a guess of 150 from 2001 (Dunham & Mackie, 2002).

Some 20 bull elephants were photographed, and there was a further unverified report of 40 elephants, near Mangwe Dam in the vicinity of Home Farm and Greystone Ranches, across the border from Francistown in Botswana (Robertson and Winch, pers. comm. in Dunham, 2015) replacing a guess of three from 2002 (Dunham & Mackie, 2002). A helicopter total count enumerated 174 elephants on Shangani Ranch near Bulawayo (Edwards, pers. comm. in Dunham, 2015) and this replaces a guess of 60 from 2001 (Dunham & Mackie, 2002).

There was a **total aerial count** of 212 elephants in 2014 in the Zimbabwe section of the Mapungubwe Transfrontier Conservation Area which includes Tuli Safari Area, Sentinel, Nottingham and River Ranches (Selier & Page, 2015). This replaces an estimate of 82 from 2001 (Dunham & Mackie, 2002).

There were **informed guesses** in 2014 of 500-600 in Bubye Valley (Leathem & English pers. comm. in Dunham, 2015), and 100 on Bubiana Conservancy (Drummond pers. comm. in Dunham, 2015) in the south of Zimbabwe, replacing guesses of 53 and 50 respectively (Dunham & Mackie, 2002). An old estimate of ten elephants in the Mambali Communal Lands on the Botswana border has been retained from the AESR 2007 (Dunham & Mackie, 2002). A report of 54 elephants on Nuanetsi Ranch is recorded as a **new population**.

*RANGE OF INFORMED GUESS

KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season);
— : No Change

KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst).

PFS

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

RE: WITHDRAW PRT No. 83100C and PRT No. 35290C

Dear Chief Cogliano:

Please be advised that Dwight Miloff applied for an elephant import permit in 2017 and 2018. We would like to withdraw his applications as he did not harvest an elephant on either trip.

It should be noted that on both the 2017 and 2018 trip to Zimbabwe, Mr. Miloff hunted in the Matetsi Unit 1, near Victoria Falls and saw at least 300 animals each day and only one very big bull elephant, but he was only carrying around 55 lbs of ivory.

Please do not hesitate to contact us if you have questions about these permit applications.

Sincerely,

John J. Jackson III

3240 S I-10 Service Road W, Suite 200, Metairie, Louisiana 70001, USA
Telephone: (504) 837-1233 • Fax (504) 837-1145 • Email: cf@conservationforce.org

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted _Elephant_____ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Type of Activity:
Import of Sport-hunted Trophies of
Southern African Leopard, African Elephant, and
Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Saulsbury	Mark	Arnold	

2. Date of birth (mm/dd/yyyy)	3. Occupation	4. Affiliation/ Doing business as (see instructions)
(b) (6)		N/A

5.a. Telephone number	5.b. Alternate telephone number	5.c. Fax number	5.d. E-mail address
(b) (6)			(b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)
N/A	

2. Tax identification no	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Odessa	Texas	79765	Ector	USA

2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: unknown No ☑

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: N/A (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Namibia, Nyae-Nyae Conservancy, OTJOZONDJUPA Region, Nearest Town: Tsumkwe

   b. Date wildlife was hunted: August 8, 2017

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

      2 Tusks, 2 Ears, Cape, 2 Skin Panels, 1 Tail

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

      International Air Cargo Services, Unit No. 10, Northern Industrial Park, Newcastle Street, Windhoek Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Name:	S.M. Jacobs SMJ Safaris
Address:	P.O. Box 601
City:	Grootfontein
State/Province:	Namibia
Country, Postal Code:	

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

Please see current enhancement finding for Namibia.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature: N/A _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature (b) (6) [redacted] Date: 3-5-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☑ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Conservation Force, 504-837-1233, cf@conservationforce.org

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Contributed Paper

Complementary benefits of tourism and hunting to communal conservancies in Namibia

Robin Naidoo,* L. Chris Weaver,† Richard W. Diggle,† Greenwell Matongo,† Greg Stuart-Hill,† and Chris Thouless†‡

Abstract: *Tourism and hunting both generate substantial revenues for communities and private operators in Africa, but few studies have quantitatively examined the trade-offs and synergies that may result from these two activities. We evaluated financial and in-kind benefit streams from tourism and hunting on 77 communal conservancies in Namibia from 1998 to 2013, where community-based wildlife conservation has been promoted as a land-use that complements traditional subsistence agriculture. We used data collected annually for all communal conservancies to characterize whether benefits were derived from hunting or tourism. We classified these benefits into 3 broad classes and examined how benefits flowed to stakeholders within communities under the status quo and under a simulated ban on hunting. Across all conservancies, total benefits from hunting and tourism increased at roughly the same rate, although conservancies typically started generating benefits from hunting within 3 years of formation as opposed to after 6 years for tourism. Disaggregation of data revealed that the main benefits from hunting were income for conservancy management and food in the form of meat for the community at large. The majority of tourism benefits were salaried jobs at lodges. A simulated ban on trophy hunting significantly reduced the number of conservancies that could cover their operating costs, whereas eliminating income from tourism did not have as severe an effect. Given that the benefits generated from hunting and tourism typically begin at different times in a conservancy's life-span (earlier vs. later, respectively) and flow to different segments of local communities, these 2 activities together may provide the greatest incentives for conservation on communal lands in Namibia. A singular focus on either hunting or tourism would reduce the value of wildlife as a competitive land-use option and have grave repercussions for the viability of community-based conservation efforts in Namibia, and possibly other parts of Africa.*

Keywords: communal lands, community-based conservation, financial benefits, hunting ban, in-kind benefits, stakeholders

Resumen: *El turismo y la caza generan ingresos públicos sustanciales para las comunidades y los operadores privados en África, pero pocos estudios han examinado cuantitativamente las compensaciones y las sinergias que pueden resultar de estas dos actividades. Evaluamos las oleadas de beneficios financieros y de pago en especie provenientes del turismo y la caza en 77 zonas de conservación comunal en Namibia desde 1998 a 2013, donde la conservación de vida silvestre basada en la comunidad ha sido promovida como un uso de suelo que complementa la agricultura tradicional de subsistencia. Usamos datos colectados anualmente de todas las zonas comunales para caracterizar si los beneficios se derivaron de la caza o el turismo. Clasificamos estos beneficios en tres categorías generales y examinamos cómo los beneficios fluyeron hacia los accionistas dentro de las comunidades bajo el status quo y bajo una prohibición simulada de la caza. En todas las zonas de conservación comunal, los beneficios totales de la caza y el turismo incrementaron aproximadamente a la misma tasa, aunque en estas zonas se comenzaron a generar beneficios de la caza normalmente dentro de los 3 años de formación, en contraste con del turismo que se generaron después de 6 años. La desagregación de los datos reveló que los principales beneficios de la caza fueron los ingresos para*

are not monolithic entities; rather, they are composed of different groups of people who will experience different costs and benefits from wildlife conservation (Agrawal & Gibson 1999; Roe et al. 2009). For example, wealthy cattle owners and poor subsistence farmers will have different perceptions of wildlife conservation given the particular costs and benefits they are likely to experience. Diversifying benefit streams from wildlife conservation so that the variety of stakeholders within local communities are incentivized to promote or at minimum tolerate living with wildlife will provide the greatest likelihood that conservation as a land use will ultimately prove more attractive than wildlife-unfriendly alternatives. Because communal lands comprise a large fraction of rural Africa (up to 500% more than state-managed forest reserves and national parks [Alden Wily 2011]), management of these lands will play a huge role in determining the success or failure of biodiversity conservation efforts across the continent.

We focused on how different types of benefits provided by wildlife vary over time, space, and community stakeholder groups in communal conservancies in Namibia. Namibia's Community-Based Natural Resource Management (CBNRM) program began in the mid-1990s, when progressive legislation for the devolution of conditional rights to natural resources allowed communities to register areas of customary landholding as "communal conservancies." Registering these conservancies (involving developing zoning and sustainable resource management plans and a constitution) allows local communities to manage and benefit from wildlife and other natural resources on their traditional lands. Prior to the legislation, natural resources were the sole property of the state. Although wildlife has been used by people for millennia in the region that is now Namibia, the last century was characterized by declines in various species, starting with the rinderpest outbreak at the end of the 19th century, followed by overhunting of big game species by colonial hunters, and more recently by a major drought combined with a poaching increase in the 1980s (Owen-Smith 2010). Namibia's CBNRM program is widely recognized as having contributed to a strong recovery of wildlife in large parts of the country, through the creation of social and economic incentives for the sustainable coexistence of wildlife and people on communal lands (Owen-Smith 2010; Naidoo et al. 2011*b*; NACSO 2013). Additionally, the principles used to incentivize communities to steward wildlife across very large spatial scales are already being adopted by numerous other countries in Africa and beyond (NACSO 2013). We examined how changes in benefits over time generated on communal conservancies in Namibia vary according to whether they were derived from tourism or hunting (the 2 most significant benefits derived from wildlife). We also assessed how these benefits flow to different stakeholders within local communities and how factors such as time of establishment and changes in resource management policies affect such benefit flows on communal lands.

Methods

We used data from 77 communal conservancies registered by 2012 in Namibia to examine benefit flows associated with hunting and photographic tourism. The first four of these conservancies were established in 1998, and we used data through the 2013 calendar year for all of them. For both hunting and tourism, conservancies negotiate agreements with private operators. The agreements between conservancies and operators specify the portion of income the conservancy receives (typically 8–12% of total lodge revenue and from 30–75% of trophy price, depending on the species) and jobs to be offered to community members with the operation (from 20–50 for tourism lodges, depending on factors such as size and location, and 8–10 for hunting camps). In addition, community members hunt for subsistence and allow local sales of meat from wildlife through game cropping. Information on fees paid to conservancy management committees; salaries of community members employed in the tourism or hunting industry; and nonfinancial benefits (primarily meat from hunting, but also meals, training, human-wildlife conflict compensation, and other donations to the community at large) is compiled annually by every conservancy. Financial reporting of conservancies is supported by various nongovernmental organizations, is ground-truthed, and is double-checked against analogous reports from tourism and hunting operators.

We used these data and categorized each source of benefit as to whether it was derived from tourism or from hunting. The CBNRM program uses the price of buying alternative meat as the value of wild meat distributed from animals that were hunted (replacement-cost shadow price approach). In 2013, it was 18 Namibian dollars/kg of meat (NACSO 2013). This shadow price can vary and is adjusted from year to year to reflect supply and demand, but the same rate is applied across the country in order to maintain comparability of meat benefits generated in different regions. We used a consumer price index produced by the Bank of Namibia to standardize benefit figures from all years into constant 2013 Namibian dollars. We subsequently expressed all figures in 2013 U.S. dollars (U.S.$) based on the average monthly exchange rate in 2013 of U.S.$1 = N$9.64.

We divided benefits into the 3 classes (described above) because each represented a different type of gain that is channeled to different parts of a conservancy and has different implications for the sustainability of the conservancy and for its livelihood value to members. Income (i.e., fees from lodge and hunting concessions) to management committees is used by conservancies to cover operational and management costs

these financial time series by calculating 4 metrics per conservancy: temporal trend (slope from a linear regression of benefits on year); volatility (root mean square error from the linear regression); end point (magnitude of benefits in 2013); and lag time between year conservancy registered and year the first benefits were generated.

We used t tests on these metrics to assess whether temporal flows of benefits to conservancies were significantly different between hunting and tourism.

Results

Of the 77 conservancies established by 2012, 25 reported not generating any benefits from either hunting or tourism. Considering all conservancies in Namibia's CBNRM program, aggregate benefits increased over time (Fig. 1). Total benefits from tourism and hunting were similar in the early years of the program, but tourism benefits exceeded those from hunting from 2003 to 2010, whereas from 2011 to 2013 the benefits from hunting were greater than tourism benefits (Fig. 1a). Although fee payments to conservancies and nonfinancial benefits (primarily meat) from hunting accumulated at higher levels than those from tourism (Figs. 1b and d), total salaries from tourism enterprise jobs increased 10 times faster than salaries from hunting jobs (Fig. 1c). Nonfinancial benefits from tourism dropped sharply from 2011–2013 relative to continued increasing nonfinancial benefits from hunting (Fig. 1d), a result that may have coincided with the worldwide economic downturn in 2008 and fewer available resources for tourism companies to make additional contributions to conservancies.

Conservancies were formed in roughly 4 cohorts that coincided with (1) initial heavy donor investment (1998–2001, 15 conservancies), (2) a period of declining donor investment (2003–2005, 29 conservancies), (3) an upturn in investment peaking in 2009 (2006–2009, 15 conservancies), and (4) a further increased-investment phase (2011–2013, including 18 conservancies registered by the end of 2012). The earliest conservancies, in cohort 1, had similar levels of total benefits for the first 6 years after registration, after which benefits from both hunting and tourism continued to increase but at a faster rate for tourism (Fig. 2a). Conservancies in cohort 2 (Fig. 2b) had roughly similar rates of growth in total benefits from tourism and hunting, whereas cohorts 3 (Fig. 2c) and 4 (Fig. 2d) earned virtually no benefits from tourism and had either moderate (cohort 3) or low (cohort 4) benefits from hunting.

Disaggregating the national-level data revealed that pathways for generating benefits over time varied substantially among conservancies (Supporting Information). Of the 52 conservancies that derived some level of benefits from wildlife, 28 derived all or almost all of their total benefits from hunting, 6 derived all or almost all benefits from tourism, and 18 had substantial levels of benefits from both hunting and tourism.

Although there was a tendency for the total benefits from tourism to be higher than those from hunting, there were no significant differences for any of the conservancy time series metrics (Table 1). The only exception to this was the lag time between conservation formation and the beginning of benefits generation. After their formation, conservancies derived benefits from hunting approximately twice as quickly as they derived benefits from tourism (Table 1). On average, conservancies started generating benefits from hunting about 3 years after their formation, whereas it took 6 years, on average, after conservancy formation to start generating benefits from tourism.

In addition to temporal and spatial differentiation, there were differences in how benefits from tourism and trophy hunting flowed to the different constituencies contained within communal conservancies (Fig. 3). Based on detailed financial accounting data from 2011–2013, 58.3% of the financial benefits from tourism were in the form of jobs to conservancy members at joint-venture lodges, whereas 30.3% of the benefits were lodge contractual fees used for conservancy management and 11.5% were nonfinancial benefits to the community at large less.

In contrast, the majority (64.3%) of the benefits from hunting were in the form of cash for the operation of the conservancy, and a substantial fraction went to the community at large in the form of meat from hunted animals (32.0%, or approximately 1.4 million kg over the 3 years). Conservancies used income from trophy hunting and tourism in a variety of ways that benefited the entire community (Fig. 3), most importantly for the salaries of conservancy employees and for other conservancy operating costs, but also for compensation for wildlife conflict, payments to traditional authority structures, direct cash dividends, community-level projects, and infrastructure development. Our data suggest that operational costs, conservancy employee salaries, and the various benefits to the community at large were mostly derived from hunting because hunting operators paid fees from 2011–2013 of $5.41 million (72% of the total), whereas tourism operators paid $2.13 million (28%).

Currently, many conservancies cover their operating costs with income derived from trophy hunting and from tourism that is directed to conservancy management. Simulation of a trophy hunting ban showed a reduction in the number of conservancies with incomes greater than operating costs in 2013, from 74% (37 of 50) under the status quo to 16% (8 of 50) when conservancy income from hunting was eliminated. If this reduction were to occur throughout the country, it would cover nearly 50,000 km^2 (Fig. 4). When conservancy income from tourism was removed, the effect was again negative but

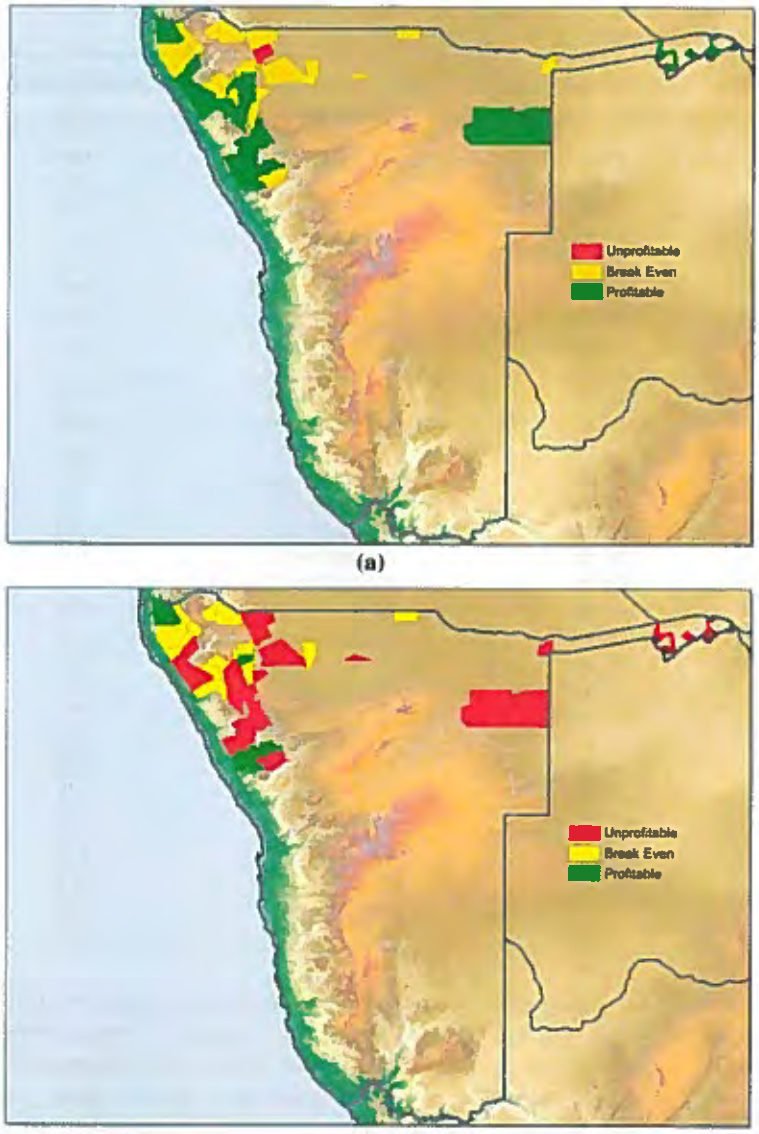

Figure 4. Revenues minus operating costs for 50 communal conservancies for which detailed management cost data were available in 2013 under (a) the status quo and (b) a simulated trophy hunting ban. Break-even conservancies indicate those for which revenues and operating costs are within $5000 of one another.

less marked; 59% of conservancies remained able to cover their operating costs.

Finally, of the 303 animals harvested by trophy hunters in 2013, individuals from 2 of the Big-5 (buffalo [*Syncerus caffer*], elephant [*Loxodonta africana*], lion [*Panthera leo*], leopard [*Panthera pardus*], rhinoceros [*Diceros bicornis* and *Ceratotherium simum*) species hunted in Africa, buffalo and elephant, accounted for 78.3% of hunting revenue; over 55% was attributable just to elephants (Table 2).

Discussion

Despite the importance of both tourism and hunting to conservation, and the debate surrounding their implementation, we are the first study to use detailed quantitative data across multiple jurisdictions and over a lengthy time span to directly compare the financial performance of these two activities. Our data from 77 Namibian conservancies from 1998 to 2013 showed that trophy hunting and tourism reached similar aggregate levels but began to generate benefits at different times (earlier vs. later in a conservancy's life-span) and flowed to different beneficiaries (community management committees and the community at large vs. individual employees). Previous work in Namibia has demonstrated that benefits from hunting and tourism are also spatially differentiated; conservancies are more likely to generate benefits from hunting in areas with diverse wildlife and Big-5 species, whereas the presence of black rhinoceros (*Diceros bicornis*) and broader environmental conditions (distance to tourist routes, topographical diversity, and rainfall) are correlated with higher benefits from tourism (Naidoo et al. 2011*b*). In addition, the first conservancies established were typically those with the highest potential to

where nature-based tourism is not viable (e.g., Blom 2004).

Benefits from trophy hunting and tourism also accrue to different stakeholders within communal conservancies. Benefits from tourism were mainly in the form of employment income to conservancy members who are hired to work at lodges built on conservancy land. Although these employees normally come from among a group of conservancy members nominated by the conservancy, ultimately staff are hired based on their knowledge, communication skills, and potential. Jobs of any kind are extremely rare in remote rural areas and thus highly sought after; therefore, tourism is viewed very favorably by local residents who are employed in the industry (Suich 2010; Silva & Motzer 2015). In contrast, agreements between communities and hunting operators provide significantly higher levels of income for conservancy management, as well as greater nonfinancial benefits (largely from meat) distributed directly to the community at large.

The income to management committees is essential; without it, most communal conservancies in Namibia would be unable to cover their operating costs (which three-quarters of the 50 conservancies we assessed were doing). Conservancies unable to cover their operating costs will likely cease to pursue conservation as a viable land use because without conservancy income, game guards cannot be paid, management and monitoring plans cannot be developed and instituted, the sense of local ownership over natural resources dissipates, and wildlife becomes much more vulnerable to declines from poaching and overharvest. This link between income from hunting and the conditions and incentives that permit wildlife to persist as an economically viable land use is critical but often unrecognized. Our data also show that almost 80% of hunting benefits are delivered by two species (elephant and buffalo); elephants alone generate over 50% of all hunting benefits from an increasing population base (7500 individuals in 1995 to over 20,000 in 2012 [Craig 1999; Ministry of Environment and Tourism 2012]). Therefore, even a targeted hunting ban on elephants or an import ban such as those that currently prevent the import of elephant trophies from Tanzania and Zimbabwe into the United States is likely to have a very negative impact on Namibia's CBNRM program by severely undermining conservancy governance structures and incentives for conservation. Anecdotal accounts of the impact of Botswana's 2014 hunting ban suggests that similar negative consequences (an increase in poaching for meat and trade and increased collaboration of local communities with international poaching gangs) may be occurring there (Somerville 2015).

Although we found there were impressive financial gains from trophy hunting, the sustainability (both ecological and economic) of these operations on communal lands in Namibia is rightly of major concern. As such, it is regulated via annual estimates of species' populations and harvest quotas derived in agreement with local communities and the Ministry of Environment and Tourism (NACSO 2013). Although data from the various conservancy landscapes within the country indicate populations in these areas have generally increased since the advent of Namibia's CBNRM program (Naidoo et al. 2011*b*), evidence on possible negative impacts of trophy hunting on wildlife populations in other parts of Africa (Packer et al. 2010; Lindsey et al. 2013*a*) means that trophy hunting must be carefully monitored in Namibia to ensure the same does not happen. There have been no assessments on how trophy size or quality in particular species may be changing over time, a concern that has been raised for trophy hunting in Africa (Crosmary et al. 2013) and that may result in undesirable genetic changes within hunted populations (Coltman et al. 2003). It is therefore critical that data on the size and quality of trophy exports be analyzed for Namibia's CBNRM program to inform monitoring, evaluation, and management of the trophy-hunting industry. High-profile, apparently illegal hunts such as of lions on the borders of national parks in Zimbabwe, and ethically dubious practices, such as canned hunting of captive animals, also illustrate that the industry itself must play a greater role in addressing issues that throw the sector into disrepute. Finally, growing human populations and a tremendous increase in elephant poaching for the international ivory market may eventually result in reduced quotas of elephants and therefore threaten the financial benefits communal conservancies have generated through trophy hunting.

The sustainability of photographic nature-based tourism in Africa and beyond has also come under scrutiny (Buckley 2004; Newsome et al. 2012). In Namibia relevant issues for ecological sustainability include impacts of intense wildlife viewing on animal behavior, localized environmental implications of the development of tourism infrastructure (lodges, campsites, roads, disposal facilities, etc.) in sensitive arid environments, and climate-change impacts from the carbon emissions of increasing numbers of international visitors. As with trophy hunting, there are few studies, particularly for the first two considerations, that have evaluated the sustainability of tourism initiatives on communal conservancies in Namibia. Furthermore, from a socioeconomic point of view nature-based tourism on communal lands in Namibia has been criticized as having power imbalances or elite capture issues that render communities unable to secure significant shares of the benefits (Hoole 2010; Lapeyre 2011), even though residents of conservancies with high benefit levels are themselves strongly supportive of tourism (Silva & Motzer 2015). Finally, to assess more fully the overall costs and benefits of wildlife conservation on communal lands in Namibia, there is a need for greater investigation of both human-wildlife conflict costs and who bears them, as well as the opportunity

GENERAL STATISTICS

Country Area	825,418 km²
Range Area	164,069 km² (20%)
Protected Range	18 %
Information Quality Index (IQI)	0.43
CITES Appendix	II
Listing Year	1997

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Etosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD $1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 ± 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km^2, which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 ± 3,580, 9,165 ± 2,016, 14,097 ± 2,678 and 13,116 ± 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 ± 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N≠a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 ± 1,940, 3,638 ± 1,164, and 6,413 ± 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 ± 2,289 for Khaudum, 61 ± 115 for N#a Jaqna (Kolberg, 2004) and 967 ± 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuangali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of 3,378 ± 1,756 and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of 2,911 ± 637 (Kilian, 2015) and replaces an estimate of 2,057 ± 598 from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There has been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Houanib and Houarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

*PFS

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

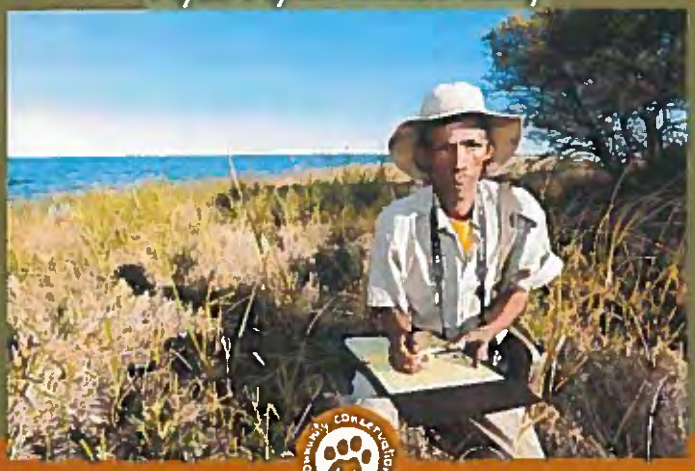
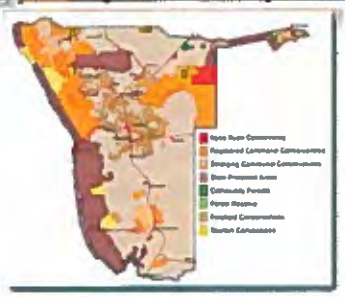
Living with wildlife

the story of Nyae Nyae Conservancy



Nyae Nyae – Ju|hoansi for 'the place without mountains, but rocky'



A CONSERVANCY IS...

- a legally registered area with clearly defined borders and a constituted management body run by the community for the development of residents and the sustainable use of wildlife and tourism
- managed by a group elected to serve the interests of all its members
- a place where residents can add income from wildlife and tourism to traditional farming activities
- a place where wildlife populations increase as they are managed for productive gain
- a place where the value of the natural resources increases, enhancing the value of the land
- a forum through which services and developments can be channelled and integrated
- zoned for multiple uses to minimise conflict and maximise the interests of all stakeholders

Conservancies
enable development and conservation over large areas...

MILESTONES AND SUCCESSES

1991 – an NGO that over time evolves into the Nyae Nyae Development Foundation of Namibia is formed to support the community
1994 – the Nyae Nyae community begins the process to register as a conservancy
1996 – policy changes allow communal area residents to benefit from wildlife and tourism by forming conservancies
1998 – Nyae Nyae Conservancy is registered in February, becoming the first communal conservancy in Namibia
1999 – the Nyae Nyae Conservancy office is established at Bateleka
99-04 – each year, wildlife is re-introduced into the conservancy, including springbuck, red hartebeest, gemsbok, eland, kudu and blue wildebeest, with a total of 2,300 animals being introduced
2001 – an annual game count is started in Nyae Nyae
2002 – the Event Book monitoring system is implemented in Nyae Nyae
2003 – the conservancy office is moved to Tsumkwe
04/05 – a large game-proof camp is erected to manage the remaining Nyae Nyae buffalo population and avoid contact with livestock
2006 – the Nyae Nyae Trust is formed
2008 – black rhino are re-introduced into the conservancy
2009 – an application is lodged with the Ministry of Environment & Tourism to extend the borders of the conservancy to include the village of N'homa
2011 – an application is lodged with the Ministry of Agriculture to register Nyae Nyae Community Forest, having the same borders and management structures as the conservancy

QUICK FACTS

Region: Otjozondjupa
Approximate population: 2,300
Date of registration: February 1998
Size: 8,992 square kilometres
Main language: Ju'hoansi

interacting cultures and dynamic communities committed to sustainability – people living as Nyae Nyae share a common vision for managing their area and its resources

vast, diverse and spectacular landscapes – Nyae Nyae Pans, bushland, magical baobabs... a healthy environment diversifies economic opportunities and drives economic growth

charismatic, free-roaming wildlife – elephant, lion, leopard, wild dog, diverse plains game, abundant birdlife... wildlife generates a variety of benefits for local people

people are living with wildlife, are managing natural resources wisely and are reaping the benefits...

A LITTLE HISTORY

Prior to Namibia's independence in 1990, communal area residents had few rights to use wildlife. Wild animals were often seen as little more than a threat to crops, livestock and infrastructure, as well as community safety. Ground-breaking legislation passed in the mid-nineties laid the foundation for a new approach to the sustainable use of natural resources. By forming a conservancy, people in communal areas can now actively manage – and generate benefits from – wildlife and other resources in their area, encouraging wildlife recoveries and environmental restoration. While a conservancy is a natural resource management structure, it is defined by social ties. Conservancies unite groups of people with the common goal of managing their resources. Today, over 60 communal conservancies embrace one in four rural Namibians, underlining a national commitment to both rural development and conservation.

Nyae Nyae is the oldest, as well as the second largest conservancy in the country, covering close to 9,000 square kilometres. Most of the 2,300 residents are from the Ju'hoansi ethnic group, a sub-group of the San. Historically, the Nyae Nyae area occupied by the Ju'hoansi stretched into Botswana in the east, north beyond what is today Khaudum National Park, south to the settlements of Eiseb and Gam and west beyond the settlement of Aasvoëlnes. Today, Botswana creates the eastern border of the conservancy, while to the south, west and north, Otuzu and Nhe-Jaqna Conservancies and Khaudum National Park adjoin Nyae Nyae, and in turn border onto other conservancies to form a huge contiguous conservation landscape.

The long process to mobilise, unite and support the Nyae Nyae community in forming a conservancy in a sense already began prior to Namibia's independence. In 1981, what is today the Nyae Nyae Development Foundation was formed to support the community in development and resource management. By the time the conservancy legislation was passed in 1996, the Nyae Nyae community was well placed to register the conservancy, which was gazetted in early 1998.

***San or Bushman?** Both terms have a slightly derogatory origin. Bushman originates from the Dutch word boschman – an outcast who lives in the bush. San comes from the Nama 'saa' referring to poor people without cattle. While the Regional San Conference of 1993 adopted San as the official term, Bushman has also lost much of its negative connotation and today is taken to refer more to the great environmental knowledge and bush skills of the San.*

Conservancies are living landscapes...

The culture of the San is legendary, as often idealised view of a balanced existence within the natural environment. The San have superb hunting skills and 'bush knowledge' That been perception and understanding of the environment has allowed them to live in inhospitable ecosystems such as the Kalahari for countless generations. Nyae Nyae is rich in archaeological artefacts and recent finds indicate a presence of people from the Middle Stone Age. It seems likely that the ancestors of the Ju/'hoansi have roamed across the area for thousands of years and their traditional knowledge and skills have great value

stalking through African wilderness with a band of hunters, meandering through the veld gathering food, huddled around the evening fire watching traditional dances... the San culture has the power to inspire in us a search for a more harmonised existence

Today, most people in Nyae Nyae no longer live an active hunter-gatherer lifestyle and find themselves very much in a state of cultural transition and social change. Yet wonderful living museums make the past accessible again – for both visitors and a new generation of San no longer in touch with their heritage. 'Keeping our culture alive for our children is one of the most important aspects of the living museum' says Kantee Daqm, a museum guide.

The vast, mostly unfenced Nyae Nyae environment retains a strong wilderness atmosphere, which is enhanced by the fascination of the San culture. Located on the western rim of the Kalahari Basin – the largest accumulation of sand in the world – much of Nyae Nyae is covered by wind blown sands. Areas of rocky ground retain seasonal surface water in the so called 'pannetjieveld' (area of many pans). Here the Nyae Nyae Pans become a very important wetland after good rains. Nyae Nyae is generally flat, varying between 1,100 and 1,200 metres above sea level. The Aha Hills in the far south east of the conservancy create the only real topographical variation.

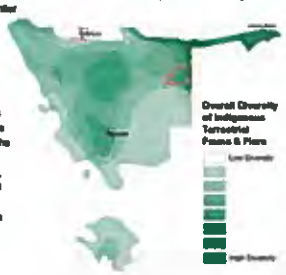
Huge baobabs punctuate the savanna woodland and create a sense of ancient Africa. Rainfall in Nyae Nyae is low and unpredictable, with an annual average of around 450 millimetres. The harshness of the environment is increased by high temperatures and extremely high evaporation. However, the water table is close to the surface, generally lying between two and 25 metres. All these environmental factors contribute to interesting habitat variations and the highest biodiversity found in the communal areas of the Otjozondjupa Region.

a seemingly endless world of bushland and pannetjieveld, dotted here and there with the magical shapes of baobabs and brought to life by the mere expectation of seeing game, by the calls of lion and hyaena at night – and by the light tread of the first people

Since the establishment of conservancies, wildlife numbers in communal areas have rebounded from historic lows prior to independence. Nyae Nyae is one of the last refuges of the African wild dog in Namibia and the only place in the country where all of the Big Five occur – elephant, black rhino, lion, buffalo and leopard. Other mammals include giraffe, eland, kudu, blue wildebeest, roan, gemsbok, hartebeest, springbok, duiker, steenbok, warthog, spotted and brown hyaena, cheetah and jackal. More than 200 bird species have been recorded in the conservancy. Birding around the seasonal Nyae Nyae Pans is spectacular after good rains, when more than 10,000 waterbirds of over 60 species gather here, including great painted snipes, flamingos, wattled cranes and breeding stork egrets. The area has been designated an Important Bird Area by Birdlife International and is eligible for Ramsar Site status.

Nyae Nyae is also rich in flora, and over 100 species of edible plants are utilized by the San. Huge baobabs are the most distinctive feature of many landscapes, but many other plants are of interest and importance, including manketti, teakwood, terminalia, false mopane and a variety of acacia trees, as well as devil's claw and Kalahari melon.

Around Nyae Nyae... The nearby Khaudum National Park is known especially for its numbers of elephant and roan, as well as for its wilderness feel. Both Nyae Nyae and Khaudum form part of the Kavango Zambezi Transfrontier Conservation Area (KAZA). The initiative links five countries and is one of the largest contiguous conservation areas in the world, with the aim of facilitating wildlife movement, conserving natural resources and improving the lives of rural people.



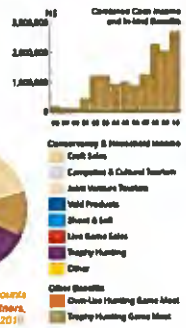
Conservancies empower rural people...

With a national **population** of around 30,000 the San constitute less than two percent of the total Namibian population and have the lowest per capita income of all language groups in the country. Many communities rely on a variety of support and are challenged by social disintegration, alcohol abuse and poverty. Only around 15 percent of San in Namibia have resource utilisation rights to land. The literacy rate is low at around 30%, with school attendance at only half the national average. The few opportunities for formal employment are thus further inhibited by limited levels of formal education. The San have negligible representation in government and the Ju/'hoansi are one of only two out of the six San traditional authorities who have received official recognition. All this is the result of many years of marginalisation.

A variety of **development** initiatives by both government and non-government organisations over the last 30 years have attempted to move the San into modern society. Schools and health facilities have been developed, permanent water points have been established and livestock herding and gardening have been promoted. These activities have had a large influence on San culture. The Nyae Nyae Conservancy has returned natural resource use rights to the Ju/'hoansi community. San traditionally live in small groups in a democratic society that has never been structured into typical tribal leadership systems. Each group has a home ground or area with exclusive resource use rights. Around 40 settlements are spread throughout the conservancy.

Tsumkwe, originally a stock water source, was established as the administrative centre of the area in 1958. An area of 30 square kilometres around Tsumkwe is excluded from the conservancy. The small town is the only place to buy goods and provides access to a combined school, a clinic and other government **facilities and services**. The nearest hospitals to outside the conservancy at Mangetti Dune and Grootfontein. There are five primary schools in Nyae Nyae and Ju/'hoan speakers participating in the Village School Programme have access to schooling in their mother tongue.

Nyae Nyae facilitates access to diverse training and capacity building, empowers individuals, especially women, to actively take part in decision-making, as well as instilling a renewed sense of pride in cultural heritage



Benefits to the conservancy and its members come from a variety of sources. Sources and amounts vary from year to year, depending on factors such as agreements with private sector partners, and market fluctuations. The pie chart shows the main benefit sources in 2010.

Harvesting of devil's claw for the health industry is practiced widely, providing income to around 300 to 400 harvesters. Craft production has become an important source of income for both men and women, with over 300 craft producers in the conservancy. While the men concentrate on producing traditional implements such as bows and arrows, women create exquisite ostrich egg shell jewellery and other beautiful items. The Gihumbu Crafts shop, located next to the conservancy office, is a superb local outlet for these crafts.

The C44 gravel road provides **access for visitors** to the area, connecting Tsumkwe with the B8 tar road between Grootfontein and Rundu in the west, as well as the Oshi border post leading to Botswana in the east. Four wheel drive is needed beyond the gravel road, both within Nyae Nyae and to access Khaudum, or when proceeding into Botswana.

the conservancy is enabling a range of new livelihood options for its residents, including tourism, craft production, hunting and indigenous plant harvesting, all of which enable the Ju/'hoansi to utilise their traditional knowledge and skills

The people of Nyae Nyae today survive on a complex mix of **livelihood activities**. Veld food and seasonal hunting still supplement other food sources, while livestock herding and small scale gardening are becoming increasingly important. The conservancy itself, as well as related natural resource use activities, provide employment and other benefits. The conservancy has paid for the development of numerous boreholes and distributes individual benefits each year, including annual cash payments, meat from trophy and own-use hunting, the supply of blankets, solar radios and other goods.

The conservancy spends money and provides community and individual benefits in various areas. Areas and amounts vary from year to year depending on factors such as conservancy income and priorities. Private sector jobs are created through agreements with private sector partners. The pie chart shows the main expenditure and benefit areas in 2010.

The Tsumkwe Country Lodge, located in the town, is currently the only fixed **tourism** accommodation. While it does not have a formal relationship with the conservancy, lodge activities include village visits to the living museums at Mountain Pos and Doo Pos, with income going directly to the villages. Another excellent cultural experience, the Living Hunter's Museum, is located at //Xa:/aba village along the track to Khaudum and includes a campsite. Wilderness campsites are also located at Mahuri, Djoima and Kramertanlap and, although undeveloped, provide nearby villages with some income.

Trophy hunting is currently the biggest source of income for the conservancy and also provides important employment. The area has yielded superb trophies and is considered one of the foremost big game hunting concessions in Namibia.

Nyae Nyae has received a lot of attention from local and international film teams and photographers, and the conservancy has received income from filming and photographic fees, although guidelines for these activities need to be improved and enforced.

Conservancies facilitate sustainability...

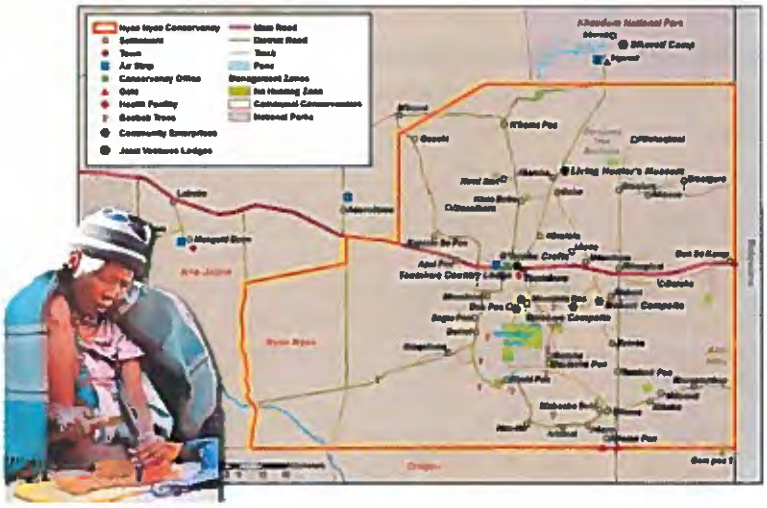
Nyae Nyae is divided into four areas for management purposes. The **management structure** includes the conservancy board, made up of representatives of each area, as well as the paid positions of chairperson and conservancy manager. The board focuses on appointing the management committee and manager, as well as on strategic planning. The management committee consists of a minimum of five members, including the conservancy manager. It appoints staff, supervises performance and makes short term decisions. Employees include 14 rangers, a CBNRM field officer, three water team staff, a craft trainer, a craft shop coordinator (funded through shop income), a devil's claw coordinator, an agriculture coordinator, an office administrator and a cleaner. Annual general meetings are attended by village representatives, the board and the management committee and are used to decide on benefit distribution, elect board members and the chairperson, approve annual budgets and work plans, as well as deliberate on strategies or programme amendments. The conservancy office is located in Tsumkwe and integrates Ghanzi Crafts. The office is owned by the conservancy, which also owns two four-wheel drives. Conservancy funds are spent on running costs, community development and individual benefit distribution. The funds are managed by a trust administered by the Nyae Nyae Development Foundation.

the Nyae Nyae Conservancy provides vital structures for managing the communal natural resources of the area in a way that enhances development and ensures sustainability

Activities... The conservancy is based on the traditional Ju'/hoansi /aixa land management system, which was recognised by government in 1991. Members have the right to hunt approved game within their /aixa on foot with bow and arrows, spears or bird traps. Hunting is reported to the /aixa owner and records are submitted to conservancy rangers and the Ministry of Environment & Tourism (MET). The conservancy has been zoned for a variety of land uses, including hunting and tourism. Wildlife reintroductions have significantly boosted game numbers and increased the value of the area for tourism and trophy hunting. An annual game count, done as a simultaneous "full moon count" at waterholes in the conservancy, is carried out in collaboration with the MET and the support of NGOs. Conservancy rangers also do active natural resource monitoring through the Event Book monitoring system, recording data such as game sightings, human wildlife conflict, poaching incidents, game utilisation and any other data deemed important by the conservancy. All data is aggregated into monthly and annual reporting charts that facilitate adaptive management. Based on the game count and Event Book information, the MET sets annual quotas for using wildlife.

The conservancy is active in mitigating human wildlife conflict. With support from the Nyae Nyae Development Foundation and other NGOs, the conservancy has developed "elephant proof" water reservoirs for villages, which has reduced conflicts with elephants to isolated problems at gardens. A system of providing financial offsets for losses is being implemented through the National Policy on Human Wildlife Conflict Management. It will be applied by the conservancy with MET assistance.

A grazing management project seeks to ensure sustainable use of rangeland and mitigate the effects of overgrazing. The conservancy has also attempted to address repeated illegal livestock incursions from neighbouring communal areas. The devil's claw coordinator helps with sustainable harvesting methods and the required permit system, as well as collecting harvests for sale. Further support for the sector is provided by the Centre for Research Information Action in Africa (CRIAA-SADC) and the Millennium Challenge Account - Namibia (MCA). In order to better manage all plant resources of the area, a community forest is in the process of formation, which will be directly integrated with the conservancy.



the conservancy uses a mix of modern technologies and traditional knowledge and skills to enable healthy wildlife populations, a productive environment, and the effective management of natural resources

Conservancies
are full of opportunities...

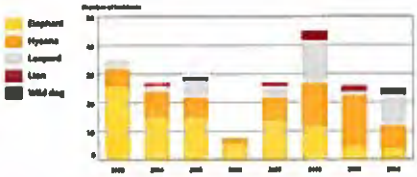
The wonderful mixture of environmental and cultural resources provides largely untapped potential in Nyae Nyae.

Challenges... The San culture is in a state of transition and is susceptible to external pressures, requiring sensitive and well-coordinated developments. Numerous government and NGO support agencies, with a mix of emphasis on social, religious, agricultural and environmental aspects, are active in Nyae Nyae. A more integrated approach to the various activities can facilitate a broader range of benefits for residents.

Nyae Nyae harbours great potential to overcome the social and environmental challenges that the area seems to face — and the conservancy is the ideal structure to coordinate many of the developments

Human wildlife conflict is a challenge where ever people coexist with wild animals, especially if these include elephants and large predators. The creation of artificial water points has increased the resident elephant population in Nyae Nyae, which poses a threat to the area's woodlands, especially in the vicinity of water. Nonetheless, human elephant conflicts have been significantly reduced through village water point protection measures and water points for game. With increases in livestock, predator problems are also increasing. At least some of these can be mitigated by herding livestock and keeping it in secure enclosures at night. Importantly, predators and elephants are of great value, both to the ecosystem and to tourism, and in the long run the benefits gained from these species should outweigh the costs of living with them. Human wildlife conflicts can be further mitigated through actively enforced zoning that sets aside different areas for wildlife and agricultural uses.

There are many unrealised tourism **opportunities** within Nyae Nyae, as well as the greater region. The mixture of the iconic San culture and authentic wilderness experience provides various development options. Interpretation through qualified guiding and excellent information materials can make the complexity of modern San existence and the diversity of the environment accessible to visitors.



Human wildlife conflicts are monitored using the Event Book, indicating trends and improvements, such as reduced elephant conflicts achieved through water point protection measures.

Strategic development, sensitive to social and cultural dynamics as well as the environment, can facilitate a bright future for the oldest and second largest conservancy in Namibia

A variety of **plans** for tourism development in Nyae Nyae exist. These need to be well coordinated and should receive continued input from tourism experts. While the planned developments are likely to fill most current gaps in accommodation needs, it is the interpretation of the products and the enhancement of the areas resources that can unlock the full potential. Tourism products could include well laid-out four-by-four routes with wilderness camping, serviced campsites near roads but away from larger settlements, luxury lodges and tented camps, high quality local guiding, birding and other special interest tours. Improvements to the current infrastructure in Khaudum, including the state of artificial waterholes, can facilitate the establishment of the Khaudum tourism route while maintaining the area's wilderness appeal. The development of tourism routes through Nyae Nyae and Khaudum into the Caprivi or Botswana can help the area become one of Namibia's primary wilderness tourism destinations.

Hunting forms an integral part of the San culture. Trophy hunting can play a vital role, providing significant income to the conservancy through concession fees, as well as creating employment that utilises traditional San hunting skills. The superb hunting potential of the vast area in conjunction with the San culture creates a unique and very valuable product. Zoning is especially important to maximise the potential of tourism and hunting products and strengthen core wildlife areas and tourism sites.

Developments should work through the conservancy or coordinate with it, as well as working with the Nyae Nyae Development Foundation. Strategic, well coordinated initiatives can unlock the full value of the area's wildlife and natural plant products, the traditional knowledge and skills of the San, and of course both cultural and wilderness tourism, as well as trophy hunting and other forms of sustainable use. Numerous options exist that can enable a bright future for the conservancy.

Come to Nyae Nyae - be part of the future...

Dear Mr. Saulsbury,

The following is in response to your phone call earlier today and your e-mail message below.

In response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service is revising its procedure for assessing applications to import certain hunted species like African elephants. We are withdrawing our countrywide enhancement findings for a range of species across several countries. In their place, the Service intends to make findings for trophy imports on an application- by-application basis. The President has been very clear in the direction that his administration will go.

Please be aware that we continue to seek additional information directly from the relevant foreign Government Authorities to support our permit findings, therefore, all applications are under review.

Sincerely,

Anna Barry

Falls Church, VA 22041-3803
1-800-358-2104, ext. 1976 or 703-358-1976
Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT You may have noticed that our application forms expired 5/31/2017 . The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted. We do not accept applications via fax or e-mail.

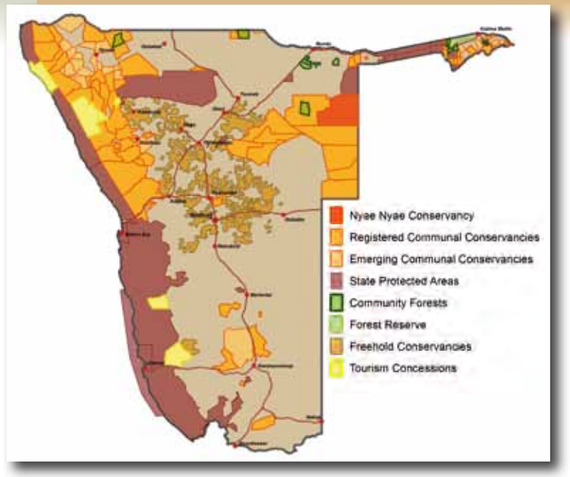
Living with wildlife –

the story of Nyae Nyae Conservancy

Nyae Nyae – Ju/'hoansi for 'the place without mountains, but rocky'

Living with wildlife – the story of NYAE NYAE CONSERVANCY



A CONSERVANCY IS...

- a legally registered area with clearly defined borders and a constituted management body run by the community for the development of residents and the sustainable use of wildlife and tourism
- managed by a group elected to serve the interests of all its members
- a place where residents can add income from wildlife and tourism to traditional farming activities
- a place where wildlife populations increase as they are managed for productive gain
- a place where the value of the natural resources increases, enhancing the value of the land
- a forum through which services and developments can be channelled and integrated
- zoned for multiple uses to minimise conflict and maximise the interests of all stakeholders

Conservancies
enable development and conservation over large areas...

MILESTONES AND SUCCESSES

1981 – an NGO that over time evolves into the Nyae Nyae Development Foundation of Namibia is formed to support the community
1994 – the Nyae Nyae community begins the process to register as a conservancy
1996 – policy changes allow communal area residents to benefit from wildlife and tourism by forming conservancies
1998 – Nyae Nyae Conservancy is registered in February, becoming the first communal conservancy in Namibia
1998 – the Nyae Nyae Conservancy office is established at Barakka
99-05 – each year, wildlife is re-introduced into the conservancy, including springbok, red hartebeest, gemsbok, eland, kudu and blue wildebeest, with a total of 2,200 animals being introduced
2001 – an annual game count is started in Nyae Nyae
2002 – the Event Book monitoring system is implemented in Nyae Nyae
2003 – the conservancy office is moved to Tsumkwe
04/05 – a large game-proof camp is erected to manage the remaining Nyae Nyae buffalo population and avoid contact with livestock
2005 – the Nyae Nyae Trust is formed
2008 – black rhino are re-introduced into the conservancy
2008 – an application is lodged with the Ministry of Environment & Tourism to extend the borders of the conservancy to include the village of N'homa
2011 – an application is lodged with the Ministry of Agriculture to register Nyae Nyae Community Forest, having the same borders and management structures as the conservancy

QUICK FACTS

Region: Otjozondjupa
Approximate population: 2,300
Date of registration: February 1998
Size: 8,992 square kilometres
Main language: Ju/'hoansi

NYAE NYAE offers an enchanting mix of

interesting cultures and dynamic communities committed to sustainability – people living in Nyae Nyae share a common vision for managing their area and its resources

vast, diverse and spectacular landscapes – Nyae Nyae Pans, bushland, magical baobabs... a healthy environment diversifies economic opportunities and drives economic growth

charismatic, free-roaming wildlife – elephant, lion, leopard, wild dog, diverse plains game, abundant birdlife... wildlife generates a variety of benefits for local people

people are living with wildlife, are managing natural resources wisely and are reaping the benefits...

A LITTLE HISTORY

Prior to Namibia's independence in 1990, communal area residents had few rights to use wildlife. Wild animals were often seen as little more than a threat to crops, livestock and infrastructure, as well as community safety. Ground-breaking legislation passed in the mid-nineties laid the foundation for a new approach to the sustainable use of natural resources. By forming a conservancy, people in communal areas can now actively manage – and generate benefits from – wildlife and other resources in their area, encouraging wildlife recoveries and environmental restoration. While a conservancy is a natural resource management structure, it is defined by social ties. Conservancies unite groups of people with the common goal of managing their resources. Today, over 60 communal conservancies embrace one in four rural Namibians, underlining a national commitment to both rural development and conservation.

Nyae Nyae is the oldest, as well as the second largest conservancy in the country, covering close to 9,000 square kilometres. Most of the 2,300 residents are from the Ju/'hoansi ethnic group, a sub-group of the San. Historically, the Nyae Nyae area occupied by the Ju/'hoansi stretched into Botswana in the east, north beyond what is today Khaudum National Park, south to the settlements of Eiseb and Gam and west beyond the settlement of Aasvoëlnes. Today, Botswana creates the eastern border of the conservancy, while to the south, west and north, Ondjou and N≠a-Jaqna Conservancies and Khaudum National Park adjoin Nyae Nyae, and in turn border onto other conservancies to form a huge contiguous conservation landscape.

The long process to mobilise, unite and support the Nyae Nyae community in forming a conservancy in a sense already began prior to Namibia's independence. In 1981, what is today the Nyae Nyae Development Foundation was formed to support the community in development and resource management. By the time the conservancy legislation was passed in 1996, the Nyae Nyae community was well placed to register the conservancy, which was gazetted in early 1998.

San or Bushman? *Both terms have a slightly derogatory origin. Bushman originates from the Dutch word bosjeman - an outcast who lives in the bush. San comes from the Nama 'saa', referring to poor people without cattle. While the Regional San Conference of 1993 adopted San as the official term, Bushman has also lost much of its negative connotation and today is taken to refer more to the great environmental knowledge and bush skills of the San.*

RESOURCES AND ATTRACTIONS

Conservancies
are living landscapes...

The culture of the San is legendary, an often idealised icon of a balanced existence within the natural environment. The San have superb hunting skills and 'bush knowledge'. Their keen perception and understanding of the environment has allowed them to live in inhospitable ecosystems such as the Kalahari for countless generations. Nyae Nyae is rich in archeological artefacts and recent finds indicate a presence of people from the Middle Stone Age. It seems likely that the ancestors of the Ju/'hoansi have roamed across the area for thousands of years and their traditional knowledge and skills have great value.

stalking through African wilderness with a band of hunters, meandering through the veld gathering food, huddled around the evening fire watching traditional dances… the San culture has the power to inspire in us a search for a more harmonised existence

Today, most people in Nyae Nyae no longer live an active hunter-gatherer lifestyle and find themselves very much in a state of cultural transition and social change. Yet wonderful living museums make the past accessible again – for both visitors and a new generation of San no longer in touch with their heritage. 'Keeping our culture alive for our children is one of the most important aspects of the living museum' says Komtsa Daqm, a museum guide.

The vast, mostly unfenced Nyae Nyae environment retains a strong wilderness atmosphere, which is enhanced by the fascination of the San culture. Located on the western rim of the Kalahari Basin – the largest accumulation of sand in the world – much of Nyae Nyae is covered by wind blown sands. Areas of rocky ground retain seasonal surface water in the so called 'pannetjiesveld' (area of many pans). Here the Nyae Nyae Pans become a very important wetland after good rains. Nyae Nyae is generally flat, varying between 1,100 and 1,200 metres above sea level. The Aha Hills in the far south east of the conservancy create the only real topographical variation.

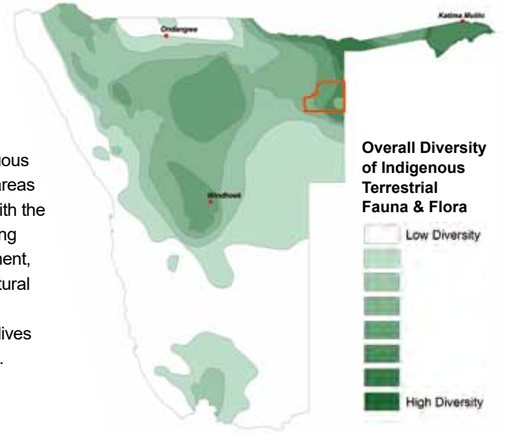
Huge baobabs punctuate the savanna woodland and create a sense of ancient Africa. Rainfall in Nyae Nyae is low and unpredictable, with an annual average of around 450 millimetres. The harshness of the environment is increased by high temperatures and extremely high evaporation. However, the water table is close to the surface, generally lying between two and 25 metres. All these environmental factors contribute to interesting habitat variations and the highest biodiversity found in the communal areas of the Otjozondjupa Region.

a seemingly endless world of bushland and pannetjiesveld, dotted here and there with the magical shapes of baobabs and brought to life by the mere expectation of seeing game, by the calls of lion and hyaena at night — and by the light tread of the first people

Since the establishment of conservancies, wildlife numbers in communal areas have rebounded from historic lows prior to independence. Nyae Nyae is one of the last refuges of the African wild dog in Namibia and the only place in the country where all of the Big Five occur – elephant, black rhino, lion, buffalo and leopard. Other mammals include giraffe, eland, kudu, blue wildebeest, roan, gemsbok, hartebeest, springbok, duiker, steenbok, warthog, spotted and brown hyaena, cheetah and jackal. More than 200 bird species have been recorded in the conservancy. Birding around the seasonal Nyae Nyae Pans is spectacular after good rains, when more than 10,000 waterbirds of over 80 species gather here, including great painted snipes, flamingos, wattled cranes and breeding slaty egrets. The area has been designated an Important Bird Area by Birdlife International and is eligible for Ramsar Site status.

Nyae Nyae is also rich in flora, and over 100 species of edible plants are utilized by the San. Huge baobabs are the most distinctive feature of many landscapes, but many other plants are of interest and importance, including manketti, leadwood, terminalia, false mopane and a variety of acacia trees, as well as devil's claw and Kalahari melon.

Around Nyae Nyae... The nearby Khaudum National Park is known especially for its numbers of elephant and roan, as well as for its wilderness flair. Both Nyae Nyae and Khaudum form part of the Kavango Zambezi Transfrontier Conservation Area (KAZA). The initiative links five countries and is one of the largest contiguous conservation areas in the world, with the aim of facilitating wildlife movement, conserving natural resources and improving the lives of rural people.



LIVELIHOODS AND DEVELOPMENT

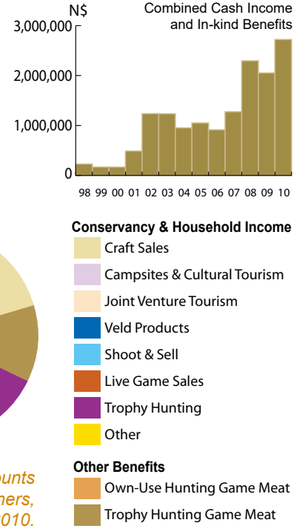
Conservancies empower rural people...

With a national population of around 30,000 the San constitute less than two percent of the total Namibian population and have the lowest per capita income of all language groups in the country. Many communities rely on a variety of support and are challenged by social disintegration, alcohol abuse and poverty. Only around 15 percent of San in Namibia have resource utilisation rights to land. The literacy rate is low at around 20%, with school attendance at only half the national average. The few opportunities for formal employment are thus further inhibited by limited levels of formal education. The San have negligible representation in government and the Ju/'hoansi are one of only two out of the six San traditional authorities who have received official recognition. All this is the result of many years of marginalisation.

Nyae Nyae facilitates access to diverse training and capacity building, empowers individuals, especially women, to actively take part in decision-making, as well as instilling a renewed sense of pride in cultural heritage

A variety of development initiatives by both government and non-government organisations over the last 30 years have attempted to move the San into modern society. Schools and health facilities have been developed, permanent water points have been established and livestock herding and gardening have been promoted. These activities have had a large influence on San culture. The Nyae Nyae Conservancy has returned natural resource user rights to the Ju/'hoansi community. San traditionally live in small groups in a democratic society that has never been structured into typical tribal leadership systems. Each group has a home ground or *n!ore* with exclusive resource use rights. Around 40 settlements are spread throughout the conservancy.

Tsumkwe, originally a *n!ore* water source, was established as the administrative centre of the area in 1959. An area of 30 square kilometres around Tsumkwe is excluded from the conservancy. The small town is the only place to buy goods and provides access to a combined school, a clinic and other government facilities and services. The nearest hospitals lie outside the conservancy at Mangetti Dune and Grootfontein. There are five primary schools in Nyae Nyae and Ju/'hoan speakers participating in the Village School Programme have access to schooling in their mother tongue.



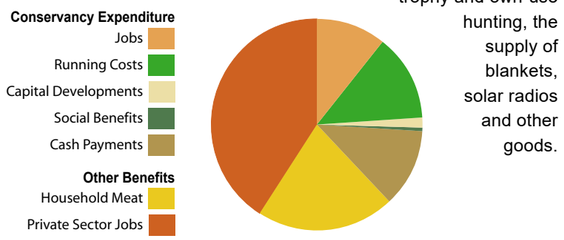
Benefits to the conservancy and its members come from a variety of sources. Sources and amounts vary from year to year, depending on factors such as agreements with private sector partners, and market fluctuations. The pie chart shows the main benefit sources in 2010.

Harvesting of devil's claw for the health industry is practiced widely, providing income to around 300 to 400 harvesters. Craft production has become an important source of income for both men and women, with over 300 craft producers in the conservancy. While the men concentrate on producing traditional implements such as bows and arrows, women create exquisite ostrich egg shell jewellery and other beautiful items. The G!hunku Crafts shop, located next to the conservancy office, is a superb local outlet for these crafts.

The C44 gravel road provides access for visitors to the area, connecting Tsumkwe with the B8 tar road between Grootfontein and Rundu in the west, as well as the Dobe border post leading to Botswana in the east. Four wheel drive is needed beyond the gravel road, both within Nyae Nyae and to access Khaudum, or when proceeding into Botswana.

the conservancy is enabling a range of new livelihood options for its residents, including tourism, craft production, hunting and indigenous plant harvesting, all of which enable the Ju/'hoansi to utilise their traditional knowledge and skills

The people of Nyae Nyae today survive on a complex mix of livelihood activities. Veld food and occasional hunting still supplement other food sources, while livestock herding and small scale gardening are becoming increasingly important. The conservancy itself, as well as related natural resource use activities, provide employment and other benefits. The conservancy has paid for the development of numerous boreholes and distributes individual benefits each year, including annual cash payments, meat from trophy and own-use hunting, the supply of blankets, solar radios and other goods.



The Tsumkwe Country Lodge, located in the town, is currently the only fixed tourism accommodation. While it does not have a formal relationship with the conservancy, lodge activities include village visits to the living museums at Mountain Pos and Dou Pos, with income going directly to the villages. Another excellent cultural experience, the Living Hunter's Museum, is located at //Xa/oba village along the track to Khaudum and includes a campsite. Wilderness campsites are also located at Makuri, Djxokwe and Kremetartkop and, although underutilised, provide nearby villages with some income.

Trophy hunting is currently the biggest source of income for the conservancy and also provides important employment. The area has yielded superb trophies and is considered one of the foremost big game hunting concessions in Namibia.

Nyae Nyae has received a lot of attention from local and international film teams and photographers, and the conservancy has received income from filming and photographic fees, although guidelines for these activities need to be improved and enforced.

The conservancy spends money and provides community and individual benefits in various areas. Areas and amounts vary from year to year, depending on factors such as conservancy income and priorities. Private sector jobs are created through agreements with private sector partners. The pie chart shows the main expenditure and benefit areas in 2010.

Conservancies facilitate sustainability...

Nyae Nyae is divided into four areas for management purposes. The management structure includes the conservancy board, made up of representatives of each area, as well as the paid positions of chairperson and conservancy manager. The board focuses on appointing the management committee and manager, as well as on strategic planning. The management committee consists of a minimum of five members, including the conservancy manager. It appoints staff, supervises performance and makes short term decisions. Employees include 14 rangers, a CBNRM field officer, three water team staff, a craft trainer, a craft shop coordinator (funded through shop income), a devil's claw coordinator, an agriculture coordinator, an office administrator and a cleaner. Annual general meetings are attended by village representatives, the board and the management committee and are used to decide on benefit distribution, elect board members and the chairperson, approve annual budgets and work plans, as well as deliberate on strategies or programme amendments. The conservancy office is located in Tsumkwe and integrates G!hunku Crafts. The office is owned by the conservancy, which also owns two four-wheel drives. Conservancy funds are spent on running costs, community development and individual benefit distribution. The funds are managed by a trust administered by the Nyae Nyae Development Foundation.

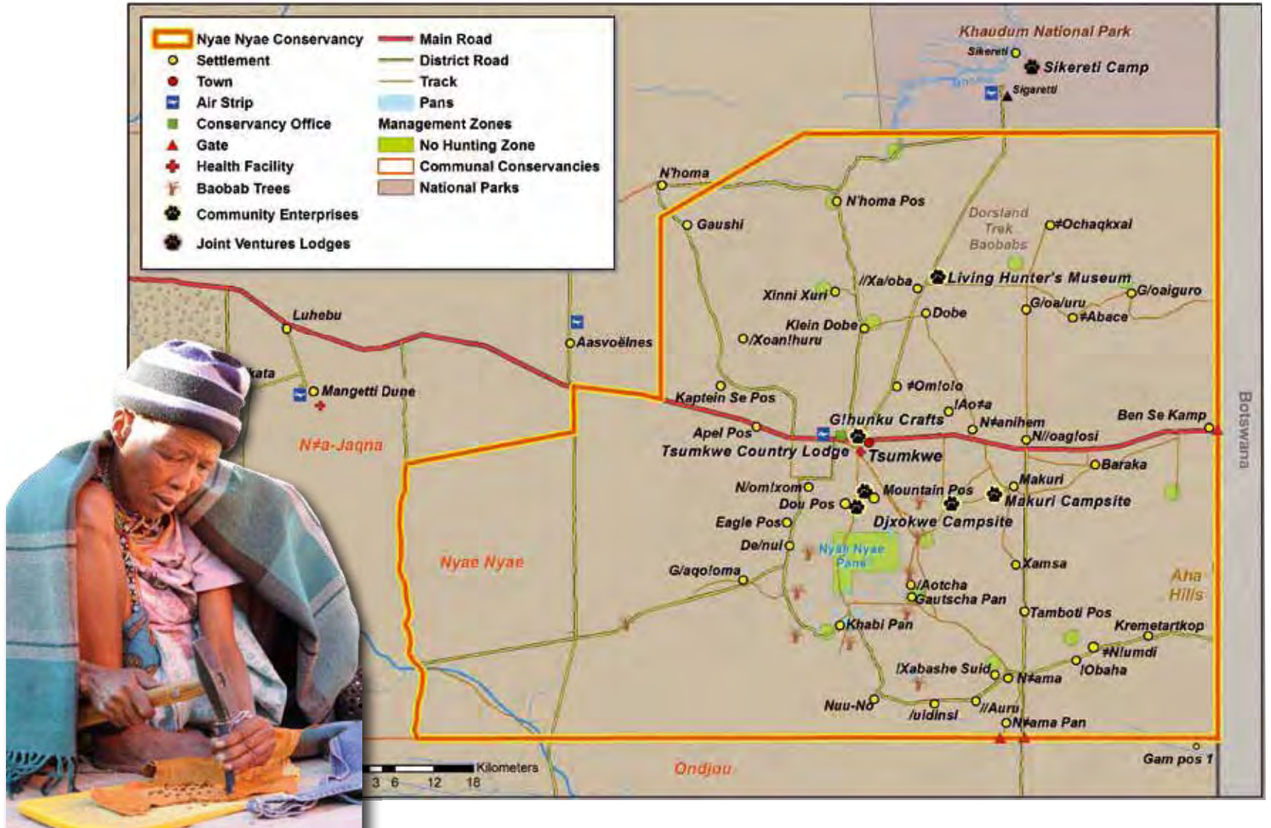
the Nyae Nyae Conservancy provides vital structures for managing the communal natural resources of the area in a way that enhances development and ensures sustainability

Activities... The conservancy is based on the traditional Ju/'hoansi *n!ore* land management system, which was recognised by government in 1991. Members have the right to hunt approved game within their *n!ore* on foot with bow and arrows, spears or bird traps. Hunting is reported to the *n!ore* owner and records are submitted to conservancy rangers and the Ministry of Environment & Tourism (MET). The conservancy has been zoned for a variety of land uses, including hunting and tourism. Wildlife reintroductions have significantly boosted game numbers and increased the value of the area for tourism and trophy hunting. An annual game count, done as a simultaneous 'full moon count' at waterholes in the conservancy, is carried out in collaboration with the MET and the support of NGOs. Conservancy rangers also do active natural resource monitoring through the Event Book monitoring system, recording data such as game sightings, human wildlife conflict, poaching incidents, game utilisation and any other data deemed important by the conservancy. All data is aggregated into monthly and annual reporting charts that facilitate adaptive management. Based on the game count and Event Book information, the MET sets annual quotas for using wildlife.

The conservancy is active in mitigating human wildlife conflict. With support from the Nyae Nyae Development Foundation and other NGOs, the conservancy has developed 'elephant proof' water reservoirs for villages, which has reduced conflicts with elephants to isolated problems at gardens. A system of providing financial offsets for losses is being implemented through the National Policy on Human Wildlife Conflict Management. It will be applied by the conservancy with MET assistance.

the conservancy uses a mix of modern technologies and traditional knowledge and skills to enable healthy wildlife populations, a productive environment, and the effective management of natural resources

A grazing management project seeks to ensure sustainable use of rangeland and mitigate the effects of overgrazing. The conservancy has also attempted to address repeated illegal livestock incursions from neighbouring communal areas. The devil's claw coordinator helps with sustainable harvesting methods and the required permit system, as well as collecting harvests for sale. Further support for the sector is provided by the Centre for Research Information Action in Africa (CRIAA-SADC) and the Millennium Challenge Account - Namibia (MCA). In order to better manage all plant resources of the area, a community forest is in the process of formation, which will be directly integrated with the conservancy.



CHALLENGES, OPPORTUNITIES...

Conservancies
are full of opportunities...

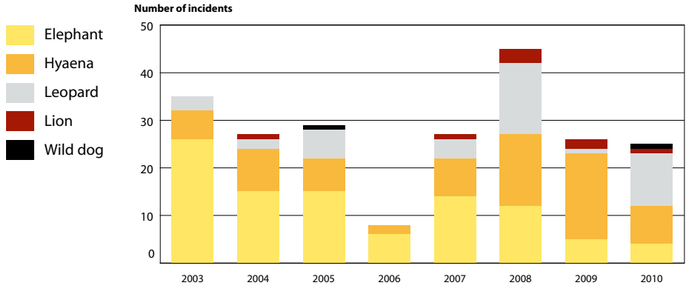
The wonderful mixture of environmental and cultural resources provides largely untapped potential in Nyae Nyae.

Challenges... The San culture is in a state of transition and is susceptible to external pressures, requiring sensitive and well-coordinated developments. Numerous government and NGO support agencies, with a mix of emphasis on social, religious, agricultural and environmental aspects, are active in Nyae Nyae. A more integrated approach to the various activities can facilitate a broader range of benefits for residents.

Nyae Nyae harbours great potential to overcome the social and environmental challenges that the area seems to face — and the conservancy is the ideal structure to coordinate many of the developments

Human wildlife conflict is a challenge where ever people coexist with wild animals, especially if these include elephants and large predators. The creation of artificial water points has increased the resident elephant population in Nyae Nyae, which poses a threat to the area's woodlands, especially in the vicinity of water. Nonetheless, human elephant conflicts have been significantly reduced through village water point protection measures and water points for game. With increases in livestock, predator problems are also increasing. At least some of these can be mitigated by herding livestock and keeping it in secure enclosures at night. Importantly, predators and elephants are of great value, both to the ecosystem and to tourism, and in the long run the benefits gained from these species should outweigh the costs of living with them. Human wildlife conflicts can be further mitigated through actively enforced zoning that sets aside different areas for wildlife and agricultural uses.

There are many unrealised tourism opportunities within Nyae Nyae, as well as the greater region. The mixture of the iconic San culture and authentic wilderness experiences provides various development options. Interpretation through qualified guiding and excellent information materials can make the complexity of modern San existence and the diversity of the environment accessible to visitors.



Human wildlife conflicts are monitored using the Event Book, indicating trends and improvements, such as reduced elephant conflicts achieved through water point protection measures.

... AND THE FUTURE

four-by-four routes with wilderness camping, serviced campsites near roads but away from larger settlements, luxury lodges and tented camps, high quality local guiding, birding and other special interest tours. Improvements to the current infrastructure in Khaudum, including the state of artificial waterholes, can facilitate the establishment of the Khaudum tourism route while maintaining the area's wilderness appeal. The development of tourism routes through Nyae Nyae and Khaudum into the Caprivi or Botswana can help the area become one of Namibia's primary wilderness tourism destinations.

Hunting forms an integral part of the San culture. Trophy hunting can play a vital role, providing significant income to the conservancy through concession fees, as well as creating employment that utilises traditional San hunting skills. The superb hunting potential of the vast area in conjunction with the San culture creates a unique and very valuable product. Zoning is especially important to maximise the potential of tourism and hunting products and strengthen core wildlife areas and tourism sites.

strategic development, sensitive to social and cultural dynamics as well as the environment, can facilitate a bright future for the oldest and second largest conservancy in Namibia

A variety of plans for tourism development in Nyae Nyae exist. These need to be well coordinated and should receive continued input from tourism experts. While the planned developments are likely to fill most current gaps in accommodation needs, it is the interpretation of the products and the enhancement of the areas resources that can unlock the full potential. Tourism products could include well laid-out

Developments should work through the conservancy or coordinate with it, as well as working with the Nyae Nyae Development Foundation. Strategic, well coordinated initiatives can unlock the full value of the area's wildlife and natural plant products, the traditional knowledge and skills of the San, and of course both cultural and wilderness tourism, as well as trophy hunting and other forms of sustainable use. Numerous options exist that can enable a bright future for the conservancy.

Come to Nyae Nyae - be part of the future...

RE: Supplement to PRT No. 83103C, Saulsbury, Mark Application for Elephant Trophy

Dear Chief Cogliano:

This supplement is in support of Mark Saulsbury's application to import an African Elephant Trophy harvested from the Nyae Nyae Conservancy in Namibia in 2018. The Nyae Nyae Conservancy is Namibia's oldest conservancy and recently received an award for their outstanding efforts in wildlife conservation and game management from the International Council for Game and Wildlife Conservation (CIC).

In 1970 the Nyae Nyae Conservancy had no elephants and now there is an estimated 1500 to 2000. Through sustainable hunting and active rural stakeholders in the Conservancy, it can be said that tourism hunting and the quota system that is monitored by the Ministry of Environment and Tourism of Namibia is working.

Please find enclosed an article titled, "Nyae Nyae wins Conservation Award" *The Namibian* (Author: Steve Felton, May 10, 2019), published in Namibia's largest daily newspaper and the article from the CIC website.

Sincerely,

John J. Jackson III

NEXT TO GODLINESS … Ignatious Jingura sorts out discarded obsolete electronic gadgets at the electronic waste management company in Windhoek. He said in line with the launch of this year's national clean up campaign by environment minister Pohamba Shifeta in April which is scheduled for September, as well as the recent Windhoek municipality's recent clean-up campaign, people should always ensure they get rid of waste from their environment everyday. Photo: Contributed.

STEVE FELTON

NAMIBIA'S oldest conservancy, Nyae Nyae, was awarded the prestigious Edmond Blanc prize at an event held at the Safari Court Hotel in Windhoek on Saturday.

The International Council for Game and Wildlife Conservation (CIC) awards the prize for outstanding efforts in wildlife conservation and game management.

In the words of the CIC: "Only those game reserves, and game organisations that have had outstanding success in their work to conserve [the] natural environment, to protect free-roaming animals in the wild and to manage game according to principles of sustainability shall be eligible for the Edmond Blanc prize."

The prize was awarded to Nyae Nyae Conservancy and stakeholders, including professional hunter Stephan Jacobs of SMJ Safaris and the Ministry of Environment and Tourism.

It was presented to chief Tsamkxao ≠Oma, who explained traditional hunting methods to the modern trophy hunters gathered from around the world.

"We hunt without noise," he said. "In the past we would track an animal and then stay with it until the meat was finished. But this would chase other animals away, because of our smell."

Wishing to conserve and keep wildlife in the conservancy, the chief said they have created large hunting areas, away from the villages, to sustain wildlife for generations to come.

Referring to the changes since the conservancy was formed in 1998, the chief said that hunting is now done according to quotas set by the Ministry of Environment and Tourism based upon game counts.

Traditionally the San people only hunted what they needed to eat, said Tsamkxao ≠Oma, and the quota system also ensures that game is conserved.

In motivating the prize for Nyae Nyae, Rolf Baldus, a German economist who has published widely on conservation issues, said Nyae Nyae, located in the so-called Bushmanland in the north-east of Namibia, covers an area of approximately 900 000 hectares of wilderness, which is rarely found in Africa today.

"Sustainable hunting is one way to conserve and carefully develop [San] culture," writes Baldus. "It promotes wildlife conservation with clear measurable results through sustainable use of wildlife," and: "Through community involvement … it has combated wildlife crime and continues to do so."

Poaching in the area is at a very low level.

Stephan Jacobs is the current professional hunter contracted by Nyae Nyae conservancy.

In a brief history of conservation hunting in Nyae Nyae, he stated that in 1970 there were no elephants in the area. They first migrated from the Zambezi area in 1971, and when the legendary hunter Volker Grellmann obtained the first hunting concession in the area, there were 80-100 bull elephants in Nyae Nyae.

Today there are between 1 500 and 2 000 elephants in the conservancy, according to Jacobs.

The hunter went on to state that conservation hunting actively conserves wildlife, and that plains game and lion numbers have increased dramatically in Nyae Nyae.

Modern hunting of game, including buffalo and a quota of nine elephants in 2019, is done with rifles, but tracking is still done on foot using the skills of San trackers who cover up to 30 kilometres a day.

Employment of trackers is one of the benefits of conservation hunting. Others include the employment of conservancy rangers and cash benefits to what was one of the poorest communities in Namibia, said Jacobs.

Almost all of the N$2 million paid out to conservancy members in each of the last two years comes from conservation hunting, which

also pays for water holes for game.

Meat for the community is also a vital benefit of sustainable hunting for a poor community, he said, with 30 tonnes being distributed.

Namibia, in its presentation to the CITES convention later this year, will argue that the sustainable use of wildlife brings financial and social benefits to rural communities and conservation benefits to wildlife.

In motivating the Edmond Blanc prize, Dr Baldus stated that Nyae Nyae "has followed strictly all Cites rules and fulfils fully the expectations of Cites that hunting protected species contributes to their conservation."

sustainable wildlife use. The International Council for Game and Wildlife Conservation (CIC) has been awarding game reserves, conservation associations and organizations since 1928, choosing one area every second year, honoring those that have had outstanding success in their work to conserve the natural environment, to protect free-roaming animals in the wild and to manage game according to principles of sustainability. During the closing ceremony of this year's 66th General Assembly, Namibia, the Edmond Blanc Prize was given to the Nyae Nyae Conservancy and Stakeholders, and was awarded to Stephan Jacobs for their work as professional hunters within the conservancy. A short dance was performed on stage to commemorate the occasion, which was followed by Chief Tsamkxao ≠Oma of the Nyae Nyae conservancy giving his thoughts as the Chief Bobo. He spoke of the changes since the creation of the conservancy, with particular mentions to the use of designated areas specifically for the purposes of hunting. Nyae Nyae's dedication to the use of modern hunting practices, and their adoption of hunting regulations and quotas, was also highlighted.

Stephan Jacobs then took the stage to give a statement on his experience as a professional hunter at the Nyae Nyae conservancy. He opened by stating the huge difference in elephant numbers, as well as lions and plains game, since the introduction of the conservancy in 1998; elephant numbers were estimated to be between 80-100 in 1978, with the current elephant population numbering between 1500 and 2000. Supplying water to these elephants was noted as one of their most significant achievements, with the average elephant bull consuming 250l of water a day.

The contributions of trophy hunting and what is has achieved for Nyae Nyae were emphasized, which includes providing 85% of the conservancy's income, funding a number projects including a cash benefit (in 2017/18 more than 2 million Namibian dollars was given to conservancy members as cash benefits). Meat distribution, totaling more than 50 tonnes of meat per year, and job opportunities were regarded as additional benefits.

Mr. Jacobs also stressed the importance of the Sun people, who provide knowledge of traditional hunting techniques (such as tracking) and how to coexist with wildlife when living amongst them. He gave an overview of a typical day in his life as a professional hunter, which includes tracking and identifying elephants that are suitable to be hunted – on average they look through 80-100 elephant bulls before finding one sufficient in size, age and other characteristics.

Achievements of the Nyae Nyae Conservancy

Nyae Nyae was considered for this prize on the basis of their outstanding achievements in conservation, fulfilling multiple criteria set out by the CIC. Their work in the sustainable use of wildlife has yielded clear and measurable results through an increase in the number of wildlife, particularly in the restoration of elephant numbers in the conservancy. Aggregating data from aerial surveys, moonlight waterhole and foot transect counts, it was found that elephant numbers have increased at an average rate of 3.0% per year between 1998 and 2015. Much of this is due to the work that Stephan and his team have done in the creation of new boreholes that provide water to elephants – water can be considered a limiting factor to elephant population growth in this arid area.

Their approach to community involvement in conservation was also commended. The model, which incorporates ideas of community based natural resource management, shifted the majority of revenues to the local San people. Nyae Nyae's community led approach gave local

community members a reason to care about wildlife, and provided the San people with employment opportunities. Stephen works closely with the San on hunts, making good use of their tracking abilities. In addition, the San's involvement in anti-poaching measures has led to the control of general poaching within the conservancy.

Their dedication to conducting responsible hunting was recognized as a further achievement by the CIC. Nyae Nyae has consistently elected professional hunters, acting as lease-holders for a five year period in the conservancy, that have shown their ability to successfully manage the conservational and socio-economic responsibilities associated with the role. In regards to their methodology when it comes to hunting, much care goes into choosing animals with the suitable characteristics. For the case of elephants, only older, post-productive elephant bulls are selected for this purpose. The hunting results of recent years are also impressive; the average weights of the tusks of all trophies were consistently well over 70 lbs with a positive, upwards trend – this is unmatched in Africa today.

The CIC would like to congratulate Mr and Mrs. Jacobs, as well as the Nyae Nyae Conservancy and stakeholders, on this achievement and we hope that their work can inspire others in the

sustainable wildlife use community to work towards even greater successes going forward.

Re: 60 day notice of intent to sue for failure and refusal to process elephant trophy import permit applications.

Dear Ladies and Gentlemen:

This is a 60-day Notice of Intent to Sue under the Endangered Species Act, 16 U.S.C. Sec. 1531 et seq. ("ESA"), for failure and refusal to process elephant trophy import permit applications in violation of the Administrative Procedures Act, 5 U.S.C Sec. 553 et seq. ("APA"), the Rules and Regulations of the Department implementing the ESA, *see* 50 CFR Part 17, the Special ESA Elephant Regulations, 50 CFR 17.40, regulations implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora, Mar. 3, 1973, 27 U.S.T. 1087 (hereinafter "CITES"), *see* 50 CFR Part 23, and the general permitting regulations of the United States Fish and Wildlife Service ("USF&WS" or "Service"), *see* 50 CFR Part 13.

This notice is on behalf of Dallas Safari Club ("DSC"), their members who desire to engage in trophy sport hunting of African elephants, outstanding elephant trophy import applicants, DSC conservation partners, including Sango Safaris, the Namibia Ministry of Environment and Tourism, the Namibian Association of CBNRM Support Organisations ("NASCO"), and the individual permit applicants set forth on Attachment A to this letter.

The African elephant (*Loxodonta africana*) is listed as threatened under the ESA and is regulated under an ESA section 4(d) special rule [50 CFR 17.40(e)]. The 4(d) special rule lists the requirements for the import of sport-hunted trophies. Under paragraph 17.40(e)(6)(i)(B), for the USF&WS to issue a threatened species permit under 50 CFR 17.32, authorizing the import of a sport-hunted elephant trophy, the Service must make a determination that the killing of the trophy animal will enhance the survival of the species.

Pursuant to the APA, the Service is required to process these permit applications and make a decision on them within a reasonable time. 5 USC 558(c). 50 CFR 13.11 provides

that permit applications will be processed "as soon as possible." And 5 USC 706 provides for judicial review of "agency action unlawfully withheld or unreasonably delayed." Moreover, the delay is denial without appeal in violation of 50 CFR 13.29 or judicial review, *see* APA section 706. The delay also conflicts with the duty the Service has under the ESA to recover the listed species and the enhancement that the permitting would encourage, thus violating 16 U.S.C. 1533(f) and 16 U.S.C. 1540.

A "hold" has been put on the processing of all elephant trophy import permit applications since November 2017 after President Trump issued two "tweets" on 17 and 19 November 2017 on his Twitter account @realDonaldTrump. The effect of this hold following the President's tweets has been to injure conservation efforts designed to protect the African elephant. This hold is further injurious to the people of the countries the elephants inhabit as the local population benefits from controlled sport hunting of elephants, a fact the Service has previously acknowledged.

Although positive enhancement determinations for Zambia and Zimbabwe were made immediately before the "hold" in November 2017, Namibia and the Republic of South Africa enhancement findings were neither new nor disputed. The positive enhancement determination for Zambia had not been suspended. By any standard, the countries of Botswana, Namibia, South Africa, Tanzania, Zambia and Zimbabwe have done nothing to deserve this mistreatment, and breach of treaty, law and regulations. A "tweet" is not a proper rule making. Moreover, this hold has been extended to all elephant trophy imports including from countries where the Service had longstanding positive enhancement findings that were the "gold" standard.

Subsequently, on March 1, 2018[1], the Service issued a memorandum in response to the D.C. Circuit Court's opinion in *Safari Club Intl., v. Zinke*, 878 F.3d 316 (D.C. Cir., 2017) which withdrew enhancement findings, including the enhancement findings for Zambia and Zimbabwe, and stated that

> All of the above referenced findings are no longer effective for making individual permit determinations for imports of those sport-hunted ESA-listed species. However, the Service intends to use the information cited in these findings and contained in its files as appropriate, in addition to the information it receives and has available when it receives each application, to evaluate individual permit applications. The Service is continuing to monitor the status and management of these species in their range countries. At this time, when the Service processes these permit applications, the Service intends to do so on an individual basis, including making ESA enhancement determinations, and CITES non-detriment determinations when required, for each application. The Service intends to grant or deny permits to import a sport-hunted trophy on a case-by-case basis pursuant to its authorities under the ESA and CITES.

[1] https://www.fws.gov/international/pdf/memo-withdrawal-of-certain-findings-ESA-listed-species-sport-hunted-trophies.pdf

> As part of the permitting process, the Service reviews each application received for import of such trophies and evaluates the information provided in the application as well as other information available to the Service as to the status of and management program for the species or population to ensure that the program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized.

This determination was not made as the result of the rule making proceeding ordered by the court in *Safari Club Intl. v. Zinke,* and would appear directly inconsistent with the court's opinion. Nonetheless, despite the statements contained in the Service's March 1, 2018, memorandum, all elephant import permits have remained on "hold." This is true for pre-act elephant trophies and renewal applications for elephant trophy import permits predating the "hold." The Service is not processing elephant import permits on a case by case basis or on any basis whatsoever. This lack of action is contrary to the law and applicable regulations.

The Service is unlawfully employing the "hold" on elephant trophy import permitting to elephant trophy imports from all countries, and even to the simple renewal of elephant import permits and to pre-act elephant trophies. The "hold" has been applied unlawfully to the detriment of the very best and most successful elephant management programs in Africa. The broadly applied "hold "was not a duly noticed and made rule making, was arbitrary, capricious and irrational, and greatly threatens the elephant and range nation programs the ESA and CITES aim to encourage and enhance. Indeed, the "hold" jeopardizes and obstructs years of conservation activities in Southern and a substantial part of Eastern Africa.

Tanzania, Zambia, Zimbabwe, Mozambique, Botswana, Namibia and South Africa hold an estimated 340,000 elephants out of a continental total of 415,000, i.e. 82 per cent of the elephants of Africa. The conservation success of these countries is linked to policies incorporating sustainable use of natural resources, based on science and aiming at improving livelihoods of rural communities while maintaining vast tracts of unspoiled habitat and ecosystems.

The tolerance by the rural citizens of Southern and Eastern Africa of elephants is increased through hunting revenue sharing systems in place throughout the region. The presence of substantial herds of elephants risk serious devastation of the crops on which the rural African population depend. Without the revenue generated by sport trophy hunting, the population would view the elephant more as pests than as a natural resource. Moreover, overpopulation of elephant threatens the habitat of other threatened species. *See* Statement of Sango Safaris, Attachment B.

The "hold' obstructs 70 per cent of the revenue of the Community Conservancy Program in Namibia. All tourist safari hunting of elephant occurs in community

conservancy areas. Likewise the hold obstructs the same percentage of the revenue of the 700,000 families which depend on the CAMPFIRE Program in Zimbabwe. The "hold" undermines the community Wildlife Management Areas in Tanzania that are intended to provide incentivizing livelihoods to rural communities and to act as corridors for elephant and other species between protected areas. The "hold" obstructs the community program in Zambia which largely relies upon tourist safari elephant hunting. The "hold" largely blocks the developing elephant conservation strategy in Botswana that recently has lifted the suspension of tourist safari hunting. Tourist safari elephant hunting had previously been 70 per cent of community revenue in that country.

Therefore, the "hold" is jeopardizing conservation efforts in these countries and threatens the livelihood of more than one million persons and the biodiversity of millions of hectares of pristine wilderness. Without the management and revenues from tourism hunting, these lands are being encroached and converted to agro-pastoral land, leading to the unavoidable extinction of wildlife and natural habitats, and the collapse of ecosystem services.

The successful elephant conservation as well as the control of poaching largely depend upon the sustainable use conservation strategy in the form of elephant tourist safari hunting in each of these countries. The elephant populations and programs in these countries cannot be sustained without the revenue generated by safari hunting and U.S. import of the trophies; hence the "hold" is *the* major threat to the survival of the largest remaining elephant populations in Africa. Hundreds of thousands of elephants are in jeopardy and more than a million families are being deprived of the realization of their single most valuable natural resource because of this illegal "hold."

Finally, tourist safari hunting of elephant is governed by sound administrative systems in all countries that include scientific based quotas supported by CITES non-detriment findings, law enforcement largely funded or carried out by safari hunting operators on the largest share of wild habitat, regulatory permitting, and community-based conservation programs, most of which was supported by over one-hundred million dollars of USAID funding because of its conservation and humanitarian merit.

In conclusion, on behalf of DSC, its members, outstanding elephant trophy import applicants, and DSC conservation partners, and for the reasons stated in this notification, we intend to sue under the Endangered Species Act for failure and refusal to process elephant trophy import permit applications.

Respectfully,

Scott Tobermann
DSC President

Attachment B

STATEMENT OF SANGO SAFARIS OF SAVE VALLEY SAFARIS, ZIMBABWE

Sango Safaris represents a 60,000 hectare property, situated within the Save Valley Conservancy ("SVC") in the South Eastern Lowveld of Zimbabwe.

The annual 2018 aerial survey, carried out every September/October for the past 20 some years showed a population of 665 elephant on Sango last year. As an average in recent years we have from 600 to over 900 elephants on Sango at any given moment. Our ecologically established carrying capacity ranges between 200 to 300 elephants. Therefore, we have at any given moment between 400 to 700 too many elephants on Sango with devastating destruction not only to the food base of the species causing the destruction but with dire consequences for all other plains game animals.

For example the Elephants' destruction as well as decreasing rains have resulted in our zebra and wildebeest herds dropping from 1,500 to 2,000 to around 600 of each species today. Similar numbers are experienced for all other grazers. Aerial Survey numbers for elephants on Sango since 2009 are as follows:

No. Elephants	Year
654	2009
462	2010
393	2012
648	2013
474	2014
497	2015
949	2016
684	2017
665	2018

The latter shows a current density of 1.1 elephant per square kilometer, whilst the recommended density is 0.2-0.3 per square kilometer for the dry Savanna areas we occupy.

The continued high density of elephant has and is having a very negative affect on Sango's habitats. For example the baobab trees of which we have an abundance are often hundreds if not thousands of years old. Approximately 90 per cent of all of our baobab trees are now suffering damaged by elephants. If this remains unaddressed Sango will have lost all its baobab trees in a matter of a few years.

Sango practices "sustainable utilization" and is proactive in the use of its excess animals, which income funds our further conservation efforts. To this end, Sango moved 100 live elephants to reduce their numbers and to help restock the Zimbabwe National Parks area in 2018. Such translocation solutions do not exist regularly as most national parks and private conservancies within a survivable translocation distance from Sango are overstocked with elephants as well.

The annual elephant hunting quota amounts to three older bulls for Sango and seven in total for the SVC. All funds generated from hunting flow fully towards running, protecting and maintaining the property and specifically its wildlife assets and the underlying habitats. This includes employment for 135 local people (44 of whom are anti-poaching scouts) provision of water for wildlife, fire breaks, road and infrastructure maintenance and a full time ecologist.

Sango forms the largest single property within the SVC. The most recent SVC elephant numbers are from a 2017 Aerial survey, (2,390 km2 of operating properties) and showed that SVC was home to 2038 elephants. This is an average of 0.85 elephant per km2 when the recommended density is 0,2-0,3 Km2. As per above formula this implies that we have approximately 1,500 elephants too many. However, we believe that the total elephant population in the SVC amounts presently to some 2,500 animals.

Elephant safaris bring in between $60 - 70,000 for each elephant. WWF recommends a trophy hunting quota of 0.75 per cent of an elephant population whilst we are not even hunting half of that quota. So the SVC and its members are prejudiced of a potential $420-720 thousand that can be used for conservation. This negatively affects, employment of local people, water pumping, fire break maintenance, etc. Our highly successful rhino anti-poaching efforts cost about $500-600,000 per year. Under the most adverse conditions we have grown our rhino population from some 42 animals in the mid 1990's to about 190 today.

If the hunting income is thus disallowed from sustainably using our elephant population, we would no longer be able to fund the protection of our highly endangered rhinos. Is there anything more proactive in conservation than using the income from one species present in excessive numbers to protect another which is highly endangered? By denying the importation of trophies into the USA major income is no longer available for the protection of endangered and highly endangered species. Our poachers would welcome this action by the US Government; we highly successful conservationist do not.

Hi Mr. Saulsbury,

I apologize for the delay in responding to you. I have your application dated March 23, 2018, for the import of a sport-hunted African elephant trophy hunted in Namibia in 2017.

I was not able to locate the hunting outfitter identified in your application in Namibia's Professional Hunting Directory (http://www.napha-namibia.com), Can you provide additional information about that hunting outfitter?

Also, can you provide information about the trophy fees that you paid? What were the fees, and can you provide information regarding how the funds used?

Do you know how much is being spent in the Nyae-Nyae Conservancy for poaching patrols and monitoring, conservation programs, and community support and involvement?

In accordance with 50 CFR 13.ll(e), if the requested information is not received by this office within 45 calendar days of the date of this email, your application will be abandoned and administratively closed. Once a file is closed, you will need to submit a new application, and all required fees, for the Service to consider your proposed activity.

Thank you and please contact me if you have any questions.

RE: RESPONSES TO FWS EMAIL OF SEPTEMBER 30, 2019
PRT No.: 83103C
APPLICANT NAME: MARK SAULSBURY

Dear Ms. Brisendine:

Below please find Applicant's responses to your email dated September 30, 2019, regarding the harvest of a Loxodonta Africana [Elephant] in Namibia:

1. I was not able to locate the hunting outfitter identified in your application in Namibia's Professional Hunting Directory (http://www.napha-namibia.com). Can you provide additional information about that hunting outfitter?
   I have included an attachment which was in the directory for Jacobs, SM – SMJ Safaris.

2. Also, can you provide information about the trophy fees that you paid? What were the fees, and can you provide information regarding how the funds used?
   Total cost for the hunt - $95,000 Approximately $45,000 retained by the outfitter for operating expenses.

3. Do you know how much is being spent in the Nyae-Nyae Conservancy for poaching patrols and monitoring, conservation programs, and community support and involvement?
   A total of $50,000 is paid to the Conservancy for anti-poaching, water/borehole installations, conservation programs and community support...

4. *Attached is a letter from Conservation Force to the US Fish and Wildlife, dated June 13, 2019. This letter includes an article highlighting a significant Conservation Award bestowed upon*

the Nyae Nyae Conservancy and SMJ Safaris for their successful conservation program. It also provides further information on how the funds are used.

5. *For reference, please see attached copy of the CITES Namibian Export Permit No. 0055547, approved on 28 February 2018.*

If you have any additional question, please do not hesitate to contact us.

Sincerely,

/s/ Emma C. Sampson

RE: Supplement to PRT No. 83103C, Saulsbury, Mark Application for Elephant Trophy

Dear Chief Cogliano:

This supplement is in support of Mark Saulsbury's application to import an African Elephant Trophy harvested from the Nyae Nyae Conservancy in Namibia in 2018. The Nyae Nyae Conservancy is Namibia's oldest conservancy and recently received an award for their outstanding efforts in wildlife conservation and game management from the International Council for Game and Wildlife Conservation (CIC).

In 1970 the Nyae Nyae Conservancy had no elephants and now there is an estimated 1500 to 2000. Through sustainable hunting and active rural stakeholders in the Conservancy, it can be said that tourism hunting and the quota system that is monitored by the Ministry of Environment and Tourism of Namibia is working.

Please find enclosed an article titled, "Nyae Nyae wins Conservation Award" *The Namibian* (Author: Steve Felton, May 10, 2019), published in Namibia's largest daily newspaper and the article from the CIC website.

Sincerely,

John J. Jackson III

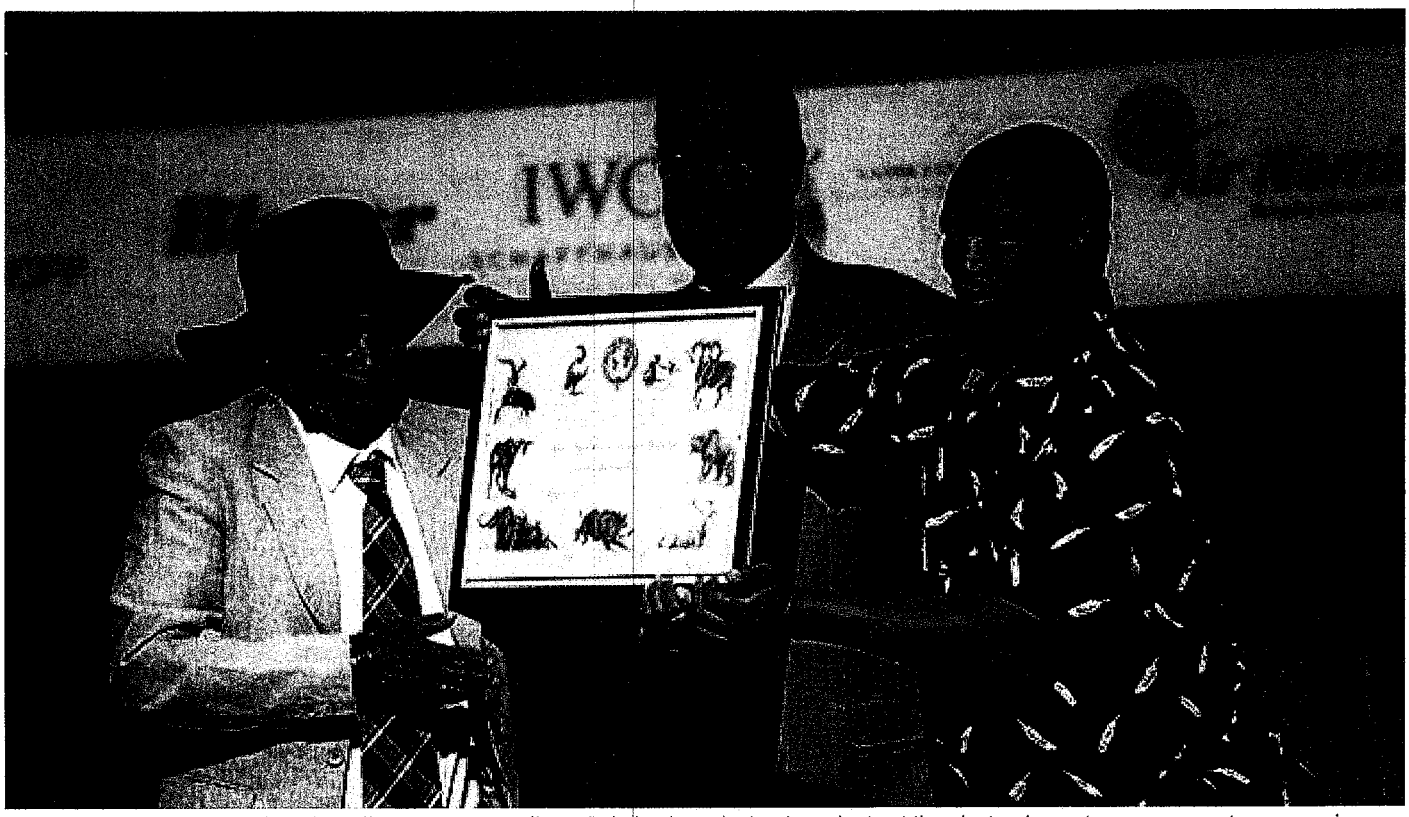
Nyae Nyae wins conservation award

News - Environment | 2019-05-09 Page no: 8



NEXT TO GODLINESS ... Ignatious Jingura sorts out discarded obsolete electronic gadgets at the electronic waste management company in Windhoek. He said in line with the launch of this year's national clean up campaign by environment minister Pohamba Shifeta in April which is scheduled for September, as well as the recent Windhoek municipality's recent clean-up campaign, people should always ensure they get rid of waste from their environment everyday. Photo: Contributed.

STEVE FELTON

NAMIBIA'S oldest conservancy, Nyae Nyae, was awarded the prestigious Edmond Blanc prize at an event held at the Safari Court Hotel in Windhoek on Saturday.

The International Council for Game and Wildlife Conservation (CIC) awards the prize for outstanding efforts in wildlife conservation and game management.

In the words of the CIC: "Only those game reserves, and game organisations that have had outstanding success in their work to conserve [the] natural environment, to protect free-roaming animals in the wild and to manage game according to principles of sustainability shall be eligible for the Edmond Blanc prize."

The prize was awarded to Nyae Nyae Conservancy and stakeholders, including professional hunter Stephan Jacobs of SMJ Safaris and the Ministry of Environment and Tourism.

It was presented to chief Tsamkxao ≠Oma, who explained traditional hunting methods to the modern trophy hunters gathered from around the world.

"We hunt without noise," he said. "In the past we would track an animal and then stay with it until the meat was finished. But this would chase other animals away, because of our smell."

Wishing to conserve and keep wildlife in the conservancy, the chief said they have created large hunting areas, away from the villages, to sustain wildlife for generations to come.

Referring to the changes since the conservancy was formed in 1998, the chief said that hunting is now done according to quotas set by the Ministry of Environment and Tourism based upon game counts.

Traditionally the San people only hunted what they needed to eat, said Tsamkxao ≠Oma, and the quota system also ensures that game is conserved.

In motivating the prize for Nyae Nyae, Rolf Baldus, a German economist who has published widely on conservation issues, said Nyae Nyae, located in the so-called Bushmanland in the north-east of Namibia, covers an area of approximately 900 000 hectares of wilderness, which is rarely found in Africa today.

"Sustainable hunting is one way to conserve and carefully develop [San] culture," writes Baldus. "It promotes wildlife conservation with clear measurable results through sustainable use of wildlife," and: "Through community involvement ... it has combated wildlife crime and continues to do so."

Poaching in the area is at a very low level.

Stephan Jacobs is the current professional hunter contracted by Nyae Nyae conservancy.

In a brief history of conservation hunting in Nyae Nyae, he stated that in 1970 there were no elephants in the area. They first migrated from the Zambezi area in 1971, and when the legendary hunter Volker Grellmann obtained the first hunting concession in the area, there were 80-100 bull elephants in Nyae Nyae.

Today there are between 1 500 and 2 000 elephants in the conservancy, according to Jacobs.

The hunter went on to state that conservation hunting actively conserves wildlife, and that plains game and lion numbers have increased dramatically in Nyae Nyae.

Modern hunting of game, including buffalo and a quota of nine elephants in 2019, is done with rifles, but tracking is still done on foot using the skills of San trackers who cover up to 30 kilometres a day.

Employment of trackers is one of the benefits of conservation hunting. Others include the employment of conservancy rangers and cash benefits to what was one of the poorest communities in Namibia, said Jacobs.

Almost all of the N$2 million paid out to conservancy members in each of the last two years comes from conservation hunting, which

also pays for water holes for game.

Meat for the community is also a vital benefit of sustainable hunting for a poor community, he said, with 30 tonnes being distributed.

Namibia, in its presentation to the CITES convention later this year, will argue that the sustainable use of wildlife brings financial and social benefits to rural communities and conservation benefits to wildlife.

In motivating the Edmond Blanc prize, Dr Baldus stated that Nyae Nyae "has followed strictly all Cites rules and fulfils fully the expectations of Cites that hunting protected species contributes to their conservation."

Opening Ceremony – Crossroads – Leading the Way for

sustainable wildlife use. The International Council for Game and Wildlife Conservation (CIC) has been awarding game reserves, conservation associations and organizations since 1928, choosing one area every second year, honoring those that have had outstanding success in their work to conserve the natural environment, to protect free-roaming animals in the wild and to manage game according to principles of sustainability. During the closing ceremony of this year's 66th General Assembly, Namibia, the Edmond Blanc Prize was given to the Nyae Nyae Conservancy and Stakeholders, and was awarded to Stephan Jacobs for their work as professional hunters within the conservancy. A short dance was performed on stage to commemorate the occasion, which was followed by Chief Tsamkxao ≠Oma of the Nyae Nyae conservancy giving his thoughts as the Chief Bobo. He spoke of the changes since the creation of the conservancy, with particular mentions to the use of designated areas specifically for the purposes of hunting. Nyae Nyae's dedication to the use of modern hunting practices, and their adoption of hunting regulations and quotas, was also highlighted.

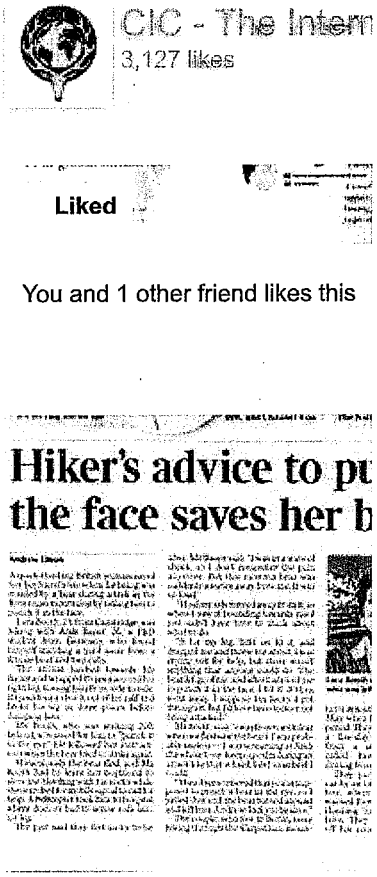
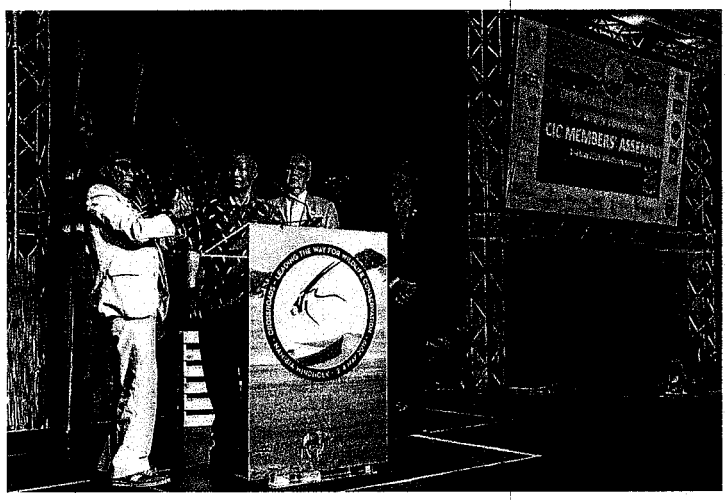
Stephan Jacobs then took the stage to give a statement on his experience as a professional hunter at the Nyae Nyae conservancy. He opened by stating the huge difference in elephant numbers, as well as lions and plains game, since the introduction of the conservancy in 1998; elephant numbers were estimated to be between 80-100 in 1978, with the current elephant population numbering between 1500 and 2000. Supplying water to these elephants was noted as one of their most significant achievements, with the average elephant bull consuming 250l of water a day.



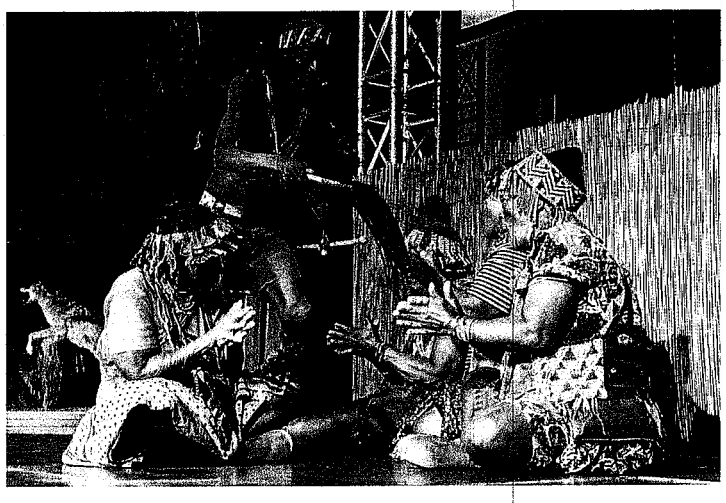


The contributions of trophy hunting and what is has achieved for Nyae Nyae were emphasized, which includes providing 85% of the conservancy's income, funding a number projects including a cash benefit (in 2017/18 more than 2 million Namibian dollars was given to conservancy members as cash benefits). Meat distribution, totaling more than 50 tonnes of meat per year, and job opportunities were regarded as additional benefits.

Mr. Jacobs also stressed the importance of the Sun people, who provide knowledge of traditional hunting techniques (such as tracking) and how to coexist with wildlife when living amongst them. He gave an overview of a typical day in his life as a professional hunter, which includes tracking and identifying elephants that are suitable to be hunted – on average they look through 80-100 elephant bulls before finding one sufficient in size, age and other characteristics.

Achievements of the Nyae Nyae Conservancy

Nyae Nyae was considered for this prize on the basis of their outstanding achievements in conservation, fulfilling multiple criteria set out by the CIC. Their work in the sustainable use of wildlife has yielded clear and measurable results through an increase in the number of wildlife, particularly in the restoration of elephant numbers in the conservancy. Aggregating data from aerial surveys, moonlight waterhole and foot transect counts, it was found that elephant numbers have increased at an average rate of 3.0% per year between 1998 and 2015. Much of this is due to the work that Stephan and his team have done in the creation of new boreholes that provide water to elephants – water can be considered a limiting factor to elephant population growth in this arid area.



Their approach to community involvement in conservation was also commended. The model, which incorporates ideas of community based natural resource management, shifted the majority of revenues to the local San people. Nyae Nyae's community led approach gave local

community members a reason to care about wildlife, and provided the San people with employment opportunities. Stephen works closely with the San on hunts, making good use of their tracking abilities. In addition, the San's involvement in anti-poaching measures has led to the control of general poaching within the conservancy.

Their dedication to conducting responsible hunting was recognized as a further achievement by the CIC. Nyae Nyae has consistently elected professional hunters, acting as lease-holders for a five year period in the conservancy, that have shown their ability to successfully manage the conservational and socio-economic responsibilities associated with the role. In regards to their methodology when it comes to hunting, much care goes into choosing animals with the suitable characteristics. For the case of elephants, only older, post-productive elephant bulls are selected for this purpose. The hunting results of recent years are also impressive; the average weights of the tusks of all trophies were consistently well over 70 lbs with a positive, upwards trend – this is unmatched in Africa today.

The CIC would like to congratulate Mr and Mrs. Jacobs, as well as the Nyae Nyae Conservancy and stakeholders, on this achievement and we hope that their work can inspire others in the

sustainable wildlife use community to work towards even greater successes going forward.

Nyae-Nyae Operator Enhcmt Questionnaire 2019.10.pdf
5797K

CONSERVATION FORCE

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. **OPERATOR INFORMATION**
   a. Name of Area Operator: S.M.J Safaris
   b. Years in business: 17 years
   c. Name of Company conducting hunt: S.M.J Safaris
   d. City where hunt will take place: Tsumkwe
   e. Country where hunt will take place: Namibia

2. **CONCESSION**
   a. Name of Concession: Nyae-Nyae Conservancy
   b. Area in Km^2: 890 000km2
   c. Land tenure: Nyae-Nyae Conservancy San people
      Government Lease ____ Community x Private Ranch ____ Private Conservancy
   d. Length of Concession Agreement: 5 years
   e. Can it be renewed? ____ Yes x No
   f. Length of Renewal, if applicable:
   g. Estimated total amount received in trophy fees last year, if applicable: US$ 357 900-00
   h. Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:
      We have to hand in annual reports on state of game and habitat status. We have to permanently employ 12 people from local origin. There are numerous programs were we as safari compony has obligations to educate some of the local people as PHs as well as skinners, drivers, and general camp staff. We normally send them to courses that the professional hunters association offer. We have an annual agreement to provide schools in the area with food for the children in the schools. We do antipoaching patrols in association with the conservancy game guards. It is the responsibility of the safari compony to maintain the 17 water points for game in the area. With out these water points the game in the area has no chance to survive. These water points are pumping 355 000 l of water a day for the game in the area.
   i. Please provide the Concession location and nearest City: North-East Namibia / Tsumkwe
   j. Please attach a map or maps with the boundaries marked and showing the nearest City
   k. If the Concession borders a National Park, please provide Park name: Kaudom National Park
   l. Description of general and distinctive habitat features and any water features:
      Genera Savanah with some natural water springs that does dry up during the dry season and then 17 borehole water points that are permanently.

3. **COMMUNITIES IN THE CONCESSION**
   a. Are there any communities living in the Concession? x Yes ____ No
   b. If so, estimated number of people or villages in the Concession? 2500
   c. Are there communities bordering this Concession? x Yes ____ No
   d. If so, estimated number of people or Villages around the Concession? Unknown

4. **RELEVANT GAME POPULATIONS IN THE CONCESSION:**[1]

[1] The new Fish and Wildlife Services (FWS) Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

SPECIES NAME	RELATIVE ABUNDANCE			ESTIMATED POPULATION	3-YEAR TREND			HOW IS IT MONITORED?
	DENSE	AVG.	SPARSE		UP	DOWN	STABLE	
ELEPHANT	x			2070	x			Research/counts
LION			x	15	x			Research/counts
LEOPARD	x			250	x			Research/ counts
PREY SPECIES			x	13160	x			Game counts

5. Local Community Participation

a. Total employment number: _____

b. Please identify the number and type of all employees:

Employee Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	3	3
Trackers	4	4
Anti-Poaching Scouts/Rangers	13	13
Other Anti-Poaching		
Cooks/Housekeepers	4	4
Community Coordinators	3	3
Managers	1	1
Biologists	5	5
Others: _____		

6. Number of staff employed in the off-season: All staff are permanently employed.

a. Please identify the number and type of staff that are engaged when the season is not open:

Employee Type	Total number of this type	Number of locals /from nearby communities	When employed?
Anti-Poaching staff	13	13	
Managers	1	1	
Maintenance	2	2	
Road Opening /Construction	2	2	
Community Relations Personnel	1	1	
Others:			

7. Anti-Poaching Efforts:[2]

a. Number of Anti-Poaching staff: 13

b. Are Anti-Poaching Patrols conducted during the hunting season, off-season, or both?
Hunting season: _____ Off-season: _____ Both seasons: x

c. Months during which Anti-Poaching Patrols are conducted: 12 months

d. Number of Anti-Poaching Patrols per month: 1-5

e. Description of Anti-Poaching equipment, vehicles, etc.:
Vehicles, Bino's and camping equipment as well as personal gear

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?
MET, Conservancy as well as hunting operator

g. Do you offer rewards to poaching informants leading to arrest? x Yes _____ No

[2] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

7. ANTI-POACHING EFFORTS [*CONTINUATION*]

h. Do you offer rewards to poaching informants upon conviction? x Yes _____ No

i. Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS	$14000,00	$15600,00	$16000,00	
EQUIPMENT	$10000,00	$10000,00	$10000,00	
VEHICLES		$35000,00		
PETROL	$1200-00	$1200-00	$1200-00	
REWARDS PAID				Poaching is very low in the area
OTHER: _____				
OTHER: _____				
TOTALS	$25200-00	$51800-00	$27200-00	

j. What currency are the expenditures given in? US$

8. ANTI-POACHING RESULTS:

CATEGORY	2016	2017	2018	REMARKS
POACHING INCIDENTS DISCOVERED	1	3	2	
ELEPHANT CARCASSES OBSERVED	0	0	0	
LION CARCASSES OBSERVED	0	0	0	
LEOPARD CARCASSES OBSERVED	0	0	0	
IVORY POACHERS ARRESTED	0	0	0	
MEAT POACHERS ARRESTED	0	4	2	
OTHER POACHERS ARRESTED	0	0	0	
POACHERS CONVICTED	0	0	0	
SNARES/GIN TRAPS COLLECTED	3	5	2	
FIREARMS CONFISCATED	0	0	0	
VEHICLES CONFISCATED	0	0	0	
BICYCLES CONFISCATED	0	0	0	
BOATS/NETS CONFISCATED	0	0	0	
TUSKS RECOVERED	0	0	0	
OTHER: _____				

9. COMMUNITY INVESTMENT:[3]

a. Does the Company contribute money or goods/services to local communities?
x Yes _____ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)?
50% of total income goes to local communities. Recuired by contract

c. Does the Company provide game meat to nearby communities? Yes x No _____

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:
All the meat hunted goes to the comminuties and this adds up to about 45 tons per season to estimate a value would be very difficult as elephant meat has not got a value on the open market as we cannot sell it. At normal game meat prizes this will add up to $ 75 000-00 per year

e. If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.
We very seldomly gets PAC animals

f. Please describe any consolation payments made to local residents damaged by game species

g. What currency are the expenditures reported in? USD$

SPECIES	DAMAGE CAUSED	CONSOLATION PAID 2016	CONSOLATION PAID 2017	CONSOLATION PAID 2018
ELEPHANT				
LION				
LEOPARD				
OTHER				

a. Please describe any community projects paid for by the Company:
Most of the community programs are run by the conservancy trough the money earned from trophy hunting. There a lot of them climate change, sustainable usage, cattle breeding, family planning but to mention a few . The safari compony does provide it's workers with courses every three years that has direct needs in the safari compony, like PH's schooling housekeeping skinning vehicle maintenance and cooking courses

b. What currency are the expenditures reported in? As these project are run by the conservancy we cannot give an amount on them, from the compony side we have to spend $3500-00 every three years on training.

TYPE OF PROJECT	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
EDUCATION (E.G.: CLASSROOMS, OFFICES)				

[3] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

TOTALS				

10. How many U.S. Clients did the Company have in the past three years, what percentage of the Company's clients were from the U.S., and what fees did they pay?

	HUNTING ELEPHANT	HUNTING LION	HUNTING LEOPARD	HUNTING ALL SPECIES
NUMBER OF U.S. CLIENTS	**2016:** 1	**2016:** 0	**2016:** 1	**2016:** 3
	2017: 6	**2017:** 0	**2017:** 2	**2017:** 10
	2018: 3	**2018:** 0	**2018:** 1	**2018:** 4
PERCENTAGE OF U.S. CLIENTS	**2016:** 20%	**2016:** 0	**2016:** 35%	**2016:** 10%
	2017: 80%	**2017:** 0	**2017:** 65%	**2017:** 80%
	2018: 40%	**2018:** 0	**2018:** 35%	**2018:** 25%
TROPHY FEES PAID BY U.S. CLIENTS	**2016:** $45000	**2016:** 0	**2016:** $7000	**2016:** $5500
	2017: $245000	**2017:** 0	**2017:** $14000	**2017:** $25000
	2018: $100000	**2018:** 0	**2018:** $$7000	**2018:** $12000

11. Approximate Dollar amount and/or percentage of Company's revenue from U.S. Clients: $450 000-00
45%

12. OTHER INFORMATION: Please provide a narrative of other enhancement information about the operation, such as any special Hunting Policies (e.g., aging, size, resting areas), Concession Improvements (e.g.: digging and maintaining boreholes, restocking), Management Activities, Research, etc.

We have very strict hunting laws in the area that does not allow you to shoot close waterholes or roads nor from vehicles and also only during legal hunting times. Since we have taken over the hole area in 2017 we have fixed up all the game water points in the area which before the time only 20% of them were in working order. All village water points are maintained by the conservancy and even 5 new boreholes were made in the last few years. Community members not only get the meat from the meat distribution plan that we have in place but also gets about $200 000,00 payed out straight to them in cash from the moneys received from trophy hunting.

We in the area has picked up that from there has been issues with the importation of ivory from the Namibia to the USA our USA client base has really declined.

13. I declare that the foregoing is true and correct:

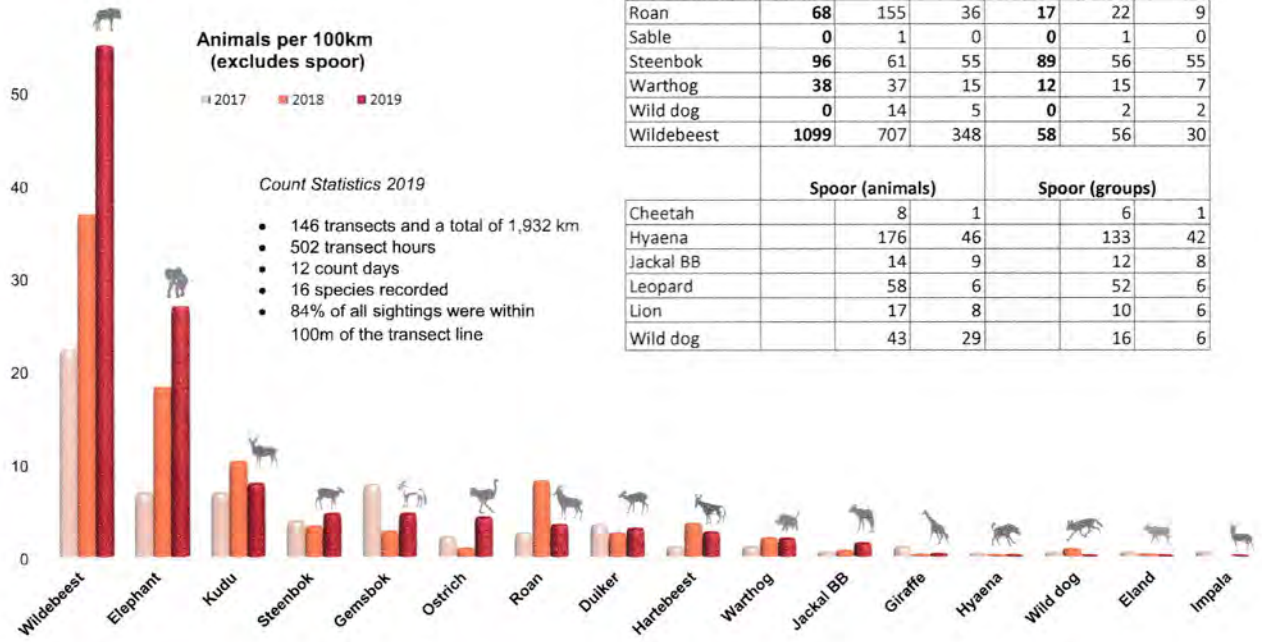
Jackal BB		14	9		12	8
Leopard		58	6		52	6
Lion		17	8		10	6
Wild dog		43	29		16	6



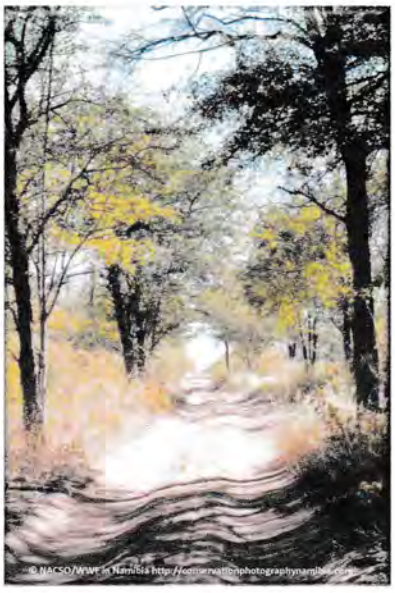
Count Statistics 2019

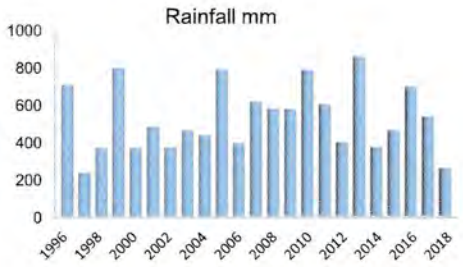
- 146 transects and a total of 1,932 km
- 502 transect hours
- 12 count days
- 16 species recorded
- 84% of all sightings were within 100m of the transect line

Estimates

Species	Estimate	95% CL Low	95% CL High	Model
Duiker	**1,030**	660	1,620	HN
Elephant	**2,070**	1,280	3,350	HN
Gemsbok	**680**	365	1,280	HN
Hartebeest	**300**	140	750	U
Kudu	**1,455**	980	2,160	HN
Ostrich	**280**	145	540	U
Roan	**650**	320	1,300	U
Steenbok	**2,195**	1,590	3,035	HN
Warthog	**185**	100	350	U
Wildebeest	**5,185**	3,280	8,200	U

Estimates (rounded) were derived using DISTANCE analysis which takes account of drop-off in animal detectability with distance from the transect line. Ten species had sufficient sightings to adequately derive species detection curves and therefore produce estimates. Model: U=uniform; HN=half normal.





Synopsis

Line transects were started in 2017 and represent almost half of the total area of the conservancy and include most of the waterholes. The area not covered by transects has low animal densities due to reduced habitat suitability and people pressure.

Transect counts have recorded 22 species including 6 predator species. Based on spoor sightings hyaena are the most common predator, followed by leopard and wild dog.

The top 3 species in terms of sightings between 2017 and 2019 included wildebeest, elephant and kudu.

On September 30, 2019 at 10:02 AM "Brisendine, Amy" <amy_brisendine@fws.gov> wrote:

Hi Mr. Saulsbury,

I apologize for the delay in responding to you. I have your application dated March 23, 2018, for the import of a sport-hunted African elephant trophy hunted in Namibia in 2017.

I was not able to locate the hunting outfitter identified in your application in Namibia's Professional Hunting Directory (http://www.napha-namibia.com), Can you provide additional information about that hunting outfitter?

Also, can you provide information about the trophy fees that you paid? What were the fees, and can you provide information regarding how the funds used?

Do you know how much is being spent in the Nyae-Nyae Conservancy for poaching patrols and monitoring, conservation programs, and community support and involvement?

In accordance with 50 CFR 13.ll(e), if the requested information is not received by this office within 45 calendar days of the date of this email, your application will be abandoned and administratively closed. Once a file is closed, you will need to submit a new application, and all required fees, for the Service to consider your proposed activity.

Thank you and please contact me if you have any questions.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: n/a (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: n/a (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   n/a

   b. Date wildlife is to be hunted:

   n/a

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

n/a

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted: Maremiani Singelele Nature Reserve, Musina, South Africa
   May 12, 2016

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

   (2) tusks, (2) ears prepared for decorative painting, tail with mounting hardware, (2) skin panels, 4 feet (2 to made into stools) and (2 to made into trash cans).

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   Safari Taxidermy
   47 Goud St.,Laboria, Polokwane, RSA

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business	Safari Taxidermy
Name: Address:	PO Box 235, Ladanna, 0704
Address:	47 Goud St., Labotia,
City:	Polokwane
State/Province:	Limpopo
Country, Postal Code:	Republic of South Africa 0704

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivo[redacted]e-exported.

Applicant's signature: (b) (6) Date: 3/11/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Re: Applications for Import of Sport-Hunted Trophies

Dear Chief Van Norman:

Enclosed please find four applications to import sport-hunted trophies.

- The first applicant is hunting a lion in Namibia at Kalahari Game Lodge, a 400 km^2 property that borders the Kgalagadi Transfrontier Park. This property maintains an increasing population of wild lion. The property is fenced on one side, and species must be managed to conserve the biodiversity and maintain the lion population and habitat quality. The property has identified two lion this year suitable for hunting. The hunting will generate revenues to be reinvested in wildlife management, poaching control, and local employment. Please see the attached letter from the landowner, and please consider this information and the information submitted by Namibia's Ministry of Environment and Tourism in making a positive enhancement finding for this applicant. 84926C
- The second applicant is hunting an African lion in the Selous Game Reserve, Tanzania, with Rungwa Game Safaris. We previously provided an enhancement report from Rungwa Game Safaris and have enclosed it again for ease of reference. This company invests heavily in anti-poaching and community livelihoods. Its areas maintain healthy lion populations, and the company abides by a six-year age restriction on trophies. Please consider the enhancement report and the other information provided by Tanzanian authorities and Conservation Force in making a positive enhancement finding for this applicant.
- The third applicant is hunting elephant and lion with Mopane/Nyamvu Safaris in Zambia in 2018 and 2019, respectively. We previously submitted operator enhancement reports from these companies and have enclosed the reports again for ease of reference. These companies together invest over $61,000/year in anti-poaching, $45,000/year in community projects, and $30,000/year in game meat distributed to rural villages. In their concessions, the companies are securing elephant populations and lion prey species from poaching. The companies are recovering populations that had suffered from bushmeat poaching. The companies are enhancing the survival of elephant and lion by addressing the primary threats to each species. Please consider the enclosed enhancement reports and the information provided by Zambian authorities and Conservation Force in making a positive enhancement finding for each of these applications.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;

(2) Was legally obtained by the hunter through hunting for his or her personal use;

(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and

(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:

(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;

(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and

(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

   Same

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Applicant or attorneys with Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

na

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

      Loxodonta africana (African elephant)

   b. Sex (if known). male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   Zambia, Luangwa Valley, Mfuwe Region, Mwanya GMA, Mfuwe Town and Mwanya

   b. Date wildlife is to be hunted: October 2-18, 2018

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   WH van Noordwyk, Mvuu Safaris

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   na

   b. Date wildlife was hunted: na

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   na

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   na

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name: Douglas Cockroft
   Business Name: Splitting Image Taxidermy
   Address: PO Box 27582, Greenacres
   City: Port Elizabeth
   State/Province: East Cape
   Country, Postal Code: South Africa 6057
   Telephone: +27 41 581 9729

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature: (b) (6) Date: 03/19/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Re: Applications for Import of Sport-Hunted Trophies

Dear Acting Chief:

Enclosed please find two applications to import sport-hunted trophies.

- The first applicant is hunting an elephant on communal land in the Southeastern Lowveld range of Zimbabwe. The proceeds of this hunt benefit CAMPFIRE communities, as detailed in the various CAMPFIRE reports submitted to the DMA by Conservation Force, the Zimbabwe Parks and Wildlife Management Authority (ZPWMA), and the CAMPFIRE Association. Moreover, the elephant population in this range area in Zimbabwe is increasing, as reflected in the most recent survey reports. Please consider the enclosed documents and all information in the DMA's files regarding the benefits of elephant hunting in Zimbabwe in making a positive enhancement finding for this applicant.
- The second applicant is hunting an African lion in the Matetsi region of Zimbabwe with Martin Pieters Safaris. In April 2016, we provided significant enhancement information from this operator, and information about the increasing lion population in this area and the benefits of lion hunting in Zimbabwe was provided in the October 2016 non-detriment and enhancement finding from ZPWMA. Please consider that information, and all other information provided by Conservation Force, ZPWMA, Zimbabwean operators, and CAMPFIRE communities in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

RCVD MAR 30 2018

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ___Bull Elephant___ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Type of Activity:

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Reeves	Steven	Glen	

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6) [redacted]			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ Initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Hooper	UT	84315	Weber	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No ✓ Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   LOXODONTA AFRICANA, ELEPHANT

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   ZIMBABWE, SENGWE 1 + 2 TTL (CAMPFIRE AREAS)

   b. Date wildlife is to be hunted: APRIL 13-24, 2018

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   SSG SAFARIS, NIXON DZINGAI, OWNER + PH

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   N/A

   b. Date wildlife was hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). NOT YET ISSUED

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name: SSG SAFARIS
   Business Name:
   Address:
   City:
   State/Province:
   Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   PLEASE SEE ATTACHED + INFORMATION SUBMITTED BY CONSERVATION FORCE + ZIMBABWE

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   SEE 9.A

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

   SEE 9.A

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature: (b) (6) [redacted] Date: 7 March 201

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Steven Reeves Permit Application

9. B:

This declaration is made by the Zimbabwean hunting operator:

We charge 1.400 USD per day on elephant hunts as our daily rate that broken down as follows:

15% of the daily rate goes to the hunting agent that books the hunt.

250 USD per day goes to the professional hunter that guides the hunt, this includes the clients hiring of his modern 4x4 hunting vehicle for purposes of the hunt.

We pay the fuel for the vehicle, usually around 50 litres per day @ 2 usd per litre in Zimbabwe = 100 USD

We use 2 trackers on elephant hunts @ 30 USD each per day daily rates = 60 USD per day.

We provide accommodation including housekeeping and a laundry service = 150 USD per day.

We cater for the clients' food and drinks including alcohol = 120 USD per day.

We provide a cook and a waitress plus kitchen cleaning staff @ 30 USD each per day x 4 = 120 USD per day.

We pay a Zimbabwe National Parks game scout to National Parks 75 USD per day to observe the hunt on behalf of the Government.

We feed all persons on the hunt not only the client.

We charge 15.500 USD for each elephant hunted.

We pay 12.500 USD of that amount to the local community on the following basis:

55% goes to the local rural African community that they use for schools, medical care, food, clothes roads and infrastructure.

4% goes to the campfire program, there is lots of information about the campfire project online: https://en.wikipedia.org/wiki/Communal_Areas_Management_Programme_for_Indigenous_Resources

41% goes to the Chiredzi Rural District Council (CRDC) this money is used by the council to increase/better the living conditions of the local people that live with these animals and suffer damages to their crops as a result of the human/animal conflict that exists in our areas and is getting worse year on year.

These trophy fee payments allow for the local people to be more tolerant of the animals that co-exist with them in these areas.

Steven Reeves Permit Application

9. C:

We employ 4 full time anti-poaching personnel who patrol the hunting area on a full time rotational basis to help stop poaching in our areas that for now we have under control, without these hunts our ability to perform anti poaching duties is impossible.

We employ 19 full time staff members that without our safari operation would be un-employed; the meat from our hunts gets distributed amongst the local people including the families of our staff at no charge at all, this much needed protein that would otherwise not be available at all, this is rural Africa.

The local people tolerate these elephants, buffalos and lions destroying their crops and cattle on the basis of the compensation agreements we have with them, if these animals were not paying their way they would not be tolerated in these areas by the locals due the damage they cause in the human/wild animal conflict.

It is of the utmost importance in terms of safe guarding the animals that the hunting operations and hunting operators are allowed to continue their work, or sadly these animals will all be destroyed by the locals.

We are an African based, African owned, African run Safari operation, we were born in these areas and have worked these areas all our lives and cared for the animals that exist here all our lives.

We do not hunt female or breeding animals at all; we hunt only the old males/old bulls.

Best regards

Nixon Dzingai (pictured below)

Re: 60 day notice of intent to sue for failure and refusal to process elephant trophy import permit applications.

Dear Ladies and Gentlemen:

This is a 60-day Notice of Intent to Sue under the Endangered Species Act, 16 U.S.C. Sec. 1531 et seq. ("ESA"), for failure and refusal to process elephant trophy import permit applications in violation of the Administrative Procedures Act, 5 U.S.C Sec. 553 et seq. ("APA"), the Rules and Regulations of the Department implementing the ESA, *see* 50 CFR Part 17, the Special ESA Elephant Regulations, 50 CFR 17.40, regulations implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora, Mar. 3, 1973, 27 U.S.T. 1087 (hereinafter "CITES"), *see* 50 CFR Part 23, and the general permitting regulations of the United States Fish and Wildlife Service ("USF&WS" or "Service"), *see* 50 CFR Part 13.

This notice is on behalf of Dallas Safari Club ("DSC"), their members who desire to engage in trophy sport hunting of African elephants, outstanding elephant trophy import applicants, DSC conservation partners, including Sango Safaris, the Namibia Ministry of Environment and Tourism, the Namibian Association of CBNRM Support Organisations ("NASCO"), and the individual permit applicants set forth on Attachment A to this letter.

The African elephant (*Loxodonta africana*) is listed as threatened under the ESA and is regulated under an ESA section 4(d) special rule [50 CFR 17.40(e)]. The 4(d) special rule lists the requirements for the import of sport-hunted trophies. Under paragraph 17.40(e)(6)(i)(B), for the USF&WS to issue a threatened species permit under 50 CFR 17.32, authorizing the import of a sport-hunted elephant trophy, the Service must make a determination that the killing of the trophy animal will enhance the survival of the species.

Pursuant to the APA, the Service is required to process these permit applications and make a decision on them within a reasonable time. 5 USC 558(c). 50 CFR 13.11 provides

that permit applications will be processed "as soon as possible." And 5 USC 706 provides for judicial review of "agency action unlawfully withheld or unreasonably delayed." Moreover, the delay is denial without appeal in violation of 50 CFR 13.29 or judicial review, *see* APA section 706. The delay also conflicts with the duty the Service has under the ESA to recover the listed species and the enhancement that the permitting would encourage, thus violating 16 U.S.C. 1533(f) and 16 U.S.C. 1540.

A "hold" has been put on the processing of all elephant trophy import permit applications since November 2017 after President Trump issued two "tweets" on 17 and 19 November 2017 on his Twitter account @realDonaldTrump. The effect of this hold following the President's tweets has been to injure conservation efforts designed to protect the African elephant. This hold is further injurious to the people of the countries the elephants inhabit as the local population benefits from controlled sport hunting of elephants, a fact the Service has previously acknowledged.

Although positive enhancement determinations for Zambia and Zimbabwe were made immediately before the "hold" in November 2017, Namibia and the Republic of South Africa enhancement findings were neither new nor disputed. The positive enhancement determination for Zambia had not been suspended. By any standard, the countries of Botswana, Namibia, South Africa, Tanzania, Zambia and Zimbabwe have done nothing to deserve this mistreatment, and breach of treaty, law and regulations. A "tweet" is not a proper rule making. Moreover, this hold has been extended to all elephant trophy imports including from countries where the Service had longstanding positive enhancement findings that were the "gold" standard.

Subsequently, on March 1, 2018[1], the Service issued a memorandum in response to the D.C. Circuit Court's opinion in *Safari Club Intl., v. Zinke*, 878 F.3d 316 (D.C. Cir., 2017) which withdrew enhancement findings, including the enhancement findings for Zambia and Zimbabwe, and stated that

> All of the above referenced findings are no longer effective for making individual permit determinations for imports of those sport-hunted ESA-listed species. However, the Service intends to use the information cited in these findings and contained in its files as appropriate, in addition to the information it receives and has available when it receives each application, to evaluate individual permit applications. The Service is continuing to monitor the status and management of these species in their range countries. At this time, when the Service processes these permit applications, the Service intends to do so on an individual basis, including making ESA enhancement determinations, and CITES non-detriment determinations when required, for each application. The Service intends to grant or deny permits to import a sport-hunted trophy on a case-by-case basis pursuant to its authorities under the ESA and CITES.

[1] https://www.fws.gov/international/pdf/memo-withdrawal-of-certain-findings-ESA-listed-species-sport-hunted-trophies.pdf

> As part of the permitting process, the Service reviews each application received for import of such trophies and evaluates the information provided in the application as well as other information available to the Service as to the status of and management program for the species or population to ensure that the program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized.

This determination was not made as the result of the rule making proceeding ordered by the court in *Safari Club Intl. v. Zinke,* and would appear directly inconsistent with the court's opinion. Nonetheless, despite the statements contained in the Service's March 1, 2018, memorandum, all elephant import permits have remained on "hold." This is true for pre-act elephant trophies and renewal applications for elephant trophy import permits predating the "hold." The Service is not processing elephant import permits on a case by case basis or on any basis whatsoever. This lack of action is contrary to the law and applicable regulations.

The Service is unlawfully employing the "hold" on elephant trophy import permitting to elephant trophy imports from all countries, and even to the simple renewal of elephant import permits and to pre-act elephant trophies. The "hold" has been applied unlawfully to the detriment of the very best and most successful elephant management programs in Africa. The broadly applied "hold "was not a duly noticed and made rule making, was arbitrary, capricious and irrational, and greatly threatens the elephant and range nation programs the ESA and CITES aim to encourage and enhance. Indeed, the "hold" jeopardizes and obstructs years of conservation activities in Southern and a substantial part of Eastern Africa.

Tanzania, Zambia, Zimbabwe, Mozambique, Botswana, Namibia and South Africa hold an estimated 340,000 elephants out of a continental total of 415,000, i.e. 82 per cent of the elephants of Africa. The conservation success of these countries is linked to policies incorporating sustainable use of natural resources, based on science and aiming at improving livelihoods of rural communities while maintaining vast tracts of unspoiled habitat and ecosystems.

The tolerance by the rural citizens of Southern and Eastern Africa of elephants is increased through hunting revenue sharing systems in place throughout the region. The presence of substantial herds of elephants risk serious devastation of the crops on which the rural African population depend. Without the revenue generated by sport trophy hunting, the population would view the elephant more as pests than as a natural resource. Moreover, overpopulation of elephant threatens the habitat of other threatened species. *See* Statement of Sango Safaris, Attachment B.

The "hold' obstructs 70 per cent of the revenue of the Community Conservancy Program in Namibia. All tourist safari hunting of elephant occurs in community

conservancy areas. Likewise the hold obstructs the same percentage of the revenue of the 700,000 families which depend on the CAMPFIRE Program in Zimbabwe. The "hold" undermines the community Wildlife Management Areas in Tanzania that are intended to provide incentivizing livelihoods to rural communities and to act as corridors for elephant and other species between protected areas. The "hold" obstructs the community program in Zambia which largely relies upon tourist safari elephant hunting. The "hold" largely blocks the developing elephant conservation strategy in Botswana that recently has lifted the suspension of tourist safari hunting. Tourist safari elephant hunting had previously been 70 per cent of community revenue in that country.

Therefore, the "hold" is jeopardizing conservation efforts in these countries and threatens the livelihood of more than one million persons and the biodiversity of millions of hectares of pristine wilderness. Without the management and revenues from tourism hunting, these lands are being encroached and converted to agro-pastoral land, leading to the unavoidable extinction of wildlife and natural habitats, and the collapse of ecosystem services.

The successful elephant conservation as well as the control of poaching largely depend upon the sustainable use conservation strategy in the form of elephant tourist safari hunting in each of these countries. The elephant populations and programs in these countries cannot be sustained without the revenue generated by safari hunting and U.S. import of the trophies; hence the "hold" is *the* major threat to the survival of the largest remaining elephant populations in Africa. Hundreds of thousands of elephants are in jeopardy and more than a million families are being deprived of the realization of their single most valuable natural resource because of this illegal "hold."

Finally, tourist safari hunting of elephant is governed by sound administrative systems in all countries that include scientific based quotas supported by CITES non-detriment findings, law enforcement largely funded or carried out by safari hunting operators on the largest share of wild habitat, regulatory permitting, and community-based conservation programs, most of which was supported by over one-hundred million dollars of USAID funding because of its conservation and humanitarian merit.

In conclusion, on behalf of DSC, its members, outstanding elephant trophy import applicants, and DSC conservation partners, and for the reasons stated in this notification, we intend to sue under the Endangered Species Act for failure and refusal to process elephant trophy import permit applications.

Respectfully,

Scott Tobermann
DSC President

Attachment B

STATEMENT OF SANGO SAFARIS OF SAVE VALLEY SAFARIS, ZIMBABWE

Sango Safaris represents a 60,000 hectare property, situated within the Save Valley Conservancy ("SVC") in the South Eastern Lowveld of Zimbabwe.

The annual 2018 aerial survey, carried out every September/October for the past 20 some years showed a population of 665 elephant on Sango last year. As an average in recent years we have from 600 to over 900 elephants on Sango at any given moment. Our ecologically established carrying capacity ranges between 200 to 300 elephants. Therefore, we have at any given moment between 400 to 700 too many elephants on Sango with devastating destruction not only to the food base of the species causing the destruction but with dire consequences for all other plains game animals.

For example the Elephants' destruction as well as decreasing rains have resulted in our zebra and wildebeest herds dropping from 1,500 to 2,000 to around 600 of each species today. Similar numbers are experienced for all other grazers. Aerial Survey numbers for elephants on Sango since 2009 are as follows:

No. Elephants	Year
654	2009
462	2010
393	2012
648	2013
474	2014
497	2015
949	2016
684	2017
665	2018

The latter shows a current density of 1.1 elephant per square kilometer, whilst the recommended density is 0.2-0.3 per square kilometer for the dry Savanna areas we occupy.

The continued high density of elephant has and is having a very negative affect on Sango's habitats. For example the baobab trees of which we have an abundance are often hundreds if not thousands of years old. Approximately 90 per cent of all of our baobab trees are now suffering damaged by elephants. If this remains unaddressed Sango will have lost all its baobab trees in a matter of a few years.

Sango practices "sustainable utilization" and is proactive in the use of its excess animals, which income funds our further conservation efforts. To this end, Sango moved 100 live elephants to reduce their numbers and to help restock the Zimbabwe National Parks area in 2018. Such translocation solutions do not exist regularly as most national parks and private conservancies within a survivable translocation distance from Sango are overstocked with elephants as well.

The annual elephant hunting quota amounts to three older bulls for Sango and seven in total for the SVC. All funds generated from hunting flow fully towards running, protecting and maintaining the property and specifically its wildlife assets and the underlying habitats. This includes employment for 135 local people (44 of whom are anti-poaching scouts) provision of water for wildlife, fire breaks, road and infrastructure maintenance and a full time ecologist.

Sango forms the largest single property within the SVC. The most recent SVC elephant numbers are from a 2017 Aerial survey, (2,390 km2 of operating properties) and showed that SVC was home to 2038 elephants. This is an average of 0.85 elephant per km2 when the recommended density is 0,2-0,3 Km2. As per above formula this implies that we have approximately 1,500 elephants too many. However, we believe that the total elephant population in the SVC amounts presently to some 2,500 animals.

Elephant safaris bring in between $60 - 70,000 for each elephant. WWF recommends a trophy hunting quota of 0.75 per cent of an elephant population whilst we are not even hunting half of that quota. So the SVC and its members are prejudiced of a potential $420-720 thousand that can be used for conservation. This negatively affects, employment of local people, water pumping, fire break maintenance, etc. Our highly successful rhino anti-poaching efforts cost about $500-600,000 per year. Under the most adverse conditions we have grown our rhino population from some 42 animals in the mid 1990's to about 190 today.

If the hunting income is thus disallowed from sustainably using our elephant population, we would no longer be able to fund the protection of our highly endangered rhinos. Is there anything more proactive in conservation than using the income from one species present in excessive numbers to protect another which is highly endangered? By denying the importation of trophies into the USA major income is no longer available for the protection of endangered and highly endangered species. Our poachers would welcome this action by the US Government; we highly successful conservationist do not.

To: permits@conservationforce.com, r(b) (6)

Steven,

On 03/30/2018 an applicaon f or the importaon of an Afric an Elephant, sport hunted trophy was received by this office **Prt # 84788C**. At the me of the applic aon's submission the hunt was to be held at a future date.

Please confirm at this me if y ou successfully hunted the elephant. If **yes**, please state so, and provide the date and locaon the elephan t was taken.

If **no**, do wish to withdraw your applicaon a t this me?

Please confirm the current status.

****Please note the permit that was applied for was for a specific locaon, and dat e. Permit applicaons and f ees are not transferable to another hunt, and so if you have scheduled a different hunt, you must submit a new applicaon.*

Thank you,

Tim Mac Donald

Ms. Brisendine:

The document attached is to be included as supplement to all original import permit applications filed with the U.S. Fish and Wildlife Service listed above.

Since filing these applications we have received additional documentation of conservation efforts for elephants in Zimbabwe that further detail the elephant populations as stable and growing. The CAMPFIRE document strongly argues the importance of trophy imports and the

value that they provide to communities in Zimbabwe through income flows from tourism and hunting which serve to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat.

The Campfire document details the drastic effects that COVID-19 has had and is having on Zimbabwe's tourism and hunting market, which is in a state of collapse. It is leaving the country uncertain of how wild-life and anti-poaching programs will be supported on the ground in the coming months. This information can be used to predict what might transpire if trophy hunting and imports were to cease to exist and the tragic outcome it could have on the conservation efforts of wildlife in the area.

We ask that you please consider these documents when making your decision on enhancement in each import permit application.

Please feel free to contact me if you have any questions regarding this mater.

Cordially,

Aimee Korver
Permits Paralegal

1. CAMPFIRE communities Concern on Import Bans

Open Letter to the United States Fish and Wildlife Service

Dear Dr Mary Cogliano

CAMPFIRE Communities Concern on Import Bans

CA/MPFIRE Association, otherwise known as the Community Areas Management Program for Indigenous Resources in Zimbabwe wishes to register its opposition to continuing campigns for the banning of trophy imports. We are fully aware that the general outrage in both print and social media against sport hunting, which many distant voices refer to as unethical, is aimed at influencing policy action by importing countires.. These arguments, none of which are supported by science, are based on a perfected art of global misinformation and do not represent the views of rural communities who live side by side with wildlife. To us as a people with substantial wildlife populations, trophy hunting is indispensable for conservation and rural livelihoods.

Zimbabwe has one of the most resilient and successful conservation programs in Africa. Its conservation efforts have historically enabled local communities to thrive on sustainable livelihoods in biodiversity-rich landscapes. At least 800 000 households or 2.5 million people (out of a national population of 16 million) benefit directly and indirectly from the sustainable use of wildlife and tourism related investments in their areas. However, our ever growing elephant population has increased the levels of conflict between humans and wildlife in recent years, which, together with recurrent droughts that threaten food security, have made traditional livelihoods more difficult, especially for subsistence farming communities that live in the wildlife rich areas of the country.

Communities in CAMPFIRE areas reside in an environment where conflict between humans and wildlife is common, as both compete for the limited available land and water resources. But this comes at a high price: people in Zimbabwe are paying with their lives for tolerating wild animals in their areas. As recently as 23rd March 2020, Barnabas Mwinga, a 50 year old man, was killed by an elephant in his field in front of his wife and young daughter in Gonono Ward, Mbire District. He is one of seven other people that have needlessly lost their lives to wildlife attacks throughout the country since the beginning of 2020, in addition to the 41 killed in 2019. Yet despite this high cost, wildlife is still highly valued by rural communities who continue to tolerate massive crop destruction and livestock losses from wildlife without compensation. For example, elephant poaching in Mbire District where Barnabas Mwinga was recently killed has gone down from a peak of 40 in 2010 to only 3 elephants poached in 2019 (Figure 1). The decline in poaching incidents is a result of collaborative efforts between the Safari Operator and the hunting clients who invest nearly $100,000 annually into an anti-poaching unit.

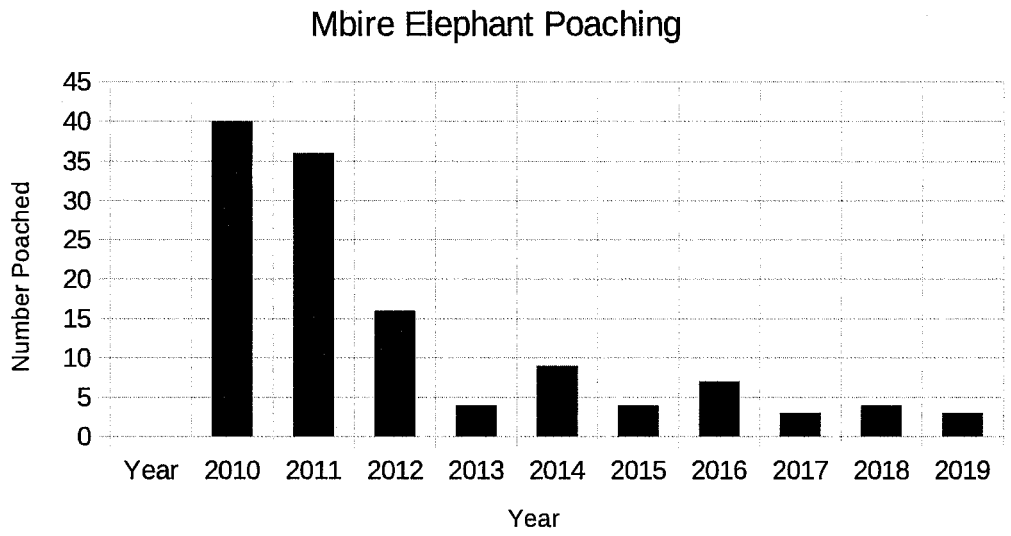

Figure 1: Mbire Elephant Poaching Trends (Source – Mbire Rural District Council)

The aim of the CAMPFIRE programme is to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat. For nearly 30 years, trophy hunting, which relies heavily on the American market, has been cautiously implemented in the absence of other tourism opportunities to achieve this goal. Not only has it resulted in increasing food and livelihood security of rural people, it has also played a role in undermining the drivers of poaching and mitigating human and wildlife conflict. The net impact is seen in securing wildlife habitat and assisting in the regeneration of degraded landscapes.

The financial resources to succeed with this programme in CAMPFIRE areas are heavily dependent on the sustainable hunting of big game, especially elephants. The monies generated from these activities finance the local economies, social services as well as anti-poaching efforts and wildlife management at the District and Ward levels. For example, as can be seen from Table 1 below, the total number of elephants hunted as trophies over nine years is 807 out of a cumulative quota of 1381, from an estimated national population of 83,000 elephants. Hunting quotas are set at no more than 0.5% of the population estimate compared to an elephant population growth of 5% to 6% annually. The levels of off-take (58%) also demonstrate that while hunting is based on controlled numbers for each species annually, it is not uncommon for a client to pay for a full hunt and enjoy the wild experience, but not take a trophy. It is also important to note that communities do not view international hunting clients just as tourists, but as vital conservation partners.

Table 1: Trophy Hunting Quota Summary and Income: 2010-2018

Source: *The Role of Trophy Hunting of Elephant in Support of the Zimbabwe CAMPFIRE Program: Vernon Booth* (in progress).

District and Ward-level institutions in the CAMPFIRE areas rely on income from hunting to provide significant local livelihood benefits (income, jobs, skills) and social services (schools, clinics, irrigation schemes, boreholes) in remote regions where agriculture is marginal and there are very few jobs or other sources of cash income. Table 2 and Table 3 below summarise the impact of pre- and post-elephant trophy import suspension expenditure on the CAMPFIRE programme at the District and Ward level. The District administration costs absorb 89% of the budget with 30% devoted to law enforcement. With the suspension of elephant trophy imports to the USA and Europe in 2016, expenditure on law enforcement dropped from 33% to 9% as a result of District administration having to offset the human and wildlife costs which increased from 1% to 33%. At the Ward level, 46% of the budget is allocated to administration and 54% to community benefits (45% devoted to social services, Table 3).

Table 2: District level expenditure on administration and community benefits: 2010-2018

	Administration			**Community Benefits**			
All District Expenditure	**Administration**	**Law Enforcement**	**Management**	**Assistance to Wildlife Victims**	**Social Services**	**Total**	**Average/ year**

With growing awareness from several years of CAMPFIRE implementation, communities have been demanding their rightful place in the management of wildlife resources for their own benefit. To accommodate this, CAMPFIRE has undergone a review of its policy framework to enable communities to reap greater and more tangible benefits from living in harmony with nature. A key aspect of this review is to establish Community Conservancies that redefine ways in which communities can benefit more from wildlife and other income generation opportunities, as well as the mitigation of human and wildlife conflict. This initiative is being directed under the Global Environment Facility (GEF) 5 and 6 cycles covering five districts with the aim of developing innovative ways to improve the management of wildlife for the benefit or rural people. If trophy hunting and trade here was stopped, the impact on local livelihood would be severe, and both poaching and changes to alternative land use would increase. Non-consumptive tourism currently plays virtually no positive conservation role in the CAMPFIRE areas (<4% of overall income is generated through tourism). Instead of banning the import of trophies, more international oversight and support is needed from importing states, and of in-country CITES controls, to ensure sound sustainable management e.g. quota-setting, permit allocation, independent population surveys; building robust, equitable and transparent benefit allocation mechanisms at local level, particularly where communities have elected to invest their land and time in Community Conservancies.

STOP PRESS: The pressure for imports bans comes at the worst possible time as the Covid-19 pandemic has severely disrupted income flows from tourism and hunting. The collapse of both markets leaves rural people and safari operators with virtually no income, and it is uncertain how wildlife protection and anti-poaching programs will be supported on the ground in the coming months. What remains clear is that trophy import bans will seriously undermine conservation in Zimbabwe, and indeed open floodgates for rural people to destroy wildlife and wildlife habitat through conversion of land for other subsistence uses, even if unviable.

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name		1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
SATTAR		TARIQ		
2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address	
(b) (6)				

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
EDMOND	OK	73012	OKLAHOMA	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2 f.Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount identified on page 2, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* [50 CFR 13.11(d)]

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

TARIQ SATTAR, (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   LOXODONTA AFRICANA

   b. Sex (if known).
   MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   AREA: GWAI I SMALL SCALE FARMERS ASSOCIATION
   LOCATION STATS: S19*12,583 E027*49,331
   NEAREST CITY; BULAWAYO

   b. Date wildlife was hunted:
   3/30/2016

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

WAYNE VAN DEN BERGH (PH & OUTFITTER)
NYAMAZANA SAFARIS
BULLAWAYO, ZIMBABWE

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

TAXIDERMY ENTERPRISES
4 JOSIAH CHINAMANO ROAD
BELMONTY BULAWAYO, ZIMBABWE

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: TAXIDERMY ENTERPRISES
Business Name: MARINA BURGESS
Address: 4 JOSIAH CHINAMANO ROAD
City: BELMONT
State/Province: BULAWAYO
Country, Postal Code: ZIMBABWE

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

POPULATION IS GROWING

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

BULK OF THE FUNDS WERE PAID TO THE LOCAL COMMUNITY TO SUPPORT AND IMPROVE LOCAL LIVING CONDITIONS AND ENHANCE LEGAL HUNTING ACTIVITES.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

N/A

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature (b) (6) Date: 3/15/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if I the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982.

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
GARDNER	RICHARD		
2. Date of Birth (mm/dd/yyyy) (b) (6) [redacted]	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address MATT@GEMSLOGISTICS.CO.

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
RENO	NV	89511		US
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount identified on page 2, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* [50 CFR 13.11(d)]

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

GENUS LOGISTICS INC.
161-15 Rockaway Blvd st 205
Jamaica NY 11434

SASE FEDEX INCL.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

MATT MAYERS 718-790-0816 MATT@GENUSLOGISTICS.COM

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   b. Sex (if known). LOXODONTA AFRICANA, ELEPHANT, MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

SOUTH AFRICA, NGOTSHE, KWAZULU-NATAL

   b. Date wildlife was hunted: 5/22/2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

C. P. ALBERTS

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

LIFE FORM TAXIDERMY
7 ALUMINUM RD BOX 763
WHITE RIVER
SOUTH AFRICA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: LIFE FORM TAXIDERMY
Address: 7 ALUMINUM RD
City: BOX 763
State/Province:
Country, Postal Code: WHITE RIVER
SOUTH AFRICA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

—

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

—

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

—

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: 4/4/18

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

CUSTOMS POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS. That, Richard M. Gardner (Full Name)

Residing at, (b) (6) [redacted] Reno, NV 89511

hereby constitutes and appoints each of the following persons Matthew Mayers dba Genus Logistics

may act through any of its offices or any employees with Power of Attorney on file with this licensed broker as required by the Regional Commission of Customs as a true and lawful agent and attorney of the grantor named above for and in the name, place, steed of said grantor from this date and in all Customs Districts, and in no other name, to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandize shipped or cosigned by or to said grantor; to perform any act or condition which may be required by law or regulation in connection with such merchandize; to receive any merchandize deliverable to said grantor:

To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make, sign, declare, or swear to any statement, supplemental statement, schedule,, supplemental schedule, certificate of delivery, certificate of manufacture, certificate, and delivery abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filling in any customs district.

To sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owners declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise:

To sign and swear to any document, and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated said grantor.

To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantors name drawn on the Treasurer of the United States, if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor.

And generally to transact at the customhouses in said district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930. In which said grantor is or may or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents, the forgoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of customs of the district aforesaid. If the donor of this power of attorney is a partnership, the said the power shall in no case have any force or effect after the expiration of 2 years from the date of its execution.

Pursuant to 19 CFR 111.36(a), election is made waiving the right to receive invoices, supporting documents and correspondences from Matthew Mayers dba Genus Logistics, who is directed to forward all documents and inquiries concerning our imports to their customs brokerage services, to our freight forwarder, who will pay Matthew Mayers dba Genus Logistics, for duties, and services performed on our behalf. It is understood the right to revoke said waiver is continuing.

TERMS AND CONDITIONS UNDER WHICH THIS PERMIT IS ISSUED

1. It is valid only:
   (i) from : 18 May 2017
   to : 31 August 2017
   (ii) in the original
   (iii) if all 3 pages are signed by the permit holder named above
   (iv) to the permit holder named above
2. By signing the permit or licence the holder accepts, and agrees to comply with the conditions under which it is issued.
3. This permit is not transferable
4. Any unauthorised alteration to this permit shall render it invalid
5. This permit/certificate is subject to the provisions of any applicable law in force during the period of validity of the permit/certificate
6. This permit is valid only within the province where it was issued
7. The holder of the permit shall, at the request of a person authorised in terms of applicable legislation so to demand, forthwith produce such permit to such person.
8. This permit shall be invalid until such time that it is signed by the permit holder.
9. This permit shall be deemed invalid if it is lost or destroyed and no copy thereof shall be issued.
10. This permit may be withdrawn by an authorised person if the execution of any activity may be detrimental to the welfare of any wild animal or the safety of any person, provided that the permit holder is given notice of such intention and be granted the opportunity to appeal to such withdrawal.
11. The prescribed fee payable for the issuing of this permit shall not be refunded.
12. If the holder of this permit contravenes or fails to comply with any condition or requirement to which this permit is subject, he or she shall be guilty of an offence.
13. This permit shall be subject to any applicable norms and standards in existence at the time of issuance of this permit.

Please read the Terms and Conditions under which this Permit is issued

EZEMVELO KZN WILDLIFE

14. The issuing authority shall determine the species and restricted activities for which this permit will apply.

15. If this permit applies to hunting, the holder of this permit must: a. Have a copy of this permit authorising the hunt, on his or her person during the hunt: b. Within 21 days after the hunt, furnish the issuing authority with a written return on the hunt stating: i) the permit number and date of issuance of the permit ii) the species, sex and number of animals hunted; and iii) the location where the hunt took place.

16. Return the original permit to the issuing authority forthwith after expiry of the permit.

17. The holder of this permit may also allow the holder of a Special Game Licence to hunt the game shown herein during the Closed Season. However if this permit applies to a specimen listed in the Threatened or Protected Regulations the person hunting the animal must also be in possession of a permit issued by Ezemvelo KZN Wildlife to enable the hunting to take place.

18. The holder of this permit may also allow the holder of a relevant Game Licence to hunt the game shown herein. However if this permit applies to a specimen listed in the Threatened or Protected Regulations the person hunting the animal must also be in possession of a permit issued by Ezemvelo KZN Wildlife to enable the hunting to take place.

19. The attached return of the hunting permit must be completed by the holder. The completed permit to be returned to the Chief Executive, E KZN Wildlife, P O Box 13053 Cascades, 3202 or emailed to permits@kznwildlife.com upon expiry. Failure to comply with this condition may jeopardise the issue of future permits.

20. Should the hunt be successful the client must produce a copy of a valid CITES import permit before an export permit will be issued.

21. All elephant ivory which is part of a trophy hunted by a client, whether South African or foreign, must be marked in accordance with the CITES requirements PRIOR to the tusks leaving the province. Failure to comply with this requirement might result in the tusks being brought back, at the Hunting Outfitters expense, to have the tusks marked.

Subject: [EXTERNAL] No ce of Representa on for Permit # 85588C

Ms. Nelson,
Please find the attached Notice of Representation for applicant, Richard Gardener.
Mr. Gardener hunted an Elephant in South Africa, Permit # 85588C. I believe this permit may have been issued- and i am not sure that you are aware that a portion of his trophy did not get shipped.
Please let me know the status of this application.
Please let me know that you have received these documents and if you have any questions.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

GENUS LOGISTICS INC.
161-15 Rockaway Blvd st 205
Jamaica NY 11434

SASE / FEDEX

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

MATT MAYERS 718-790-0216 MATT@GENUSLOGISTICS.COM

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   b. Sex (if known). LOXODONTA AFRICANA, ~~ELEPHANT~~, MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   NAMIBIA, BWABWATA EAST CONCESSION

   b. Date wildlife was hunted:

   10/15/2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

FRED BEZUIDENHOUT

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

NDUMO LODGE
KALEMBEZA REGION
KATIMA MULILO
NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: FRED BEZUIDENHOUT
Business Name: Ndumo Lodge
Address: Kalemberza Region
City: Katima Mulilo
State/Province:
Country, Postal Code: NAMIBIA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

—

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

—

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

—

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: 3/28/18

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if I the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982.

BELOW IS A POWER OF ATTORNEY FORM WHICH IS REQUIRED BY U.S. CUSTOMS, TO ALLOW US TO TRANSACT U.S. CUSTOMS CLEARANCE ON YOUR BEHALF.

Department of the Treasury
Individual U.S. Customs Service Individual IRS / SS # (b) (6) [redacted]
Partnership 141.32. C.R.
___ Sole Proprietorship

___ Individual
___ Partnership
___ Corporation

CUSTOMS POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS: That, Joel Ryan Swan (Full Name of person, partnership, corporation, or sole proprietorship (identify)) a corporation doing business under the laws of the State of, Texas or a _____ doing business as _____ residing at (b) (6) [redacted] Lubbock, TX 79407 having an office and place of business at _____ hereby constitutes and appoints each of the following persons _____ Genus Logistics Inc._____ may act through any of its offices or any employees with Power of Attorney on file with this licensed broker as required by the Regional Commission of Customs as a true and lawful agent and attorney of the grantor named above for and in the name, place, steed of said grantor from this date and in all Customs Districts, and in no other name, to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandize shipped or consigned by or to said grantor; to perform any act or condition which may be required by law or regulation in connection with such merchandize; to receive any merchandize deliverable to said grantor: To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make, sign, declare, or swear to any statement, supplemental statement, schedule,, supplemental schedule, certificate of delivery, certificate of manufacture, certificate, and delivery abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filling in any customs district. To sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owners declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise: To sign and swear to any document, and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated said grantor. To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantors name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor. And generally to transact at the customhouses in said district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930. In which said grantor is or may or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents; the forgoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of customs of the district aforesaid. If the donor of this power of attorney is a partnership, the said the power shall in no case have any force or effect after the expiration of 2 years from the date of its execution. Or until revoked. Pursuant to 19 CFR 111.36(a), election is made waiving the right to receive invoices, supporting documents and correspondences from Genus Logistics Inc., who is directed to forward all documents and inquiries concerning our imports to their customs brokerage services, to our freight forwarder, who will pay Genus Logistics Inc., for duties, and services performed on our behalf. It is understood the right to revoke said waiver is continuing.

IN WITNESS WHERE OF, the said (Print name) Joel Swan
has caused these presents to be sealed and signed:

Attn: Anna Barry
RE: PRT- MA85607C-0 Joel Ryan Swan

Dear Anna;

We refer to the above referenced permit application for an elephant that was submitted on 4/10/18.

The permit application that was originally submitted did not contain answers to question 9 parts a, b and c. We have obtained the information and wish to submit it and have it incorporated into the original application under consideration.

9a. A population study was recently completed by the Ministry of Environment and Tourism. Their findings were that the population of elephants in 1975 was 7,500 and in 2017 the population was 22,700 which represents an annual growth of 4.5%. Additionally, the report estimated that the country can only support 22,000 elephants. Overpopulation will result in destruction of habitat and more conflicts with humans. Therefore the population will support the hunting that is being done and will even require additional relocation efforts or hunting to maintain recommended population levels.

9b According to the outfitter, I paid a rate of $55,000. Over 50% of the funds are reinvested into the community are to employ anti-poaching units, arm and train those units and provide employment to locals and provide water points for wildlife to utilize.

9c. The funds go to the people of the Mashi Conservancy to provide income and support the financial needs of the conservancy. The conservancy, working with the outfitter, established work programs and employment for over 25 people who otherwise would have had very little opportunity or income. These opportunities allow people to earn a living working in the safari industry versus turning to poaching and illegal hunting of all species, including elephants for revenue.

Hopefully, with this additional information, you will be able to process and approve the permit application. Should you need additional information, please contact the undersigned.

Sincerely,

John Rulon CHB

U.S. Customs Services 141.32 C.R.

CUSTOMS POWER OF ATTORNEY

SS# (b) (6) [redacted]

Cell Phone (b) (6) [redacted]

Email address (b) (6) [redacted]

x Individual

KNOW ALL MEN BY THESE PRESENTS: That x Joel Ryan Swan (Full Name of Person), residing at x (b) (6) [redacted] Brady, TX 76825 hereby constitutes and appoints each of the following persons - John Rulon CHB may act through any of its offices or any employees with Power of Attorney on file with this licensed broker as required by the Regional Commission of Customs as a true and lawful agent and attorney of the grantor named above for and in the name, place, steed of said grantor from this date and in all Customs Districts, and in no other name, to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandise shipped or consigned by or to said grantor; to perform any act or condition which may be required by law or regulation in connection with such merchandise; to receive any merchandise deliverable to said grantor: To make endorsements on bills of lading conferring authority to transfer title, make entry on collect drawback, and to make, sign, declare, or swear to any statement, supplemental statement, schedule,, supplemental schedule, certificate of delivery, certificate of manufacture, certificate, and delivery abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district. To sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owners declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise: To sign and swear to any document, and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated said grantor. To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantors name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor. And generally to transact at the customhouses in said district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930. In which said grantor is or may or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents; the forgoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of customs of the district aforesaid. If the donor of this power of attorney is a partnership, the said the power shall in no case have any force or effect after the expiration of 2 years from the date of its execution. Or until revoked. Pursuant to 19 CFR 111.36(a), election is made waiving the right to receive invoices, supporting documents and correspondences from John Rulon CHB , who is directed to forward all documents and inquiries concerning our imports to their customs brokerage services, to our freight forwarder, who will pay John Rulon CHB, for duties, and services performed on our behalf. It is understood the right to revoke said waiver is continuing.

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if I the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982

IN WITNESS WHERE OF, the said (Print name) x Joel Swan has caused these presents to be sealed and signed:

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Roger Knight (b) (6) [redacted]

(b) (6) [redacted]

(Lowercase J)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   b. Sex (if known). Family: Elephantidae order: proboscidea order: loxodonta africana male common: Elephant

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   Save Valley conservancy, Sango province: Masvingo nearest town Masvingo

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   Zambezi Hunters w/ P.H. Ian Bachelor

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: Trophy Consultants International
Address: 4 Josiah Chinamano rd
City: Belmont
State/Province: Bulawayo
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

no

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: [redacted] Date: 3/31/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

To: (b)(6)

Dear Roger,

U.S. Fish and Wildlife Service Prt 85759C

On 04/13/2018 an applicaon f or the importaon of an Afric an Elephant, sport hunted trophy was received by this office **Prt # 85759C**. At the me of the applic aon' s submission the hunt was to be held at a future date.

Please confirm at this me if y ou successfully hunted the elephant. If **yes**, please state so, and provide the date and locaon the elephan t was taken.

If **no**, do wish to withdraw your applicaon a t this me?

Please confirm the current status.

****Please note the permit that was applied for was for a specific locaon, and dat e. Permit applicaons and f ees are not transferable to another hunt, and so if you have scheduled a different hunt, you must submit a new applicaon.*

Thank you,

Tim Mac Donald

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Stevens	Danny	SHANE	

2. (b) (6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Austin	TX	78732	TRAVIS	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* [50 CFR 13.11(d)]

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6) [redacted] 04/10/2018

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

(b) (6) [redacted]

Austin, TX 78732

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

SHANE STEVENS

(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

X No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A Not Applicable.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
      Savanna or African Bush Elephant (Loxodonta africana)
   b. Sex (if known). Male or Bull Elephant

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

      Country- Zimbabwe
      Place- Beitbridge East (Rural District Council Concession- CAMPFIRE)
      Region- Matabeleland South
      Nearest City- Beitbridge

   b. Date wildlife is to be hunted:

      May 4th 2018 - May 18th 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

      Zimbabwe Outfitter – Threeways Safaris

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

      N/A Not Applicable.

   b. Date wildlife was hunted:

      N/A Not Applicable.

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

N/A Not Applicable.

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

N/A Not applicable

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Elephant have not been hunted yet.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Trophy Consultants International (T.C.I.)
Business Name:
Address: 4 Josiah Chinamano Road
City: Belmont, Bulawayo
State/Province:
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Population Status: +- 300 elephants – Increasing every year.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

The income from the activity is mainly used for Law enforcement to stop poachers as well as to support the community at large.
Trophy fees are paid by the outfitter to Beitbridge Rural District Council and used to benefit the community.
All the meat from the trophy goes to feed the community.
The Safari Outfitter also donates Cattle to the community and also assist a disadvantaged school. A classroom building was built for the school and 48 Samsung Tablets were also donated recently.
The Outfitter always helps with any and all kinds of community crisis's and functions.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The Safari Outfitter supports anti-poaching units, funded by the trophy fees, in the area which greatly contributes to the conservation of the elephants in the area. Without these anti-poaching units fighting poachers and monitoring the area, the elephants in the area are at high risk of being killed or poached for illegal ivory trade.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: N/A Not Applicable Date: N/A

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) Date: 4-11-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

RE: CITES Permit no. 85995C

Danny Shane Stevens

Dear Dr. Cogliano,

As an avid hunter and outdoorsman, I want to thank you for the time you have served within FWS for the greater good of all outdoor enthusiasts. Your background and service is truly admirable. Altice Braxton referred me to you several months back and I have a challenge on deciphering the e-mail for you in that voice message. It is either marycogliano@fws.gov or so I am sending this to both in hopes you will receive my letter.

I initially submitted for a CITES ivory import permit in March or April of 2018. We received response on April 17, 2018 and the e-mail read as follows:

"***For questions please send an email directly to managementauthority@fws.gov ***

Thank you for submitting an application to the U.S. Fish and Wildlife Service. The application was received by the Division of Management Authority on 04/16/2018; check number 2062 accompanied the application for AFRICAN ELEPHANT. Your application has been assigned the following PRT identification number: MA85995C-0While processing time may be less, you should anticipate a minimum of 30 days to process your request, with many requests averaging between 60 to 90 days due to some requests which need to be published in the Federal Register and/or be reviewed by other Service offices. While we are aware that you may want to inquire about the status of your application, we request that you allow our office at least three weeks after the receipt of this notification to make any inquiries. Should you have additional information that you need to provide to our office pertaining to the current request, we ask that you call our office first at 800-358-2104 or email managementauthority@fws.gov to obtain further instructions."

We have attempted contact on a few occasions with little success and I am hoping to gain your audience. My purpose for wanting to speak with you is two fold. First, I would like to gain approval to import the elephant I harvested in Zimbabwe. Secondly, I have learned so much through the time I spent in Africa that I feel compelled to share some of my insights with you or whomever in a decision-making capacity at FWS. What I thought I knew from all I have learned about African conservation here in the US was no where close to accurate. By spending time on the ground with the landowners, locals, guides and outfitters I have completely changed my opinions on how conservation "should" be handled

in Africa. In two cases, we as Americans have done a disastrous disservice to certain wildlife populations in Africa.

First and foremost, let's look at Cheetah in Namibia. I want to preface this with the fact that I have no desire to hunt Cheetah or big cats in general. When I first arrived in Namibia, our PH requested we shoot all cheetah at first sighting. I informed him I was against hunting cheetah as they are endangered and we cannot do that. He explained to me at one point there were hundreds on his ranch. After the ban on the export of Cheetah it deemed the cheetah of no monetary value. In addition, a Cheetah coalition kills a few animals per week. To the rancher in Namibia, this represents between $1,200 and $6,000 in animal value. Ranchers across Namibia began doing what they could to eradicate them since they were a negative financial impact. In addition to hunting them, they also poison them. I think our policy needs to be evaluated on the basis of what Is best in the big picture for the cheetah population.

Secondly, lets look at Elephant. Prior to my first visit to Africa, I was against hunting elephant. That was until I went for the first time and began to understand more about the reality on the ground. The primary reason for the killing of elephants is through poaching or indiscriminate killing of them when they set foot on the farmers crops. I believe they call these PAC elephants. At one camp, they harvested 5 elephants as PAC in 10 days. As I dug into why, there reason once again is MONETARY value. The poachers can poach unchecked as the ranchers cannot afford or do not want to pay for anti-poaching units if they are not protecting a resource that benefits them financially. However, if an elephant is exportable, the value of that bull is around $30,000 and up. Approximately 5K goes to the government for the permit, 2K goes to the nearest village in which the elephant is harvested, and the rest of the money goes back to the outfitter/Rancher. That is substantial profit which is then used for anti-poaching units to PROTECT the elephants. It costs approximately $3 per person per day for an anti-poaching unit. That comes out to $750 per year per person and doing the math for a 10-person anti-poaching unit, the rancher is only looking at $7,500 per year. If the rancher has the monetary benefit, it saves all of the PAC elephants as they are then worth more than their crops and it saves a majority of the elephants from poaching due to having an anti-poaching unit. In addition, the village gets the meat from the elephant and not a single piece is wasted. The $2,000 received plus the meat gives the village enough incentive to stop shooting elephants with their small caliber weapons.

In short, I am currently of the opinion that the US policy on imports has done the EXACT OPPOSITE of its intended impact. I am open to the possibility that I have received a limited scope of information from the Ranches, locals and outfitters with whom I have been with in Africa. I would like to have a discussion regarding this if at all possible. I will be in DC Sept 21st through the 26th and would love to meet.

I can be reached on my cell at (b) (6) or simply e-mail me at (b) (6)

Sincerely,

D. Shane Stevens

Dear U.S. Fish and Wildlife Service:

This letter is to serve as a cover letter for my accompanying Federal Fish and Wildlife Permit application form 3-200-20. Also included with the form you will find one Zimbabwe Park and Wildlife Management Authority hunting permit (used in Section E –question #7), 4 pages of a 2017 Game Census for Hwange National Park and Surrounding Area – Matabeleland Branch (used in Section E – question #9-a), and one personal check #1039 for $100.00 USD as per 50 cfr 13.11 subpart B, Cities Import (includes trophies under ESA and MMPA). If you have any questions or concerns you can contact me at my home phone of (b) (6) by email at (b) (6) or by the address listed on both this cover letter and the completed permit application. The application instructions listed on pages 6 and 7 are not included with the application.

Thank you and sincerely,

(b) (6)

Steven F. Metzenbauer

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.

You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link:.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Metzenbauer	Steven	F.	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6) [redacted]			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f.Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount identified on page 2, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* [50 CFR 13.11(d)]
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.
   - N/A – See physical address in Section C – section 1a through 1f

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
   - Steven F. Metzenbauer (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No ~~Yes~~

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
      - Disambiguation – African Elephant

   b. Sex (if known).
      - Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
      - Deka Tail Safari Area
        Matabeleland North Province
        Zimbabwe
        Nearest City – Bulawayo

   b. Date wildlife is to be hunted:
      - 18 September through 27 September 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
      - Nengasha Safaris, Zimbabwe, Africa

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
      - N/A – hunt not yet taken place

   b. Date wildlife was hunted:
      - N/A – hunt not yet taken place

   c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
      - N/A – hunt not yet taken place

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
      - N/A – hunt not yet taken place

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
    - Animal has not been hunted as of yet. However, see accompanying hunting permit date stamped 16 Jan. 2018, for Deka Tail Safari Area issued by Zimbabwe National Parks and Wildlife Authority indicating **3 Elephant Bulls** on license for 2018.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Nengasha Safaris
Business Name: Nengasha Safaris
Address: 36A Townsend Road, Suburbs
City: Bulawayo
State/Province: Matabeleland
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

    a. Do you have any information regarding the population status or trend data on the species hunted?
        - Yes – Elephant numbers in this region which includes Hwange National Park and the Matetsi complex continue to increase. This increase in numbers is confirmed in the accompanying Zimbabwe "2017 Game Census for Hwange National Park and Surrounding Areas – Matatabeland Branch" 4 page report. On the tables shown on pages 3 and 4 of this report, the census dated 04-Oct-2017 showed 23,631 Elephants for 2017 as compared to 21,613 in 2016. With regards to Deka Tail Safaris Area in particular, the area has very good water supplies in forms of dams, rivers, and boreholes. During the dry season, large numbers of Elephants build up in this area leading to considerable pressure on water supplies and habitant destruction.

    b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by the landowner, community, or government?
        - The trophy fee is by the Safaris Operator. The fee charges are $16,000.00 USD. A percentage of this fee is paid by the operator to Zimbabwe National Parks in the form of concession fees and trophy fees. Nengasha Safaris works closely with the National Park authorities mainly through their Sinamatella Offices. A good relationship has been established and the National Parks provide at least one and often two anti-poaching teams to operate in the Deka Tail Area at any one time in reducing levels of poaching in the safaris area.

    c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
        - Nengasha Safaris raises funds from client payments in the form of the trophy fees and daily rates. A large percentage of these funds are used in the concession practices including:
            - A full time anti-poaching team with a dedicated vehicle and manger.
            - Maintaining roads and firebreaks through the Safaris Area.

- Nengasha Safaris also assists in providing fuel to the National Parks which is used to deploy anti-poaching teams both in the Park and the Safaris Area.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: N/A Date: N/A

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature (b) (6) Date: 04/10/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

ORIGINAL
VALID AS AUTHORITY TO HUNT

ZIMBABWE PARKS AND WILDLIFE MANAGEMENT AUTHORITY
HUNTING PERMIT
PARKS AND WILDLIFE ACT [*CHAPTER 20:14*]

Permission is hereby granted on the authority of the Minister of Environment and Natural Resources Management in terms of the Parks and Wildlife Act [*Chapter 20:14*],

to ..... Nengasha Safaris .....

of ..... Deka Tail .....

and co-hunter .....

of .....

Firstly to hunt in Hunt Number or Section ..... Deka Tail ..... of the ..... Mat North .....

..... Area, such number of animals as is indicated in column "A" below against the name of the animals specified. Such hunting shall be conducted during the period extending between 01-01-18

and 31-12-18

Animal	A	B	Animal	A	B	Animal	A	B
Baboon		20	Guinea fowl		150	Pigeons/ Doves		150
Buffalo (m)		6	Girraffe (m)		1	Porcupine		2
Bushbuck m		3	Impala(f)		10	S. Hyena (m)		3
Bushig		2	Impala(m)		10	Sandgrouse		50
Civet		1	Jackal		2	Serval		1
Duiker (m)		3	Klipspringer (m)		3	Waterbuck (m)		1
Elephant (m)		3	Kudu (f)		3	Warthog (m)		4
Francolin		150	Kudu (m)		8	Wildcat		2
Genet		2	Leopard (m)		1	XXXXXXXXXXXXXXXXXXXXXX		
Grysbok(m)		5	Lion (m)		2			

Secondly to remove from the Hunting Area such number of animals as indicated in column "B" above against the name of the animal specified. An animal specified may be removed in whole or in part unless there is a condition on this permit prohibiting such removal.

Thirdly to sell, within a period of six months from the second date which appears above, the trophies of such number of animals as may be indicated in column "B" above against the name of the animal and subject to any other regulations which may be in force governing movement, sale or export of wildlife trophies.

The holder of this permit shall not permit any other person to hunt the animals specified in addition to such holder and his co-hunter appointed at the time of issue of this permit.

This permit is issued strictly subject to the terms and conditions which appear on the reverse.

Ref: Elephant permit import status

Dear U.S. Fish and Wildlife Service:

Back in 10 April, 2018 I submitted an application for the importation of a Zimbabwe elephant. Attached is a copy of my cover letter that accompanied the submittal. Since the submittal, I was able to find out that the agency on 20 April, 2018 assigned case #MA86417C-0 to the application. Other than a phone call by myself, I have heard nothing at all from your agency regarding the application. My application was submitted prior to the actual hunt and in September, 2018, I did in deed harvest an elephant in Zimbabwe.

My application was submitted with the appropriate information directly from the Zimbabwe Parks and Wildlife which included the Zimbabwe Parks and Wildlife hunting permit which shows their desire to reduce the elephant population by 3, the Zimbabwe 2017 game census, a map of hunted area, and a census showing an elephant population increase from 9,283 in 2000 to 23,681 in 2017. To assure that the hunt was done appropriately, ethically, and legally, we were accompanied each day by a Zimbabwe Parks and Wildlife Ranger. No issues or concerns developed during or after the hunt. The trophies themselves now sit in storage in Zimbabwe awaiting your approval to import. Is it possible to give me any status update on my application?

Sincerely,

(b) (6)

Steven F. Metzenbauer

Dear U.S. Fish and Wildlife Service:

This letter is to serve as a cover letter for my accompanying Federal Fish and Wildlife Permit application form 3-200-20. Also included with the form you will find one Zimbabwe Park and Wildlife Management Authority hunting permit (used in Section E –question #7), 4 pages of a 2017 Game Census for Hwange National Park and Surrounding Area – Matabeleland Branch (used in Section E – question #9-a), and one personal check #1039 for $100.00 USD as per 50 cfr 13.11 subpart B, Cities Import (includes trophies under ESA and MMPA). If you have any questions or concerns you can contact me at my home phone of (b) (6) by email at (b) (6) or by the address listed on both this cover letter and the completed permit application. The application instructions listed on pages 6 and 7 are not included with the application.

Thank you and sincerely,

(b) (6)

Steven F. Metzenbauer

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

WALTER FRAZIER, (b) (6)

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   Loxodonta African elephant
   b. Sex (if known).
   MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   Zimbabwe, South 18°59.683 East 027°34.410

   Northwest of Bulawayo, Zimbabwe

   b. Date wildlife was hunted: (Safari dates:
   August 18, 2017 through August 31, 2017)

   Harvest Date: August 26, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Brian Van Blerk /
Brian Van Blerk Safaris

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Trophy Consultants International
4 Josiah Chinamano Road, Belmont, Bulawayo, Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). N/A

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Trophy Consultants International
Business Name:
Address: 4 Josiah Chinamano Road, Belmont
City: Bulawayo
State/Province:
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

$25,000.00 + $4500.00 tips to Local + Governmental employees. I was accompanied by 2 (two) Governmental officials during my entire safari. Part of my fees paid for these 2 employees. I met and witnessed 2 separate anti-poaching teams (4 + 5 persons) in action during my safari. I am sure that I contributed greatly to the funding of these persons.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted.

When elephants are poached, none of the meat is eatable! My wife and I witnessed meat (all of my elephant) being hung out to dry in two separate villages. Local people from many areas came to receive meat from the elephant! None was wasted!

I feel very confident that the monies spent by myself and my wife and my son contributed greatly to the survival of the elephants.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature (b) (6) _____ Date: 2/27/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Re: Application for Permit to Import a Sport-Hunted Elephant Trophy

Dear Acting Chief:

Enclosed please find one application for a permit to import a sport-hunted elephant trophy to be hunted in Namibia. The applicant is hunting with Thormahlen & Cochran Safaris. We will shortly provide a report from this operator demonstrating the benefits of elephant hunting in the concession. Among other things, the report will show that the proceeds of the hunt are shared with nearby rural communities and used to fund essential anti-poaching and management activities. Please consider this information and other information submitted by Conservation Force and Namibia's Ministry of Environment and Tourism in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

3240 S I-10 Service Rd. W, Suite 200, Metairie, Louisiana 70001-6911, USA

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ELEPHANT trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA
T: (504) 837-1233
F: (504) 837-1145
E: cf@conservationforce.org

Type of Activity:

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. **See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.**

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Chilton	John	Philip	

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6) [redacted]			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Dallas	Texas	75254	Dallas	USA

2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Attorneys for Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Loxodonta africana (African elephant)

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   Namibia -- Mangetti National Park in the Kavango West Region of Namibia

   b. Date wildlife was hunted: August 15, 2017

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   Thormahlen & Cochran

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   The Yellow Shark Holdings, Windmill Park Unit 7, Dante Street, Prosperita, Windhoek,

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	
Address:	The Yellow Shark Holdings, Windmill Park Unit 7,
City:	DANTE STREET, PROSPERITA, WINDHOEK
State/Province:	
Country, Postal Code:	NAMIBIA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy,** please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understa[redacted] United States, cannot be re-exported.

    Applicant's signatu[redacted] Date: 4/19/18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

RE: PRT # 48613C, Applicant John Chilton, Elephant from Namibia
Supplement to the Import Permit Application

Ms. Brisendine:

This is a supplement to the existing application, PRT # 48613C, for John Chilton for his elephant trophy from Namibia

Answers to Question 9 of the import permit application:

9a. Do you have any information regarding the population status or trend data on the species hunted?

Please reference the document from the Southern African Development Community at the Kasane Elephant Summit from 2019 which we have provided. Where the president of the Republic of Namibia states that the Namibian elephant population is stable and secure. Also we have previously provided the Namibian National Elephant Management Plan that we also ask you reference.

9b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Trophy fees for this hunt were $38,000 US. Please see the attached Operator Enhancement Report detailing how trophy fees for this area are used.

9c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Please reference the Operator Enhancement Report provided – in it you will find at the end this statement

"We built camps in Na Jaqna, Ondjou, and Kabulabula. Thormahlen & Cochran donate all the camps to the Conservancies. We deliver all the meat that we hunt, to the conservancies, and donate to every local school the blue bags. We are building roads, and are responsible for the water and electricity supply for the camps. We employ the local community as staff and currently employ 5 to 6 conservancy members as staff. We are also responsible for the training of the staff to be able to serve the overseas clients. To date we have 32 community members employed in the various camps. We also have social

responsibilities towards the conservancies: we built a school hostel, a community hall, drilling of waterholes, making cutlines, building roads etc.
We are buying protective clothing to the game guards and uniforms for the personnel on an annual basis and opened another drilling hole for N$460,000.

Please refer to these documents and the hundreds of pages of information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by the government authorities in Namibia, outfitters, and others, in making a positive enhancement finding and issuing an import permit for this lion trophy.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

PERMIT TO HUNT FOR TROPHIES

Permission is hereby granted in terms of the Nature Conservation Ordinance 1975 (Ord. 4 of 1975)

Name of Trophy Hunter: J.P Chillo

Residential Address:

Country: U.S.A

to hunt the specified number of game for the sake of trophies:

CITES Indicates species listed on CITES Appendix I or II

	SPECIES: COMMON NAME	Number
	Buffalo	
CITES I	Crocodile	
	Dik-dik	
	Eland	1X
CITES II	Elephant	1X
	Giraffe	
	Grey Duiker	1X
CITES II	Hippopotamus	
	Impala, Black-faced	
	Impala, common	
	Klipspringer	
	Kudu	
CITES II	Lechwe	
	Oryx (Gemsbok)	
	Ostrich	
	Red hartebeest	
	Reedbuck

Conservation Force v.5/8/18
Operator Enhancement Questionnaire

1. Name of area operator: Peter Thormahlen

   a. Years in business: 20

   b. Name of company conducting hunt: Thormahlen & Cochran Safaris

   2. Name of concession: **Mangetti NP** **Size in km²: 30,000 ha**

   a. Land tenure: __ Government lease X__ Community _ Private ranch __ Private conservancy

   b. Length of concession agreement: 4 years Can it be renewed? __ Yes _X_ No

   c. Length of renewal, if applicable: Auction every 4-5 Years

   d. Estimated total amount received in trophy fees last year, if applicable: $400,000

   e. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: Government Concession – none of the above required

   f. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Nearest town is Rundu. Map, attachment 1,

   g. If the concession borders a national park, please provide the park name: _____Concession is Mangetti National Park_____

h. Description of general and distinctive habitat features and any water features: Biotype is made up of Miombo Forest area

3. Are there any communities living in the concession? Yes _X_ No

   a. If so, estimated number of people or villages in the concession?

4. Are there communities bordering this concession? X_ Yes __ No

   a. If so, estimated number of people or villages around the concession? Commercial Farms, Kavango Tribe

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	**abundance**	250	stable	MET Game Count Surveys
Lion	average	0	stable	MET Game Count Surveys
Leopard	abundance	100	upwards	MET Game Count Surveys

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Hippo	abundance	0	upwards	MET Game Count Surveys
Crocodile	abundance	0	upwards	MET Game Count Surveys
Roan Antelope	abundance	0	upwards	MET Game Count Surveys
Kudu	abundance	100	upwards	MET Game Count Surveys
Sable Antelope	abundance	0	upwards	MET Game Count Surveys
Prey species	Abundance: zebra, giraffe, baboon, Steenbuck, grey duiker, impala, reedbuck	2000+	upwards	MET Game Count Surveys

Wildlife monitoring in the Park is done by Ministry of Environment & Tourism (MEFT)

6. Total employment number: __5_____

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	4	2
Trackers	4	3
Anti-poaching scouts/rangers	0	
Other anti-poaching	Namibia Game Department - MET	
Cooks/housekeepers	2	2
Community coordinators		
Managers	1	1
Biologists		
Others: _____	2	2

7. Number of staff employed in the off-season: 13 - anti-poaching excluded.

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	0		
Managers	2	1	2014-2017
Maintenance	2	2	2014-2017
Road opening/construction			

Community relations personnel			
Others: _____			

8. Anti-poaching efforts:[2]

   a. Number of anti-poaching staff: National Park -MET is doing Anti-Poaching

   b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? both

   c. Months during which anti-poaching patrols are conducted: every month

   d. Number of anti-poaching patrols per month: Anti-poaching is done 24/7 in the National Park by Park Officials

   e. Description of anti-poaching equipment, vehicles, etc.: Patrol 4x4 cars and on foot.

   f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? Namibian Government - MET

   g. Do you offer rewards to poaching informants leading to arrest? __ Yes _X_ No

   h. Do you offer rewards to poaching informants upon conviction? Yes _X_ No

   i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? The anti-poaching campaign done by Parks personnel

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts				
Equipment				
Vehicles				
Petrol				
Rewards paid				
Other: _____				
Other: _____				
TOTALS				

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered				
Elephant carcasses observed				
Lion carcasses observed				
Leopard carcasses observed				
Ivory poachers arrested				

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Meat poachers arrested				
Other poachers arrested				
Poachers convicted				
Snares/gin traps collected				
Firearms confiscated				
Vehicles confiscated				
Bicycles confiscated				
Boats/nets confiscated				
Tusks recovered				
Other: _____				

The Game Department does not share information. Poaching is a sensitive issue and therefore no information in this regard is available to us to complete the above table. However, because of all the anti-poaching programs run in the area, poaching of antelope is zero, or so little that we don't know of any incidents.

10. Community investment:[3]

    a. Does the company contribute money or goods/services to local communities? _X_ Yes _ No

    b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)? __voluntary and donated by our overseas clients – mostly USA citizens who donates school stationary to schools in the area.

    c. Does the company provide game meat to nearby communities? x_ Yes __ No

    d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: All the game meat hunted by us and as per the allocated quotas of the Minister of Environment and Tourism, go to the local community

       Yearly the following Game is harvested:
       Elephant x 2 @ 4,500 kg per carcass @N$22 / kg = N$198,000
       Kudu x 2 @ 120 kg carcass @N$22 / kg = N$5,280
       Impala x 4 @ 50 kg carcass @ N$22 / kg = N$2,640

       TOTAL = N$205,920

    e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.

       National Park -Park Officials on duty

    f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in?

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

There is a Government Fund that refunds the community for damages.

Species	Damage caused	Consolation paid 2016	Consolation paid 2017	Consolation paid 2018
Elephant				
Lion				
Leopard				
Other				

g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? _____US$_____

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)	$1,750	$3,500	$4,000	20 blue bags @ $200 per bag = $4000, or N$55000. Clients donate $200, we will up the bag to the total of $200 with the necessary school or educational supplies, identified by the local schools.0-
Education (e.g., school fees, supplies)				
Health (e.g., clinics, offices)				
Health (e.g., medical salaries, equipment)				
Community scout salaries				
Other community anti-poaching				
Local government activities				
Water infrastructure improvements				
Sports teams funded	$500	$500	$500	
Construction materials donated				
Other: _____				
Other: _____				
TOTALS	$2,250	$4,000	$4,500	

11. How many U.S. clients did the company have in the past three years, what percentage of the company's clients were from the U.S., and what fees did they pay?

Please note: we operate in South Africa and Namibia, and the figures below, is for the whole operation

	Hunting elephant	Hunting lion	Hunting leopard	Hunting all species
Number of U.S. clients	2015: 4 2016: 9 2017: 5	2015: 2016: 2017:	2015: 2 2016: 9 2017: 9	2015: 126 2016: 110 2017: 141
Percentage of U.S. clients	2015: 99 2016: 98 2017: 100	2015: 2016: 2017:	2015: 100 2016: 98 2017: 99	2015: 95 2016: 96 2017: 97
Trophy fees paid by U.S. clients	2015: 220000 2016: 495000 2017: 275000	2015: 2016: 2017:	2015: 42000 2016: 225000 2017: 256000	2015: 303 715 2016: 1075 000 2017: 997 375

12. Approximate dollar amount and/or percentage of the company's revenue from U.S. clients: _95%

13. Other information: Please provide a narrative of other enhancement information about the operation, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes, restocking), management activities, research, etc.

Thormahlen & Cochran operates on other conservancies in Namibia, namely:
Na#Jaqna
Ondjou
Kabulabula
We built camps in Na Jaqna, Ondjou, and Kabulabula. Thormahlen & Cochran donate all the camps to the Conservancies. We deliver all the meat that we hunt, to the conservancies, and donate to every local school the blue bags. We are building roads, and are responsible for the water and electricity supply for the camps. We employ the local community as staff and currently employ 5 to 6 conservancy members as staff . We are also responsible for the training of the staff to be able to serve the overseas clients. To date we have 32 community members employed in the various camps. We also have social responsibilities towards the conservancies: we built a school hostel, a community hall, drilling of waterholes, making cutlines, building roads etc. We are buying protective clothing to the game guards and uniforms for the personnel on an annual basis and opened another drilling hole for N$460,000.

14. I declare that the foregoing is true and correct.

REPUBLIC OF NAMIBIA

STATEMENT BY
HIS EXCELLENCY DR. HAGE G. GEINGOB,
PRESIDENT OF THE REPUBLIC OF NAMIBIA AND CHAIRMAN OF THE SOUTHERN AFRICAN DEVELOPMENT COMMUNITY (SADC)
AT THE KASANE ELEPHANT SUMMIT

MAY 07, 2019 **KASANE, BOTSWANA**

Check against delivery

- **Your Excellency Dr. Mokgweetsi Masisi, President of the Republic of Botswana and Chairperson of the Kasane Elephant Summit;**
- **Your Excellencies, Heads of State and Government;**
- **Honourable Ministers;**
- **Your Excellency, Dr. Stergomena Lawrence Tax, SADC Executive Secretary;**
- **Your Excellencies, Members of the Diplomatic Corps;**
- **Media fraternity;**
- **Ladies and Gentlemen,**

I commend our host, My Brother, President Masisi, for convening this Elephant Summit, with objective of creating a common understanding and shared vision towards the sustainable management of our elephants. I also thank all

Heads of State and Government for their presence here today.

Conservation in Namibia has attained major successes. In fact, conservancies manage approximately 19.8% of the total Namibian surface area. By joining large contiguous areas and thereby allowing wildlife to roam freely, environmental restoration has been achieved and healthy wildlife populations sustained.

Namibia's conservation model has enabled expansion of the elephant population from just over 7,500 in 1995 to 24,000 at present. The biggest potential threat to the Namibian elephant population is the loss of habitat due to cyclical periods of drought. Another problem area is fragmentation of range and rising incidences of human-elephant conflict. We are aware that these challenges are not unique to Namibia and exist within all member states. We therefore

welcome the developed Elephant Management and Planning Framework, which will assist Partner States to manage their elephants as one contiguous population through a harmonized approach.

Chairperson,

Your Excellencies,

Conservation generates much required economic returns for rural communities. By the end of 2017, community conservation contributed an estimated 7 billion Namibian Dollars to net national income, facilitating job growth within local communities. With this in mind, Namibia affirms the call for communities to be actively involved in the protection and conservation of environment and biodiversity. We further underscore that programmes to promote conservation of biodiversity must positively

impact the standard of living of rural communities.

Chairperson,

Your Excellencies,

Concerning the trade in elephant specimens, Namibia has fully complied with requirements from the Convention of International Trade in Endangered Species (CITES) and contributed to the development of a rigorous trade control system. As a result, Namibia successfully exported raw ivory between 1999 and 2008, proving that with adequate controls and strict enforcement measures, ivory can be traded legally.

To that end, Namibia has taken note of the ongoing debate and criticism on elephant population management and status for the

Republic of Botswana and affirm our support to the new policies and programmes on elephant population management and sustainable use, which have been developed by us all, as KAZA Partner States.

Namibia continues to exercise strict control over ivory stocks, however, stocks continue to accumulate, by an average of 4.5 percent per annum, primarily through natural mortalities. We express concern over the cost and security implications of holding large ivory stocks and reiterate our favourable stance towards legal international trade of ivory, from which proceeds would be utilized to support elephant conservation and rural conservation programmes.

Chairperson,

I am further pleased to report that Namibia has nearly completed the projects under Phase I and II of the Kavango Zambezi Transfrontier Conservation Area Agreement (KAZA TFCA) and encourage ratification of the Treaty by all five Partner States. I further use this opportunity to call for renewed commitment to resourcing the KAZA Fund, so as to enable the full and timely implementation of our shared objectives.

Your Excellencies,

President Ramaphosa concluded the just ended Africa Travel Indaba with the words "Tourism is the new gold". This is an accurate statement that captures the tremendous potential presented by this sector, which remains largely untapped and brimming with possibilities for accelerated socio-

economic growth and development in our Sub-region. The conservation and sustainable management of our natural resources remain key markets in rekindling economic growth and job creation.

I am on record, having stated that the free movement of people must be facilitated, especially to enable Africans who are traveling within Africa. I therefore reiterate the call for the easing of movement of people across our borders and affirm Namibia's commitment to implementing the KAZA UNIVISA, which has been successfully piloted in Zambia and Zimbabwe since 2014.

I wish to conclude by stating that the Namibian elephant population is secure. The population recovery over the past several years attests to our management efforts. Changing times call for appropriate management strategies to be

developed in order to maintain the historic coexistence between our people and elephants. To that end, Namibia supports the realization of a shared approach towards elephant conservation via the KAZA Agreement, thereby, remaining committed towards a common vision for the management of Southern Africa's elephants.

Thank you.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
POWELL	W	DAVID	

(b) (6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room # or P.O. Box)

(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
PALM HARBOR	FLORIDA	34685	PINELLAS	U.S.A.

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* [50 CFR 13.11(d)]

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

W. DAVID POWELL (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   AFRICAN ELEPHANT LOXODONTA AFRICANA
   b. Sex (if known).
   MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   NORTHWESTERN REPUBLIC OF SOUTH AFRICA -
   LIMPOPO PROVINCE - NORTH OF ALDAYS - NEAR MORITI

   b. Date wildlife was hunted:

   20 JUNE 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
ES - SAFARIS, MAPUNGUBWE OUTFITTERS

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
PLOT 114, BASHEWA, PRETORIA, 0056, REP. OF SOUTH AFRICA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: UNIVERAL TROPHY SERVICES
Business Name: PLT 114
Address: BASHEWA
City: PRETORIA
State/Province: REPUBLIC OF SOUTH AFRICA
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?
OVER POPULATED WITH ELEPHANTS, LOOSING HABITAT, DAMAGE CONTROL PERMITS IN THIS AREA

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
THE LAND OWNER CONTINUES TO REPLANT TO REPLACE DAMAGE FOREST AND CROPS, LOCAL COMMUNITY PEOPLE ARE EMPLOYED TO ASSIST

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
ALL ABOVE WORK WITH NATURE CONSERVATION TO STUDY WILDLIFE FOR FUTURE, INVOLVES DARTING, TRACKING COLLARS, PROTECTING FROM POACHERS

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in a calendar year.

Applicant's signature (b) (6) Date: 25 APR 18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
WILCOX	Jeffrey	A	Mr.

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number
(b) (6)		(b) (6)

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, o

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Oakland	California	94619	Alameda	USA

2.a. Mailing address (include if different than physical address, include name of contact person if applicable)
Same

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* [50 CFR 13.11(d)]

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment, and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting, please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same Address

(b) (6) [redacted]

Oakland CA. 94619

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

JEFF WILCOX

(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   b. Sex (if known). African Elephant, Loxodonta, African Bush Elephant
   Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   Malapati Communal in South Eastern Lowveld of Zimbabwe bordering the Gona-Re-Zhou National Park in Zimbabwe.

   b. Date wildlife is to be hunted:
   June 9 to June 25, 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   Thaba Mmoyo Safaris
   P.O. Box 31. Waterpoort 0905 South Africa

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   NA not taken yet.

   b. Date wildlife was hunted:
   NA.

OMB Control No. 1018-0093
Expires 08/31/2020

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Thaba Mmoyo Safaris

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Malapati Communal Area
Zimbabwe (There is No Physical Address)

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Not yet Hunted.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Charlene Janse van Rensburg
Business Name: Trophy Solutions
Address: 11 Sixth Avenue Industrial P.O Box 12043
City: Polokwane
State/Province:
Country, Postal Code: South Africa 0713

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

NO

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

I do not have this information

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The hunting company is very active in anti poaching efforts for many years.

OMB Control No. 1018-0093
Expires 08/31/2020

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopa[redacted]dar year.

Applicant's signature: [redacted] Date: April 2 2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Dear Sir or Madam,

Attached is my application to import the trophies from the African elephant I took in Namibia on September 19, 2015 while hunting with Jamy Traut Hunting Safaris.

With the application I have included the CITES export and import permits from Namibia and South Africa for the artifacts associated with the elephant. Also included is the invoice from Highveld Taxidermy, the taxidermist that is preparing the trophies for me. The highlighted items on the invoice are the things that have been made from the tusks, hide, feet, and tail of the elephant.

If you require any additional information, you can reach me at:

Timothy R. Decker
(b) (6)
Apple Valley, CA 92307

My email address is: (b) (6)

My telephone numbers are:
(b) (6)

Thank you for your attention.

Sincerely,

(b) (6)

Timothy R. Decker

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Timothy R. Decker
(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
      loxodonta africana African bush elephant
   b. Sex (if known). Male (Bull)

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
      S 17° 50' 08.1"
      E 023° 21' 08.4
      Mayuni Conservancy
      Nearest city: Kongola, Namibia
   b. Date wildlife was hunted:
      09/19/2015

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Outfitter/Safari Company: Jamy Traut Hunting Safaris
Professional Hunter: Karel Grunschloss

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
Highveld Taxidermists (Pty) Ltd.
354 Vlakplaats
Hennopsriver
Erasmia 0023
South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: Highveld Taxidermists (Pty) Ltd.
Address: 354 Vlakplaats
City: Hennopsriver
State/Province: Erasmia 0023
Country, Postal Code: South Africa

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
I paid $20,000.00 in trophy fees. That money was used to pay the game rangers' salaries, thereby contributing elephant conservation through the rangers' anti-poaching efforts; a portion of the fees went to the Mayuni Conservancy and into the local community where they provided funds for infrastructure development and education; and some of the fees went to three villages who provided manpower to recover the elephant. The meat from the elephant was divided between three villages and fed more than 3,000 people.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Jamy Traut Hunting Safaris has established boreholes (wells) throughout the concessions, and he maintains these wells throughout the year to ensure that elephants and other wildlife have a reliable source of water. Jamy Traut's professional hunters aid the game rangers to suppress poaching of elephants and other species.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two l[redacted]ear.

Applicant's signatur[redacted] Date: 04/24/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Your application is currently under review. Please be aware that we have a significant number of applications pending, and we process applications in the order they are received in the office. The staff member working on your application has been notified of your inquiry. If there is a need for additional information or clarification on information provided in your application, the staff member will contact you directly.

Thank you,
U.S. Management Authority, Branch of Permits.

Timothy Decker PRT #89901C

1 message

Barry, Anna <anna_barry@fws.gov> Tue, Oct 9, 2018 at 12:33 PM
To: (b) (6)

Dear Mr. Timothy Decker,

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Michael McGinnis (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   African Elephant

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   Namibia, The Wuparo Conservancy in Zambezi Region of Namibia, Katima Mulilo - nearest City

   b. Date wildlife was hunted:

   Daggaboy Safaris, David Muller on september 5, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Daggaboy Safaris, Dawid Muller

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Erongo taxidermy, P.O. Box 102, Jan Smuts Str, 222
Okavi, Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). permit is w/ Animal

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Dawid Muller
Business Name: Daggaboy Safaris
Address: P.O. Box 3041
City: WINDHOEK, Namibia
State/Province:
Country, Postal Code: phone: 264 81 128 6531

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

NO

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

25,000 trophy fee, this Money was give to the Community where I hunted

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Local Folks are also employed in camp & staff
All gil plainsgame shot went to local Community

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

    Applicant's signature (b) (6) _____ Date: 4/30/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Coppersmith Inc.
Attn. Jeremy Delacruz
434 Rozzi Place
South S.F., CA 94080

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Myra Ravinet (b) (6)
Jeremy Delacruz 650-872-1225 jdelacruz@coppersmith.com

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☑ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   Loxodonta Africana

   b. Sex (if known). NA

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   Namibia, NYAE- NYAE Conservancy
   Otjozondjupa Region
   Nearest city: Tsumkwe

   b. Date wildlife is to be hunted:
   September 15 - October 3 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   S.M. Jacobs
   SMJ Safaris
   Farm Annaster #915 PO Box 1601
   Grootfontein
   Namibia

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   N/A

   b. Date wildlife was hunted:

   N/A.

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

N/A

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

N/A

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: S.M. Jacobs
Business Name: SMJ Safaris
Address: Farm Aandster #915, P.O. BOX 601
City: Grootfontein
State/Province:
Country, Postal Code: Namibia

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

N/A

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

NA

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

N/A

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Same as Page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
   (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

[No] Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name. Loxodonta Africana

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild: N/A

   b. Date wildlife is to be hunted: N/A

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with: N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

      South Africa, Mapungubwe Game Reserve, Alldays, Vhembe District

   b. Date wildlife was hunted:

      July 7, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Mr. E. Small (PH and Outfitter)

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Safari Cargo, South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). See separate attached documents.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mr. Pieter Erasmus
Business Name: Safari Cargo
Address: Holding 34, 5th Avenue, Bredell, 1623
City: Gauteng
State/Province:
Country, Postal Code: South Africa

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Yes - see separate information attached.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

License fee: R 5000 ($400) was paid to the government, trophy fee: $ 40,000, some of it was allocated to the community as per data and landowner used some.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Yes - see separate information attached.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ (b) (6) _____ Date: 5/8/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Question 9

Elephant Management Plan Annual Report for year 2016

Survey Data will be conducted every 2 years and the next survey is planned for June 2019 (Dr. Gerhard De Beer)

Area

Mapungubwe Game Reserve is 25000 ha big and open with Botswana on the Northern and western border.
It was opened up from ten fenced in properties to one big area open with Botswana to allow more area for the Tuli elephants.
Elephants have become resident since the year 2000 as we opened the fences to have more range for the plus minus 1400 elephants roaming the area. (See attached detail of air count)

Management Actions

Fences:
The condition of the Fences are deteriorating on our Northern boundary along Limpopo River and Eastern area bordering with Mapungubwe National Park due to elephant activity. The fence from middle Modena North up to Den Staat road have been repaired.

Along our Western Boundary with Breslau and Eendvogelpan, the electrical fences have been completed but we had to repair the Breslau fence once, and Eendvogelpan fence once during 2016 due to elephant activity.
Our Southern fence are in fairly good condition with elephant breaking threw but gets repaired.
The South Eastern Fence bordering Lauriston and Montique are constantly being broken, by elephants and neighbours keep feeding along fence to attract animals including elephants.

Degraded Area's:
On farms Parma and Montrow, a lot of erosion repair work has been done, as well as on Vergenoegd and Kruidfontein. The dam wall that broke on Vergenoegd washed away a lot of roads but was filled and repaired.
We have lost the dam walls at Vergenoegd, due to elephants working of the walls going over the walls to drink and bath in the water. This damage will still have to be assessed. The wall at Lelie dam showed deterioration and we do not think it will withstand this coming rainy season. This wall was repaired in 2014 to the extent of R2milj

Fire Management Plan:
Due to sparse ground cover and a very good road system, our fire risk is extremely low. We do have adequate fire-fighting equipment and personnel.
Water Provision:
We have three big dams that supply the main water to the animals and also the Limpopo River on our West and North. One of these dams were extensively damaged by elephants, and another is close to the point of the dam wall washing away. Another supply in the form of a borehole will supply water the animals during the drier period.

Game Management

Game Census Frequency:
Due to a lot of hunting, tourism and surveying activity we had during 2016 and a lot of helicopters were use, the game-count was on-going and reported daily when people were out for their activities. On 29 July 2016 till 5 August 2016 an official game count was conducted at the waterholes as well as with the use of 2 helicopters. This accounted for a total of 441 elephants on 1 Aug 2016. This show an increase in elephant numbers, the biggest increase due to more elephants moving in from Botswana on our Northern boundary. The increase in damage to trees and infrastructure are also more in these areas.

On 8 February 2016 a Nature Conservation Officer flew with helicopter on the property and elephants were recorded. These groups were monitored by helicopter from the 7th February till 9th February and was a total of 158 elephants at one-time on farms Somerville, Parma and Vergenoegd.
Professional hunters and guides are instructed to record sightings especially elephant.
Helicopter Pilots were also task with reporting sightings and was then recorded by Eugene Small.
Any sightings by guests and owner were also recorded.
A drone was acquired and this will be used to identify groups of elephant.
Desired Stocking Density:
The desired stocking density is reflected in our Management plan and is <1 elephant per sq km but at this stage it is 9,6 elephant per sq km (EMP) (Ex max 100 elephant EMP Pg 124 Section 4:12)
Current Stocking Density:
As per our census with reference to Section E 5.4 Page 137, we have 276 resident and ? migratory elephants. The Model stocking rate should be 100 Max. (Stocking Capacity Section 4:12 C Pg 124)
The damage to our infrastructure and environment are a sign of increased elephant activity.
Alterations to stocking density can be made after Habitat Condition Assessment this year if needed.
Some Herd numbers were in access of 80 animals per herd. 121 on Modena , 118 on Vergenoegd.
We are identifying herds of elephant that were not previously identified on Mapungubwe Game Reserve. Noted was a herd of 121 on Modena, individuals that were identified by four cows with extremely long tusks, and 3 mature bulls with this specific herds. (We would like to collar one of these cows in 2017 to get more information of this specific herd)
In 2013 a herd of 236 stayed on Mapungubwe Game Reserve and was chased a few months later by helicopter back to Botswana. (Refer to Nature Conservation officials)
Game Management Action:
According to Scholes and Mennell 2008, elephant population increases 100% every 10 to 13 years.
From 2000 we saw a definite increase in the elephant population on Mapungubwe and since 2011 we started to do more research and monitoring threw School of Life Science of University of Kwa Zulu Natal (Annekke Bedetti) Refer to Elephant management Plan.
As the carrying capacity of Mapungubwe Game reserve allows for a total of 100 elephants, we see that the current population, resident and nomadic are far exceeding this.
An application will be submitted for 10 Cities elephant. We only hunted 3 in 2017 as the permit quota was issued late in 2016 and thus had only half a year to market and hunt these elephants.
We have collared an elephant cow which is part of one herd which consists of 87 individuals. (Attached data)
Also the selling of these animals to foreign hunters, which supply most of the income to run the farm, (90%) are very erratic due to uncertainty about Cities regulations to different countries as well as political uncertainty here and abroad.
We also have built and maintain an orphanage in the town of Alldays where we also feed 162 children, where income from elephant hunting is used.
We are in constant communications with School of Life Science of University of Kwa Zulu Natal which have been doing research on the total population of elephant in our area.

Elephant Management

Desired Total elephant Population Range:
As indicated by our Environmental Management Plan, the desired range is 100 individuals.
Desired Adult Sex Ratio Range:

Elephant Census Frequency:
Elephant census are done on an on-going process and for this all staff are motivated to report elephant activity. All tourist and guides are also asked to report any elephant activity and report and record elephant sightings.

Census Methods:
Any aircraft that are used for transport or game capture must report any elephant activity and numbers. This is then recorded.

A drone will be used to photograph groups and individuals as weather and time permits.

Method of elephant reduction

An application has been submitted for 10 Cities elephants.

We would suggest to have a set quota of 15 animals (Ref Management Plan) for 5 years as can be clearly seen that the deteriorating of Mapungubwe Game Reserve as a hole, is happening at an alarming rate and that current method is not slowing down destruction. According to the game count in July/ Aug 2016 the elephant numbers are increasing and if we can get an approved quota for 5 years, we will be better off in planning the hunts spread out over the whole year in advance. This will help with short term management in keeping Nomadic herds away, and will be a good indication on resident herd growth to see if our take-off need to be adjusted accordingly.

Question c

Rahmqvist
Foundation

RAHMQVIST FOUNDATION CENTRE

"'All children are entitled to a good start in life with care and a safe shelter. I therefore founded Rahmqvist Foundation in order to build and run an orphanage, to give homeless and vulnerable children a safe place to grow up in."

LEIF RAHMQVIST
Founder and Protector

BACKGROUND

Close to my ranch in South Africa there is the town of Alldays. It is a small country town with lots of poverty, homelessness, unemployment and disease. There are many children having lost one or both their parents to AIDS and other diseases. The children are often living in very vulnerable situations, without any adult care. Their one meal a day they get by a Drop-In Centre run by local women. This is not the way children shall live! All children are entitled to a good start in life with shelter and proper care! I therefore founded Rahmqvist Foundation in order to build and run an orphanage to give children a place where they can be safe, get enough to eat, hygiene, health care, education, a bed of their own and not at least to play.

ORPHANAGE

To strengthen the orphanage organization we are establishing a partnership with Norsa Community Care.

SKILL SCHOOL

We are now taking the next step in the project through the start-up of Rahmqvist Foundation Skill School. The skill school will offer young people leaving school a professional training to be bricklayers, seamstresses, bakers, chefs, masseuses or hairdressers.

WANT TO HELP?

Rahmqvist Foundation Centre is a charity project. All funds raised go directly to the Centre and to the benefit of the children. We are extremely grateful for all contributions, large and small, from individuals, businesses, organizations, schools and others!

Question c

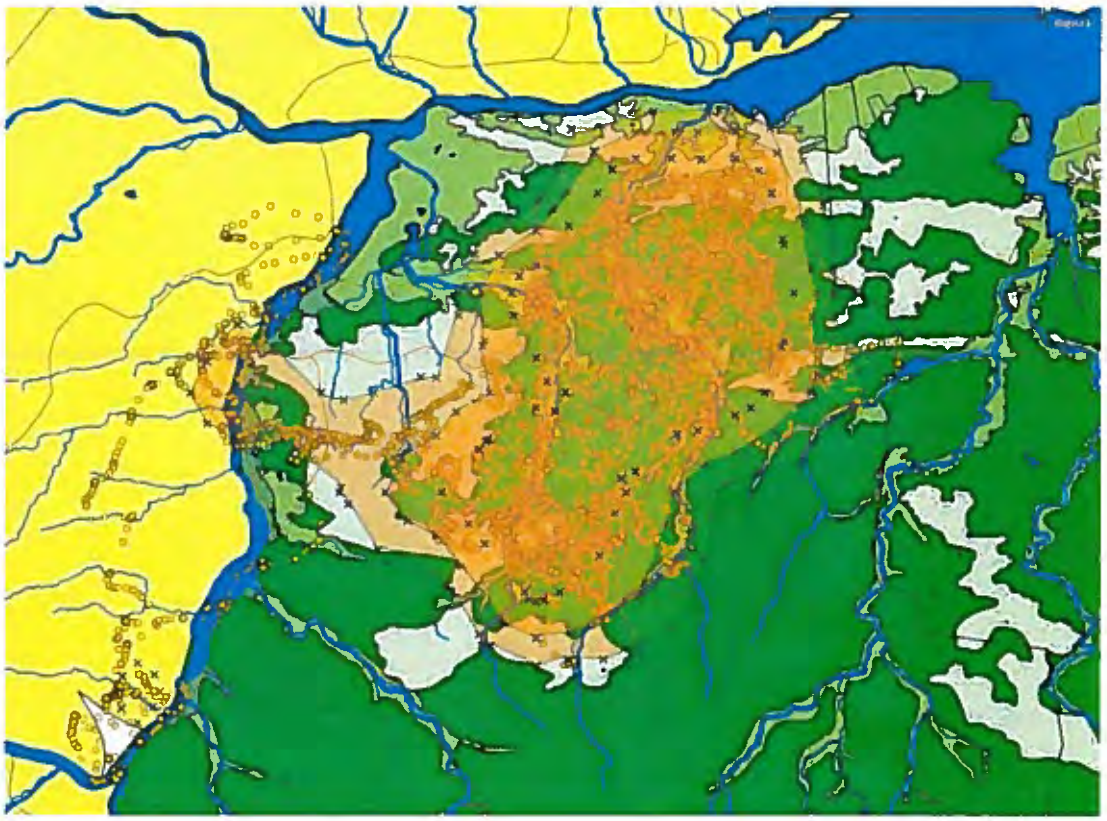
Elephant collared

One adult elephant cow, was darted and a collar fitted on 13 March 2015.

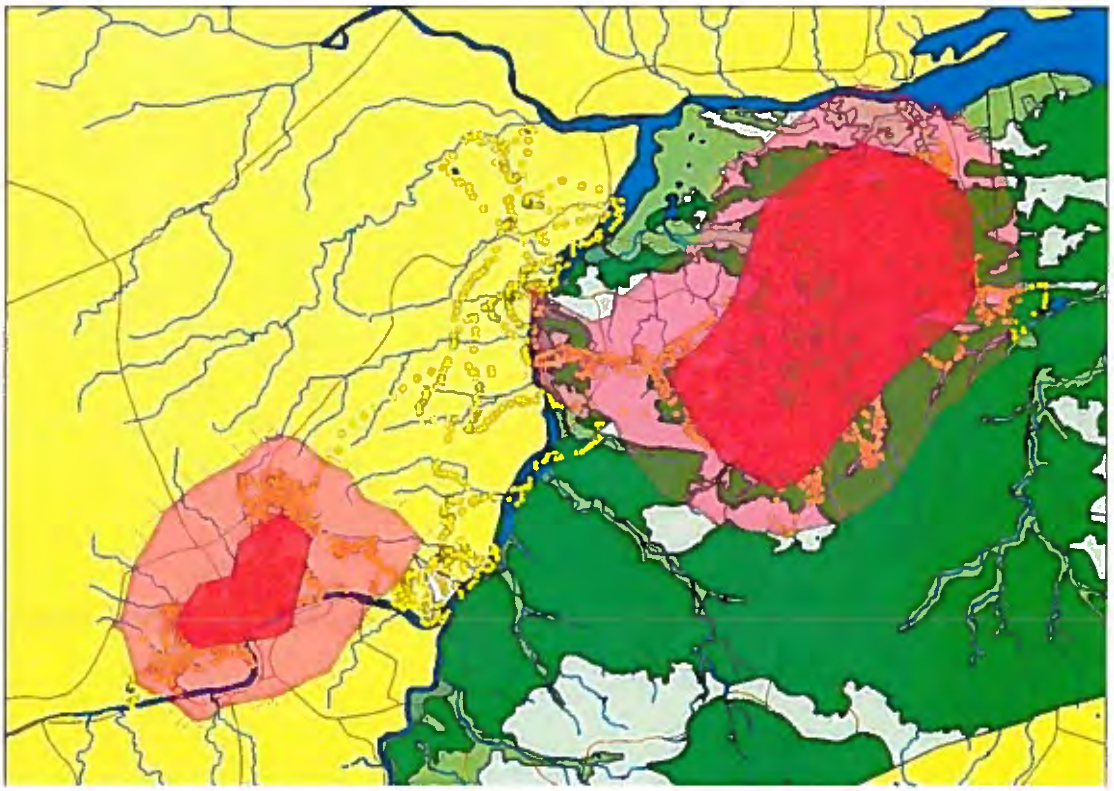
She was named Leila and is still part of one herd which consists of 89 animals.

With collar data it was established that this specific herd spend just over 11 months a year on Mapungubwe Game Reserve.

Leila: May to October 2016



Leila: May to January



Question 9

ELEPHANT AERIAL CENSUS OF THE CENTRAL LIMPOPO RIVER VALLEY, SOUTHERN AFRICA REPORT SUMMARY SEPTEMBER 2012

Research Synopsis

In recent times, more and more questions have been asked on whether an increase in elephant numbers will lead to the ultimate destruction of an area.

Elephants are perceived to be a keystone species that determine the structure and composition of their habitats. This contention has in turn lead to claims that elephants at high numbers pose a threat to biodiversity in the conservation areas in which they occur. Little, however, is known on how elephant populations are limited and how co-existence between elephants and trees was achieved in the past. In order to understand elephant and tree dynamics a reliable understanding of what environmental and social factors influence elephant movements and the occupancy of different habitats is needed. This has led to the initiation of the Central Limpopo River Valley elephant research project in 1999 and is an ongoing program.

Since 2000, as part of the project six total aerial counts of the elephant population has been conducted to determine their range and numbers. In recent years the development of the Greater Mapungubwe Transfrontier Conservation Area, developing agriculture, mining, dam construction and increased human densities in the region, have influenced the range and the movements of elephants within the region.

Since 2005, increasing numbers of elephants have moved into Mapungubwe National Park and on several properties in South Africa where fence breakages between properties are reported on a near weekly basis. Extensive poaching and control hunting is also being reported and could influence population numbers and movements dramatically. Aerial surveys provide information on numbers, group structure and distribution that are important baseline data pertinent to basic ecological questions and conservation planning and management.

Methodology

This year's aerial survey of the area was undertaken on the 9th and 10th September 2012.

The methodology was similar to those of previous years. Three fixed wing airplanes (Cessna 206; two C182T) were used to count the study area simultaneously. A team consisting of a pilot, navigator and two observers on each side of the plane were used.

On day one the Northern Tuli Game Reserve (Botswana), the Tuli Block from the Motloutse River to Zanzibar and Sentinel Ranch, Nottingham Estate, River Ranch (Zimbabwe) were counted. On day two the Tuli Circle in Zimbabwe and Mapungubwe National Park, **Mapungubwe Private Reserve** and farms bordering the Limpopo River in South Africa were counted.

A herd of elephants seen from the airplane.

Results

During the 2012 count a total of 1291 elephants were counted.

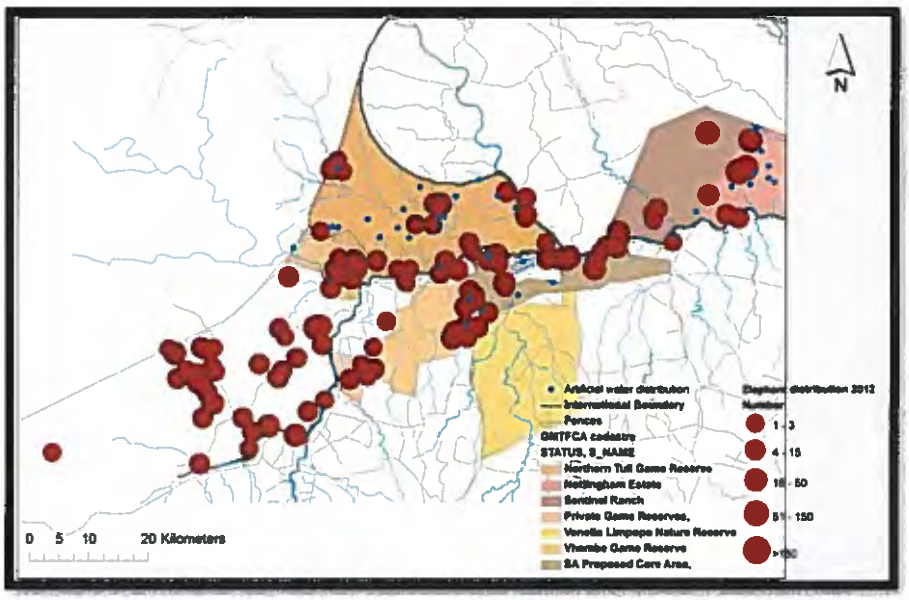


Figure 1: Elephant distribution and group sizes during the September 2012 total aerial count conducted in the Central Limpopo River Valley

Management Area	Total Counted						
	Aug 00	Jul 01	Oct 04	Jun 07	Aug 08	Sep-10	Sep-12

Sub total	**145**	**10**	**150**	**0**	**0**	**0**	**0**
TOTAL	**1262**	**1294**	**1240**	**1080**	**1229**	**1237**	**1291**

Table 1: Comparison of the results of the seven total aerial counts of the Central Limpopo Valley elephant population. NTGR – Northern Tuli Game Reserve, MNP – Mapungubwe National Park, TSA – Tuli Safari Area, BDMRF – Baines Drift to Motloutse River Farms, SNRC – Sentinel Ranch, Nottingham Estate, River Ranch Complex, LDNS – Letsibogo Dam and Northern Shashe Area, MTRR – Motloutse and Thune Riverine

The overall elephant distribution remained very similar between counts. Numbers of elephant south of the Limpopo River have increased steadily since 2007, while numbers within the Tuli Block west of the Motloutse River and the Northern Tuli Game Reserve fluctuate between years. The total number of elephants counted within the study area further remains 1200 – 1300, indicating that at least for the dry season this population remains stable. Group sizes are strongly correlated to rainfall with a higher number of small groups within years with low rainfall and fewer but larger groups in years with high rainfall.

For any additional information or the full report of the Aerial Count study, please don't hesitate to send an email to:

- Eugene Small vhembe@lantic.net

Kind regards,

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ELEPHANT & LION trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;

(2) Was legally obtained by the hunter through hunting for his or her personal use;

(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and

(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:

(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;

(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and

(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Conservation Force , 504-837-1233 , cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No ✓ Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   ELEPHANT LOXODONTA AFRICANA

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   Country -- Namibia , Region -- Zambezi East , Area -- Salambala (conservancy)

   b. Date wildlife is to be hunted: September17-Oct 2 , 2018

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   Madubula Safaris -- John Abraham

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	JOHN ABRAHAM
Business Name:	REISER TAXIDERMY
Address:	BOX 11908 WINDHOEK, PLOT #43 BRAKWATER
City:	+264 61 264207
State/Province:	
Country, Postal Code:	REISER@IWAY.NA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understa[redacted]tates, cannot be re-exported.

    Applicant's signatu[redacted] Date: 09/25/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Complementary benefits of tourism and hunting to communal conservancies in Namibia

Robin Naidoo,* L. Chris Weaver,† Richard W. Diggle,† Greenwell Matongo,† Greg Stuart-Hill,† and Chris Thouless†‡

Abstract: *Tourism and hunting both generate substantial revenues for communities and private operators in Africa, but few studies have quantitatively examined the trade-offs and synergies that may result from these two activities. We evaluated financial and in-kind benefit streams from tourism and hunting on 77 communal conservancies in Namibia from 1998 to 2013, where community-based wildlife conservation has been promoted as a land-use that complements traditional subsistence agriculture. We used data collected annually for all communal conservancies to characterize whether benefits were derived from hunting or tourism. We classified these benefits into 3 broad classes and examined how benefits flowed to stakeholders within communities under the status quo and under a simulated ban on hunting. Across all conservancies, total benefits from hunting and tourism increased at roughly the same rate, although conservancies typically started generating benefits from hunting within 3 years of formation as opposed to after 6 years for tourism. Disaggregation of data revealed that the main benefits from hunting were income for conservancy management and food in the form of meat for the community at large. The majority of tourism benefits were salaried jobs at lodges. A simulated ban on trophy hunting significantly reduced the number of conservancies that could cover their operating costs, whereas eliminating income from tourism did not have as severe an effect. Given that the benefits generated from hunting and tourism typically begin at different times in a conservancy's life-span (earlier vs. later, respectively) and flow to different segments of local communities, these 2 activities together may provide the greatest incentives for conservation on communal lands in Namibia. A singular focus on either hunting or tourism would reduce the value of wildlife as a competitive land-use option and have grave repercussions for the viability of community-based conservation efforts in Namibia, and possibly other parts of Africa.*

Keywords: communal lands, community-based conservation, financial benefits, hunting ban, in-kind benefits, stakeholders

Resumen: *El turismo y la caza generan ingresos públicos sustanciales para las comunidades y los operadores privados en África, pero pocos estudios han examinado cuantitativamente las compensaciones y las sinergias que pueden resultar de estas dos actividades. Evaluamos las oleadas de beneficios financieros y de pago en especie provenientes del turismo y la caza en 77 zonas de conservación comunal en Namibia desde 1998 a 2013, donde la conservación de vida silvestre basada en la comunidad ha sido promovida como un uso de suelo que complementa la agricultura tradicional de subsistencia. Usamos datos colectados anualmente de todas las zonas comunales para caracterizar si los beneficios se derivaron de la caza o el turismo. Clasificamos estos beneficios en tres categorías generales y examinamos cómo los beneficios fluyeron hacia los accionistas dentro de las comunidades bajo el status quo y bajo una prohibición simulada de la caza. En todas las zonas de conservación comunal, los beneficios totales de la caza y el turismo incrementaron aproximadamente a la misma tasa, aunque en estas zonas se comenzaron a generar beneficios de la caza normalmente dentro de los 3 años de formación, en contraste con del turismo que se generaron después de 6 años. La desagregación de los datos reveló que los principales beneficios de la caza fueron los ingresos para*

el manejo de la conservación y la comida en forma de carne para la mayoría de la comunidad. La mayoría de los beneficios del turismo fueron trabajos a sueldo en hospedajes. Una prohibición simulada sobre la caza de trofeos redujo significativamente el número de zonas de conservación que podrían cubrir sus gastos de operación, mientras que la eliminación del ingreso por el turismo no tuvo un efecto severo. Dado que los beneficios generados por la caza y el turismo comienzan comúnmente a tiempos distintos en la duración total de la conservación (más temprano que más tarde, respectivamente) y fluyen a segmentos diferentes de las comunidades locales, estas dos actividades juntas pueden proporcionar incentivos más grandes para la conservación en las tierras comunales de Namibia. Un foco único sobre la caza o el turismo puede reducir el valor de la vida silvestre como opción de uso de suelo competitivo y tener repercusiones graves sobre la viabilidad de los esfuerzos de conservación basada en comunidades de Namibia, y posiblemente de otras partes de África.

Palabras Clave: accionistas, beneficios financieros, beneficios de pago en especie, conservación basada en la comunidad, prohibición de la caza, tierras comunales

Introduction

Current paradigms in conservation increasingly emphasize the utilitarian aspect of safeguarding biodiversity (Daily et al. 2009; Redford & Adams 2009; Guerry et al. 2015), as opposed to more traditional strategies such as protected areas and strict land-use zoning. Ecosystem service approaches and payments for environmental services (PES) schemes are based on the assumption that ensuring a supply of environmental benefits to people will result in the conservation of biodiversity and of natural areas (Tallis et al. 2009; Tallis & Polasky 2009). However, this increasing emphasis on a utilitarian approach to conservation has spawned much debate and criticism. Some contend this new conservation diverts efforts away from ensuring the persistence of biodiversity and puts too much focus on human needs and well-being (Soule 2013; Doak et al. 2014). Others argue that PES programs and partnerships with corporations are resulting in the commodification of nature and that market-based approaches are likely to favor the rich, powerful, and foreign at the expense of local communities and the poor (Sullivan 2006; Igoe et al. 2010).

Although approaches to natural resource management and biodiversity conservation in southern Africa have long been grounded in similar utilitarian perspectives (Child 2004; Carruthers 2008), few approaches to conservation are currently as controversial as the hunting of large and charismatic species as a means of generating benefits and incentives for conservation in this part of the world (Lindsey et al. 2006; Lindsey et al. 2007). Heightened concerns surrounding animal rights and the ethics of hunting, often inflamed by images on social media of trophy hunters posing with dead animals, have led to an increasingly vocal Western opposition to trophy hunting in Africa. This opposition is contributing to tangible policy changes, including the banning of trophy hunting in Botswana (Pabst 2013), restrictions on imports of trophies of certain species to countries such as the United States and Australia (Milman 2015), and the barring of trophies from being transported on some major commercial airlines (Wieczner 2015). Ironically, this Western opposition to trophy hunting comes despite the fact that hunting benefits were one of the early motivations for conservation in North America (Geist et al. 2001), and even today proceeds from hunting licenses in the United States (via the Pittman-Robertson Act) and Canada continue to generate hundreds of millions of dollars every year for wildlife management and habitat protection (Arnett & Southwick 2015).

The impact that changes in hunting policies may have on the conservation of wildlife and on the incentives for African people to coexist with wildlife is not well understood (Buckley & Mossaz 2015). There has been little examination of how benefits from hunting compare with benefits from nonconsumptive nature-based tourism in terms of incentives for local people to conserve species and wildlife habitat, although others have suggested the two may be complementary, rather than substitutive, activities (Leader-Williams et al. 2001; Lindsey et al. 2006). A major limitation is that data on the variety of financial benefits that wildlife generate are typically not systematically collected, especially across different temporal and spatial scales. Yet understanding who benefits, and how, from wildlife as a land use is a critical prerequisite to designing effective policies and programs that support conservation as a sustainable alternative to other, less biodiversity friendly, land uses.

Despite the above knowledge gaps, it is clear that for wildlife to survive outside (and perhaps even inside) protected areas in Africa, people must have strong incentives to tolerate, or ideally embrace, wildlife as a land use (Roe et al. 2009; Dickman et al. 2011; Child et al. 2012). Given that strict protected areas comprise a small and unrepresentative fraction of the African continent, and that even within protected areas wildlife is declining (Western et al. 2009; Craigie et al. 2010), approaches that seek to capture multiple benefits from wildlife conservation on state, private, and communal lands in Africa are indispensable. This principle is especially important when considering the diverse relationships between local communities and wildlife. Communities living with wildlife

are not monolithic entities; rather, they are composed of different groups of people who will experience different costs and benefits from wildlife conservation (Agrawal & Gibson 1999; Roe et al. 2009). For example, wealthy cattle owners and poor subsistence farmers will have different perceptions of wildlife conservation given the particular costs and benefits they are likely to experience. Diversifying benefit streams from wildlife conservation so that the variety of stakeholders within local communities are incentivized to promote or at minimum tolerate living with wildlife will provide the greatest likelihood that conservation as a land use will ultimately prove more attractive than wildlife-unfriendly alternatives. Because communal lands comprise a large fraction of rural Africa (up to 500% more than state-managed forest reserves and national parks [Alden Wily 2011]), management of these lands will play a huge role in determining the success or failure of biodiversity conservation efforts across the continent.

We focused on how different types of benefits provided by wildlife vary over time, space, and community stakeholder groups in communal conservancies in Namibia. Namibia's Community-Based Natural Resource Management (CBNRM) program began in the mid-1990s, when progressive legislation for the devolution of conditional rights to natural resources allowed communities to register areas of customary landholding as "communal conservancies." Registering these conservancies (involving developing zoning and sustainable resource management plans and a constitution) allows local communities to manage and benefit from wildlife and other natural resources on their traditional lands. Prior to the legislation, natural resources were the sole property of the state. Although wildlife has been used by people for millennia in the region that is now Namibia, the last century was characterized by declines in various species, starting with the rinderpest outbreak at the end of the 19th century, followed by overhunting of big game species by colonial hunters, and more recently by a major drought combined with a poaching increase in the 1980s (Owen-Smith 2010). Namibia's CBNRM program is widely recognized as having contributed to a strong recovery of wildlife in large parts of the country, through the creation of social and economic incentives for the sustainable coexistence of wildlife and people on communal lands (Owen-Smith 2010; Naidoo et al. 2011*b*; NACSO 2013). Additionally, the principles used to incentivize communities to steward wildlife across very large spatial scales are already being adopted by numerous other countries in Africa and beyond (NACSO 2013). We examined how changes in benefits over time generated on communal conservancies in Namibia vary according to whether they were derived from tourism or hunting (the 2 most significant benefits derived from wildlife). We also assessed how these benefits flow to different stakeholders within local communities and how factors such as time of establishment and changes in resource management policies affect such benefit flows on communal lands.

Methods

We used data from 77 communal conservancies registered by 2012 in Namibia to examine benefit flows associated with hunting and photographic tourism. The first four of these conservancies were established in 1998, and we used data through the 2013 calendar year for all of them. For both hunting and tourism, conservancies negotiate agreements with private operators. The agreements between conservancies and operators specify the portion of income the conservancy receives (typically 8–12% of total lodge revenue and from 30–75% of trophy price, depending on the species) and jobs to be offered to community members with the operation (from 20–50 for tourism lodges, depending on factors such as size and location, and 8–10 for hunting camps). In addition, community members hunt for subsistence and allow local sales of meat from wildlife through game cropping. Information on fees paid to conservancy management committees; salaries of community members employed in the tourism or hunting industry; and nonfinancial benefits (primarily meat from hunting, but also meals, training, human-wildlife conflict compensation, and other donations to the community at large) is compiled annually by every conservancy. Financial reporting of conservancies is supported by various nongovernmental organizations, is ground-truthed, and is double-checked against analogous reports from tourism and hunting operators.

We used these data and categorized each source of benefit as to whether it was derived from tourism or from hunting. The CBNRM program uses the price of buying alternative meat as the value of wild meat distributed from animals that were hunted (replacement-cost shadow price approach). In 2013, it was 18 Namibian dollars/kg of meat (NACSO 2013). This shadow price can vary and is adjusted from year to year to reflect supply and demand, but the same rate is applied across the country in order to maintain comparability of meat benefits generated in different regions. We used a consumer price index produced by the Bank of Namibia to standardize benefit figures from all years into constant 2013 Namibian dollars. We subsequently expressed all figures in 2013 U.S. dollars (U.S.$) based on the average monthly exchange rate in 2013 of U.S.$1 = N$9.64.

We divided benefits into the 3 classes (described above) because each represented a different type of gain that is channeled to different parts of a conservancy and has different implications for the sustainability of the conservancy and for its livelihood value to members. Income (i.e., fees from lodge and hunting concessions) to management committees is used by conservancies to cover operational and management costs

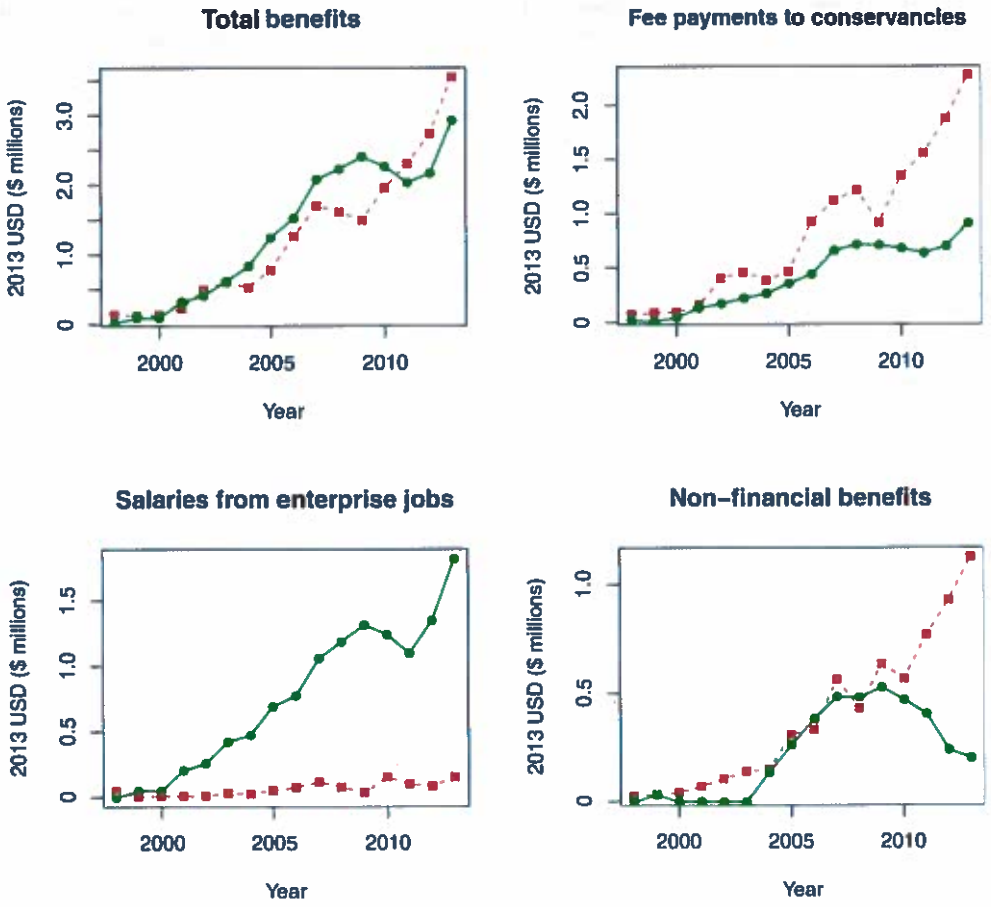

Figure 1. Benefits generated across all conservancies in Namibia's Community-Based Natural Resource Management program, 1998–2013, from hunting (squares) and tourism (circles): (a) total benefits, (b) fee payments to conservancies, (c) salaries from enterprise jobs, and (d) nonfinancial benefits.

(including paying the salaries of community game guards and other conservancy staff members, vehicle fuel costs and maintenance, and office upkeep expenses) and is also distributed as cash and funds for development projects within the community. Individual conservancy members who are salaried employees at tourism lodges or hunting camps clearly benefit financially from conservation, and this linkage should result in strong incentives for promoting wildlife as a land use in their households and among their families and social networks within the community. Conservancy members also benefit individually from the consumption of wild meat that is distributed throughout the community from hunted animals. This benefit, although nonfinancial, is typically viewed as a strong and very direct link between the value of having wildlife on communal lands and the members' livelihoods and well-being (NACSO 2013). To quantify the magnitude of these financial flows from hunting and tourism to stakeholders within communities, we used a subset of conservancy data from 2011 to 2013, during which time detailed financial accounting statements were used to track incoming conservancy revenue.

To simulate how a trophy hunting ban would affect the viability of communal conservancies in Namibia, we used detailed financial statements that were available for a subset of 50 conservancies in 2013 (all but two of the 52 conservancies that generated some level of benefits in 2013) and tabulated the operating costs each conservancy accrued. We then simulated the effects of a ban by removing all cash income that conservancies earned from trophy hunting in 2013 (assuming this cash income could not be substituted by increases in tourism) and calculated the difference in the proportion of conservancies that were able to cover their operating costs based on conservancy income under the status quo versus under a trophy-hunting ban. For comparison's sake, we removed all conservancy income from tourism and assessed how this changed financial viability of conservancies. We also used data on harvested animals and nationally averaged trophy prices to estimate the contribution of individual wildlife species to trophy hunting income.

Finally, for each conservancy we split total benefits over time into 2 series, one for hunting and one for tourism (Supporting Information). We characterized

these financial time series by calculating 4 metrics per conservancy: temporal trend (slope from a linear regression of benefits on year); volatility (root mean square error from the linear regression); end point (magnitude of benefits in 2013); and lag time between year conservancy registered and year the first benefits were generated.

We used *t* tests on these metrics to assess whether temporal flows of benefits to conservancies were significantly different between hunting and tourism.

Results

Of the 77 conservancies established by 2012, 25 reported not generating any benefits from either hunting or tourism. Considering all conservancies in Namibia's CBNRM program, aggregate benefits increased over time (Fig. 1). Total benefits from tourism and hunting were similar in the early years of the program, but tourism benefits exceeded those from hunting from 2003 to 2010, whereas from 2011 to 2013 the benefits from hunting were greater than tourism benefits (Fig. 1a). Although fee payments to conservancies and nonfinancial benefits (primarily meat) from hunting accumulated at higher levels than those from tourism (Figs. 1b and d), total salaries from tourism enterprise jobs increased 10 times faster than salaries from hunting jobs (Fig. 1c). Nonfinancial benefits from tourism dropped sharply from 2011–2013 relative to continued increasing nonfinancial benefits from hunting (Fig. 1d), a result that may have coincided with the worldwide economic downturn in 2008 and fewer available resources for tourism companies to make additional contributions to conservancies.

Conservancies were formed in roughly 4 cohorts that coincided with (1) initial heavy donor investment (1998–2001, 15 conservancies), (2) a period of declining donor investment (2003–2005, 29 conservancies), (3) an upturn in investment peaking in 2009 (2006–2009, 15 conservancies), and (4) a further increased-investment phase (2011–2013, including 18 conservancies registered by the end of 2012). The earliest conservancies, in cohort 1, had similar levels of total benefits for the first 6 years after registration, after which benefits from both hunting and tourism continued to increase but at a faster rate for tourism (Fig. 2a). Conservancies in cohort 2 (Fig. 2b) had roughly similar rates of growth in total benefits from tourism and hunting, whereas cohorts 3 (Fig. 2c) and 4 (Fig. 2d) earned virtually no benefits from tourism and had either moderate (cohort 3) or low (cohort 4) benefits from hunting.

Disaggregating the national-level data revealed that pathways for generating benefits over time varied substantially among conservancies (Supporting Information). Of the 52 conservancies that derived some level of benefits from wildlife, 28 derived all or almost all of their total benefits from hunting, 6 derived all or almost all benefits from tourism, and 18 had substantial levels of benefits from both hunting and tourism.

Although there was a tendency for the total benefits from tourism to be higher than those from hunting, there were no significant differences for any of the conservancy time series metrics (Table 1). The only exception to this was the lag time between conservation formation and the beginning of benefits generation. After their formation, conservancies derived benefits from hunting approximately twice as quickly as they derived benefits from tourism (Table 1). On average, conservancies started generating benefits from hunting about 3 years after their formation, whereas it took 6 years, on average, after conservancy formation to start generating benefits from tourism.

In addition to temporal and spatial differentiation, there were differences in how benefits from tourism and trophy hunting flowed to the different constituencies contained within communal conservancies (Fig. 3). Based on detailed financial accounting data from 2011–2013, 58.3% of the financial benefits from tourism were in the form of jobs to conservancy members at joint-venture lodges, whereas 30.3% of the benefits were lodge contractual fees used for conservancy management and 11.5% were nonfinancial benefits to the community at large less.

In contrast, the majority (64.3%) of the benefits from hunting were in the form of cash for the operation of the conservancy, and a substantial fraction went to the community at large in the form of meat from hunted animals (32.0%, or approximately 1.4 million kg over the 3 years). Conservancies used income from trophy hunting and tourism in a variety of ways that benefited the entire community (Fig. 3), most importantly for the salaries of conservancy employees and for other conservancy operating costs, but also for compensation for wildlife conflict, payments to traditional authority structures, direct cash dividends, community-level projects, and infrastructure development. Our data suggest that operational costs, conservancy employee salaries, and the various benefits to the community at large were mostly derived from hunting because hunting operators paid fees from 2011–2013 of $5.41 million (72% of the total), whereas tourism operators paid $2.13 million (28%).

Currently, many conservancies cover their operating costs with income derived from trophy hunting and from tourism that is directed to conservancy management. Simulation of a trophy hunting ban showed a reduction in the number of conservancies with incomes greater than operating costs in 2013, from 74% (37 of 50) under the status quo to 16% (8 of 50) when conservancy income from hunting was eliminated. If this reduction were to occur throughout the country, it would cover nearly 50,000 km^2 (Fig. 4). When conservancy income from tourism was removed, the effect was again negative but

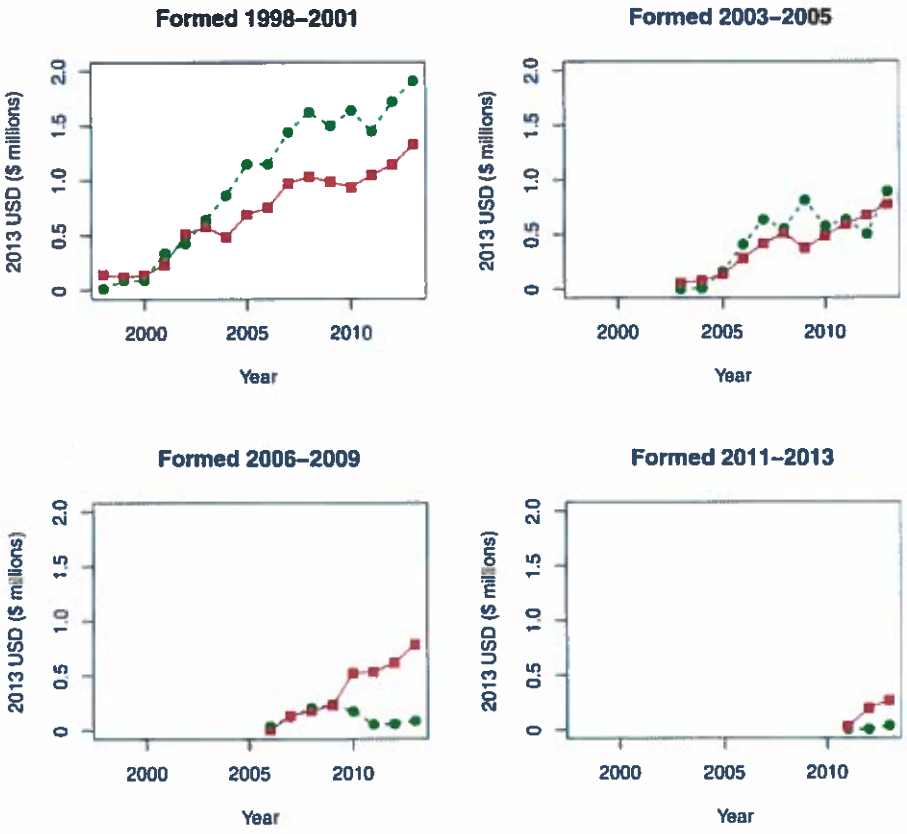

Figure 2. Total benefits from 1998–2013 for hunting (squares) and tourism (circles) across conservancies formed in 4 periods: (a) 1998–2001 (n = 15), (b) 2003–2005 (n = 29), (c) 2006–2009 (n = 15), and (d) 2011–2013 (n = 18).

Table 1. Statistical differences among time series of different metrics of total benefits (in U.S. 2013 dollars) generated from trophy hunting versus tourism on communal conservancies ($n = 52$) in Namibia.*

Variable	*Hunting*	*Tourism*	*t*	*P*
Benefits in 2013 (U.S.$ 2013)	41,453	56,255	−0.91	0.36
Trend (linear regression) of annual change (U.S.$ 2013)	2458	3954	−1.39	0.17
Volatility (root mean square error) of change over time (U.S.$ 2013)	79,192	82,501	−0.16	0.83

Number of conservancies specializing in hunting or tourism	28	6	—	—

**Excluding conservancies that had not generated any benefits from either hunting or tourism.*

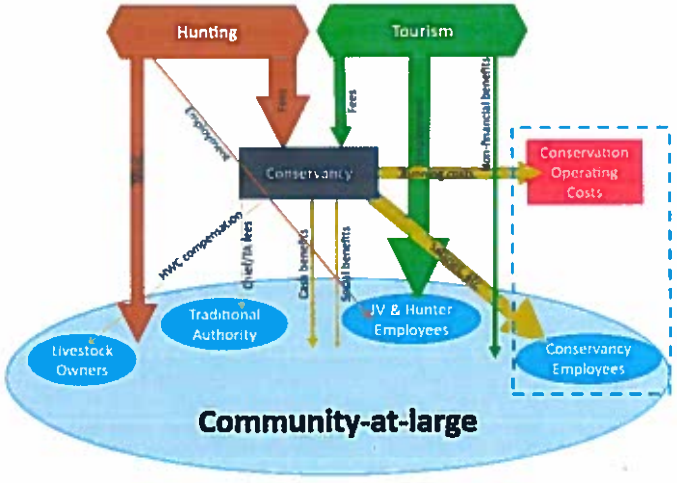

Figure 3. The flow of benefits to various sectors of a stylized local community in Namibia (widths of arrows proportional to dollar values of flows to conservancies from 2011 to 2013; brown, hunting benefit; green, tourism benefit; olive green, flows with a mix of hunting and tourism benefits; dashed rectangle, reinvestment of income into conservation activities; JV, joint venture tourism; HWC, human wildlife conflict; TA, traditional authority). Specific stakeholders (blue ovals) and the overall community at large receive the benefit flows indicated by the arrows ending in those ovals. Income to the conservancy committee (black rectangle) comes from both sectors and is redistributed as indicated, including to cover conservation operating costs (red square).

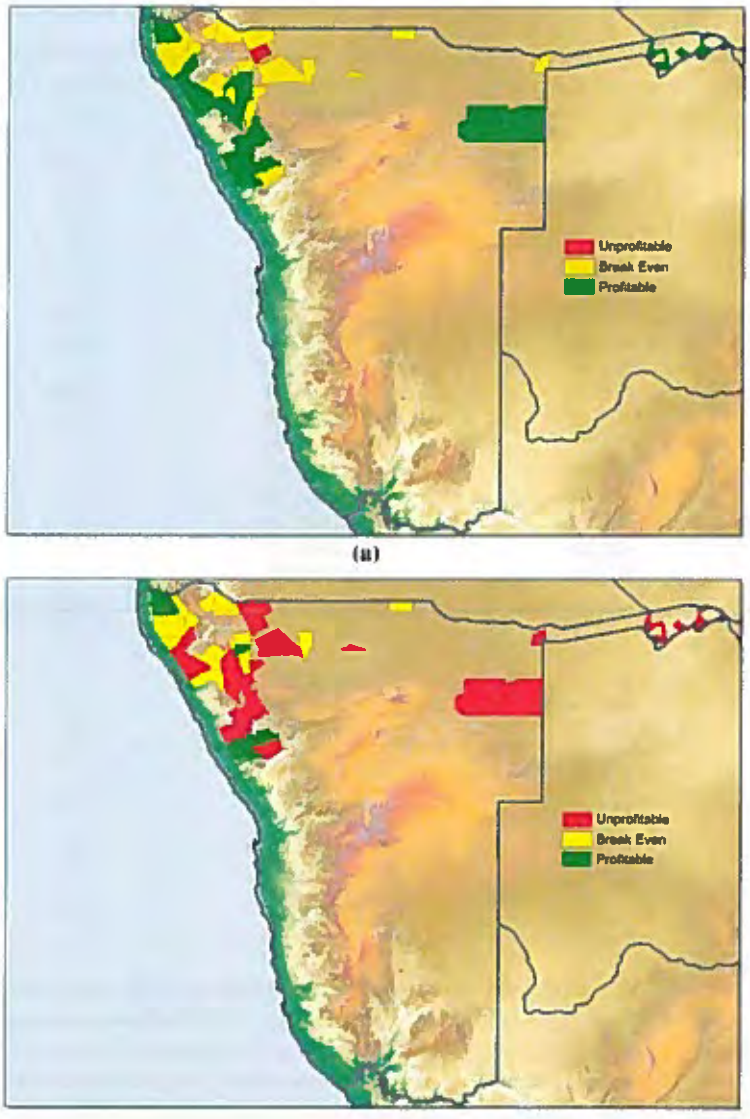

Figure 4. Revenues minus operating costs for 50 communal conservancies for which detailed management cost data were available in 2013 under (a) the status quo and (b) a simulated trophy hunting ban. Break-even conservancies indicate those for which revenues and operating costs are within $5000 of one another.

less marked; 59% of conservancies remained able to cover their operating costs.

Finally, of the 303 animals harvested by trophy hunters in 2013, individuals from 2 of the Big-5 (buffalo [*Syncerus caffer*], elephant [*Loxodonta africana*], lion [*Panthera leo*], leopard [*Panthera pardus*], rhinoceros [*Diceros bicornis* and *Ceratotherium simum*) species hunted in Africa, buffalo and elephant, accounted for 78.3% of hunting revenue; over 55% was attributable just to elephants (Table 2).

Discussion

Despite the importance of both tourism and hunting to conservation, and the debate surrounding their implementation, we are the first study to use detailed quantitative data across multiple jurisdictions and over a lengthy time span to directly compare the financial performance of these two activities. Our data from 77 Namibian conservancies from 1998 to 2013 showed that trophy hunting and tourism reached similar aggregate levels but began to generate benefits at different times (earlier vs. later in a conservancy's life-span) and flowed to different beneficiaries (community management committees and the community at large vs. individual employees). Previous work in Namibia has demonstrated that benefits from hunting and tourism are also spatially differentiated; conservancies are more likely to generate benefits from hunting in areas with diverse wildlife and Big-5 species, whereas the presence of black rhinoceros (*Diceros bicornis*) and broader environmental conditions (distance to tourist routes, topographical diversity, and rainfall) are correlated with higher benefits from tourism (Naidoo et al. 2011*b*). In addition, the first conservancies established were typically those with the highest potential to

Table 2. Number of animals killed by trophy hunters in 2013, by species; average payment made per animal; and the estimated overall contribution of each species to trophy hunting income on communal conservancies in Namibia.

generate benefits from wildlife, and, as with our cohort results, older conservancies generate higher levels of aggregate benefits than younger ones (Naidoo et al. 2011*a*; Humavindu & Stage 2015).

We found that tourism and hunting both made substantial and separate contributions to the economic welfare of rural communal residents; the former was weighted toward employment and wages and the latter toward governance structures and management costs. A focus on either one or the other would lead to substantial reductions in overall benefit generation and incentives for wildlife conservation throughout Namibia. For much of Africa and other parts of the world, Westerners tend to view tourism as the dominant wildlife-based development paradigm for delivering a sustainable flow of benefits to local communities living with wildlife or near protected areas (Kiss 2004; Hawkins & Mann 2007). Similar to the results of studies of private landholders (Lindsey et al. 2013*b*) and national economies (Barnes et al. 2002; Lindsey et al. 2007), our results showed it is important to recognize that the direct benefits of hunting are roughly similar in magnitude to those of tourism for communal conservancies in Namibia.

Beyond this aggregate overall similarity between the benefits of hunting and tourism, there are important differences in scale and sequencing between the two activities. For the typical conservancy, benefits from hunting are generated quickly, within a few years of formation. In these early years of a conservancy, income from trophy hunting is critical for the management of the area, and the meat from hunted animals makes tangible the economic benefits that wildlife conservation can deliver to conservancy members. Benefits from tourism take twice as long to develop, due to the time needed for the recovery of wildlife populations, and the investments in both physical (i.e., lodges and other infrastructure) and human capital required to host high-end tourism in communal areas. Few conservancies (12%) specialized in tourism; most conservancies generating benefits from tourism also generated benefits from hunting. In contrast, over half (54%) of the conservancies generating benefits in Namibia did so from hunting alone, because hunting can be sustained in areas with relatively low densities or visibilities of wildlife, and in landscapes that are unappealing or inaccessible for photographic tourism (Lindsey et al. 2006). Because these conditions characterize much of the African protected-(in the widest sense) area estate, it follows that preventing or discouraging trophy hunting would remove possible incentives for conservation across a large swathe of the continent

where nature-based tourism is not viable (e.g., Blom 2004).

Benefits from trophy hunting and tourism also accrue to different stakeholders within communal conservancies. Benefits from tourism were mainly in the form of employment income to conservancy members who are hired to work at lodges built on conservancy land. Although these employees normally come from among a group of conservancy members nominated by the conservancy, ultimately staff are hired based on their knowledge, communication skills, and potential. Jobs of any kind are extremely rare in remote rural areas and thus highly sought after; therefore, tourism is viewed very favorably by local residents who are employed in the industry (Suich 2010; Silva & Motzer 2015). In contrast, agreements between communities and hunting operators provide significantly higher levels of income for conservancy management, as well as greater nonfinancial benefits (largely from meat) distributed directly to the community at large.

The income to management committees is essential; without it, most communal conservancies in Namibia would be unable to cover their operating costs (which three-quarters of the 50 conservancies we assessed were doing). Conservancies unable to cover their operating costs will likely cease to pursue conservation as a viable land use because without conservancy income, game guards cannot be paid, management and monitoring plans cannot be developed and instituted, the sense of local ownership over natural resources dissipates, and wildlife becomes much more vulnerable to declines from poaching and overharvest. This link between income from hunting and the conditions and incentives that permit wildlife to persist as an economically viable land use is critical but often unrecognized. Our data also show that almost 80% of hunting benefits are delivered by two species (elephant and buffalo); elephants alone generate over 50% of all hunting benefits from an increasing population base (7500 individuals in 1995 to over 20,000 in 2012 [Craig 1999; Ministry of Environment and Tourism 2012]). Therefore, even a targeted hunting ban on elephants or an import ban such as those that currently prevent the import of elephant trophies from Tanzania and Zimbabwe into the United States is likely to have a very negative impact on Namibia's CBNRM program by severely undermining conservancy governance structures and incentives for conservation. Anecdotal accounts of the impact of Botswana's 2014 hunting ban suggests that similar negative consequences (an increase in poaching for meat and trade and increased collaboration of local communities with international poaching gangs) may be occurring there (Somerville 2015).

Although we found there were impressive financial gains from trophy hunting, the sustainability (both ecological and economic) of these operations on communal lands in Namibia is rightly of major concern. As such, it is regulated via annual estimates of species' populations and harvest quotas derived in agreement with local communities and the Ministry of Environment and Tourism (NACSO 2013). Although data from the various conservancy landscapes within the country indicate populations in these areas have generally increased since the advent of Namibia's CBNRM program (Naidoo et al. 2011*b*), evidence on possible negative impacts of trophy hunting on wildlife populations in other parts of Africa (Packer et al. 2010; Lindsey et al. 2013*a*) means that trophy hunting must be carefully monitored in Namibia to ensure the same does not happen. There have been no assessments on how trophy size or quality in particular species may be changing over time, a concern that has been raised for trophy hunting in Africa (Crosmary et al. 2013) and that may result in undesirable genetic changes within hunted populations (Coltman et al. 2003). It is therefore critical that data on the size and quality of trophy exports be analyzed for Namibia's CBNRM program to inform monitoring, evaluation, and management of the trophy-hunting industry. High-profile, apparently illegal hunts such as of lions on the borders of national parks in Zimbabwe, and ethically dubious practices, such as canned hunting of captive animals, also illustrate that the industry itself must play a greater role in addressing issues that throw the sector into disrepute. Finally, growing human populations and a tremendous increase in elephant poaching for the international ivory market may eventually result in reduced quotas of elephants and therefore threaten the financial benefits communal conservancies have generated through trophy hunting.

The sustainability of photographic nature-based tourism in Africa and beyond has also come under scrutiny (Buckley 2004; Newsome et al. 2012). In Namibia relevant issues for ecological sustainability include impacts of intense wildlife viewing on animal behavior, localized environmental implications of the development of tourism infrastructure (lodges, campsites, roads, disposal facilities, etc.) in sensitive arid environments, and climate-change impacts from the carbon emissions of increasing numbers of international visitors. As with trophy hunting, there are few studies, particularly for the first two considerations, that have evaluated the sustainability of tourism initiatives on communal conservancies in Namibia. Furthermore, from a socioeconomic point of view nature-based tourism on communal lands in Namibia has been criticized as having power imbalances or elite capture issues that render communities unable to secure significant shares of the benefits (Hoole 2010; Lapeyre 2011), even though residents of conservancies with high benefit levels are themselves strongly supportive of tourism (Silva & Motzer 2015). Finally, to assess more fully the overall costs and benefits of wildlife conservation on communal lands in Namibia, there is a need for greater investigation of both human-wildlife conflict costs and who bears them, as well as the opportunity

costs of pursuing wildlife conservation as a land use versus alternative uses.

Despite these caveats, our results show that hunting and tourism generated similar aggregate levels of benefits for local communities in Namibia. Because these benefits occur at different times, in different places, and reach different sections of local communities, each are essential to the successful functioning of community-based natural resource management in Namibia. As with other contexts (Sandbrook & Adams 2012), recognizing that benefits from conservation to local communities take various pathways has important implications for conservation and the development of effective incentives. Further investigation is therefore desperately needed to examine the relative impacts of hunting and tourism in many others areas of conservation importance in sub-Saharan Africa.

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Etosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD $1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 ± 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km^2, which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 ± 3,580, 9,165 ± 2,016, 14,097 ± 2,678 and 13,116 ± 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 ± 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N≠a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 ± 1,940, 3,638 ± 1,164, and 6,413 ± 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 ± 2,289 for Khaudum, 61 ± 115 for N#a Jaqna (Kolberg, 2004) and 967 ± 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuangali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

NUMBERS AND DISTRIBUTION
CONT.

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of 3,378 ± 1,756 and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of 2,911 ± 637 (Kilian, 2015) and replaces an estimate of 2,057 ± 598 from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There has been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Hoanib and Hoarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

SUMMARY TOTALS

SURVEY CATEGORY	ESTIMATES FROM SURVEYS		GUESSES		KNOWN AND POSSIBLE RANGE

*RANGE OF INFORMED GUESS

*KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season);
— : No Change

*KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst).

*PFS

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

Salambala Conservancy

Named after the lovers Sala and Bala whose illicit relationship resulted in them being banished to the forest

Quick facts

Registered:	June 1998
Region:	Zambezi
Area:	930 km²
Approximate population:	8,553
Geographical features:	Average annual rainfall of 600 mm. Mopane woodland dominates the northern area, while floodplain grasslands cover the southern section.
Particular features:

2016 Annual Conservancy Audit Report

Salambala
Status Summary & Natural Resource Report

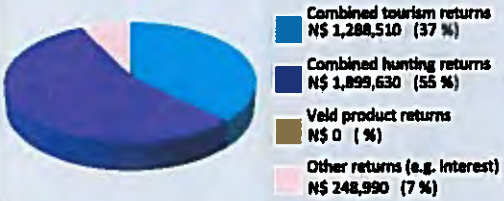
maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2016

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N$ 3,437,130



Two of the most significant returns for the conservancy:

✓cash income to the conservancy to cover running costs and invest in developments

✓Employment to conservancy residents

Conservancy income			N$ 2,006 450
Employment	Private Sector	52 staff	N$ 1,302,080
	Conservancy	37 staff	N$ 1,071,460

Cost of natural resource conflicts in 2016

estimates are based on average national values

Estimated human wildlife conflict cost	N$ 49,970
Estimated poached high value species loss	N$ 0
Total conflict cost estimate	**N$ 49,970**

Natural resource cost–return ratio in 2016

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

Total returns: N$ 3,437,130

Approximate conflict costs: N$ 49,970

Approximate positive ratio 69 : 1

Management performance in 2016

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen	Estimate	Wildlife Status: Count Trend	Wildlife Status: National Guideline	Wildlife Status: Desired Number
B. Zebra	338	350			
Duiker	2	260			
Elephant	57	?			
Giraffe	12	?			
Impala	173	?			
Kudu	28	240			
Roan					
Sable					
Steenbok					
Warthog	37	1000			

Wildlife Status

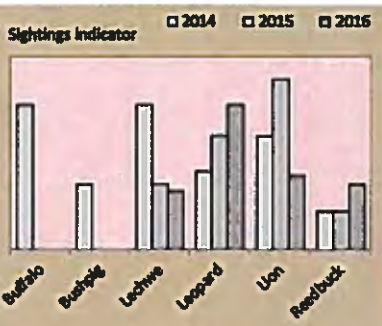
Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

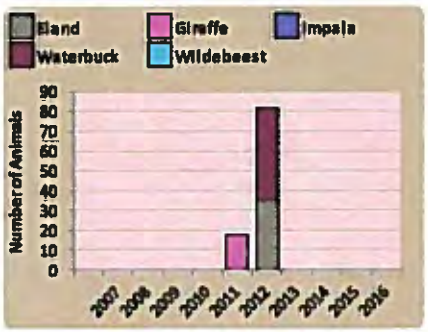
dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

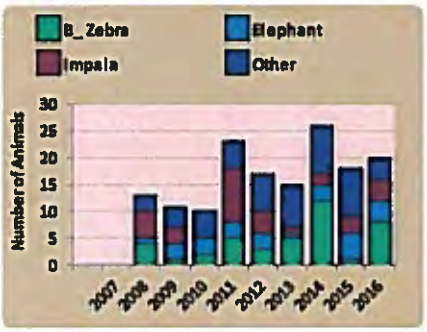


Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

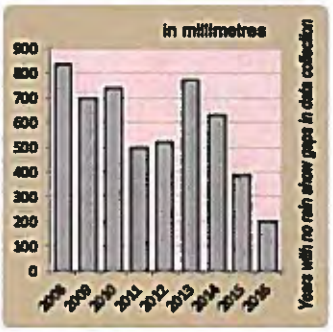
Wildlife introductions



Wildlife mortalities

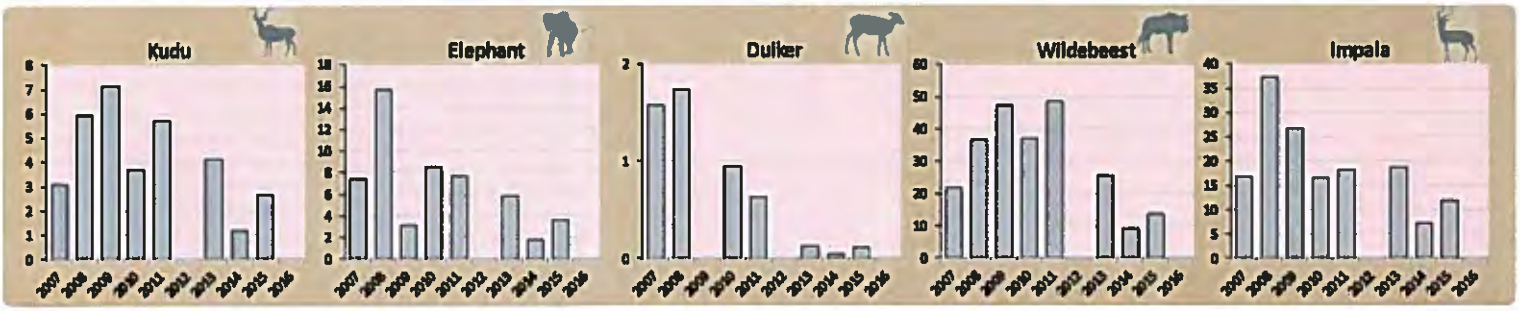


Annual rainfall



Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year



Predator monitoring

charts show the average number of animals seen per Event Book each year
status barometers reflect the general sightings trend over the last 5 years

Elephant Withdrawal Inquiry U.S. Fish and Wildlife Service Prt # 90682C

1 message

MacDonald, Tim <tim_macdonald@fws.gov> Wed, Oct 2, 2019 at 10:36 AM
To: (b) (6) permits@conservationforce.com

Dennis,

On **05/15/2018** an applicaon f or the importaon of an Afric an Elephant, sport hunted trophy was received by this office **Prt # 90682C**. At the me of the applic aon's submission the hunt was to be held at a future date.

Please confirm at this me if y ou successfully hunted the elephant. If **yes**, please state so, and provide the date and locaon the elephan t was taken.

If **no**, do wish to withdraw your applicaon a t this me?

Please confirm the current status.

****Please note the permit that was applied for was for a specific locaon, and dat e. Permit applicaons and f ees are not transferable to another hunt, and so if you have scheduled a different hunt, you must submit a new applicaon.*

Thank you,

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Palmer	Jeffery	Wayne	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Mapleton	UT	84664-4911	Utah	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

(b) (6) 05/05/2018

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Jeffery Palmer, Tel (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana (African Elephant)

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Bushmanland, Namibia

b. Date wildlife was hunted:

6/20/2016

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Professional Hunter: Barend Hendrik van Heerden

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Highveld Taxidermists (Pty) Ltd.354, Vlakplaats, Hennopsriver 0023, Pretoria, South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	Highveld Taxidermist (Pty) Ltd.
Address:	354 Vlakplaats Hennopsriver
City:	Grasmia
State/Province:	Pretoria
Country, Postal Code:	South Africa (ZA)

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

I understand that in Namibia, elephant harvesting is strictly controlled to allow the species to thrive and to strike a balance between the needs of the elephants and the local population. I am told that the elephant population there has increase through such measures.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

I paid US$90,000 for my hunt. I was informed that these funds were distributed among the local tribes and government to help with conservation as well as improve the education system in the area.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

I do not have this information.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signatu[redacted] Date: 5-5-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

CONDITIONS FOR PERMIT NO./s .....

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

Import permits are not valid unless the imported consignment is accompanied by a valid ***(original)*** export permit from the country/ province of origin ***(if required)***, which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

THIS PERMIT:

1. a) Shall not be transferable;
   b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
   c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
   d) Shall be subject to the provisions of any other law and or regulation;
   e) Shall be valid for one consignment only;
   f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.

2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone ***and*** confirm per fax a minimum of ***48 hours*** prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
   a) Name / Company Name of Importer / Exporter;
   b) Name of Airline and Warehouse where intended inspection will take place;
   c) Date and Time of Import / Export / Re-Export;
   d) Date and Time of intended inspection (subject to approval);
   e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
   f) The applicable permit number/s and relevant expiry dates; and
   g) Detailed packing list as per condition 6.

3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours ***(07:00 – 15:30):***
   Office: **+27 (11) 390-3687/ 2311**
   Fax: **+27 (11) 390-1720**

4. All relevant documentation, including ***original*** permit/s ***(CITES permits must include original and coloured copy)***, Packing List/s, A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.

5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s.

6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
   a) Details of Importer and Exporter (Names, addresses and contact numbers);
   b) Waybill number/s and name of carrier, flight number, date and time;
   c) Transport container number/s;
   d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
   e) Common name of species (in full);
   f) Number per species per container (actual number exported / imported); and
   g) Applicable permit number/s

7. If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country/ province within ***14 working days*** after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement,*** for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

9. A person authorized thereto by the Premier may only make any alteration on the permit.

10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.

12. Permit holders or their delegated agents must inform the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

   b) Waybill number/s and name of carrier, flight number, date and time;
   c) Transport container number/s;
   d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
   e) Common name of species (in full);
   f) Number per species per container (actual number exported / imported); and
   g) Applicable permit number/s

7. If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country/ province within ***14 working days*** after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement***, for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

9. A person authorized thereto by the Premier may only make any alteration on the permit.

10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.

12. Permit holders or their delegated agents must inform the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

PERMIT / CERTIFICATE № 205846

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

Import permits are not valid unless the imported consignment is accompanied by a valid ***(original)*** export permit from the country/ province of origin ***(if required)***, which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

THIS PERMIT:

1. a) Shall not be transferable;
   b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
   c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
   d) Shall be subject to the provisions of any other law and or regulation;
   e) Shall be valid for one consignment only;
   f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.

2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone ***and*** confirm per fax a minimum of ***48 hours*** prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
   a) Name / Company Name of Importer / Exporter;
   b) Name of Airline and Warehouse where intended inspection will take place;
   c) Date and Time of Import / Export / Re-Export;
   d) Date and Time of intended inspection (subject to approval);
   e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
   f) The applicable permit number/s and relevant expiry dates; and
   g) Detailed packing list as per condition 6.

3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours ***(07:00 – 15:30)***;
   Office: +27 (11) 390-3687/ 2311
   Fax: +27 (11) 390-1720

4. All relevant documentation, including ***original*** permit/s ***(CITES permits must include original and coloured copy)***, Packing List/s, A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.

5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s.

6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
   a) Details of Importer and Exporter (Names, addresses and contact numbers);
   b) Waybill number/s and name of carrier, flight number, date and time;
   c) Transport container number/s;
   d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
   e) Common name of species (in full);
   f) Number per species per container (actual number exported / imported); and
   g) Applicable permit number/s

7. If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country/ province within ***14 working days*** after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement,*** for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

9. A person authorized thereto by the Premier may only make any alteration on the permit.

10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.

12. Permit holders or their delegated agents must obtain the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

Import permits are not valid unless the imported consignment is accompanied by a valid ***(original)*** export permit from the country/ province of origin ***(if required)***, which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

THIS PERMIT:

1. a) Shall not be transferable;
   b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
   c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
   d) Shall be subject to the provisions of any other law and or regulation;
   e) Shall be valid for one consignment only;
   f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.

2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone ***and*** confirm per fax a minimum of ***48 hours*** prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
   a) Name / Company Name of Importer / Exporter;
   b) Name of Airline and Warehouse where intended inspection will take place;
   c) Date and Time of Import / Export / Re-Export;
   d) Date and Time of intended inspection (subject to approval);
   e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
   f) The applicable permit number/s and relevant expiry dates; and
   g) Detailed packing list as per condition 6.

3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours ***(07:00 – 15:30)***:
   Office: **+27 (11) 390-3687/ 2311**
   Fax: **+27 (11) 390-1720**

4. All relevant documentation, including ***original*** permit/s ***(CITES permits must include original and coloured copy)***, Packing List/s. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.

5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s.

6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
   a) Details of Importer and Exporter (Names, addresses and contact numbers);
   b) Waybill number/s and name of carrier, flight number, date and time;
   c) Transport container number/s;
   d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
   e) Common name of species (in full);
   f) Number per species per container (actual number exported / imported); and
   g) Applicable permit number/s

7. If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country/ province within ***14 working days*** after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement***, for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

9. A person authorized thereto by the Premier may only make any alteration on the permit.

10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being late in the inspection booth/ location, and / or incorrect consignment/s and / or failure to comply with permit conditions.

12. Permit holders or their delegated agents must inform the Environmental Management Inspector/ [illegible] cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

PERMIT / CERTIFICATE № 205102

CONDITIONS FOR PERMIT NO. 20 5102

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

hese conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild nimals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first ort of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

mport permits are not valid unless the imported consignment is accompanied by a valid ***(original)*** export permit from the country/ province of origin ***(if required)***, which ust be handed to the authorized Environmental Management Inspector on inspection.

HE FOLLOWING CONDITIONS ARE APPLICABLE TO:

) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

IS PERMIT:

a) Shall not be transferable;
b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
d) Shall be subject to the provisions of any other law and or regulation;
e) Shall be valid for one consignment only;
f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.

The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone ***and*** confirm per fax a minimum of ***48 hours*** prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays,-with the following information:

a) Name / Company Name of Importer / Exporter;
b) Name of Airline and Warehouse where intended inspection will take place;
c) Date and Time of Import / Export / Re-Export;
d) Date and Time of intended inspection (subject to approval);
e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
f) The applicable permit number/s and relevant expiry dates; and
g) Detailed packing list as per condition 7.

Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours ***(07:00 – 16:00)***:

Office: +27 (11) 380-3687/ 2311
Fax: +27 (11) 380-1720

All relevant documentation, including ***original*** permit/s ***(CITES permits must include original and coloured copy)***, Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.

All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.

Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:

a) Details of Importer and Exporter (Names, addresses and contact numbers);
b) Waybill number/s and name of carrier, flight number, date and time;
c) Transport container number/s;
d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
e) Common name of species (in full);
f) Number per species per container (actual number exported / imported); and
g) Applicable permit number/s

If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country/ province within ***14 working days*** after use.

The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement***, for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

Only A person authorized thereto by the Premier or Minister may make any alteration on the permit.

Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.

Permit holders or their delegated agents must contact the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Schumacher	Randolph	Paul	

2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
(b) (6)			

6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address
(b) (6)			(b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Colorado Springs	CO	80906		USA

2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions.* (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No ☑

3. Certification–I hereby certify that I have read and am familiar with the regulations contained in *Title 50, Part 13 of the Code of Federal Regulations* and the other *applicable parts in subchapter B of Chapter I of Title 50*, and I certify that the information submitted in this application for a permit is complete and accurate to the

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES* and/or *ESA)*

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 3: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 4: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:
   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

      Loxodonta africana, African Elephant

   b. Sex (if known).

      Male

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):

      Namibia, Mashi Conservancy Closest City: Katima Mulilo

   b. Date wildlife was hunted:

      October 1st 2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

Tusks, skin, feet, ears

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

Omujeve Safaris, Ongombo West Section 2, Number 56, Windhoek Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name:	Gideon Cloete
Business Name:	Omujeve Safaris
Address:	Ongombo West Section 2,
Address:	Number 56
City:	Winhoek
State/Province:	
Country, Postal Code:	Namibia

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy,** please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: (b) (6) [redacted] Date: 4/26/2018

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):
Randy Schumacher, (b) (6) [redacted]

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

KNOW ALL MEN BY THESE PRESENTS: That RANDOLPH (RANDY) Schumacher (Full Name of Person), residing at (b) (6) COLORADO SPRINGS, CO 80906

hereby constitutes and appoints each of the following persons, **Professional Cargo Services Inc.**, may act through any of its offices or any employees with Power of Attorney on file with this licensed broker as required by the Regional Commission of Customs as a true and lawful agent and attorney of the grantor named above for and in the name, place, steed of said grantor from this date and in all Customs Districts, and in no other name, to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandise shipped or cosigned by or to said grantor; to perform any act or condition which may be required by law or regulation in connection with such merchandise; to receive any merchandise deliverable to said grantor: To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make, sign, declare, or swear to any statement, supplemental declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district. To sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owners declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise: To sign and swear to any document, and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated said grantor. To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantor's name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor. And generally to transact at the customhouses in said district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930. In which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents; the forgoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of customs of the district aforesaid. If the donor of this power of attorney is a partnership, the said power shall in no case have any force or effect after the expiration of two years from the date of its execution. Or until revoked. Pursuant to 19 CFR 111.36(a), election is made waiving the right to receive invoices, supporting documents and correspondences from Professional Cargo Services Inc. duties and services performed on our behalf. It is understood the right to revoke said waiver is continuing.

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an Importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the Importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service." The broker would then deliver the Importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if the client is an Importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. The amendments are effective as of September 27, 1982.

AERIAL SURVEY OF NORTH-EAST NAMIBIA – ELEPHANTS & OTHER WILDLIFE IN ZAMBEZI REGION, SEPTEMBER/OCTOBER 2019

SUMMARY

An aerial survey of wildlife and domestic livestock took place in Zambezi Region from 25th September to 4th October 2019 as part of a wider survey including Khaudum National Park and its neighbouring conservancies . A total area of 17 380km^2 was sampled at intensities between 10 and 40%.

The estimates of numbers of each species are tabulated below. The estimated number of elephants is lower than that from the 2015 survey, but the change is not statistically significant. There were considerably fewer elephant carcasses seen in 2019. However as a result of the policy of MET to remove carcasses from the field, mortality can no longer be estimated from the aerial survey results. Illegal hunting of elephants continues to take place in the area.

SPECIES	Population estimate	95% Confidence Range		
All Elephants	12008	9410	-	14606
Elephant Family	10862	8283	-	13440

AERIAL SURVEY OF NORTH-EAST NAMIBIA – ELEPHANTS & OTHER WILDLIFE IN ZAMBEZI REGION, SEPTEMBER/OCTOBER 2019

1. INTRODUCTION

The 2019 aerial survey of elephants and other species in Zambezi Region was conducted between 25 September and 6 October 2019. Records included not only elephants and elephant carcasses, but also other species of wild animals, domestic livestock and human activities.

The survey was conducted according to the internationally accepted MIKE standard practices (Craig 2012) in a light aircraft (a Cessna 182) using stratified systematic transect sampling (Norton Griffiths, 1978). Detailed descriptions of methods are provided in Appendix I.

To facilitate comparisons with previous surveys, basic stratification of the survey area (Fig. 1) was the same as for previous surveys (Craig & Gibson 2013; Gibson & Craig 2015). These were designed to maximise precision and do not follow the boundaries of protected areas and conservancies (Fig. 2).

The Rooikat Trust, a Namibian conservation NGO, that has a special interest in wildlife in eastern Zambezi Region supported additional survey effort with the aim of improving the precision of estimates in the area. To do this, "super-strata" were overlaid on east Zambezi strata to provide higher sampling intensities than in previous surveys (Fig. 1). The results were combined with the data from the "original" strata to provide overall estimates.

Table 1. Survey strata

	Stratum Name	Stratum code	Area km²
1	Bwabwata	BAB	3 789
2	Buffalo/Mahango A	BUFA	1 162
3	Buffalo/Mahango B	BUFB	"
4	Buffalo/Mahango C	BUFC	"

2. RESULTS AND COMMENTS

2.1. Reporting format

This report follows the format used for previous surveys of wildlife in Namibia. For each species, a table provides the estimated number per stratum with its 95% confidence range. This "range" refers to the range within which there is a 95% probability that the true number falls (i.e. it is the 95% confidence interval). Strictly, for most species this is actually the range within which 95% of independent *estimates* made by the same method would fall. The true value is likely to be higher on average because of undercounting bias.

The numbers actually seen by the observers are also provided. "No. in" is the number of animals seen within sampling strips and "No. out" is the number seen outside of the sampling strips. Where animals were seen only outside of the sampling strips no estimate can be given but the information can be used to show that the species occurs and where it occurred.

Wildlife species in this section are arranged in alphabetical order of their common names with the exception of Elephant and buffalo, which are placed first and second respectively, which are put together after zebra. At the end of the wildlife section, the carcasses of species other than elephant are reported.

Full results per stratum are given in Appendix II.

2.2.2. Elephant distribution

In the Zambezi survey area, elephants were found mainly in protected areas (Figs 3 & 4). This was the case in previous surveys which were also conducted in the dry season. There are no survey data to show wet season distributions, but the combined evidence from carcasses (Fig 5) suggests that elephants are more widespread than shown by dry season surveys and are found in areas that have no water during the dry season. Distributions of elephants were very similar to those in 2014 (see Figs 6 and 7). This is clearly typical of distribution during dry seasons.

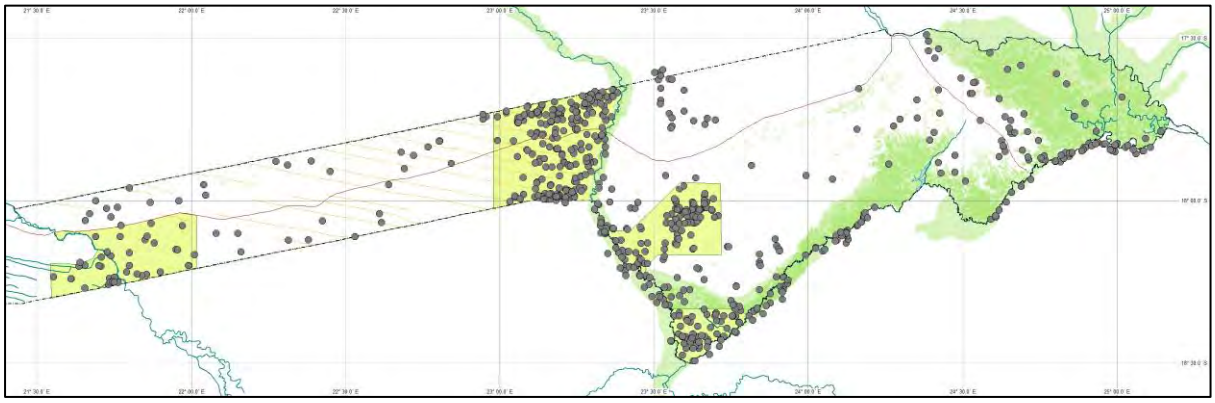

Figure 5 Sightings of elephant carcasses 2013 - 2019

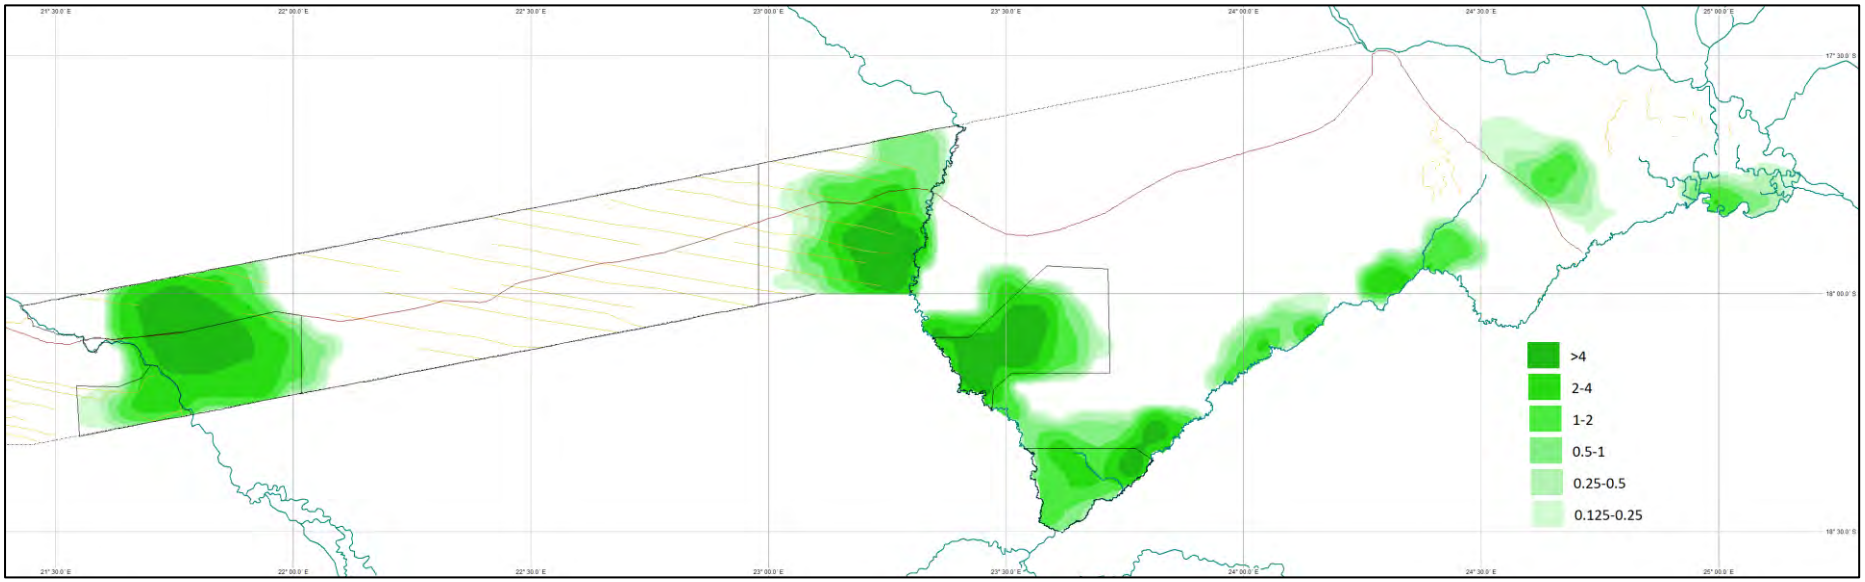

Figure 6 Density distribution of elephants in Zambezi Region 2019

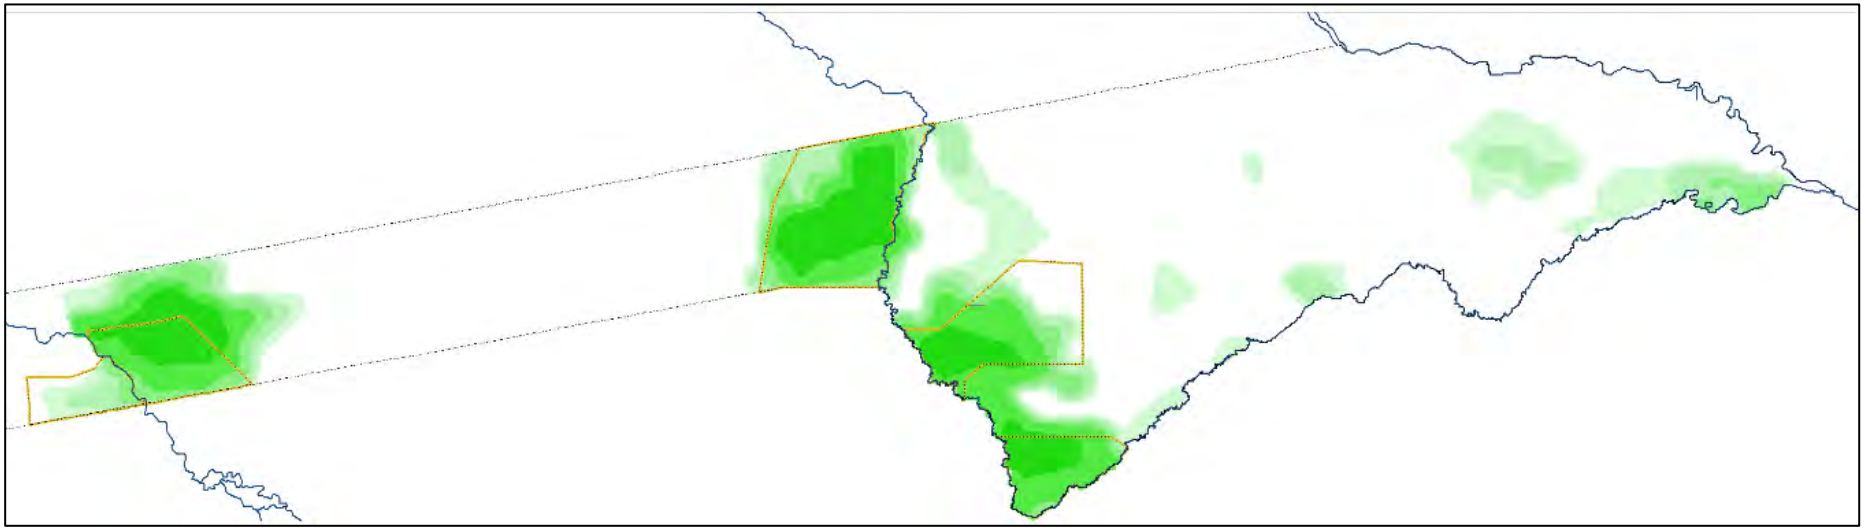

Figure 7 Density distribution of elephants in Zambezi Region 2015

2.2.3. Elephant population trends

As reported previously (Craig & Gibson 2013, Craig & Gibson 2014, Gibson & Craig 2015), estimates from previous surveys are difficult to compare because of differences in overall areas surveyed and differences in the methods used. Survey methods from 1994 onwards were broadly similar apart from total counts of wetlands. Table 5 provides information from surveys between 1994 and 2019.

Table 5. Results of aerial surveys of elephants in Zambezi Region (Caprivi) since 1994

Year	Estimate/ no counted	95% CL as % of Est.	95% range			Survey type	Source of Information

***** *the 95% confidence limits provided above have been calculated independently. Statistics presented in Chase 2008 are incorrect*

*** *a sample survey except for Mamili NP surveyed as a total count*

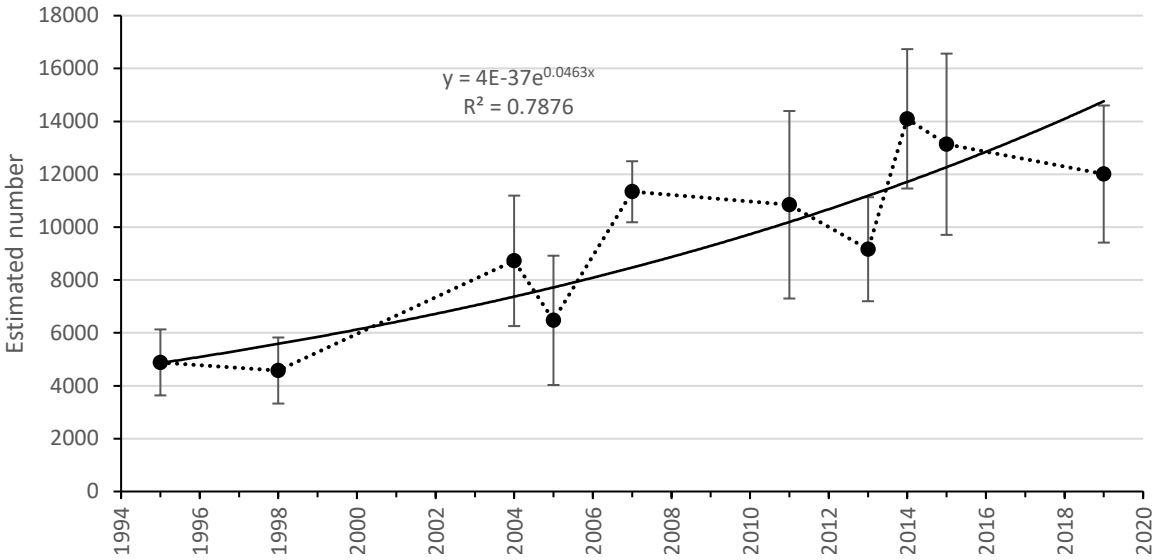

Figure 8 Population trend of elephants in Zambezi region
(note: estimates from 1994 surveys were omitted because the survey area was different. Total counts conducted in 2004, 2007 and 2009 were also omitted as they are not considered comparable with the sample counts.)

The overall rate of change from 1998 averages an increase of 4.74% (2.74% - 6.82%) and is statistically significant (F=29.7, p = 0.0006***) (Fig. 8).

Estimates have decreased over the past 3 surveys, but the decline is not significant. It is possible that such a decrease is real: some decline might be expected as a result of the illegal hunting that took place from before 2013 (Craig & Gibson 2013) but this is not shown by the available population data. Additional evidence on the level of illegal hunting might be provided by the data from carcass estimates (see below).

2.2.4. Elephants – carcass numbers

Table 6 gives estimates of numbers of elephant carcasses in the four decay stages (Douglas-Hamilton & Burril 1991) which are described in Appendix Ic. Change in carcass numbers and carcass ratios can be more sensitive indicators of excess mortality than change in population size (Craig & Gibson 2013). However, the policy of removing carcasses from the field renders the carcass ratio invalid as an index of population status.

Comparing numbers in the light of numbers removed is another option. That is, there were an estimated 733 carcasses within protected areas (Bwabwata, Mahango, Mudumu and Nkasa Rupara National Parks) in 2015. Since then, 400 carcasses have been removed from these areas (Fig. 10). The present estimate in the areas is 343. One interpretation would be that the present number represents those of the 733 original carcasses that were not picked up, there having been very little mortality since 2015. Conversely all the 2015 carcasses may have been collected or deteriorated beyond recognition, so that the 343 present carcasses have all accumulated since 2017. One thing that may be said with confidence is that 94 carcasses (of stages 1, 2 or 3) have accumulated in the area in the last two years, which suggests poaching is continuing, albeit at a reduced rate.

In the areas where carcasses were not removed (see Fig. 10), the number of carcasses estimated has declined from 450 in 2015 to 175 in 2019, a highly significant difference (t=3, p<0.003***). Here the rate of accumulation from mortality has been outweighed by deterioration of the carcasses already present because here, at least, poaching has declined although the carcass ratio is still 9%, which is marginal for sustainability.

Maps of sightings of carcasses seen during successive surveys (Fig. 9) suggest that there were high levels of elephant poaching from 2013 to 2015 that have declined by 2019. The map (Fig.10) of carcasses that were removed in 2017 and 2019 show a substantial number of carcasses and the areas where removal took place.

Table 6 gives estimates of numbers of elephant carcasses in the four decay stages which are described in Appendix Ic.

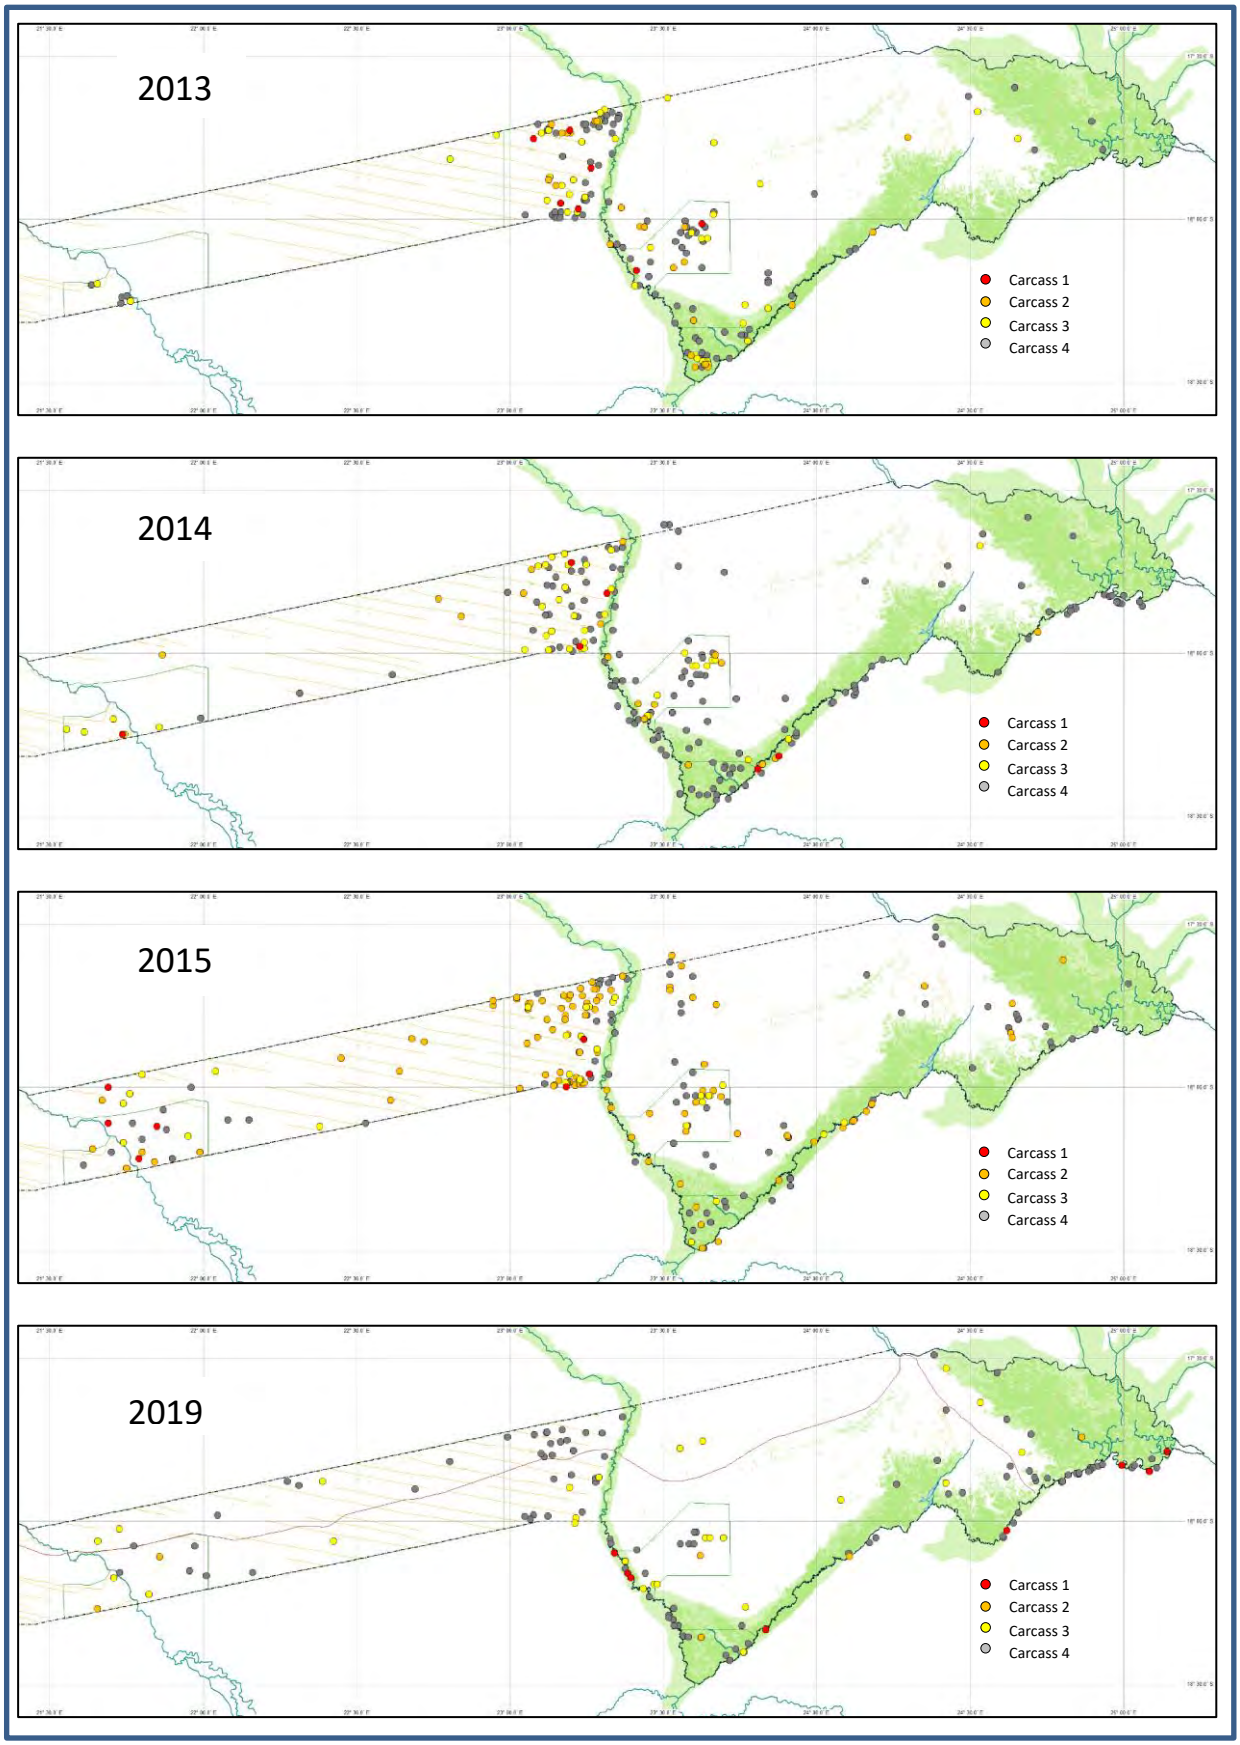

Figure 9 Sightings of carcasses during aerial surveys 2013 to 2019

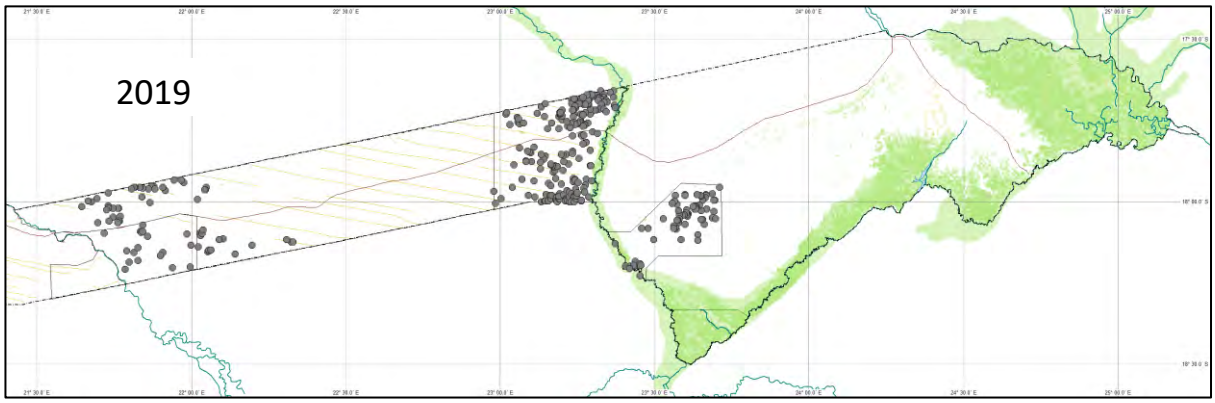

Figure 10 Carcasses removed from the field in 2017 and 2019

During positioning turns over Botswana between transects, the survey recorded a total of 68 carcasses, 9 of which were killed recently. Several of these were fresh, none had tusks and some had fallen together. The number is greater than seen in 2014 (53) and is evidence of a continuing poaching problem just across the border.

2.2.5. Elephants – herd sizes

Elephants that are under pressure tend to group into large herds and comparisons of herd sizes in 2014 and 2015 showed significantly increased herd sizes in Kwando and Susuwe (Table 7) (Gibson & Craig 2015). This trend appeared subsequently to be reversed and mean herd sizes in those strata decreased significantly (Table 8).

APPENDIX I: METHODS

Methods followed CITES aerial survey standards using stratified systematic transect sampling (Norton Griffiths, 1978) with analysis using Jolly's method for unequal size sampling units (Jolly, 1969).

a. Survey design

As mentioned above, the same strata were used as those in previous surveys (eg Gibson & Craig 2015). Additional strata were added in the eastern Zambezi with the aim of improving the precision of estimates of zebra and other species (Fig.1).

b. Sampling intensity

Like previous surveys of the regions, sampling intensities were designed to maximise the precision of elephant estimates.

Higher precision was required particularly for the core areas and for the eastern Zambezi region. In order to achieve sampling intensities of up to 30% for such areas, it would be necessary to space transects as little as 1.3 km apart. With strip widths of 200m per side and a 100m dead zone under the aircraft, this would leave a distance between transects of 800m outside the strip markers. Any deviation from track could cause double counting, as well as disturbing animals on adjacent transects and assumptions made in the calculation of precision would be violated. Transects in these strata were therefore divided into interleaved sets, each representing a separate 10% coverage, the results of which were combined in the final analysis. This had the additional advantage that in the event of the survey not being completed, a full coverage might still be available, albeit at a lower sampling intensity.

The south-eastern and south-western strata were flown together but separated for analysis to accommodate the overlap between the Rooikat south and East Zambezi South (see Table 47). The estimated numbers of animals were calculated as a mean of the individual estimates. The combined variances were calculated as $V= \Sigma v/n^2$ (n is the number of surveys).

c. Selection of transects

Transects were evenly spaced according to the required sampling intensity from a randomly chosen start point and oriented at right angles to major features (eg rivers) in each stratum, as far as possible (Fig. 35).

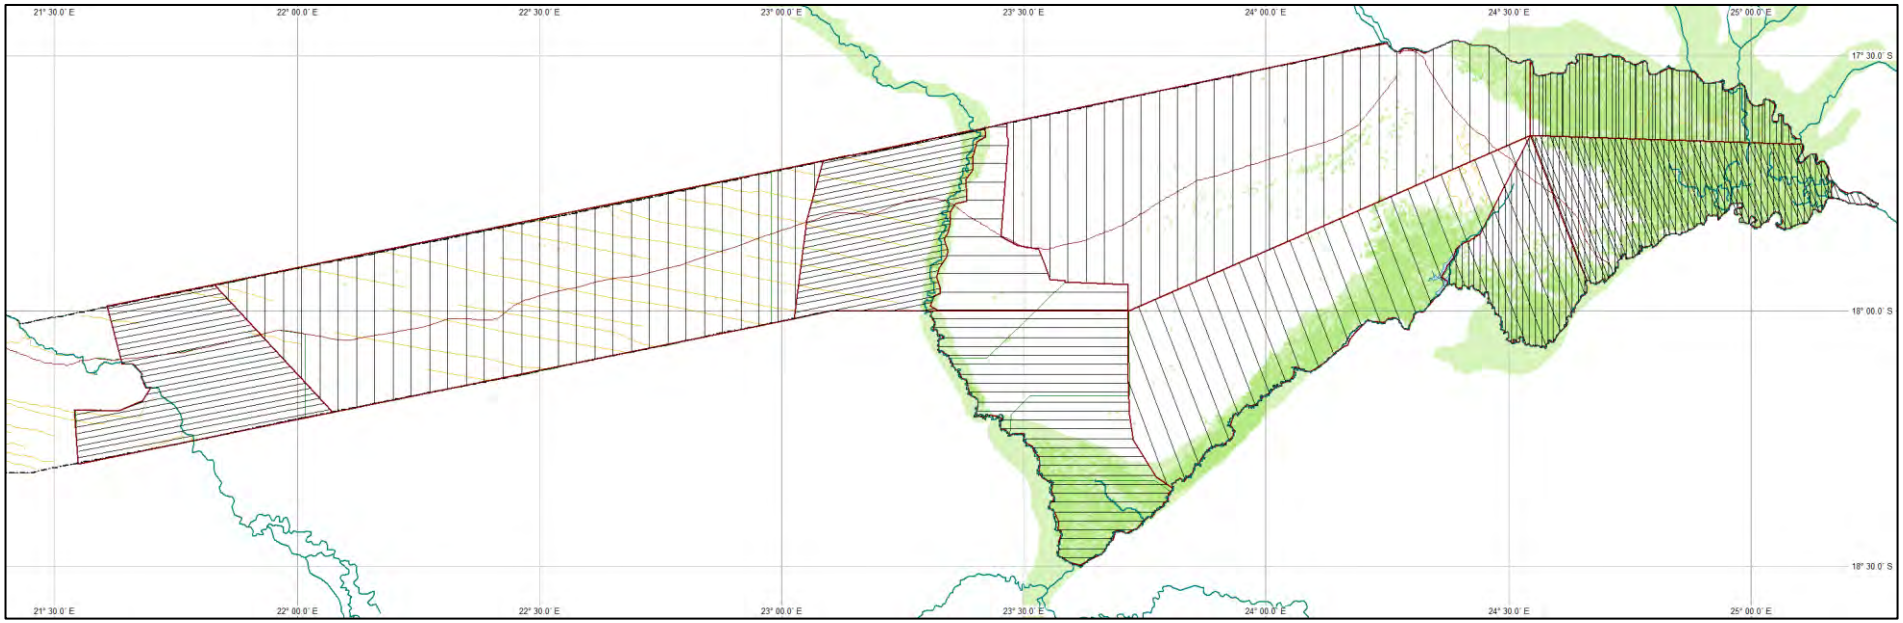

Figure 38 Transects selected for the 2019 survey

d. Calibration

Sampling strips were demarcated by rods attached to the lift struts on each side of the aircraft.

These were calibrated for each observer by flying at varying heights across numbers marked 10m apart on a level airstrip (Fig39).

The observers called the inner and outer numbers seen between the rods. The difference + 10 between these numbers gave a distance that was adjusted for 300 ft a.g.l. and the mean used as the calibrated strip width for each observer.

Figure 39 Calibration of observation strips

e. Data collection

The aircraft, a Cessna 182 was flown at a nominal height of 300 feet above ground level along the transects. Height was maintained using a Lightware SF11 laser rangefinder fitted in the starboard wing of the aircraft (Fig. 40). A backup SF30 laser rangefinder was also installed in the wing in case of equipment failure.

Figure 40 Installation of laser rangefinders in the aircraft wing

Figure 41 Flightlogger display of height a.g.l. . (pilot's GPS mounted on the control yoke)

Data from the rangefinder were streamed to a tablet in which the Vulcan Flightlogger App was installed to interpret and display it (Fig 41).

All incoming heights, speeds and location information were recorded at 1 second intervals for use in later analyses along with a time-stamp for each record.

Accurate navigation along each transect was achieved using an up-loaded display of transect coordinates using the Forelight App on an ipad. Tracklogs of all flights were recorded in both the Garmin GPS and the Vulcan Flightlogger. The observers called out animals and other parameters seen from their fixed positions in the rear seats. They distinguished between sightings within and outside the sampling rods. This information was recorded by the front seat observer on paper datasheets. The position of each sighting was "marked" in a Garmin 64S GPS.

f. Searching rate

The searching rate (km^2/hr) was calculated for each transect and the mean for each stratum provided as an objective indication the survey quality.

g. Data analysis

Jolly's (1969) method for blocks of unequal size was used to calculat estimates of density and variance for each species in each stratum as follows:

$$R = \frac{\sum_{i=1}^{n} y_i}{\sum_{i=1}^{n} z_i}$$

$$\hat{Y} = Z.R$$

$$V_{\hat{Y}} = \frac{N(N-n)}{n}.(s_y^2 - 2.R.s_{zy} + R^2.s_z^2)$$

where:

R = density of animals
Y = total number estimated
Z = total area of stratum
y_i = number of animals counted in transect i
z_i = area of transect i
n = number of transects
N = number of transects possible in stratum where $N = n.Z/\Sigma z$
s_y^2 = variance of number seen per transect
s_z^2 = variance of transect areas
s_{zy} = covariance between number seen per transect and transect area
V_y = variance of estimated number in stratum (i.e. variance of Y)

Overall estimates and variances were obtained from the sums of the stratum estimates and their variances.

The term $N(N-n)/n$ approaches zero as sampling intensity approaches 100%. Its application makes the assumption that all animals in the sample are seen once. This is violated if animals can move between transects during the survey, as can happen if transects are closely spaced or the survey cannot be completed in one flight. This is why some strata have repeated samples at 10%, rather than a single coverage at a higher intensity (see below). For example four 10% samples are the equivalent of a 40% sampling intensity to produce an overall estimate from the mean of the four resultant estimates. When merging separate coverages to give a mean estimate, the estimated numbers of animals were calculated as a mean of the individual estimates. Combined variances were calculated as $V= \Sigma v/n^2$ where n is the number of surveys.

The standard error (*SE*) of the estimate is the square root of the variance and the 95% confidence limits of the estimate is $Y \pm t \,.\, SE$, where t is Student's t for a two-tailed probability of 0.05 and n-1 degrees of freedom.

h. Calculation of heights above ground level

Data streamed from the laser rangefinder was captured by the Flightlogger app. A height record was acquired every second along with a date/time stamp and GPS location. These data were downloaded into MS Excel for analysis.

i. Elephant sightings, carcass classification and ratios

Elephants were recorded as being in family groups or bull groups, defined as follows:

Family groups - herds in which females and young are present. Any bulls in the group are counted as part of the group.

Bull groups - single bulls or herds which contain no females or juveniles.

Carcasses were classified into four categories according to their estimated time since death ((Douglas-Hamilton & Hillman 1981; Douglas-Hamilton & Burril 1991)).

The four classes are:

Carcass 1 - Fresh (<1 month): skin covered, with flesh present giving the body a rounded appearance; vultures often present; ground still moist from body fluids.

Carcass 2 - Recent (<1 year): rot patch still visible; hide still attached to carcass; bones not scattered

Carcass 3 - Old (>1 year): skin absent; bones not scattered; vegetation re-grown in rot patch.

Carcass 4 - Very old (up to 10 years): bones bleached and scattered.

The estimated time since death of carcasses may vary between regions as the rate of decomposition depends on a number of factors such as moisture and temperature.

A "carcass ratio" defined as the ratio of dead elephants to all elephants (dead plus live animals).

Douglas-Hamilton *et al.* (Douglas-Hamilton & Hillman 1981; Douglas-Hamilton & Burril 1991) suggest a carcass ratio of 2 - 8% as being normal for a stable or increasing population, while a ratio of over 9% indicates a declining population.

j. Mapping wildlife distribution

For most species, the positions of the sightings were simply plotted on a map of the area without accounting for the relative numbers of animals per sighting or the sampling intensity at which the sighting was made.

A contoured map was produced to show the distribution of elephant densities. This was done by calculating the density of animals in cells measuring 1/30 degrees. These cells were filtered using a moving average. Empty cells were filled using Voronoi polygons surrounding the nearest filled cells. Resolution was doubled four times, filtering each time and cell values were converted to integer values of log (base2) density. Contours were produced by shading according to $\log_2$ density. This results in density doubling for each contour.

APPENDIX II: RESULTS

The survey crew comprised R. Odendaal (pilot), C. Craig (front-seat recorder/coordinator), N. Chitemamuswe (left hand observer) and F. Muroki (right hand observer), M. Brassine (data capture/alternative right hand observer/driver), T. Sirika (ground support/cook).

Figure 42 Crew in action

Supporting data indicating survey quality are given below.

Track logs of the transects flown are shown in Fig. 41.

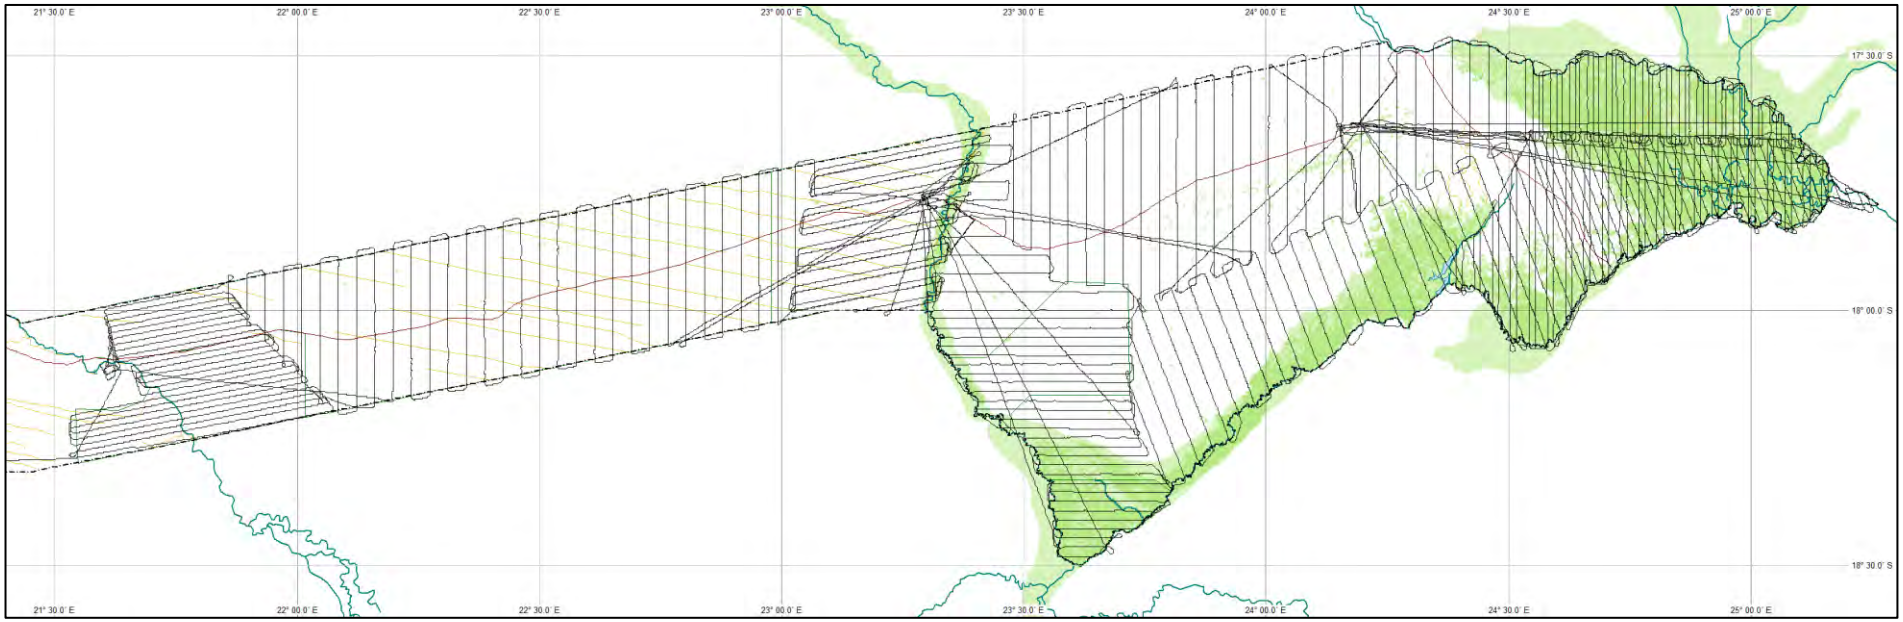

Figure 43 Tracks flown on the 2019 Zambezi survey

b. *Calculation of strip width*

The results of the strip width calibration are given below. Messrs Muroki and Chitemamuswe were left and right observers respectively. Ms Brassine replaced Mr Muroki on the left for a few strata.

These calibrated strip widths were used for both the Zambezi Region and the Khaudum/Nyae Nyae surveys.

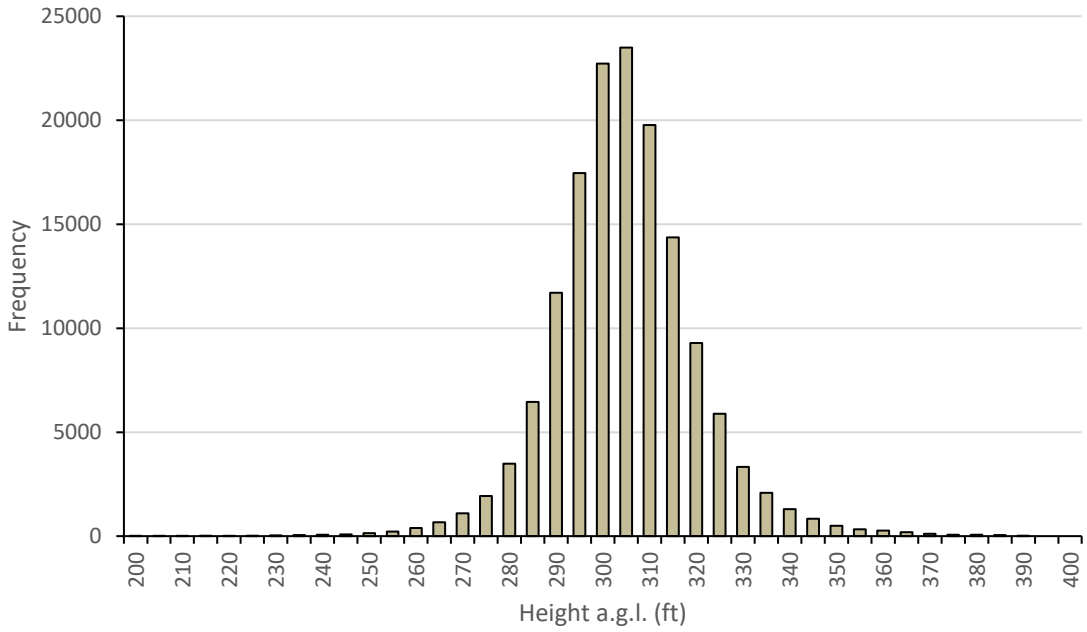
c. Maintenance of height

The target height was 300 feet above ground level (a.g.l.). Heights were calculated from individual heights recorded every second from the laser rangefinder. The mean height flown for the whole survey was 302.2 feet a.g.l. 95% of heights were within a predicted 30 feet of this value. The related statistics for the Zambezi survey are given in the table below and summarised in the following frequency histogram.

	HEIGHT ft a.g.l.
Mean	*302.2301*
Variance	*241.3997*
Std Deviation	*15.5370*



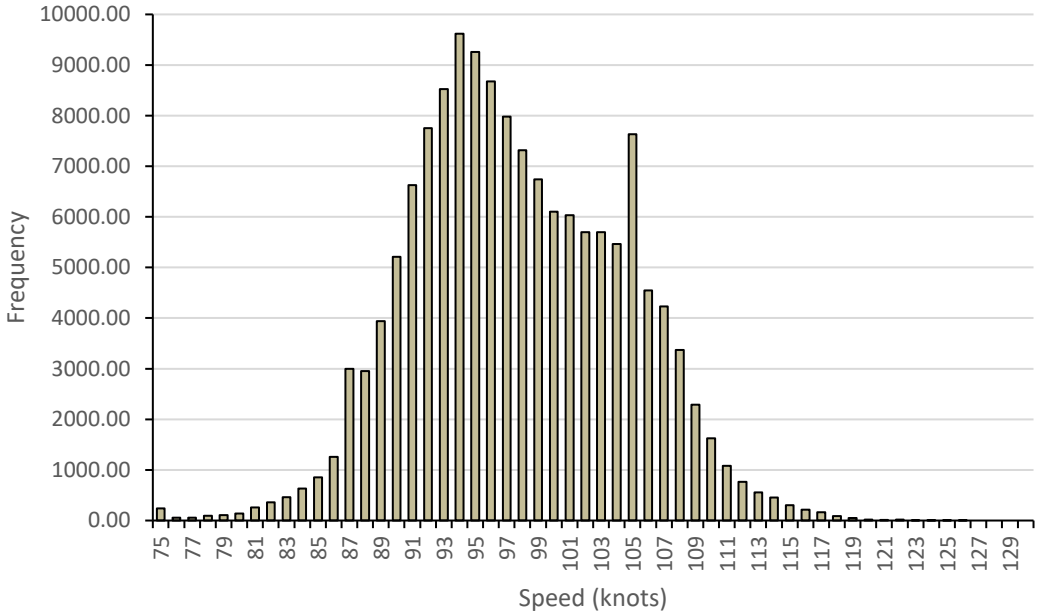
The true standard deviation in height must be less as there is variation due to instrument error that has not been allowed for.

d. **Flight speeds**

Flying speed was kept to below 103 knots (190km/hour). The mean speeds and related statistics are presented in the following table and frequency histogram.

.

	SPEED knots
Mean	*97.1766*
Variance	*44.6738*
Std Deviation	*6.6838*



The outlying peak of high speeds to the right were due to increasing the speed for the final strata in order to finish on time.

APPENDIX III: RESULTS BY STRATUM

a. Estimates of numbers, densities and confidence limits

The following tables give the results for each stratum based on the numbers seen in the sample. SI refers to the sampling intensity for the stratum. Results for all species and attributes counted are given. Column 6, labelled PRP (Percent Relative Precision), is the 95% confidence interval expressed as a percentage of the estimate.

"No. in" is the number of animals seen between the sampling strips. "No. out" is the number seen outside of them. Where the calculated lower limit of the confidence range is less than the number actually seen in the stratum (including all sightings, both in and out), the number seen is given as the lower limit of the range.

For species or attributes where no meaningful estimate can be given, only number seen is reported.

The individual stratum results and their combinations give higher level results as reported above are given. Where the overall result for a stratum is the result of separate coverages, the overall result follows the component coverages.

Zambezi Region Overall Area: 17380 km²

Thank you for submitting an application to the U.S. Fish and Wildlife Service. The application was received by the Division of Management Authority on 05/15/2018; check number 1062 accompanied the application for AFRICAN ELEPHANT. Your application has been assigned the following PRT identification number: MA91307C-0While processing time may be less, you should anticipate a minimum of 30 days to process your request, with many requests averaging between 60 to 90 days due to some requests which need to be published in the Federal Register and/or be reviewed by other Service offices. While we are aware that you may want to inquire about the status of your application, we request that you allow our office at least three weeks after the receipt of this notification to make any inquiries. Should you have additional information that you need to provide to our office pertaining to the current request, we ask that you call our office first at 800-358-2104 or email managementauthority@fws.gov to obtain further instructions.

Re: Applications for Permits to Import Sport-Hunted Elephant Trophies

Dear Chief Cogliano:

Enclosed please find two applications for permits to import sport-hunted trophies.

- The first applicant is hunting an elephant in the Salambala conservancy in Namibia. The funds from this hunt will be used to support conservancy operations and ensure the land remains beneficial habitat for Namibia's growing elephant population. The meat will be distributed to the conservancy's over 8,500 residents. Please consider the enclosed information and information in the DMA's files regarding the benefits of elephant hunting in Namibia, including information previously submitted by Conservation Force and Namibia's Ministry of Environment and Tourism, in making a positive enhancement finding for this applicant.
- The second applicant is hunting an elephant in the Divindu concession in Namibia. Again, the funds from this hunt are used to benefit Namibia's communities and the meat will be distributed. These incentives have sustained positive elephant population growth and reduced poaching and human-elephant conflict in Namibia. Please consider the information in the DMA's files and the information here and that will be submitted by this operator, as well as information received from Conservation Force and Namibian authorities, in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted AFRICAN ELEPHANT trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Type of Activity:

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Robillard	Donald	Francis	Jr

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Dallas	Texas	75229	Dallas	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

   NA

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Donald Robillard (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

NA

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Lexodanta Africana (African Elephant)

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Rep of Namibia: Kavango East, Beabwata West;S18 09 162 E021 42 495; Divundu

   b. Date wildlife is to be hunted: June 8 to June 30, 2018

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Hunt Africa Namibia CC; Jacobus Hugo Pinaar

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

NA

   b. Date wildlife was hunted: NA

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

NA

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

NA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). PERMITS WILL BE ISSUED PRIOR TO HUNT. NOT YET ISSUED AT DATE OF APPLICATION.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	
Address:	Jacobus Hugo Pinaar, Hunt Africa Namibia CC
City:	
State/Province:	POBOX 1100, GOBABIS, OMAHEKE, NAMIBIA
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

Population of elephant in this area (October 2017) more than 2000 and increasing.
COUNTRY POPULATION APPROX. 26,000.

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Hunting Daily Fees US$43,757. Trophy Fee US$70478. 40% of trophy fees go to the Namibia government-Game Products Trust Fund (repairs, maintenance, salaries of rangersin areas where elephants roam. 40% to the community. The community uses the money to pay game rangers and for support of the KWE people.

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

Safari company has agents that are paid for anti-poaching information. The Professional Hunter, Jacobus Pinaar, is a trustee on the HUAP Trust (Hunters United Against Poaching). HUAP Trust has raised over N$4million to fight elephant poaching.

NOTE: INFORMATION FOR QUESTIONS PROVIDED BY HUNT AFRICA NAMIBIA CC.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature: (b) (6) [redacted] Date: 04/23/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Elephant Trophy Application

1 message

MacDonald, Tim <tim_macdonald@fws.gov> Tue, Oct 1, 2019 at 11:45 AM
To: permits@conservationforce.org

Hi Regina,

As you know I am going through all of the old elephant trophy applications trying to determine what applications are needed, and what applications can be withdrawn. I appreciate your patience and help, especially after you sent me that list. I am just attempting to be extremely thorough. Therefore, I will be sending an email for each application I locate as I go through the pile of paper.

On **05/15/2018** an applica on for the importa on of an African Elephant, sport hunted trophy was received by this office **Prt # 90749C**. At the me of the applica on's submission the hunt was to be held at a future date.
Please confirm at this me if you successfully hunted the elephant. If **yes**, please state so, and provide the date and loca on the elephant was taken.

If **no**, do wish to withdraw your applica on at this me?

Please confirm the current status.

****Please note the permit that was applied for was for a specific loca on, and date. Permit applica ons and fees are not transferable to another hunt, and so if you have scheduled a different hunt, you must submit a new applica on.*

Thank you,

Tim Mac Donald

Reference: Prt # 90749C

Dear Mr. Mac Donald,

I am confirming that my 2018 sport hunted African Elephant hunt was successful. The bull elephant was taken on June 28, 2018 in the Republic of Namibia: Kavango East Bwabwata West; S 18 09 162 E 021 42 495 (Camp location). The more precise location where the elephant was harvested is S 18 07 31.18 E 21 41 33.02

Please advise if you have any further questions or need further information.

Yours sincerely,

Don Robillard

Gobabis
Namibia, Africa

(b) (6)

Hunting fees include:

1. All basic safari fees. (accommodation, food, all drinks - house brands, vehicle)
2. Hunting permits for Namibia
3. Trained African skinners and trackers
4. Field preparation of trophies

Hunting fees exclude:

1. Taxidermist charges
2. Dipping and mounting of trophies
3. Freight agent's packing and shipping
4. Rifle hire and ammunition
5. African Staff Tips (Gratuities)
6. 15% VAT on accomodation

Special Notes:

1. All wounded game not found will be regarded as hunted
2. We require a 50% deposit to confirm the booking of a hunt
3. Final payment - wire transfer or cash

RE: PRT # 90749C – Applicant - Donald Robillard, Jr.
Supplement to Import Permit Application for Sport Hunted Elephant Trophy from Namibia

Ms. Brisendine:

This is a supplement to the existing application, PRT # 90749C for an Elephant Trophy Import from Namibia for applicant Don Robillard, Jr.

Supplementary Answers for after the Hunt detailed below:

Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or huntingblock, AND nearest city) where wildlife was removed from the wild:

The elephant was taken in the Republic of Namibia, Kavango West East Bwabwata West. Precise location of the hunt – S 18 07 31.18 E 21 41 33.02

Date wildlife was hunted

The Wildlife was taken on June 28, 2018.

The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document

The trophies are currently stored at Trophaendienste Taxidermey, P.O. box 21068, Windhoek, Republic of Namibia. Professional Hunter – Jacobus Hugo Pinaar, Hunt Africa Namibia, P.O. Box 1100, Gobabis, Omaheke, Namibia.

Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so

See Attached for Hunting Permits

We have also provided the Operator Enhancement Report from Hunt Africa Namibia and the invoice for this hunt with trophy fees listed, which we ask to be included with the other enhancement documentation and in response to question #9 of the application.

These documents show that the hunting is well-managed and regulated on lawful sport hunted trophies in Namibia. Please consider these attached documents and the ones previously provided along with the supplemental information regarding the hunt above, in making a positive enhancement finding for this elephant permit application.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver
Permits Paralegal Conservation Force

Enclosures:
a. Operator Enhancement Report- Hunt Africa Namibia
b. Donald Robillard Hunting Permits
c. Invoice for hunt with trophy fees

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. **OPERATOR INFORMATION**
   a. Name of Area Operator: HUNTAFRICA NAMIBIA
   b. Years in business: 32 years
   c. Name of Company conductinghunt: HUNTAFRICA NAMIBIA
   d. City where hunt will take place:
   e. Country where hunt will take place: NAMIBIA

2. **CONCESSION**
   a. Name of Concession: Bwabwata west National park
   b. Area in Km^2: 3800
   c. Land tenure: Government lease
      Government x Community Private Ranch Private Conservancy Lease
   d. Length of Concession Agreement: 5 years
   e. Can it be renewed? x Yes No
   f. Length of Renewal, if applicable: 5 years
   g. Estimated total amount received in trophy fees last year, if applicable:
   h. Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:
      Yes, annual reporting: detailed report to the Ministry of Environment & Tourism, of each client and every animal that was hunted.
   i. Please provide the Concession location and nearest City: S 18 09°C 162 E 021 42°C 495, Rundu (bigger town) Divundu (very small town)
   j. Please attach a map or maps with the boundaries marked and showing the nearest City attached
   k. If the Concession borders a National Park, please provide Park name: Inside the Bwabwata National park
   l. Description of general and distinctive habitat features and any water features:
      Bushveld
      The Okavango river forms the western border

3. **COMMUNITIES IN THE CONCESSION**
   a. Are there any communities living in the Concession? x Yes No
   b. If so, estimated number of people or villages in the Concession? 1 Village – Omega – 1000 people
   c. Are there communities bordering this Concession? x Yes No
   d. If so, estimated number of people or Villages around the Concession?
      Muchiko area – 500 people

4. **RELEVANT GAME POPULATIONS IN THE CONCESSION:**[1]

[1] The new Fish and Wildlife Services (FWS) Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Species Name	Relative Abundance			Estimated Population	3-Year trend			How is it monitored?
	Dense	Avg.	Sparse		Up	Down	Stable	
Elephant	x			2500			x	By counts
Lion			x		x			
Leopard	x						x	
Prey species								

5. Local Community Participation
   a. Total employment number: 40
   b. Please identify the number and type of all employees:

Employee Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	2	
Trackers	11	11
Anti-Poaching Scouts/Rangers	20	20
Other Anti-Poaching	NDF	
Cooks/Housekeepers	4	4
Community Coordinators	2	2
Managers	1	
Biologists	1	
Others:		

6. Number of staff employed in the off-season: 11

   a. Please identify the number and type of staff that are engaged when the season is not open:

Employee Type	Total number of this type	Number of locals /from nearby communities	When employed?
Anti-Poaching staff	Full staff		
Managers	1		
Maintenance	0		
Road Opening /Construction	30		
Community Relations Personnel	1		
Others:			

7. Anti-Poaching Efforts:[2]
   a. Number of Anti-Poaching staff:
   b. Are Anti-Poaching Patrols conducted during the hunting season, off-season, or **both?**
      x
      Hunting season: _____ Off-season: _____ **Both seasons:** x

[2] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

c. Months during which Anti-Poaching Patrols are conducted: **All year round**

d. Number of Anti-Poaching Patrols per month: _____

e. Description of Anti-Poaching equipment, vehicles, etc.:

_____

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?

Ministry of Environment & Tourism

7. **ANTI-POACHING EFFORTS *[CONTINUATION]***

g. Do you offer rewards to poaching informants leading to arrest? x Yes ____ No

h. Do you offer rewards to poaching informants upon conviction? ____ Yes x No

i. Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS	N$ 31200	N$ 31200	N$ 31200	
EQUIPMENT				
VEHICLES	4x4 vehicle	4x4 vehicle	4x4 vehicle	
PETROL	As needed	As needed	As needed	
REWARDS PAID				
OTHER: _____				Each person arrested, the informer get N$ 5000 per case
OTHER: _____				
TOTALS				

j. What currency are the expenditures given in? **Namibian Dollar**

8. **ANTI-POACHING RESULTS:**

CATEGORY	2016	2017	2018	REMARKS
POACHING INCIDENTS DISCOVERED				
ELEPHANT CARCASSES OBSERVED				
LION CARCASSES OBSERVED				
LEOPARD CARCASSES OBSERVED				
IVORY POACHERS ARRESTED				
MEAT POACHERS ARRESTED				
OTHER POACHERS ARRESTED

SNARES/GIN TRAPS COLLECTED				
FIREARMS CONFISCATED				
VEHICLES CONFISCATED				
BICYCLES CONFISCATED				

BOATS/NETS CONFISCATED				
TUSKS RECOVERED				
OTHER: _____				

9. COMMUNITY INVESTMENT:[3]
   a. Does the Company contribute money or goods/services to local communities?
      x Yes _____ No
   b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)?
      2,5 Million Namibian Dollars, required by law, required by contract & voluntary contribution
   c. Does the Company provide game meat to nearby communities? **Yes x** No
   d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:
      45 tons of meat distributed by the community themselves
   e. If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.
      N/A
   f. Please describe any consolation payments made to local residents damaged by game species
      N/A
   g. What currency are the expenditures reported in? **Namibian Dollars**

SPECIES	DAMAGE CAUSED	CONSOLATION PAID 2016	CONSOLATION PAID 2017	CONSOLATION PAID 2018

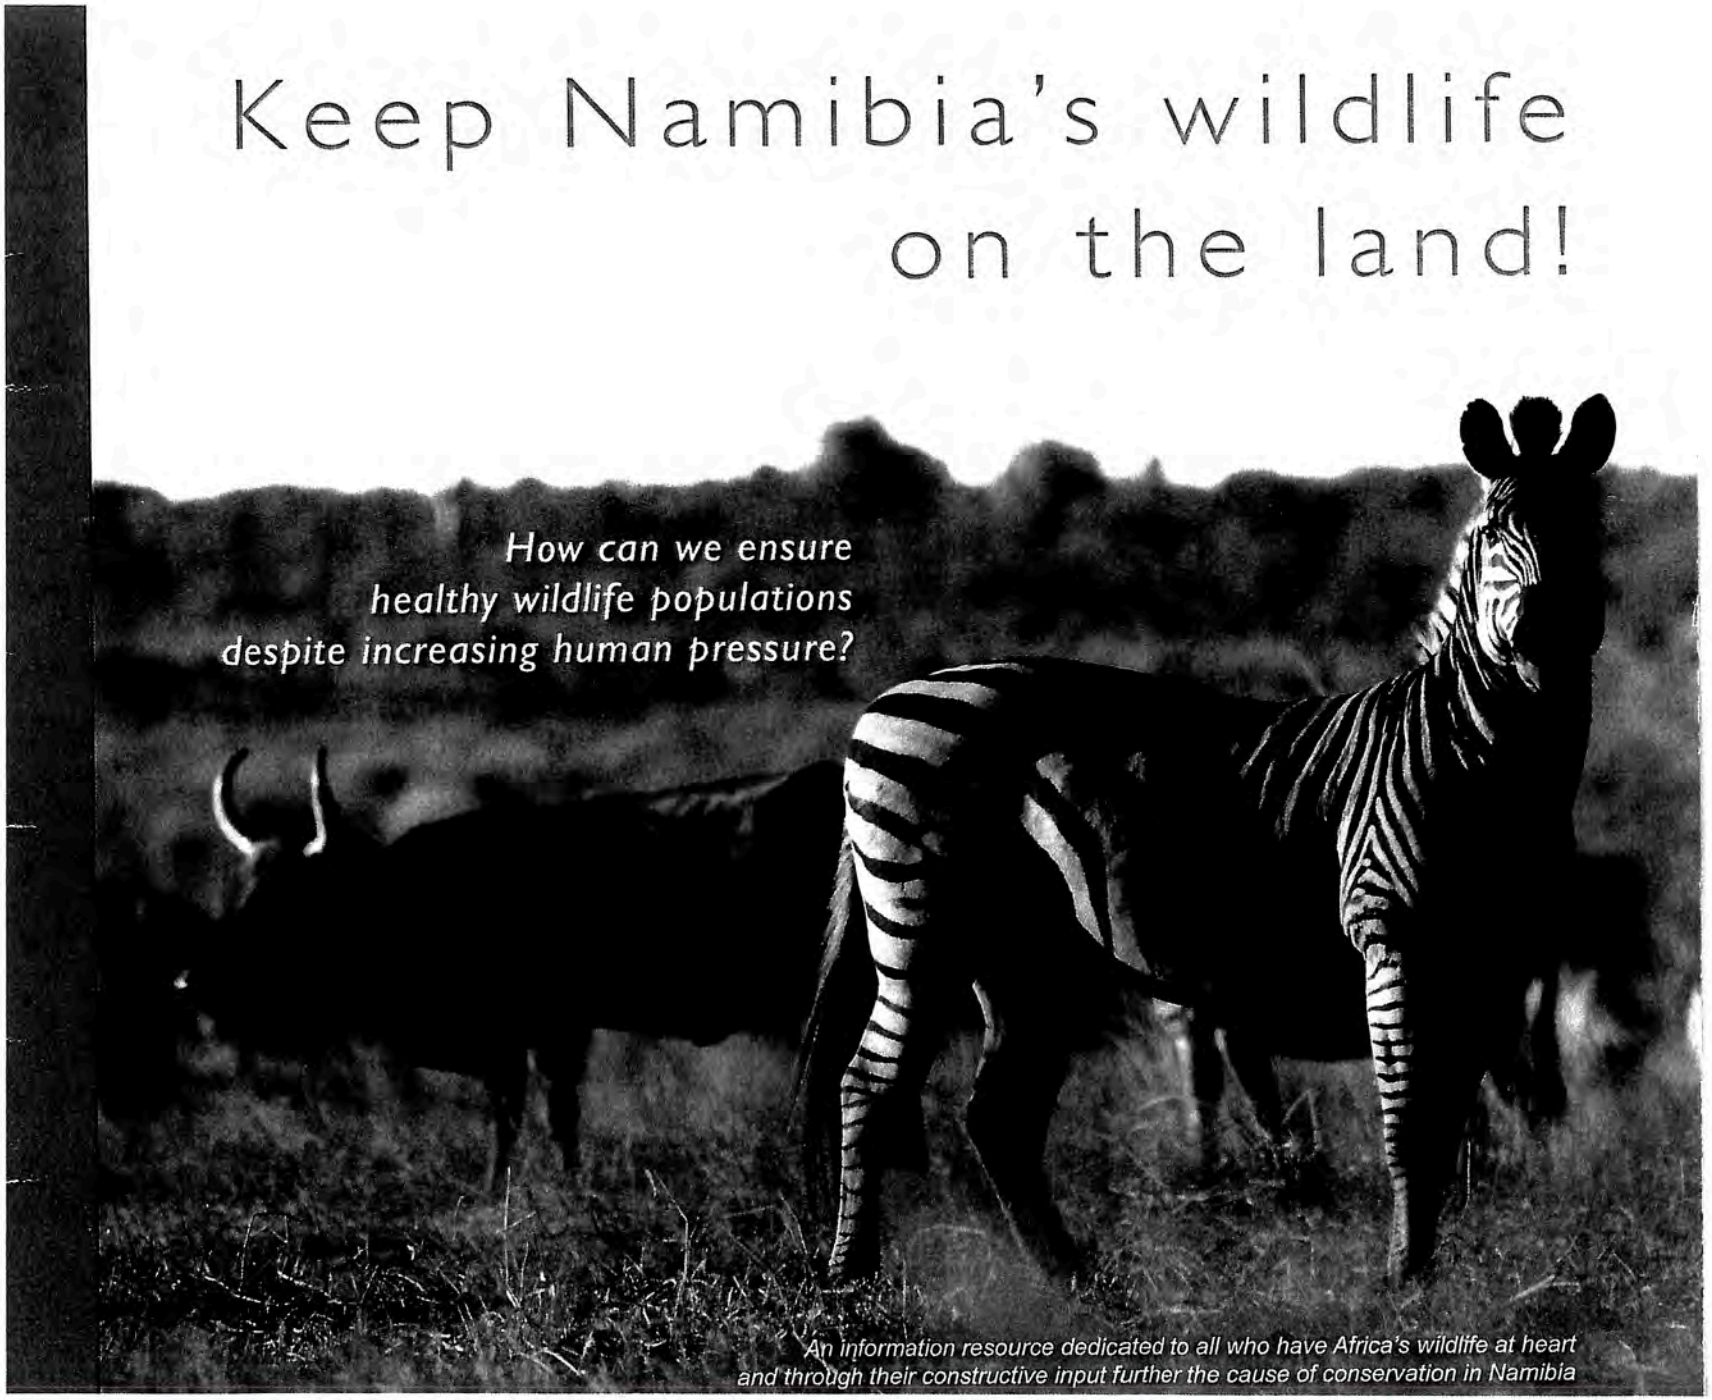
Mr.

TITLE

Keep Namibia's wildlife on the land!



An information resource dedicated to all who have Africa's wildlife at heart and through their constructive input further the cause of conservation in Namibia

What is really happening to our wildlife?

WILDLIFE IS RAPIDLY DECLINING ACROSS MUCH OF AFRICA AND OTHER PARTS OF THE WORLD

Over the last century, **lions** *were actively eradicated as a threat to human safety and to livestock from most land used by people; lions from the remaining populations continue to be killed over livestock losses and safety concerns in communal areas and along the periphery of parks today.*
Southern African **rhinos** *were driven to the brink of extinction a century ago, but populations were rebuilt through effective conservation activities; rhinos are now being decimated again by ruthless commercial poaching for their horns.*
A century ago, **Elephants** *were drastically reduced by the uncontrolled ivory trade, and displaced as a threat to crops and safety; today most of the remaining southern African populations are healthy and growing, but ruthless commercial poaching for ivory is again having an impact.*
Many other species *are experiencing similar declines, mostly due to land conversion to agriculture and incompatible land uses.*

- ***Widespread concern over wildlife declines is motivating ongoing global calls for action*** *– yet interventions do not differentiate between countries with an excellent conservation track record, and those with declining wildlife populations.*
- ***Attempts by foreign organisations to stop declines through field interventions often do not address the actual problems*** *– interventions often ignore the needs of local people and conservation priorities on the ground.*
- ***The public is unfortunately not informed accurately about the main causes for large-scale wildlife declines*** *– media reports, social media hype and calls for donations tend to focus on the gruesome death of individual animals as indicators of decline, rather than actual causes.*
- ***People are confusing the welfare of individual animals with the health of entire populations of the same species*** *– through passionate but misguided social media outcries, many people want to prevent all animal deaths in order to stop perceived cruelty to animals and wildlife declines.*

PREVENTING ALL WILDLIFE DEATHS FORCES PEOPLE TO REPLACE WILDLIFE HARVESTING WITH OTHER LAND USES

Namibia's **Elephant** *population has tripled since independence and elephants have re-colonised former ranges, largely facilitated by com conservation and benefits to local communities.*

Most other large wildlife species *in Namibia have healthier populations today than at any time over the last 150 years.*

- *Differentiating between countries with successful conservation approaches and those without is essential – conservation is a sc based management activity and successful approaches should not be undermined by generalised emotional responses and inappropriate a*
- *Conservation by the people for the people is extremely successful in Namibia – by conferring rights to own and manage wildlife t communities, the Namibian government has empowered land holders to conserve wildlife in a healthy balance with other land uses.*
- *Namibians embrace wildlife management as a land use, thereby safeguarding wildlife habitat throughout the country – Namit documented significant wildlife recoveries in parks and on communal and freehold land throughout the country for several decades.*
- *By harvesting small percentages of various populations, Namibia is keeping overall wildlife stocks healthy, just as farmers anywhen world keep their overall livestock herds, gardens and fields healthy while harvesting an annual crop to generate income and enable develo*

PROMOTING WILDLIFE USE CREATES INCENTIVES TO KEEP WILDLIFE ON THE LAND AS AN ECONOMIC ASSET

The main causes of large scale wildlife declines:

ABITAT LOSS THROUGH HUMAN LAND USES THAT ARE INCOMPATIBLE WITH WILDLIFE is the largest single cause of wildlife ɔclines around the world.

Displacement of wildlife by agriculture – *wildlife is not tolerated in crop fields and competes with or threatens livestock.*

Degradation of habitat by unsuitable land uses – *overgrazing, indiscriminate burning, logging, mining etc. may all severely degrade habitats.*

Destruction of habitat through infrastructure development – *urban spread, roads, power lines, dams etc. may all destroy habitats.*

Disturbance by human activity – *excessive presence and movement of people, stray dogs, traffic, noise etc. may all displace wildlife.*

NCONTROLLED EXPLOITATION AND COMMERCIAL POACHING are causing rapid declines amongst already isolated wildlife populations many African countries.

Poaching of animals for trade in animal parts – *trade in ivory, rhino horn, skins, bones etc. is fuelling ruthless commercial poaching.*

Ruthless exploitation for personal gain – *uncontrolled over-harvesting veiled as 'legal use' is rampant in countries with poor governance.*

Proven ways to stop wildlife declines and rebuild populations:

HABITAT PROTECTION AND EXPANSION THROUGH COMMUNITY CONSERVATION BASED ON WILDLIFE USE enables large-scale wildlife recoveries, mitigates human impacts and facilitates the health of ecosystems.

Tourism *motivates conservation in scenic areas, especially along major tourism routes, by generating most jobs and some conservation funds.*

Conservation hunting *motivates conservation in vast areas of low tourism potential by generating most conservation funds and providing food.*

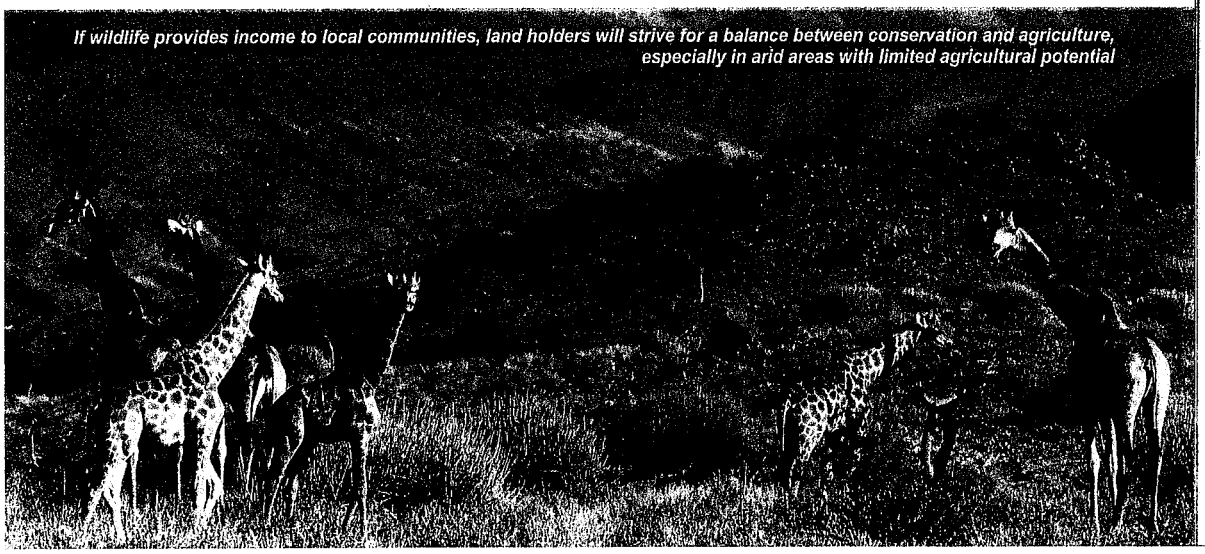
Meat harvesting *motivates increasing wildlife populations by providing food and generating additional income.*

Live capture and sale *enables restocking in areas with low populations and provides further income from wildlife.*

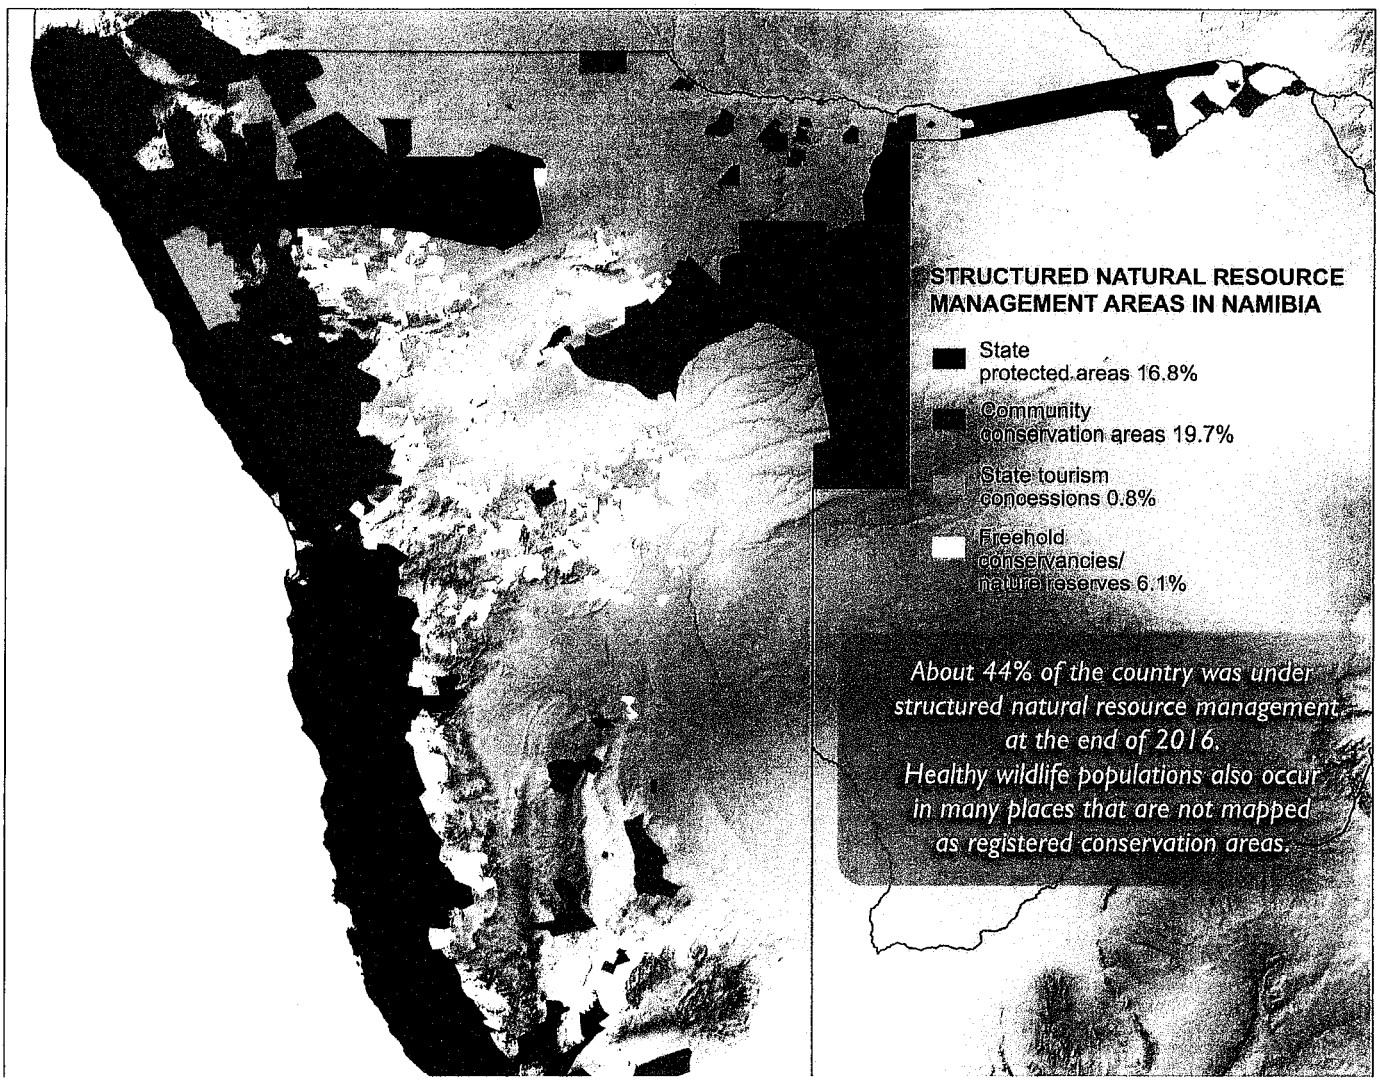
All of these uses can and should be combined where possible to maximise returns and provide a variety of benefits to different people in each community.

ACTIVE AND COLLABORATIVE WILDLIFE CRIME PREVENTION limits impacts from commercial poaching by teaming up relevant stakeholders including local communities, tourism and hunting operators, NGOs and government agencies.

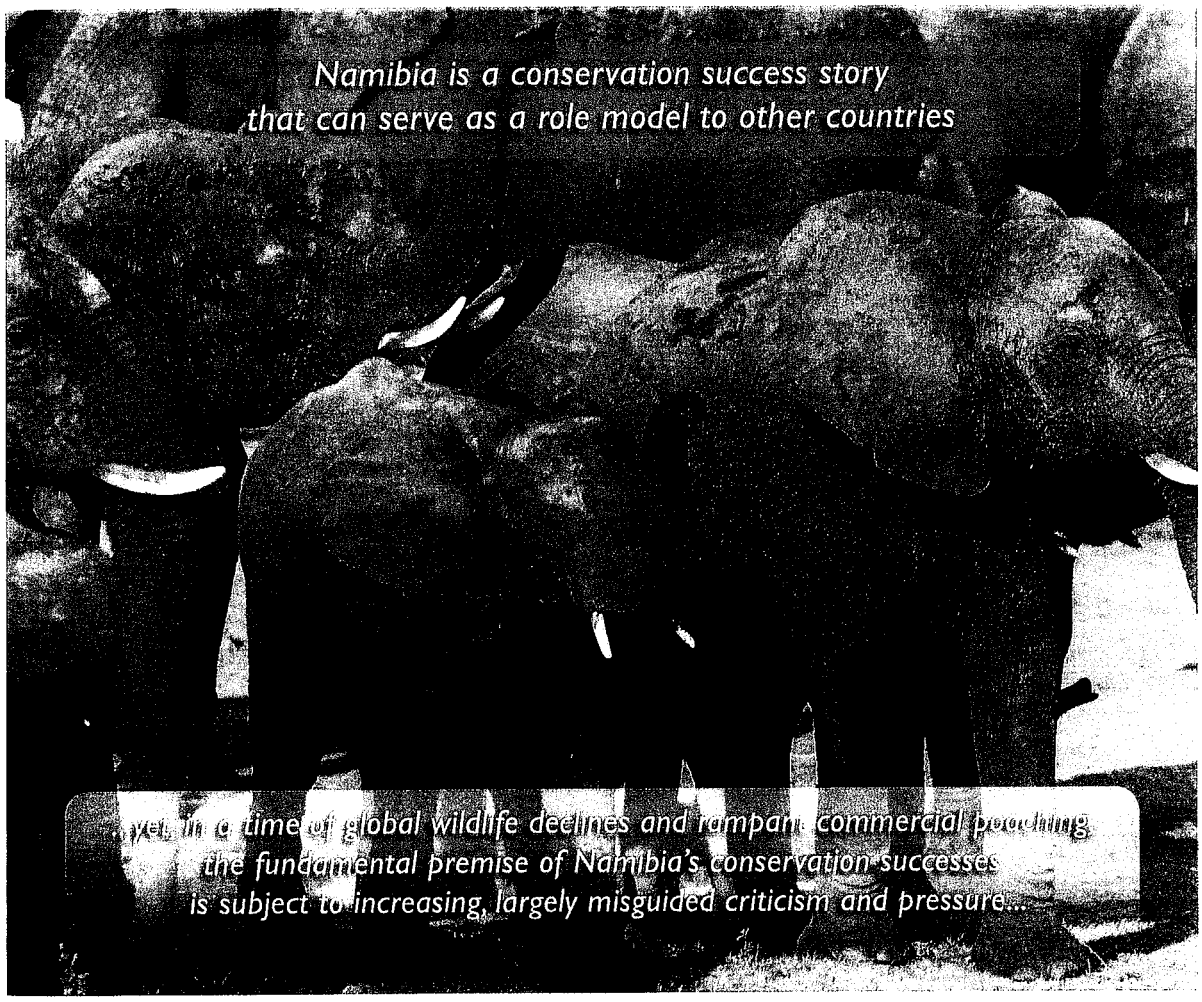
STRINGENT CONTROL MECHANISM FOR ALL WILDLIFE USE prevent uncontrolled exploitation and over-harvesting.



If wildlife provides income to local communities, land holders will strive for a balance between conservation and agriculture, especially in arid areas with limited agricultural potential



STRUCTURED NATURAL RESOURCE MANAGEMENT AREAS IN NAMIBIA
State protected areas 16.8%
Community conservation areas 19.7%
State tourism concessions 0.8%
Freehold conservancies/ nature reserves 6.1%
About 44% of the country was under structured natural resource management at the end of 2016.
Healthy wildlife populations also occur in many places that are not mapped as registered conservation areas.



Namibia is a conservation success story
that can serve as a role model to other countries
yet, in a time of global wildlife declines and rampant commercial poaching,
the fundamental premise of Namibia's conservation successes
is subject to increasing, largely misguided criticism and pressure...

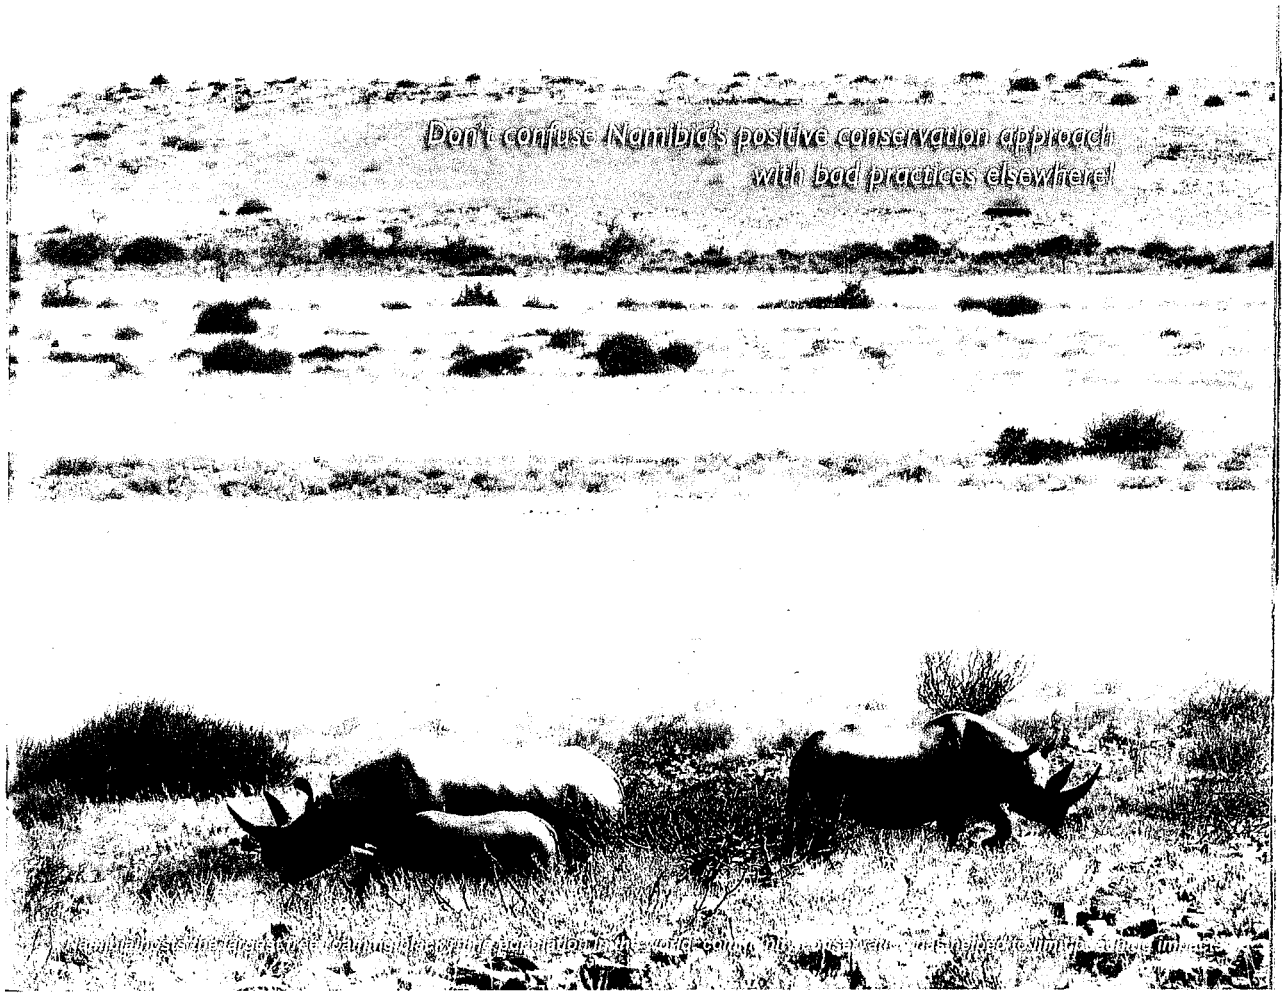
Namibia is a conservation success story:

Background information:

1. Namibia's economy is largely reliant on natural resources; about two-thirds of the human population live in rural areas and are directly dependent upon natural resources for their livelihoods.
2. Wildlife populations have shown dramatic recoveries on both freehold and communal farmland after drastic declines prior to independence due to drought, poaching and detrimental policies.
3. Healthy populations of nearly all historically-occurring species now roam suitable habitat; species of particular conservation concern are receiving special attention.
4. Agricultural policies and approaches, rather than conservation practices, have limited the population health of some species such as buffalo and wild dog.
5. Wildlife is managed and protected in national parks, in community conservation areas and on freehold land across more than half of Namibia.
6. The success is based on giving wildlife a real value for the local people who manage and protect it – and bear the cost of living with it.
7. Community conservation generated over N$ 111 million in returns for rural communities and facilitated around 5,147 jobs during 2016.
8. Community conservation contributed about N$ 692 million in net national income to Namibia's economy in 2016.
9. The sustainable use of wildlife and other natural resources is enshrined in Namibia's constitution; natural resources are a part

Conservation highlights:

1. Namibia has healthy populations of black and white rhinos, including the largest free-roaming black rhino population outside parks in the world.
2. Namibia's elephant population has grown from an estimated 7,500 animals in 1995 to around 22,000 today – a large percentage occurs outside parks.
3. Namibia has healthy lion populations in several national parks, and an expanding lion population outside parks, which has grown in north-western Namibia from an estimated 25 animals in 1995 to around 150 today.
4. Namibia has the largest population of free-roaming cheetahs in the world – the vast majority of which live outside parks.
5. Namibia has healthy giraffe populations in several national parks and an expanding giraffe population outside parks.
6. Namibia has healthy leopard populations in several national parks and leopards occur across much of Namibia's freehold and communal farmland.
7. Namibia has a healthy crocodile population with a large percentage occurring outside parks.
8. Namibia has translocated more than 10,000 animals of 15 different game species – including rare and valuable species such as black rhino, sable and giraffe – out of parks into communal and freehold areas to boost populations there.
9. Namibia has reinstated several species that had become locally extinct in communal and freehold areas.



Don't confuse Namibia's positive conservation approach
with bad practices elsewhere!

Namibia offers real solutions for wildlife inside and outside parks:

Namibia balances conservation priorities and the needs of rural communities:

In Namibia, most communal land (around 40% of the country) and privately-owned or freehold land (around 43% of the country) is used to generate a living for the land holders. Livestock herding, crop production and game management are the main land uses.

Conservation outside national parks therefore depends on giving wildlife a tangible value so that people keep it on the land – rather than eradicating it in favour of livestock, crops or other land uses.

Keeping wildlife on the land also means living with wildlife – wildlife that can be dangerous and destructive.
Disney is not reality – in real life...

*... **lions**, crocodiles and other predators eat livestock and sometimes kill people*
*... **elephants** raid crops and destroy water installations and also sometimes kill people*
... many other wild animals such as hippos, buffaloes and rhinos can also be difficult and dangerous to live with.

- *Wildlife use is a traditional and integral part of life in rural Africa – hunting is a part of African culture. This was the same in Europe and America – when people still lived from the land and the wildlife was still there.*
- *Namibia protects around 17% of its land in national parks – that's more than most countries.*
- *Community conservation areas cover about 20% of Namibia and embrace around 195,000 people.*
- *Tourism concessions in parks provide important income for neighbouring communities, promoting conservation.*
- *Wildlife conservation outside parks must be seen as wildlife management for the benefit of the people – not wildlife preservation for the benefit of an urban ideal.*
- *Rural people need the land to survive – for livestock herding, for crop production and for wildlife management.*
- *Wildlife management outside parks is an economic activity – just like farming – otherwise wildlife will be pushed out by land uses that generate better returns from the same land at lower costs.*
- *Photographic tourism is an ideal use of intact ecosystems with healthy wildlife populations, but can only be practiced in accessible areas with enough scenic interest and/or high wildlife densities – this leaves large areas without tourism value or income.*
- *Conservation hunting funds community conservation structures – including 83 communal conservancies and around 584 community game guards and resource monitors.*
- *Conservation hunting funds anti-poaching activities by government agencies, community conservation organisations and private sector initiatives.*

Don't confuse farmland with national parks!

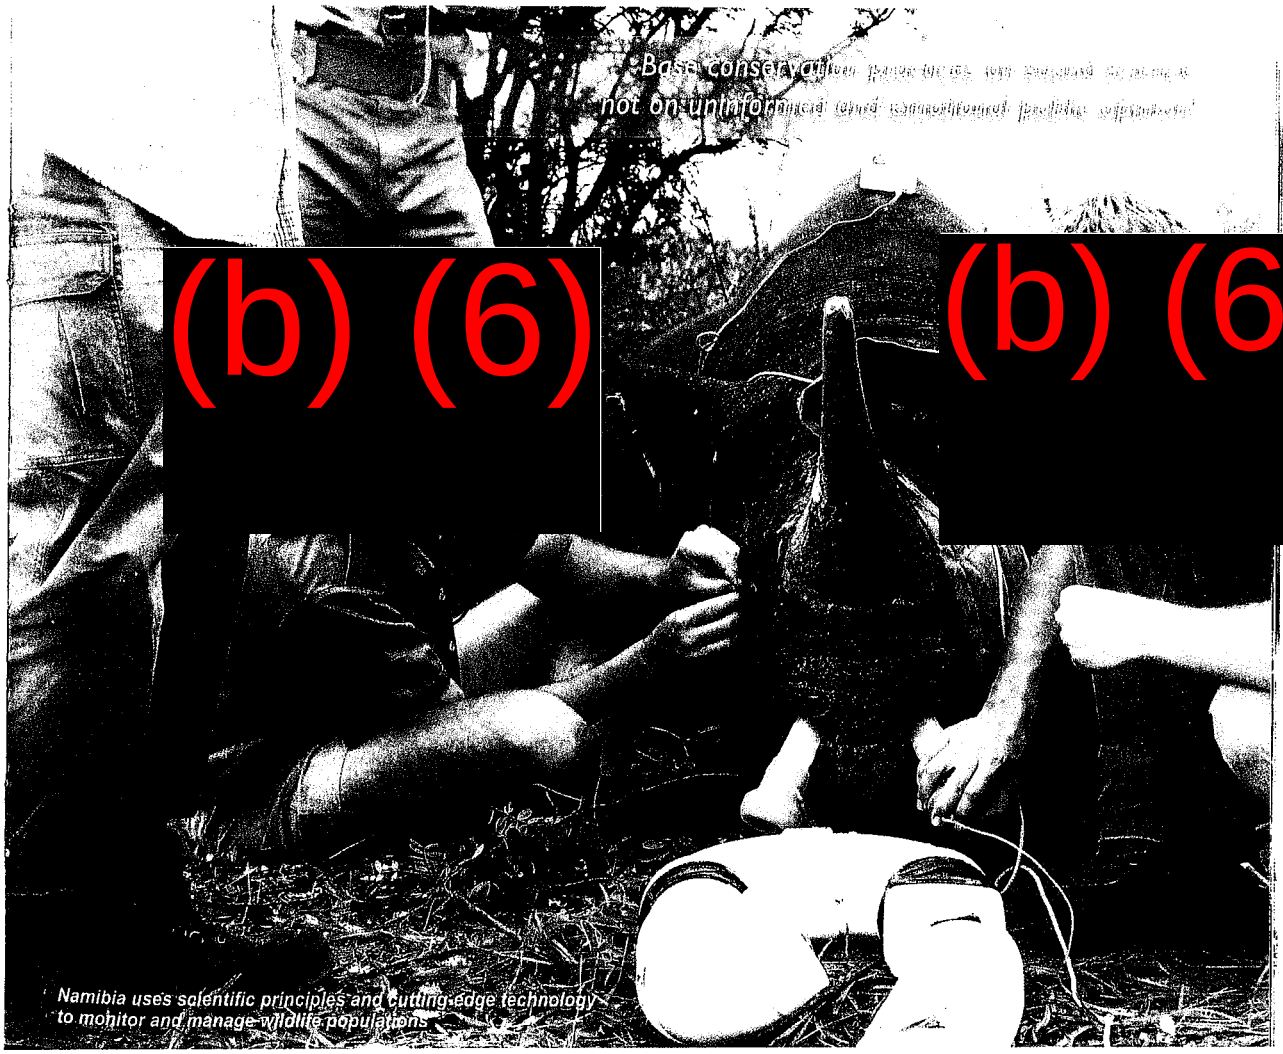
Namibia balances wildlife management outside parks with other land uses such as livestock herding and crop production

Namibia's conservation success is based on science and proof!

Namibia has one of the most intensive wildlife monitoring and utilisation control systems in Africa and the world:

Namibia uses a variety of systems to monitor and manage wildlife populations. The systems differ between national parks, community conservation areas and private farmland and are tailored to meet local needs. Management is by no means perfect in all areas or at all times. Yet the general approach of actively using wildlife outside parks for the benefit of rural communities has proven to be very successful, enabling healthy wildlife populations and strengthening local livelihoods. Namibia's dynamic conservation community ensures that environmental concerns are publicly recognised. While a balance between economic development and conservation in rural Africa is often problematic, most stakeholders strive to address issues. Collaboration between government, local communities, support NGOs and the private sector is a key to Namibia's conservation success.

- *No one approach or system is perfect. The flexibility to adapt to changing needs and circumstances is more important than any one system or approach.*
- *Namibia has excellent knowledge of its wildlife populations through ongoing research and regular, rigorous monitoring activities and systems, including aerial surveys, road counts, foot patrols and remote wildlife tracking using cutting-edge technology.*
- *The Ministry of Environment and Tourism has clear compliance requirements for wildlife management*
- *Stringent monitoring and control systems for all wildlife harvesting facilitate effective management and minimise misuse.*
- *Offtakes are carried out according to annual quotas based on sustainable harvest rates and are controlled through permits and reporting requirements.*
- *The effects of offtakes over time are monitored and harvest rates are adapted to keep populations healthy if population changes occur.*
- *Regular quota revisions for wildlife harvesting are based on monitoring data and scientific guidelines.*
- *Land use objectives differ between national parks, community conservation areas and private farmland, resulting in varying wildlife densities in different areas.*
- *Challenges are a part of wildlife management, especially when attempting to balance the needs of large, dangerous wildlife with the needs of poor rural communities.*
- *Increasing human-wildlife conflict is a result of increasing game numbers and a sign of successful conservation; it is also one of the biggest challenges for wildlife management outside parks.*
- *Wildlife in open, unfenced systems is free to roam and is susceptible to drought and disease, resulting in natural population fluctuations.*
- *Continually adapting activities to changing circumstances facilitates sustainability.*



Namibia uses scientific principles and cutting-edge technology to monitor and manage wildlife populations

Sustainable wildlife harvesting promotes conservation!

What exactly is sustainable wildlife harvesting?

Sustainable wildlife harvesting means harvesting a limited percentage of wildlife stocks without compromising the health of the overall population, in order to generate income for local communities and enable wildlife management as a viable land use. When this is legally-entrenched, well-controlled and based on scientific principles and sound knowledge, it is fully sustainable.

Wildlife harvesting has been a natural factor controlling game populations throughout human evolution, just like the impact of lions and other predators.

Sustainable wildlife harvesting...

- *Is carried out by local land holders.*
- *Creates incentives to keep wildlife on the land.*
- *Keeps natural habitats intact.*
- *Provides alternative income and strengthens rural livelihoods, especially in remote, arid environments.*
- *Enables a mix of land uses including livestock and cropping.*
- *Strengthens resilience against impacts from climate change.*
- *Strengthens resilience against external economic or political influences and reduces dependency on agriculture.*
- *Pays for conservation structures and anti-poaching activities.*
- *Provides meat for rural communities.*
- *Ensures stakeholders have a real interest in conserving wildlife.*
- *Reinforces traditional cultural values related to wildlife.*
- *Safeguards indigenous knowledge about wildlife.*

Sustainable wildlife harvesting includes these activities:

- *Conservation hunting (hunting with clear conservation outcomes targeting a very small percentage of the total population).*
- *Meat harvesting (using minimum-impact methods and offtake rates well below natural population growth rates).*
- *Live capture and sale (moving surplus animals from high density areas to low density areas within their natural range).*

What exactly is conservation hunting?

Conservation hunting consists of harvesting small numbers of indigenous wildlife as part of a personal wilderness experience based on traditional human survival skills. Conservation fishing harvests indigenous fish according to the same principles. These activities have verifiable prerequisites and outcomes (see opposite page) while focussing on wilderness experiences and participation in natural dynamics through regenerative pursuits. They can be combined under the term wildernessing and promote the protection of free-roaming indigenous species in their natural habitat.

The Namibian conservation hunting fraternity adheres to guidelines for ethical hunting, including:

- *Stalking game in natural habitat to ensure a wilderness experience and fair chase.*
- *Ensuring minimum suffering for hunted animals.*
- *Targeting mature animals that can be harvested without negative impacts on the overall population.*
- *Ensuring that all meat and other products of all hunted animals are used.*
- *Hunting predators in an ethical manner only as part of predator management.*

Down to confines conservation hunting and ethics sustainable wildlife harvesting with protecting or bred trophy shooting practices.

CONSERVATION HUNTING HAS THE FOLLOWING VERIFIABLE PREREQUISITES AND OUTCOMES:

1. It is governed by a national legal framework with clear systems of controls and reporting requirements.
2. It meets all CITES and IUCN species conservation criteria.
3. It targets only free-roaming, indigenous species in natural habitats large enough to ensure healthy population dynamics.
4. Wildlife population trends in the greater landscape are closely monitored and offtakes are adapted as needed to ensure the population health of all targeted species.
5. Offtakes are sustainable, based on species-specific, scientifically-accepted annual quotas for the hunted population.
6. It promotes the natural diversity of all indigenous fauna and flora in the hunting area.
7. It safeguards wildlife habitat (the hunting area) against destructive land uses.
8. A major portion of generated income goes back to the land holders and is spent on the conservation and human development needs of the hunting area.
9. It employs local people to carry out conservation activities in the hunting area, including wildlife monitoring and anti-poaching activities.
10. It mitigates human-wildlife conflict amongst local communities if these occur in, or adjacent to, the hunting area.

Through these criteria, conservation hunting creates clear incentives to adopt wildlife management as a land use.

Conservation hunting promotes the protection of free-roaming, indigenous wildlife and its natural habitat

Habitat loss and crime are the biggest killers of wildlife!

WILDLIFE PRESERVATION WITHOUT HABITAT CONSERVATION IS MEANINGLESS!

Land conversion and resultant habitat loss is mostly overlooked by the public, but is the biggest killer of wildlife!

Wildlife needs large areas of intact habitat to ensure healthy populations:

- *Most game needs undisturbed access to water, which it does not have if pressure by people, their livestock or their dogs is too high.*
- *Many species need to be able to roam widely in search of food, especially in areas with highly variable rainfall; fences, roads, settlements and other infrastructure all fragment habitat and inhibit the ability of wildlife to respond to seasonal food availability.*
- *Wild animals need shelter to which they can retreat when chased by natural predators or disturbed by people.*
- *Game needs large enough areas to engage in natural interactions, especially breeding and rearing of young.*
- *Wildlife can coexist with livestock, but is often eradicated by farmers who see it as grazing competition or a threat to infrastructure or safety.*
- *Wildlife is not tolerated in crop fields or gardens; effective zoning of crops into land use mosaics can leave adjacent wildlife habitats intact.*

PEOPLE ONLY MAKE THE EFFORT TO KEEP WILDLIFE HABITATS INTACT IF THEY HAVE A TANGIBLE INCENTIVE TO DO THIS.

POACHING AND UNCONTROLLED EXPLOITATION DECIMATE WILDLIFE!

Poaching and uncontrolled exploitation should never be confused with legal, sustainable wildlife harvesting!

Poaching...

- *Is stealing from the rightful owners – the local communities.*
- *Steals valuable wildlife products for sale in other areas or other countries.*
- *Takes the wildlife value out of the country and provides no local income or benefits.*
- *Undermines conservation activities and harms the resource base.*
- *Undermines tourism and other legal wildlife uses.*
- *Has a severe impact on high value species.*

Uncontrolled exploitation...

- *Places immediate financial gain over sustainability*
- *Abuses legal loopholes to exploit resources.*
- *Takes advantage of weak control mechanisms.*
- *Relies on weak governance and corruption.*
- *Benefits only a small number of individuals.*
- *Undermines conservation activities and harms the resource base.*
- *Undermines tourism and other legal wildlife uses.*
- *Is not sustainable.*

COMMERCIAL POACHING, ESPECIALLY OF RHINOS AND ELEPHANTS, IS A HUGE THREAT TO NAMIBIA'S VALUABLE WILDLIFE AND TO A VARIETY OF INDUSTRIES BASED ON IT.

Greed and misguided emotions undermine effective conservation!

TROPHY BREEDING AND SHOOTING DISCREDITS ALL SUSTAINABLE WILDLIFE HARVESTING!

Trophy shooting activities motivated only by financial gain should not be confused with conservation hunting!

These and similar practices make no conservation contributions and are not part of conservation hunting:

- *Canned shooting (shooting animals in small enclosures).*
- *Put-and-take shooting (releasing captured trophy animals for the sole purpose of shooting them).*
- *Breeding lions and other predators for trophy shooting.*
- *Breeding rarities such as black springbok, golden oryx etc. for the trophy trade.*
- *Introducing exotic species such as blesbok, nyala etc. for trophy shooting.*
- *Unethical shooting of animals based only on their trophies (rather than fair chase hunting based on a wilderness experience).*
- *Genetic manipulation of the gene pools of species to enhance trophy quality.*

GAME USE MUST BE ABLE TO PROVE CONSERVATION OUTCOMES TO BE ACCEPTED AS A VIABLE CONSERVATION ACTIVITY

EMOTIONAL ANTI-HUNTING CAMPAIGNS UNDERMINE CONSERVATION!

Anti-hunting campaigns based on emotional opinions should not derail proven conservation approaches!

In a modern world of inter-connectivity, social media and concerned global citizens, well-meaning but at times misguided international opinion and pressure don't always bring positive change – they also have the ability to influence and change legitimate local activities for the worse. Local communities and environments are often the worst-affected.

- *Calls for a hunting ban in Namibia are based on urban values and opinions, not on rural conditions and needs, and are often orchestrated by animal welfare organisations and misguided followers.*
- *A small, economically secure urban elite is challenging legal and highly beneficial activities in Africa from an idealistic moral standpoint.*
- *A hunting ban dispossesses and disempowers local decision-making and enforces a foreign moral view upon Africans.*
- *A hunting ban would have the most negative impacts on the elements that the international public is attempting to support – wildlife populations and local people outside national parks.*
- *In-depth understanding of wildlife dynamics, based on scientific principles, should not be dismissed by emotional, misguided external public opinions.*

NAMIBIA'S WELL-DOCUMENTED, SUCCESSFUL APPROACH TO CONSERVATION SHOULD NOT BE JEOPARDISED BY OUTSIDERS

African wildlife: use it – or lose it!

What would be lost, if wildlife could not be used to generate income for local communities outside parks?

Hunting bans, which could consist either of Namibia stopping the activity of hunting, or of other countries stopping the import of hunting authentica – thereby closing the market – would have detrimental effects for wildlife outside parks, and for people currently benefitting from that wildlife.

- *The loss of income to the national economy is currently not quantified, but is likely to be over a billion Namibia Dollars.*
- *A hunting ban would result in at least N$ 43 million of lost annual returns for conservancies if all wildlife harvesting were banned, and would have a direct impact on at least 55 of the 62 conservancies currently generating returns from natural resources.*
- *Loss of conservation hunting income would result in at least 32 conservancies becoming financially unsustainable.*
- *If no immediate alternative income streams could be secured, a large percentage of the currently 584 community game guards and resource monitors employed in conservancies across Namibia would stand to lose their jobs.*
- *The loss of natural resource management structures would have immediate negative effects on wildlife populations and the health of other natural resource stocks.*
- *The loss of community game guards would significantly reduce Namibia's ability to combat poaching, especially of free-roaming rhino and elephant.*
- *Discontinuing regular wildlife monitoring and annual game counts would seriously undermine effective wildlife management.*
- *The loss of natural resource returns for local communities would result in an immediate reduction in people's tolerance of problematic wildlife such as elephants, lions and other predators.*
- *Reduced tolerance of wildlife would lead to an increase in retaliatory killing of problematic animals.*
- *A reduced sense of ownership over wildlife would lead to increased bush-meat poaching as well as poaching of high-value species.*
- *Across much of the currently 165,182 square kilometres of community conservation area, wildlife would no longer be considered a land-use priority and would be displaced by other uses such as livestock.*
- *On a large percentage of freehold farms with limited or no tourism potential, wildlife would also be displaced.*

MOST LARGER WILDLIFE SPECIES WOULD BE DISPLACED FROM MUCH OF NAMIBIA IF THEY COULD NOT BE USED TO GENERATE INCOME

Using wildlife ensures its value for land holders and KEEPS IT ON THE LAND!

The economic value of wildlife creates the incentive for land holders to include wildlife as a land use. If wildlife is not used, but preserved only for its own sake, it has little place outside parks, because land outside parks is used to generate rural livelihoods and contribute to the national economy.

- *Eat game meat to keep wildlife on the land – eat beef, and put more cattle on the land.*
- *Harvesting sustainable numbers of wildlife keeps overall populations healthy and avoids over-stocking.*
- *Conservation hunting promotes wildlife conservation and habitat protection.*

Don't confuse wildlife use
with wildlife loss!
without generating benefits, they will be eradicated.

RE: PRT # MA42218D – Applicant - Donald Robillard, Jr.
Supplement to Import Permit Application for Sport Hunted Elephant Trophy from Namibia

Ms. Brisendine:

This is a supplement to the existing application, PRT # MA42218D for an Elephant Trophy Import from Namibia for applicant Don Robillard, Jr.

Supplementary Answers for after the Hunt detailed below:

Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or huntingblock, AND nearest city) where wildlife was removed from the wild:

The elephant was taken in the Republic of Namibia, Kavango East Bwabwata West. Precise location of the hunt – S 18 04.507 E 021 35.199

Date wildlife was hunted

The Wildlife was taken on June 15th, 2019.

The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document

The trophies are currently stored at Trophaendienste Taxidermey, P.O. box 21068, Windhoek, Republic of Namibia. Professional Hunter – Jacobus Hugo Pinaar, Hunt Africa Namibia, P.O. Box 1100, Gobabis, Omaheke, Namibia.

Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so

See Attached for Hunting Permits

We have also provided the Operator Enhancement Report from Hunt Africa Namibia and the invoice for this hunt with trophy fees listed, which we ask to be included with the other enhancement documentation and in response

to question #9 of the application. In addition, we are supplying the document "Keep Namibia's wildlife on the land!" for further enhancement documentation to supplement this import permit application.

Please reference these documents and the many others provided by Conservation Force, the Namibian government, and other hunters in making a positive enhancement finding for this elephant import permit application.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

Enclosures:
a. Operator Enhancement Report- Hunt Africa Namibia
b. Donald Robillard Hunting Permits-2019
c. Invoice for hunt with trophy fees-2019
d. Keep Namibia's wildlife on the land!

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. **OPERATOR INFORMATION**
   a. Name of Area Operator: HUNTAFRICA NAMIBIA
   b. Years in business: 32 years
   c. Name of Company conductinghunt: HUNTAFRICA NAMIBIA
   d. City where hunt will take place:
   e. Country where hunt will take place: NAMIBIA

2. **CONCESSION**
   a. Name of Concession: Bwabwata west National park
   b. Area in Km^2: 3800
   c. Land tenure: Government lease
      Government Lease x Community Private Ranch Private Conservancy
   d. Length of Concession Agreement: 5 years
   e. Can it be renewed? x Yes No
   f. Length of Renewal, if applicable: 5 years
   g. Estimated total amount received in trophy fees last year, if applicable:
   h. Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:
      Yes, annual reporting: detailed report to the Ministry of Environment & Tourism, of each client and every animal that was hunted.
   i. Please provide the Concession location and nearest City: S 18 09°C 162 E 021 42°C 495, Rundu (bigger town) Divundu (very small town)
   j. Please attach a map or maps with the boundaries marked and showing the nearest City attached
   k. If the Concession borders a National Park, please provide Park name: Inside the Bwabwata National park
   l. Description of general and distinctive habitat features and any water features:
      Bushveld
      The Okavango river forms the western border

3. **COMMUNITIES IN THE CONCESSION**
   a. Are there any communities living in the Concession? x Yes No
   b. If so, estimated number of people or villages in the Concession? 1 Village – Omega – 1000 people
   c. Are there communities bordering this Concession? x Yes No
   d. If so, estimated number of people or Villages around the Concession?
      Muchiko area – 500 people

4. **RELEVANT GAME POPULATIONS IN THE CONCESSION:**[1]

[1] The new Fish and Wildlife Services (FWS) Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Species Name	Relative Abundance			Estimated Population	3-Year Trend			How is it monitored?
	Dense	Avg.	Sparse		Up	Down	Stable	
Elephant	x			2500			x	By counts
Lion			x		x			
Leopard	x						x	
Prey species								

5. Local Community Participation
   a. Total employment number: 40
   b. Please identify the number and type of all employees:

Employee Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	2	
Trackers	11	11
Anti-Poaching Scouts/Rangers	20	20
Other Anti-Poaching	NDF	
Cooks/Housekeepers	4	4
Community Coordinators	2	2
Managers	1	
Biologists	1	
Others:		

6. Number of staff employed in the off-season: 11

   a. Please identify the number and type of staff that are engaged when the season is not open:

Employee Type	Total number of this type	Number of locals /from nearby communities	When employed?
Anti-Poaching staff	Full staff		
Managers	1		
Maintenance	0		
Road Opening /Construction	30		
Community Relations Personnel	1		
Others:			

7. Anti-Poaching Efforts:[2]
   a. Number of Anti-Poaching staff:
   b. Are Anti-Poaching Patrols conducted during the hunting season, off-season, or **both?**
      x
      Hunting season: _____ Off-season: _____ **Both seasons:** x

[2] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

c. Months during which Anti-Poaching Patrols are conducted: **All year round**

d. Number of Anti-Poaching Patrols per month: _____

e. Description of Anti-Poaching equipment, vehicles, etc.: _____

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?

Ministry of Environment & Tourism

7. **ANTI-POACHING EFFORTS *[CONTINUATION]***

g. Do you offer rewards to poaching informants leading to arrest? **x** Yes _____ No

h. Do you offer rewards to poaching informants upon conviction? _____ Yes **x** No

i. Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS	N$ 31200	N$ 31200	N$ 31200	
EQUIPMENT				
VEHICLES	4x4 vehicle	4x4 vehicle	4x4 vehicle	
PETROL	As needed	As needed	As needed	
REWARDS PAID				
OTHER: _____				Each person arrested, the informer get N$ 5000 per case
OTHER: _____				
TOTALS				

j. What currency are the expenditures given in? **Namibian Dollar**

8. **ANTI-POACHING RESULTS:**

CATEGORY	2016	2017	2018	REMARKS
POACHING INCIDENTS DISCOVERED				
ELEPHANT CARCASSES OBSERVED				
LION CARCASSES OBSERVED				
LEOPARD CARCASSES OBSERVED				
IVORY POACHERS ARRESTED				
MEAT POACHERS ARRESTED				
OTHER POACHERS ARRESTED				
POACHERS CONVICTED				
SNARES/GIN TRAPS COLLECTED				
FIREARMS CONFISCATED				
VEHICLES CONFISCATED				
BICYCLES CONFISCATED				

BOATS/NETS CONFISCATED				
TUSKS RECOVERED				
OTHER: _____				

9. COMMUNITY INVESTMENT:[3]
   a. Does the Company contribute money or goods/services to local communities?
      x Yes _____ No
   b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)?
      2,5 Million Namibian Dollars, required by law, required by contract & voluntary contribution
   c. Does the Company provide game meat to nearby communities? **Yes x** No
   d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:
      45 tons of meat distributed by the community themselves
   e. If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.
      N/A
   f. Please describe any consolation payments made to local residents damaged by game species
      N/A
   g. What currency are the expenditures reported in? **Namibian Dollars**

SPECIES	DAMAGE CAUSED	CONSOLATION PAID 2016	CONSOLATION PAID 2017	CONSOLATION PAID 2018
ELEPHANT				
LION				
LEOPARD				
OTHER				

   a. Please describe any community projects paid for by the Company:
   b. What currency are the expenditures reported in? **Namibian Dollars**

TYPE OF PROJECT	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
EDUCATION (E.G.: CLASSROOMS, OFFICES)	**N$ 95000**	**N$ 110000**	**N$ 120 000**	
EDUCATION (E.G.: SCHOOL FEES, SCHOOL SUPPLIES)				
HEALTH (E.G.: CLINICS, OFFICES)				
HEALTH (E.G.: MEDICAL SALARIES, EQUIPMENT)				

[3] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

COMMUNITY SCOUT SALARIES					
OTHER COMMUNITY ANTI-POACHING

RCVD MAY 29 2018

This application is being submitted for the reimport of Permit MA04153C-0. Permit number MA04153C-0 had expired prior to the shipment arriving in the U.S.A. at JFK Airport. This was a mistake on the shippers part that I had no control over.

F.W.S.L.E. offiie at JFK Airport allowed the reexport of the Elephant base on circumstances of the shippers Mistake.

Im submitting a new permit to bring this Elephant back into the usa.

Thank You (b) (6) [redacted]

Subject: Re: [EXTERNAL] Prt : MA04153C-0

[EXTERNAL]

Mr. Meehan:

Permit number MA04153C-0 is now considered dead and cannot be reissued. Please submit application form 3-200-20, reference MA04153C-0, and include the documentation that you received from law enforcement. Please explain what has happened in your cover letter so that the person processing the application fully understands the situation.

All applications for elephants are currently under review. We recently posted a memo to our website (found here: https://www.fws.gov/international/pdf/memo-withdrawal-of-certain-findings-ESA-listed-species-sport-hunted-trophies.pdf) explaining that, in response to a recent court opinion, we have withdrawn all of our country-wide enhancement findings under the U.S. Endangered Species Act. This includes findings for African elephant, African lion and bontebok. Going forward, we will make enhancement findings on an application-by-application basis.

To do this, we will use much of the same information that we have used to make country-wide findings, as well as any additional information made available to us, for each application we receive. We are still consulting internally regarding this process and thus have not yet issued or denied any permits for these species since the court ruling.

Respectfully,

George D. Villavicencio

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

RCVD MAY 29 2018

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
BARBER	MICHAEL	E	

(b) (6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
PRESCOTT	ARIZONA	86303	YAVAPAI	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

(b) (6) [redacted] MIKE BARBER

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
PRESCOTT	ARIZONA	86303	YAVAPAI	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

MIKE BARBER
(b) (6) [redacted]
Prescott Valley AZ 86312

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Mike Barber (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   African Bush Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   Kwando Conservatory, Katima Mulilo Namibia

   b. Date wildlife was hunted: October 6 2016

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Leopard Legend
Liwyk van Vuuren
Box 445 Outj. Namibia

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name:
Address:
City:
State/Province:
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

This is the same Elephant that permit MA04153C-0
Info was supplied on.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) _____ Date: 5/22/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Barry, Anna <anna_barry@fws.gov> Fri, Nov 2, 2018 at 11:34 AM
To: (b) (6)

Dear Mr. Michael Barber,

I was assigned your application for an Endangered Species Act (ESA) Import permit for the import of an African elephant from Namibia. he following is in response to your request regarding the status of your application.

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized.

Because each application now requires an individual finding under the ESA , all application both new ones **and** ones submitted for renewal, cannot be finalized until this review process has been finalized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry

E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT *You may have noticed that our* ***application forms expired 5/31/2017****. The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted.* ***We do not accept applications via fax or e-mail.***

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Turchin	Martin		

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6) [redacted]			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Palm Beach Gdn	FL	33410	Palm Beach	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the ...bal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—...exempt status as outlined in instructions [50 CFR 13.11(d)].

2. ...that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the ***...bchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and ...owledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6) [redacted]

Signa... ...cer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy) 5/19/18

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Martin Turchin (b) (6) [redacted]

(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   African Elephant
   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Zimbabwe, Tshalotsho South, near Tshalotsho Town
· Area 2, S19 23 644 E026 53 452

   b. Date wildlife was hunted:

May 2 2015

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Chapungu Safaris / Lodzi Hunters

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Matabeland Taxidermist
16 Birmingham Rd
Belmont Bulawayo Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Matabeland Taxidermist
Business Name: 16 Birmingham Rd
Address:
City: Belmont
State/Province: Bulawayo
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

I hunted with Lodzi Hunters. Attached is a chapter of their conservation efforts and community participation which is significant. This was one of the reasons I elected to hunt with them.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

See A Above

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopar[redacted]ar.

Applicant's signature: [redacted] Date: 5/20/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Spotlight on Tsholotsho South CAMPFIRE Area in the aftermath of the 2013 Cyanide Poisoning of Elephant

Hwange National Park's eastern boundary, which stretches for over 220kms, is maintained with the co-operation of adjacent communities. CAMPFIRE Communities in Bulilima district from Point 222 at corner with Botswana, all the way northwards through Korodziba/Makona in Tsholotsho, connecting to the Ngamo Forest boundary, provide an important conservation buffer zone. Tsholotsho district was granted Appropriate Authority Status for the management of wildlife in 1991, and has 11 Wards that benefit from the CAMPFIRE Programme.

Although human and wildlife conflict is high, local communities have voluntarily maintained the buffer area between the park boundary and the area of human settlement from which they benefit from the sustainable utilization of wildlife under CAMPFIRE.

Tsholotsho district has two safari hunting areas: Tsholotsho North (170 000ha) and Tsholotsho South (240 000ha). Lodzi Hunters operates in the south, comprising Wards 1, 7, 8, 10, and 21, where the conservation of wildlife has made significant impact on the lives of people. Below we explain how this is possible for an area that hit local and international news headlines just over three years ago following the cruel poisoning of over 100 Elephants.

What most media reports missed about this first major poisoning incident in Zimbabwe is that in fact, it was Lodzi Hunters anti-poaching scouts, after only 4 months in the area that uncovered the catastrophe of the Cyanide poisoning. In the initial 8 months of its contract (April to December 2013) Lodzi Hunters conducted 120% of the anti-poaching logistics in the South Eastern section of Hwange National Park, in addition to the Tsholotsho South CAMPFIRE area. This effort also catalyzed and galvanized other support efforts and donations to the Park from the private sector e.g. Land Rovers for ranger patrols.

Lodzi Hunters have maintained a 10 man anti-poaching team in the area to this day, which has removed over 1 000 wire snares since 2013, and works closely with Parks anti-poaching patrol teams. No new snares have been found in the area in the past year, and this is testimony to the effectiveness of this anti-poaching effort.

Lodzi Hunters have maintained a 10 man anti-poaching team in the area to this day, which has removed over 1 000 wire snares since 2013, and works closely with Parks anti-poaching patrol teams. No new snares have been found in the area in the past year, and this is testimony to the effectiveness of this anti-poaching effort.

Plains game populations in the Tsholotsho South CAMPFIRE area are visibly recovering. There is now a pack of 10 Wild Dogs frequenting the area; these were never seen in this area since 1996. This is living proof that the plains game is on the increase, as Wild Dogs need prey to hunt.

Lodzi Hunters won the tender to hunt in Tsholotsho south in 2013. Communities have their own bank accounts and receive cash from the operator under a "CASH DIRECT TO THE COMMUNITY" system. This is done so the community sees what an Elephant is worth to them, the owners of that Elephant.

The current annual quota in the Tsholotsho South CAMPFIRE concession has a Trophy Elephant quota of 12 to 14 animals. On average, 13 Elephants are hunted, and the community gets 60% of the income paid as Concession Fees and Trophy Fees. The remainder goes to Tsholotsho Rural District Council (36%) and CAMPFIRE Association (4%).

Tsholotsho district generates more from trophy Elephant sold to foreign hunting clients than any other CAMPFIRE area (i.e. includes hunting days, food and drinks, a Professional Hunter and 4x4 Vehicle and the trophy fee). Tsholotsho brings a huge amount of value to the Elephant as a trophy animal. The current trophy fee for a trophy Elephant bull is nearly USD 20 000.

However, district has also been affected by declining hunter arrivals due to negative perceptions about community benefits from wildlife, which animal welfare groups are using to petition key global markets for wildlife products, resulting in the imposition of bans on elephant and lion trophy imports, and even airline embargoes on trophies as means of banning hunting in general.

Tsholotsho South Hunting Concession Actual Income Distribution: 2013-2015

		2013	2014	2015
RDC		116,653.00	95,806.00	81,623.00
COMMUNITY	NO. OF HOUSEHOLDS			
WARD 1	739	24,880.00	23,948.00	17,021.00
WARD 7	807	27,083.00	23,948.00	21,217.00
WARD 8	1741	28,019.00	23,948.00	12,612.00
WARD 10	718	28,019.00	29,974.00	20,834.00
WARD 21	439	28,019.00	23,948.00	21,374.00
Total beneficiaries and income to communities	4444	136,020.00	125,766.00	93,058.00

Lodzi Hunters are engaged in a massive, aggressive and beneficial community social responsibility programme. Over the past three and a half years, about half a million US dollars in direct cash has been spent on transport - for food (600 tons of maize), building supplies, river sand (500 tons), school children for sports and cultural events, and for the local community and the two local chiefs in general; water - drilling of boreholes and fixing and rehabilitating pumps and diesel engines, fixing and clearing out silted pans and broken dams; roads - construction of new and rehabilitating old roads; education - sponsoring school prize giving occasions, both for the event and actual prizes for pupils, sponsoring 16 pupils yearly school fees; food and drought relief - establishing grinding mills in the community, emergency livestock stock feed and baled grass to the local communities in the desperate drought month, water bowser delivery to areas where boreholes are temporarily out of action (sometimes 30 kilometers delivery distances); funeral assistance - assisting and paying for funeral costs of local community members; health – contributing to building of Rural Health Centers; and assisting with national events i.e. Independence Day, Heroes Day commemorations.

Further, 90% of elephant meat is delivered from the average of 13 trophy Elephant direct to the local community throughout the 5 Wards (i.e. 23 000 kilograms of protein).

Lodzi Hunters also assists Hwange National Park, especially the South Eastern side of the Park, Makona and Josivanini area, and the Zimbabwe Parks and Wildlife Management Authority (ZPWMA) in general with their operations i.e. anti poaching patrols and logistics, transport, re-building of base stations, fuel, aerial reconnaissance and surveys, vehicle repairs and maintenance, and assisting with cleaning out silted pans within the Park.

Wildlife funded CAMPFIRE community projects in Tsholotsho District

Ward	Projects
1	• Mono pump system for water provision. • Water engine parts for Nyanganyuni Line, Sihazela, Nintili, Nyadzi Line. • Borehole engine parts for four villages. • Solar pump water system at Gibixhegu and Gwabazabuya Line, in conjunction with safari operator. • Sihazela Primary School classroom block, in conjunction with safari operator.
2	• Toilets for headman's courtroom. • Engine belts for borehole repairs at Zamazama, Sizanani, Zwananani and Thandanani villages. • Borehole drilled at Kope Line. • Water pump for water provision.

	• Solar pump water system at Dlamini Clinic and Gombalume Primary School Line • Construction of Bhemba Clinic.
3	• Borehole drilled and cased at Nyelesi Village, Mtshwayeli and Ntulula. • Borehole at Mashula and Vulashaba Line. • Fifty chairs for Kapane Secondary School. • Classroom block at Mlevu and Mtshwayeli Primary Schools. • A new school under construction at Ntulula Village. • Re-roofed classroom block at Kapane.
4	• Classroom block at Dibutibu Primary School • A mini weather station was installed at Dibutibu Line, in conjunction with World Wide Fund for Nature (WWF). • Solar pump water system at Dibutibu Business Centre. • Ten sewing machines for Dibutibu Secondary School. • F14 staff cottage at Siphongweni Primary School. • Water storage tank and stand for Dibutibu dip tank.
5	• Building material for classroom block at Sipepa Primary School. • Classroom blocks at Mcetshwa, Jakalasi, and Gwali Primary Schools. • Rehabilitation of ten blair toilets at Jakalasi Primary School. • Mpindo classroom block, in conjunction with safari operator.
6	• School furniture (chairs and desks) for Nkwizhu Primary School for 2 classroom blocks. • Boreholes drilled at Mahlosi, Manyenge, Nkwizhu, Jimila, Tshino Line. • Diesel generator was purchased for Tshino Primary School. • Rehabilitation of Mothers' Waiting Room at Jimila Clinic. • School furniture (50 senior chairs and 25 senior dual desks) for Jimila Secondary Schools. • Tuck shops at Tshino and Zabagwadi Line. • Teachers' cottage at Mahlaba Primary School. • Two classroom blocks at Nkwizhu Primary School.
7	• Lister engine and water tank at Pumula Village. • 7km piped water scheme at Gulalikabili. • Diesel pump engine at Phelandaba Primary School, in conjunction with the safari operator. • Classroom block and teachers cottage re-roofed at Phelela and Mpilo Primary School. • Community Hall and general dealer store constructed at Patalika. • Barrier to ward off elephants away from crop fields was set up at Phelela Line, through GEF/World Bank funded HSBC project.
8	• Tshitatshawa Clinic, 99% complete. Staff cottages roofed. • Borehole installed at Tshitatshawa Clinic. • Fencing of Tshitatshawa Clinic. • Solar pump water system at Folosi Line. • Classroom block and tennis court at Mbiriya Primary School. • Borehole at Mbiriya Primary School.
9	• Building material for construction of the second wing at Jowa Clinic. • Chief Tategulu's court house. • 30 wheelbarrows, 30 shovels and 30 picks for rehabilitation of dams. • Classroom block constructed at Malindi in Ward 9.
10	• F14 staff cottage at Zibalongwe Primary School. • Rehabilitation of classroom block at Zibalongwe Primary School. • Three boreholes at Manganga village, Sikente Secondary School and Mtshina Line. • Maphane community hall. • Sikente Clinic completed.
21	• Five pump minder kits. • Six Lister water pump engines. • 5 000 litre water storage tank.

- Borehole at Tshibizina for clinic site.
- Chief Tategulu's court house.

Safari Operator Social contribution

Lodzi Hunters are engaged in a massive and beneficial community social responsibility programme. Over the past three and a half years, about half a million US dollars in direct cash has been spent on transport - for food (600 tons of maize), building supplies, river sand (500 tons), school children for sports and cultural events, and for the local community and the two local chiefs in general; water - drilling of boreholes and fixing and rehabilitating pumps and diesel engines, fixing and clearing out silted pans and broken dams; roads - construction of new and rehabilitating old roads; education - sponsoring school prize giving occasions, both for the event and actual prizes for pupils, sponsoring 16 pupils yearly school fees; food and drought relief - establishing grinding mills in the community, emergency livestock stock feed and baled grass to the local communities in the desperate drought month, water bowser delivery to areas where boreholes are temporarily out of action (sometimes 30 kilometers delivery distances); funeral assistance - assisting and paying for funeral costs of local community members; health – contributing to building of Rural Health Centers; and assisting with national events i.e. Independence Day, Heroes Day commemorations.

Further, 90% of elephant meat is delivered from the average of 13 trophy Elephant direct to the local community throughout the 5 Wards (i.e. 23 000 kilograms of protein). Lodzi Hunters also assists Hwange National Park, especially the South Eastern side of the Park, Makona and Josivanini area, and the Zimbabwe Parks and Wildlife Management Authority (ZPWMA) in general with their operations i.e. anti poaching patrols and logistics, transport, re-building of base stations, fuel, aerial reconnaissance and surveys, vehicle repairs and maintenance, and assisting with cleaning out silted pans within the Park.

No new cases of cyanide poisoning have been recorded in Tsholotsho District this year. Anti-poaching awareness campaigns are regularly conducted. Communities have prioritized the construction of sub-offices for anti-poaching and problem animal control to service hot spot areas around Phelandaba and Mtshwayeli.

The result:

No new cases of cyanide poisoning have been recorded in Tsholotsho District this year. Anti-poaching awareness campaigns are regularly conducted.

Communities have prioritized the construction of sub-offices for anti-poaching and problem animal control to service hot spot areas around Phelandaba and Mtshwayeli.

Please kindly donate and support this conservation effort.

Re: Applications for Permits to Import Sport-Hunted Trophies

Dear Chief Cogliano:

Enclosed please find three applications for permits to import sport-hunted trophies:

- The first applicant is hunting a lion in Zambia with Mulimo Safaris. In this 3,600 km^2 concession in a Game Management Area (GMA), hunting revenues are used to pay scout salaries to protect the habitat and prey, and to fund community projects. The lion population and prey species are increasing due to the operator's anti-poaching. Patrols occur year-round, include a staff of >20, and average >$50,000 per year in salaries, equipment, rewards, and other expenses. Poaching incidents have declined since this operator leased the concession. The operator also invests in education, healthcare, construction, water infrastructure, and more to improve the livelihoods of 1,000 people living in the GMA. Please see attached information from Mulimo Safaris and consider this information, and information in the DMA's files regarding the benefits of lion hunting in Zambia including information previously submitted by Conservation Force and Zambia's Department of National Parks and Wildlife (DNPW), in making a positive enhancement finding for this applicant.
- The second applicant is hunting a lion with Impanga Safaris in the Lumimba GMA in Zambia. This operator protects a 2,000 km^2 concession subject to a written agreement with the DNPW and the local Community Resource Board (CRB). Thirty-five percent of the concession fee and half the trophy fees are distributed to the CRB. These funds are used for wildlife protection and livelihood improvement. The operator pledges $14,000 in projects to the CRB per year. Further, 80% of this operator's staff is from the local community. The operator also invests heavily in anti-poaching and recorded 283 patrol days in 2016. Scouts successfully arrested ten poachers, among other results. Please see the report from Impanga Safaris and consider this information, and information in the DMA's files regarding the benefits of lion hunting in Zambia including information previously submitted by Conservation Force and the DNPW, in making a positive enhancement finding for this applicant.
- The third applicant is hunting an elephant with Charlton McCallum Safaris (CMS) in Zimbabwe. We have previously provided extensive information about CMS and their anti-poaching unit, the Dande Anti-Poaching Unit (DAPU). Attached please find two recent DAPU reports. Please consider all information regarding CMS and DAPU, as well as the extensive information and responses to DMA information requests submitted by Zimbabwe's Parks and Wildlife Management Authority, in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my application for a permit to import a threatened-listed, wild-managed African Elephant.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my elephant trophy at the following address:

John J. Jackson, III
Regina Lennox

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Evans	Milton	Karl	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Waxahachie	Texas	75165	Ellis	USA

2.a. Mailing address (include if different than physical address, include name of contact person if applicable)
(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Waxahachie	Texas	75165	Ellis	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

(b) (6) 05/10/2018

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as on page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Milton Karl Evans
(b) (6)
Conservation Force 504-837-1233
cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana African elephant

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Zimbabwe, Dande North Hunting Concession, (no nearby city)

b. Date wildlife is to be hunted:

05/17/2018 to 05/30/2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Charlton McCallum Safaris, PH Myles McCallum

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name:
   Business Name:
   Address:
   City:
   State/Province:
   Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   Daily rates of US $1200.00 per day, trophy fee if successful of $15,000.

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

   Charlton McCallum Safaris provided local villages over 36,000 pounds of corn in March and April 2018 to compensate for crop destruction by elephants, to help prevent villagers from killing the marauding elephants.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

    Applicant's signature: _(b) (6)_____ Date: 5/10/18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

DAPU End of year Newsletter 2017

DAPU

DANDE ANTI POACHING UNIT

visit us at www.dapuzim.com

End of year 2017

Dear Friends,

Thank you all so much for your unwavering support. DAPU has continued to build and evolve consistently throughout 2017. Total recorded snare yields, elephant poaching and illegal netting for the year 2017 are the lowest since the inception of DAPU. To be precise, since 2014 snaring has been reduced by 70% and poached elephants by 66%. We have recorded poached elephants since 2010, and whilst our 2010 and 2011 numbers are not perfectly accurate .... Elephant poaching has been reduced by 92% or from a high of 40 lost in 2010 and a low of 3 lost in 2017.

We are now in the wet season, and rainfall has been scarce and late. Unfortunately that means unless we get good late rains, then 2018 could be a busy year for DAPU simply because local villagers could be very hungry indeed.

We have continued to meticulously document all of our support, deployments, wins and losses and here we share a summary with everyone who so graciously and generously supported all of our efforts both financially and in kind. As we grow from strength to strength we look forward to your continued support.

With Regards,

Myles E. McCallum
James D. Charlton
Charles Ndondo

1. Changes

As mentioned in previous reports, we have added Peter Solomon and Owen Zviwanza to the management side of DAPU. Both go on patrols regularly in order to keep everyone honest.

CMS did a fair number of hunts in the Charara Safari Area in 2017 and we hope that we will continue with this into the future. Charara is a truly beautiful area with great promise and we have committed to a long-term plan for the area.

We had the one disciplinary issue in second period, and none other of any significance. Buzz and I feel that it is overdue for a one week re-training exercise for all DAPU scouts and supervisors and we hope to have this done by April 2018.

3. Peter Stewart fine art

Well know artist Peter Stewart has created the "DAPU collection"
http://www.cmsafaris.com/dapu/DAPU-COLLECTION-2017.pdf.
Peter has undertaken (very graciously) to donate 40% of the proceeds of any of the works in the collection to DAPU. In addition to that, two outstanding oils of Peters were auctioned in 2017 generating over $4,000 for DAPU. So a HUGE thank you to Peter and our two highest bidders!

*** Auction # 1 ***

*** Auction # 2 ***

visit us at www.dapuzim.com

4. The dry season.
Fires, Water, and Poaching

As I am sure most of you are aware, the 2017 rainy season was very kind indeed – in fact one of the best on record. So much so, that we had to get an extension to allow early burning a month late than normal. So luckily we had lots of water all year in Dande North. The East almost made it all year but not quite. DAPU patrols successfully patrolled the big water sources as often as possible to keep on top of the snaring.

One of our goals in 2017 was to improve on fire management as a whole. Starting a bushfire in Zimbabwe is an offence and in 2017 we began treating it as such. Several arrests were made and lots of fines and warnings issued.

Whilst official government figures are yet to be released, we have no doubt what so ever that in Dande, hectares lost to fires in 2017 is the lowest in more than 10 years – in fact probably 20 years.

5. Snaring & general poaching

September to end of December of 2017 was much, much quieter than the same period of 2015 and 2016. In terms of snares picked up and meat poachers arrested the yield is drastically reduced.
This is beginning to prove to be a motivational challenge for DAPU scouts – simply put - we have paid out less $ in rewards. Buzz and I are now exploring ways to index work done to a reward or bonus system.

2017 first second, and third period baseline comparisons.

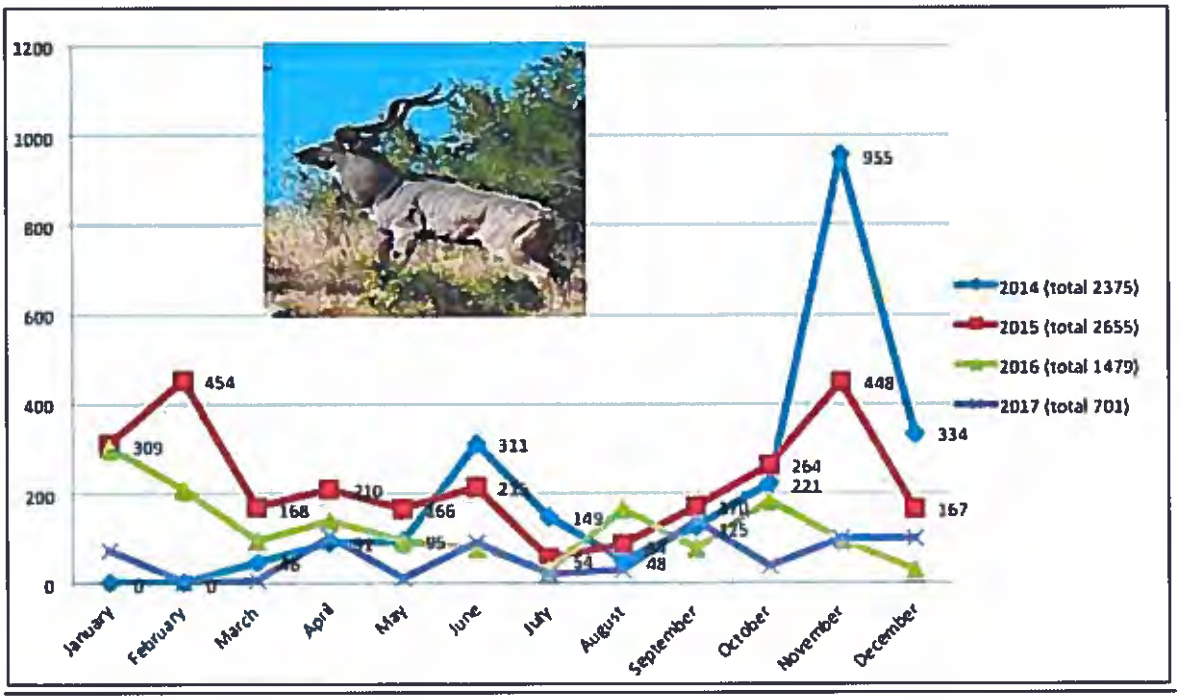
Month	No. of snares	Dogs shot	Meat Poachers convicted	Elephant poachers	Weapons retrieved	Rewards paid
January	71	0	3	0	2	US$784
February	0	0	1	0	0	US$150
March	7	0	0	0	0	US$19
April	103	0	0	0	0	US$133
	181	0	4	0	2	US$1,086.00
May	9	0	0	0	0	US$9
June	89	0	2	0	0	US$118
July	19	1	2	0	0	US$439
August	30	0	0	0	1	US$48
	147	1	4	0	1	US$614
September	139	0	0	2	1	US$1,327
October	36	0	0	0	2	US$68
November	99	0	0	0	1	US$1,574
December	99	0	0	3	0	US$0
	373	0	0	5	4	US$2,969
Total YTD	701	1	8	5	7	US$4,669

2016 first, second and third period baseline comparisons

Month	No. of snares	Dogs shot	Meat Poachers convicted	Elephant poachers	Weapons retrieved	Rewards paid
January	300	0	3	0	0	US$821
February	208	0	0	2	0	US$978
March	95	0	0		0	US$97
April	137	0	1	0	2	US$321
	740	0	4	2	2	US$2,217
May	94	0	5	0	4	US$1,310
June	75	0	0	0	0	US$83
July	27	0	0	0	2	US$67
August	164	1	0	0	0	US$254
	360	1	5	0	6	US$1,714
September	78	0	0	0	1	US$97
October	181	0	1	0	1	US$447
November	92	0	2	0	0	US$442
December	28	0	0	0	0	US$532
	379	0	3	0	2	US$1,518
Total YTD	1479	1	12	2	10	US$5,449

One of the most pleasing things about these trends is that we are getting on top of the "spikes" in poaching. DAPU has worked smarter and harder at the right time, in the danger areas, to counter increased poaching.

2015, 2016 and 2017
Full year snare yields compared

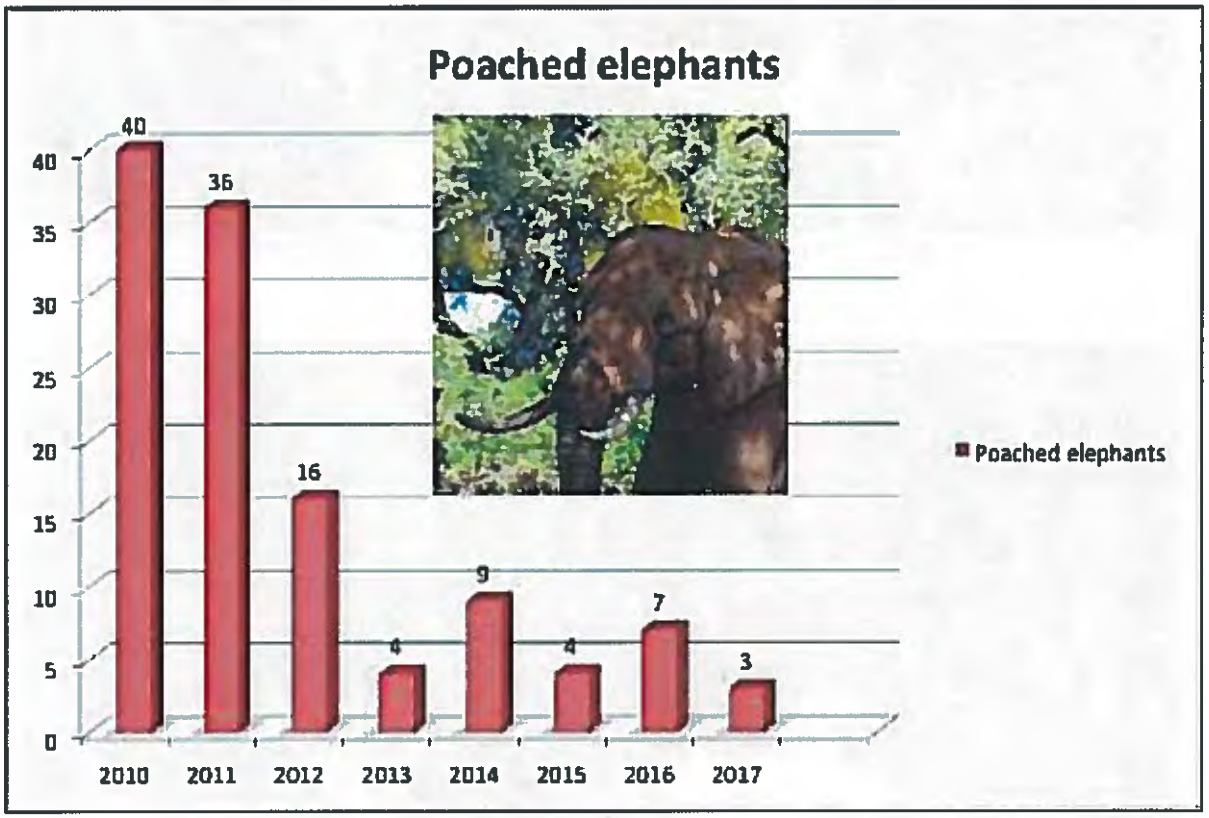


5.Elephant poaching

There were NO elephants poached in the third period of 2017 in the whole of Dande North and East. Therefore with the two lost in the Irira area (ward 2) and one in Chapoto (ward 1) we lost a total of three elephants in 2017. This is a figure that we can be extremely proud of. Obviously zero losses would be even better, but, considering Dande has + 100km's of border with Mozambique and a further 12km's with Zambia... probably we should be very happy indeed.

It must be mentioned that two elephant poachers were arrested and convicted in September and a further three in December 2017. One x AK47 taken out of circulation. We had heard about this AK47 for years and it was especially good news to get this weapon out of the system.

Traditionally as the hunting season slows down, and the presence of hunters also decreases – elephant poaching increases. The most dangerous months for our elephants are January – April, so we will need to be extra vigilant over the next few months until our hunters come back and help us out!



**** Graph showing 8 year elephant carcass count****

**** Parks, DAPU and the Accused (later "the guilty")****

****Bongi with seized ivory N.B. it all looks old ie they were "picked up" – not freshly poached.****

7. Problem Animal Control

Duties for DAPU scouts also include attending to Problem Animal reports (PAC). Obviously "the peak season" for PAC is the cropping season. That said there are cases all year long.

7.1.1 Elephant

None shot in 2017 BUT there have been and will always be sporadic raids by (mostly) young bulls into riverside vegetable gardens and fields. We treat every report as serious and the DAPU teams really react as strongly as they can early on. This normally saves us shooting. Our DAPU crews go onto full time elephant PAC rosters from February through to the end of April.

7.1.2 Lion

One old lioness killed and ate an old man from Kanyemba. He was on his way to the Zambezi to go fishing for his family. The very unfortunate scene was attended to by DAPU and she was shot, close to where she killed. Sporadic killing of livestock persists especially in ward 4 (8 cattle killed in November / December - but no lions shot in that area.

*** Skin and bones***

*** This picture clearly shows the tooth wear –she is an old cat***

7.1.3 Buffalo

Only the one blind old buffalo cow in Pedza villages was destroyed. Buffalo spend allot of time in the villagers gardens at night – normally the villages chase them or fence of gardens as required. In the rainy season they love to eat corn and cotton, which is grown in bigger fields, so that is more problematic as they cannot be fenced.

7.1.4 Crocodile

No one killed or injured that we know of.

7.1.5 Hippo

Hippos continue to generally make a nuisance of themselves along the Mwantanda River in ward 1 and in ward 16 (where the Manyame comes into the Zambezi Valley). Two badly behaved hippo were shot in March by Council but that was all.

7.1.6 Snake bites

Nothing to report.

8. Netting on the Zambezi

DAPU will continue to contribute 200 liters of petrol per month toward efforts to eliminate all illegal fishing in a 50km stretch of the Zambezi River. In 2017 National Parks achieved the following:

8	**Banana boats.**
10	Makoros.
14,340m	Nets burnt.
6	Basket traps.
33	Arrests.
19	Escaped.

Only when we added up the season's haul of nets, boats and poachers did we realize:

1. The scale of the problem.
2. How much work the National Parks crews have done.

We estimate that 85% of all illegal Netting has been stopped. Fisherman reported much improved catches as a whole, with lots of small tiger and bream caught – this can only bode well for all parties in the future.

Obviously lots of illegal fisherman also lay snares and much worse, so this effort is well worth supporting. Please see attached a separate report from National Parks.

***Measuring nets – note the fine gauge ***

Fish traps – Zambezi River 2017

(Funnily enough large gauge holes & eco friendly - just placed in wrong country!

9. Goals for 2017

1	Continue with anti-poaching patrols	Patrols have done well - we have had the quietest year in our history.
2	Early burning will start in May as soon as it is dry enough.	Complete – our most intensive effort in 8 years and surely best in 20 years.
3	Repair firearms where possible or replace	Delivered!!!
4	New boots (on the way).	Stuck in Durban.
5	New uniforms – paid for not delivered.	Delivered.
6	If possible trade in one of the older DAPU vehicles for a newer one.	DSC-F has funded DAPU to the tune of 24,000 dollars towards a new pick up. Delivery expected end of January 2018.
7.	Install New solar pump in East by end of September	Done and pumping!

Aimguard shotguns x 6 per kind favor of a young Harare based hunter

*** 3200m of piping and solar pump installation Dande East, October 2018***

10. Conservation Force

We continue to work hand in hand with John and Chrissie Jackson of Conservation Force. John and Chrissie are proud hunters and legends in the fight for our way of life and the wild places that we all love.

Conservation Force is a registered non – profit 501(c)(3) public foundation.

How to make a Tax Deductible donation.

11. Flying for wildlife and others.

We must extend our thanks to:

1. Flying for Wildlife for their aerial patrols that are conducted on request. These are volunteer pilots in their own machines and they help us at NO cost to DAPU, which is tremendous.

3. Pieter Gertenbach and Charl Grobelar – farmers in the Harare area that are always helping out with mealie meal, fertilizers, soap and other ration items. We use this to supplement the DAPU rations and it is always very well received by the DAPU teams!

4. Trackit (Richard Tennant and Hannes Scholtz) who provide free, real time satellite monitoring of the two DAPU vehicles. This has really saved significantly on fuel and vehicle costs. Also of course we have been able to be much smarter with servicing, and positioning of vehicles.

12. DAPU Income and Expenses 2017

Income	
Bob Schofield	US$100
Burton Foundation	US$2,000
Communites Foundation of Oklahoma	US$2,000
David Adams	US$5,000
David Maple	US$500

DAPU
DANDE ANTI POACHING UNIT

visit us at www.dapuzim.com

Dear Friends,

Thank you all so much for your unwavering support. DAPU has gotten off to a strong start in 2018. I must say that it has been a different "season" in that it almost seems like the lions and elephant's have declared war on the villagers. We cannot remember a season with quite this intensity of conflict and tragedy.

Summarily, DAPU scouts have all been posted to their home camps (the DAPU camp in the area which they come from) so that they are able to react strongly to any PAC. Our reasoning (which is correct) is that the scouts will work hardest in their home villages protecting lives and crops. When the crops are safely harvested we will begin once again to mix the units so that no one works in their home ward.

We have continued to meticulously document all of our support, deployments, wins and losses and here we share a summary with everyone who so graciously and generously supported all of our efforts both financially and in kind. As we grow from strength to strength we look forward to your continued support.

With Regards,

Myles E. McCallum
James D. Charlton
Charles Ndondo

1. Changes

As mentioned in previous reports, we have added Peter Solomon and Owen Zviwanza to the management side of DAPU. In the PAC season (which is especially dangerous), Bongi, Muno, Peter and Owen all go on regular patrols in order to keep everyone honest and safe.

Ward 1 (Kanyemba) has decided to retrench all six of their DAPU scouts as of 1st April 2018 for reasons of their own. Buzz and I have had to let the process play out in the hope that in the end we will achieve some capacity building i.e. all Wards need to be more responsible for their wildlife, which obviously includes having some control of their own scouts. Ultimately DAPU was created to support the ward scouts – which it continues to do very successfully indeed.

The decision has caused some confusion for sure, and we think has been a warning to other wards not to act to hastily!

The outcome is that six new scouts have been hired, and are awaiting training before deployment in June. Bongi, Muno and Owen have personally been doing all the patrols on their own so that no enforcement gaps appeared.

Two homemade muzzleloaders picked up in April.

2. Peter Stewart fine art

Peter is a young contemporary painter who has who has developed a reputation for his highly representational art. Growing up in South African bush he became interested in the wildlife from an early age. He has a deep respect for the knowledge and sensitivities of the past and has spent time visiting museums as well as establishing relationships with contemporary realist painters in the USA. His paintings emote, and convey a care and sensitivity that is only achieved from knowing the subject matter intimately. Utilsiing subtle value and temperature shifts, fine draghtsmanship and pure intuition, Peter weaves a world of breathable air and tactile forms.

Peter Stewart has painted "The Warrior"– (16 x 24 inches) on Belgian canvas in support of DAPU. The male lion is the king of beasts, the top of the food chain and the most dominant force in the African Bush. Male lions are viewed as this majestic, regal creature that is protector, a father and warrior. The one that will put his life on the line for the pride.

This painting is on sale through http://dapuzim.com/support.html

3. The wet season. "Rain, crops, and poaching"

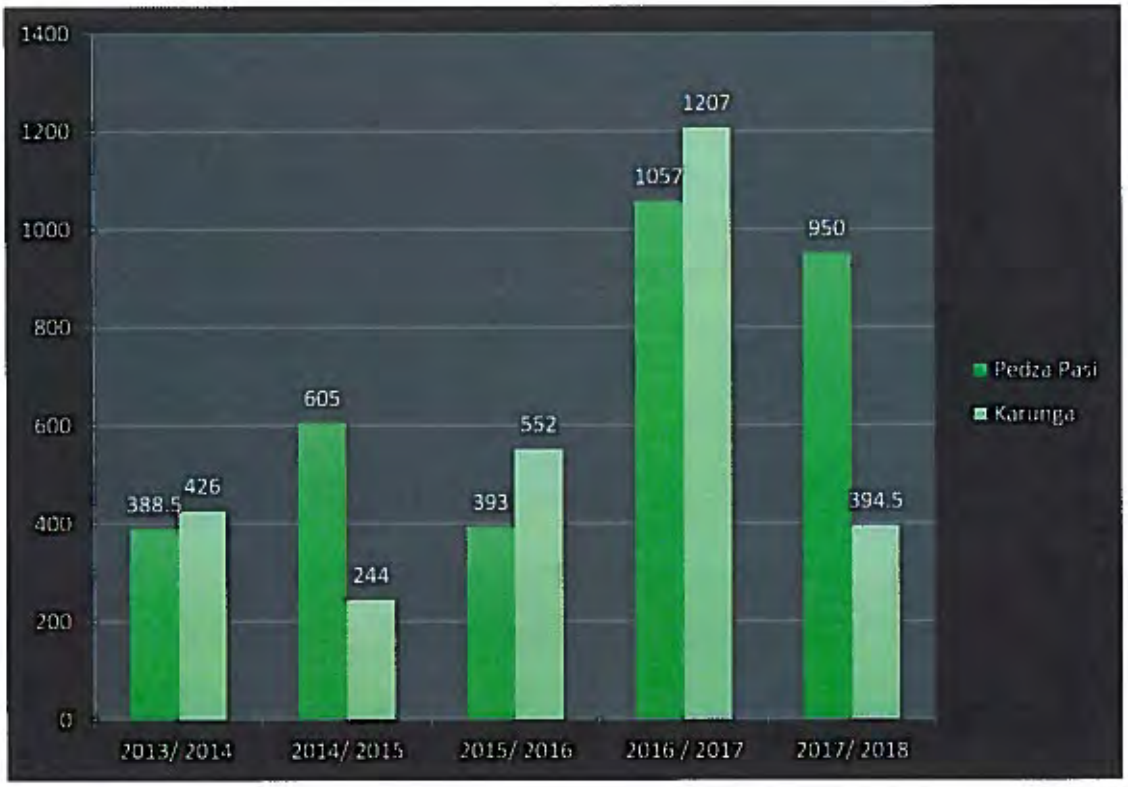
The 2018 rainy season has been erratic and late. The crops – have in general been very poor in Dande, so there is no doubt that we can expect heavy poaching September 2018 – March 2019. There was decent late rain in March and April so there will be a small harvest, but certainly not enough to see families through the year.

This is a reminder to us all that Dande:

a. Is in "agro ecological region 5" which is at best marginal for agriculture BUT is perfectly suited to wildlife.

b. Wildlife needs water in some areas, so especially, in the East (and in ward 1) we need to re double our efforts, at getting water. Some rivers systems are now settled by people, leaving game competing with humans for water – which typically does not work well!!!

Seasonal rainfall.



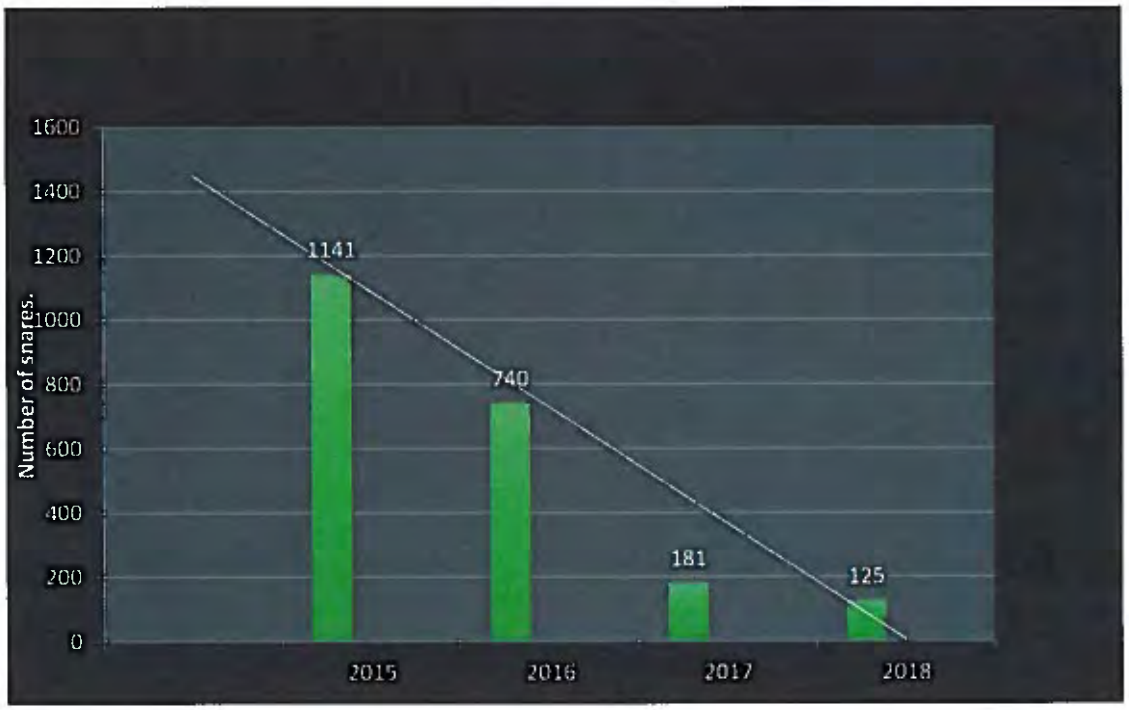
The ward 1 (Kanyemba community) was really hard hit by NO rain until February, followed by floods, so crop loss was close to 100%. They drew down on 2018 hunting proceeds, in order to purchase 30kg of mealie meal for each of the *1,125 families and 33,750kg's was subsequently delivered.* Obviously stories like this are extremely important in the big picture and help DAPU's efforts immensely.

4. Snaring & general poaching.

January to end of April 2018 has been much, much quieter than the same periods in 2014, 2015, 2016 and 2017. In terms of snares picked up and meat poachers arrested the yield has been drastically reduced. Buzz and I are of course thrilled and believe the reasons to be a combination of the below:

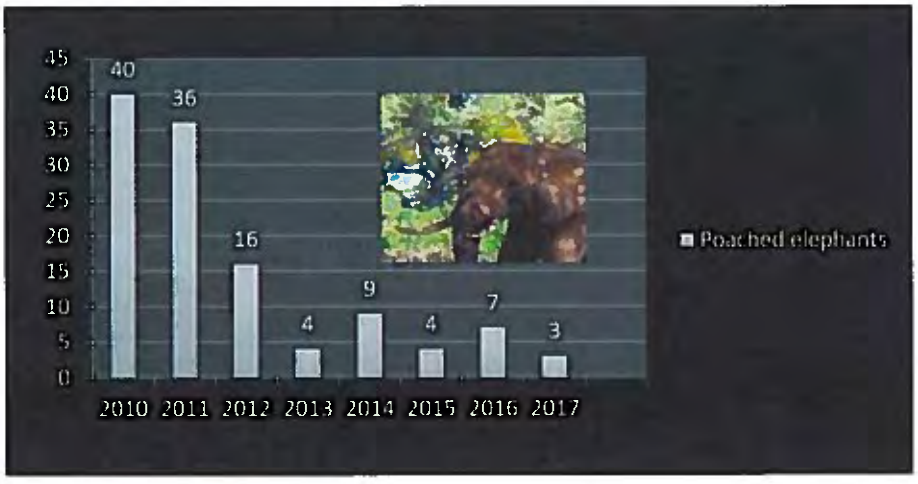
a. DAPU.
b. Buy into our programs from communities.
c. Equitable sharing of income.
d. Government of Zimbabwe.
e. Employment.
f. Meat distribution.

Snares - 2014, 2015, 2016, 2017 and 2018 first period baseline comparisons



5. Elephant poaching.

There are NO CONFIRMED reports of elephants poached in Dande thus far in 2018, BUT we have had reports of shots in the Irira area, so we know for sure that we will be picking up a carcass or two in that area.
An exceptional National Parks Investigations officer (with a little help from DAPU) was able to make two arrests in Dande this year.



26th March 2018

"One accused male, aged 29 married with 3 wives and 6 kids. Recovered 1 x elephant tusk weighing 11.6kg valued at $2900 and 1 x fake wooden carved tusk".

Later sentenced to 9 years imprisonment.

20th April 2018
The above believed to be from an elephant cow poached in Ward 1 in January 2018. The accused is now the "convicted" – he is a repeat offender and is currently serving out his 9-year term.

6. Cyanide poaching

DAPU assisted National Parks to arrest a man selling cyanide to poachers. He was tried and pleaded guilty and sentenced to 12 months in jail which is the maximum sentence alowed.

This case has links back to a case where 3 years ago DAPU arrested a poacher who killed a warthog by poisoning it with cyanide. The below was his supplier. The net eventually closes!

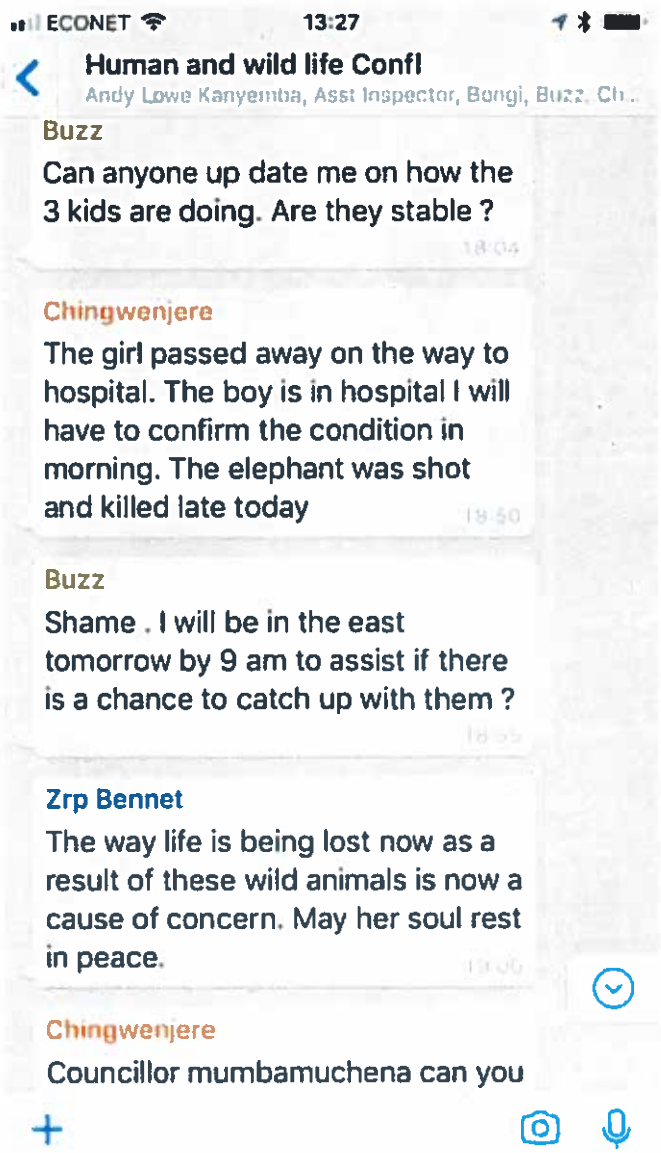
We must compliment the investigations from National Parks - they are doing a fantastic job and poaching has been taken very seriously. It has been a pleasure for DAPU to help in these arrests.

7. Problem Animal Control

Duties for DAPU scouts also include attending to Problem Animal reports (PAC). Obviously "the peak season" for PAC is the cropping season. The

7.1.1 Elephant.

Two people (kids killed), two people hospitalized and two elephants shot in 2018. Our DAPU crews have been on full time elephant PAC rosters from February through to the end of April, and look to continue into May.



A screen shot of our Human wildlife conflict Chat group. Every single day February to end of April we have had incidents to attend to.

A nine-year-old boy, died trying to protect his families fields.

This is what 100% crop loss looks like.

visit us at www.dapuzim.com

7.1.2 Lion

Four lions shot after communities lost 64 sheep (in one night), 12 goats and 24 cattle to these cats. With the trophy bans and resultant loss of incomes to communities, attitudes have hardened.

7.1.3 Buffalo

No reported serious problems to date in 2018.

7.1.4 Crocodile

No one killed or injured that we know of so far in 2018.

7.1.5 Hippo

One hippo was wounded (muzzle loader) and had to be shot. Hippos continue to generally make a nuisance of themselves along the Mwantanda River in ward 1 and in ward 16 but Muno and Owen have been able to keep them at bay.

7.1.6 Snakes

Nothing to report.

8. Netting on the Zambezi

DAPU will continue to contribute 200 liters of petrol per month toward efforts to eliminate all illegal fishing in a 50km stretch of the Zambezi River. Due to heavy rains, and flooding, in February and March, netting has been slow. We expect that illegal netting will pick up soon.

9. Goals for 2018

1.	Continue with anti-poaching patrols	Patrols have done well - we have had the quietest year in our history.
2.	Early burning will start in May or June, as soon as it is dry enough.	.
3.	Schedule re – training of scouts.	Anytime June to August.
4.	2018 uniforms and boots – paid for not delivered.	
5.	If possible trade in one of the older DAPU vehicles for a newer one.	
6	Install second solar pump in East by end of May.	
7.	Carry out leopard and lion survey – buy 10 more trail cams.	
8.	Sell two old tractors and get one new one (vital for new pipelines, firebreaks amongst other things)	Done.
9.	6 new GPS's required preferably with sat tracking.	

10. Other News

Myles was invited to Seville in Spain to make a presentation to experts, scientific authorities, governments and NGO's on:

"The best management practices in hunting and the role of Professional Hunters in Conservation"

It was a four day workshop and it's aim, was in particular, to foster close collaboration between Scientific Authorities from both exporting and importing countries in relation to the formulation of CITES Non-Detriment Findings (NDFs) for hunting trophies of certain African species.

Certainly one of the primary reasons Charlton McCallum Safaris was invited was because of DAPU and the success that it has enjoyed!

"I think I am less nervous facing a wounded buffalo!"

11. Dallas Safari Club – Foundation – Land cruisers

DAPU # 1

DAPU # 2

Due to an extremely generous $24,000 donation from the Lubbock Sportsman's Club via the Dallas Safari Club Foundation, Buzz and I were able to purchase a new Toyota Hilux, which has allowed us to dedicate two more suitable land cruisers 100% full time to DAPU. The Hilux will do both DAPU and general duties.

11. Flying for wildlife and others

We must also extend our profound thanks to:

1.Flying for Wildlife for their aerial patrols that are conducted on request. These are volunteer pilots in their own machines and they help us at NO cost to DAPU, which is tremendous. Richard Tennant, Hannes Scholtz and Edward Whitfield have all given extremely generously of their time and machines to DAPU.

"A huge thanks to FLYING FOR WILDLIFE and Edward Whitfield who came down to the Dande to help DAPU fly the complete area looking for any signs of poaching.

Ed is a wonderful pilot and his Savannah was a real eye opener. What we achieved in 7 hours of flying was incredible. I am happy to say that from what we can see the area is nice and quiet. We did see some fish poachers based in the Irira area. These are the Vadoma people and it is part of their culture. There are times that one should turn a blind eye, which is what we did. There was an old elephant carcass from well over a year ago that we were not aware of.

We did see a lot of elephant buffalo was well as some impala zebra bushbuck and sable despite the very thick bush. Once again a huge thanks to Ed as well as FLYING FOR WILDLIFE- if any organisation deserves financial support then FFW certainly do as they do an amazing job and are becoming essential in the controlling of poaching in remote areas"

2. Pieter Gertenbach and Charl Grobelar – farmers in the Harare area, that are always helping out with mealie meal, fertilizers, soap and other ration items. We use this to supplement the DAPU rations and it is always very well received by the DAPU teams!

3.Trackit (Richard Tennant and Hannes Scholtz) who provide free, real time satellite monitoring of the two DAPU vehicles. This has really saved significantly on fuel and vehicle costs. Also of course we have been able to be much smarter with servicing, and positioning of vehicles.

A nice looking solution – GPS, and satellite Text messages for game scouts. They can send distress calls and we can also track their patrols.

12. Conservation Force

We continue to work hand in hand with John and Chrissie Jackson of Conservation Force. John and Chrissie are proud hunters and legends in the fight for our way of life and the wild places that we all love.

Conservation Force is a registered non – profit
501(c)(3) public foundation.

Re: 60 day notice of intent to sue for failure and refusal to process elephant trophy import permit applications.

Dear Ladies and Gentlemen:

This is a 60-day Notice of Intent to Sue under the Endangered Species Act, 16 U.S.C. Sec. 1531 et seq. ("ESA"), for failure and refusal to process elephant trophy import permit applications in violation of the Administrative Procedures Act, 5 U.S.C Sec. 553 et seq. ("APA"), the Rules and Regulations of the Department implementing the ESA, *see* 50 CFR Part 17, the Special ESA Elephant Regulations, 50 CFR 17.40, regulations implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora, Mar. 3, 1973, 27 U.S.T. 1087 (hereinafter "CITES"), *see* 50 CFR Part 23, and the general permitting regulations of the United States Fish and Wildlife Service ("USF&WS" or "Service"), *see* 50 CFR Part 13.

This notice is on behalf of Dallas Safari Club ("DSC"), their members who desire to engage in trophy sport hunting of African elephants, outstanding elephant trophy import applicants, DSC conservation partners, including Sango Safaris, the Namibia Ministry of Environment and Tourism, the Namibian Association of CBNRM Support Organisations ("NASCO"), and the individual permit applicants set forth on Attachment A to this letter.

The African elephant (*Loxodonta africana*) is listed as threatened under the ESA and is regulated under an ESA section 4(d) special rule [50 CFR 17.40(e)]. The 4(d) special rule lists the requirements for the import of sport-hunted trophies. Under paragraph 17.40(e)(6)(i)(B), for the USF&WS to issue a threatened species permit under 50 CFR 17.32, authorizing the import of a sport-hunted elephant trophy, the Service must make a determination that the killing of the trophy animal will enhance the survival of the species.

Pursuant to the APA, the Service is required to process these permit applications and make a decision on them within a reasonable time. 5 USC 558(c). 50 CFR 13.11 provides

that permit applications will be processed "as soon as possible." And 5 USC 706 provides for judicial review of "agency action unlawfully withheld or unreasonably delayed." Moreover, the delay is denial without appeal in violation of 50 CFR 13.29 or judicial review, *see* APA section 706. The delay also conflicts with the duty the Service has under the ESA to recover the listed species and the enhancement that the permitting would encourage, thus violating 16 U.S.C. 1533(f) and 16 U.S.C. 1540.

A "hold" has been put on the processing of all elephant trophy import permit applications since November 2017 after President Trump issued two "tweets" on 17 and 19 November 2017 on his Twitter account @realDonaldTrump. The effect of this hold following the President's tweets has been to injure conservation efforts designed to protect the African elephant. This hold is further injurious to the people of the countries the elephants inhabit as the local population benefits from controlled sport hunting of elephants, a fact the Service has previously acknowledged.

Although positive enhancement determinations for Zambia and Zimbabwe were made immediately before the "hold" in November 2017, Namibia and the Republic of South Africa enhancement findings were neither new nor disputed. The positive enhancement determination for Zambia had not been suspended. By any standard, the countries of Botswana, Namibia, South Africa, Tanzania, Zambia and Zimbabwe have done nothing to deserve this mistreatment, and breach of treaty, law and regulations. A "tweet" is not a proper rule making. Moreover, this hold has been extended to all elephant trophy imports including from countries where the Service had longstanding positive enhancement findings that were the "gold" standard.

Subsequently, on March 1, 2018[1], the Service issued a memorandum in response to the D.C. Circuit Court's opinion in *Safari Club Intl., v. Zinke*, 878 F.3d 316 (D.C. Cir., 2017) which withdrew enhancement findings, including the enhancement findings for Zambia and Zimbabwe, and stated that

> All of the above referenced findings are no longer effective for making individual permit determinations for imports of those sport-hunted ESA-listed species. However, the Service intends to use the information cited in these findings and contained in its files as appropriate, in addition to the information it receives and has available when it receives each application, to evaluate individual permit applications. The Service is continuing to monitor the status and management of these species in their range countries. At this time, when the Service processes these permit applications, the Service intends to do so on an individual basis, including making ESA enhancement determinations, and CITES non-detriment determinations when required, for each application. The Service intends to grant or deny permits to import a sport-hunted trophy on a case-by-case basis pursuant to its authorities under the ESA and CITES.

[1] https://www.fws.gov/international/pdf/memo-withdrawal-of-certain-findings-ESA-listed-species-sport-hunted-trophies.pdf

> As part of the permitting process, the Service reviews each application received for import of such trophies and evaluates the information provided in the application as well as other information available to the Service as to the status of and management program for the species or population to ensure that the program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized.

This determination was not made as the result of the rule making proceeding ordered by the court in *Safari Club Intl. v. Zinke,* and would appear directly inconsistent with the court's opinion. Nonetheless, despite the statements contained in the Service's March 1, 2018, memorandum, all elephant import permits have remained on "hold." This is true for pre-act elephant trophies and renewal applications for elephant trophy import permits predating the "hold." The Service is not processing elephant import permits on a case by case basis or on any basis whatsoever. This lack of action is contrary to the law and applicable regulations.

The Service is unlawfully employing the "hold" on elephant trophy import permitting to elephant trophy imports from all countries, and even to the simple renewal of elephant import permits and to pre-act elephant trophies. The "hold" has been applied unlawfully to the detriment of the very best and most successful elephant management programs in Africa. The broadly applied "hold "was not a duly noticed and made rule making, was arbitrary, capricious and irrational, and greatly threatens the elephant and range nation programs the ESA and CITES aim to encourage and enhance. Indeed, the "hold" jeopardizes and obstructs years of conservation activities in Southern and a substantial part of Eastern Africa.

Tanzania, Zambia, Zimbabwe, Mozambique, Botswana, Namibia and South Africa hold an estimated 340,000 elephants out of a continental total of 415,000, i.e. 82 per cent of the elephants of Africa. The conservation success of these countries is linked to policies incorporating sustainable use of natural resources, based on science and aiming at improving livelihoods of rural communities while maintaining vast tracts of unspoiled habitat and ecosystems.

The tolerance by the rural citizens of Southern and Eastern Africa of elephants is increased through hunting revenue sharing systems in place throughout the region. The presence of substantial herds of elephants risk serious devastation of the crops on which the rural African population depend. Without the revenue generated by sport trophy hunting, the population would view the elephant more as pests than as a natural resource. Moreover, overpopulation of elephant threatens the habitat of other threatened species. *See* Statement of Sango Safaris, Attachment B.

The "hold' obstructs 70 per cent of the revenue of the Community Conservancy Program in Namibia. All tourist safari hunting of elephant occurs in community

conservancy areas. Likewise the hold obstructs the same percentage of the revenue of the 700,000 families which depend on the CAMPFIRE Program in Zimbabwe. The "hold" undermines the community Wildlife Management Areas in Tanzania that are intended to provide incentivizing livelihoods to rural communities and to act as corridors for elephant and other species between protected areas. The "hold" obstructs the community program in Zambia which largely relies upon tourist safari elephant hunting. The "hold" largely blocks the developing elephant conservation strategy in Botswana that recently has lifted the suspension of tourist safari hunting. Tourist safari elephant hunting had previously been 70 per cent of community revenue in that country.

Therefore, the "hold" is jeopardizing conservation efforts in these countries and threatens the livelihood of more than one million persons and the biodiversity of millions of hectares of pristine wilderness. Without the management and revenues from tourism hunting, these lands are being encroached and converted to agro-pastoral land, leading to the unavoidable extinction of wildlife and natural habitats, and the collapse of ecosystem services.

The successful elephant conservation as well as the control of poaching largely depend upon the sustainable use conservation strategy in the form of elephant tourist safari hunting in each of these countries. The elephant populations and programs in these countries cannot be sustained without the revenue generated by safari hunting and U.S. import of the trophies; hence the "hold" is *the* major threat to the survival of the largest remaining elephant populations in Africa. Hundreds of thousands of elephants are in jeopardy and more than a million families are being deprived of the realization of their single most valuable natural resource because of this illegal "hold."

Finally, tourist safari hunting of elephant is governed by sound administrative systems in all countries that include scientific based quotas supported by CITES non-detriment findings, law enforcement largely funded or carried out by safari hunting operators on the largest share of wild habitat, regulatory permitting, and community-based conservation programs, most of which was supported by over one-hundred million dollars of USAID funding because of its conservation and humanitarian merit.

In conclusion, on behalf of DSC, its members, outstanding elephant trophy import applicants, and DSC conservation partners, and for the reasons stated in this notification, we intend to sue under the Endangered Species Act for failure and refusal to process elephant trophy import permit applications.

Respectfully,

Scott Tobermann
DSC President

Attachment B

STATEMENT OF SANGO SAFARIS OF SAVE VALLEY SAFARIS, ZIMBABWE

Sango Safaris represents a 60,000 hectare property, situated within the Save Valley Conservancy ("SVC") in the South Eastern Lowveld of Zimbabwe.

The annual 2018 aerial survey, carried out every September/October for the past 20 some years showed a population of 665 elephant on Sango last year. As an average in recent years we have from 600 to over 900 elephants on Sango at any given moment. Our ecologically established carrying capacity ranges between 200 to 300 elephants. Therefore, we have at any given moment between 400 to 700 too many elephants on Sango with devastating destruction not only to the food base of the species causing the destruction but with dire consequences for all other plains game animals.

For example the Elephants' destruction as well as decreasing rains have resulted in our zebra and wildebeest herds dropping from 1,500 to 2,000 to around 600 of each species today. Similar numbers are experienced for all other grazers. Aerial Survey numbers for elephants on Sango since 2009 are as follows:

No. Elephants	Year
654	2009
462	2010
393	2012
648	2013
474	2014
497	2015
949	2016
684	2017
665	2018

The latter shows a current density of 1.1 elephant per square kilometer, whilst the recommended density is 0.2-0.3 per square kilometer for the dry Savanna areas we occupy.

The continued high density of elephant has and is having a very negative affect on Sango's habitats. For example the baobab trees of which we have an abundance are often hundreds if not thousands of years old. Approximately 90 per cent of all of our baobab trees are now suffering damaged by elephants. If this remains unaddressed Sango will have lost all its baobab trees in a matter of a few years.

Sango practices "sustainable utilization" and is proactive in the use of its excess animals, which income funds our further conservation efforts. To this end, Sango moved 100 live elephants to reduce their numbers and to help restock the Zimbabwe National Parks area in 2018. Such translocation solutions do not exist regularly as most national parks and private conservancies within a survivable translocation distance from Sango are overstocked with elephants as well.

The annual elephant hunting quota amounts to three older bulls for Sango and seven in total for the SVC. All funds generated from hunting flow fully towards running, protecting and maintaining the property and specifically its wildlife assets and the underlying habitats. This includes employment for 135 local people (44 of whom are anti-poaching scouts) provision of water for wildlife, fire breaks, road and infrastructure maintenance and a full time ecologist.

Sango forms the largest single property within the SVC. The most recent SVC elephant numbers are from a 2017 Aerial survey, (2,390 km2 of operating properties) and showed that SVC was home to 2038 elephants. This is an average of 0.85 elephant per km2 when the recommended density is 0,2-0,3 Km2. As per above formula this implies that we have approximately 1,500 elephants too many. However, we believe that the total elephant population in the SVC amounts presently to some 2,500 animals.

Elephant safaris bring in between $60 - 70,000 for each elephant. WWF recommends a trophy hunting quota of 0.75 per cent of an elephant population whilst we are not even hunting half of that quota. So the SVC and its members are prejudiced of a potential $420-720 thousand that can be used for conservation. This negatively affects, employment of local people, water pumping, fire break maintenance, etc. Our highly successful rhino anti-poaching efforts cost about $500-600,000 per year. Under the most adverse conditions we have grown our rhino population from some 42 animals in the mid 1990's to about 190 today.

If the hunting income is thus disallowed from sustainably using our elephant population, we would no longer be able to fund the protection of our highly endangered rhinos. Is there anything more proactive in conservation than using the income from one species present in excessive numbers to protect another which is highly endangered? By denying the importation of trophies into the USA major income is no longer available for the protection of endangered and highly endangered species. Our poachers would welcome this action by the US Government; we highly successful conservationist do not.

Dear Emma and Mr. Evans,

I am reviewing your application received in our office on June 1, 2018, to import a sport-hunted African elephant trophy from Zimbabwe. I apologize for the delay.

Can you please provide answers to the following questions?

1. Did you successfully hunt an elephant? If so, provide the date of the hunt.

2. Do you have any additional information to provide such as the CITES export permit from Zimbabwe?

3. If you did not hunt an animal, would you be willing to withdraw your application?

In accordance with 50 CFR 13.ll(e), if the requested information is not received by this office within 45 calendar days of the date of this email, your application will be abandoned and administratively closed. Once a file is closed, you will need to submit a new application, and all required fees, for the Service to consider your proposed activity.

Thank you and please contact me if you have any questions.

RE: SUPPLEMENT TO APPLICATION TO IMPORT A SPORT-HUNTED TROPHY

PRT #:	93406C
APPLICANT NAME:	MILTON KARL EVANS
SPECIE:	Loxodonta Africana [African Elephant]
COUNTRY:	Zimbabwe
CONSERVANCY:	Dande North Hunting Concession

Dear Ms. Brisendine:

In response to your email dated October 1, 2019, regarding the above captioned matter, please be advised that Mr. Evans did not take an Elephant because he did not yet have an import permit, but when he gets the over due import permit he hopes to then hunt. Mr. Evans wants to pursue the permit until it is issued.

If you have any questions, please do not hesitate to contact us.

Sincerely,

/s/ Emma C. Sampson

Lion Non-Detriment Finding: Charlton McCallum Safaris

Dear Rosemarie,

Please find attached some supplementary information to help you make a N.D.F. for the hunting of lions in our concessions in the Mbire District, Zambezi Valley, Zimbabwe. We have kept meticulous records for our 10 years of operations in the district, however I have only included 2015 – 2019 as these are the years that Zimbabwe moved over to the "age-based" quota setting.

All of this data is verifiable from the official hunt return forms.

We do have a very good success rate on lion hunts, and every year we are seeing more and more old lions, which is really gratifying.

Kind regards,

Myles E. McCallum

(Director)

Background

For way of background, we own three concessions, two of which (Dande Safari Area and Dande North) are contiguous:

Dande Safari Area (*Parks and Wildlife Estate – leased to Council/CMS*)	55,400 ha
Dande North (*communal land, Mbire district*)	72,500 ha
Dande East (*communal land – Mbire district*)	52,600 ha
Total area (hectares)	**180,500 ha**

Overall Summary

Year	Total quota	Percent quota sold	Lions harvested	Hunt success	Day of hunt	Hunt effort	Bait nights	Skull length (in)	Skull width (in)	Trophy size (in)	Age estimation	Lion per hectare
2015	4	25%	1	100%	4.0	19%	12	15.25	9.75	25.00	>5	180500
2016	4	100%	2	50%	21.5	95%	62	15.23	9.63	24.85	>4.5	90250
2017	4	50%	2	100%	5.5	40%	22	15.38	9.63	25.00	>6.0	90250
2018	5	40%	2	100%	9.5	47%	38	14.50	9.50	24.00	>5.5	90250
2019	4	50%	2	100%	11.5	58%	46	14.91	10.06	24.97	>5.5	90250
	21	**53%**	**9**	**90%**	**10**	**52%**	**36**	**15**	**9.71**	**24.76**	**>5.5**	**108300**

Notes

Percent success	This was simply calculated by number of lions taken on hunts as a percentage of hunts sold
Day of hunt	This shows the average number of days on successful hunts required to take a lion
Hunt effort	Calculated by dividing the day lion taken over the number of days of the safari as a percentage. More days = more effort
Number of baits	Average number of baits nights required per hunt. This is an estimate in some cases
Skull length (in)	Average skull length over 5 years
Skull width (in)	Average skull width over 5 years
Trophy size (in)	Average skull size over 5 years
Percent sold	The percentage of lions on quota that were sold
Estimated age	The official ages allocated to our cats by Panthera. Only one penalty for a lion under 5 yrs. Three of 9 cats were estimated at >7 so the average age is only based on 'age categories' with >6 being oldest. If we managed all >6 this would be a perfect score

Variables

Obviously hunting requires some 'luck' and there are many variables such as:

- Hunt length (some hunts are only 7 days so obviously chances are much lower)
- Client physical ability
- Seasons
- Moon phases

Accuracy

Bait nights is a little inaccurate as not all PH's captured data correctly. Skull measurements – we should allow for error in this as some of these measurements can be a little rough 'in the field'. Also there is a variance between a dry skull and a wet skull

Otherwise all data has been pulled off of stamped and signed hunt return forms so should be considered accurate and verifiable.

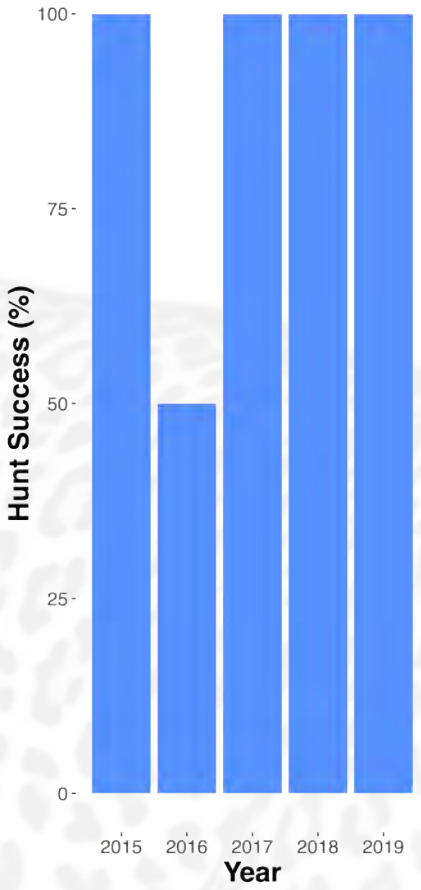

Figure 2: Average lion hunt success rate per annum

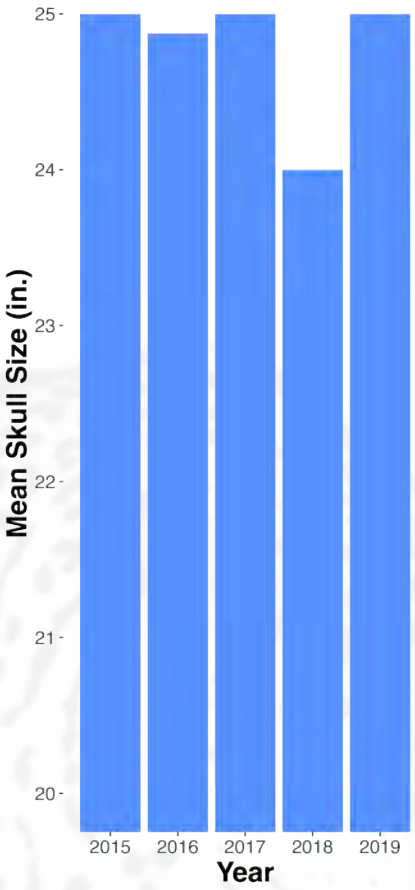

Figure 3: Average hunted lion skull size per annum

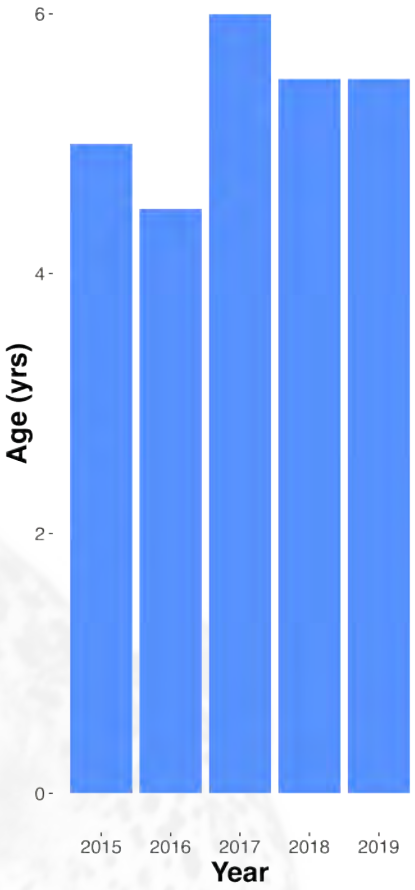

Figure 4: Average estimated age of hunted lions per annum – this is considered the key indicator of sustainable harvest

Tax Year Ending 31 December 2019

Opping Investments (Pvt) Ltd Charlton McCallum Safaris

Business Partner Number: 0200061095

Your Tax position is Satisfactory. No 10% tax should be withheld

Clearance issued on 02/18/2019 at 09:18:43 valid until 12/31/2019

Authentication code: UZTU.LSSC.4BBM.CAT7

The authentication and validity of this certificate must be validated on ZIMRA page at: http://efiling.zimra.co.zw

Summary

I have included some financial statistics for you to look at. I think that they clearly demonstrate the financial contribution of hunting in our concessions to the local communities and to National Parks. This contribution is what keeps the biodiversity in Mbire safe – the animals have worth. I have not included every detail but have provided a general overview.

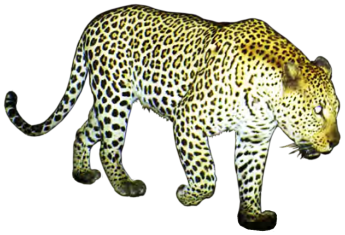
Hopefully the statistics show that we have been responsible stewards. We have avoided selling safaris unless we feel that our hunters have a high chance of success at a legal lion. As a company it is worth noting that many of these investments that we have made are not mandatory – we have made them for many years on a voluntary basis. One of these is our anti-poaching unit, which is wholly funded by our hunters and ourselves. Every single hunter who hunts with us makes a contribution to anti-poaching as per his or her contract.

It should be noted that since lion hunting and quota setting moved over to an age based system administered by Panthera, a lot of the data that we have collected over the years has become less relevant.

The fact that we have a high success rate with legal lions of the appropriate age-class (past-prime), in conjunction with our on-going offtake monitoring, should indicate the current and future sustainability of the harvest; and facilitate real and and boots-on-the-ground conservation of the wildlife biodiversity in our concession.

Kind regards,

Myles E. McCallum



Charlton McCallum Safaris

Type of Activity:
Import of ~~Sport-hunted~~ Trophies of
Southern African Leopard, African Elephant, and
~~Namibian Southern White~~ Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name: Elder	1.b. First name: Chris	1.c. Middle name or initial: L	1.d. Suffix:
2. Date of birth (mm/dd/yyyy): (b) (6)	3. Occupation:	4. Affiliation/ Doing business as (see instructions):	
5.a. Telephone number: (b) (6)	5.b. Alternate telephone number:	5.c. Fax number:	5.d. E-mail address: (b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution:	1.b. Doing business as (dba):		
2. Tax identification no.:	3. Description of business, agency, Tribe, or institution:		
4.a. Principal officer Last name:	4.b. Principal officer First name:	4.c. Principal officer Middle name/ initial:	4.d. Suffix:
5. Principal officer title:	6. Primary contact name:		
7.a. Business telephone number:	7.b. Alternate telephone number:	7.c. Business fax number:	7.d. Business e-mail address:

C. All applicants complete address information				
1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes): (b) (6)				
1.b. City: Springdale	1.c. State: AR	1.d. Zip code/Postal code: 72764	1.e. County/Province: Washington	1.f. Country: USA
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable):				
2.b. City:	2.c. State:	2.d. Zip code/Postal code:	2.e. County/Province:	2.f. Country:

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
   Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No ☑
3. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity:_____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   South Luangwa, Zambia in Nyamvu & West Petauke Game Mgmt Areas, Nyimba being closest town, operators and lease holders Nyamvu & Mopane Safaris Ltd.

   b. Date wildlife is to be hunted:

   July 27,2018 - August 17,2018

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

All parts including skin, teeth, skull, and claws

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted: n/a

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

   n/a

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   n/a

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business	Michael Borman
Name: Address:	Bangweulu Taxidermy
Address:	4142K Chifwema Road, New Kasama
City:	Lusaka
State/Province:	Southern Zambia
Country, Postal Code:	50100

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

Please see information submitted by Conservation Force, range state authorities, safari hunting operators, and others.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:_____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Applicant or John J. Jackson, III or Regina Lennox of Conservation Force, 504-837-1233, cf@conservationforce.org

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Import of Sport-hunted Trophies of Southern African Leopard, African Elephant, and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Williamson	Matthew	Wade	

2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
(b) (6)			

6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #, no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Minot	ND	58701	Ward	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☒ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: 11US58296A/9 No ☐

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the [illegible] false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 0 (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: 0 (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: Caprivi Strip, Namibia. Balyerwa Conservancy. Closest City: Katima Mulilo Namibia
   b. Date wildlife is to be hunted: 08/14/2018 - 08/29/2018
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks). Tusks, Ears, Tail, Feet

3. **IF THE ANIMAL IS DEAD,** please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: N/A
   b. Date wildlife was hunted: N/A

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): N/A

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

N/A

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Lwyk Jansen Van Vuuren
Business Name: Leopard Legend Hunting Safaris
Address: Farm Gross Omaruru
Address: Number 20
City: Outjo
State/Province: N/A
Country, Postal Code: Namibia

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy,** please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature (b) (6) [redacted] Date: 05/09/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

N/A

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

N/A

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed. N/A

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Matt Williamson (b) (6) [redacted]

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☒ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

To whom it may concern:

Re: Elephant CITES Import application for Namibia

Requestor: Matthew W Williamson

In support of the application for CITES, a request for additional information is requested by the US Fish and Wildlife Service. The hunting will take place at the Balyerwa Conservancy in the southwest corner of the Caprivi Strip, Namibia. A map is included for reference for the location of the conservancy. The closest hub city is Katima Mulilo, located approximately 100 Km to the northeast of the conservancy. Balyerwa is a communal based wildlife conservancy in Namibia and is utilized and managed for sustainable use and harvest of native wildlife species. Funds generated from the activity of the hunt, paid for by the visiting hunters will not only aid in conservation, but will also help employ local guides, game scouts, camp staff, game handlers, local taxidermists and help feed local villagers from the animals harvested during the hunt.

- Approximately 65% of the money paid for the hunt will go back to the conservancy. This money will be utilized and dispersed throughout the communities within the conservancy. This equates to approximately $38,000.00 US dollars staying within the local communities of the Balyerwa conservancy. Of that $38,000.00, approximately $8,000.00 US is apportioned directly to conservation, habitat enhancements (such as water installations) and anti-poaching units and game guards. The money generated from this hunt will no doubt further aid in development and protection of elephants within the conservancy.

- A minimum of 25 people will be employed during the process of the hunt, from arrival to beyond the departure of the hunting party (Hunter, PH, Scouts, etc.)

- Additional members travelling with the applicant will also help benefit local tourism with funds spent within the nearby communities on curios and guided tours.

- Trophies that return to the US will be on display for informational and educational purposes at the applicants residence.

Please consider the economic and environmental benefits that can be realized by utilizing a sound management plan and legal sport hunting of elephant within this conservancy.

Respectfully submitted,

(b) (6) [redacted]

To: (b) (6)

Dear Mr. Matthew Williamson,

The following is in response to your request regarding the status of your application.

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry
Senior Biologist
USFWS/Division of Management Authority
Branch of Permits, MS: IA

Falls Church, VA 22041-3803
1-800-358-2104, ext. 1976 or 703-358-1976
Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT* You may have noticed that our **application forms expired 5/31/2017. The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted. **We do not accept applications via fax or e-mail.***

Hi Tim,

Thank you for reaching out. Yes, I would like to keep this application open. I did successfully harvest an elephant on this specific trip to the Caprivi. I will contact the outfitter to get the coordinates and all other necessary bits of information and forward those on two you. Please allow me a couple days to track down this information. Thank you again!

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
RAGAZZINE	JUSTIN	M	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
YOUNGSTOWN	OHIO	44511	MAHONING	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of **$100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the [redacted] I certify that the information submitted in this application for a permit is complete and [redacted] false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

JUSTIN RAGAZZINE
(b) (6) [redacted]
Youngstown, Ohio 44511

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

JUSTIN RAGAZZINE
(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA, AFRICAN ELEPHANT

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

ZIMBABWAE, CHIBWEDZIVA

   b. Date wildlife is to be hunted:

FEBRARY 1-12 2019

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

CLIFTON WALKER, COLLECT AFRICA

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name:
   Business Name:
   Address:
   City:
   State/Province:
   Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   14,000 ELEPHANTS IN AREA, 3 TIMES THE CARRYING CAPACITY OF THE AREA. 30,000 IN GONEREZHOU PARK WHICH IS NEIGHBORING

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   THE PERMITS ARE ISSUED BY THE COMMUNITY WITH THE TRIBESMAN BENIFITING DIRECTLY FROM THE WILDLIFE, POACHING HAS BECOME ALMOST NON EXISTENT, AND NOT ONE ELEPHANT HAS BEEN POACHED IN THE LAST 18 YEARS IN THIS AREA. DUE TO THE KNOWN VALUE IT POSSESSES

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

   THE FUNDS ARE AND HAVE BEEN USED TO BUILD A SCHOOL, CLINIC, SEVERAL GRINDING MILLS HAVE BEEN BOUGHT AND SET UP, BOREHOLES DRILLED AND EQUIPED. ALL WITH MONEY FROM THE HUNTS CONDUCTED.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) _____ Date: 6/7/2018

Be aware that there may be a[illegible]nents by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

RE: WITHDRAW PRT No. MA95146C

RCVD JUL 24 2019

Dear Chief Cogliano:

Please be advised that Justin Ragazzine applied for an elephant import permit (PRT No. MA95146C) before his planned hunt. We would like to withdraw his application as he did not harvest an elephant.

Please also find enclosed a Notice of Representation for Justine Ragazzine, as the client mailed the application himself and he was unsure if he included a copy of the notice of representation.

Please do not hesitate to contact us if you have questions about this application.

Sincerely,

John J. Jackson III

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III of the non-profit firm Conservation Force as my attorney and legal representative for all matters concerning my application for a permit to import a lawfully hunted Elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

In the case of a permit an ESA endangered listed species this is also a request for Ten Days Notice before the permit is issued so I and my attorney can know of approval as soon as those that may have opposed the issuance of the permit.

Re: Five Applications for Permits to Import Sport-Hunted Trophies

Dear Chief Cogliano:

Enclosed please find one application for a permit to import a sport-hunted elephant trophy from the Save Valley Conservancy (SVC) in Zimbabwe. This elephant was hunted in April 2018. Conservation Force and Zimbabwe's Parks and Wildlife Management Authority (ZPWMA) have submitted extensive information about the healthy elephant population in SVC and the benefits generated by regulated hunting for the protection of elephant, lion, rhino, and a range of other species. Please refer to that information, including the October 2016 Non-Detriment Finding, January 2016 report related to the African lion, June 20, 2015 response to the Fish and Wildlife Service's information request, and other submissions on the African elephant.

Please also see the attached excerpt from the African Elephant Status Report and declaration from Wilfried Pabst. These documents reflect the healthy elephant population at SVC. We respectfully request that you consider all information submitted in making a positive enhancement finding for this applicant.

Enclosed please also find an application for a permit to import a lion trophy to be hunted with Charlton McCallum Safaris (CMS) in Dande, Zimbabwe. We have previously provided extensive information about CMS and their anti-poaching unit, the Dande Anti-Poaching Unit (DAPU). Attached please find two recent DAPU reports. Please consider all information regarding CMS and DAPU, as well as the extensive information and responses to DMA information requests submitted by Zimbabwe's Parks and Wildlife Management Authority, in making a positive enhancement finding for this applicant.

Enclosed please also find an application for a permit to import a sport-hunted lion trophy to be hunted in the Nyaminga Game Management Area in Zambia. An enhancement report for this area/operator is attached. The operator spends $10,000 per year to sustain a 28-person anti-poaching team, which heavily patrols the concession and protects the habitat for healthy populations of lion, leopard, hippo, and many other species. In addition, the operator has installed four boreholes and constructed a medical clinic, teacher's house, and dormitory for the local community. Please consider this information and information provided by Conservation Force and Zambia's Department of National Parks and Wildlife, in making a positive enhancement finding for this applicant.

Finally, enclosed please find two applications (father and son) for permits to import elephant trophies to be hunted in the Bwabwata West concession in Namibia. This concession, like the rest of Namibia, boasts a dense population of elephant. Please see the attached operator report and excerpt from the African Elephant Status Report (2016). The operator employs a 20-person anti-poaching team and invests heavily in the nearby communities (almost $300,000 in the last three years). Please consider this information and information in the DMA's files and previously provided by Conservation Force and

Namibia's Ministry of Environment and Tourism in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applications or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ____Elephant_____ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Stuber	Ross	Hardy	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (DBA)
2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
San Antonio	TX	78212	Bexar	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in *Title 50 Part 13 of the Code of Federal Regulations* and the other *applicable parts in subchapter B of Chapter I of Title 50*, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Namibia, Bwabwata West National Park, S 18 09' C 162 E 021 42'C 495, Caprivi Area, Rundu Town

b. Date wildlife is to be hunted:

July 1st to July 21st, 2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Hunt Africa Namibia, Professional Hunter: Jacobus Hugo Pienaar (Junior)
PO Box 1100 Gobabis Omaheke Namibia, Farm Hester 407, Gobabis, Namibia

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Not Hunted Yet

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Mr. Louw Nel
Business Name:	Tropaendienste Taxidermy
Address:	PO Box 21068, Windhoek, Namibia
City:	
State/Province:	
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Population growth of heards up to 500 at a time. Last game count was in Oct 2017 and estimated resident elephant in the area of more than 2000

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

40% of the trophy fees go to the Namibia government to the Game Products Trust Fund.
The funds are used for repairs, maintenance and salaries for government game rangers in areas where there are Elephant roaming. Another 40% go to the community that is used to pay game gaurds and for the uplifting of the KWE people.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The outfitter pays informers in the area to help with anti poaching activities.
The outfitter / Professional Hunter is a trustee on HUAP (Hunters United Against Poaching) Trust

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) [redacted] Date: 6/11/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Ms. Brisendine,

I am submitting the supplement information for after the hunt for both Ross and Stanley Studer. I had put the wrong year of the hunt on the first letter. The year of the hunt for both applicants was 2018. Would you please submit these letters in replacement of the previous ones?

Let me know that you have received this and if you have any questions. All of the hunting permits were included in the last e-mail- but I can forward anything you may need again.

Kindest Regards,

Aimee Korver

RE: PRT # 95150C, applicant Ross Studer for an elephant trophy import from Namibia
Supplement to Existing Application

Ms. Brisendine:

This is a supplement to the existing application, PRT #95150C, for Ross Studer for his elephant trophy from Namibia

Answers to Question 6 of the import permit application:

6a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Bwabwata West National Park, hunting concession – GPS Coordinates
S 18 09C 162
E 021 42C 495

6b. Date wildlife was hunted:

July 18, 2019

6c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Huntafrica Namibia. P.H.- J.H. Pienaar Sr.

6d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document

Buffalo Camp, Divundu, Okavango Region - Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

Please see the attached permits

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].Name:Business Name:Address:City:State/Province:Country, Postal Code

Shipper –
Trophaendienste – Louw Nel
P O Box 21068
Windhoek
Namibia

Professional Hunter –
J.H. Pienaar, Sr.
Namibia

In addition, we would like to include an operator enhancement report for Huntafrica Namibia that has been updated this year.

Please refer to the numerous documents and responses previously submitted to FWS by Conservation Force, Professional Hunters, Operators and Professional Hunting Organizations, as well as information submitted by the government authorities of Namibia, which demonstrate that Elephant hunting programs are well managed, and the hunting enhances the survival of the species in making an enhancement determination for this import.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

No trophy hunter may hunt unless accompanied by a professional hunter, master hunting guide or hunting guide.

This permit must be kept on the person of the permit holder at all times while hunting.

Only guide(s) as specified on the permit may conduct the hunt.

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. **OPERATOR INFORMATION**
   a. Name of Area Operator: HUNTAFRICA NAMIBIA
   b. Years in business: 32 years
   c. Name of Company conducting hunt: HUNTAFRICA NAMIBIA
   d. Closest town to hunt location: DIVUNDU / RUNDU
   e. Country where hunt will take place: NAMIBIA

2. **CONCESSION**
   a. Name of Concession: BWABWATA WEST NATIONAL PARK
   b. Area in Km^2: 3800
   c. Land tenure: GOVERNMENT LEASE
   Government Lease X Community ____ Private Ranch ____ Private Conservancy
   d. Length of Concession Agreement: 5 years
   e. Can it be renewed? Yes X No ____
   f. Length of Renewal, if applicable: 5 years
   g. Estimated total amount received in trophy fees last year, if applicable: N/A
   h. Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:
   Yes, annual reporting: detailed report to Ministry, of each client + every animal hunted.
   i. Please provide the Concession location and nearest City: S 18.09°C 162 E 021 42°C 495, Rundu
   j. Please attach a map or maps with the boundaries marked and showing the nearest City Attached
   k. If the Concession borders a National Park, please provide Park name: Inside Bwabwata National Park
   l. Description of general and distinctive habitat features and any water features:
   Bushveld
   The Okavango river forms the western border

3. **COMMUNITIES IN THE CONCESSION**
   a. Are there any communities living in the Concession? Yes X No ____
   b. If so, estimated number of people or villages in the Concession? 1 Village - Omega - 1000 people
   c. Are there communities bordering this Concession? Yes X No ____
   d. If so, estimated number of people or Villages around the Concession? Muchiko area - 500 people

4. **RELEVANT GAME POPULATIONS IN THE CONCESSION:**[1]

SPECIES NAME	RELATIVE ABUNDANCE			ESTIMATED POPULATION	3-YEAR TREND			HOW IS IT MONITORED?
	DENSE	AVG.	SPARSE		UP	DOWN	STABLE

[1] The FWS Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

5. LOCAL COMMUNITY PARTICIPATION

a. Total employment number: 40

b. Please identify the number and type of all employees:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF THIS TYPE WHO ARE LOCAL/FROM NEARBY COMMUNITIES
PROFESSIONAL HUNTERS	2	
TRACKERS	11	11
ANTI-POACHING SCOUTS/RANGERS	20	20
OTHER ANTI-POACHING	NDf	
COOKS/HOUSEKEEPERS	4	4
COMMUNITY COORDINATORS	2	2
MANAGERS	1	
BIOLOGISTS	1	
OTHERS:		

6. Number of staff employed in the off-season: 11

a. Please identify the number and type of staff that are engaged when the season is not open:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF LOCALS /FROM NEARBY COMMUNITIES	WHEN EMPLOYED?
ANTI-POACHING STAFF	full staff		
MANAGERS	1		
MAINTENANCE	0		
ROAD OPENING /CONSTRUCTION	30		
COMMUNITY RELATIONS PERSONNEL	1		
OTHERS:			

7. ANTI-POACHING EFFORTS:[2]

a. Number of Anti-Poaching staff: NDf and Police (number unknown)

b. Are Anti-Poaching Patrols conducted during the hunting season, off-season, or both?
Hunting season: _____ Off-season: _____ Both seasons: X

c. Months during which Anti-Poaching Patrols are conducted: All year round

d. Number of Anti-Poaching Patrols per month: daily patrols

e. Description of Anti-Poaching equipment, vehicles, etc.:

[2] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

7. **ANTI-POACHING EFFORTS:** *[CONTINUATION]*

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?
NDF and Police

g. Do you offer rewards to poaching informants leading to arrest? Yes X No ____

h. Do you offer rewards to poaching informants upon conviction? Yes ____ No X

i. Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2017	SPENDING 2018	SPENDING 2019	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS	N$31,200	N$31,200	N$34,320	
EQUIPMENT				
VEHICLES	4x4 vehicle	4x4 vehicle	4x4 vehicle	
PETROL	As needed	As needed	As needed	
REWARDS PAID	Each person arrested, the informer get N$5000-00			
OTHER:				
OTHER:				
TOTALS				

j. What currency are the expenditures given in? Namibia Dollar

8. **ANTI-POACHING RESULTS:**

CATEGORY	2017	2018	2019	REMARKS
POACHING INCIDENTS DISCOVERED				No Poaching in the last 3 years.
ELEPHANT CARCASSES OBSERVED				
LION CARCASSES OBSERVED				
LEOPARD CARCASSES OBSERVED				
IVORY POACHERS ARRESTED				
MEAT POACHERS ARRESTED				
OTHER POACHERS ARRESTED		N/A		
POACHERS CONVICTED				
SNARES/GIN TRAPS COLLECTED				
FIREARMS CONFISCATED				
VEHICLES CONFISCATED				
BICYCLES CONFISCATED				
BOATS/NETS CONFISCATED				
TUSKS RECOVERED				
OTHER:				

9. COMMUNITY INVESTMENT:[3]

a. Does the Company contribute money or goods/services to local communities?
X Yes _____ No

b. If so, what percentage or amount is shared, how often, and why (e.g.: required by law, required by contract, voluntary contribution)?
2.5 Million Nam Dollars, required by law, required by contract + voluntary contribution

c. Does the Company provide game meat to nearby communities? Yes X No _____

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:
45 tons of meat distributed by the community themselves

e. If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.
N/A

f. Please describe any consolation payments made to local residents damaged by game species
N/A

g. What currency are the expenditures reported in? Namibian Dollars

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ____Elephant_____ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA
T: (504) 837-1233
F: (504) 837-1145

GENERAL STATISTICS

Country Area	825,418 km²
Range Area	164,069 km² (20%)
Protected Range	18 %
Information Quality Index (IQI)	0.43
CITES Appendix	II
Listing Year	1997

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Etosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD $1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 ± 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km^2, which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 ± 3,580, 9,165 ± 2,016, 14,097 ± 2,678 and 13,116 ± 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 ± 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N≠a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 ± 1,940, 3,638 ± 1,164, and 6,413 ± 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 ± 2,289 for Khaudum, 61 ± 115 for N#a Jaqna (Kolberg, 2004) and 967 ± 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuangali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

NUMBERS AND DISTRIBUTION
CONT.

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of 3,378 ± 1,756 and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of 2,911 ± 637 (Kilian, 2015) and replaces an estimate of 2,057 ± 598 from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There has been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Hoanib and Hoarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

PFS

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Studer	Stanley	Sawyer	Jr.

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
San Antonio	TX	78209	Bexar	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

(b) (6)

06/08/2018

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Namibia, Bwabwata West National Park, S 18 09' C 162 E 021 42'C 495, Caprivi Area, Rundu Town

   b. Date wildlife is to be hunted:

July 1st to July 21st, 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Hunt Africa Namibia, Professional Hunter: Jacobus Hugo Pienaar (Senior)
PO Box 1100 Gobabis Omaheke Namibia, Farm Hester 407, Gobabis, Namibia

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Not Hunted Yet

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Mr. Louw Nel
Business Name:	Tropaendienste Taxidermy
Address:	PO Box 21068, Windhoek, Namibia
City:	
State/Province:	
Country, Postal Code: .	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Population growth of heards up to 500 at a time. Last game count was in Oct 2017 and estimated resident elephant in the area of more than 2000

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

40% of the trophy fees go to the Namibia government to the Game Products Trust Fund.
The funds are used for repairs, maintenance and salaries for government game rangers in areas where there are Elephant roaming. Another 40% go to the community that is used to pay game gaurds and for the uplifting of the KWE people.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The outfitter pays informers in the area to help with anti poaching activities.
The outfitter / Professional Hunter is a trustee on HUAP (Hunters United Against Poaching) Trust

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) _____ Date: 6/11/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Conservation Force v.5/8/18
Operator Enhancement Questionnaire

1. Name of area operator: Huntafrica Namibia Safaris

a. Years in business: 31 years

b. Name of company conducting hunt: Huntafrica Namibia Safaris

2. Name of concession: Bwabwata West National park Size in km^2: 3800

a. Land tenure: Government lease

b. Length of concession agreement: 5 years Can it be renewed? Yes

c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: 1. Yes, Annual Reporting: Detailed report to the Ministry of Environment and Tourism of each client and every animal that was hunted.

2. Poaching control. Yes. By the government as well as the Namibia Defense force and the community rangers 3 .Community employment – all staff employed out of the community 4.Training - the operator provide training in different fields. Eg -drivers, teachers, computer courses, building of training center etc.

d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Rundu (bigger town) Divundu(very small town)

e. If the concession borders a national park, please provide the park name: Inside the Bwabwata National Park

f. Description of general and distinctive habitat features and any water features:

Bushveld . The Okavango River forms the Western border.

3. Are there any communities living in the concession? Yes

a. If so, estimated number of people or villages in the concession? One village Omega 1000 people

4. Are there communities bordering this concession? Yes

a. If so, estimated number of people or villages around the concession? Muchiko area 500

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	Dense 2500		Stable	By counts
Lion	Sparse		Up	
Leopard	Dense		Stable	
Prey species	Buffalo, Sable, Roan, Kudu, Impala, Warthog, Waterbuck, Reedbuck, Buschbuck & Duiker			

6. Total employment number: 40

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	2	
Trackers	11	11
Anti-poaching scouts/rangers	20	20
Other anti-poaching	NDF	
Cooks/housekeepers	4	4
Community coordinators	2	2
Managers	1	
Biologists	1	
Others: _____		

7. Number of staff employed in the off-season: 11

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	Full staff		
Managers	1		
Maintenance	0		
Road opening/construction	30 people		
Community relations personnel	1		
Others: _____			

8. Anti-poaching efforts:[2]

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

a. Number of anti-poaching staff: _____

b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? ___Both_____

c. Months during which anti-poaching patrols are conducted: _____Year round _____

d. Number of anti-poaching patrols per month: _____

e. Description of anti-poaching equipment, vehicles, etc.: _____

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? _____Ministry of Enviorment_____

g. Do you offer rewards to poaching informants leading to arrest? __ Yes __

h. Do you offer rewards to poaching informants upon conviction? _ __ No

i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? ___Nam Dollar_____

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts	31200	31200	31200	
Equipment				
Vehicles	4x4 vehicle	"		
Petrol	As needed			
Rewards paid				For each person that is arrested the informer receives N$5000 per case
Other: _____				
Other: _____				
TOTALS				

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered				
Ivory poachers arrested				
Meat poachers arrested				
Other poachers arrested				
Poachers convicted				
Snares/gin traps collected				
Firearms confiscated				
Vehicles confiscated				
Bicycles confiscated				

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Boats/nets confiscated				
Tusks recovered				
Carcasses observed				
Other: _____				

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? __ Yes

b. If so, what percentage or amount is shared, how often, and why 2 Miljlion Nam Dollars (e.g., required by law, required by contract, voluntary contribution)?

Part of the contract and voluntary_____

c. Does the company provide game meat to nearby communities? __ Yes __ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: _45 ton meat distributed by the community themselves_____

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe. _____NOT_____

f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in? ___Not Applicable in the Park_____

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant				
Lion				
Leopard				
Other				

g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? _____

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)	80,000	95,000	110,000	
Education (e.g., school fees, supplies)				
Health (e.g., clinics, offices)	-			
Health (e.g., medical	-

RE: CONFIRMATION OF SPORT-HUNTED TROPHY IMPORT APPLICATION
PRT NO.: 95151C
APPLICANT NAME: STAN STUDER

Dear Mr. Mac Donald:

In response to your email dated September 30, 2019, please note that Applicant did harvest an Elephant on July 12, 2018, at Bwabwata West National Park in Namibia.

Please do not hesitate to contact us if you have any additional questions about this Application.

Sincerely,

/s/ Emma Sampson

Ms. Brisendine,

I am submitting the supplement information for after the hunt for both Ross and Stanley Studer. I had put the wrong year of the hunt on the first letter. The year of the hunt for both applicants was 2018. Would you please submit these letters in replacement of the previous ones?

Let me know that you have received this and if you have any questions. All of the hunting permits were included in the last e-mail- but I can forward anything you may need again.

Kindest Regards,

Aimee Korver

RE: PRT # 95151C, applicant Stanley Studer for an elephant trophy import from Namibia
Supplement to Existing Application

Ms. Brisendine:

This is a supplement to the existing application, PRT #95151C, for Stanley Studer for his elephant trophy from Namibia

Answers to Question 6 of the import permit application:

6a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Bwabwata West National Park, hunting concession – GPS Coordinates
S 18 09C 162
E 021 42C 495

6b. Date wildlife was hunted:

July 18, 2018

6c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Huntafrica Namibia. P.H.- J.H. Pienaar Sr.

6d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document

Buffalo Camp, Divundu, Okavango Region - Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

Please see the attached permits

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].Name:Business Name:Address:City:State/Province:Country, Postal Code

Shipper –
Trophaendienste – Louw Nel
P O Box 21068
Windhoek
Namibia

Professional Hunter –
J.H. Pienaar, Sr.
Namibia

In addition, we would like to include an operator enhancement report for Huntafrica Namibia that has been updated this year.

Please refer to the numerous documents and responses previously submitted to FWS by Conservation Force, Professional Hunters, Operators and Professional Hunting Organizations, as well as information submitted by the government authorities of Namibia, which demonstrate that Elephant hunting programs are well managed, and the hunting enhances the survival of the species in making an enhancement determination for this import.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

Type of Activity:

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name: MONSEN	1.b. First name: PAUL	1.c. Middle name or initial: K	1.d. Suffix:
2. Date of birth (mm/dd/yyyy): (b) (6)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information				
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address): (b) (6)				
1.b. City: SALT LAKE CITY	1.c. State: UT	1.d. Zip code/Postal code: 84109	1.e. County/Province	1.f. Country
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete	
1.	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))
2.	Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of [redacted] 05/11/2018
	Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy)

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)? PAUL MON (b) (6) [redacted]

   Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No _x_ Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name. ELEPHANT
   LOXODANTA AFRICANA, COMMON NAME: ELEPHANT

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   SANGO, SAVE VALLEY CONSERVANCY
   PROVINCE: MASVINGO. NEAREST TOWN MASVINGO

   b. Date wildlife was hunted: APRIL 16, 2018 thru april 26,2018

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:
   IVORY TRAILS SAFARI / ZAMBEZI HUNTERS
   PHILLIP SMYTHE

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
   TROPHY CONSULTANTS INTERNATIONAL
   4 JOSIAH CHINAMANO ROAD
   BELMONT, BULAWAYO, ZIMBABWE

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: TROPHY CONSULTANTS INTERNATIONAL
Address: 4 JOSIAH CHINAMANO ROAD, BELMONT
City: BULAWAYO
State/Province: ZIMBABWE
Country, Postal Code: ZIMBABWE

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

Please see information previously submitted by CPLMA + Conservation Force

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signatu (b) (6) Date: 05/11/18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

a. Does the company contribute money or goods/services to local communities? ☒ Yes ☐ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)? VOLUNTARY MAINTENANCE OF BOREHOLES SCHOOL SUPPORT

c. Does the company provide game meat to nearby communities? ☐ Yes ☐ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: USD 10,000

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe. NIL

f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in? _____

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant				NIL
Lion				PAID
Leopard				
Other				

g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? USD

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)			2000	MAINTENANCE, DESKS, CHAIRS
Education (e.g., school fees, supplies)			1000	EXERCISE BOOKS PENS PENCILS
Health (e.g., clinics, offices)			1000	ROOFING, REPAIRS
Health (e.g., medical salaries, equipment)			NIL	
Community scout salaries			NIL	
Other community anti-poaching			NIL	
Local government activities			NIL	
Water infrastructure improvements			5000	BOREHOLE MAINTENANCE

h. Do you offer rewards to poaching informants upon conviction? __ Yes X No

i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? USD

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts			117600	
Equipment			11 000	
Vehicles			~~10 920~~

DECLARATION OF SAVÉ VALLEY CONSERVANCY
IN SUPPORT OF MOTION TO INTERVENE

I, Wilfried Pabst make the following declaration in support of the attached Motion to Intervene.

1. I make this declaration based upon my personal, first-hand knowledge.

2. I make this declaration on behalf of Savé Valley Conservancy ("SVC"). I own the Sango Ranch, one of the properties that together form the conservancy. I am involved in all aspects of operating SVC and decision-making related to the management of habitat and wildlife, poaching control, community investment, research, and similar issues.

3. SVC is one of the largest private game reserves in Africa. It is in the South East Lowveld of Zimbabwe and provides approximately 3,500 km^2 of diverse wildlife habitat for healthy populations of elephant, lion, leopard, buffalo, rhino, and rare African Wild Dogs.

4. SVC consists of privately-, government-, and community-owned properties aligned under a constitution to manage animal populations on a landscape scale. Each property operates its own tourist lodges offering different types of accommodations in varied ecological settings. While

each property is separately owned, internal fences have been removed to create the conservancy's contiguous protected area, and wildlife management decisions are taken at the conservancy level.

5. SVC was a cattle ranch for seven decades before it converted to wildlife habitat and came together as one conservancy in the 1990's. Approximately 4,000 animals of 14 species were reintroduced, including elephants in the largest translocation undertaken to date (~685 elephants). Given the extent of habitat and the owners' commitment to conservation, wildlife populations grew rapidly. SVC developed into a conservation area of global significance. A portion of SVC was re-settled in 2000-2001. Villages remain in a few areas otherwise committed to wildlife. Although human-wildlife conflicts can arise in this situation, conflicts are mitigated by benefits-sharing and intensive anti-poaching.

6. Regulated hunting was essential for the successful transition from cattle to wildlife, because it generated income to restock game and improve security. One property sought to attract non-consumptive photographic safaris through an up-market lodge offering game drives and bush walks. Occupancy rose from 0% in 1996 to 62% by the end of 1999; however, following the land reform program and resultant political instability, the photo-tourism industry collapsed. The lodge experienced a 98%-cancellation of confirmed bookings. Regulated hunting was, and remains, the only economically viable land use. After four years of seeking alternative markets, the lodge could achieve no higher than 17% occupancy, and moved back into a hunting-based operation. Now, all of SVC's revenues come from regulated hunting.

7. SVC conducts annual aerial surveys and road strip counts to determine population trends, distribution, and social organization of large herbivores, keeps track of annual rainfall, and monitors vegetation and soil conditions to guide management decisions and quota setting. A yearly

predator spoor count is conducted as well. A Technical Advisory Committee recommends evolving best wildlife management practices.

8. SVC's anti-poaching efforts are extensive. Approximately 200 game scouts patrol the various ranches to pick up snares and keep meat poaching under control. A special team of 30 to 40 highly-trained scouts, the Special Species Protection Unit (SSPU), combats elephant and rhino poaching specifically. Annual anti-poaching expenses (ranger salaries, training, vehicles, equipment, petrol, and other necessities) are almost $500,000. We hope to expand the SSPU to 50 individuals at the cost of another $100,000 per year.

9. In the past 25 years, SVC's elephant population has quadrupled from the original, translocated individuals. The population is estimated at 2,200. Elephant management is guided by an adaptively-implemented plan incorporating regulated hunting to achieve management targets. The annual hunting quota is seven elephants, representing only 0.3% of the population. Those few hunts generate significant revenue that is reinvested in management and protection, including for the large black rhino population, which is not currently hunted.

10. After SVC was established and as ungulate populations increased, lion began to re-colonize the conservancy and thirteen lions were reintroduced, including ten on Sango ranch. After an initial lag period, the population has flourished. Annual monitoring began in 1999. Since 2007, annual monitoring is conducted using track index surveys in a research project co-sponsored with the African Wildlife Conservation Fund. In 2011, those survey results were verified using a baited call-up. Prey availability models suggest SVC's carrying capacity for lion is approximately 271. The 2015 population was estimated at 284. This suggests lion have reached the ecological carrying capacity, even though responsibly hunted.

11. Lion are managed under an adaptive, science-based plan adopted in 2011. The plan specifically incorporates regulated hunting as a management conservation tool. Quotas are set at a low percentage of the total population; from 2009 to 2015, the annual quota was seven lion and, as a result of full compliance with the age-based system implemented in 2013, the quota was raised to ten lion for 2016.

12. Both Conservation Force and Dallas Safari Club have funded conservation activities within SVC. For example, Conservation Force co-funded our lion management plan.

13. On behalf of SVC, I provided information to Conservation Force to evidence the benefits of elephant and lion hunting on the Conservancy, which I understood would be used for comments in response to the U.S. Fish and Wildlife Service suspension of elephant trophy imports from Zimbabwe and in support of applications for elephant and lion trophy import permits.

14. Revenues from regulated elephant and lion hunting is essential to supporting ranch owners' investment in habitat management, poaching control, water provision, fence maintenance, and community support, which benefit the elephant and lion. These revenues are extensive. For the period 2005 to 2011, Dr. Rosemary Groom on behalf of SVC estimated that net income from lion hunting (< 4 lion per year) amounted to over $1.36 million in bed nights and $260,000 in trophy fees. Dr. Groom also calculated the "significant cost" lion "impose on conservancy landowners through predation on valuable prey species that could otherwise be sold as trophies or meat." The calculated loss of 8% relative to gross income in 2009 was $494,776. If this loss is not offset with regulated hunting income, it is difficult for landowners to bear the expense of the large and growing lion population.

15. SVC invests over $100,000 in community infrastructure and game meat donations to reduce conflicts and increase tolerance among local villages: drilling boreholes, building clinics

and schools, providing computer equipment, etc. SVC entered into an agreement with local Chiefs to share revenues from regulated hunting and sales of game meat.

16. Over 90% of SVC's hunting clients are U.S. citizens—and this percentage is 100% on some properties. SVC relies on these U.S. clients to fund its extensive anti-poaching efforts and science-based elephant and lion management. At least three U.S. hunters have applied for permits to import lion or elephant trophies hunted in SVC in 2015, 2016, and 2017.

17. SVC's revenues will decline if elephant and lion trophies are not importable into the U.S. Consequently, its excellent management efforts will suffer. The quotas will not change (and did not change when the U.S. Fish and Wildlife Service suspended the import of elephant trophies from Zimbabwe or listed the lion as threatened under the U.S. Endangered Species Act). However, the willingness of U.S. citizens to pay premium prices was reduced by these policy decisions, and in turn, SVC's revenues were reduced. These revenues will be cut further if imports remain closed. Unfortunately, the conservancy's elephant, lion, rhino, and other wildlife populations will pay the price if anti-poaching efforts and community investment and conflict mitigation expenditures must be reduced as well.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

CURRENT ISSUES

Poaching of elephants for ivory has escalated in the past ten years and has become a major problem in Zimbabwe. A worrying recent development has been the emergence of poisoning as a poaching technique. Just over 100 elephants were killed in a single cyanide poisoning incident in Hwange National Park in late 2013 (Muboko et al., 2014). The impact of poaching has been highest in the north of the country, particularly in the Sebungwe Region to the south of Lake Kariba, and the Lower Zambezi Region (Dunham et al., 2015c). Although elephant numbers have increased in Gonarezhou National Park, it too experienced an increase in poaching in 2015 (Dunham & van der Westhuizen, 2015).

Concern has been expressed about the impact of high numbers of elephants on vegetation and other biodiversity in Zimbabwe's protected areas. Despite the increase in poaching, this remains a problem in protected areas such as Hwange NP, where the provision of artificial water supplies has led to high elephant densities (ZPWMA, 2015).

Zimbabwe published a national elephant management plan covering the period 2015 to 2020 (ZPWMA, 2015).

In 2008, Zimbabwe undertook an approved one-off sale of 3,764 kg of ivory to Japan and China, at a price of USD $487,162 (Wijnstekers, 2011).

Zimbabwe's annual declared export quota of elephant trophies remains unchanged since 2007 at 1,000 (tusks as hunting trophies from 500 animals) (CITES, n.d.-b). In 2015, the US Fish and Wildlife Service removed its 'non-detriment' finding, thus banning the import of elephant trophies into the USA (USFWS, 2015a).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Zimbabwe is 82,630 ± 8,589 at the time of the last survey for each area. There may be an additional 1,635 to 1,805 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 78,839 km², which is 97% of the estimated known and possible elephant range. There remains an additional 3% of the estimated range for which no elephant population estimates are available.

There has been a decline of just over 10,000 elephants from surveyed populations since the AESR 2007 and an increase of about 1,000 in guesses, mostly from previously unsurveyed areas in North West Matabeleland. Although there have been large losses from the Sebungwe and Lower Zambezi populations, these have been partially compensated by increases in Gonarezhou and North West Matabeland.

The major populations of the Lower Zambezi Valley (including Mana Pools National Park), Sebungwe (including Matusadona and Chizarira National Parks), North-west Matabeleland (including Hwange and Zambezi National Parks) and the south-east Lowveld (including Gonarezhou NP) were surveyed in 2014 using **aerial sample counts** (including block counts in hilly areas) as part of the Great Elephant Census.

The estimate from the Lower Zambezi Valley in 2014 was 11,656 ± 2,259 (Dunham et al., 2015c). The previous comparable estimate was 19,297 ± 2,527 in 2001 (Mackie, 2002). The 2014 figure replaces an estimate from the AESR 2007 of 19,981 ± 2,392 from 2003 (Dunham, 2004). This survey was less comparable than the 2001 one because it covered a slightly smaller area. There was an approximately 40% decline in the 13 years between 2001 and 2014. The observed carcass ratio of 6% is not as high as one would expect given the rate of population reduction and might suggest that the level of poaching has reduced in recent years. The corridor between the Mavuradonha Wilderness Area and the rest of the Zambezi Valley range has been changed to **possible range** (Packenham quoting Varden, pers. comm., 2016).

The 2014 estimate for Sebungwe was 3,407 ± 1,215 (Dunham et al., 2015b) which replaces an estimate of 15,024 ± 2,133 from a 2006 survey (Dunham et al., 2006a). The observed carcass ratio of 30% indicates an unsustainably high offtake of elephants. There were almost no elephants left in the communal areas, with the main surviving sub-populations in Matusadona and Chizarira National Parks and the Chirisa Safari Area. Wildlife scouts reported 70-100 elephants in Kavira Forest Land at the western end of Sebungwe (M. Sebele pers. comm. in Dunham et al., 2015b).

The 2014 estimate for North-west Matabeleland was 53,991 ± 7,711 (Dunham et al., 2015a), which replaces an estimate of 49,310 ± 7,051 from 2001 (Dunham & Mackie, 2002). There was no significant difference between the totals although the increased carcass ratio of 7% from 3% in 2001 is a worrying sign. Other aerial sample counts were carried out in 2006 and 2007 but they were not

suitable for comparative purposes (Dunham et al., 2007; Dunham et al., 2006b). Since the 2014 Botswana survey was carried out a month earlier than the north-west Matabeleland survey there is a possibility of double-counting or missing animals that had moved from Hwange into Botswana. There was a surprisingly large number of elephants seen in the Ngwasho/Sepako stratum in Botswana adjoining the southern half of Hwange NP (estimate 11,744) (Chase et al., 2015) and evidence from radio-tracking shows that elephants do move out of Hwange into adjoining areas of Botswana (Chamaillé-Jammes, pers. comm., 2016; Ferguson & Chase, 2010).

Elephant range in North-west Matabeleland has probably increased. Water hole counts and scout reports indicated 308 elephants in the Fuller Forest Land, 165 in Gwaai, Bembezi and Umguza Forest Lands (which has been marked as new **known range**) and 150 in Gwampa/Lake Alice Forest Reserves (M. Sebele pers. comm in Dunham et al., 2015a) which are all recorded as **new populations**. I. Du Preez (pers. comm. in Dunham et al., 2015a) reported an **informed guess** of 36 elephants in the privately owned Stanley & Livingstone Game Reserve (Nakavango).

The estimate for Gonarezhou NP from the 2014 survey was 11,120 ± 2,709 (Dunham & van der Westhuizen, 2015). This replaces an estimate of 4,987 ± 1,577 from a comparable 2001 survey. Another survey in 2009 gave an estimate of 9,123 ± 1,898 (Dunham et al., 2010). The elephant population of Gonarezhou NP is continuing to increase, and is at its highest level since surveys started in 1980. There was a relatively low carcass ratio of 4%. There are limited movements of elephants from Gonarezhou into adjoining parts of Mozambique, and one radio-collared elephant moved from Kruger to Gonarezhou (Henley, 2011).

The 2014 survey of the south east Lowveld included some neighbouring areas. No elephants were observed in the Malapati Safari Area immediately south-west of Gonarezhou but there was an estimate of 332 ± 519 in the Mahenye communal land to the north-east of Gonarezhou, which replaces a zero estimate from the 2001 survey. The 2014 survey gave an estimate of 1,585 ± 1,295 for the Savé Valley Conservancy. This replaces an estimate of 527 ± 310 (Dunham, 2003). There is no statistical difference between the two results. Aerial total counts were carried out in 2013 and 2015 (Jooste & Lenton, 2015; Joubert & Joubert, 2013), which did not cover the entire area: 1,538 and 1,490 elephants were counted respectively. Sengwe, further to the south-west, adjoining the northern boundary of Kruger National Park in South Africa, was not counted in the 2014 survey, but there was an estimate of 35 ± 99 in 2013 (Dunham et al., 2013). In the Malilangwe Conservancy 272 elephants were counted using a helicopter in 2013 (Clegg, 2013). This replaces an estimate of 116 from an aerial total count in 2001 (Dunham, 2002). There was an estimate of 55 in 2014 for the Chiredzi River Conservancy (Warth in Dunham & van der Westhuizen, 2015) compared to 28 in 2001 (Dunham, 2002). Although Chipinge Safari Area is marked as possible elephant range, this is now highly unlikely.

There are a number of small isolated populations in other parts of Zimbabwe, which have updated estimates for 2014. There is an informed guess of 150 elephants for Chegutu Safari Area (Mwale, pers. comm. in Dunham, 2015), formerly Hartley Safari Area, west of Harare and this replaces a guess of 100 from 2001 (Dunham & Mackie, 2002). Some 30 elephants reportedly move from the Nyatana Wildlife Management Area in the north east of the country into Mozambique and this replaces a guess of 150 from 2001 (Dunham & Mackie, 2002).

NUMBERS AND DISTRIBUTION
CONT.

Some 20 bull elephants were photographed, and there was a further unverified report of 40 elephants, near Mangwe Dam in the vicinity of Home Farm and Greystone Ranches, across the border from Francistown in Botswana (Robertson and Winch, pers. comm. in Dunham, 2015) replacing a guess of three from 2002 (Dunham & Mackie, 2002). A helicopter total count enumerated 174 elephants on Shangani Ranch near Bulawayo (Edwards, pers. comm. in Dunham, 2015) and this replaces a guess of 60 from 2001 (Dunham & Mackie, 2002).

There was a **total aerial count** of 212 elephants in 2014 in the Zimbabwe section of the Mapungubwe Transfrontier Conservation Area which includes Tuli Safari Area, Sentinel, Nottingham and River Ranches (Selier & Page, 2015). This replaces an estimate of 82 from 2001 (Dunham & Mackie, 2002).

There were **informed guesses** in 2014 of 500-600 in Bubye Valley (Leathem & English pers. comm. in Dunham, 2015), and 100 on Bubiana Conservancy (Drummond pers. comm. in Dunham, 2015) in the south of Zimbabwe, replacing guesses of 53 and 50 respectively (Dunham & Mackie, 2002). An old estimate of ten elephants in the Mambali Communal Lands on the Botswana border has been retained from the AESR 2007 (Dunham & Mackie, 2002). A report of 54 elephants on Nuanetsi Ranch is recorded as a **new population**.

*RANGE OF INFORMED GUESS

*KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season);
— : No Change

*KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst)

*PFS

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

Re: Application for a Permits to Import a Sport-Hunted Elephant Trophy

Dear Chief Cogliano:

Enclosed please find one application for a permit to import a sport-hunted elephant trophy from the N#a Jaqna Conservancy in Namibia. An enhancement report from this operator will follow. We are also enclosing information from the African Elephant Status Report (2016) about Namibia's growing elephant population, a study on the benefits of elephant hunting to community conservancies in Namibia and a study on the views of Namibian conservancy members towards hunting, and information from the Namibian Association of CBNRM Support Organizations (NACSO) about this area. Elephant hunting in Namibia and in this area generates significant benefits for the species and the rural communities that rely on hunting revenues and meat distributions. Please consider this information, as well as information in the DMA's files and submitted by Conservation Force and Namibia's Ministry of Environment and Tourism, in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applications or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted African bush Elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Type of Activity:

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

RCVD JUN 19 2018

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
DEMENT	AMY	LALLY	

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	**3. Description of business, agency, Tribe, or institution**		
4.a. Principal officer Last name	**4.b. Principal officer First name**	**4.c. Principal officer Middle name/ initial**	**4.d. Suffix**
5. Principal officer title	**6. Primary contact name**		
7.a. Business telephone number	**7.b. Alternate telephone number**	**7.c. Business fax number**	**7.d. Business e-mail address**

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
OAKFIELD	TN	38362	MADISON	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)
(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country
MEDINA	TN	38355	GIBSON	USA

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18

(b) (6)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   African bush Elephant; Loxodonta africana

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   Country – Namibia; Area – N#a Jagna Conservancy; Region – Bushmanland region of Namibia Nearest Town – Tsumkwe; Nearest City – Windhoek

   b. Date wildlife is to be hunted: 06-16-18 to 07-04-18

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   Name of Hunting Outfitter –Peter Thornahlen; Name of Safari Company – Thornahlen & Cochran Safaris Namibia Pty Ltd.; Name of Professional Hunter – Anton Mynhardt Alberts

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

SHIPPING COMPANY:
Name: Rainer Sentefoll
Business Name: African Shipping Services CC
Address: 46 TV Moore Street Southern Industrial
City: Windhoek
State/Province:
Country, Postal Code: Namibia
Rainer@africanshippingservices.com
Tel: +264 61 305821

PROFESSIONAL HUNTER:
Anton Mynhardt Alberts
92 Nelson Mandela Ave.
Stillwater #5
Klein Windhoek
Windhoek
Namibia

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted? The Namibian Government (Ministry of Environment & Tourism-MET) has this information and forwarded it to the USF&W.

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government? Funds Paid: Trophy Fee-$15,000; Community Fee-$22,500; License Fee-$1,000; Daily Rates-$4,400 per day; Operator Conservation Fee-$5,000

      The Operator Conservation Fee Funds are used to develop the concession, which will be explained in the Concession Report answer to question 9c.
      Usage of Funds by Community: Funds going to the N#a Jagna Community is being managed by and audited by the Naye Naye Development Foundation (NNDF), which is a non-profit organization that works hand in hand with the WWF in Namibia. Monies were used to buy a Toyota Hilux Pick-up plus a number of community development programs were funded.

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature: (b) (6) _____ Date: 05/10/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

GENERAL STATISTICS

Country Area	825,418 km²
Range Area	164,069 km² (20%)
Protected Range	18 %
Information Quality Index (IQI)	0.43
CITES Appendix	II
Listing Year	1997

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Etosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD $1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 ± 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km^2, which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 ± 3,580, 9,165 ± 2,016, 14,097 ± 2,678 and 13,116 ± 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 ± 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N≠a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 ± 1,940, 3,638 ± 1,164, and 6,413 ± 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 ± 2,289 for Khaudum, 61 ± 115 for N#a Jaqna (Kolberg, 2004) and 967 ± 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuangali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

NUMBERS AND DISTRIBUTION
CONT.

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of 3,378 ± 1,756 and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of 2,911 ± 637 (Kilian, 2015) and replaces an estimate of 2,057 ± 598 from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There has been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Hoanib and Hoarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

Complementary benefits of tourism and hunting to communal conservancies in Namibia

Abstract: *Tourism and hunting both generate substantial revenues for communities and private operators in Africa, but few studies have quantitatively examined the trade-offs and synergies that may result from these two activities. We evaluated financial and in-kind benefit streams from tourism and hunting on 77 communal conservancies in Namibia from 1998 to 2013, where community-based wildlife conservation has been promoted as a land-use that complements traditional subsistence agriculture. We used data collected annually for all communal conservancies to characterize whether benefits were derived from hunting or tourism. We classified these benefits into 3 broad classes and examined how benefits flowed to stakeholders within communities under the status quo and under a simulated ban on hunting. Across all conservancies, total benefits from hunting and tourism increased at roughly the same rate, although conservancies typically started generating benefits from hunting within 3 years of formation as opposed to after 6 years for tourism. Disaggregation of data revealed that the main benefits from hunting were income for conservancy management and food in the form of meat for the community at large. The majority of tourism benefits were salaried jobs at lodges. A simulated ban on trophy hunting significantly reduced the number of conservancies that could cover their operating costs, whereas eliminating income from tourism did not have as severe an effect. Given that the benefits generated from hunting and tourism typically begin at different times in a conservancy's life-span (earlier vs. later, respectively) and flow to different segments of local communities, these 2 activities together may provide the greatest incentives for conservation on communal lands in Namibia. A singular focus on either hunting or tourism would reduce the value of wildlife as a competitive land-use option and have grave repercussions for the viability of community-based conservation efforts in Namibia, and possibly other parts of Africa.*

Resumen: *El turismo y la caza generan ingresos públicos sustanciales para las comunidades y los operadores privados en África, pero pocos estudios han examinado cuantitativamente las compensaciones y las sinergias que pueden resultar de estas dos actividades. Evaluamos las oleadas de beneficios financieros y de pago en especie provenientes del turismo y la caza en 77 zonas de conservación comunal en Namibia desde 1998 a 2013, donde la conservación de vida silvestre basada en la comunidad ha sido promovida como un uso de suelo que complementa la agricultura tradicional de subsistencia. Usamos datos colectados anualmente de todas las zonas comunales para caracterizar si los beneficios se derivaron de la caza o el turismo. Clasificamos estos beneficios en tres categorías generales y examinamos cómo los beneficios fluyeron hacia los accionistas dentro de las comunidades bajo el status quo y bajo una prohibición simulada de la caza. En todas las zonas de conservación comunal, los beneficios totales de la caza y el turismo incrementaron aproximadamente a la misma tasa, aunque en estas zonas se comenzaron a generar beneficios de la caza normalmente dentro de los 3 años de formación, en contraste con del turismo que se generaron después de 6 años. La desagregación de los datos reveló que los principales beneficios de la caza fueron los ingresos para*

el manejo de la conservación y la comida en forma de carne para la mayoría de la comunidad. La mayoría de los beneficios del turismo fueron trabajos a sueldo en hospedajes. Una prohibición simulada sobre la caza de trofeos redujo significativamente el número de zonas de conservación que podrían cubrir sus gastos de operación, mientras que la eliminación del ingreso por el turismo no tuvo un efecto severo. Dado que los beneficios generados por la caza y el turismo comienzan comúnmente a tiempos distintos en la duración total de la conservación (más temprano que más tarde, respectivamente) y fluyen a segmentos diferentes de las comunidades locales, estas dos actividades juntas pueden proporcionar incentivos más grandes para la conservación en las tierras comunales de Namibia. Un foco único sobre la caza o el turismo puede reducir el valor de la vida silvestre como opción de uso de suelo competitivo y tener repercusiones graves sobre la viabilidad de los esfuerzos de conservación basada en comunidades de Namibia, y posiblemente de otras partes de África.

Palabras Clave: accionistas, beneficios financieros, beneficios de pago en especie, conservación basada en la comunidad, prohibición de la caza, tierras comunales

Introduction

Current paradigms in conservation increasingly emphasize the utilitarian aspect of safeguarding biodiversity (Daily et al. 2009; Redford & Adams 2009; Guerry et al. 2015), as opposed to more traditional strategies such as protected areas and strict land-use zoning. Ecosystem service approaches and payments for environmental services (PES) schemes are based on the assumption that ensuring a supply of environmental benefits to people will result in the conservation of biodiversity and of natural areas (Tallis et al. 2009; Tallis & Polasky 2009). However, this increasing emphasis on a utilitarian approach to conservation has spawned much debate and criticism. Some contend this new conservation diverts efforts away from ensuring the persistence of biodiversity and puts too much focus on human needs and well-being (Soule 2013; Doak et al. 2014). Others argue that PES programs and partnerships with corporations are resulting in the commodification of nature and that market-based approaches are likely to favor the rich, powerful, and foreign at the expense of local communities and the poor (Sullivan 2006; Igoe et al. 2010).

Although approaches to natural resource management and biodiversity conservation in southern Africa have long been grounded in similar utilitarian perspectives (Child 2004; Carruthers 2008), few approaches to conservation are currently as controversial as the hunting of large and charismatic species as a means of generating benefits and incentives for conservation in this part of the world (Lindsey et al. 2006; Lindsey et al. 2007). Heightened concerns surrounding animal rights and the ethics of hunting, often inflamed by images on social media of trophy hunters posing with dead animals, have led to an increasingly vocal Western opposition to trophy hunting in Africa. This opposition is contributing to tangible policy changes, including the banning of trophy hunting in Botswana (Pabst 2013), restrictions on imports of trophies of certain species to countries such as the United States and Australia (Milman 2015), and the barring of trophies from being transported on some major commercial airlines (Wieczner 2015). Ironically, this Western opposition to trophy hunting comes despite the fact that hunting benefits were one of the early motivations for conservation in North America (Geist et al. 2001), and even today proceeds from hunting licenses in the United States (via the Pittman-Robertson Act) and Canada continue to generate hundreds of millions of dollars every year for wildlife management and habitat protection (Arnett & Southwick 2015).

The impact that changes in hunting policies may have on the conservation of wildlife and on the incentives for African people to coexist with wildlife is not well understood (Buckley & Mossaz 2015). There has been little examination of how benefits from hunting compare with benefits from nonconsumptive nature-based tourism in terms of incentives for local people to conserve species and wildlife habitat, although others have suggested the two may be complementary, rather than substitutive, activities (Leader-Williams et al. 2001; Lindsey et al. 2006). A major limitation is that data on the variety of financial benefits that wildlife generate are typically not systematically collected, especially across different temporal and spatial scales. Yet understanding who benefits, and how, from wildlife as a land use is a critical prerequisite to designing effective policies and programs that support conservation as a sustainable alternative to other, less biodiversity friendly, land uses.

Despite the above knowledge gaps, it is clear that for wildlife to survive outside (and perhaps even inside) protected areas in Africa, people must have strong incentives to tolerate, or ideally embrace, wildlife as a land use (Roe et al. 2009; Dickman et al. 2011; Child et al. 2012). Given that strict protected areas comprise a small and unrepresentative fraction of the African continent, and that even within protected areas wildlife is declining (Western et al. 2009; Craigie et al. 2010), approaches that seek to capture multiple benefits from wildlife conservation on state, private, and communal lands in Africa are indispensable. This principle is especially important when considering the diverse relationships between local communities and wildlife. Communities living with wildlife

are not monolithic entities; rather, they are composed of different groups of people who will experience different costs and benefits from wildlife conservation (Agrawal & Gibson 1999; Roe et al. 2009). For example, wealthy cattle owners and poor subsistence farmers will have different perceptions of wildlife conservation given the particular costs and benefits they are likely to experience. Diversifying benefit streams from wildlife conservation so that the variety of stakeholders within local communities are incentivized to promote or at minimum tolerate living with wildlife will provide the greatest likelihood that conservation as a land use will ultimately prove more attractive than wildlife-unfriendly alternatives. Because communal lands comprise a large fraction of rural Africa (up to 500% more than state-managed forest reserves and national parks [Alden Wily 2011]), management of these lands will play a huge role in determining the success or failure of biodiversity conservation efforts across the continent.

We focused on how different types of benefits provided by wildlife vary over time, space, and community stakeholder groups in communal conservancies in Namibia. Namibia's Community-Based Natural Resource Management (CBNRM) program began in the mid-1990s, when progressive legislation for the devolution of conditional rights to natural resources allowed communities to register areas of customary landholding as "communal conservancies." Registering these conservancies (involving developing zoning and sustainable resource management plans and a constitution) allows local communities to manage and benefit from wildlife and other natural resources on their traditional lands. Prior to the legislation, natural resources were the sole property of the state. Although wildlife has been used by people for millennia in the region that is now Namibia, the last century was characterized by declines in various species, starting with the rinderpest outbreak at the end of the 19th century, followed by overhunting of big game species by colonial hunters, and more recently by a major drought combined with a poaching increase in the 1980s (Owen-Smith 2010). Namibia's CBNRM program is widely recognized as having contributed to a strong recovery of wildlife in large parts of the country, through the creation of social and economic incentives for the sustainable coexistence of wildlife and people on communal lands (Owen-Smith 2010; Naidoo et al. 2011*b*; NACSO 2013). Additionally, the principles used to incentivize communities to steward wildlife across very large spatial scales are already being adopted by numerous other countries in Africa and beyond (NACSO 2013). We examined how changes in benefits over time generated on communal conservancies in Namibia vary according to whether they were derived from tourism or hunting (the 2 most significant benefits derived from wildlife). We also assessed how these benefits flow to different stakeholders within local communities and how factors such as time of establishment and changes in resource management policies affect such benefit flows on communal lands.

Methods

We used data from 77 communal conservancies registered by 2012 in Namibia to examine benefit flows associated with hunting and photographic tourism. The first four of these conservancies were established in 1998, and we used data through the 2013 calendar year for all of them. For both hunting and tourism, conservancies negotiate agreements with private operators. The agreements between conservancies and operators specify the portion of income the conservancy receives (typically 8–12% of total lodge revenue and from 30–75% of trophy price, depending on the species) and jobs to be offered to community members with the operation (from 20–50 for tourism lodges, depending on factors such as size and location, and 8–10 for hunting camps). In addition, community members hunt for subsistence and allow local sales of meat from wildlife through game cropping. Information on fees paid to conservancy management committees; salaries of community members employed in the tourism or hunting industry; and nonfinancial benefits (primarily meat from hunting, but also meals, training, human-wildlife conflict compensation, and other donations to the community at large) is compiled annually by every conservancy. Financial reporting of conservancies is supported by various nongovernmental organizations, is ground-truthed, and is double-checked against analogous reports from tourism and hunting operators.

We used these data and categorized each source of benefit as to whether it was derived from tourism or from hunting. The CBNRM program uses the price of buying alternative meat as the value of wild meat distributed from animals that were hunted (replacement-cost shadow price approach). In 2013, it was 18 Namibian dollars/kg of meat (NACSO 2013). This shadow price can vary and is adjusted from year to year to reflect supply and demand, but the same rate is applied across the country in order to maintain comparability of meat benefits generated in different regions. We used a consumer price index produced by the Bank of Namibia to standardize benefit figures from all years into constant 2013 Namibian dollars. We subsequently expressed all figures in 2013 U.S. dollars (U.S.$) based on the average monthly exchange rate in 2013 of U.S.$1 = N$9.64.

We divided benefits into the 3 classes (described above) because each represented a different type of gain that is channeled to different parts of a conservancy and has different implications for the sustainability of the conservancy and for its livelihood value to members. Income (i.e., fees from lodge and hunting concessions) to management committees is used by conservancies to cover operational and management costs

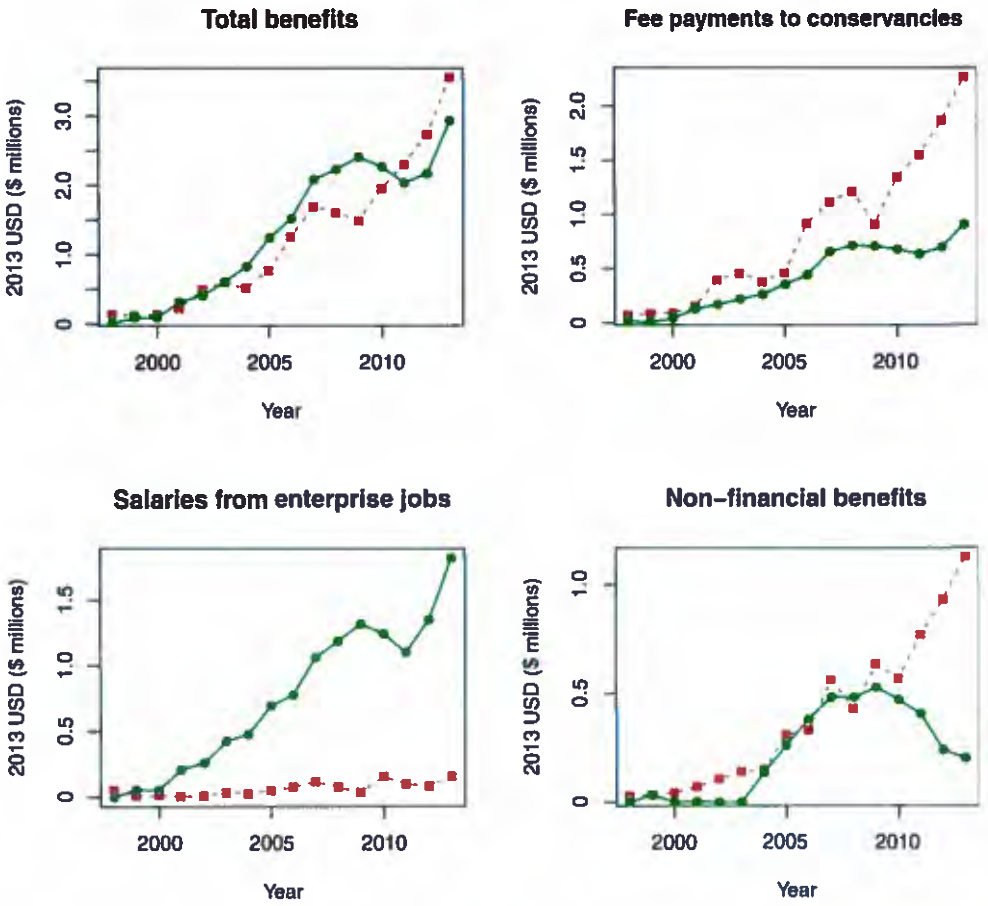

Figure 1. Benefits generated across all conservancies in Namibia's Community-Based Natural Resource Management program, 1998–2013, from hunting (squares) and tourism (circles): (a) total benefits, (b) fee payments to conservancies, (c) salaries from enterprise jobs, and (d) nonfinancial benefits.

(including paying the salaries of community game guards and other conservancy staff members, vehicle fuel costs and maintenance, and office upkeep expenses) and is also distributed as cash and funds for development projects within the community. Individual conservancy members who are salaried employees at tourism lodges or hunting camps clearly benefit financially from conservation, and this linkage should result in strong incentives for promoting wildlife as a land use in their households and among their families and social networks within the community. Conservancy members also benefit individually from the consumption of wild meat that is distributed throughout the community from hunted animals. This benefit, although nonfinancial, is typically viewed as a strong and very direct link between the value of having wildlife on communal lands and the members' livelihoods and well-being (NACSO 2013). To quantify the magnitude of these financial flows from hunting and tourism to stakeholders within communities, we used a subset of conservancy data from 2011 to 2013, during which time detailed financial accounting statements were used to track incoming conservancy revenue.

To simulate how a trophy hunting ban would affect the viability of communal conservancies in Namibia, we used detailed financial statements that were available for a subset of 50 conservancies in 2013 (all but two of the 52 conservancies that generated some level of benefits in 2013) and tabulated the operating costs each conservancy accrued. We then simulated the effects of a ban by removing all cash income that conservancies earned from trophy hunting in 2013 (assuming this cash income could not be substituted by increases in tourism) and calculated the difference in the proportion of conservancies that were able to cover their operating costs based on conservancy income under the status quo versus under a trophy-hunting ban. For comparison's sake, we removed all conservancy income from tourism and assessed how this changed financial viability of conservancies. We also used data on harvested animals and nationally averaged trophy prices to estimate the contribution of individual wildlife species to trophy hunting income.

Finally, for each conservancy we split total benefits over time into 2 series, one for hunting and one for tourism (Supporting Information). We characterized

these financial time series by calculating 4 metrics per conservancy: temporal trend (slope from a linear regression of benefits on year); volatility (root mean square error from the linear regression); end point (magnitude of benefits in 2013); and lag time between year conservancy registered and year the first benefits were generated.

We used *t* tests on these metrics to assess whether temporal flows of benefits to conservancies were significantly different between hunting and tourism.

Results

Of the 77 conservancies established by 2012, 25 reported not generating any benefits from either hunting or tourism. Considering all conservancies in Namibia's CBNRM program, aggregate benefits increased over time (Fig. 1). Total benefits from tourism and hunting were similar in the early years of the program, but tourism benefits exceeded those from hunting from 2003 to 2010, whereas from 2011 to 2013 the benefits from hunting were greater than tourism benefits (Fig. 1a). Although fee payments to conservancies and nonfinancial benefits (primarily meat) from hunting accumulated at higher levels than those from tourism (Figs. 1b and d), total salaries from tourism enterprise jobs increased 10 times faster than salaries from hunting jobs (Fig. 1c). Nonfinancial benefits from tourism dropped sharply from 2011–2013 relative to continued increasing nonfinancial benefits from hunting (Fig. 1d), a result that may have coincided with the worldwide economic downturn in 2008 and fewer available resources for tourism companies to make additional contributions to conservancies.

Conservancies were formed in roughly 4 cohorts that coincided with (1) initial heavy donor investment (1998–2001, 15 conservancies), (2) a period of declining donor investment (2003–2005, 29 conservancies), (3) an upturn in investment peaking in 2009 (2006–2009, 15 conservancies), and (4) a further increased-investment phase (2011–2013, including 18 conservancies registered by the end of 2012). The earliest conservancies, in cohort 1, had similar levels of total benefits for the first 6 years after registration, after which benefits from both hunting and tourism continued to increase but at a faster rate for tourism (Fig. 2a). Conservancies in cohort 2 (Fig. 2b) had roughly similar rates of growth in total benefits from tourism and hunting, whereas cohorts 3 (Fig. 2c) and 4 (Fig. 2d) earned virtually no benefits from tourism and had either moderate (cohort 3) or low (cohort 4) benefits from hunting.

Disaggregating the national-level data revealed that pathways for generating benefits over time varied substantially among conservancies (Supporting Information). Of the 52 conservancies that derived some level of benefits from wildlife, 28 derived all or almost all of their total benefits from hunting, 6 derived all or almost all benefits from tourism, and 18 had substantial levels of benefits from both hunting and tourism.

Although there was a tendency for the total benefits from tourism to be higher than those from hunting, there were no significant differences for any of the conservancy time series metrics (Table 1). The only exception to this was the lag time between conservation formation and the beginning of benefits generation. After their formation, conservancies derived benefits from hunting approximately twice as quickly as they derived benefits from tourism (Table 1). On average, conservancies started generating benefits from hunting about 3 years after their formation, whereas it took 6 years, on average, after conservancy formation to start generating benefits from tourism.

In addition to temporal and spatial differentiation, there were differences in how benefits from tourism and trophy hunting flowed to the different constituencies contained within communal conservancies (Fig. 3). Based on detailed financial accounting data from 2011–2013, 58.3% of the financial benefits from tourism were in the form of jobs to conservancy members at joint-venture lodges, whereas 30.3% of the benefits were lodge contractual fees used for conservancy management and 11.5% were nonfinancial benefits to the community at large less.

In contrast, the majority (64.3%) of the benefits from hunting were in the form of cash for the operation of the conservancy, and a substantial fraction went to the community at large in the form of meat from hunted animals (32.0%, or approximately 1.4 million kg over the 3 years). Conservancies used income from trophy hunting and tourism in a variety of ways that benefited the entire community (Fig. 3), most importantly for the salaries of conservancy employees and for other conservancy operating costs, but also for compensation for wildlife conflict, payments to traditional authority structures, direct cash dividends, community-level projects, and infrastructure development. Our data suggest that operational costs, conservancy employee salaries, and the various benefits to the community at large were mostly derived from hunting because hunting operators paid fees from 2011–2013 of $5.41 million (72% of the total), whereas tourism operators paid $2.13 million (28%).

Currently, many conservancies cover their operating costs with income derived from trophy hunting and from tourism that is directed to conservancy management. Simulation of a trophy hunting ban showed a reduction in the number of conservancies with incomes greater than operating costs in 2013, from 74% (37 of 50) under the status quo to 16% (8 of 50) when conservancy income from hunting was eliminated. If this reduction were to occur throughout the country, it would cover nearly 50,000 km^2 (Fig. 4). When conservancy income from tourism was removed, the effect was again negative but

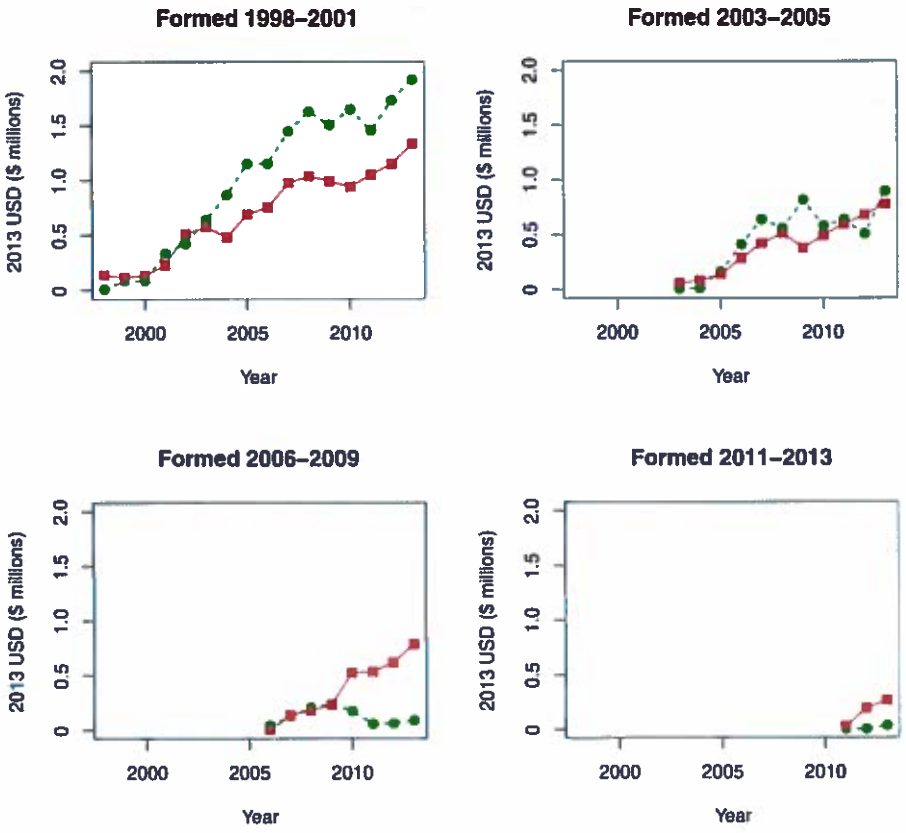

Figure 2. Total benefits from 1998–2013 for hunting (squares) and tourism (circles) across conservancies formed in 4 periods: (a) 1998–2001 (n = 15), (b) 2003–2005 (n = 29), (c) 2006–2009 (n = 15), and (d) 2011–2013 (n = 18).

Number of conservancies specializing in hunting or tourism	28	6	—	—

**Excluding conservancies that had not generated any benefits from either hunting or tourism.*

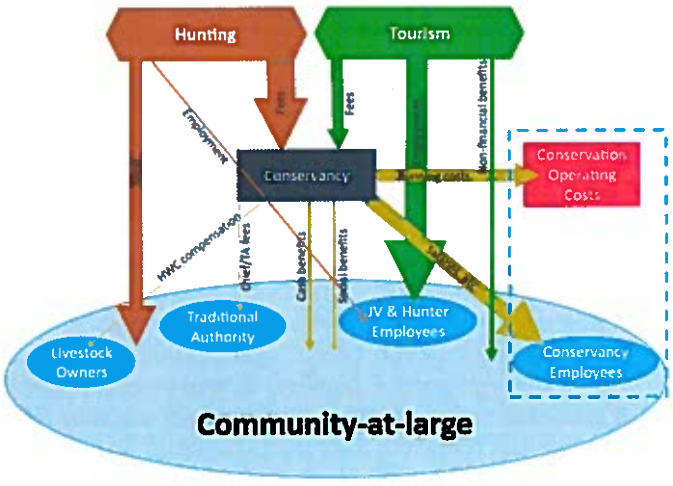

Figure 3. The flow of benefits to various sectors of a stylized local community in Namibia (widths of arrows proportional to dollar values of flows to conservancies from 2011 to 2013; brown, hunting benefit; green, tourism benefit; olive green, flows with a mix of hunting and tourism benefits; dashed rectangle, reinvestment of income into conservation activities; JV, joint venture tourism; HWC, human wildlife conflict; TA, traditional authority). Specific stakeholders (blue ovals) and the overall community at large receive the benefit flows indicated by the arrows ending in those ovals. Income to the conservancy committee (black rectangle) comes from both sectors and is redistributed as indicated, including to cover conservation operating costs (red square).

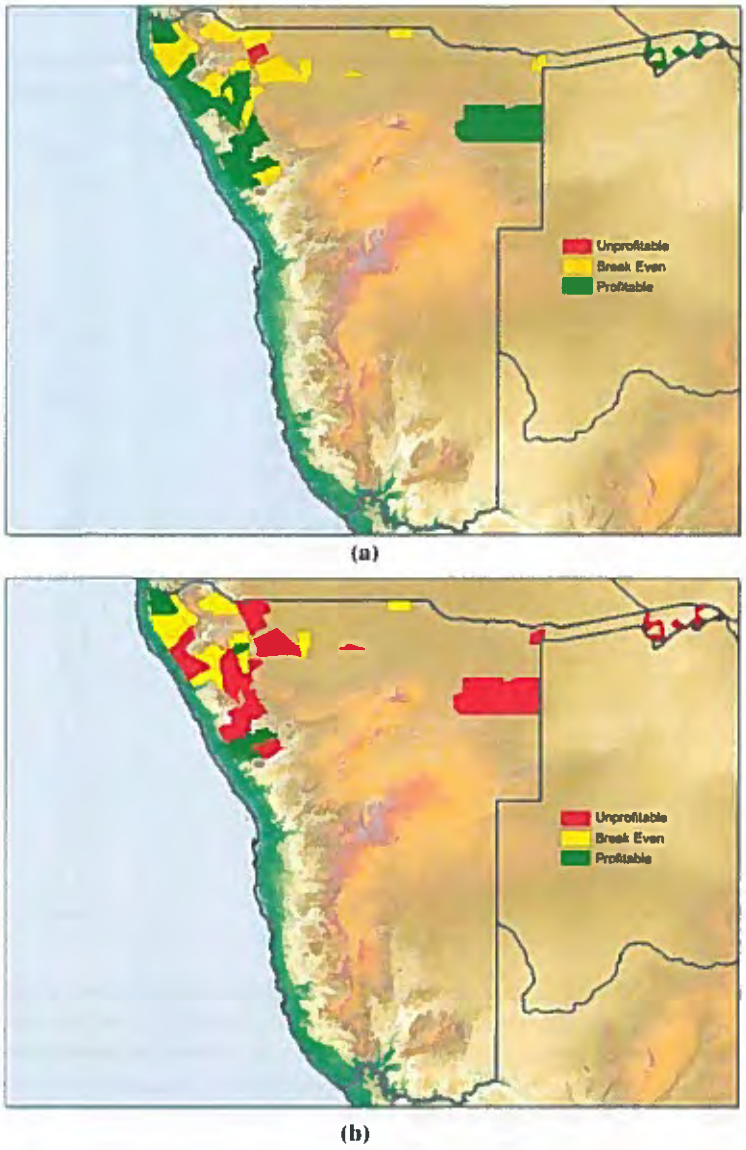

Figure 4. Revenues minus operating costs for 50 communal conservancies for which detailed management cost data were available in 2013 under (a) the status quo and (b) a simulated trophy hunting ban. Break-even conservancies indicate those for which revenues and operating costs are within $5000 of one another.

less marked; 59% of conservancies remained able to cover their operating costs.

Finally, of the 303 animals harvested by trophy hunters in 2013, individuals from 2 of the Big-5 (buffalo [*Syncerus caffer*], elephant [*Loxodonta africana*], lion [*Panthera leo*], leopard [*Panthera pardus*], rhinoceros [*Diceros bicornis* and *Ceratotherium simum*) species hunted in Africa, buffalo and elephant, accounted for 78.3% of hunting revenue; over 55% was attributable just to elephants (Table 2).

Discussion

Despite the importance of both tourism and hunting to conservation, and the debate surrounding their implementation, we are the first study to use detailed quantitative data across multiple jurisdictions and over a lengthy time span to directly compare the financial performance of these two activities. Our data from 77 Namibian conservancies from 1998 to 2013 showed that trophy hunting and tourism reached similar aggregate levels but began to generate benefits at different times (earlier vs. later in a conservancy's life-span) and flowed to different beneficiaries (community management committees and the community at large vs. individual employees). Previous work in Namibia has demonstrated that benefits from hunting and tourism are also spatially differentiated; conservancies are more likely to generate benefits from hunting in areas with diverse wildlife and Big-5 species, whereas the presence of black rhinoceros (*Diceros bicornis*) and broader environmental conditions (distance to tourist routes, topographical diversity, and rainfall) are correlated with higher benefits from tourism (Naidoo et al. 2011*b*). In addition, the first conservancies established were typically those with the highest potential to

generate benefits from wildlife, and, as with our cohort results, older conservancies generate higher levels of aggregate benefits than younger ones (Naidoo et al. 2011*a*; Humavindu & Stage 2015).

We found that tourism and hunting both made substantial and separate contributions to the economic welfare of rural communal residents; the former was weighted toward employment and wages and the latter toward governance structures and management costs. A focus on either one or the other would lead to substantial reductions in overall benefit generation and incentives for wildlife conservation throughout Namibia. For much of Africa and other parts of the world, Westerners tend to view tourism as the dominant wildlife-based development paradigm for delivering a sustainable flow of benefits to local communities living with wildlife or near protected areas (Kiss 2004; Hawkins & Mann 2007). Similar to the results of studies of private landholders (Lindsey et al. 2013*b*) and national economies (Barnes et al. 2002; Lindsey et al. 2007), our results showed it is important to recognize that the direct benefits of hunting are roughly similar in magnitude to those of tourism for communal conservancies in Namibia.

Beyond this aggregate overall similarity between the benefits of hunting and tourism, there are important differences in scale and sequencing between the two activities. For the typical conservancy, benefits from hunting are generated quickly, within a few years of formation. In these early years of a conservancy, income from trophy hunting is critical for the management of the area, and the meat from hunted animals makes tangible the economic benefits that wildlife conservation can deliver to conservancy members. Benefits from tourism take twice as long to develop, due to the time needed for the recovery of wildlife populations, and the investments in both physical (i.e., lodges and other infrastructure) and human capital required to host high-end tourism in communal areas. Few conservancies (12%) specialized in tourism; most conservancies generating benefits from tourism also generated benefits from hunting. In contrast, over half (54%) of the conservancies generating benefits in Namibia did so from hunting alone, because hunting can be sustained in areas with relatively low densities or visibilities of wildlife, and in landscapes that are unappealing or inaccessible for photographic tourism (Lindsey et al. 2006). Because these conditions characterize much of the African protected- (in the widest sense) area estate, it follows that preventing or discouraging trophy hunting would remove possible incentives for conservation across a large swathe of the continent

where nature-based tourism is not viable (e.g., Blom 2004).

Benefits from trophy hunting and tourism also accrue to different stakeholders within communal conservancies. Benefits from tourism were mainly in the form of employment income to conservancy members who are hired to work at lodges built on conservancy land. Although these employees normally come from among a group of conservancy members nominated by the conservancy, ultimately staff are hired based on their knowledge, communication skills, and potential. Jobs of any kind are extremely rare in remote rural areas and thus highly sought after; therefore, tourism is viewed very favorably by local residents who are employed in the industry (Suich 2010; Silva & Motzer 2015). In contrast, agreements between communities and hunting operators provide significantly higher levels of income for conservancy management, as well as greater nonfinancial benefits (largely from meat) distributed directly to the community at large.

The income to management committees is essential; without it, most communal conservancies in Namibia would be unable to cover their operating costs (which three-quarters of the 50 conservancies we assessed were doing). Conservancies unable to cover their operating costs will likely cease to pursue conservation as a viable land use because without conservancy income, game guards cannot be paid, management and monitoring plans cannot be developed and instituted, the sense of local ownership over natural resources dissipates, and wildlife becomes much more vulnerable to declines from poaching and overharvest. This link between income from hunting and the conditions and incentives that permit wildlife to persist as an economically viable land use is critical but often unrecognized. Our data also show that almost 80% of hunting benefits are delivered by two species (elephant and buffalo); elephants alone generate over 50% of all hunting benefits from an increasing population base (7500 individuals in 1995 to over 20,000 in 2012 [Craig 1999; Ministry of Environment and Tourism 2012]). Therefore, even a targeted hunting ban on elephants or an import ban such as those that currently prevent the import of elephant trophies from Tanzania and Zimbabwe into the United States is likely to have a very negative impact on Namibia's CBNRM program by severely undermining conservancy governance structures and incentives for conservation. Anecdotal accounts of the impact of Botswana's 2014 hunting ban suggests that similar negative consequences (an increase in poaching for meat and trade and increased collaboration of local communities with international poaching gangs) may be occurring there (Somerville 2015).

Although we found there were impressive financial gains from trophy hunting, the sustainability (both ecological and economic) of these operations on communal lands in Namibia is rightly of major concern. As such, it is regulated via annual estimates of species' populations and harvest quotas derived in agreement with local communities and the Ministry of Environment and Tourism (NACSO 2013). Although data from the various conservancy landscapes within the country indicate populations in these areas have generally increased since the advent of Namibia's CBNRM program (Naidoo et al. 2011*b*), evidence on possible negative impacts of trophy hunting on wildlife populations in other parts of Africa (Packer et al. 2010; Lindsey et al. 2013*a*) means that trophy hunting must be carefully monitored in Namibia to ensure the same does not happen. There have been no assessments on how trophy size or quality in particular species may be changing over time, a concern that has been raised for trophy hunting in Africa (Crosmary et al. 2013) and that may result in undesirable genetic changes within hunted populations (Coltman et al. 2003). It is therefore critical that data on the size and quality of trophy exports be analyzed for Namibia's CBNRM program to inform monitoring, evaluation, and management of the trophy-hunting industry. High-profile, apparently illegal hunts such as of lions on the borders of national parks in Zimbabwe, and ethically dubious practices, such as canned hunting of captive animals, also illustrate that the industry itself must play a greater role in addressing issues that throw the sector into disrepute. Finally, growing human populations and a tremendous increase in elephant poaching for the international ivory market may eventually result in reduced quotas of elephants and therefore threaten the financial benefits communal conservancies have generated through trophy hunting.

The sustainability of photographic nature-based tourism in Africa and beyond has also come under scrutiny (Buckley 2004; Newsome et al. 2012). In Namibia relevant issues for ecological sustainability include impacts of intense wildlife viewing on animal behavior, localized environmental implications of the development of tourism infrastructure (lodges, campsites, roads, disposal facilities, etc.) in sensitive arid environments, and climate-change impacts from the carbon emissions of increasing numbers of international visitors. As with trophy hunting, there are few studies, particularly for the first two considerations, that have evaluated the sustainability of tourism initiatives on communal conservancies in Namibia. Furthermore, from a socioeconomic point of view nature-based tourism on communal lands in Namibia has been criticized as having power imbalances or elite capture issues that render communities unable to secure significant shares of the benefits (Hoole 2010; Lapeyre 2011), even though residents of conservancies with high benefit levels are themselves strongly supportive of tourism (Silva & Motzer 2015). Finally, to assess more fully the overall costs and benefits of wildlife conservation on communal lands in Namibia, there is a need for greater investigation of both human-wildlife conflict costs and who bears them, as well as the opportunity

costs of pursuing wildlife conservation as a land use versus alternative uses.

Despite these caveats, our results show that hunting and tourism generated similar aggregate levels of benefits for local communities in Namibia. Because these benefits occur at different times, in different places, and reach different sections of local communities, each are essential to the successful functioning of community-based natural resource management in Namibia. As with other contexts (Sandbrook & Adams 2012), recognizing that benefits from conservation to local communities take various pathways has important implications for conservation and the development of effective incentives. Further investigation is therefore desperately needed to examine the relative impacts of hunting and tourism in many others areas of conservation importance in sub-Saharan Africa.

ABSTRACT

Trophy hunting in Africa is currently under pressure as some countries explore various policies that aim to put a halt to an activity that many people in the Western developed world view as unpalatable or unethical. However, in the debate over trophy hunting policy the voices of local communities, who in many instances allow wildlife to persist on the lands they control because of the tangible benefits they derive from it, have been largely unheard. Here, we report on an opportunistic survey of 160 rural residents of Namibia from 32 communal conservancies that generate varying levels of livelihood benefits from wildlife uses, including trophy hunting. About three quarters of these community members were employed in some manner by the conservancy. We used a mixed methods approach to assess community members' perceptions on trophy hunting, the benefits it generates, whether it was "good" or "bad", and how they would respond if trophy hunting were halted. 91% stated they were not in favour of a ban on trophy hunting, and only 11% of respondents would support wildlife on communal lands if a ban were in fact enacted. Most respondents (90%) were happy with trophy hunting occurring on communal lands due to the benefits it provides. These responses were consistent across respondent demographic categories, although those who stand to lose the most (i.e., those employed by or managing a conservancy), viewed trophy hunting in an even more favourable light. Our results suggest that in Namibia, a trophy hunting ban would be viewed very poorly by conservancy residents, and would seriously weaken their support for wildlife conservation. The imposition of trophy hunting policies by countries far from where rural land managers are conserving wildlife would not only restrict communities' livelihood options, but may have perverse, negative impacts on wildlife conservation.

1. Introduction

In the debate over trophy hunting that is currently playing out in public and policy spheres (di Minin et al., 2016; Macdonald et al., 2016a, 2016b), the voices of local communities have been conspicuously absent. Local communities are the land managers who will dictate the fate of conservation efforts in large parts of Africa that are outside of protected areas (Roe et al., 2009), therefore policy changes that are likely to impact their wildlife conservation decisions should proceed cautiously and on the basis of the best available scientific information. Yet despite having little understanding of how communities perceive the issue, and of how they may change their land use and wildlife management practices should a major source of livelihood benefits be removed, countries such as Kenya and recently Botswana have banned trophy hunting (Pabst, 2013) while governments of countries in Europe and Australia have stopped or are considering banning the import of trophies of various species (Milman, 2015). Increasing public opposition to trophy hunting from people living in many developed Western countries may eventually result in the industry being shut down. Yet, a failure to understand how trophy hunting of wildlife and its benefits and costs are perceived by local communities may result in conservation policies that achieve the exact opposite of the intended effect, i.e., a reduction in biodiversity and in the amount of area under wildlife management (di Minin et al., 2016).

To address this gap, we present in this research note the results of a preliminary survey of 160 rural residents across 32 communal conservancies in Namibia, a country in which trophy hunting is a common activity pursued on private, state, and communal lands (Lindsey et al., 2013; Naidoo et al., 2016). Communal conservancies are areas of customary landholdings whose natural resources are managed by local communities for their own benefit, with trophy hunting and nature based tourism being the dominant wildlife-based enterprises that generate livelihood returns (Naidoo et al., 2011a; Naidoo et al., 2011b). These activities, and the communal conservancy program more

Name of conservancy: Salambala Conservancy

Age: < 25 years ☐ 26 to 39 years ☑ 40 to 49 years ☐ 50+ years ☐

Gender: Man ☐ Woman ☑

- Are you employed by the conservancy? Yes ☑ No ☐
- If yes, as what? ☐ Game Guard ☐ Manager ☐ Secretary ☐ Finance ☒ Other (please specify) Camp Manager
- Are you a Committee Member? Yes ☐ No ☑
- Are you employed by the lodge? Yes ☐ No ☑
- Does trophy hunting provide benefits to you or to your Conservancy?
- Are you happy that trophy hunting takes place in the Conservancy?

Why is trophy hunting Good?
It generates income for the conservancy.

Why is trophy hunting **Bad**?
It is not bad, but the income generated is not a lot.

- Should trophy hunting be banned? Yes ☐ No ☑
- Is trophy hunting bad for wildlife Yes ☑ No ☐
- Which is best:
  - Tourism only ☐
  - Trophy Hunting only ☐
  - Both Tounsm and Hunting ☑
- How strongly would the community support wildlife if hunting was not allowed?
- What do you want to say to people who want to ban trophy hunting?

We rely on trophy hunting for the successful operation of our conservancy do not ban trophy hunting.

Fig.1. A completed questionnaire on attitudes towards trophy hunting and a possible ban that was administered to 160 rural residents of communal conservancies in Namibia.

broadly, are recognized as having contributed to dramatic recovery of wildlife populations across the country as well as significant improvements in rural livelihoods (Roe et al., 2009). Trophy hunting can generate substantial benefits for local communities (Naidoo et al., 2016). These include revenues for conservancy management (typically between 30 and 75% of a trophy prices), jobs for local community members at hunting camps, and perhaps most importantly, meat distribution to all community members. However, less positive aspects of trophy hunting can include low or inequitable distribution of benefits from hunting operators to local communities, poor skills among community members to fully participate in the hunting industry, and questions about the ecological sustainability of hunting (Suich, 2010; Yitbarek et al., 2013; Lindsey et al., 2006a, 2006b).

2. Materials and methods

We employed a mixed methods survey approach (Johnson et al., 2007), using an in-person interview comprising both closed and open-ended questions that asked community members for their feelings on trophy hunting (Fig. 1), for reasons why hunting is either "good" or "bad" for themselves or their communities, and their thoughts on a possible trophy hunting ban. Using a 1-to-5 Likert scale (colour-coded and represented by "smiley" faces to facilitate understanding by rural residents), we asked conservancy members to rate their support for trophy hunting, the level of benefits it provides to themselves or the local community, and what their degree of support for wildlife conservation would be if trophy hunting were banned on their lands. Open-ended questions allowed respondents to voice why they thought hunting was good or bad, and whether it should or should not be

banned. We additionally collected basic demographic and livelihood information from respondents. These short surveys were deployed opportunistically in January and February 2016, at which time communal conservancies were holding annual audits that involved conservancy members and staff gathering to discuss the management of their lands and wildlife. During this time, we approached conservancy employees (game guards and management committee) and non-employees (those not directly employed by the conservancy) to participate in the survey. All participants approached took part willingly and without any refusals. The 32 communal conservancies that were surveyed represent a wide geographic spread across the western (Kunene) and eastern (Zambezi) regions of Namibia, and also span conservancies that derive various levels of livelihood benefits from trophy hunting (n = 13 conservancies), nature-based tourism (n = 3), both activities (n = 12), or neither (n = 4).

We modelled the degree of agreement with the question "Does trophy hunting provide benefits to you or your conservancy?" as a function of region (dummy variable "Zambezi" in Tables 2–4), respondent age (4 levels, with reference category over 50 years old, and dummy variables for less than 25 - "age25", 26 to 39 years old - "age 26_39", and 40–49 years old, − "age40_49", sex ("male" dummy variable), occupation (dummy variables for committee member - "committee", game guard - "game.guard", or general conservancy employee - "employee"), and whether they lived in a conservancy that currently hosts trophy hunting operations ("some.hunt.inc" dummy variable). Because the data were dominated by responses in the "agree" and "strongly agree" categories (i.e., categories 4 and 5), we collapsed these two categories into an "agree" category, with categories 1 to 3 folding into a 0 or "do not agree" category. We then conducted Bayesian logistic regression, with this agree/do not agree variable as our dependent variable, uninformative priors on the independent variables, and using two chains with 500 warm up samples and 1500 posterior samples each. This analysis was conducted using package brms (Buerkner, 2016) in the statistical computing software R (R Development Core Team, 2008). For consistency, we used the same procedure to model responses to the questions "Are you happy that trophy hunting takes places in the conservancy?" and "How strongly would the community support wildlife if hunting was not allowed?". For all three models, we evaluated the strength of evidence of independent variables using 95% Bayesian credible intervals, where intervals that do not overlap with zero are taken as strong evidence of a variable's impact on the dependent variable in question.

3. Results

Across all respondents (n = 160), an overwhelming majority (91%) of respondents stated they would not be in favour of a ban on trophy hunting, and only 11% of respondents believe their community would continue to support or strongly support wildlife on communal lands if a ban were in fact enacted. In response to the open-ended question "What would you say to those who want to ban trophy hunting", two-thirds (65%) stated that 'this would be depriving them of income or employment that is critical for their livelihoods' (Table 1). Smaller fractions mentioned 'the loss of meat' (14%), 'a resulting increase in human-wildlife conflict' and retaliatory killing of wildlife (6%), and an increase in poaching (6%) as possible outcomes of a trophy hunting ban. A small percentage (13%) were open to a trophy hunting ban, but did not see what other alternatives could replace the lost benefits that a ban would entail.

Most respondents strongly agreed that trophy hunting provides benefits to communities and were happy with it taking place on communal lands (Fig. 2), although 18% (n = 28) of respondents are concerned that trophy hunting is in fact bad for wildlife. The most common reason given by these respondents for why trophy hunting was bad (see also Table 1) was "the potential for wildlife declines" (mentioned by n = 12 people), followed by "few actual benefits" (n = 5), and "possible negative effects on tourism" (n = 2). One person mentioned "wounding of animals" as an issue and one person mentioned that "hunting makes animals more aggressive towards people". Importantly, the ethical concerns of hunting individual animals for sport that are mentioned by wealthy people living in developed western countries as justification to stop trophy hunting were not mentioned at all by local community members living with wildlife.

Table 1
Statements to open-ended questions on why trophy hunting is good, why trophy hunting is bad, and response to a possible ban on trophy hunting.

What would you like to say to people who want to ban trophy hunting?
