"Trophy hunting is lifting us from poverty. It creates employment opportunities for us. We also give meat benefits to our members".
"We want to conserve our wildlife and use it in a sustainable manner, but the benefits need to go to the general members".
"Please give us a reason for wanting to take us back to being poor and with no benefits from our wildlife. I need an explanation of why it is good for photographers to benefit but not for us".
"Why do you want to take away my job? Why do you want me to suffer from elephants destroying my crops without any benefits, just so you can satisfy your needs of looking at these animals? Trophy hunting is well managed and beneficial for us,we cannot ban it".
"Trophy hunting is our means of conservation and survival. Our members benefit, our wildlife is well guarded against poaching, why ban a good thing"?
"If hunting stops, we will be left with nothing (no money, jobs or meat to the people). Then poaching will escalate".
"Trophy hunting improved our living conditions, it helps alleviate poverty. If it is banned, the community will revert to illegal hunting".
"We suffer a lot from conflict with wildlife, especially with Hippos. Trophy hunting helps reduce this conflict while investing back into the community".
"If we are to stop trophy hunting, what alternatives would we have? Trophy hunting is our only source of income at the moment".
"Yes, please ban trophy hunting, tourism is better. Our grandchildren will not find wildlife outside national parks if we continue hunting".
Why is trophy hunting good/bad?
"It brings income into our community and also creates employment opportunities".
"It brings money and meat to our conservancy, this prevents poaching".
"It generates income which allows for the operation of our conservancy".
"It brings income into our conservancy, creates employment for the people, pays salaries and gives the meat to the people".
"It brings income to our association, enabling us to install water pumps for the communities and support local schools".
"It benefits people which helped in curbing poaching and retaliatory killing of wildlife".
It is selective, only takes out old and post-reproductive male animals".
"It is a beneficial way of controlling wildlife numbers especially problem animals. We benefit greatly from trophy hunting, both from meat and money".
"Trophy hunting chases animals away from the people and from the area. It will also reduce our wildlife numbers in the near future".
"It is taking place every single year, this will reduce our wildlife in the long run".
"The benefits are only enjoyed by a few individuals within the community"

A strong majority of respondents, were happy with trophy hunting operating on their communal lands, whether actually occurring at present or not (Fig. 2). 90% of respondents either agreed or strongly agreed with the question "Are you happy that trophy hunting takes place in the conservancy?". The dominant reason given by respondents for why trophy hunting was good (see also Table 1) was that it generated income or employment for themselves or community members (85%). Other reasons for why hunting was good was the meat it provides (46%), the fact that it is well managed and has little impact on wildlife (5%) and the removal of problem animals (3%).

Parsing out the dependent variables by employed versus non-employed at the conservancy (Fig. 3), we find that strong majorities of employees (89%) n = 110/118) and non-employees (88%) (n = 35/40) believe their community would not support wildlife on communal lands if a ban were enacted. An overwhelming majority of both employees (93%) and non-employees (88%) are happy with trophy hunting taking place in the conservancy while 91% of employees and 58% of non-employees agreed that trophy hunting provides benefits to communities. Although non-employees do not view benefits from trophy hunting as highly as do conservancy employees, they

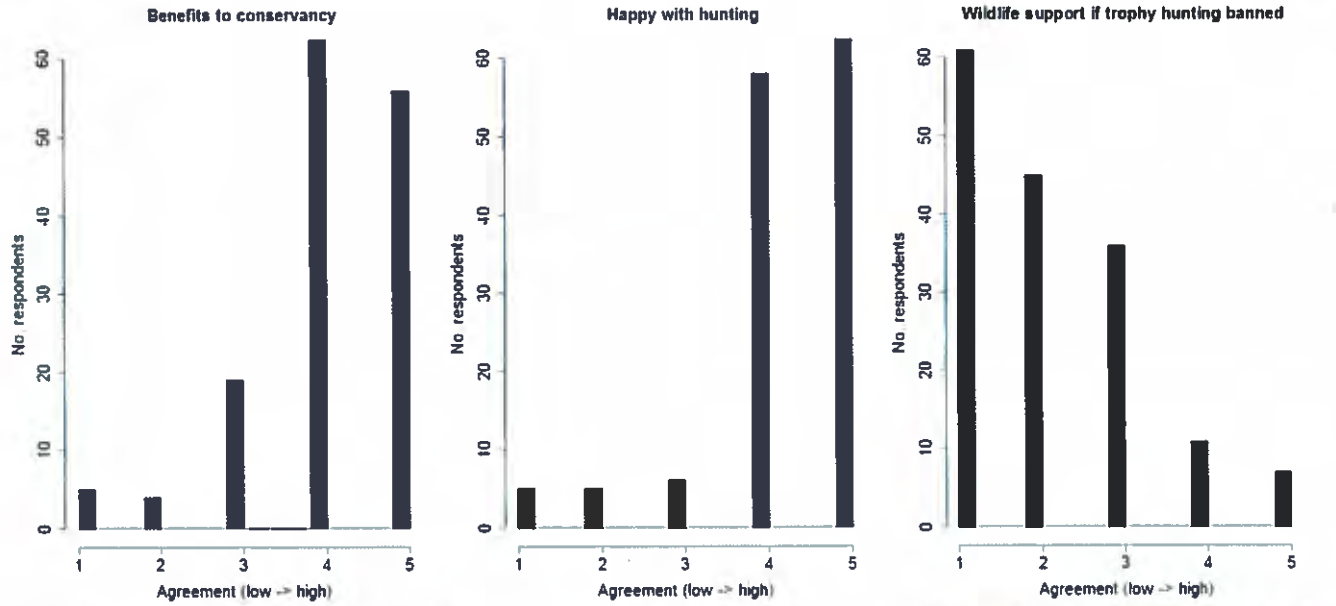

Fig. 2. Histogram of responses to the questions "Does trophy hunting provide benefits to you or to your conservancy?" (left panel), "Are you happy that trophy hunting takes place in a conservancy?" (middle panel), and "How strongly would the community support wildlife if hunting was not allowed?") (right panel).

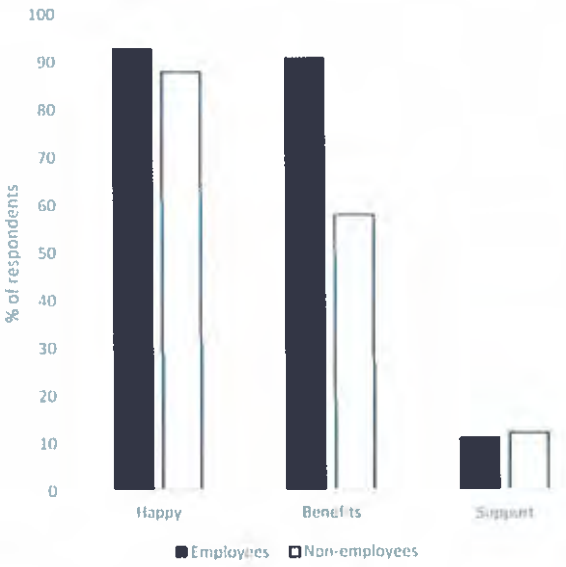

Fig. 3. Employed versus non-employed responses to the questions "Are you happy that trophy hunting takes place in a conservancy", "Does trophy hunting provide benefits to you or to your conservancy?" and "How strongly would the community support wildlife if hunting was not allowed?".

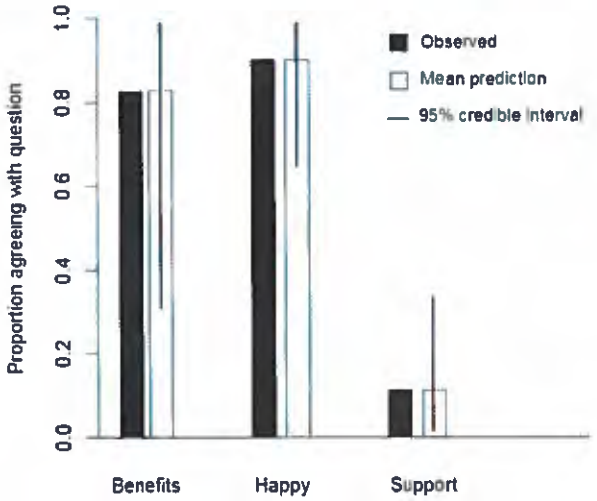

Fig. 4. Actual versus model-predicted proportions of respondents agreeing with the questions "Does trophy hunting provide benefits to you or to your conservancy?" ('Benefits'), "Are you happy that trophy hunting takes place in a conservancy?" ('Happy'), and "How strongly would the community support wildlife if hunting was not allowed?" ('Support').

nevertheless support trophy hunting at a similar level, and are similarly pessimistic about future support for wildlife conservation if trophy hunting were ever to be banned.

All of the Bayesian regression models converged appropriately and posterior predictive checking showed that they were able to generate predicted values that looked similar to the actual data (Fig. 4). The model for trophy hunting benefits generation correctly classified 70% of the respondents who did not agree that trophy hunting produced benefits, and 82% of those who did agree. For happiness with trophy hunting operations, the model correctly classified 67% of those who were happy and 56% of those who were not happy with hunting on conservancy lands. Finally, for continued support of wildlife conservation, 69% of individuals who would no longer support wildlife were correctly classified, while 56% of those would support wildlife conservation were correctly classified.

Demographic variables (age and gender) and the type of conservancy (those currently generating benefits from trophy hunting versus not) were not important factors predicting how favourable respondents' views were on the benefits that trophy hunting can generate for themselves or their community (Table 2). However, employees of conservancies and committee members (n = 120) were more likely to agree that trophy hunting produces benefits for themselves or their community than those not employed by a conservancy (Table 2). In addition, respondents from the Zambezi region were more likely to agree that trophy hunting provided benefits to the community, probably because hunting operations are more widespread there than in the Kunene region.

Table 2
Results from a Bayesian logistic regression of agreement that benefits are generated from trophy hunting, with variables whose 95% Bayesian credible interval does not overlap with zero in bold.

Age and gender variables were again not important predictors of responses to the questions on happiness with trophy hunting operations, however employees and committee members were more likely to be happy with trophy hunting than those not employed by the conservancy (Table 3). For support of wildlife conservation, gender and the type of conservancy were not important in explaining community support for wildlife in the event of a trophy ban, but the few respondents who would continue to support wildlife were more likely to be in the 26–39 age range rather than older than 50. In addition, respondents in conservancies with current trophy hunting operations would be even less likely to continue to support wildlife conservation in the event of a trophy ban than respondents in conservancies where hunting is not currently taking place (Table 4).

4. Discussion

This preliminary work suggests strong support for trophy hunting among conservancy members, especially those employed by or managing the conservancy. The data also suggest a large drop-off in support for wildlife conservation in the event of a hunting ban, a result which appears particularly acute in those conservancies currently realizing livelihood gains, in the form of meat and income for conservancy management, from trophy hunting operations. Most respondents believed that trophy hunting was "good", listing the immediate livelihood gains they realize as a result of hunting, and that would be lost due to a ban. Smaller fractions mentioned the potential negative effects on wildlife of a trophy hunting ban, including increases in poaching and retaliatory killings of problem animals. Fewer than 1 in 5 respondents felt trophy hunting was "bad", and while these respondents expressed concern for potential population declines of wildlife due to hunting, they did not mention concerns for the welfare of individual animals. This contrasts sharply with views in wealthy Western countries, where outrage over the killing of individual animals, illustrated vividly by the response to the shooting of Cecil the lion in Zimbabwe, appear to be driving policies that are making trophy hunting in Africa more difficult (Macdonald et al., 2016a, 2016b; di Minin et al., 2016; Novelli et al., 2006).

Results from elsewhere in Africa also suggest that where tangible benefits are received, either via nature-based tourism or from hunting, local communities have more favourable attitudes towards wildlife. In central Kenya, where trophy hunting has been banned since 1977, a majority of local community members would support the return of trophy hunting, and benefits derived from trophy hunting or tourism was the most-cited reason given for how they could better co-exist with predators (Romanach et al., 2007). The likelihood or not of receiving benefits was also the primary concern of residents asked for their opinion on elephant reintroduction to group ranches in Kenya (Browne-Nunez et al., 2013). In both Zambia and Zimbabwe, where community-based conservation programs have relied heavily on trophy hunting as a source of benefits for impoverished rural communities, the major conservation outcome of these programs was that community attitudes became more favourably predisposed towards wildlife (Leader-Williams and Hutton, 2005; Lewis and Alpert, 1997; Loveridge et al., 2006). And in Tanzania, respondents who received more meat from hunted animals were more likely to have positive conservation attitudes than those who received less meat (Gillingham and Lee, 1999). Given that large areas of Africa are outside of protected areas and unsuitable for nature-based tourism (Lindsey et al., 2006a, 2006b), it is imperative that communities who control natural resources in these areas and who benefit from well-managed trophy hunting operations are encouraged, rather than dis-incentivized, to support wildlife conservation.

Our survey was conducted opportunistically during community meetings and was restricted to conservancy members. A large number of respondents were employed in some manner by the conservancy, and employment-related variables were significant predictors of responses on benefits generated from, and satisfaction towards, trophy hunting. Given that our sample is biased towards respondents who are associated with conservancies, future work should sample a broader sample of rural residents to determine whether rural communities at large in Namibia share these same views.

5. Conclusion

Our data gives a voice to the viewpoints of local communities on the trophy hunting debate, a debate in which they have been almost entirely ignored even as policy decisions made overseas threaten substantial negative impacts on their livelihood options. They also support research, both from Namibia and from other parts of Africa, that emphasizes the importance of benefits from hunting for local communities, which leads to economic incentives for conservation in communal lands outside of formal protected areas Störmer, 2016; Hoole, 2008; Loveridge et al., 2006; Naidoo et al., 2016; White and Belant, 2015). Imposing policies in rich, Western countries that cut off these livelihood gains, without an in-depth understanding of how local community land managers may react, risks generating unintended consequences that

could result in negative conservation outcomes.

N#a-Jaqna Conservancy

Named after the Buffalo Thorn Tree

Quick facts

Registered:	July 2003
Region:	Otjozondjupa
Area:	9,120 km²
Approximate population:	3,698
Geographical features:	Average annual rainfall of 400-450 mm. Kalahari sands cover flat landscape of broadleaf and acacia woodland.

Status Summary & Natural Resource Report

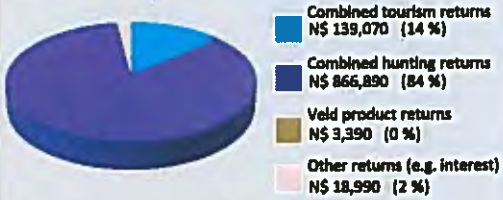
maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2016

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N$ 1,028,340



Two of the most significant returns for the conservancy:

- ✓cash income to the conservancy to cover running costs and invest in developments
- ✓employment to conservancy residents

Conservancy income			N$ 1,028,340
Employment	Private Sector		
	Conservancy	13 staff	N$ 221,740

Cost of natural resource conflicts in 2016

estimates are based on average national values

Estimated human wildlife conflict cost	N$ 3,330
Estimated poached high value species loss	N$ 9,620
Total conflict cost estimate	**N$ 12,950**

Natural resource cost–return ratio in 2016

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

Total returns N$ 1,028,340

Approximate conflict costs N$ 12,950

Approximate positive ratio 79 : 1

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2016	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Duiker					
Elephant					
Gemsbok					
Giraffe					
Jackal					
Klipspringer					
Kudu					
Mn. zebra					
Ostrich					
Springbok					

Wildlife Status

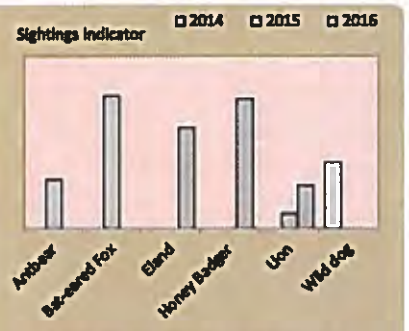
Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species



Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Trophy Application

1 message

MacDonald, Tim <tim_macdonald@fws.gov> Mon, Sep 30, 2019 at 3:03 PM
To: cf@conservationforce.org, permits@conservationforce.com

Regina,

You had sent me several elephant trophy permits to withdraw. I do not have notes on this application, please let me know what to do next.

U.S. Fish and Wildlife Service Prt # 95530C

On **06/19/2018** an applica on for the importa on of an African Elephant, sport hunted trophy was received by this office **Prt # 95530C**. At the me of the applica on's submission the hunt was to be held at a future date.

Please confirm at this me if you successfully hunted the elephant. If **yes**, please state so, and provide the date and loca on the elephant was taken.

If **no**, do wish to withdraw your applica on at this me?

Please confirm the current status.

****Please note the permit that was applied for was for a specific loca on, and date. Permit applica ons and fees are not transferable to another hunt, and so if you have scheduled a different hunt, you must submit a new applica on.*

Thank you,

Tim Mac Donald

Ms. Brisendine,

Please, see the attached supplement to the existing application # 95530C for Mrs. Amy Dement.

Attached you will also find her permits for the hunt, the Operator Enhancement report, and the National Elephant Management plan for Namibia that we ask you add to her application. I have had to split this into two e-mails as the attachments are quite large. Please let me know that you have received everything.

Let me know if you have any questions regarding this matter.

Thank you,

Aimee Korver

RE: PRT # 95530C Amy Dement –
Supplement to Import Permit Application for Sport Hunted Elephant Trophy from Namibia

Dear Chief Cogliano:

This is a supplement to our existing application, PRT # 95530C for an Elephant Trophy Import from Namibia for applicant Amy Dement.

Ms. Dement had a successful hunt and obtained an Elephant bull. It was taken near Nohma Village in the N#a Jagna Conservancy Concession block in the Bushmanland of Namibia. The date the elephant was taken was July 6th, 2018.
GPS Coordinates –
S 10* 15' 27,3"
E 020* 15' 44,1"

We have also provided the Operator Enhancement Report from Thormahlen and Cochran Safaris for the N#a Jagna Conservancy and the Elephant Management Plan for Namibia to be included as enhancement documents for this application.

These documents show that the hunting is well-managed and regulated on lawful sport hunted trophies in Namibia. Over and above, this operator is setting an exemplary standard for their community investments by donating school supplies, drilling and maintaining boreholes to establish permanent Wildlife Water Points, employing local community members, giving away all of the trophy and non-trophy game meat to the residents of community, and maintaining an anti-poaching program with their own funds. Please consider these attached documents and the ones previously provided along with the supplemental information regarding the hunt above, in making a positive enhancement finding for this elephant permit application.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

Enclosures:

a. Operator Enhancement Report- Thormahlen and Cochran
b. Elephant Management Plan for Namibia

1. Name of area operator: Peter Thormahlen
   a. Years in business: 18
   b. Name of company conducting hunt: Thormahlen & Cochran Safaris
   2. Name of concession: **N#a Jagna Conservancy** Size in km^2: 9,120 or 900,120 ha
   a. Land tenure: __ Government lease _X_ Community __ Private ranch __ Private conservancy
   b. Length of concession agreement: 2016-2024 Can it be renewed? _X_ Yes __ No
   c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:

CONTRACTUAL OBLIGATIONS

- ANNUAL REPORTING -The Trophy Hunting Operator must submit an Annual Report Yearly within 30 days after the hunting season ends, which is 30 November. These Annual Reports are handed in at the Ministry of Environment & Tourism, as well as a copy at the Conservancy office, and the WWF office. Failure to submit the report timeously is punishable with a fine of N$5,000.

- MEAT DISTRIBUTION – All hunted Trophy, as well as Non-Trophy game meat is distributed to villages in the concession within 24 hours after being hunted. As a company Policy we do not leave any remains of elephant where it was hunted - no bones, skin, meat etc. After 2 days diesel is poured onto the stomach content and blood at the slaughtering site, wood stacked on top and burned. This is done to cause as little as possible stress on the elephants as there is no smell left of the hunted elephant or its remains. Elephant gets stressed seriously when bones and skin is left at the site!

VOLUNTARY DEVELOPMENTS /INVESTMENTS

- COMMUNITY INVESTMENT – We donate school stationary supplies for the local school through the SCI Blue Bag system in the amount of **N$54,000** per annum, buy uniforms for community game scouts and community camp staff to the value of **N$84,500**.
  We donate the trophy hunting camp which was built at a cost of **N$994,280** after a three-year period, back to the community and lease it from them so they can generate a monthly income from the trophy hunting camp. All maintenance is done by the Trophy Hunting Operator. The trophy hunting camp consist of 4 x client tents, dining area, kitchen tent, and 5 staff tents to the community.

The Daily Rent paid to the community in the Trophy Hunting Camp is **N$350** per person per day visiting.

- WILDLIFE WATER POINT DEVELOPMENT - Drilling and maintaining of the boreholes in the concession to establish Permanent Wildlife Water Points is a crucial part of the concession development as water allows the elephants to become resident in the concession compared to the previous yearly migration into the concession when the natural pans fill up with water during the rainy season. After which the elephants move back into Khadoum National Park and Nyae Nyae Conservancy where there is Permanent Wildlife Water Points.

  Currently 4 PWWP's (Permanent Wildlife Water Point's) have been established at a cost of **N$905,131** in the N#a Jaqna Concession Block.

  Installation of solar pump for water supply to the community members is also a crucial part of the community development program. Community members feel they are rewarded by the Conservation Developments when they receive fresh clean drinking water at their villages. This results in Wildlife Water Points being left alone and not damaged or settled around them, which chases the game away. **Attachment 1 – Wildlife Water Point Development Schedule**

- COMMUNITY EMPLOYMENT - We permanently employ 5 Community Members as Camp Staff, and 10-20 community members as Casual labor in the concession. The Casual Workers are employed 10 months per year to open roads in the concession, open the concession boundaries (Cutlines), and to skin elephants when hunted. The Permanent Staff gets a basic salary of N$2,000 per month which totals to **N$120,000** per annum.
  The Casual workers get a monthly salary of N$1,350 per month. On average **N$180,000** salary is paid per annum to Casual Workers who are community members, which is a great inflow of funds in the poor community.

- ANTI POACHING PROGRAM – Establishment of Wildlife Water Points is the first and most crucial development in the concession so that existing game becomes resident in the concession! After Permanent Wildlife Water Points (PWWP's) are established we start our Anti-Poaching program to protect the PWWP Equipment as well as the existing game. Currently all personnel are utilized as anti-poaching staff when no safaris take place. Community Game Scouts are on permanent anti-poaching patrols. Equipment and funding remain the biggest challenges as equipment is expensive.

  A serious Anti-Poaching program is needed. Funding major constraint, as Operator is spending every possible cent in the development of Wildlife Water Points. The idea is to establish the wildlife water points first so that there is permanent water in the concession, then start with an intensive Anti-poaching program. Mobility is a serious constraint in the anti-poaching effort as the area is

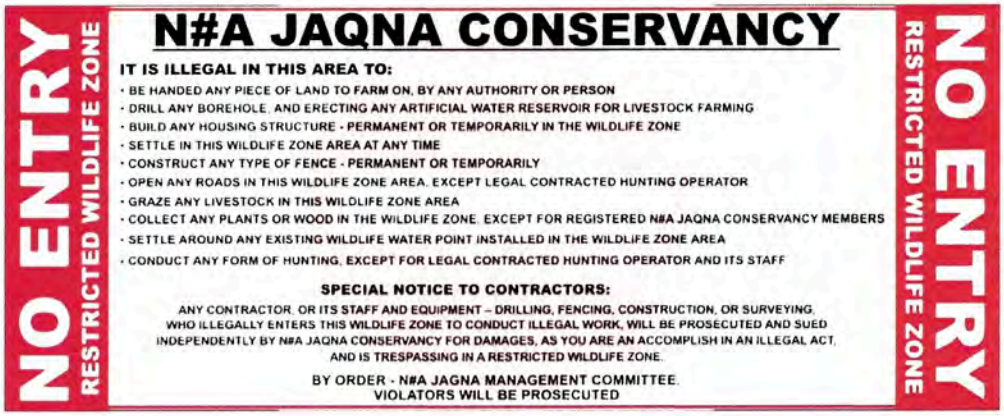
2,25 million acres big. In order to cover the concession properly four-wheeler quad bikes are needed, as well as several anti-poaching bases especially on the northern, and southern borders of the concession area, and radio communication equipment.

Now funding is done from Operators personal funds, and some small donations by hunters. We applied for a Grant from the DSCF (Dallas Safari Club Foundation) and will hopefully receive much needed funds to run a proper anti-poaching and PWWP establishment program. However, our Guides move around a lot in the area, visiting villages, and water holes to discourage poaching. With very positive results as much more game is visible since we got the concession in 2016, because of a higher visibility in the concession, hence less poaching.

However Solar Panels have been stolen by poachers on horseback on our southern border. Which means they come in from our neighboring Ondjou Conservancy as the San people are nomads without horses and livestock. To prevent any further theft, we installed trail cameras powered by a solar panel, and put up 12 feet high on a steel post with barbed wire around the pole preventing thieves to climb up the pole to destroy the cameras. It is small communities, so it will be easy to catch the perpetrator once we have their photos taken!

This area could be a dream concession if funding is available to drill for more water holes, open roads to be able to run an intensive anti-poaching program, and re-introduce game species shot out by the previous SA Army, neighboring and local poachers, i.e. red hartebeest, springbuck, Burchell's zebra, roan, sable, blue wildebeest, and warthog occurred in herds of thousands with none left today.

- NO ENTRY SIGNS



SIGN PERMISSION LETTER

Thormahlen & Cochran Safaris asked for permission to put up NO ENTRY signs at strategic positions to stop illegal land grabbing, and illegal drilling in the concession.

Approval was given by the N#a Jaqna Conservancy Management Committee and the first phase of the signs project is nearly completed. The first phase will be completed in 2019, and the secondary phase will be completed partly in 2019, and finally in 2020 due to the excessive logistics to put the signs up over the whole concession, the and the huge cost of the signs

December 5, 2017

The Chairperson
Me. Sarah Sungu
Conservancy Management Committee
N#a Jagna Conservancy
Mangetti Dune

Dear Sir/Madam

RE: LETTER-CHANGE OF CURRENT "NO ENTRY" SIGNS WORDING

We refer to the meeting held between N#a Jagna Management Committee and Trophy Hunting Operator Thormahlen & Cochran Safaris Namibia Pty Ltd on 1 December, 2017 at the N#a Jagna Conservancy Office at Mangetti Dune.

During our meeting the current NO ENTRY Signs placed at Border Cutlines entry points between Nohma and Nyae Nyae conservancy, were discussed. The Nyae Nyae conservancy as well as the Nohma San Community raised their concern regarding the NO ENTRY signs as they felt that the purpose was to keep San people from these two communities out of the N#a Jagna conservancy.

Thormahlen & Cochran explained in detail that the signs were placed to safeguard the conservancy Wildlife Areas land from the possibility of people from outside the San community illegally entering and building houses, or fencing the Wildlife areas due to the new roads and borders being opened. The N#a Jagna Management Committee

The N#a Jagna management Committee agreed with the Trophy Hunting Operator that this is a big threat considering the illegal land grabbing going on in the Conservancy. It was agreed that additional information will b added onto the existing NO ENTRY signs so that the San communities can feel free to move into and out of the areas.

N#a Jagna Conservancy Management Committee undertook to meet and decide on the additional information's wording, and that the Management Committee will inform Thormahlen & Cochran Safaris Namibia accordingly so that the correct sign information can be added by the Trophy Hunting Operator.

Thormahlen & Cochran Safaris will pay for the additional information needed to be added to the current NO ENTRY Signs, as well as the installation thereof.

We trust that our request will be looked at favorably for both the N#a Jagna Conservancy community, as well as the Trophy Hunting Operator of N#a Jagna Conservancy.

Thank you

Peter Thormahlen
CEO-Thormählen & Cochran Safaris Namibia Pty Ltd

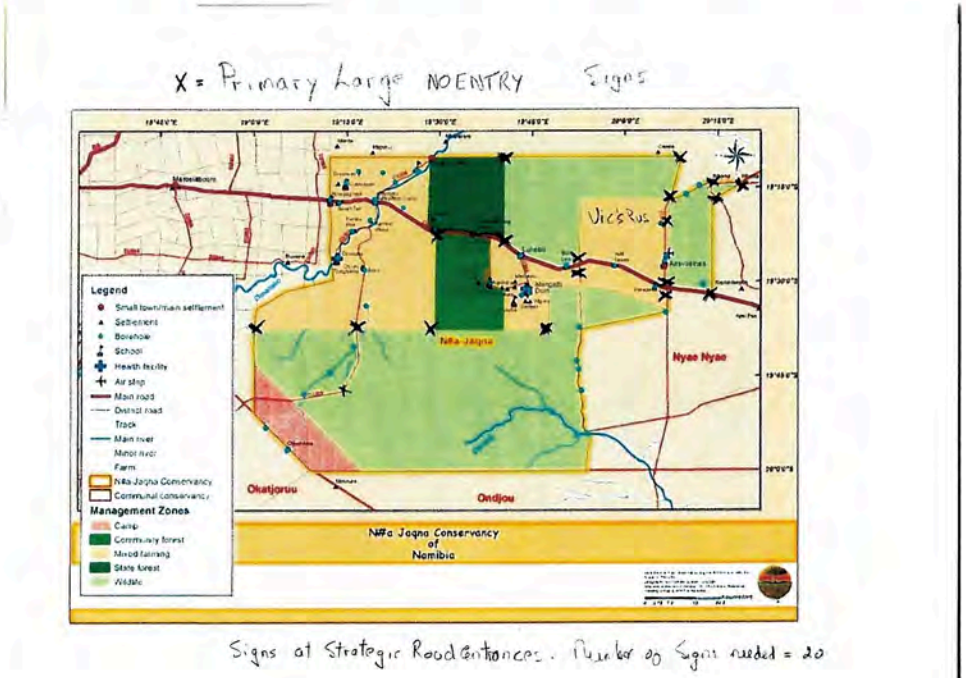
PRIMARY SIGNS

In order to stop the illegal settling and land grabbing of land in the Wildlife Zones of the N#a Jaqna Conservancy, Thormahlen & Cochran Safaris designed NO ENTRY signs with the written permission of the N#a Jaqna Management Committee.

Twenty Primary (Large) Signs will be put up at Strategic points - strategic roads and ploints where illegal land grabbers enter the Wildlife Zones to drop off workers, material, and equipment. It is especially important to have these signs visible so that Drilling Contractors can see them when illegally entering the Wildlife Zones, to illegally drill boreholes for illegal settlers.

A Special Notice on the sign refers to **Drilling Contractors** Illegally entering, and drilling in the Wildlife Zone.

"Ignorance is not an excuse to break the law", according to our Laws in Namibia.



Signs at Strategic Road Entrances. Number of Signs needed = 20

Thus, by putting the signs at strategic entrances to the Wildlife Zone Areas, there is no excuse for a contractor of any kind, to enter a Wildlife Zone. When the signs are put up, a newspaper is used to establish the date when the sign was erected. No excuse as to when the illegal settlers entered the Wildlife Zone.

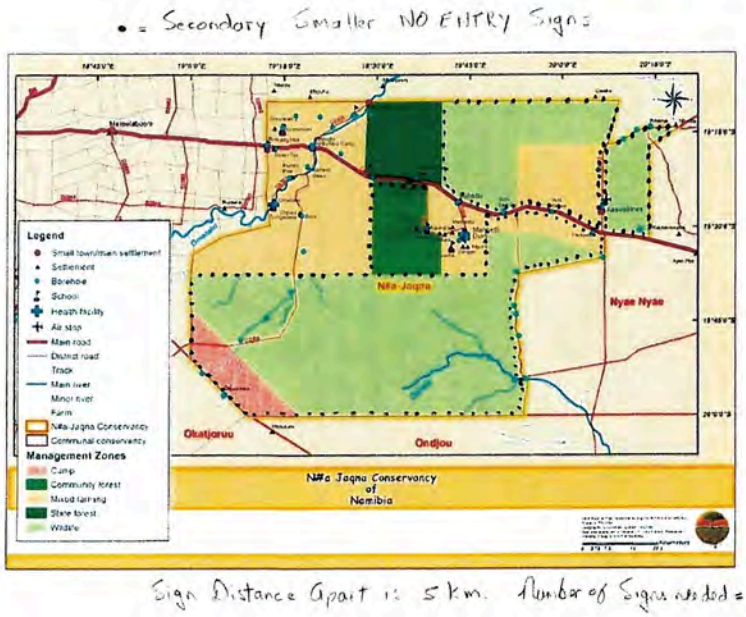
Thormahlen & Cochran Safaris is consulting with Lawyers in Windhoek in order to send a Legal Notice per registered mail, to all Drilling Contractors in Namibia, indicating the Wildlife Zone Areas in N#a Jaqna.

In the event any Drilling Contractor enters a Wildlife Zone to drill, we will get a Court Order against them to prohibit them from drilling boreholes in the Wildlife Zones, as they are obstructing our Contractual Obligation to develop the Wildlife Zones for Game.

It will be much easier, more efficient, and achieve better results, to go after the core of the illegal settling – the Drilling Contractors – than try and evict illegal land grabbers!

SECONDARY SIGNS

In order to have signs visible along all roads and borders of the N#a Jaqna Wildlife Zones, Thormahlen & Cochran Safaris will also erect smaller (Secondary) NO ENTRY signs Five Kilometres apart. Around 150 signs & frames will be needed for this exercise.



Without water no illegal settling can take place, as no one can farm without water for human and livestock!!

Drastic and outside the box measures, and funding, are needed to stop the illegal settling in the N#a Jaqna Conservancy Wildlife Zone.

COST OF CURRENT NO ENTRY SIGNS - 2018

- Invoice 10 x Primary Signs – N$9,890
- Invoice 26 x Secondary Signs – N$11,143.50

TOTAL REPERATION COST – N$83,280

- N#A JAQNA AIRSTRIP REHABILITATION

Thormahlen & Cochran Safaris strive to develop the N#a Jaqna conservancy as much as possible. The N#a Jaqna Airstrip at Mangetti Dune was built by the South African Military during the Bush War period in Namibia. The airstrip is a huge asset, just being neglected, and is worth millions of Namibian Dollars if it had to be built today.

Instead of using the Tsumkwe Airstrip in Nyae Naye Conservancy, we opted to rehabilitate the Mangetti Dune airstrip. The Cost to rehabilitate the Airstrip is huge, but is worth it for us, as we feel that we must fly our clients into the concession where they hunt. The location of the Airstrip close to Mangetti Dune enables us to let clients see and experience the Mangetti Dune community.

We finished clearing the Airstrip, removed all trees and obstacles that gathered over the last 28 years since the end of the war.

AIRSTRIP REHABILITATION COST-2018

- Casual Labor Cost – N$54,000
- Grader Cost – N$6,000
- Vehicle Cost -N$40,000
- Big Game PH Salary Cost – N$50,000
- Steel Wire to fence off Airstrip for Airplane Safety – N$33,000
- Anchor Poles – N$12,000
- Dropper Poles – N$21,700
- Trailer Rental -N$8,500
- Steel Gate – N$1,000
- Windsock -N$3,500
- Windsock steel post -N$1,000
- Cement -N$2,000
- Molopo Tree Poison – N$3,600

TOTAL AIRSTRIP COST – N$236,300

d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city:

Concession Location: Located in the Bushmanland of Namibia.
South of the Kavango Region boundary of Namibia
West of Nyae Nyae Conservancy block
North of Ondjou Conservancy block
Closest Town: Tsumkwe town in Nyae Nyae conservancy
Closest City -Windhoek the capitol of Namibia which is 650 km away.

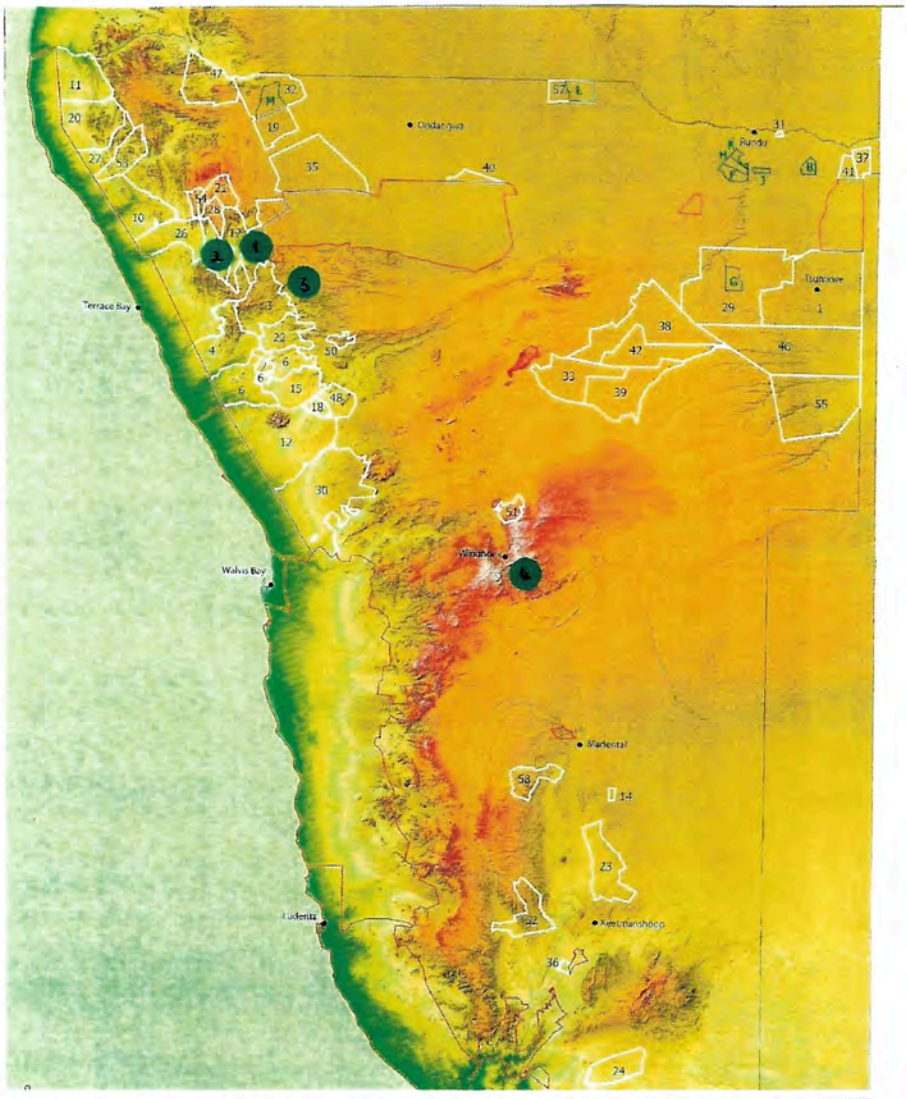
The N#a Jaqna block is number 29 on the below map.



e. If the concession borders a national park, please provide the park name: Concession does not border the Khaudum National Park, but lies 30 km south west of the Park

f. Description of general and distinctive habitat features and any water features:

Habitat:

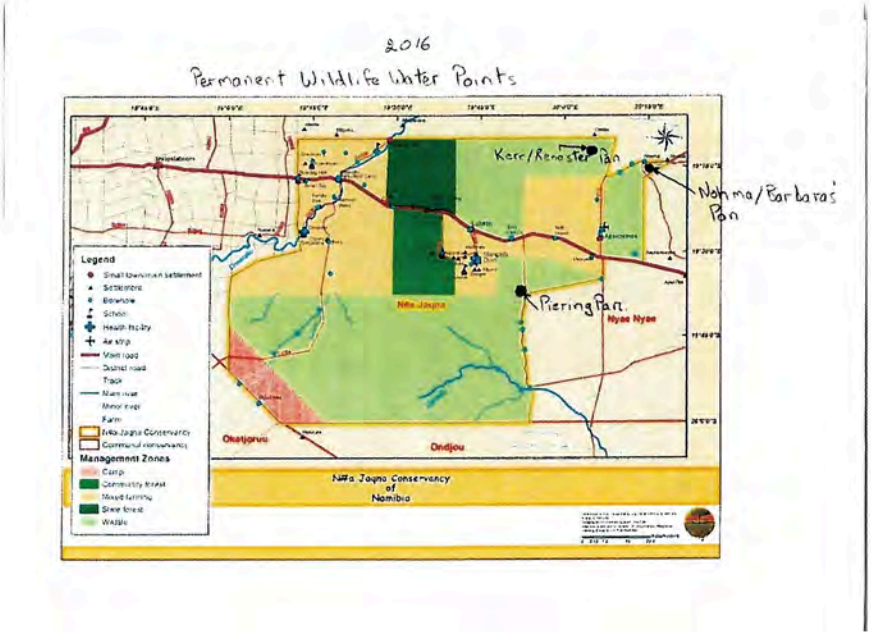
Average annual rainfall of 400-450 mm.

Kalahari sands cover flat landscape of broadleaf and acacia woodland.

Prehistoric dunes formed by Eolic sands blown in from the west coast of Namibia offers excellent habitat of broadleaf trees, yearly grass, rose thorn and raisin bush on the dunes while the area between the dunes ("dune streets") have plenty of climax grass species, black & white thorn acacia, and silverleaf terminalia trees offering a big variety of food for herbivores (browsers) as well as elephant. Some huge grass plains exist in the concession making it the ideal habitat for grass feeding species like springbuck, Burchell zebra, and red hartebeest as well as predators like cheetah which needs open spaces to hunt.

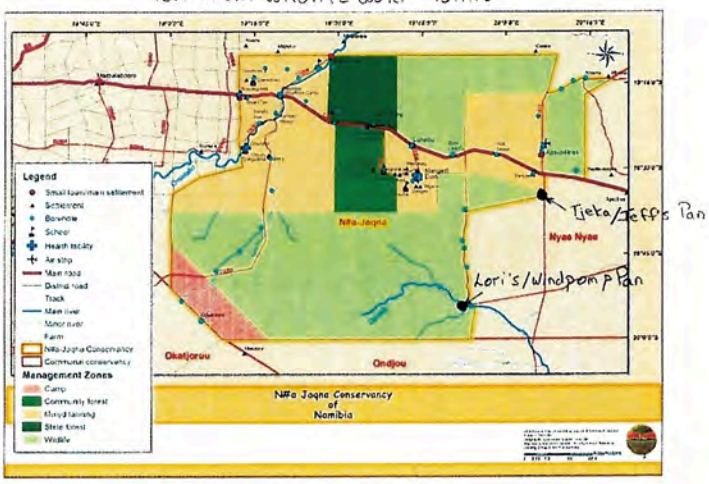
Water Features:

A number of Permanent Wildlife Water points (PWWP's) have been established in the N#a Jaqna Concession Block since 2016 when we started operating in the block.



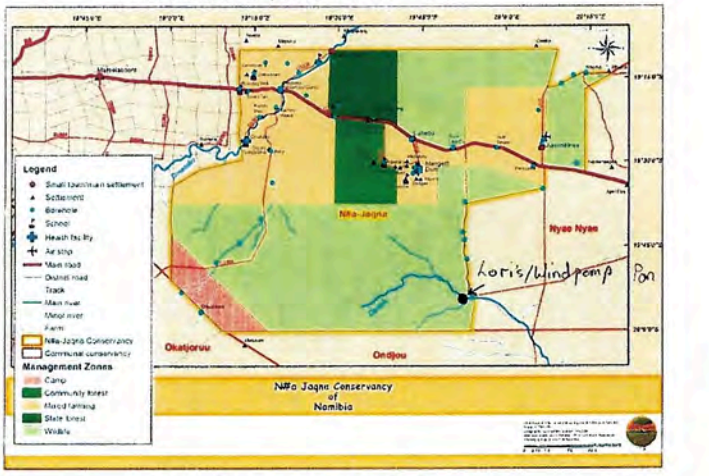
2017

Permanent Wildlife Water Points



2018

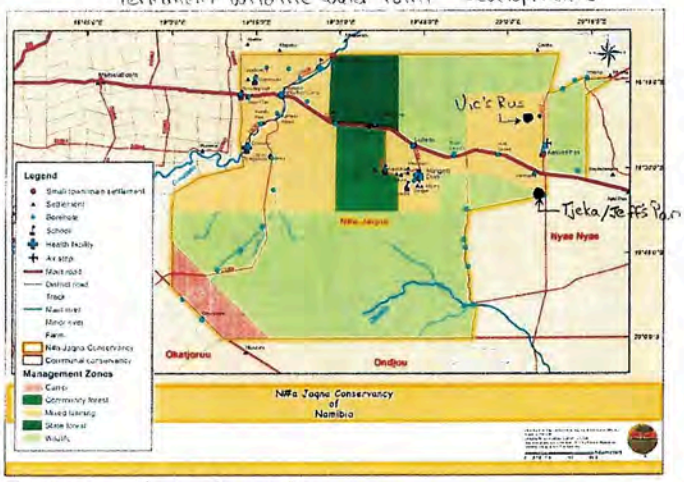
Permanent Wildlife Water Points



Lori's Pan Repaired and Solar System re-installed

2019

Permanent Wildlife Water Point Developments



Jeffs / Tjeka Pan - Cement Dam
Vic's Rus - Solar Pump & Cement Dam

TOTAL WATER DEVELOPMENT COST – 2018

Thormahlen & Cochran Safaris removed the entire Solar Panels and Pump at Lori's Pan and transported it back to Windhoek to be repaired.

Total invested in Wildlife Water Points in 2018 in N#a Jagna Conservancy is:

- Company Vehicle Transportation of Solar's to Windhoek and back – N$19,536
- Repair Cost at Cedar Solar – N$26,000
- Cement Cost – N$1,000
- Casual Labour Cost – N$6,000
- PH Labour Cost – N$11,666
- Steel Pipe, Welding Rods, Grinder blades etc. – N$1,200
- Petrol for Generator Welder– N$4,000
- Trailer Rental -N$13,600

TOTAL COST INCURRED 2018– N$83,002

Total Invested in Wildlife water Points from 2016-2018 in N#a Jaqna Conservancy:
Wildlife Water Point Cost 2016 – N$590,129
Wildlife Water Point Cost 2017 – N$232,000
Wildlife Water Point Cost 2018 – N$83,002
TOTAL COST INCURRED 2016-2018 – N$905,131

3. Are there any communities living in the concession? _X_ Yes __ No
   a. If so, estimated number of people or villages in the concession?

Approximate San (Bushman) Population- 7,000

4. Are there communities bordering this concession? _X_ Yes __ No

   a. If so, estimated number of people or villages around the concession?

Approximate Populations:
Nyae Nyae Conservancy on Eastern border- 2,300 San tribe
Ondjou Conservancy on southern border- 2,000 Otjiherero tribe
Kavango Region on northern border– Cattle Farms -Kavango tribe
Western Border- Cattle Farms – Mostly White Farmers

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	Dense	450-550	Rapidly Upwards due to PWWP (permanent wildlife water point) installations	Trail cameras at Water Points /Game Scout Sightings / Sightings by Hunting Guides / Tracks /MET
Lion	None	None	None	N/A
Leopard	Abundance	112-120 Average territory size is 8,000 ha	Stable	Trail Cams /Tracks/Sightings in Daytime
Cheetah	Sparse	20	Stable over last 3 years. Would like to relocate some cheetah with into the concession with collars when more game is available	Tracks / Sightings
African Wild dog	Dense	22-25	Stable over last 3 years. Would like to collar some Wild Dog when more game is available	Tracks/Sightings on the road and at waterholes
Caracal	Dense	100 +	Stable	Tracks / Sightings
African Wildcat	Dense	100 +	Stable	Tracks / Sightings
Spotted Genet Cat	Dense	100 +	Stable	Tracks / Sightings
Spotted Hyena	Average	30 +	Stable	Tracks / Sightings / Trail Cams

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Brown Hyena	Dense	75 +	Upwards	Tracks / Sightings / Trail Cams
Giraffe	Sparse	4-5	Stable	Tracks/Sightings
Cape Eland	Average	400 +	Upwards	Tracks/Sightings
SG Kudu	Sparse	100	Stable	Tracks/Sightings
Blue Wildebeest	Sparse	20	Stable	Tracks / Game Scouts
Steenbuck	Dense	1,000	Stable	Sightings / Tracks
Common Bush Duiker	Dense	1,000	Stable	Sightings / Tracks
Gemsbuck	Average	400 +	Upwards	Sightings / Tracks
Roan Antelope	Sparse	32 - 37	Upwards – Roan coming in from Nyae Nyae due to PWWP's installed on our Nyae Nyae border	Sightings / Tracks
Porcupine	Abundance	1,000 +	Stable	Sightings / Tracks
Guineafowl	Abundance	1,000 +	Stable	Sightings / Tracks
Francolin	Abundance	2,000 +	Stable	Sightings / Tracks
Doves	Abundance	10,000 +	Stable	Sightings / Tracks

6. Total employment number:

   Permanent Camp Staff – 6

   Casual Workers -20

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	6	2
Trackers	7	1
Anti-poaching scouts/rangers	Scouts -8 / Anti-poaching - 8	8
Other anti-poaching	Anti-poaching Casuals -20	20

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? _X_ Yes __ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution

Communities gets 100% of money contributed by Hunters for non-exportable game (Own Use Quota). The Donation for a Non-Exportable elephant is US$15,000 of which US$3,500 goes to the community, and the rest is used to establish PWWP's in the concession as wildlife water points is our primary development goal. Without water the concession is just a "Green Desert" because all surface water seeps into the sandy soil. Two non-exportable elephant is on quota yearly. The Communal fee is a contractual fee.

Our clientele is primarily USA citizens who donate SCI Blue Bags with school stationary supplies. Each hunter hunting in the conservancy donates between one and two SCI Blue bags with school stationary at a value of US$200 each bag. Hence a minimum of 5-10 SCI Blue Bags is donated at a value of N$13,500 to N$27,000. The SCI Blue Bag donations is a Voluntary fee.

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

c. Does the company provide game meat to nearby communities? _X_ Yes __ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:

All the meat from trophy animals hunted, as well as the two Own Use Elephants on quota, must be delivered to community villages in the concession within 24 hours. The Conservancy Management Committee hands the trophy hunting operator a list of villages that need to get meat. Every villages have a representative that has to sign for the meat when delivered.

This is an Obligation stipulated in the Trophy Hunting Agreement. Failure to do so is punishable with a fine of N$22 per kilogram of the average carcass weight of the different animals. Failure to pay the fine is a breech of contract with immediate suspension.

Meat Value – N$:
Elephant x 4 @ 4,500 kg carcass weight @ N$22 / kg = N$396,000
Eland x 1 @ 350 kg carcass weight @ N$22 /kg = N$7,700
Gemsbuck x 2 @ 100 kg carcass weight @ N$22 = N$4,400
Warthog x 1 @ 30 kg carcass weight @ N$22 /kg = N$660
Steenbuck x 4 @ 7 kg carcass weight @ N$22 /kg = N$616
Duiker x 2 @ 10 kg carcass weight @ N$22 / kg =N$440
Total Annual Meat Value = N$409,816.00

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.

Very little fields in the concession area. Up till now no PAC animals declared.

The N#a Jaqna Concession block is not a horticulture area, and very little crops are raised. Mainly cattle, goats, donkey, and horses are raised by community members.

When an elephant damages any property, problem elephant situations are raised by the local community and it is addressed with the Chairman of the Community. The chairman then reached out to the Minister of Environmental and Tourism, who investigates the Wildlife Human conflict, and approves the problem animal permit in writing when enough evidence is collected by the Ministry. The Chairman then reached out to the Hunting Operator to provide a client. If a suitable client is found, there is a certain time limit to hunt the animal and the permit will be issued with the client's details.

The Operator must pay the community a predetermined contractual fee for the problem animal, and the meat has to be distributed to villages on the meat delivery list as per contract

f. Please describe any consolation payments made to residents damaged by game species. What currency are the expenditures reported in?

No consolation payments made to residents as the only cattle in the concession is owned by illegal landgrabbers. Court eviction case was won by the Conservancy in November 2017, some of the illegal farmers left, but some is still hanging in there. Any damages on livestock is welcomed by the San community in the concession.

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant	N/A

EXECUTIVE INVESTMENT / COST SUMMARY

TOTAL SALARIES & TRAINING COST- 2018

Thormahlen & Cochran Safaris spent the following amounts on training and labour in 2018:

- **Training of Camp Staff-N$75,500**
- **Camp Staff Salaries – N$120,000**
- **Casual Labour Salaries – N$108,000**
- **TOTAL COST – N$303,000**

TOTAL WATER DEVELOPMENT COST – 2018

Thormahlen & Cochran Safaris removed the entire Solar Panels and Pump at Lori's Pan and transported it back to Windhoek to be repaired.

Total invested in Wildlife Water Points in 2018 in N#a Jagna Conservancy is:

- Company Vehicle Transportation of Solar's to Windhoek and back – N$19,536
- Repair Cost at Cedar Solar – N$26,000
- Cement Cost – N$1,000
- Casual Labour Cost – N$6,000
- PH Labour Cost – N$11,666
- Steel Pipe, Welding Rods, Grinder blades etc. – N$1,200

- Petrol for Generator Welder– N$4,000
- Trailer Rental -N$13,600

TOTAL COST INCURRED – N$83,002

Total Invested in Wildlife water Points from 2016-2018 in N#a Jaqna Conservancy:
Wildlife Water Point Cost 2016 – N$590,129
Wildlife Water Point Cost 2017 – N$232,000
Wildlife Water Point Cost 2018 – N$83,002
TOTAL COST INCURRED 2016-2018 – N$905,131

Proposed Wildlife Water Point Investment on Tender:
Wildlife Water Point Cost Proposed 2016 -N$200,000
Wildlife Water Point Cost Proposed 2017 -N$250,000
Wildlife Water Point Cost Proposed 2018 -N$250,000
TOTAL PROPOSED WWP COST – N$700,000
(WWP-Wildlife Water Point)
This leaves us with a credit balance of N$204,631 compared to our proposed goal of N$700,000 in the first three years.

"NO ENTRY" SIGNS COST - 2018

- Invoice 10 x Primary Signs – N$9,890
- Invoice 26 x Secondary Signs – N$11,143.50
- Cost of Steel for 36 x Frames @ N$955 ea – N$35,820
- Welding Rods @ 5 kg -N$600
- Petrol for Generator to weld @ 200 litre – N$3,200
- Labour to manufacture Frames x 6 days x 2 staff @ N$75 ea pd – N$900
- Labour to manufacture Frames by Guide C Joubert @ N$500 pd – N$3,000
- Cement x 10 bags @ N$100 – N$1,000
- Staff Labour to put up signs x 5 days x 2 staff @ N$75 pd ea – N$750
- Guide C Joubert Labour to put up signs x 5 days @ N$500 pd -N$2,500
- Vehicle to put up signs x 1,500 km @ N$6 per km -N$9,000

TOTAL COST TO PUT UP CURRENT SIGNS – N$77,803

PROJECTED COST OF FUTURE NO ENTRY SIGNS

- Invoice 10 x Primary Signs – N$9,890
- Invoice 130 x Secondary Signs – N$55,717.5
- Cost of Steel for 130 x Frames @ N$955 ea – N$129,350
- Welding Rods @ 25 kg -N$3,000
- Petrol for Generator to weld @ 1,000 litre – N$16,000
- Labour to manufacture Frames x 21 days x 2 staff @ N$75 ea pd – N$3,150

- Labour to manufacture Frames by Guide C Joubert @ N$500 pd – N$10,500
- Cement x 50 bags @ N$100 – N$5,000
- Staff Labour to put up signs x 25 days x 2 staff @ N$75 pd ea – N$3,750
- Guide C Joubert Labour to put up signs x 25 days @ N$500 pd -N$12,500
- Vehicle to put up signs x 2,500 km @ N$6 per km -N$15,000

TOTAL PROJECTED COST TO PUT UP FUTURE SIGNS – N$263,857.50

CAMP DINING AREA REPARATION COST

- Thatching Grass – N$25,000
- Vehicle Cost -N$6,480
- Trailer Rental Cost – N$6,800
- Thatching Cost – N$3,000
- Thatcher Salary -N$4,500
- Casual Workers' Salaries -N$22,500
- PH Salary -N$15,000

TOTAL REPERATION COST – N$83,280

N#A JAQNA AIRSTRIP REHABILITATION COST

- Casual Labor Cost – N$54,000
- Grader Cost – N$6,000
- Vehicle Cost -N$40,000
- Big Game PH Salary Cost – N$50,000
- Steel Wire to fence off Airstrip for Airplane Safety – N$33,000
- Anchor Poles – N$12,000
- Dropper Poles – N$21,700
- Trailer Rental -N$8,500
- Steel Gate – N$1,000
- Windsock -N$3,500
- Windsock steel post -N$1,000
- Cement -N$2,000
- Molopo Tree Poison – N$3,600

TOTAL AIRSTRIP COST – N$236,300

TOTAL DEVELOPMENT / INVESTMENT COST - 2018

TOTAL INVESTMENT - N$783,385

was invested in N#a Jagna conservancy in 2018 in order to develop the previously marginal concession into a prime trophy hunting concession.

We saw the potential and took the risk to invest an enormous amount of money, time, and labor into the concession in 2016. Something no trophy hunting operator was willing to do in the last 11 years prior to us getting involved. And it is paying off as huge amounts of game is moving into the area!!

- Wildlife water points x 5 are now operational with Solar Pumps Installed.
- Cutline's of over 50 km were made.
- An additional 40 km of Hunting Roads were cleared.
- A super luxury Trophy hunting camp was built.
- Camp is fully Operational.

With five San community members trained to run and manage

11. How many U.S. clients did the company have in the past three years, and what percentage of the company's clients were from the U.S.?

We operate in South Africa and Namibia, and the figures below, is for the whole operation. In N#a Jaqna we only hunt what is allocated on quota, and it is fixed by the Government. The Namibian Government, specifically the Minister of Environment and Tourism, set strict quotas at the beginning of every three years, revising it at the end of each year when the Hunting operator must submit a Hunting Report on that specific year. So, before the client arrives, the hunting operator must take out a hunting permit – and this is only available if it falls within the quota that was pre-approved.

Current N#a Jaqna Trophy quota: 2 x trophy elephant, 2 x own use elephant, 4 x Steenbuck, 3 x leopard, 2 x Oryx, 1 x warthog. 1 x duiker.

The table below is for the total of Thormahlen & Cochran's concessions:

	Hunting elephant	Hunting lion	Hunting leopard	Hunting all other species
Number of U.S. clients	2015: 4 clients 2016: 9 2017: 5 2018: 4	2015: 2016: 2017: 2018: 1	2015: 2 clients 2016: 9 2017: 9 2018: 10	2015: 126 clients 2016: 110 2017: 141 2018: 83
Percentage of U.S. clients	2015: 99 % 2016: 98 % 2017: 100 % 2018: 98 %	2015: 2016: 2017: 2018: 100 %	2015: 100 % 2016: 98 % 2017: 99 % 2018: 100 %	2015: 95 % 2016: 96 % 2017: 97 % 2018: 95 %
Trophy fees paid by U.S. clients – US$	2015: $220,000 2016: $495,000 2017: $275,000 2018: $260,000	2015: 2016: 2017: 2018: $75,000	2015: $42,000 2016: $225,000 2017: $256,000 2018: $265,000	2015: $303,715 2016: $1,075,000 2017: $997,375 2018: $410,110

12. Dollar amount and percentage of the company's revenue from U.S. clients:

    95 %

13. Other information: Please provide a narrative of other enhancement information about the company, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes, restocking), management activities, research, etc.

    ENHANCEMENT INFORMATION

    Hunting Policies:

    Elephant – Our Company policy is to hunt only bulls older than 55 years of age. We work hard not to hunt elephant under 50 years of age, irrespective if it is a Trophy Bull, or Own Use bulls. We would like to change the Own Use bulls on quota to Trophy Bulls as it is financially much more lucrative for both the community and the hunting Operator. At the moment Own Use Bulls is hunted with no payment towards the community. All monies made from the Own Use Bulls is invested back into the hunting concession by the operator for the instalment of Wildlife Water Points. Hunting post productive bulls ensures that the breeding is not disturbed and enhances trophy quality.

    We follow the Aging Policy adopted and used with great success by the APNR - Association of Private Nature Reserves which is the Private Reserves adjacent of the Kruger National Park. The APNR uses the Aging Policy of the Kruger National Park in South Africa with great success and accuracy to determine tusk weight and bull age.

    Leopard – Our Outfit policy is to hunt male leopard of only 8 years and older, with a minimum year boundary of 6 years of age. This ensures that the breeding males can breed till they are 8 years old, without any disturbance. It works well as our trophy quality in the N#a Jagna Conservancy is improving every year as we adopted this policy since we started in the concession in 2016. We also see much more big cats in the concession as it seems that by taking out the old males it gives the breeding males more freedom and less competition from post productive males.

    Resting Areas

    There are two huge areas in the center north and south of the concession that has no roads and is used as resting / breeding areas. The concern however is that these two areas are used by poachers to operate from. We decided to open roads in these two areas, however conduct no hunting in these two areas, yet do anti-poaching patrols to keep poachers at bay.

CONCESSION IMPROVEMENTS

Trophy Hunting Camp

Please see the Annual Report for a detailed cost outlay of the Trophy Hunting Camp built, and donated back to the community after the third year, so the community can lease it to us to create a yearly income from the asset.

Airstrip

There are 2 Military Airstrips in the N#a Jagna Conservancy, which was used by the South African Defense Force in the 80's – ONE AT the main village Mangetti Dune, and the second at another small village called Aasvoelnes. The Trophy Hunting Camp is located 19 kilometers from the airstrip at Mangetti Dune. We opened the airstrip , got permission to fence it off from the Traditional Authority, and graded it so we can charter our clients to this strip. Previously we are used the Tsumkwe airstrip in Nyae Nyae conservancy which is 70 km from the trophy hunting camp.

Roads

Please see Annual Report for Roads opened, and Cutlines (borders) opened between N#a Jagna Conservancy and Nyae Nyae Conservancies

Wildlife Water Points

Please see annual report for detailed outlay of Wildlife Water points installed in the concession.

Anti-Poaching Program

The N#a Jagna Conservancy Concession was a "green desert" up until we started operating in it. It was even advertised for closed bidding by the WWF as a "marginal" concession, with lot of challenges, i.e. illegal landgrabbers, illegal fencing, and no very limited water holes in the concession. The previous operator called "Eden Safaris", did nothing in the concession for 11 years it operated in the concession.

When we won the bid for the concession, we used own funds and drilled 2 strategic boreholes on the border with Nyae Nyae and the Kavango region. Within 10 months we had two resident herds of elephant and lots of other game – please see Annual Report for detailed outlay and maps. We also installed solar pumps at three existing boreholes to supply a constant supply of water which is very important to get game to become resident in the concession.

Our enhanced activity in the concession is deterring poachers at the moment, yet we see more and more horse and dog tracks as the poachers is entering from the neighboring Ondjou Conservancy, which is also one of our concessions we acquired at the beginning of this year! So we will have to start a very well-coordinated and managed anti-poaching program ASAP in both concessions. At the moment we use 20 casual workers to clear roads, and the same xasuals work as an anti -poaching squad during December, January and February while the season is closed (December & January), and in February we are still at the USA Hunting Conventions.

Our biggest constraint is funding! This concession is a pristine area of 2,25 million acres with the Wildlife Area being at least 750,000 acres big. The lack of funds is a big problem. We have approached SCI but they said they don't finance such programs. I am currently working on completing a Concession Grant Request to submit to DSCF- Dallas safari Club Foundation in the hope that we can get a grant to install more water points, open roads, and re-introduce game species so much needed by the San Community.

Up until then all our efforts are self-financed with contributions from hunters.

Restocking of Game

During the eighties locals, as well as white Namibian hunters say that Springbuck, Red Hartebeest, Warthog, Blue Wildebeest, Southern Impala, Ostrich, Eland, Tsessebe, Gemsbuck, Kudu, Giraffe, even Sable, and Roan occurred through the whole area in herds of hundreds and thousands. Today there are only eland, gemsbuck, and kudu left. We will have to re-introduce the species wiped out!

For that we need assistance with financing!

COMMUNITY UPLIFTMENT

SCI Blue Bag Donations

Thormahlen & Cochran Safaris prides ourselves that we motivate our clients to donate a " SCI Blue Bag" full of school stationary worth US$200 at a local school in the communal areas. Last year we donated around 70 blue bags at schools.

Food for School Children

Poverty in the Communal Areas is a way of live. It is disturbing to see school children who only get one meal a day at the school, consisting of grits and soya sauce. We have clients who donate funds towards the purchase of maize meal and soya sauce which we donate at the local schools so the children can be fed.

Meat Delivery

We pride ourselves that we deliver all meat, and intestines of all hunted animals within 24 hours to the list of villages supplied by the Management Committee. Even the remotest villages is served with meat to ensure that the community benefits from the hunted animals.

MANAGEMENT ACTIVITIES

RESEARCH

African Wild Dogs

There are around 22-25 African Wild Dogs in the N#a Jagna concession. We would like to put satellite collars on some of the dogs to be able to monitor their movement in the area. They are critically endangered as a species, and we would like to assist in securing their future by constantly monitoring them in our concession area. This will provide valuable research information as to their hunting success, and movement in the concession area.

Cheetah

A very small number of cheetah is present in the concession area. After securing the Wildlife Water Points; when re-located game species numbers are high enough, we would like to release cheetahs in the concession area. Some of the cheetah will also get satellite tracking collars to monitor and study their progress.

14. I declare that the foregoing is true and correct.

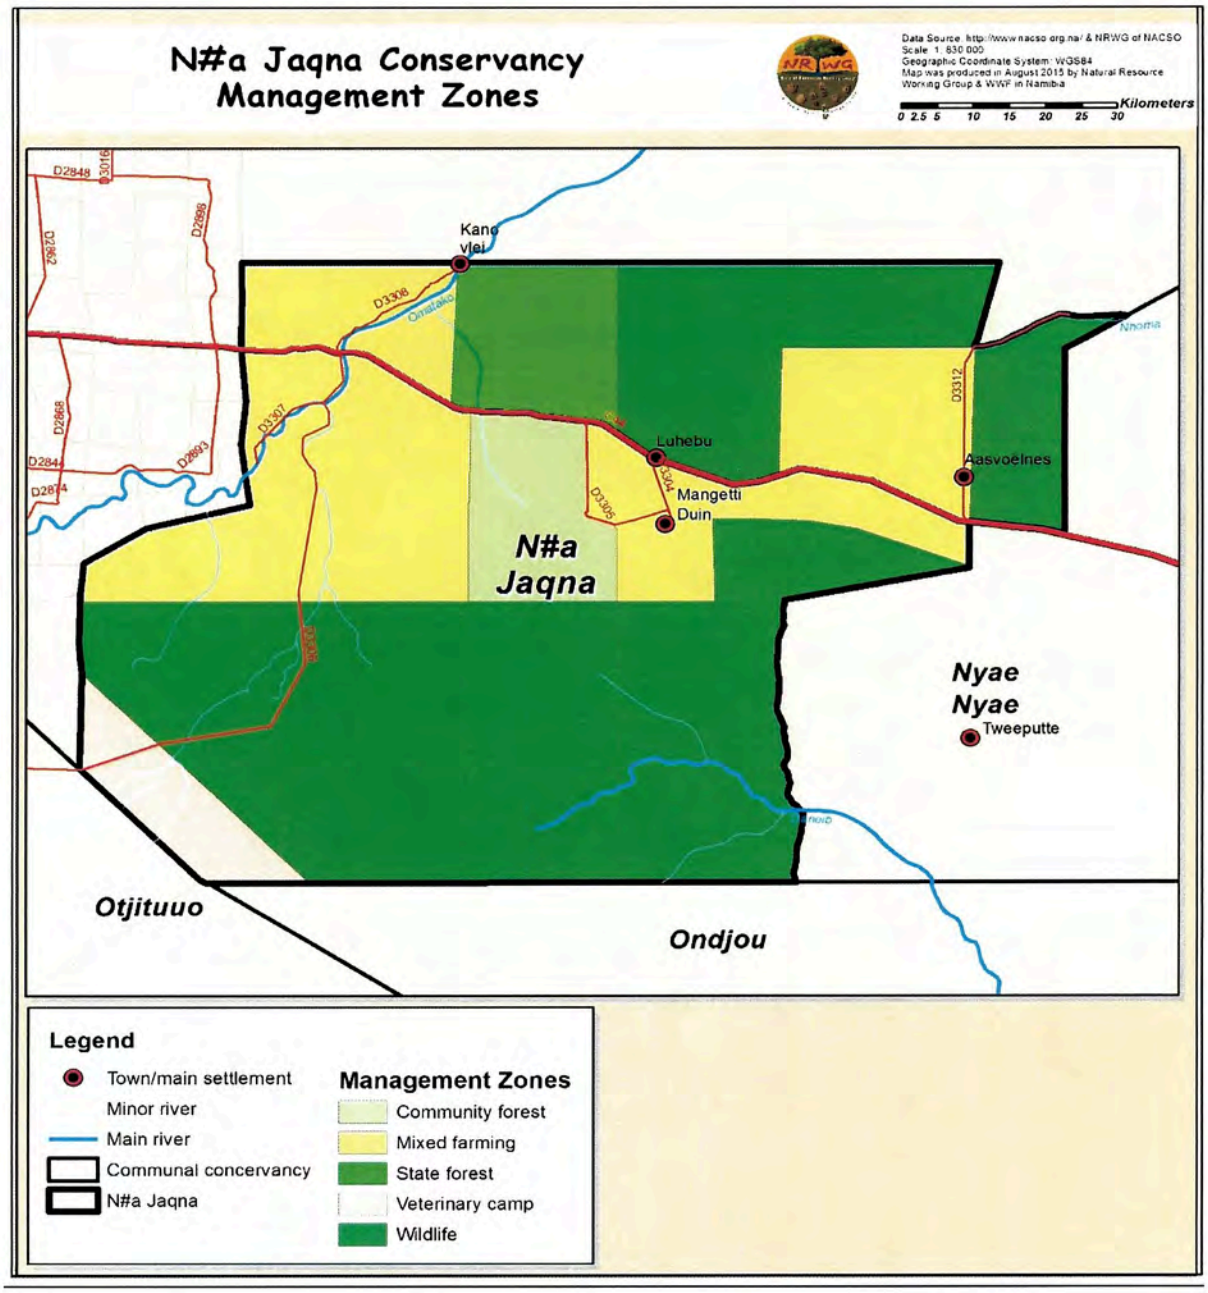
Signature:

Name: **Peter Thormahlen** Title: **Mr**

ATTACHMENT – 1 - Wildlife Water Point Development Schedule

1 **SCHEDULE 4**

Pledged activities and development;



2 **SCHEDULE 4**

Pledged activities and development;

Thormahlen & Cochran shall carry out all the items as stated in the Proposal to Na Jaqna for the first phase of the first three (3) years of the contract and attached as part of this agreement.

1. **TROPHY HUNTING CAMP**

T&C Safaris will build a Trophy Hunting Camp in N#a Jagna conservancy to Operate from. This camp will be built after an intensive study of the concession area keeping in mind water availability, impact on the concession, accessibility to hunting camp, distance from conservancy office etc. As well as recommendations from the N#a Jagna conservancy committee.

The Trophy Hunting Camp's permanent Structures will become the property of the Conservancy after the 3 year period expired.

2. **WILDLIFE WATER POINTS**

Please see Attached Map of N#a Jagna Conservancy.

The Wildlife Area of the concession was divided in three Zones:

- Block A
- Block B
- Block C

The Tender period is three years. Although it is understandable why an initial 3 year period is granted by the MET and WWF, it puts a lot of challenges in the road for a proper development program. The period is just too short for an operator to invest capital and to recover it before the tender period expires. On the other hand if the operator takes his chance and develops the conservancy as it should be developed, then I assume that his lease will be extended giving the opportunity to get the capital investment back over time. And hopefully the trophy quota will be raised due to more elephant in the concession which allows for more income and profits allowing capital investment to be recovered.

However given the limitations T&C Safaris proposes the following development plan:

BLOCK A

PHASE 1

Year One of Tender - 2016

Development of Block A would take part first as there are boreholes already in this block, but they are not in working order. It is also the block that borders Nyae Nyae conservancy which gives us the biggest opportunity to attract elephant into N#a Jagna, and to get them to become resident over time.

- Four existing Boreholes marked **+1, +2, +3, +4** on the Map in Block A will be cleaned out and Solar pumps installed with a watering hole. Two holes on the eastern border of N#a Jagna**(+1, +2)** bordering Nyae Nyae, and two boreholes in the western side of Block A **(+3, +4).** We budget on N$50,000 per solar pump and panels if the boreholes still have water and just need to be repaired and a solar pump and watering hole installed. If boreholes are dry we will still invest the N$200,000 for the year by drilling waterholes close to the old ones and installing solar pumps. **Reason being that + waterholes are located in river beds which are natural feeding areas for migrating elephant bulls. So by installing waterholes here enlarges the chance for migrating elephant bulls to smell the water while feeding in the riverine area so that they can discover the watering holes, use them and get used to them being permanent.**
- **Hence a Total of N$200,000 for 2016 will be invested**

PHASE 2

Year Two of Tender – 2017

- During this Phase Two strategic waterholes will be drilled in Block A. Depending on where the most elephant activity is the two holes will be drilled and solar pumps and watering holes installed. Our budget is N$125,000 per waterhole. Possibilities are Numbers **1, 2, or 3** on the map. **Reason being that numbers 1 & 2 is river beds which is natural feeding areas for migrating elephant bulls. So by installing waterholes here enlarges the chance for migrating elephant bulls to smell the water while feeding in the riverine area so that they can discover the watering holes, use them and get used to them being permanent.**
- **Hence a Total of N$250,000 for 2017 will be invested**

PHASE 3

Year Three of Tender – 2018

- During this Phase another Two strategic waterholes will be drilled in Block A. Depending on where the most elephant activity is the two holes will be drilled and solar pumps and watering holes

installed. Our budget is N$125,000 per waterhole. Possibilities are Numbers **4, 5, or 6** on the map. Number 5 waterhole is once again a riverine area which enhances the chance of elephant to bump into the waterhole. However now we go one step further and install watering holes **4,** and **6** in a "dead" zone where there may never have been even temporary water due to the Kalahari sand. With watering holes **1, 2, 5,** and **+ 3**, and **+ 4** having permanent all year water elephant will start wondering into this previously "dead "zone and back to the watering holes they know –numbers **1, 2, 5**, and **+ 3**, and **+ 4** to drink. Eventually they will discover watering **holes 6**, and **4** and the whole block will start to be utilized by migrating elephant which will over time turn into resident elephant.

- **Hence a Total of N$250,000 for 2017 will be invested**
- We will **drill Boreholes** and **install Solar Pumps** with watering holes – please see Development & Management plan outlay.

- **Transportation** is very important for the community due to the remoteness of the conservancy in the Bushmanland. However Wildlife Water Points is also a very high priority! Thormahlen & Cochran Safaris undertakes to let the N#a Jagna conservancy choose between either the Drilling of boreholes for Wildlife Water points, or a Vehicle in one of the three years. It is a difficult choice because the community may need a vehicle to transport community members, but on the other hand the only way we can develop the trophy hunting concession is by installing wildlife water points to attract elephant and other game into the conservancy.

- However, in the event that MET decides to enlarge the trophy quota, or if a Problem Elephant comes up and we sell it to a hunter, we undertake into buying of **a vehicle** for the conservancy. In the event of **a Problem elephant** we undertake to buy the vehicle in that year with the money made from hunting the bull with a foreign hunter, while we still proceed with the Wildlife Water Point Development & Management Plan. We do not encourage the declaring of a problem elephant just for the sake to buy a vehicle for the community! In the event that an elephant becomes a problem we undertake to use the funds made from the selling of that specific bull to buy a community vehicle.

- If there is a need for **a Satellite Dish & Television**, we undertake to buy a television with Satellite TV for the community hall as recreation, if a Community Hall does exist. If there is no **Nampower** we will also install **a Solar Power system with Batteries** for the community.

- If a **Community Hall** does not exist T&C Safaris undertakes to liaise with the N#a Jagna community into the building of a Community Hall if we are the successful bidder and we get another 2 years extension on the lease, so that we have a Five Year Contract..

- We will **Train and Sponsor the Training** of the members of the community as specified.

- In the event that the community needs **Salt Blocks** for their Cattle & Goats T&C Safaris will buy one ton of Salt Blocks per year for the community cattle.

- Training of the appointed Tracker to become **a Hunting Guide** in Year 3 (hence in October of the second year he will be sent to the hunting academy) of the Contract by sending him to the Volker Gruellmann Hunting Academy. The reason for sending him to the hunting academy in year 3 is for the member to gain hunting experience – on elephant, as well as baiting and hunting of leopard. It will be fruitless to send the member to the hunting academy if he has no trophy hunting experience. T&C Safaris undertakes to utilize the community member Hunting Guide so that he gain experience to become a master Hunting Guide and eventually a PH. With enough experience and if the potential exists the member could eventually qualify as a Big Game PH.

- When the N#a Jagna appointed Tracker qualifies T&C Safaris will appoint another **Tracker** in the community so that a Total of Six community members are permanently employed from year 3 onwards

- **Trophy Hunting Camp** will be built to conduct hunts from. Camp will consist of One Guest tent with en-suite bathroom, one Dining Tent / Lapa, one Kitchen tent, One Manageress / PH tent (tent will be divided in half to accommodate separate rooms), one PH /manageress Bathroom, and Five Staff Tents. A Skinning Area & Salt Room will be built for trophy skins. In the event that the Trophy Hunting Quota is enlarged a Second Guest Tent will be erected. The permanent fixed structures in the trophy hunting camp will become the property of the N#a Jagna community after the 3 year contract expires. In the event that our lease is extended we will negotiate with the community to Pay Rent to the community.

- **Donating of school supplies**. Our foreign hunting clients bring school supplies on a regular basis to Namibia – pencils, rubbers, etc.

3 SCHEDULE 5A

Envisaged Employment and Salaries:

Type of Local Staff To Be Employed	Estimated Number To Be Employed	Estimated Duration of Employment (please specify the number of days.)	Estimated Salary per Time of Employ (days)
Camp Staff- Trainee Chef/Manager-Female	1	365 days/12 months	N$65.75 p day/N$2000 p month
Skinner-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
Tracker-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
Other 1. Camp Attendant-Male	1	365 days/12 months	N$65.75 p day/N$2000 p month
2. Camp Lady -Female	1	365 days/12 months	N$65.75 p day/N$2000 p month
3.			

4 THE OPERATOR SHALL PROIVIDE FOOD TO ALL THE STAFF DURING THE PERIOD WHEN THEY ARE ON DUTY

5 SCHEDULE 5B

Types of training by operator:

Number of Local People to be Trained	Types of Training To Be Provided	Estimated Length of Training	Proposed Training Site	Commencement of training
1	Chef/Manager training	12 months (see below)	Windhoek Politec and in camp	Feb /March 2016
1	Tracker	See below		March 2016
1	Skinner	See below		March 2016
1	Camp Attendant	12 months	In house training	March 2016
1	Camp Lady	12 months	In house training	March 2016

VALID TO:		15 Aug 06.07.18
RECEIPT No.:		5761913

PERMIT TO HUNT FOR TROPHIES

Permission is hereby granted in terms of the Nature Conservation Ordinance 1975 (Ord. 4 of 1975)

Name of Trophy Hunter: A.L. Dement

Residential Address:

Country: U.S.A

To hunt the specified number of game for the sake of trophies:

SPECIES: COMMON NAME	NUMBER	SPECIES: COMMON NAME	NUMBER	SPECIES: COMMON NAME	NUMBER	SPECIES: COMMON NAME	NUMBER
Blesbok		Impala Common		Springbok	—	Other	—
Buffalo		Klipspringer		Steenbok	2X	Jackal	2X
Crocodile		Kudu		Warthog		*Spotted hyena	1X
Dik-Dik		Lechwe		Waterbuck		*Please report back within 48hrs after hunt	
Eland	1X	Oryx (Gemsbok)	2X	Wildebeest, Black			
*Elephant	1X	Ostrich		Wildebeest, Blue	2X		
Giraffe	—	Reedbuck		Zebra Burchell's			
Grey Duiker	2X	Rhinoceros, Black		Zebra Hartmann's			
Hartebeest		Rhinoceros, White		Cheetah			
Hippopotamus		Roan		Leopard			
Impala Black-Faced		Sable		Lion			

On the following farms / hunting concessions / safari / guestfarm: NTA Tsgwi Conservancy

Guided by (name of guides): A.M Albert

Definition of Terms

"Background Study": This refers to the *Background Study for Elephants* prepared under the Ministry of Environment and Tourism's **Transboundary Mammal Project** (Martin 2005).

"Caprivi" and "Caprivi Strip": The word 'Caprivi' is used throughout the Plan to refer to the 'peninsula' of land extending eastwards from the north-eastern corner of Namibia as far as its junction point with Botswana, Zambia and Zimbabwe at the confluence of the Chobe and Zambezi Rivers. The phrase 'Caprivi Strip' is reserved for the narrow 'isthmus' connecting the broader part of the peninsula to the main body of Namibia.

"Population and Subpopulation": In this report, the term subpopulation is loosely used to refer any geographically distinct subdivision of the overall population within a country.

"Kasane Workshop": A workshop was held in Kasane, Botswana on 30th November and 1st December 2002 in which representatives of the Namibian Ministry of Environment and Tourism and the Botswana Department of Wildlife and National Parks participated with the aim of collaboration on joint management issues affecting the buffalo population shared between the two countries. The *Background Study for Southern Savanna Buffalo* (Martin 2002) was presented at the workshop.

"Windhoek Workshop": A workshop was held in Windhoek on 23rd September 2003 in which representatives of the Namibian Ministry of Environment and Tourism and the Botswana Department of Wildlife and National Parks participated with the aim of collaboration on joint management issues affecting roan, sable and tsessebe. The *Background Study* and *Management Plan for Roan, Sable and Tsessebe* (Martin 2003) were presented at the workshop.

ACKNOWLEDGEMENTS

This plan is based on a draft elephant management plan researched, coordinated and prepared for the Ministry of Environment and Tourism (MET) by Rowan Martin in 2005, as part of The Transboundary Mammal Project of the MET, Namibia, facilitated by the Namibia Nature Foundation and the World Wildlife Fund's LIFE Programme.

EXECUTIVE SUMMARY

The status of elephants in the southern African region

The African elephant has achieved huge prominence in global conservation issues in the past 20 years. Few other species are capable of arousing emotions, polarizing viewpoints and causing controversy to the extent that *Loxodonta africana* has done. Within Africa opinions are divided on the subject of elephant management and the situation is no less contentious than in the international arena.

Elephants are classified as *Endangered* in the IUCN Red Data Book. In 1989, rightly or wrongly, the species was listed on Appendix I of CITES and legal trade in ivory was effectively banned. Although the Namibian elephant population was transferred to Appendix II in 1997, conditions attached to the listing have made it almost impossible for ivory to be traded.

In 2002, the population in the whole of Africa was estimated at about a half million elephants. The southern African region holds more than half of this population and, projecting at normal population growth rates, it is likely to be around 350,000 - 400,000 animals in 2007. Clearly, elephants are not threatened in southern Africa and this raises the question whether they can be validly classified as endangered at the continental level.

The largest concentrations of elephant in southern Africa are in a central zone extending across the continent between latitudes 15º - 20º south of the equator (**Map 1**). Within this zone, Botswana and north-western Zimbabwe hold some 250,000 elephants. The rapid expansion of these populations into neighbouring countries is affecting biodiversity and human livelihoods.

The 'elephant problem' is central in initiatives to create transfrontier conservation areas (TFCAs) in the region. The need for elephants to have access to far larger areas than those in which they are currently confined is recognized and, for many, TFCAs are seen as the solution to the increase in elephant populations. Unfortunately, a problematic legacy of national boundaries, coupled with a lack of coherent land-use planning in all of the participating countries including the Kavango-Zambezi (KAZA) TFCA (Angola, Botswana, Namibia, Zambia and Zimbabwe) means that this TFCA will undergo a long and difficult birth. Any respite arising from the increased range is likely to be short lived: at current rates of population increase, elephants will remain overabundant.

It would be highly desirable if a common management approach for elephants could be developed amongst the countries sharing the elephant range. However, the corollary to this is that, in the absence of any agreement with neighbouring countries, it cannot reasonably be expected that Namibia will not undertake management interventions in the best interests of its local peoples and conservation concerns.

The status of elephants in Namibia

Elephants occur across the entire north of Namibia (**Map 2**) with two main sub-populations in the north-east and the north-west. In 2004 the total population was estimated at over 16,000 animals and, allowing for underestimates on aerial surveys, the true number in 2007 is likely to be closer to 20,000.

The north-western population is about 4,000 animals and includes the elephants in Etosha. This appears to be growing at about 3.3% per annum and expanding its range. Elephants are being seen as far south as the Ugab River and in all of the river catchments which flow westwards to the Atlantic Ocean in the north. As yet, the extreme north-western part of the potential range along the Kunene River has not been re-colonized although elephants were present in this area until 1990.

The north-eastern population will probably reach 16,000 animals this year. The recent increases are well in excess of normal growth rates (which are less than 5% per annum) and must be attributed to the migration of the northern Botswana population (which consists of about 160,000 elephants) and the north-western Zimbabwe population of about 90,000 elephants.

The conservation status of elephants in Namibia is more than satisfactory – their numbers already exceed what many would consider desirable for the available habitats and they have been identified as a possible threat to other rare and valuable species which Namibia is trying to conserve. There are no limiting factors preventing an increase in their numbers.

Elephants are classified as *Specially Protected Game* under Namibian law. The original justification for such a listing may well have disappeared. To achieve the objectives of this Management Plan, several revisions to the legal provisions for elephants under Namibian legislation would be desirable.

Under Namibian environmental legislation, management plans are required for species that are rare or valuable and that share boundaries with neighbouring countries. Elephants are not rare but they are potentially valuable and, within multi-species wildlife systems, could provide a financial and economic return that greatly exceeds that possible from alternative land uses. A management plan that treats elephants as a valuable resource could transform the primary land use in northern Namibia.

The issues

In both the north-west and the north-east, conflicts with humans are escalating due to the increase in elephant and human population numbers. The benefits that communities receive from elephants on their land do not come close to compensating them for their losses. Farmers are not free to defend their livelihoods from elephant depredations and the current arrangements for control of problem elephants are too tardy to be effective. A potential threat to elephants is the inception of a wave of illegal hunting or retaliatory shooting by dissatisfied people.

In north-western Namibia, elephant populations have considerable latitude for increasing their range and the situation may not require management interventions for many years. However, in the north-east, the escalating levels of conflict between humans and elephants and the damage to vegetation suggest that the time for action has already been reached.

Initially, the problem in the north-east may appear intractable: the Caprivi, Khaudum and Nyae Nyae areas lie on the periphery of the largest elephant population in Africa. Management interventions carried out in isolation in Namibia will not affect the core elephant populations from where the problems emanate. The huge number of elephants south of the Caprivi presents Namibia with a management challenge: however, notwithstanding any decision by Botswana

and Zimbabwe not to manage their elephants, Namibia should take full advantage of the opportunity presented. The justification is that elephants are causing significant hardships for people and threatening conservation objectives in the north-east.

Namibia's short-term problem is to accommodate the current increase in elephants. However, it is not the long-term solution. Elephants do not regulate their own numbers at levels which maintain savanna woodland habitats – a process which culminates in population crashes. In the long term population reductions may be necessary. In the north-west, the management requirement may simply be to increase the range available to elephants: in north-eastern Namibia not only does the range need to be increased but, in some areas, the population may need to be reduced (**Fig.1** at the end of this Summary).

Technically, there are no good reasons why more land in Namibia should not be available to elephants. The highest valued land uses over most of this arid country (**Map 3**) are those based on management of natural resources. Moreover, the full potential is far from being realized at present due to national and international policy constraints that place wildlife at a competitive disadvantage with land use based on exotic species. Were subsidies to be removed from the domestic livestock industry and were it possible for elephant to play their full economic role in land use systems, it could reasonably be expected that large additional areas of land would be converted to wildlife management in areas where relatively low human densities would enable the co-existence of people and elephants, as elsewhere in the country – for example, parts of the northern Kavango, central northern regions and in the Eastern Caprivi. This would remove the short-term limiting factor of providing additional ranges for elephant.

The technical arguments for greater areas of Namibia to be put over to natural resource management will not, on their own, bring about the needed changes to remove this limiting factor for elephants. It will require a high level of political commitment and the correct suite of incentives to induce landholders (both communal and private) to convert to a land use based primarily on wildlife. The high level of political commitment is already in place. In a speech delivered on 3rd February 2004, His Excellency the Founding President, Dr Sam Nujoma, made the visionary statement that wildlife would be restored throughout the north of Namibia, that ownership of wildlife would be conferred on local peoples and that the economy would be transformed by diversification based on wildlife uses.

For elephants, two factors mitigate against realizing the Founding President's vision. The first is that the full value of elephant commodities (ivory, elephant skin and meat) cannot be realized due to international trading constraints. The second is that elephants in Namibia are effectively State property – which was clearly not the President's intent. These two major disincentives need to be addressed before the conditions for increasing elephant range will be achieved.

Full devolution of rights over elephants to landholders (on both communal and private land) is a prerequisite for creating the incentives to allow elephant populations to expand. It is a necessary but not a sufficient condition. Large areas co-managed between the State and relevant landholders will be necessary to provide viable ranges, to distribute the pressure of elephants on habitats and to allow population increase and expansion.

The Vision Statement developed under the current UNDP/GEF assisted project in Namibia provides for co-operation between stakeholders to achieve this far-sighted concept. Linkages

would be established under a co-management system which would both secure and increase the available range for elephant (**Map 4**).

In the north-east, elephant population reduction may be necessary. However, there are no simple answers to the question of how many elephants need to be removed – either to conserve biological diversity or to reduce conflicts between humans and elephants. The starting premise may be that the option of zero use is not a reality – elephants will be harvested illegally and unsustainably if facile attempts are made to debar their use. These all point towards a need for imaginative and innovative management. The aim should be to avoid routine cropping or culling programmes which attempt to impose constancy on naturally fluctuating ecosystems. The challenge is to make it sustainable, requiring an adaptive management approach.

Combining adaptive management with the arguments for co-management results in a classic situation where the principles of adaptive co-management in complex bio-economic systems need to be applied. The individuals who are most affected by elephants are those living in the north-east: together with the State authorities, they should decide how elephants should be managed.

MANAGEMENT PLAN

A feature of this management plan is just how few actions are needed to bring it to fruition. Success relies on a few administrative masterstrokes which will cost next to nothing – rather than a long list of expensive management activities. It would be as well for MET not to enter any co-management forums with preconceived moral positions on elephant. Having accepted that the solutions to the current 'elephant problem' may lie in innovative management inspired by the values of local people, a *tabula rasa* (or clean slate) is needed to accept with an open mind all options presented.

Vision, Goal, Objectives, Strategy and Actions

The Vision Statement begins with a preambular statement which expresses Namibia's desire to work with neighbouring countries and the international community to enhance the status of elephants, clarifies Namibia's position on elephants and draws attention to the fact that a policy of total protection for elephant will result in their available range being reduced to State protected areas and a decrease in their numbers. In contrast, a policy of sustainable use, as enshrined in the Namibian Constitution, will result in the expansion of the range available to elephants and an increase in their numbers. The goal and objectives then follow.

The **Strategy** consists of five actions which are listed below and shown in **Fig.2** (at the end of this Summary).

(1) **Devolution of authority for landholders, both communal and private, to manage elephants on their land**. This is a prerequisite for co-management institutions to be formed.

GOAL

Namibia wishes to carry the maximum number of elephants that is consistent with the conservation of biological diversity AND the wishes of those primary stakeholders who have elephants on their land

SOCIAL OBJECTIVE

1. **To reduce conflict between elephants and people**
2. **To create conditions under which elephants are a benefit to people**

ECOLOGICAL OBJECTIVE

1. **To increase the range available to elephant**
2. **To conserve biological diversity in State protected areas and promote the conservation of habitats outside State protected areas in the elephant range**

ECONOMIC OBJECTIVE

To enable the full economic potential of elephants to be realized according to the provisions for sustainable use in Namibia's Constitution

(2) **Representations on the location of veterinary control fences**. This is a matter for the Ministry to pursue from the outset of the management plan. The influence of veterinary fences on the current elephant range both in Namibia and in the region is profound. In the vicinity of the Mahango Core Area within Bwabwata National Park, there is a bottleneck caused by the veterinary fences on the southern boundary of the Caprivi and along the international border between Botswana and Namibia, which affects the entire regional range for elephant across the central southern African region (**Map 5**).

(3) **The removal of the CITES constraints affecting Namibia's ability to trade in ivory.** These constraints exert a negative effect on conservation of elephant in Namibia and act as a disincentive to the adoption of wildlife management as a primary form of land use. However, the management plan is worth pursuing even if the full value of elephant products cannot be achieved immediately – there are substantial values to be derived from elephants through tourism and international trophy hunting even if they fall short of the ideal.

(4) **Establish co-management institutions between the State and primary stakeholders.** Namibia's record of an expanding wildlife industry over the past 10 to 20

years is impressive. The present mosaic of parks, conservancies and commercial farms provides a sound foundation for the 'scaling up' of institutions needed for the management of elephant.

The new high-level institutional structure proposed for the State wildlife agency under the MET/UNDP/GEF project is ideally suited to this from a geographical perspective. The new divisions, subdivisions and sections are well matched to the elephant ranges that will require co-management institutions.

(5) **Apply adaptive management principles to the decisions of co-management institutions.** The agenda for co-management institutions would include the setting and allocation of trophy hunting quotas, problem animal control and population reductions.

The realization of the objectives in the Vision Statement should follow sequentially (**Fig.2**). Reduction of elephant populations in the north-east should help to conserve biological diversity; local communities should receive increased benefits from elephants and, hence, conflict will be reduced. With full devolution of rights over elephant, the incentives will be present for the elephant range to increase. The full economic objective will only be achieved when the permanent elephant range has expanded across northern Namibia (**Map 4**) and the last CITES constraints have been removed.

Risks

Given the escalating human-elephant conflict and the extreme modification of habitats in north-eastern Namibia, **the greatest risk to Government's position is to do nothing**. Failure to implement the necessary devolutionary measures and enter into co-management carries the real risk that local people will take matters into their own hands or, worse still, collaborate with illegal hunters from neighbouring countries. Inactivity will not simply result in the *status quo* being maintained. Since the 1970s, elephant populations have collapsed in an apparently inexorable process across Africa and it has occurred where the State has claimed ownership of elephants.

There is little risk that any management interventions could have an adverse effect on the status of elephant populations in Namibia. Populations are expanding and being augmented by migration from Botswana and Zimbabwe. Provided the effects are properly monitored, experiments in management will provide a learning experience.

Finance and Capacity

This management plan differs from other species management plans in that very little funding is required to implement it. The main costs lie in co-ordination and implementation of management activities that arise from co-management decisions. The potential income from elephant management is substantial and should more than cover these costs. Even if the full value of ivory and elephant skin is not achieved, the revenue from tourism and sport hunting will provide some 75% of the amounts required.

If elephant sport hunting were combined with reduction of elephant populations in the north-east, the expected revenue would be some **N$13 million** in the State protected areas (a total of 14,000km^2 including the Caprivi Forest Reserve) which would meet the present budget allocations for the north-east and would meet at least two-thirds of the budgets proposed under the MET/UNDP/GEF project. In the communal lands, the net

income/hectare (**N$8.7**) should more than offset the costs which elephant are presently causing through crop raiding and other damage. These figures do not include the net income of safari operators which would be about N$9.7/ha.

Transboundary Co-operation

Most of the management activities identified for potential co-operation and collaboration between Botswana and Namibia at the Kasane Workshop (2002) and Windhoek Workshop (2003) repeat themselves in this Management Plan.

The desirability of collaboration on elephant management among the countries participating in the KAZA TFCA was stated on the first page of this executive summary. A common approach to hunting quotas, problem animal control and population reductions would have the beneficial effect of not causing elephants to move from one country to another to escape different management regimes. This plan is structured so that the management of elephants on Namibian soil is not dependent on decisions by neighbouring countries: it is, first and foremost, a national plan. However, because it is based on adaptive management, decisions taken in co-management forums could be flexibly adjusted to accommodate collaborative management.

There are strong grounds for forming an alliance among Angola, Botswana, Namibia, Zambia and Zimbabwe specifically aimed at more effective performance in the CITES forum – based on the fundamental premise that all wildlife products should have value and legal trade is beneficial for conservation.

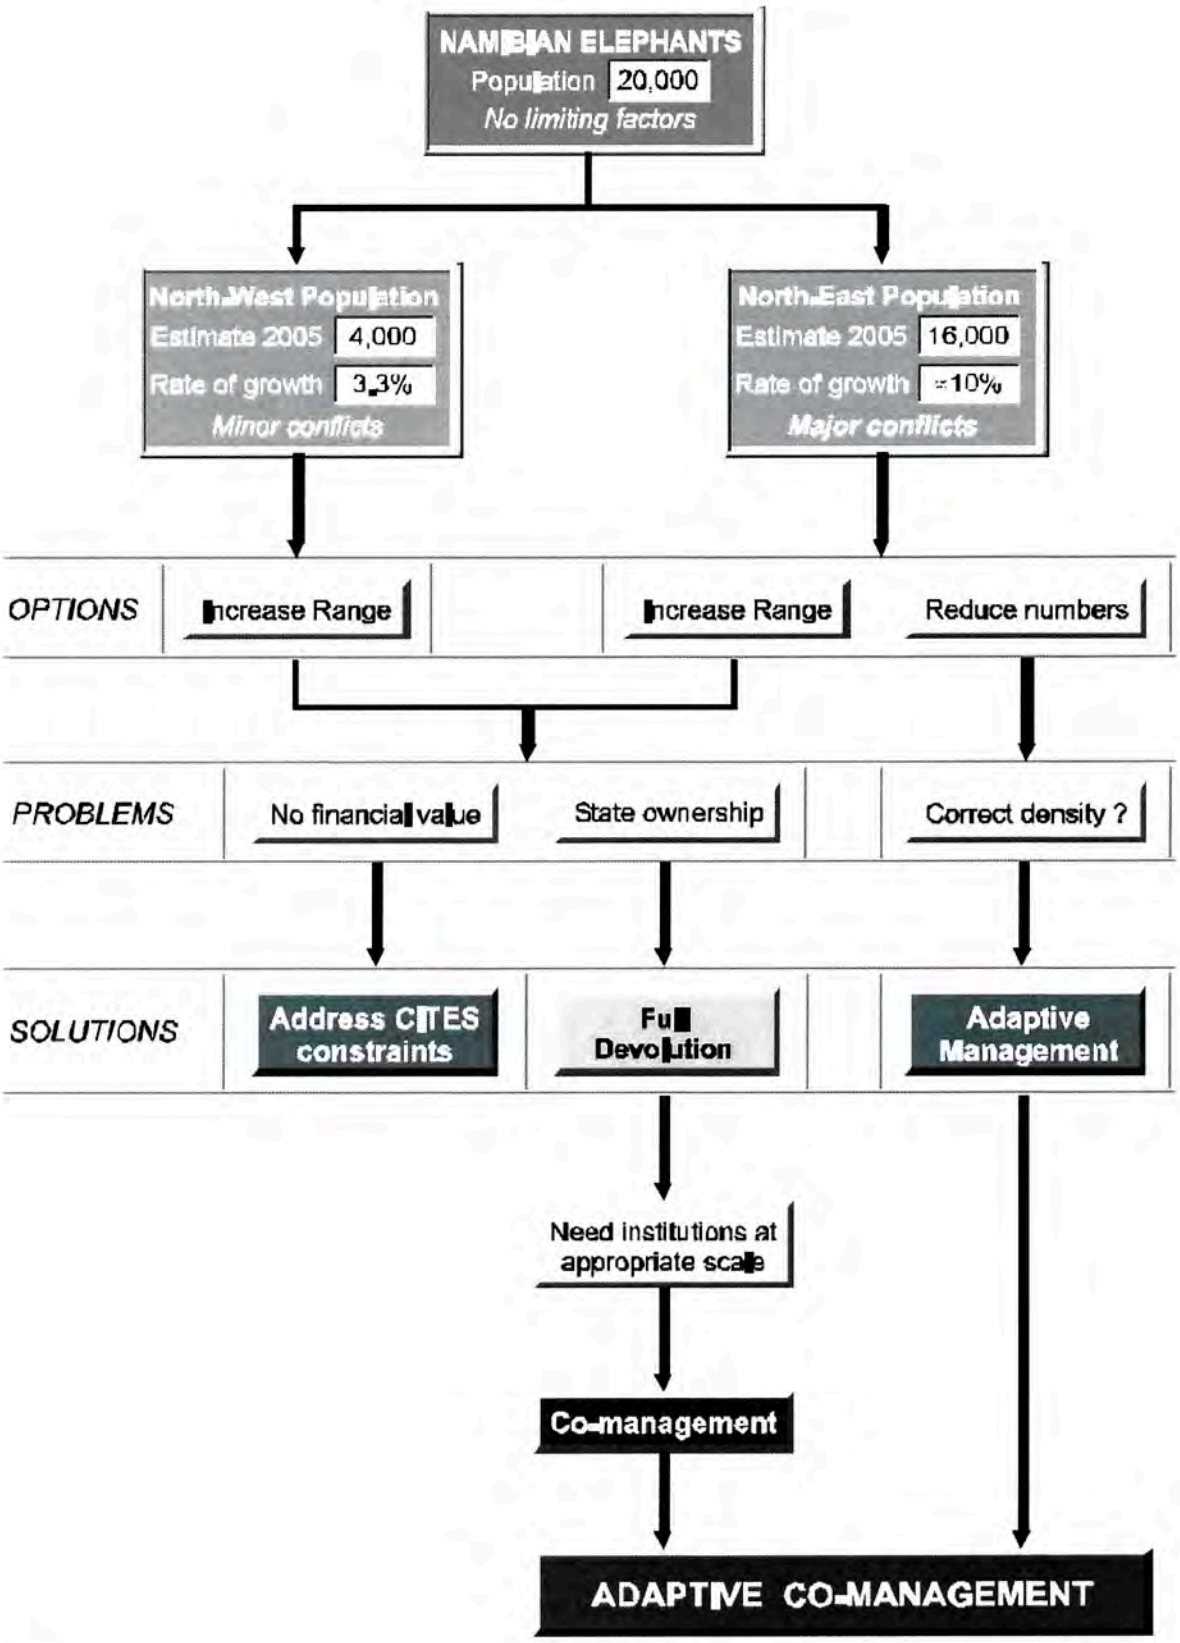

Fig. 1: Management of the Namibian Elephant Population – Options, Problems and Solutions

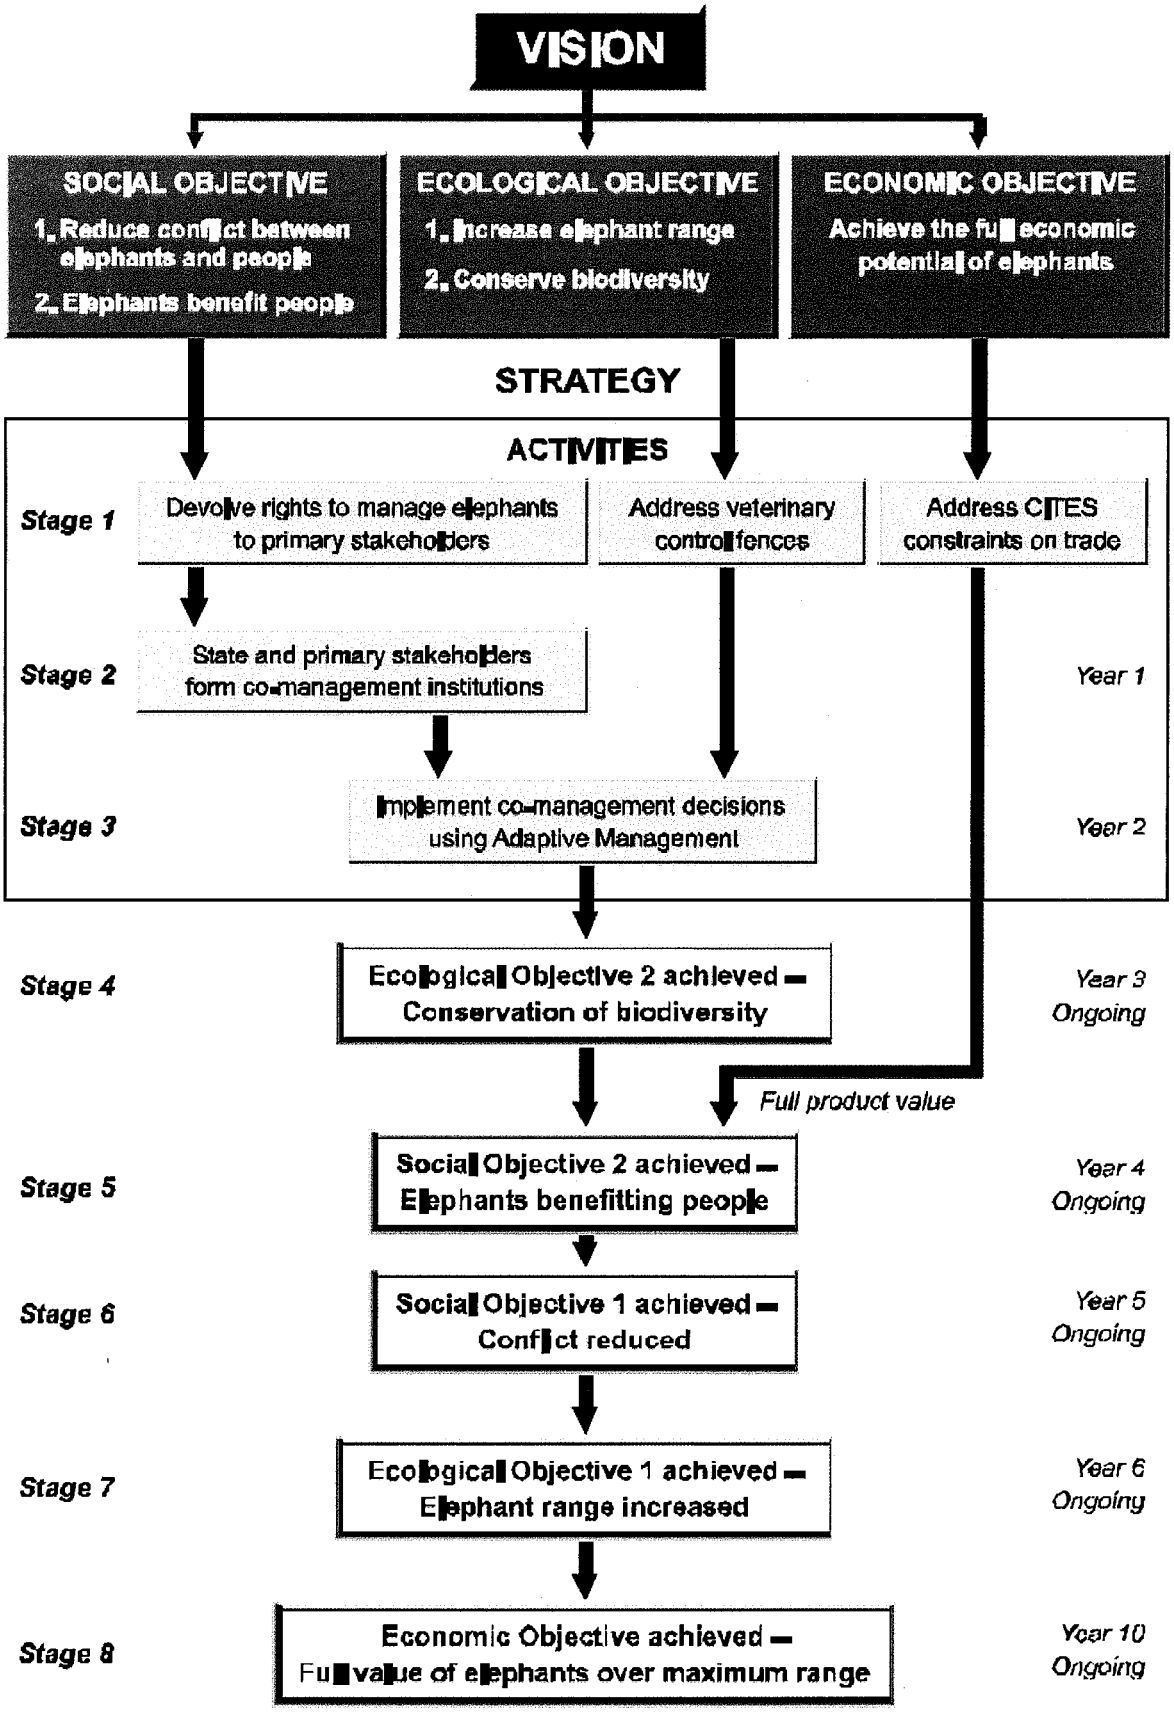

Fig. 2: Strategy for Management of the Namibian Elephant Population

INTRODUCTION & BACKGROUND

This Species Management Plan should be read in conjunction with the Background Study for Elephants prepared under the Transboundary Mammal Project of the Ministry of Environment and Tourism (MET) in April 2005.

Conservation Status and Significance

The taxonomy of Macdonald (2001) places the Savanna Elephant *Loxodonta africana* in the Family ELEPHANTIDAE, the only family in the Order PROBOSCIDEA (mammals with trunks) which is one of three Orders in the Superorder SUBUNGULATA (elephants, dugongs and hyraxes) which is part of the Infraclass EUTHERIA (placental mammals) in the Subclass THERIA (mammals bearing live young) in the Class MAMMALIA (mammals).

In the IUCN Red Data Book (Hilton-Taylor 2000), the species is classified as *Endangered*. This classification is based less on the actual numbers of elephant and more on the fact that the population is fragmented and has suffered recent catastrophic declines in some countries.

The African elephant was listed on Appendix I of CITES[1] at the 7th Meeting of the Conference of the Parties held in Lausanne in 1989. At the 10th CITES meeting in Harare in 1997 the elephant populations of Botswana, Namibia and Zimbabwe were transferred to Appendix II which, in theory, enables these countries to trade in ivory and elephant products. In practice, numerous obstacles have been placed in the way of trade – "*the Conference of the Parties has . . . adopted increasingly complex requirements for trade in elephant products that have all but ensured that such trade does not take place*" (MET 2004).

The distribution of elephants in southern Africa is shown in **Map 1**. It is emphasized that the elephant range shown on the map is no more than a 'snapshot' in time. The rapid expansions that are taking place in elephant populations in southern Africa, particularly in and around the Caprivi, will make any map outdated within a year. In 2002, the population in the whole of Africa was estimated at 560,904 elephants (African Elephant Database, AfrESG 2002).[2] More than half of this population is in southern Africa[3] and more than half of this is in Botswana (DG 2004). Projecting at normal population growth rates, the elephant population in southern Africa is likely to be around 350,000 to 400,000 animals in 2007. It is clear that elephants are not threatened in southern Africa and this raises the question whether they can be validly classified as threatened at the continental level.

The conservation status of elephants in Namibia is more than satisfactory – their numbers already exceed what many would consider desirable for the available habitats. Indeed, Namibia might want to avoid habitat changes of the sort that have happened in large parts of the elephant range in northern Botswana as a result of an overabundance of elephants (DG 2004, p7). In all other species management plans prepared thus far concerning ungulate species of the north-east, elephants have been identified as a possible threat to other species.

---

[1] Convention on International Trade in Endangered Species of Wild Fauna and Flora

[2] "Definite" – 402,067; "Probable" – 59,024; "Possible" – 99,813

[3] "Definite" – 246,592; "Probable" – 23,722; "Possible" – 26,098; Total – 296,412

The economic contribution which elephant could make to the wildlife industry and to land use values in northern Namibia is very high, especially if the present elephant range can be consolidated and expanded southwards in the central area between the north-western and north-eastern populations. For non-hunting tourism, this contribution would come more from expanding the elephant range than from increasing numbers in the present range.

Under a high quality trophy hunting regime, elephants could bring in a net income of about US$120,000 for every 1,000 animals in the population. In the north-east of the country where elephant densities are reaching a level of 1/km^2, the net financial return should be of the order of US$1.20/ha (N$7.50/ha). When added to the present net returns from existing wildlife management without elephant hunting, this could result in a doubling of income. The present levels of exploitation of elephant for sport hunting on communal land in the Caprivi, eastern Kavango and Otjozondjupa regions (NNF 2004) are well below sustainable off-take levels and could be significantly increased for the benefit of local people.

In economic terms, the 'net value added' to land use values by the inclusion of sport hunting on commercial farms in the north of Namibia is, in all cases, more than double the value of the cash income (Barnes & de Jager 1995) and this relationship should hold true for the enhanced income obtained by adding elephants to the species mix.

Were the Ministry to combine elephant sport hunting with the reduction of elephant populations through culling in the State protected areas in the north-east of the country (a total of 14,000km^2 including the Caprivi Forest Reserve), the expected income would be some N$13 million which would meet the present costs of maintaining and managing these areas. If a similar management regime were practised by the conservancies in the north-east, the increase in income would also be substantial and should more than offset the costs which elephant are presently causing through crop raiding and other damage.

Elephants are classified as *Specially Protected Game* under Namibian law (Schedule 3, Nature Conservation Ordinance, Order No.4 of 1975). The original justification for such a listing may well have disappeared. However, designating the species as *Protected Game* (Schedule 4) or as *Huntable Game* (Schedule 5) or as a *Problem Animal* (in terms of Section 53(1)) would not introduce any greater flexibility in the management of the species as long as the provisions of section 37 (hunting of game to protect grazing, cultivated lands and gardens) expressly exclude elephants from being hunted either by private landholders (subsection 37(1)(a)(i)) or communal lands residents (subsection 37(1)(a)(ii)) in defence of their own livelihoods. To achieve the objectives of this Management Plan, several revisions to the legal provisions for elephants under Namibian legislation would be desirable.

Populations

Elephants occur across the entire north of Namibia (**Map 2**) with two main subpopulations in the north-east and the north-west. The subpopulations are not genetically isolated since they are weakly linked through the 'occasional' range in the central area which includes a small resident population of about 20 animals in the Mangetti.

The north-western range appears to be expanding at present. Elephants are being seen as far south as the Ugab River and in all of the river catchments which flow westwards to

the Atlantic Ocean in the north. As yet, the extreme north-western part of the potential range along the Kunene River has not been re-colonised although elephants were present in this area up until 1990.

Estimates of numbers are shown in the table below. In 2004 the total population was estimated at over 16,000 animals and, allowing for underestimates on aerial surveys, the true number in 2005 is likely to be closer to 20,000. The north-western population appears to be growing at about 3.3% per annum and there are movements of elephants in and out of Etosha National Park. The recent increases in the north-eastern population are well in excess of normal growth rates (which are less than 5% per annum) and must be attributed to migration from the northern Botswana population (about 150,000 elephants) and the north-western Zimbabwe population of about 50,000 elephants. The huge number of elephants south of the Caprivi presents Namibia with a management challenge.

Estimates of elephant numbers in Namibia

	NORTH-WEST		**NORTH-EAST**	
	Etosha National Park	Kunene and Erongo regions	Khaudum & Nyae Nyae	Caprivi East & West
Aerial surveys began in	1966	1968	1977	1978
Highest estimate	*2,800*	*800*	*4,815*	*8,726*
Year	*(1983)*	*(2004)*	*(2004)*	*(2004)*
2004 Estimates	2,057	800	4,815	8,726
Subpopulation Totals	**2,857**			**13,541**
2005 Projection	2,656	1,033	5,658	10,268
Rounded to nearest hundred	2,700	1,000	5,700	10,200
Subpopulation Totals	**3,700**			**15,900**
Total population projected for 2005		**20,000**		*rounded to nearest thousand*

Notes:

The numbers given for 2004 are aerial survey estimates except for the Kunene and Erongo regions which are based on estimates by Loutit and Leggitt.

The 2005 projections for the North-west are based on a population growth rate of 3.3% and a correction factor of 25% for undercounting.

The 2005 projections for the North-east are based on population models (see *Background Study*) which include a correction factor of 25% for undercounting.

In addition to the numbers shown, an additional 76 elephants are on private land in northern Namibia.

Limiting Factors and Threats

At present no factor is preventing an increase in numbers of elephants in Namibia. Elephant populations might increase faster with the addition of more water points[4], with the removal of veterinary fences[5] or with less competition from cattle[6] but, even with these constraints, the information presented in the *Background Study* suggests that elephant are increasing at the maximum possible rate.

In both the north-western and north-eastern subpopulations, conflicts with humans are escalating due to the increase in elephant and human population numbers. In the extreme north-west, these conflicts are relatively minor because human populations are sparse and few crops are grown, although this may not be true for the Cuvelai area north of Etosha. In the north-east, crop damage incidents are a major problem.[7]

The benefits which communities are receiving from elephants on their land are small. The number of elephants hunted as trophies and problem animals is low and does not come close to compensating communities or individuals for their losses. Farmers are not free to defend their livelihoods from elephant depredations and the current arrangements for control of problem elephants are too tardy to be effective. O'Connell (1995) found an extremely hostile attitude towards wildlife among the Caprivi peoples and the inception of conservancy projects did little to ameliorate this attitude. With all conservancies being in a fledgling stage, there is a 'wait-and-see' attitude among their members. The recent rapid increase in the numbers of elephant in the Caprivi may be due to a temporary tolerance of elephants while conservancies are in their formative stage. The situation is finely balanced and it would require little in the way of disincentives for the entire edifice to collapse. A potential threat to elephants is the inception of a wave of illegal hunting by dissatisfied people.

The factors which should influence decision-taking and the options, difficulties and possible solutions to elephant management in Namibia are shown in a simplified diagram (**Fig.1**). In the north-west of Namibia elephant populations have considerable latitude for increasing their range and the situation may not require management interventions for many years. However, in the north-east, the escalating levels of conflict between humans and elephants suggest that the time for action has already been reached. Initially, the problem in the north-east appears intractable: the Caprivi, Khaudum and Nyae Nyae areas lie on the periphery of the largest elephant population in Africa. Management interventions carried out in isolation in Namibia will not affect the core elephant populations from whence the problems emanate.

Perhaps a shift in thinking is needed away from narrow preoccupations with biological diversity to a fuller consideration of the opportunities presented by the current situation. In the previous section, the exodus of elephants from Botswana and north-western Zimbabwe was portrayed as a challenge rather than a problem.

---

[4]For example, in the multiple use zone of Bwabwata.

[5]For example, removal of the international boundary fence along the southern boundary of Bwabwata and along the eastern boundary of Khaudum and Nyae Nyae would greatly facilitate east-west linkages in the regional elephant range.

[6]In a study of the Caprivi Region, Schlettwein (*et al.* 1991) saw the greatest threat to large wild herbivores as the extreme grazing pressure exerted by 96,000 head of cattle – a number which the authors expected to rise to 260,000 by 2000.

[7]In 2003 there were 253 separate incidents involving elephants in the Caprivi and 985 recorded instances of crop damage.

The importance of creating conditions which allow wildlife to compete with domestic livestock as a form of land use is referred to in several places in the *Background Study* and it might be salutary to consider how cattle farmers would react to the present situation if the focus were on cattle and not elephants. If, within the midst of a group of cattle farms, one farmer produced an overabundance of cattle to the extent that the beasts moved onto adjacent properties and, if that farmer made no effort to recover his cattle and was not overly concerned about his neighbours making use of the plentiful resource, the normal human reaction would be to accept the bonanza and use it. It is proposed that exactly this attitude should be adopted by the Namibian authorities towards the elephants in the north-east. Namibia should take full advantage of the opportunity presented by the overflow of elephants from the large and thus far unmanaged elephant populations of Botswana and Zimbabwe. The justification is that elephants are causing significant hardships for people and threatening conservation objectives in the north-east.

Namibia's short-term problem is to accommodate the increase in elephants, which is currently happening. Elephants have a propensity to eat themselves (and other species) out of house and home no matter how great the range available to them – a process which culminates in population crashes. In the long term, population reductions may be necessary. In the north-west, the management requirement may simply be to increase the range available to elephants: in north-central and north-eastern Namibia not only does the range need to be increased but, in some areas, the population may need to be reduced (**Fig.1**).

Technically, there are no good reasons why more land in Namibia should not be made available to elephants. The highest valued land uses over most of this arid country (**Map 3**) are those based on management of natural resources (Brown 2004). Moreover, the full potential is far from being realized at present due to national and international policy constraints, which place wildlife at a competitive disadvantage with land use based on exotic species. Were subsidies to be removed from the domestic livestock industry and, were it possible for elephant to play their full economic role in land use systems, it could reasonably be expected that large additional areas of land would be converted to wildlife management where human densities are relatively low and where co-existence with elephants is possible, as elsewhere in Namibia – for example, in most of the northern Kavango, parts of the central northern regions and in eastern Caprivi. This would remove the short-term limiting factor of providing additional range for elephant.

The technical arguments for greater areas of Namibia to be put over to natural resource management will not, on their own, bring about the needed changes to remove this limiting factor for elephants. It will require a high level of political commitment and the correct suite of incentives to induce landholders (both communal and private) to convert to a land use based primarily on wildlife. The high- level political commitment is already in place. In a speech delivered on 3rd February 2004, His Excellency the Founding President, Dr Sam Nujoma, made the visionary statement that wildlife would be restored throughout the north of Namibia, that ownership of wildlife would be conferred on local peoples and that the economy would be transformed by diversification based on wildlife uses.

For elephants, two factors mitigate against realizing the President's vision. The first is that the full value of elephant commodities (ivory and elephant skin) cannot be realized

due to international trading constraints.[8] The second is that elephants in Namibia are effectively State property – which was clearly not the President's intent. These two major disincentives need to be addressed before the conditions for increasing elephant range will be achieved. The options for tackling the CITES constraints are discussed fully in section 2c of the *Background Study* and briefly under the *Strategy and Actions* in this plan. The devolutionary requirements for elephants are also dealt with under the *Strategy and Actions*. A threat to fulfilling the Vision lies in a possible perversion of the intent of policy during the course of putting it into practice (Corbett & Jones 2000).

Full devolution of rights over elephants to landholders (on both communal and private land) is a prerequisite for creating the correct suite of incentives for elephant populations to expand. It is a necessary but not a sufficient condition. As a result of the arid environment in Namibia, elephant have large home ranges and this has major portents for management, both within Namibia and across national boundaries. No single protected area is a self-contained range for elephants and, in the north-east, the national parks in Caprivi are small (e.g. Mahango, Mamili and Mudumu) and very much at the mercy of the land use surrounding them. The desirability of cooperation with conservancies and surrounding communal lands has been emphasized in all of the previous studies in this series.[9] A key difference between the institutions needed for elephant management in the Caprivi and those in the north-west is that they would have to include stakeholders who are not included in conservancies. Unlike the other species in Caprivi for which management plans have been prepared, elephant are not rare or endangered and, indeed, they are a threat to those species which are.

A process of 'scaling up' is necessary to match institutions with ecological imperatives (Murphree 2000). Large areas co-managed by the relevant landholders and occupiers will be necessary to provide viable ranges, to distribute the pressure of elephants on habitats and to allow population increase and expansion. The Vision Statement developed under the UNDP/GEF-assisted project in Namibia (UNDP 2005) provides for co-operation between stakeholders to achieve this far-sighted concept. Linkages would be established under a co-management system which would both secure and increase the available range for elephant (**Map 4**).

In the north-east, elephant population reduction may be necessary. However, there are no simple answers to the question of how many elephants need to be removed – either to conserve biological diversity or to reduce conflicts between humans and elephants. It would be a mistake to attempt to hold the elephant population of the north-east at some constant level (or, conversely, to attempt to maintain a constant harvest from it). Such a "Command-and-control" approach (Holling & Meffe 1996) is likely to have adverse effects on the resilience of ecosystems.

This all points towards a need for imaginative and innovative management. An acceptance is necessary that there are no scientific recipes which avoid all the pitfalls in what is a 'complex system'. The starting premise may be that the option of zero use is

---

[8]Elephant are perhaps the only species where, if markets were working properly, the commodity value of an elephant bull is actually higher than the value which can be realized from trophy hunting.

[9]Martin (2004) stated that successful conservation of the wetland grazers was unlikely to be achieved without co-management institutions for the full extent of the floodplain habitats in the Caprivi.

not a reality – elephants will be harvested illegally and unsustainably if facile attempts are made to debar their use. The aim should be to avoid routine cropping or culling programmes which attempt to impose constancy on naturally fluctuating ecosystems and to introduce an element of randomness into the system. The challenge is to make it sustainable and this requires an adaptive management approach (Holling 1976).

Combining adaptive management with the arguments for co-management presents a classic situation where the principles of adaptive co-management in complex bio-economic systems (Ruitenbeek & Cartier 2001) need to be applied. The individuals who are most affected by elephants are those living in the north-east: together with the State authorities, they should decide how elephants should be managed.

Background and Rationale for the Management Plan

The African elephant has achieved huge prominence in global conservation issues in the past 20 years. Few other species are capable of arousing emotions, polarizing viewpoints and causing controversy to the extent that *Loxodonta africana* has done. In 1989, rightly or wrongly, the species was listed on Appendix I of CITES and legal trade in ivory was effectively banned. Because of the high profile of the species, every range country seeking credibility in the international conservation arena should have a management plan for elephant.

The southern African region holds more than half of the African elephant population and the largest concentrations of elephant are in a central zone extending across the continent between latitudes 15º-20º south of the equator. Within this zone, Botswana and north-western Zimbabwe hold some 200,000 elephants. The expansion of these populations into neighbouring countries is affecting biological diversity and human livelihoods. In recent years, divided opinions on the subject of elephant management have characterized debate in southern Africa and the situation is no less contentious than in the international arena. The topic is now in the political realm and demands for elephant management plans are coming from all stakeholders.

The 'elephant problem' is central in initiatives to create transboundary conservation areas in the region. The need for elephants to have access to far larger areas than those in which they are currently confined is recognized and, for many, TFCAs are seen as the solution to elephant population increases. Unfortunately, a lack of coherent land use planning in all of the participating countries[10] in the KAZA TFCA, coupled with a legacy of national boundaries which are an "outrage to geography and all common sense", (Fisch 1999) means that this TFCA will undergo a long and difficult birth. And shortly after parturition, the 'elephant problem' will rear its ugly head notwithstanding the additional range which is available. National management plans are needed to anticipate the reality that TFCAs will not solve the elephant problem.

Under the present Namibian environmental legislation, management plans are required for species which are rare or valuable and which share boundaries with neighbouring countries. Elephants are not rare but they are potentially valuable and, within multi-species wildlife systems, could provide a financial return which greatly exceeds that possible from alternative land uses. A management plan which treats elephants as the

[10]Angola, Botswana, Namibia, Zambia and Zimbabwe.

valuable resource that they are could generate sufficient income to meet the conservation costs of the elephant range in Namibia.

This plan has no relationship to standard Government five-year budgeting plans – except insofar as the required operational expenditure for State Protected Areas needs to be maintained continuously above the minimum threshold needed for effective management and law enforcement. The achievement of a greater range for elephant and the capacity to carry greater numbers of elephant is subject to many factors being favourable – including success in conservancy development, a reversal of the present spread of unplanned settlement and land clearance, mitigation of the effects of veterinary fences and the creation of institutions with local stakeholders that allow co-management of elephant populations over substantial areas.

Plan Structure

In each of the preceding species management plans under the Transboundary Mammal Project, it has been found necessary to make minor adjustments to the *pro forma* layout that formed part of the terms of reference. Some additional small changes have been made in this plan – to suit the specific requirements for the species.

The style of the plan differs slightly from previous plans. Throughout the text, there is more narrative discussion and less of the conventional 'bullet point' approach. Recognizing that any decisions to manage elephant are potentially controversial, the plan gives due weight to the concepts and philosophy on which management should be based. The plan advocates that elephant management decisions are made in a co-management forum with other primary stakeholders and, because of this, it is impossible to predict in advance what those decisions will be or to spell them out in a concise sequence of required activities. The emphasis is more on predicting the outcomes of certain actions rather than advocating particular management interventions.

(1) The plan begins with a **VISION STATEMENT** which incorporates a **GOAL** and three objectives – a **SOCIAL OBJECTIVE**, an **ECOLOGICAL OBJECTIVE** and an **ECONOMIC OBJECTIVE.** The Vision builds on evolving Namibian policy.

(2) A set of **ACTIONS** needed to achieve the objectives follows and, taken together, these actions comprise the **STRATEGY**. The points are made that complex interactions exist among the objectives that are not amenable to 'linear programming' and an **ADAPTIVE MANAGEMENT** approach is needed for all interventions.

(3) The **RISKS AND ASSUMPTIONS** implicit in the plan are then detailed – the most severe risk being that attached to doing nothing.

(4) **FINANCE AND CAPACITY**: In previous plans detailed budgets have been prepared for implementation – based on the assumption that the plan might be submitted for donor funding. This plan is unique in that the income from elephants should more than meet all implementation costs and it is recommended that the plan is not submitted to donors. An estimate of typical income from elephant management is presented in **Appendix 1**.

(5) The key issues on which **TRANSBOUNDARY COOPERATION** is desirable are highlighted, and it is noted that the principles on which this management plan is based could be extrapolated to the larger scale of a trans-frontier conservation area.

MANAGEMENT PLAN

VISION, GOAL AND OBJECTIVES

This Vision Statement consists of a preambular section and an operative section in which the overall goal and objectives are stated. Following the Vision Statement, a sequence of actions is presented which, taken together, comprise a strategy to achieve the objectives.

This is the Vision Statement of the MET and not necessarily that of the other primary stakeholders in Namibia – who are those people in communal lands and on private land where elephants occur. For this reason some care has gone into the phrasing of the Vision Statement so that the State does not appear to speak on behalf of the other stakeholders with whom it hopes to enter into co-management arrangements. The overall goal makes it clear that the Ministry will be guided by the wishes of the other stakeholders.

If it were adopted, this Vision Statement could be seen as Government's policy for elephants. Several points need to be made: –

(1) Notwithstanding any sensitivity to other stakeholders, it is completely valid for Government to state its policy. The assumption is that the policy is already informed by the wishes of the stakeholders.

(2) Policy is a statement of Government's intent and, as such, it should be focused on the larger issues and not burdened with details.

(3) Policy precedes legislation. Laws are made to give effect to policy.

(4) Policy is essentially experimental and, at the outset, there should be an awareness and acceptance that it may need to be changed. Implementation of policy is 'adaptive management' at the highest level (Lee 1993).

VISION

RECOGNIZING that elephants are of global, regional and national conservation concern;

CO-OPERATING with neighbouring countries and the international community to achieve the security of the species and enhance its biological status;

PARTICIPATING fully in transboundary initiatives which, *inter alia*, will extend the range available to elephants;

REGARDING the elephant as a highly desirable species to be conserved as part of the biological diversity and natural wealth of Namibia and noting that there are unique adaptations among Namibian elephants to arid environments;

RECORDING the fact that Namibia has a secure and viable population of elephants which is expanding at the moment and becoming overabundant in some areas;

WILLING to continue to commit public funds to the promotion, protection and management of the species;

BEING AWARE that in recent historic times elephants were found throughout Namibia but that to return to this situation will require a high economic value to be attached to the species;

PROMOTING wildlife management as the optimum land use in the arid environment of Namibia and treating elephants as one of many valuable species in the diverse large mammal community occurring in Namibia;

NOTING the potential financial and economic contribution that elephants could make as part of wildlife-based land use were it not for national and international policy constraints;

DRAWING ATTENTION TO the high costs entailed in conserving the species that include the damage that elephants inflict on human livelihoods and the reduction in biological diversity that results from an overabundance of elephants;

EMPHASISING that a policy of total protection for elephant will result in their available range being reduced to State protected areas and a corresponding decrease in their numbers;

CONVINCED that a policy of sustainable use, as enshrined in the Namibian constitution, will result in the expansion of the range available to elephant and an increase in their numbers;

Accordingly, the Ministry has the following goal and objectives –

STRATEGY AND ACTIONS

Simple as the objectives are, they will not be achieved by 'linear programming' within each objective. To achieve the ecological objective of increasing elephant range requires certain actions to be taken in the social and economic categories. The social objectives of reducing conflict and achieving a flow of benefits require actions to be taken in the ecological and economic realms. The full economic objective will not be achieved until all of the other objectives are in place.

While all the actions and outcomes appear to be inextricably linked, it is possible to present them in a sequence which leads logically to the achievement of the objectives.

GOAL

Namibia wishes to carry the maximum number of elephants that is consistent with the conservation of biological diversity AND the wishes of those primary stakeholders who have elephants on their land

SOCIAL OBJECTIVE

1. **To reduce conflict between elephants and people**
2. **To create conditions under which elephants are a benefit to people**

ECOLOGICAL OBJECTIVE

1. **To increase the range available to elephant**
2. **To conserve biological diversity in State Protected Areas and promote the conservation of habitats outside State Protected Areas in the elephant range**

ECONOMIC OBJECTIVE

To enable the full economic potential of elephants to be realized according to the provisions for sustainable use in Namibia's Constitution

The actions, when taken together, comprise a strategy and this is outlined below as shown in **Fig.2**.

A feature of this management plan is just how few actions are needed to bring it to fruition. Success relies on a few administrative masterstrokes which will cost next to nothing – rather than on a long list of expensive management activities.

(1) **Devolution**

Devolution of authority for landholders, both communal and private, to manage elephants on their land is a prerequisite for the other stages in the management plan. Co-management arrangements cannot be entered into as long as the stakeholders around the table (other than the State) have no rights over the species. It will be impossible to create the conditions under which the elephant range can expand without the correct suite of incentives – which includes full empowerment at the outset. The State does not have the answers as to how many elephants there should be in all the parts of the range (and there may be no right or wrong answers) and it needs the other stakeholders to help to decide this.

Many planners and bureaucrats see devolution of authority as a step-by-step process where communities are granted powers incrementally as they demonstrate the ability to manage. This is a 'Catch 22' situation (Murphree 2000). Authority is a prerequisite for responsible management and should not be held out as the reward for it. In some cases, State authorities cannot see why the end goals of wildlife management require complete devolution. Devolution carries with it the responsibility for organization, management, control, self-sufficiency and, above all, for developing resourcefulness. These attributes cannot be imposed. They must be developed experimentally in the local setting and, without authority, such experiments are defective. The stimulus for the development sought within this management plan will arise not from the anticipation of future entitlement but from the imperative of immediate empowerment.

The MET may fear that complete devolution of authority for elephants could have wider ramifications – establishing precedents that would affect all other large mammal species in Namibia. This need not necessarily be the case. The devolution could be clearly labelled as 'experimental' and justified by the current prominence and urgency of elephant issues. In any case, the Ministry hopes that shortly after devolving these rights, it can enter into co-management arrangements in different parts of the elephant range – this will probably result in stronger controls on elephant exploitation than could be implemented by the State on its own.

In Zimbabwe during the 1970s and 1980s, wildlife authority was almost totally devolved to landholders except for Specially Protected Species (a legal category of wildlife where the State retains powers to control exploitation). Elephants in Namibia are in such a category. It is of interest that, in the years after devolution, all wildlife species increased in abundance except for Specially Protected Species. By limiting the rights of landholders to hunt, crop, breed, capture, translocate and sell these protected species, the incentives were not present to bring about their increase. Elephants are abundant in Namibia and there is no sound conservation reason why they should be classified as specially protected. Perhaps the only legal control that needs to be maintained is that of ensuring that all ivory is sold through the central Government outlet in order to satisfy CITES accountability requirements.

(2) **Veterinary control fences**

The influence of veterinary fences on the current elephant range, both in Namibia and in the region, is profound. There is a bottleneck in the vicinity of Mahango Core Area within Bwabwata National Park that affects the entire regional range for elephant across the central southern African region, (**Map 5**) caused by the veterinary fences on the southern boundary of Caprivi and along the international border between Botswana and Namibia. The compression of elephants in this narrow isthmus has undoubtedly been responsible for the woodland destruction in Mahango. This is a matter for the MET to pursue from the outset of the management plan.

The recent migration of elephant into Namibia indicates that these fences are less than effective. The boundary fence between Khaudum and Botswana is frequently breached over a large section (Beytell *pers. comm.*) and the fence on Caprivi's southern boundary is in a similar state (Booth *pers. comm.*). However, there should be little cause for elation over this: the fences undoubtedly impede movement of elephants up and down the Kavango River and act against the maintenance of spatial linkages between the subpopulations. There is a danger that the authorities in both countries will suddenly become conscious of the *status quo*, attempt to repair the fences and, at the same time, demand that elephants are killed as problem animals.

Cumming (2005) has called for the veterinary profession to re-examine its methods of disease control as the southern African region moves into transboundary wildlife management over very large areas. Methods of control that were developed in the 1960s and applied at national levels may no longer be appropriate at the international scale where collaborative efforts are being made between governments to move to the higher-valued land uses offered by wildlife tourism.

(3) **Constraints on trade**

CITES constraints on trade in ivory and elephant products are exerting a negative effect on Namibia's aspirations for conservation of elephant and, more generally, acting as a disincentive to the adoption of wildlife management as a primary form of land use.

The listing of the Namibian elephant population on Appendix II of CITES is accompanied by an annotation which makes trade in ivory and other elephant products very difficult. The achievement of full market prices for elephant commodities is needed to realize the ultimate objectives of this management plan. For this reason, the removal of the particular constraints affecting Namibia should be tackled with renewed vigour by the Government at an early stage in the inception of the management plan.

The options open to Namibia to achieve the removal of the current CITES annotation limiting its ability to trade are discussed in the *Background Study* and it may not be strategic to present them here. One of the options is to accept the *status quo*. The perspectives included in Namibia's submission to the 13th CITES meeting in Bangkok in 2004 to amend the annotation affecting Namibian elephants (MET 2004) are extremely powerful and provide the justification for rejecting this option. Namibia has reiterated its determination to oppose measures imposed externally that act detrimentally towards conservation, local people and national development.

It cannot be denied, however, that there are substantial values to be derived from elephants through tourism and international trophy hunting (which is not debarred under the Namibian annotation) even if they fall short of the ideal. The management plan is worth pursuing, even if the full value of elephant products cannot be achieved overnight and even if performance under the Economic Objective is lower than it should be.

(4) **Co-management**

Namibia continues to make huge progress in the development of conservancies on communal land. Namibia currently has 50 registered and about 20 emerging conservancies, with 220,620 people living in registered conservancies managing wildlife over an area of more than 118,704 km^2, including expanding elephant populations. The wildlife range on commercial farmland in the north of the country is increasing – particularly in areas where it is hoped that the elephant range can be expanded. These very positive developments are recognized in the Vision Statement of UNDP (2005) and are seen as a way to link protected areas across the country and to provide a continuous range for elephants across the north of Namibia.

It is important that the momentum continues: further evolution of policy is needed to allow new co-management institutions for larger areas to emerge. The present mosaic of parks, conservancies and commercial farms provides a sound and essential foundation for the 'scaling up' of institutions (Murphree 2000) and, as they stand, partnerships can be entered into among neighbours. But there is a difference between partnerships and full co-management institutions. The needs of elephant provide the vehicle for co-management – no tract of land in Namibia is large enough to be a self-contained management unit for elephant.

Ruitenbeek & Cartier (2001) would have it that a co-management institution cannot simply 'be imposed on a group of innocent bystanders'. It is something that should emerge naturally from a complex bio-economic system. The devolution of rights over elephants creates the conditions for emergence – it should stimulate the formation of institutions based sensibly on geographic areas. Here, too, there is scope for applying another principle – *no institution should be larger than the problem it is trying to solve* (Martin 1999b). Each new co-management institution should be related to the range of an elephant subpopulation and should include only those stakeholders on whose land elephants occur (which would include, in some areas, communal residents who are not organized into conservancies). The high-level institutional structure proposed for the State wildlife agency under the MET/UNDP/GEF project (UNDP 2005) is ideally suited to this from a geographical perspective. The new divisions, subdivisions and sections are well-matched to the elephant ranges that will require co-management institutions.

The State will be part of each co-management institution formed to manage elephants but its new role should be very different from a 'command-and-control' function. The operating point on the management continuum defined by Ruitenbeek & Cartier (2001) should be close to the *laissez faire* end of the spectrum.

At an early stage in the formation of the co-management institutions, a voting procedure may need to be established that could be based on the size of the landholding for which each stakeholder is the responsible authority within the elephant range. On this basis, the State might dominate decision-taking in the north-west: in eastern Caprivi, where Mudumu and Mamili national parks are relatively small, the communal land stakeholders should have the major say.

(5) **Adaptive management**

At this stage management interventions required in north-western Namibia are minimal: elephant densities are low and the population is in the process of re-colonizing its former range. Perhaps the only agenda for a co-management institution would be the allocation of trophy quotas.

In north-eastern Namibia, the migration of large numbers of elephant from Botswana, habitat modification in national parks and escalating levels of conflict between humans and elephants may require significant management interventions. The co-management institutions[11] in the north-east would need to address trophy hunting quotas, problem animal control (PAC) and population reductions.

Trophy hunting

In the absence of any other management (including PAC), the proportion of an elephant population that can be hunted for trophies is about 0.5%. These trophies would all be males over 30 years old. If the north-eastern population is about 16,000 animals, the maximum trophy quota would be about 80 animals of which 50 would come from the Caprivi and 30 from the Khaudum/Nyae Nyae area.

These might be the quotas set from 2007 onwards. Under adaptive management, the ages of the elephants killed should be monitored and, in succeeding years, the quotas should be adjusted upwards or downwards according to the criterion that there should be some animals among those killed that have reached an age of 40 years. If monitoring were based on tusk weights (which is considerably easier), there should be several tusks greater than 22 kg in the quota and the average tusk weight should not be much less than 19 kg.

Under a co-management system, it would not be necessary to allocate hunting quotas to particular conservancies or protected areas. The total income from all the trophies could be shared according to landholdings (or other agreed criteria) at the end of the year.

The sustainable off-take of trophy hunting quotas is affected by any other management interventions taking place at the same time (PAC and culling) and the effects are discussed below.

Problem animal control (PAC)

If PAC is restricted mostly to male elephants 15 years and older, the maximum sustainable off-take is about 1.5% of the total population. As the problem animal off-take is increased, the trophy hunting quota must be reduced to remain sustainable and, when the level of PAC reaches 1.5%, there are insufficient animals reaching an age of 30 years to allow sport hunting. The relationship is shown in the table below.

PAC off-take %	0	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1	1.1	1.2	1.3	1.4
Trophy off-take %	0.50	0.45	0.40	0.36	0.32	0.26	0.22	0.18	0.12	0.11	0.08	0.05	0.03	0.02	0.01

Percentage off-takes are of the total population

The present system for dealing with problem elephants is clearly unworkable, particularly in the Caprivi. Elephants identified as problem animals must first be offered to a hunting concessionaire. The professional hunter is not allowed to shoot after dark which means that on most occasions the offending animal will not be killed in the act of crop raiding. If the hunter is unsuccessful in selling the animal as a trophy to a hunting client, MET staff

[11]There would probably be three such institutions in eastern Caprivi and Kavango.

may then destroy the animal subject to the current delegations of authority by the Minister.

Under a fully devolved co-management system, each stakeholder might be responsible for PAC in his/her landholding or authorized control officers would be present as needed in different parts of the area.[12] Being aware of the impact of PAC on trophy hunting, the co-management committee might prescribe guidelines to minimize the number of animals killed.[13]

Population reduction

Culling entails the removal of entire elephant herds with the aim of reducing population numbers or limiting the rate of population increase. By removing entire herds, the age structure of the female segment of the age pyramid remains unaltered and no selective pressures arise from the practice. The overall age structure of the population does become skewed in favour of males and this permits a higher percentage quota for trophy hunting, although it does not result in a greater number of male trophies over a period of years than would be obtained from a population which is not subjected to culling (because of population growth).

For a population growing at 4.6% per annum (a typical growth rate for savanna elephant), **an off-take of 3% of the total population will stabilise numbers**: a higher percentage off-take will reduce the population. This entails an off-take of about 30 animals for every 1,000 animals in the population. If culling is combined with trophy hunting, quotas can be raised to 1% of the population and an additional 10 males over the age of 30 years would also be removed annually.

If the sole consideration of the MET was to limit vegetation damage inside national parks, it might not seem necessary to confer with other stakeholders on any management decision to reduce elephant numbers in State protected areas. However, given the movements in and out of parks, a more sensible strategy is to manage the population both inside and outside parks with the other stakeholders for multiple objectives.

There are no simple prescriptions for the 'correct elephant densities' either to conserve biological diversity or reduce levels of human/elephant conflict. The worst mistake that could be made would be to attempt to hold the elephant population of the north-east at some constant level or to attempt to maintain a constant harvest from it – because this has adverse effects on ecosystem resilience. The rational approach is adaptive management (Holling 1976). Learning will only occur by exploiting the resource (Hilborn & Ludwig 1993) and monitoring progress towards the desired situation. By joining with

[12]In the late 1960s and early 1970s a PAC system which was in place in Caprivi where Chiefs Mamili and Liswani III (Salambala) had their own hunters authorised to hunt problem animals and obtain meat for feasts. These hunters were armed with .458 and .375 rifles. A quota was issued to each chief, problem animals were reported and dealt with within 24 hours, the tusks from the problem animal were registered, sold on the chiefs' behalf and the funds were deposited into the chiefs' account for community development. The system worked well (B. Beytell, *pers. comm.*).

[13]If commodity markets for elephant products were functioning properly, there would be little financial advantage in selling an elephant as a sport hunting trophy – the same animal would earn as much killed as a problem animal.

other stakeholders in deciding the nature and extent of any management interventions, the MET will place itself in a strong political position both nationally and internationally. The implementation of any population reductions will not be difficult to defend since the decisions will have been taken democratically.

Cropping

Namibia has stated firmly in its submissions to CITES (MET 2004) that no elephant will be killed for the sole purpose of realizing its value in the ivory trade.

Throughout Africa, elephants have been killed by local peoples for both ivory and meat for centuries. One of the primary reasons that colonial powers sought territories in Africa was because of the natural wealth of ivory (Parker 2004). Ansell (1960, page 50) remarks on the damage to crops in the Luangwa Valley, Zambia, but notes that elephant were seen by local people as valuable animals because of the meat they provided.[14]

It would be as well for MET to enter any co-management forum with no preconceived moral position on elephant. Having accepted that the solutions to the current 'elephant problem' may lie in innovative management inspired by the values of local people, a *tabula rasa* is needed to accept with an open mind all options presented.

The above actions comprise the strategy for elephant management.[15] Two of the actions are no more than enlightened administrative decisions to be taken within the Ministry. The veterinary fence issue requires the MET to confer with the Directorate of Veterinary Services in Namibia and carry its representations into the transboundary forum with Botswana. The ongoing struggle with CITES lies in the political and administrative realm. The adaptive management decisions affecting exploitation of the elephant population are not for prescription in this management plan: they will emanate from the enlarged forum of co-management institutions. They will take into account a wider range of social, ecological and economic factors than have previously characterized elephant management and, because of this, there is a real opportunity to advance knowledge on elephant management.

The objectives in the Vision Statement should be realized sequentially.

> **Ecological objective 2**, that of conserving biological diversity, should be the first to be realized since it is not dependent on achieving the full financial value for elephants. It requires only pro-active decisions from the co-management forums. It will, of course, result in costs which may have to be met from the fiscus in the first instance: however, as success is achieved in the CITES forum, the costs of ongoing population reductions can be met from the return from elephant products.

---

[14] In the 1960s, every local person in the Luangwa Valley received a half-pound of meat weekly from elephant control.

[15] In the discussion of limiting factors the provision of artificial water, competition with cattle and the effects of veterinary fences were mentioned as additional factors influencing elephant populations. These are discussed more fully in the *Background Study* (pages 65-66) together with the effect on habitats of elephants and fire acting in combination. Rather than deal with these as stand-alone topics in this management plan, it is preferred to treat them as agenda items to be addressed by co-management institutions.

Social objective 2, that of elephants benefiting people, should be realized next. The full suite of benefits will only be realized when elephant commodities achieve their real market value: however, sufficient benefits may flow in the early stages from trophy hunting, PAC and population reductions to maintain the positive momentum needed to achieve the other objectives. An important factor enters the equation here. Once the stakeholders feel secure that they really are in control of elephant management, the demands for quick financial benefits are likely to lessen and they will begin to think more deeply about the very complex problems involved in managing elephants.

Social objective 1 - that of reducing conflicts between elephants and people, should follow. Here, too, the effects of devolution will be paramount. As long as the stakeholders see elephant management as a State responsibility, it pays them to make a huge fuss about all elephant incidents which affect their livelihoods. Following devolution, the responsibility for solving the problem rests squarely in their court. And, for the first time, they will have to grapple with multiple competing factors which affect their livelihoods. If all elephants are eliminated, crop raiding problems will be solved: however, the larger income from good wildlife husbandry will also be lost. It must be remarked that there is little possibility of eliminating elephants: dispersal from the large Botswana population will replenish stocks continuously.

Ecological objective 1 - that of increasing the elephant range in Namibia, will depend on a number of factors. The achievement of the previous objectives should create the incentives for a transformation in land use. The State can assist at the national level by removing perverse incentives which favour other less productive forms of land use and, in particular, by bringing the veterinary fences issue under scrutiny. As transboundary wildlife initiatives gain momentum, economic multiplier effects should speed up the process, tipping the scales in favour of wildlife management. The international struggle over the ivory trade is unlikely to be won in the first rounds of the contest and may require incremental demonstrations of success to convince sceptics that policies are working.

The Economic Objective - that of achieving the full value of elephants over the maximum potential range in Namibia, is also dependent on progress with the previous objectives.

If the elephant range can be extended as far south as shown in **Map 4**, about half of Namibia (400,000 km^2) would contain elephants. If the full commodity values for elephant are finally achieved, under a sustainable use management regime involving elephant male trophy hunting and culling to prevent elephant population increase above a density of 1/km^2, the net financial return per unit area could be as high as US$3/ha (**Appendix 1**). The net income would be about US$120 million. Using the multipliers implicit in Barnes & de Jager (1995) the 'net value added' in economic terms would be more than double this amount.

Impacts

The impact of achieving the highest valued of land use is likely to be considerable – Namibia could improve its economy by an order of magnitude. It will provide the revenue for effective State conservation, elevate the standard of living for landholders with elephants and create the incentives for more land to be put under wildlife. Ultimately, it could revolutionize land use practices throughout the region and pave the way for TFCAs.

Monitoring

Monitoring of a range of specific biological parameters is implicit under adaptive management. The detailed requirements for making sport hunting quotas sustainable and achieving the aims of any population reductions are detailed in the *Background Study*. The 'Event Book' system (NNF 2004) is already producing the needed information for conservancies on conflict between elephants and humans. The annual record of revenues and incomes earned from State protected areas, conservancies and other communal land will provide the information needed to assess progress towards achieving the economic objective.

RISKS AND ASSUMPTIONS

Given the escalating human-elephant conflict and the extreme modification of habitats in north-eastern Namibia, the greatest risk to Government's position is to do nothing. The architects of Botswana's elephant management plan (DG 2004) have recommended that Namibia does not take a passive approach on the issue (G.C. Craig, *pers. comm.*). Failure to implement the necessary devolutionary measures and enter into co-management carries the real risk that local people will take matters into their own hands or, worse still, collaborate with illegal hunters from neighbouring countries.

Inactivity will not simply result in the *status quo* being maintained. Since the 1970s, elephant populations have collapsed in an apparently inexorable process across Africa.[16] Invariably it has happened in countries where the State asserts that it owns all wildlife and attempts to regulate all wildlife use. Murphree (2000) describes this 'Big Government' syndrome as one where the State's "authoritative reach exceeds its implementational grasp". The most spectacular population crashes have occurred in countries that have banned all exploitation of elephants, yet corruptly continued to feed the ivory trade (Parker 2004). These same countries have also been in the vanguard of those proposing an ivory ban.

There is little risk that any management interventions could have an adverse effect on the status of elephant populations in Namibia. Populations are expanding and being augmented by migration from Botswana and Zimbabwe. Provided the effects are properly monitored, experiments in management will provide a learning experience.

Assumptions

(1) Adequate funding will be available to the Directorate of Parks and Wildlife Management (DPWM) through the fiscus to maintain its essential functions in State protected areas (see FINANCE AND CAPACITY).

(2) Present legislation which prevents the devolution of rights over elephant will be amended.

---

[16]AfrESG (1998) and Martin (1986) document the decline of elephant populations in various countries since the 1970s. Among the more spectacular population crashes have been those in Kenya, Tanzania, Uganda and Zambia.

(3) MET is willing to enter into co-management of elephants with legitimate stakeholders.

(4) The devolution of rights over elephant and the establishment of co-management institutions will create the conditions for an expansion of the present elephant range beyond State protected areas, create linkages between State protected areas and improve the security of existing populations.

(5) Botswana and Zimbabwe will not take steps to limit their elephant populations. Whether or not they do will have little impact on this management plan as an institutional structure will have been set up to cope adaptively with changing situations.

(6) Namibia will be successful in convincing the Parties to CITES that the democratic policy it is pursuing carries the greatest long-term prospects for conservation and rehabilitation of elephant populations. If this assumption is not satisfied, it does not invalidate the management plan: it simply means that the transition to higher-valued land use systems based on wildlife and the expansion of the elephant range will take longer.

Risks

(1) If the assumptions are satisfied, the risk of an outbreak of illegal hunting of elephants among Namibian citizens is minimal. However, successful conservation of elephants in Namibia may attract illegal hunters from outside its borders – particularly from poorer countries whose local peoples are not benefiting from wildlife.

(2) There is a real risk that veterinary control measures, even though not directed at elephant, could continue to prejudice the objective of expanding the elephant range. Without expansion of the elephant range, the problems of conflict between humans and elephants and damage to wildlife habitats will require more intensive management. The solutions to this problem do not lie solely within Namibia's borders and this risk becomes an externality. The establishment of robust democratic co-management institutions will greatly strengthen the Ministry's position in tackling the problem and, even if the *status quo* of veterinary fences does not change, management solutions may emerge from within such institutions.

(3) If Namibia alienates some Parties to CITES through taking extreme measures to re-establish its sovereignty over elephants, there may be reprisals that affect other aspects of financial aid to Namibia. This will have to be handled in the political realm. Namibia's moral position is strong and it will be a pity if pragmatism has to override morals – particularly where it prejudices long-term prospects for conservation and rural development.

(4) If Namibia undertakes management interventions that involve culling or cropping from elephant populations, there will almost certainly be a regional and international outcry. From the experience that Namibia already has with the publicity surrounding elephants, it takes no stretch of the imagination to visualize the extremes to which the propaganda might go.

It is here that co-management is vital. If Namibia can present to the outside world a unified position supported by its citizenry, it should be able to weather the storm.

FINANCE AND CAPACITY

This management plan differs from all previous species management plans in that very little funding is required to implement it. The main costs will lie in co-ordination (liaison in setting up co-management institutions) and implementation of any management activities that arise from co-management decisions (problem animal control and population reductions). The potential income from elephant management is substantial and should more than cover these costs. The State or primary stakeholders may have to advance funds for certain activities to take place and it is strongly recommended that this is the financial mechanism used. Because of the controversial nature of elephant management, it would be wise not to compromise any decisions taken between the Ministry and primary stakeholders by seeking either international donor funding or local NGO funding to support implementation.

The current project to strengthen the system of national protected areas (UNDP 2005) should provide the necessary funding and capacity for MET to carry out its normal functions, including law enforcement. The close alignment between the UNDP project and the management plan for elephant bodes well for forming co-management institutions. Under the project, northern Namibia would be managed under two main divisions: the north-west (which includes Etosha National Park) and the north-east (which includes the Bwabwata, Mamili, Mudumu and Khaudum national parks and Waterberg Plateau Park).

The income from elephants would be unable to contribute much to Government budgets for the north-west. There is no sport hunting of elephants in the State protected areas and no management interventions are proposed. Outside the State protected areas, income earned from trophy hunting accrues to conservancies rather than to the State.

In the north-east, elephant could play a significant role in meeting conservation costs. The potential earnings from an elephant population managed for trophy hunting while keeping numbers constant are given in **Appendix 1**. The extent to which this revenue would contribute to park conservation costs is shown below.

	Caprivi	Khaudum & Mangetti
Protected areas with elephants (km^2)	9,956	4,142
Required conservation budget under UNDP (2005) – N$ million	13.9	4.8
Cost/hectare N$	13.91	11.59
Potential revenue from elephant management N$/ha	8.71	8.71
% contribution of elephants	63	75
Present conservation budgets (approx) – N$ million	9.9	3.4
Allocation/hectare N$	9.94	8.28
Potential revenue from elephant management N$/ha	8.71	8.71
% contribution of elephants	88	105

It would more-or-less meet the present budget allocations for the north-east and would meet at least two-thirds of the budgets proposed under UNDP (2005). Even if the full value of ivory and elephant skin is not achieved, the revenue from sport hunting will provide some 75% of the amounts given in the table.

Over and above the revenue which would accrue to State protected areas (N$8.7/ha), an additional N$9.7/ha would be earned by safari operators. This figure is dependent on the assumed proportion of gross income that safari operators would pay the landholder (MET or local community) for the 'rental' of the trophy hunting concession including trophy fees. If a rental higher than 25% can be secured, the primary stakeholders would achieve a larger part of the total net income (N$18.4 per hectare) from this elephant management regime.

Over and above the costs assumed in Appendix 1, additional costs could arise for such items as the annual aerial census of elephant populations, provision of artificial water and control of fire. However, in previous species management plans (Martin 2002, 2003, 2004) detailed budgets have been prepared for these items and it would be duplication to resubmit them here. Moreover, to put forward budgets for management activities which are the prerogative of co-management institutions yet to be established would be premature.

TRANSBOUNDARY COOPERATION

Whilst recognizing the larger goal of creating a major transboundary conservation area extending from the north of Namibia eastwards through Angola, Botswana, Zambia and Zimbabwe, the initial strategy guiding the Transboundary Mammal Project was to build incremental initiatives with Botswana based on individual rare or valuable mammal species of common interest to both countries. Given the extensive range of elephants and the high profile of elephant issues in the KAZA TFCA region, the time may have come for the subject to be discussed in a broader consultative forum.

Most of the management activities identified for potential cooperation and collaboration between Botswana and Namibia at the Kasane Workshop (2002) and Windhoek Workshop (2003) repeat themselves in this Management Plan.

(1) Maintaining liaison between wildlife departments and communities managing wildlife on either side of the international border;

(2) Maintaining linkages between species subpopulations;

(3) Ensuring compatible forms of land use on either side of the international boundary;

(4) Expanding the available range for the species – which includes dialogue on veterinary control fences;

(5) Co-operating on law enforcement directed at illegal hunting;

(6) Controlling fire;

(7) Collaborating on aerial surveys to improve population estimates.

The issue of joint management of this species is a topic which has not arisen with the other species which have been the subject of transboundary dialogue. It would be highly desirable if a common management approach for elephants could be developed, in the first instance, between Namibia and Botswana but, after that, with the other countries sharing the elephant range.

So far, Botswana and Zimbabwe have not announced their intentions regarding elephant management. This plan is structured so that the management of elephants on Namibian soil is not dependent on decisions by neighbouring countries: It is, first and foremost, a national plan. However, if Namibia's neighbours expressed a wish to enter into large-scale joint management of elephants, there is nothing in the plan to preclude this. Indeed, Namibia would welcome the initiative. It is an extension of the co-management policy approach which Namibia will pursue at the national level.[17]

The corollary to this is that, if there is no agreement with neighbouring countries, it cannot reasonably be expected that Namibia will not undertake management interventions in the best interests of its local peoples and conservation imperatives. Namibia would, of course, keep its neighbours fully informed of its management decisions.

The management activities on which collaboration might occur are: –

(8) Setting hunting quotas and monitoring the sustainability of hunting

Both Botswana and Namibia allow sport hunting of elephants and the trophies are derived from a shared population. This is a test case for developing workable transboundary institutions which, in the first instance, result in cooperation on quota setting and, ultimately, lead to income sharing.[18] Some of the problems which might arise in co-management are (a) the fact that Botswana allows citizen hunting of elephants at reduced charges; (b) the present Botswana elephant quota is not distributed among areas in proportion to elephant population numbers (DG 2004, page 13); and (c) the uncertainty that exists about the relationship between trophy quality and quota setting.

(9) Problem animal control

With the escalating conflicts between humans and elephants in both countries, there are sound reasons to share experiences gained from PAC, including successful deterrents which do not involve killing elephants.

---

[17]The issue may not be as simple as this. Namibia's co-management institutions would be based upon a far-reaching devolutionary policy. Co-management extending to neighbouring countries would need to be underpinned by the same principles for it to be entirely successful. The Utopian situation would be achieved when the TFCA was being managed jointly by local communities and their governments through a cascading structure of genuine co-management institutions.

[18]At the Kasane Workshop, the opportunity to develop such an institution involving Salambala Conservancy in Namibia and the Chobe Enclave community in Botswana was identified. These communities are directly opposite one another on the Chobe River and are almost certainly hunting from the same populations.

(10) Population reductions and/or sustainable harvesting of elephants

Although it was decided in 1991 to limit the Botswana elephant population to 60,000 animals, no population reductions took place (DG 2004, page 4) with the result that the population is now in the vicinity of 150,000 animals. Most rural communities in northern Botswana feel that there are too many elephants and that the number should be reduced (DG 2004, page 10). However, the practicalities are daunting: it would require the removal of some 5,000 animals annually simply to prevent further increase.

From the perspective of those Botswana stakeholders who seek to reduce human/elephant conflict and prevent further habitat modification, Namibia's removal of a substantial number of elephants in the Caprivi Region would be unlikely to achieve the desired objective. More likely would be a reduction in elephant dispersal and migrations through Caprivi causing increased pressure on habitats in Botswana. There are obvious grounds for collaboration.

Were Botswana to pursue a policy of consumptive utilization of elephants, the sustainable off-takes would be very high. DG (2004, page 12) estimate that the removal of 5,000 animals annually would yield about 20 tonnes of ivory, 4,000 tonnes of meat (wet weight) and 325 tonnes of dried salted hide. The constraints imposed by CITES reduce the value of this resource and lead logically to another area where collaboration would be beneficial.

(11) CITES constraints on trade in elephant products

At the time elephants were listed on Appendix I of CITES in 1989, a strong institution[19] was formed within the southern African region to contest the listing. At the Meeting of the Conference of the Parties in Kyoto in 1992, this alliance was able to introduce several resolutions which significantly affected the Treaty.[20] This institution was fundamentally altered in 1996 and, since then, has faded into obscurity. If the southern African countries still hold the fundamental viewpoint that all wildlife products should have value, there are strong grounds for resuscitating the alliance between states to perform more effectively in the CITES forum.

IMPLEMENTATION PROCESS & UPDATE PROCEDURES

Timing and Duration of Plan

Implementation of this plan should commence as soon as possible because of the rapidly changing situation of elephants in Namibia and the southern African region.

From the outset, an adaptive management monitoring programme should underpin the implementation of the Plan and test the underlying hypotheses regarding the response of elephant populations and habitats to various management interventions. The objectives, hypotheses and management activities in the plan should be modified as needed to take

[19]SACIM – the Southern African Centre for Ivory Marketing, which included Botswana, Malawi, Namibia and Zimbabwe and which maintained liaison with Mozambique and South Africa.

[20]Among these resolutions was one that recognised that trade could be beneficial for wild species and another that altered the criteria for listing species on CITES Appendices.

into account externalities which may arise (and almost certainly will arise) during implementation.

The first draft of this Species Management Plan was completed in April 2005 and was reviewed during April-May 2005. Following comments and decisions from the Directorate of Parks and Wildlife Management and the Directorate of Scientific Services in the MET, a second draft was submitted to the Ministry by June 2005. Subject to any further revisions which might arise from inter-ministerial discussions or transboundary liaison with Botswana, a Final Plan should be ready for adoption before the end of 2007.

This should be followed by meetings between the MET and primary stakeholders to discuss implementation. Central to the plan are the devolutionary aspects and the establishment of co-management institutions. Notwithstanding any modifications made as and when necessary during implementation, there should be a mandatory review of the plan every two years – preferably synchronized with the results from elephant population surveys. If any changes are needed in the plan, the document should be modified, updated and re-approved.

Appendix 1: Income from Elephant Management

The potential income from sustainable use of an elephant population management has been analyzed using the population model of Martin (2000). The management regime entails culling to prevent population increase combined with trophy hunting of males. Assumptions and formulae used in the model are as follows –

(1) The management treatment is applied to a population of 1,000 animals in an area of 1,000 km^2 (i.e. at a density of $1/km^2$). In the absence of any management this population would increase at a rate of 4.56% per annum. The percentage of the population to be culled is selected so that the population does not increase.

(2) Culling entails the off-take of complete elephant herds and includes males up to the age of 10 years. The probability of a male older than 10 years being present in a herd is set as: –

$$P_a = e^{-0.015\,(Age - 10)}$$

(3) An off-take of 3% of the population is sufficient to stabilize numbers. This percentage may seem low when taken from a population which, in the absence of culling, increases at 4.6% per annum. The explanation lies entirely in the preponderance of females in the off-take.

(4) It is assumed that 75% of all elephant calves between the ages of 2 to 8 years will be captured rather than killed. These would be sold to zoos and to approved local and regional buyers wishing to domesticate elephant or begin new wild populations.

(5) The change in the age structure of the population caused by culling allows a greater percentage quota for trophy hunting of males. A quota of 1% of the population is sustainable.

(6) To calculate the values of ivory, skin and meat obtained from the culling operation, the following formulae were used for males and females of specific ages: –

Ivory Weight of two tusks: –

$$I_{Age} = 1.88\,(0.1 + 0.2\,(Age - 2.5)^{1.2937})\ \text{kg}$$

$$I_{Age} = 1.88\,(0.1 + 11\,(1 - e^{-0.016\,(Age - 2.5)^{1.2742}}))\ \text{kg}$$

The multiplier for two tusks (*1.88*) is from Rodgers (*et al* 1978) and the formulae for the weight of one male and one female tusk are based on Pilgrim & Western (1986).

$$Price/kg = US\$\,(50 + 110 \cdot I_{Age}^{0.5})$$

Body weights

$$W_{Age} = 5{,}200\,(1 - e^{0.006\,(Age + 1.5)^{1.7}})\ \text{kg}$$

$$W_{Age} = 3{,}500\,(1 - e^{0.00892\,(Age + 1.5)^{1.7}})\ \text{kg}$$

Dressing out percentage = ***33%*** (wet weight); Price/kg wet meat = ***US$1.00***

Skin weight (dry, both sexes)

$$S_{Age} = 0.373\,W_{Age}^{0.67}$$ Price/kg dry skin = ***US$5***

The table on the next page gives the results of the management programme averaged over 100 years. It is assumed that markets for all products are operating normally.

FINANCIAL VALUE OF ELEPHANT MANAGEMENT PROGRAMME

Assumed values *(all figures in US$)*

Area	1,000	km^2	Exchange rate 1US$ = N$	6.2	
Elephant population	1,000	animals			

SPORT HUNTING

Trophy male quota	1.0	% of total population per year=	10	animals
Trophy fee US$	10,000	charged by operator		
Daily rate US$	1,000	charged by operator		
Minimum hunt days	14	Client charged for 14 days if elephant bull included in hunt		
Operating costs US$	200	per day (Safari operator's costs)		
Operator' rental	25	% of gross income (paid to landholder – MET or community)		
Weight of skin	100	kg dry skin/animal (assumes hunter takes 20% of skin)		
Body weight (adult male)	5,000	kg		

POPULATION REDUCTION

Culling quota	3.0	% of total population per year=	30	animals
Culling cost US$	300	per animal		
Calf capture US$	300	per animal (2-8 years old)		
Selling price for calves US$	1,000	per animal		
Capture success	75	% of animals 2-8 years old		
Price of skin US$	5	per kg (assumes markets operating)		
Dressing out percentage	33	% of body weight		

Meat value US$	1	per kg (wet weight)

Age-specific tusk weights, ivory prices, body weights and skin weights as per formulae on previous page

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A. Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
MESTOUSIS	PANTELIS	P.	M
(b) (6) [redacted]	3.a. Alternate Telephone Number	(b) (6) [redacted]	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Pelham	N.Y.	10803	Westchester	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions* [50 CFR 13.11(d)]

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

PETER MESTOUSIS, (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name. elephant

   b. Sex (if known). male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   South Africa, Kwalata Wilderness 200 KM North of Pretoria 90 KM North-west of Naboomspruit and 353K Due North of Vaalwater in Waterberg Mtns of the northern province of South Africa

   b. Date wildlife is to be hunted: 01 August 2018 Thru 14 August 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   Numzaan Safaris out of Thabazimbi, South Africa

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). HAVE NOT HUNTED YET. PERMIT HAS BEEN Applied for.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: SAFARI CARGO SYSTEMS
Address: Holding 34, 5TH AVE. Bredel, P.O. Box 30093 Jet Park Witfield 1467
City:
State/Province: GAUTENG
Country, Postal Code: 1623, SA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

* SEE ATTACHED

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

* SEE ATTACHED

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

* SEE ATTACHED

ATT: USFWS & NUMZAAN SAFARIS - Mr. Mestousis

ELEPHANT CITES EXPORT TO U.S.
IMPLICATIONS OF THE ELEPHANT HUNT ON THE PROPERTY KWALATA WILDERNESS.

In response to No 9 of the USFWS document and the requested import of the elephant trophy into the USA:

- The elephant bull to be hunted by Mr. Mestousis with Numzaan Safaris is currently on a property where the herd population is too great for the 6 000 hectares on which the herd roams. Bio-diversity and Nature Conservation, South Africa, under the Norms and Standards require that Kwalata Wilderness purchases more land to sustain the 20 odd herd. This is not financially an option for us and in the current political climate it is even less attractive to own land in South Africa.
- Thus according to the Norms and Standards the elephants must be culled as the number of females alone exceeds the carrying capacity of 7 elephants the prescribed number for the land. In the interim before they issue the final cull permit we have been given permission to hunt elephant bulls to reduce the population and preserve the environment.
- We are also looking to find a home for these elephant cows and juveniles in Mozambique however funding, transport and available areas are limited. South African land available to elephant is currently at capacity and South Africa has little or no need for animals to be relocated internally.
- The bull in question needs to be removed as the new bull brought in 5 years ago from another blood line must mate with the females to change the genetic of this 27 year old herd (on Kwalata).
- We have attached along with this letter the Management Plan showing the amount of research that is required to have elephant on a property as well as the letter from Nature Conservation stating their requirement to cull.

No 9a: SA Population Status:

South African land that can carry elephant is at its capacity hence the only possibility that elephant can be relocated is to Mozambique to the newer parks that they are trying to establish there.

According to the available CITES document the elephant population in South Africa have increased from 120 in 1920 to 12 000 currently (there is no date on the available CITES document). It also states that "the elephant population in SA in protected areas is under no major threat".

According to the EWT "**Elephant numbers in South Africa increased by approximately 26.8% between 2002 (14,071 elephants) and 2006 (17,847 elephants). Since 2006 there has been an approximate increase of 41% in South Africa's elephant population.**

No 9b: Distribution of funds.

The funds from the elephant hunt will be used in part to recuperate and rejuvinate the property from elephant damage. 23/5/2018 a 4-bay thatched roof garage and entrance to the lodge was destroyed by an elephant bull. We have a 4 000 dollar insurance bill from the damage to a guests vehicle as well as numerous other damages to roofs, water tanks etc by the elephant. Funds will be used to continue to preserve the wilderness that forms Kwalata Wilderness and safeguard the future of its employees and other wildlife. Meat is also sent to two local orphanages namely the Bushveld Mission and The Fold which are home to mostly AIDS orphans.

No 9c: Conservation benefit.

As previously mentioned the carrying capacity and prescribed number of elephants that can be sustained by the property is 7 adult elephants. Thus the 20 strong herd has been listed to be culled. In the interim while we hope to sell the property to a new owner who may have the financial resources to increase the land or to relocate the cows and juveniles to Mozambique (new genetics in bulls would be best for the herd) are the best options in the interim before the cull permit is finally issued.

The land in the interim needs to be protected from the devastation of the bulls particularly when they are in musth (at their most aggressive and destructive) and the general feeding requirements of the herd. Already the species of Paper Bark Tree and most Aloe species have been removed by the elephant from this 6 000 hectare property.

We hope that you will assist Numzaan safaris client with the importation of his trophy harvested out of the necessity of land and law and in the interests of economic sustainability.

Many thanks
Yours sincerely

Reinhard Heuser

APPROVAL OF ELEPHANT MANAGEMENT PLAN AND CULLING PLAN –KWALATA PRIVATE NATURE RESERVE

1. Your document "Elephant Management Plan and Culling plan – Kwalata Private Nature Reserve 2016 has reference.
2. Please be advised that the Member of the Executive Council Mr. S.C. Sekoati has approved the Elephant Management Plan and Culling plan for Kwalata Private Nature Reserve on the 07th of March 2017.
3. This plan is approved in terms of the requirements of the [1]National Norms and Standards for the Management of Elephants in South Africa (2008).
4. All future permit applications related to elephant management for this reserve will be evaluated according to the content of this approved management plan and culling plan.

Kind regards,

E.T. Moeng: Director: Biodiversity Management

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) Date: 5/4/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
GAGLIO	ANTHONY		
2. Date of Birth (mm/dd/yyyy) 2. Telephone Number: (b) (6) [redacted]	3.a. Alternate Telephone Number	4. E-mail address MATT@GENUSLOGISITCS.COM	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
STAMFORD	CT	06903	US	US
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions (50 CFR 13.11(d)).
2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50*** and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

6/14/18

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   MATT MAYERS 161-15 ROCKAWAY BLVD, JAMICA,NY 11434

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   MATT 718-7900216 MATT@GENUSLOGISITICS.COM

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA

b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

NAMIBIA NYAE CONSERVANCY,

b. Date wildlife was hunted:

NOV 8, 2017 11/8/2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

S.M JACOBS

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

STEPHEN M JACOBS
PO BOX 601
GROOSRIEN, NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). 175910 CITES

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	STEPHAN M JACOBS
Business Name:	
Address:	PO BOX 601
City:	GROOSRIEN
State/Province:	
Country, Postal Code:	NAMIBIA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: 6/14/18

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if I the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982.

Thank you for submitting an application to the U.S. Fish and Wildlife Service. The application was received by the Division of Management Authority on 06/20/2018; check number 3683 accompanied the application for AFRICAN ELEPHANT. Your application has been assigned the following PRT identification number: MA97797C-0While processing time may be less, you should anticipate a minimum of 30 days to process your request, with many requests averaging between 60 to 90 days due to some requests which need to be published in the Federal Register and/or be reviewed by other Service offices. While we are aware that you may want to inquire about the status of your application, we request that you allow our office at least three weeks after the receipt of this notification to make any inquiries. Should you have additional information that you need to provide to our office pertaining to the current request, we ask that you call our office first at 800-358-2104 or email managementauthority@fws.gov to obtain further instructions.

Subject: RE: Delays on pending Elephant and Bontebok ESA import permits via DMA

Matt

This is what I got back from the outfitter. Let me know what else you need to expedite the ivory shipment

Hi
Herewith the answers that I could provide will also paste the answer I got from my shipping agent about these questions.

1: The population growth of Elephants in this area has been huge sins the late 80's with the first Elephants only seen in the late 70's. We have seen a growth of almost 1250 %. With elephants numbers being +/- 150 in 1988 to 3000 on the last count in 2017. The conservancy with conjunction with the ministry of Environment and Tourism does annual counts there for we can really say what or resident population is.

2: The trophy fee was $45000-00 and all of that went to the conservancy of Nyae-Nyae. They in return maintain waterholes, schools, vehicles that are used for antipoaching and assisting local population with every day needs, ranger training, vegetable gardens and the list goes on to up bring the area and its wildlife to what it has become today, they alone employ over 30 people that benefits directly from the payments dane by the safari operator.

3: In addition to the total payment done every year by the safari operator of more than $350 000.00 to the conservancy, they have the responsibility for all the game water points in the area which is more then 17 at this stage. This is a very dry area and it would be impossible for any game to survive in this area without these water point that are kept and maintained by the safari operator. Anti-poaching patrols are done on regular basis and then they employ 12 local people in their safari camps which benefits directly from the hunting. All the meat from the elephants shot tin the area are distributed between the people and provide them with a much needed source od protein. As long as the population know that they benefit from these Elephants they will look After them and they have value to them.

Let me know if you need more
All the best
Stephan

Subject: Re: FW: Whatapp message

It's taking a long time to process import permits for elephants because now it's on a case by case basis. What F&W is looking for are enhancement findings. It used to be per country but I am not sure if it is per hunting area now. Your wildlife office would know as they supply data to F&W. I would be very interested to hear what they tell you if you call your contact there. Meanwhile, check with the outfitter if they have updated management and statistical reports on

the hunting area and other info as requested by F&W. Once they submit to F&W and gets evaluated and positive findings are found then the permit can get processed.

Subject: Delays on pending Elephant and Bontebok ESA import permits via DMA
Importance: High

Good day,

If you are in receipt of this e-mail, then Genus Logistics is awaiting either an Elephant or Bontebok import permit for your account. DMA (Division of Management Authority) who issues the permits has not issued any new or renewed permits for over 7 months. I have asked DMA numerous times as to status with very little feedback until recently. They advised that they are awaiting the courts to issue guidelines in regard to ESA permits being issued on a case by case basis.

Being these permits will be issued on a case by case basis I want to provide them with additional information, so they can make their finding positive and assist them in issuing once they have a plan.

Please see following three questions and provide you answers as best you can along with any additional evidence. Please send letter in PDF/Word Format and email to matt@genuslogistics.com I will forward to DMA, so they can add to your file for review.

U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt

or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Should you have any questions or concerns on this matter please do not hesitate to reach out.

Thank you for your patience and safe hunting.

Matt

2017 -10- 30
WINDHOEK PERMIT OFFICE Private Bag 13306, Windhoek Tel: 2842111 Fax: 258861

IMPORTANT: This permit is not valid if altered in anyway

The following certificate must be completed immediately after each animal that has been hunted (please print) 175 911

Date	Species	LH*	RH*	LB*	RB*	Total	RW*	Age	Male/ Female	Farm		Signatures		
										Name	No	Farm owner	Hunter	Professional hunter Master hunting guide Hunting guide
08/11/17	Elephant		30.4kg		27.3kg			8	M	Nyae - Nyae Conserv.			[redacted] (g) (g)	
9/11/17	Oryx	78	75	18,5	19	190.5		8	M	Nyae-Nyae Conserv.				

L= Left, R=Right, Horn, B=Base, RW=Rowland Ward

No trophy hunter may hunt unless accompanied by a professional hunter, master hunting guide or hunding guide.

This permit must be kept on the person of the permit holder at all times while hunting.

Only guide(s) as specified on the permit may conduct the hunt.

Gaglio,AnthonySupplementtoApplication.zip;

Ms. Brisendine,

Attached you will find a Notice or Representation, a letter with Supplemental information for Mr. Gaglio's import permit application #97797C (answers to question 9), and enhancement documentation related to the answers for section 9.

If you have any questions regarding this matter, please do not hesitate to contact me.

Kindest Regards,

Aimee Korver

RE: PRT# MA97797C – Supplement to Elephant Import Permit Application Anthony Gaglio

Ms. Brisendine:

This is a supplement to the above referenced permit application for Mr. Anthony Gaglio (PRT # 97797C)

Answers to Question 9

9a. Do you have any information regarding the population status or trend data on the species hunted?

Please see the attached CITES document entitled, "Consideration of Proposals for Amendment of Appendices I and II" , which states that "the Namibian elephant population is secure and growing, and the availability of habitat for elephants is increasing."

9b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Please, see the attached Operator Enhancement Report which details how funds are used by this safari operator

9c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Please see the attached Operator Enhancement report as well as the article from The Namibian on the winning of the Conservation Award by the Nyae Nyae Conservancy, which is Namibia's oldest conservancy and recently received this award for their outstanding efforts in wildlife conservation and game management from the International Council for Game and Wildlife Conservation (CIC). Here is also a link to a video Chief Tsamkxao ≠Oma of Nyae Nyae Conservancy in Namibia explaining why conservation hunting is important to the Ju/'hoansi

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III, of the non-profit firm CONSERVATION FORCE as my attorney and legal representative for all matters concerning my application for a Permit to Import a threatened-listed Elephant Trophy from Namibia.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that this attorney be copied with all correspondence, acknowledgements, notices and decisions concerning my application at the following address:

DATE

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES
OF WILD FAUNA AND FLORA

Seventeenth meeting of the Conference of the Parties
Johannesburg (South Africa), 24 September – 5 October 2016

CONSIDERATION OF PROPOSALS FOR AMENDMENT OF APPENDICES I AND II

A. Proposal

To delete the annotation to the listing of the Namibian African elephant population in Appendix II by deleting any reference to Namibia in that Annotation.

B. Proponent

Namibia*

C. Supporting statement

Currently, the Namibian elephant population is listed in Appendix II with an annotation contained in Annex I of this document. Namibia, with this proposal, seeks the removal of this annotation in its entirety in respect of our elephant population. This can be achieved by deleting any reference to "Namibia" in the annotation.

This annotation in sub-paragraph h) states that "no further proposals to allow trade in elephant ivory from populations already in Appendix II shall be submitted to the Conference of the Parties for the period from CoP14 and ending nine years from the date of the single sale of ivory that is to take place in accordance with provisions in paragraphs g) i), g) ii), g) iii), g) vi) and g) vii). In addition such further proposals shall be dealt with in accordance with Decisions 14.77 and 14.78 (Rev. CoP15)."

Decision 14.77 requires that "The Standing Committee, assisted by the Secretariat, shall propose for approval at the least at the 16th meeting of the Conference of the Parties a decision-making mechanism for a process of trade in ivory under the auspices of the Conference of the Parties."

This Decision formed part of an amendment to Proposal CoP14 Prop 4 and related draft Decisions (CoP14 Inf. 61) adopted at the 14th meeting of the Conference of the Parties to CITES [CoP14 Plenary 6 (Rev. 1)] that was a compromise that included an agreement by Botswana, Namibia, South Africa and Zimbabwe to a nine-year moratorium and the development of the African Elephant Action Plan.

As elaborated in document CoP17 Doc. 84.3, Decision-making mechanism for a process of international trade in ivory, submitted by Namibia, South Africa and Zimbabwe, in nine years, no substantive progress has been made in the implementation of this Decision. There is no substantive proposal that will be considered at the 17th meeting of the Conference of the Parties as far as Namibia is aware of other than the proposal submitted by Namibia, South Africa and Zimbabwe in CoP17 Doc. 84.3.

The establishment of a Decision Making Mechanism for a process of future trade in ivory was an integral part of the compromise reached that was incorporated in an amendment to Proposal CoP14 Prop 4 and related draft Decisions (CoP14 Inf. 61) adopted at the 14th CoP to CITES [CoP14 Plenary 6 (Rev. 1)] that further included an agreement by Botswana, Namibia, South Africa and Zimbabwe to a nine-year moratorium and the development of the African Elephant Action Plan.

---

* *The geographical designations employed in this document do not imply the expression of any opinion whatsoever on the part of the CITES Secretariat (or the United Nations Environment Programme) concerning the legal status of any country, territory, or area, or concerning the delimitation of its frontiers or boundaries. The responsibility for the contents of the document rests exclusively with its author.*

Namibia contends that a failure to establish this Decision Making Mechanism within the agreed process and time frame significantly undermines the needs and interests of the affected range States including Namibia and their conservation objectives and programmes, which rely on:

a) the creation of positive incentives for landholders, whether communal or private, and to set land aside for elephants and to co-exist with them instead of opting for forms of land use that would displace elephants and cause the loss of their habitat; and

b) the generation of revenues from the sale of elephant products to finance elephant conservation programmes, including the management of protected areas and the combatting of illegal killing and trade.

The current situation negatively affects African elephant range States, including Namibia, and therefore runs counter to the letter and spirit of previous agreements made and decisions taken by the Conference of the Parties and infringes upon the legitimate rights of Parties enshrined in the text of the Convention.

Namibia supported the drafting of the annotation as part of a compromise that would result in an objective process regarding future trade in ivory that should not repeatedly have to be discussed by the Conference of the Parties in the manner that characterized such debates in the past. Namibia's African elephant population does not meet the criteria to be listed in Appendix I and compromises reached to address the needs of other range States, while foregoing our own, should be honoured. This will ensure that specific provisions that form part of the compromise are implemented and would not render the annotation inoperable.

If the 17th meeting of the Conference of the Parties does not approve a Decision Making Mechanism, the proponents of this document would consider the current annotation, negotiated as a compromise at COP14 and subsequently not implemented, as *pro non scripto* (as though it had not been written).

Namibia furthermore agrees with Zimbabwe in Proposal CoP17 15 that "Resolution Conf.11.21 (Rev.CoP16) makes the distinction between annotations for reference purposes and substantive annotations. The latter are generally used to qualify the permitted extent of trade in Appendix II species. An examination of Fauna listed on Appendix II suggests that most of the annotations are 'enabling' – that is, they permit trade (constrained by quotas) in situations where the remainder of range States' populations is listed on Appendix I (e.g. vicuña and crocodiles). The annotation for *Loxodonta africana* is entirely different. It is a long list of proscriptions constraining the trade in elephant specimens."

In light of the failure to honour the compromise, Namibia would not consider herself bound by any annotation that exceeds in scope the purpose of clarification and which adds trade-restricting provisions that are not provided in the text of the Convention.

In acceding to CITES in 1992, Namibia ratified the text of the Convention. The present annotation pertaining to its elephant population on Appendix II has departed a long way from Article IV of the treaty. In our view, the annotation is *ultra vires*.

Namibia, with this proposal, wishes to establish a regular form of controlled trade in all elephant specimens, including ivory, in support of elephant conservation, including community-based conservation and the maintenance of elephant habitat. Revenue from regulated trade will, as previously, be managed through a trust fund and used exclusively for elephant conservation and community conservation and development programmes within the elephant range.

Conservation and management of Namibia's elephants: The Namibian elephant population is secure and growing, and the availability of habitat for elephants is increasing. Our conservation model has enabled the expansion of the elephant population from just over 7500 in 1995 to over 20,000 at present. The biggest potential long-term threat to the Namibian elephant population is nevertheless the loss of habitat and the fragmentation of range through the interruption of access routes and conflicts with people in the absence of effective incentive mechanisms to maintain such habitat. Elephants, through their negative impacts on subsistence agriculture and absolute dependence on water resources under the control of people, can easily be excluded from large parts of Namibia outside protected areas. Without a way of benefiting from elephants, elephants are regarded as a liability and economic cost to rural communities, who suffer crop losses, other damages and lose human lives to elephants. The most effective strategy to prevent this displacement is to integrate elephants into rural economies as assets and to demonstrate that elephants contribute to the welfare and development of people. The involvement and empowerment of rural people in natural resource management, in combination with economic and financial incentives through sustainable use, and linked with skills development and capacity building, have been driving

forces behind changes in attitudes towards wildlife on communally-owned land in Namibia. In parts of the elephant range outside protected areas, wildlife numbers have increased dramatically, and the level of illegal killing is not detrimental to our elephant population. Controlled trade in ivory and other elephant specimens, in addition to other direct and indirect forms of economic use of elephants, is therefore in the best interest of the Namibian elephant population. Controlled trade will help to ensure continued access to land outside protected areas by providing strong incentives to communities to protect elephants and their habitat. By contrast, law enforcement alone, without associated incentives, does not provide long-term security from displacement by other forms of land use.

Export of ivory in 1999 and 2008: Namibia fully complied with every requirement imposed by the Conference of the Parties, the Standing Committee and the CITES Secretariat concerning the trade in raw ivory in 1999 and 2008. Namibia contributed to the development of a rigorous international trade control system for raw ivory and successfully exported raw ivory in 1999 and 2008 within that system. These export trades were successful in all respects, and were conducted transparently and under intense international supervision. Namibia demonstrated with this trade of ivory to Japan and China in 1999 and 2008 that all necessary trade controls are in place. It has a functional trust fund under parliamentary supervision for the distribution of trade revenues, all of which are earmarked for conservation. The implementation of Decision 10.1 proved that, with adequate controls and strict enforcement measures, ivory can be traded legally, in such a way as to prevent any ivory other than registered legal stocks from entering such legal trade.

Commitment to other CITES requirements concerning elephant conservation: Namibia has complied with every requirement of CITES concerning the conservation of the African elephant. Namibia continues to exercise strict control over all ivory stocks, but remains concerned over the high costs and security implications of holding large ivory stocks. Ivory continues to accumulate, primarily through natural mortalities. The climate in Namibia is dry, making it virtually impossible to maintain ivory quality without incurring huge expenditures. Namibia has reported all information on ivory stocks, seizures and quotas and the implementation of the MIKE monitoring system within Namibia is now in its 16th year.

Fundamental rights of Namibia within CITES and the role of the Conference of the Parties: Namibia has done its utmost, and at great cost, to make use of the mechanisms provided in CITES to exercise its rights as a Party to the Convention. These rights include trade in its elephant population, which clearly meets the criteria for inclusion in Appendix II, within the framework of the Convention for trade in specimens from Appendix-II-listed species. In disregard of the remedial mechanisms within CITES concerning cases of unsustainable trade in Appendix-II-listed species, such as the significant trade process or the transfer of a population to Appendix I, the Conference of the Parties has on previous occasions imposed increasingly complex requirements for trade in elephant specimens that have all but ensured that such trade does not take place. Namibia believes that this trend strongly undermines the credibility of CITES and highlights the contradictions between CITES and the Convention and Biological Diversity. The Conference of the Parties is accordingly requested to fully consider this issue in its decision on this proposal.

Frustrating the legitimate objectives of a Party concerning a proposed trade that complies in all respects with the provisions of the Convention through an unjustifiable and unwarranted delay in executing an action agreed by the Conference of the Parties within the specified time frame, i.e. the establishment of the decision-making framework, cannot be accepted.

1. Taxonomy

1.1	Class:	Mammalia
1.2	Order:	Proboscidea
1.3	Family:	Elephantidae
1.4	Species:	*Loxodonta africana* (Blumenbach, 1797)
1.5	Scientific synonyms:	None
1.6	Common names:	English: African elephant French: Elephant d'Afrique Spanish: Elefante Africana
1.7	Code numbers:	CITES A-115.001.002.001 (1984(1)) ISIS 5301415001002001001

2. Biological Parameters

2.1 Distribution

Historically, elephants occurred at comparatively low densities throughout Namibia, wherever surface water could be found during the dry season and at highly variable densities over larger areas during past wet seasons. Currently, elephants are found in a continuous zone across northern Namibia, and although some of this range is infrequently used, elephants are becoming more abundant in areas from which recently they were absent (Fig. 1). Elephants in Namibia are migratory-nomadic and depend on their mobility to exploit favorable opportunities over a very large range. They typically have distinct dry season ranges and a much larger wet season dispersal range (estimated at over 100,000 km^2). Elephant distribution in Namibia has been expanding as the result of population increases, and increasing habitat availability.

2.2 Habitat availability

Elephants in Namibia occur in the northern Namib Desert, the central northern *Colophospermum mopane* savannas, semi-arid woodlands of the northern Kalahari system and riparian systems of the Okavango, Kwando, Chobe, Linyanti and Zambezi Rivers in the northeast of the country. This area includes three distinct land tenure categories, namely protected areas, communally-farmed State land and freehold land. The availability of habitat for elephants in protected areas in Namibia significantly increased during the past century, through the development of the protected area network and by the provision of surface water in addition to existing springs and rivers.

Elephants are not confined to any protected area, however, and elephant habitat should be seen within the context of seasonal and longer-term variation in elephant distribution and human settlement as influenced by climatic variation. The bulk of elephant range outside protected areas falls within the category of communal land principally used for subsistence farming. In this regard, 82 communal land conservancies have been registered with several more emerging (see Fig. 1). In 2004 when Namibia last proposed an amendment to the listing of her elephant population, this number was 31, indicating the tremendous growth in our community based natural resource management programme. Communal conservancies are formed with the primary reason of benefiting communities from the sustainable utilization of natural resources. More than 100 000 km^2 (35 000 km^2 in 2004) of land within the elephant range outside protected areas is now included in registered communal conservancies. Many of these conservancies fall within the critically important districts in northern Namibia that serve as the migratory routes, drought corridors or seasonal range of several thousand elephant and the potential dispersal area for even more elephants concentrating in the Chobe-Linyanti system along the Botswana border and the Chobe National Park (hereafter N.P.) in Botswana.

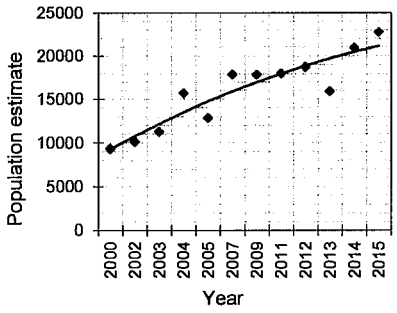
2.3 Populations status

The following table shows the most recent estimates of the main elephant populations in Namibia, obtained from aerial surveys, based on standardized sample counting techniques. It must be noted that elephants are highly mobile in Namibia, and that movement in and out of areas can therefore cause major periodic fluctuations in numbers over time.

Area	**Year of latest estimate**	**Estimated elephant population**
North-East Parks and surrounding areas	2015	13 136
Khaudom National Park	2015	4 150
Nyae-Nyae Conservancy	2015	2 263
Kunene Region	2009	352
Etosha National Park	2015	2 810
	Total	

2.4 Population trends

The Namibian elephant population is viable in all respects and is increasing. The figure shows the elephant population trend in Namibia since 2000 based on aerial surveys. Estimates since 2000 are all based on similar sample aerial surveys. The current estimate is the highest ever recorded in Namibia.



2.5 Geographic trends

Geographic range for elephants has been increasing in Namibia. The current elephant range is probably the largest that it has been in more than a century, with elephants expanding into previously unused or rarely used parts of the Kunene, Erongo, Kavango East and Kavango West regions. The population of Etosha N.P. dates back only to 1950, while the population in Khaudom National Park-Tsumkwe district was founded in the early 1970s (MET data).

2.6 Role of the species in its ecosystem

Elephants indisputably have a significant impact on farming activities and community life that, in the case of land outside protected areas, is of greater importance at present than their broader ecological role in ecosystems shared with people. Conflicts between people and elephants over water and crop damage have severely increased in the past decade, and will become the most serious area of conflict in future. This situation can be counteracted if elephants are perceived to have value to the communities living with them.

2.7 Threats

Elephant habitat in Namibia is prone to serious periodic droughts and is arid or semi-arid in general. The Namibian elephant population, based on historical accounts and direct monitoring has nevertheless managed to increase throughout the previous century despite arid conditions. The principal basis for drought tolerance is the great mobility of elephants in Namibia and knowledge of terrain that allows them to travel long distances between waterholes. It is vital that elephants retain access to range in and out of protected areas and to vital movement corridors, as would only be possible if they are not seen as being incompatible with farming practices. If communities are not able to benefit from the presence of elephants through sustainable utilization, and through trade in ivory recovered from natural mortalities, elephants outside protected areas in Namibia face a serious long-term threat of displacement through progressive range conversion to agriculture.

The Namibian elephant population is secure and viable, and the fact that this population has been recovering throughout the past century in semi-arid habitat indicates its resilience. It is not threatened.

3. Utilization and trade

3.1 National utilization

Namibia has not exploited elephants directly for commercial trade or domestic consumption, except through sport hunting and photo-tourism. Small numbers of elephants were removed in 1983 and 1985 to achieve specifically targeted population reductions for conservation purposes during drought periods in Etosha N.P. All ivory previously traded was an accumulation of ivory originating from natural and management related mortalities, and can thus be seen as a byproduct of effective long-term management. It must be stressed that no elephants have been, or will be, killed specifically to obtain ivory or other products for trade. Ivory is recovered from all recorded natural mortalities as well

as elephants destroyed as problem animals, and strict national legislation makes it obligatory for the public to hand in any ivory found.

Sport hunting (trophy hunting, recreational hunting): The level of sport hunting is largely determined by the 0.5% of standing population guideline (Martin 1986). MET has established a national annual export quota through CITES of 90 trophy hunted elephants per year (180 tusks per year). This quota level was necessary to allow for the possibility that the tusks of elephants hunted in one year may only be exported the following year, as could result from delays in importing countries or the processing of specimens by taxidermists. The actual number exported amounted to 43 (86 tusks) in 2000, 34 (68 tusks) in 2001, 33 (66 tusks) in 2002, 48 (96 tusks) in 2003, 43 (86) in 2004, 48 (96) in 2005, 32 (64) in 2006, 20 (40) in 2007, 81 (162) in 2008, 25 (50) in 2009, 90 (180) in 2010, 48 (96) in 2011, 63 (126) in 2012, 67 (132) in 2013, 52 (104) in 2014 and 53 (106) in 2015.

Leather and hair goods: Namibia currently routinely recover elephant hides from the few cases when elephants are destroyed for management reasons (e.g. problem animal control), as well as from trophy-hunted animals, to maximize benefits that can be re-invested into elephant conservation.

Ivory stocks: The current status (as of 26 April 2016) of the Namibian ivory stocks is summarized in the following table, where natural and management origin refers to ivory obtained from natural mortalities, or from management related practices (i.e. of legal, Namibian origin); seized origin refers to ivory recovered through seizures (i.e. of illegal origin) and unknown refers to items for which no documentation is available:

Origin	Description	Total number	Total weight (kg)	Mean weight (kg)
Natural and Management	Whole tusks	2 638	18 703.15	7.08
	Ivory pieces	1 745	3 222.02	1.85
Sub-total			**21 925.17**	
Seized	Whole tusks	5 459	34 552.73	6.34
	Ivory pieces	322	985.32	3.06
Unknown	Whole tusks	215	1 348.68	6.27
	Ivory pieces	62	70.72	1.14
Total	**Whole tusks**	**8 312**	**54 604.56**	
	Ivory pieces	**2 129**	**4 272.74**	
GRAND TOTAL			**58 877.30**	

All seized or confiscated tusks are separately stored, with some tusks being held on behalf of the Protected Resources Unit of the Namibian Police (PRU) as evidence for pending court proceedings. Growing ivory stocks represent major management, administrative and security problems. Furthermore, ivory in storage declines in quality and value over time, and this represents a major

cost to Namibia. The international conservation community has to take cognizance of this situation and the impasse that conservation agencies find themselves in, in countries where elephant populations have been expanding, where law enforcement is effective and where there is cooperation from the public.

Namibia maintains a detailed computer database of all specimens in storage, with source documentation, and all specimens are marked so as to make them individually recognizable. Namibia has provided to the CITES Secretariat a complete inventory of all stocks of raw ivory each year, before 31 January, as required by Resolution Conf. 10.10 (Rev.), and will continue this practice in future years.

The Namibian ivory stock is growing by 4.5% per year, on average.

3.2 Legal international trade

Namibia conducted legal international trade in ivory since 1985, in 1999 and 2008, as a highly regulated export of 19,870 kg to Japan and China in total. On both occasions the CITES Secretariat confirmed that the trade had taken place successfully, and that there was full compliance with all precautionary undertakings. The revenue obtained from the auctions was deposited in a Trust Fund established though an Act of Parliament, and was used exclusively for projects that benefit elephant conservation directly and to support rural conservation programmes.

3.3 Illegal trade

The incidence of illegal killing of elephants in Namibia is biologically insignificant (Annex 2). Incidents of illegal hunting of elephants in Namibia include cases of illegal shooting before or after elephants have damaged or have threatened to damage crops and farms, and where no attempt is made to collect the ivory. It is nevertheless very difficult to separate illegal hunting with the intent to collect ivory from all hunting incidents, and illegal hunting is notoriously difficult to monitor. Namibia has, however, contributed fully to the system to monitor the illegal trade in ivory and the illegal hunting of elephants, as outlined in the Notification to the Parties 1998/10, and has fully implemented the MIKE system (Monitoring of Illegal Killing of Elephants) at its allocated site.

The incidence of seizures of ivory in Namibia, as communicated also to the CITES Secretariat through the ETIS system, is summarized in Annex 3. The relatively high albeit declining incidence of seized and confiscated ivory in Namibia is not so much evidence of illegal killing within Namibia, as of illegal trade through Namibia. Seizure levels point to successful law enforcement. The numbers of seizures have, nonetheless, declined in the past few years.

3.4 Actual or potential trade impacts

Namibia sees the absence of trade as the greatest threat to elephant populations, stemming from the fact that elephants have in the past had no or very little direct value to rural communities, where so many elephants use land that people also depend on for farming. Elephants will only survive in the long term if they are more valuable to people than their damage to alternative forms of land use, i.e. subsistence farming. The controlled ivory trade will directly benefit the survival of the species as all revenue will be reinvested in elephant conservation in Namibia, including rural community conservation programmes, and monitoring of the impact of trade will be supported.

3.5 Captive breeding or artificial propagation for commercial purposes

Captive breeding plays no role in the conservation of the African elephant.

4. Conservation and Management

4.1 Legal status

4.1.1 National

Elephants are classified as a "Specially Protected" species under the Nature Conservation Ordinance (Ordinance 4 of 1975, as amended) in Namibia. Hunting, capture, transport, being in possession, and trade (import, export, re-export), in raw ivory, live animals and other derivatives are subject to permits and conditions. Ivory and all other parts of an elephant are classified as "Controlled Wildlife Products" under the Controlled Wildlife and Trade Act 9 of

2008. The maximum penalty for contraventions related to trade in Controlled Wildlife Products is N$200 000 (approx. US$13 989) and/or 20 years imprisonment. It is worth noting that we are currently in the process to amend our legislation to increase the fine to N$10 000 000 (approx US$699 300) and/or 40 years imprisonment. On the basis of the Animal Health Act (Act 1 of 2011), the import and transit of raw wildlife products, including ivory, are subject to permits issued by the Veterinary department. The transport of raw wildlife products across national and international veterinary cordon fences requires a veterinary permit. Upon request, health certificates are issued for the export of such products. There is a general policy not to allow import of raw wildlife products from Angola and Zambia, and very strict controls apply to the movement of all biological derivatives and live specimens out of disease control areas.

4.1.2 International

The Namibian elephant population is considered to be secure and increasing by the Ministry of Environment and Tourism. Analogous to the IUCN criteria, the Namibian elephant population would fit into the category of Least Concern. According to the IUCN criteria the continental population has a higher status of Vulnerable.

4.2 Species management

4.2.1 Population monitoring

The Ministry of Environment and Tourism (MET) is responsible for monitoring elephants in protected areas and large parts of their range on communal lands. Aerial surveys have been used to monitor elephant populations in Namibia since the late 1960s, with gradual improvements and expansions until entire populations were covered in the 1970s. All surveys were initially aimed to be total counts, but diminishing funds prior to Independence lead to the use of sample techniques. MET aims, where possible, to survey the entire elephant range every second year, but more frequent estimates of population size are derived for smaller management units or from censuses done for other purposes. Ground-based monitoring is done in all conservancies. Namibia maintains, to our knowledge, the largest road count monitoring system in the world.

4.2.2 Habitat conservation

Almost 17% of the land surface of Namibia has been placed in proclaimed protected areas, including approx. 50% of the national elephant range. An increasing proportion of the elephant range is being incorporated into communal conservancies. A cornerstone of wildlife conservation philosophy in Namibia and other southern African countries is that habitat loss, not trade, ultimately threatens all wildlife outside protected areas, and indirectly also a substantial portion of wildlife inside those areas - unless wildlife becomes more valuable than the land use systems that are threatening to replace them. The entire focus is therefore aimed at protecting elephant (and other wildlife) habitat outside protected areas, by providing people with appropriate incentives and benefits from sustainable utilization of wildlife populations. Concerning elephants, the major forms of resource use will be the selling of trophy hunting quotas, a strictly controlled ivory carving industry using ivory made available from the central government stock and controlled trade in ivory recovered from natural mortalities and problem elephant control.

4.2.3 Management measures

Protected areas in Namibia are strictly managed to ensure minimal disturbance and to ensure the maintenance of biodiversity. Management practices include the supply of water, management of pastures through controlled burning and stocking rates, prevention and control of diseases, research and monitoring of key environmental parameters and the provision of security through anti-poaching work by wildlife protection units.

Conservancies on communal lands operate under the guidance of the Ministry of Environment and Tourism with approved management plans where the requirement that resources are sustainably used is emphasized. Conservancies have to be registered with MET and are supported by MET in wildlife management and utilization, especially concerning population monitoring, quota determination, management plans, marketing and general training.

4.3 Control measures

4.3.1 International trade

Permit control: The MET permit office at Windhoek issues all permits relating to elephants or elephant derivatives. No competencies are delegated to local or regional authorities. (The Directorate of Veterinary Services in Windhoek issues all veterinary permits).

Marking of ivory: All ivory is marked in accordance with Resolution Conf. 10.10, and the marks are included in a database of ivory of known Namibian origin showing the source of each specimen. All specimens of ivory are furthermore marked in a standardized way derived from the domestic permit control system.

Customs and border control: Namibian Customs Officers check CITES, veterinary and transit permits. Where necessary, they refer to the Namibian Police or district veterinary officer. Customs representatives played a key role in supervising the experimental trades of ivory in 1999 and 2008.

Law enforcement: Law enforcement is a joint effort by the Ministry of Environment and Tourism, the Protected Resources Unit of the Namibian Police, and the Customs Service. The incidence of ivory confiscations in Namibia points to effective law enforcement, especially by the Protected Resources Unit of the Namibian Police. Law enforcement agencies rely primarily on information, and well-established informer networks exist and are maintained. This approach has been the most effective in a situation of a low human density and government aiming to remain as small as possible.

Trade controls for raw ivory: Only the Namibian population is included in this proposal. All specimens for export will have been individually marked in accordance with Resolution Conf. 10.10. All other ivory will also be individually marked and registered with the CITES Secretariat to ensure that there can be no mixing of unknown or foreign ivory. All revenue from ivory sales will be used exclusively for elephant conservation and community development and conservation programmes. Namibia will cooperate with neighboring countries in the monitoring of elephant populations and illegal trade, and will assist within its means, credible international organizations involved in such monitoring.

Trade controls for worked ivory: Possession, manufacturing and trade in all elephant specimens are regulated in Namibia. Persons or companies wishing to manufacture or trade worked ivory elephant have to be registered with the Management Authority and are required to maintain comprehensive records of stocks, manufacturing and trade in accordance with Resolution Conf. 10.10.

Trade controls for hides and leather goods: Possession, manufacturing and trade in all elephant specimens are regulated in Namibia. Persons or companies wishing to manufacture or trade elephant hide or leather goods have to be registered with the Management Authority and are required to maintain comprehensive records of origin of stocks, manufacturing and trade.

4.3.2 Domestic Measures

Refer to paragraphs 4.1 and 4.3.1 regarding control measures to ensure sustainable use and management of the elephant population, and preventing illegal trade from impacting on the national population. Standing policy determines that all MET officials must report elephant mortalities and recover ivory. All ivory has to be recorded and marked, and transported to the national stockpile in Windhoek as soon as possible.

5. Information on similar species

Not applicable.

Annotation on the CITES Appendices applying to the elephant populations of Botswana, Namibia, South Africa and Zimbabwe (listed in Appendix II)

"For the exclusive purpose of allowing:

a) trade in hunting trophies for non-commercial purposes;

b) trade in live animals to appropriate and acceptable destinations, as defined in Resolution Conf. 11.20, for Botswana and Zimbabwe and for *in situ* conservation programmes for Namibia and South Africa; c) trade in hides;

d) trade in hair;

e) trade in leather goods for commercial or non-commercial purposes for Botswana, Namibia and South
Africa and for non-commercial purposes for Zimbabwe;

f) trade in individually marked and certified ekipas incorporated in finished jewellery for non-commercial purposes for Namibia and ivory carvings for non-commercial purposes for Zimbabwe;

g) trade in registered raw ivory (for Botswana, Namibia, South Africa and Zimbabwe, whole tusks and pieces) subject to the following:

   i) only registered government-owned stocks, originating in the State (excluding seized ivory and ivory of unknown origin);

   ii) only to trading partners that have been verified by the Secretariat, in consultation with the Standing Committee, to have sufficient national legislation and domestic trade controls to ensure that the imported ivory will not be re-exported and will be managed in accordance with all requirements of Resolution Conf. 10.10 (Rev. CoP16) concerning domestic manufacturing and trade;

   iii) not before the Secretariat has verified the prospective importing countries and the registered government-owned stocks;

   iv) raw ivory pursuant to the conditional sale of registered government-owned ivory stocks agreed at CoP12, which are 20,000 kg (Botswana), 10,000 kg (Namibia) and 30,000 kg (South Africa);

   v) in addition to the quantities agreed at CoP12, government-owned ivory from Botswana, Namibia, South Africa and Zimbabwe registered by 31 January 2007 and verified by the Secretariat may be traded and despatched, with the ivory in paragraph g) iv) above, in a single sale per destination under strict supervision of the Secretariat;

   vi) the proceeds of the trade are used exclusively for elephant conservation and community conservation and development programmes within or adjacent to the elephant range; and

   vii) the additional quantities specified in paragraph g) v) above shall be traded only after the Standing
   Committee has agreed that the above conditions have been met; and

h) no further proposals to allow trade in elephant ivory from populations already in Appendix II shall be submitted to the Conference of the Parties for the period from CoP14 and ending nine years from the date of the single sale of ivory that is to take place in accordance with provisions in paragraphs g) i), g) ii), g) iii), g) vi) and g) vii). In addition such further proposals shall be dealt with in accordance with Decisions 14.77 and 14.78 (Rev. CoP15).

On a proposal from the Secretariat, the Standing Committee can decide to cause this trade to cease partially or completely in the event of non-compliance by exporting or importing countries, or in the case of proven detrimental impacts of the trade on other elephant populations.

All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly."

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. **OPERATOR INFORMATION**
   a. Name of Area Operator: S.M.J Safaris
   b. Years in business: 17 years
   c. Name of Company conducting hunt: S.M.J Safaris
   d. City where hunt will take place: Tsumkwe
   e. Country where hunt will take place: Namibia

2. **CONCESSION**
   a. Name of Concession: Nyae-Nyae Conservancy
   b. Area in Km^2: 890 000km2
   c. Land tenure: Nyae-Nyae Conservancy San people
      Government Lease ____ Community x ____ Private Ranch ____ Private Conservancy
   d. Length of Concession Agreement: 5 years
   e. Can it be renewed? Yes x No
   f. Length of Renewal, if applicable:
   g. Estimated total amount received in trophy fees last year, if applicable: US$ 357 900-00
   h. Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:
      We have to hand in annual reports on state of game and habitat status. We have to permanently employ 12 people from local origin. There are numerous programs were we as safari compony has obligations to educate some of the local people as PHs as well as skinners, drivers, and general camp staff. We normally send them to courses that the professional hunters association offer. We have an annual agreement to provide schools in the area with food for the children in the schools. We do antipoaching patrols in association with the conservancy game guards. It is the responsibility of the safari compony to maintain the 17 water points for game in the area. With out these water points the game in the area has no chance to survive. These water points are pumping 355 000 l of water a day for the game in the area.
   i. Please provide the Concession location and nearest City: North-East Namibia / Tsumkwe
   j. Please attach a map or maps with the boundaries marked and showing the nearest City
   k. If the Concession borders a National Park, please provide Park name: Kaudom National Park
   l. Description of general and distinctive habitat features and any water features:
      Genera Savanah with some natural water springs that does dry up during the dry season and then 17 borehole water points that are permanently.

3. **COMMUNITIES IN THE CONCESSION**
   a. Are there any communities living in the Concession? x Yes ____ No
   b. If so, estimated number of people or villages in the Concession? 2500
   c. Are there communities bordering this Concession? x Yes ____ No
   d. If so, estimated number of people or Villages around the Concession? Unknown

4. **RELEVANT GAME POPULATIONS IN THE CONCESSION:**[1]

[1] The new Fish and Wildlife Services (FWS) Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Species Name	Relative Abundance			Estimated Population	3-Year Trend			How is it monitored?
	Dense	Avg.	Sparse		Up	Down	Stable	
Elephant	x			2070	x			Research/counts
Lion			x	15	x			Research/counts
Leopard	x			250	x			Research/ counts
Prey species			x	13160	x			Game counts

5. LOCAL COMMUNITY PARTICIPATION

a. Total employment number: _____

b. Please identify the number and type of all employees:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF THIS TYPE WHO ARE LOCAL/FROM NEARBY COMMUNITIES
PROFESSIONAL HUNTERS	3	3
TRACKERS	4	4
ANTI-POACHING SCOUTS/RANGERS	13	13
OTHER ANTI-POACHING		
COOKS/HOUSEKEEPERS	4	4
COMMUNITY COORDINATORS	3	3
MANAGERS	1	1
BIOLOGISTS	5	5
OTHERS: _____		

6. Number of staff employed in the off-season: All staff are permanently employed.

a. Please identify the number and type of staff that are engaged when the season is not open:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF LOCALS /FROM NEARBY COMMUNITIES	WHEN EMPLOYED?
ANTI-POACHING STAFF	13	13	
MANAGERS	1	1	
MAINTENANCE	2	2	
ROAD OPENING /CONSTRUCTION	2	2	
COMMUNITY RELATIONS PERSONNEL	1	1	
OTHERS:			

7. ANTI-POACHING EFFORTS:[2]

a. Number of Anti-Poaching staff: 13

b. Are Anti-Poaching Patrols conducted during the hunting season, off-season, or both?
Hunting season: _____ Off-season: _____ Both seasons: x

c. Months during which Anti-Poaching Patrols are conducted: 12 months

d. Number of Anti-Poaching Patrols per month: 1-5

e. Description of Anti-Poaching equipment, vehicles, etc.:
Vehicles, Bino's and camping equipment as well as personal gear

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?
MET, Conservancy as well as hunting operator

g. Do you offer rewards to poaching informants leading to arrest? x Yes _____ No

[2] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

7. ANTI-POACHING EFFORTS [*CONTINUATION*]

h. Do you offer rewards to poaching informants upon conviction? x Yes _____ No

i. Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS	$14000,00	$15600,00	$16000,00	
EQUIPMENT	$10000,00	$10000,00	$10000,00	
VEHICLES		$35000,00		
PETROL	$1200-00	$1200-00	$1200-00	
REWARDS PAID				Poaching is very low in the area
OTHER: _____				
OTHER: _____				
TOTALS	$25200-00	$51800-00	$27200-00	

j. What currency are the expenditures given in? US$

8. ANTI-POACHING RESULTS:

CATEGORY	2016	2017	2018	REMARKS
POACHING INCIDENTS DISCOVERED	1	3	2	
ELEPHANT CARCASSES OBSERVED	0	0	0	
LION CARCASSES OBSERVED	0	0	0	
LEOPARD CARCASSES OBSERVED	0	0	0	
IVORY POACHERS ARRESTED	0	0	0	
MEAT POACHERS ARRESTED	0	4	2	
OTHER POACHERS ARRESTED	0	0	0	
POACHERS CONVICTED	0	0	0	
SNARES/GIN TRAPS COLLECTED	3	5	2	
FIREARMS CONFISCATED	0	0	0	
VEHICLES CONFISCATED	0	0	0	
BICYCLES CONFISCATED	0	0	0	
BOATS/NETS CONFISCATED	0	0	0	
TUSKS RECOVERED	0	0	0	
OTHER: _____				

9. COMMUNITY INVESTMENT:[3]

a. Does the Company contribute money or goods/services to local communities?
x Yes ____ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)?
50% of total income goes to local communities. Recuired by contract

c. Does the Company provide game meat to nearby communities? Yes x No ____

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:
All the meat hunted goes to the comminuties and this adds up to about 45 tons per season to estimate a value would be very difficult as elephant meat has not got a value on the open market as we cannot sell it. At normal game meat prizes this will add up to $ 75 000-00 per year

e. If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.
We very seldomly gets PAC animals

f. Please describe any consolation payments made to local residents damaged by game species

g. What currency are the expenditures reported in? USD$

SPECIES	DAMAGE CAUSED	CONSOLATION PAID 2016	CONSOLATION PAID 2017	CONSOLATION PAID 2018
ELEPHANT				
LION				
LEOPARD				
OTHER				

a. Please describe any community projects paid for by the Company:
Most of the community programs are run by the conservancy trough the money earned from trophy hunting. There a lot of them climate change, sustainable usage, cattle breeding, family planning but to mention a few . The safari compony does provide it's workers with courses every three years that has direct needs in the safari compony, like PH's schooling housekeeping skinning vehicle maintenance and cooking courses

b. What currency are the expenditures reported in? As these project are run by the conservancy we cannot give an amount on them, from the compony side we have to spend $3500-00 every three years on training.

TYPE OF PROJECT	SPENDING 2016	SPENDING 2017	SPENDING 2018	REMARKS
EDUCATION (E.G.: CLASSROOMS, OFFICES)				

[3] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

	2018:	$100000	**2018:**	0	**2018:**	$$7000	**2018:**	$12000

11. Approximate Dollar amount and/or percentage of Company's revenue from U.S. Clients: $450 000-00
45%

12. OTHER INFORMATION: Please provide a narrative of other enhancement information about the operation, such as any special Hunting Policies (e.g., aging, size, resting areas), Concession Improvements (e.g.: digging and maintaining boreholes, restocking), Management Activities, Research, etc.

We have very strict hunting laws in the area that does not allow you to shoot close waterholes or roads nor from vehicles and also only during legal hunting times. Since we have taken over the hole area in 2017 we have fixed up all the game water points in the area which before the time only 20% of them were in working order. All village water points are maintained by the conservancy and even 5 new boreholes were made in the last few years. Community members not only get the meat from the meat distribution plan that we have in place but also gets about $200 000,00 payed out straight to them in cash from the moneys received from trophy hunting.

We in the area has picked up that from there has been issues with the importation of ivory from the Namibia to the USA our USA client base has really declined.

13. I declare that the foregoing is true and correct:

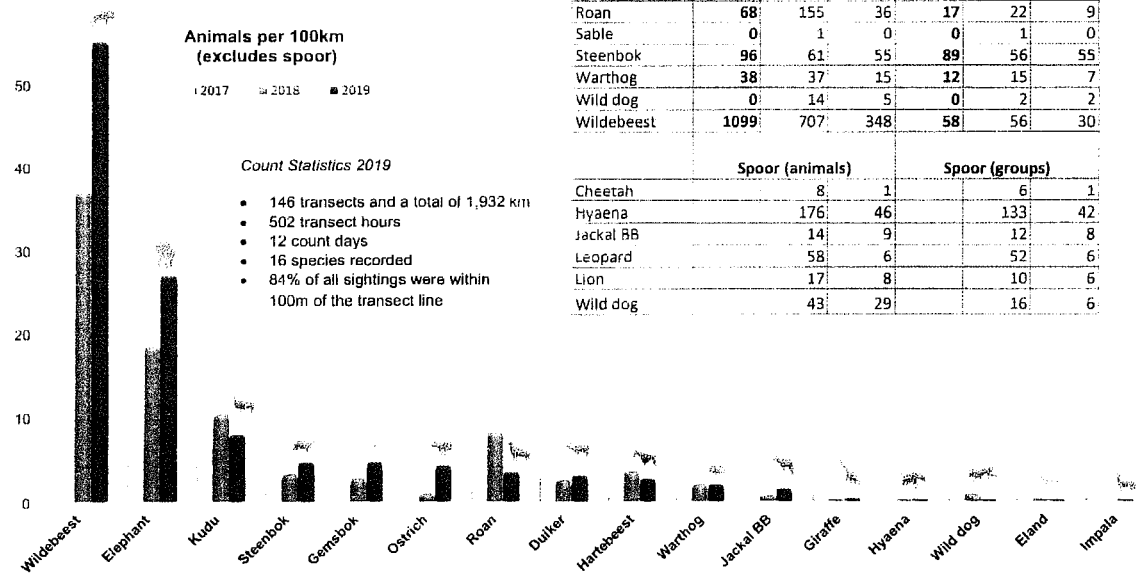
Species	Spoor (animals) 2019	2018	Spoor (groups) 2019	2018
Cheetah	8	1	6	1
Hyaena	176	46	133	42
Jackal BB	14	9	12	8
Leopard	58	6	52	6
Lion	17	8	10	6
Wild dog	43	29	16	6



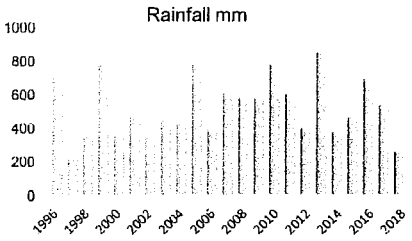
Count Statistics 2019

- 146 transects and a total of 1,932 km
- 502 transect hours
- 12 count days
- 16 species recorded
- 84% of all sightings were within 100m of the transect line

Estimates

Species	Estimate	95% CL Low	95% CL High	Model
Duiker	1,030	660	1,620	HN
Elephant	2,070	1,280	3,350	HN
Gemsbok	680	365	1,280	HN
Hartebeest	300	140	750	U
Kudu	1,455	980	2,160	HN
Ostrich	280	145	540	U
Roan	650	320	1,300	U
Steenbok	2,195	1,590	3,035	HN
Warthog	185	100	350	U
Wildebeest	5,185	3,280	8,200	U

Estimates (rounded) were derived using DISTANCE analysis which takes account of drop-off in animal detectability with distance from the transect line. Ten species had sufficient sightings to adequately derive species detection curves and therefore produce estimates. Model. U=uniform; HN=half normal.



Synopsis

Line transects were started in 2017 and represent almost half of the total area of the conservancy and include most of the waterholes. The area not covered by transects has low animal densities due to reduced habitat suitability and people pressure.

Transect counts have recorded 22 species including 6 predator species. Based on spoor sightings hyaena are the most common predator, followed by leopard and wild dog.

The top 3 species in terms of sightings between 2017 and 2019 included wildebeest, elephant and kudu.

Nyae Nyae wins conservation award

NEXT TO GODLINESS ... Ignatious Jingura sorts out discarded obsolete electronic gadgets at the electronic waste management company in Windhoek. He said in line with the launch of this year's national clean up campaign by environment minister Pohamba Shifeta in April which is scheduled for September, as well as the recent Windhoek municipality's recent clean-up campaign, people should always ensure they get rid of waste from their environment everyday. Photo: Contributed.

STEVE FELTON

NAMIBIA'S oldest conservancy, Nyae Nyae, was awarded the prestigious Edmond Blanc prize at an event held at the Safari Court Hotel in Windhoek on Saturday.

The International Council for Game and Wildlife Conservation (CIC) awards the prize for outstanding efforts in wildlife conservation and game management.

In the words of the CIC: "Only those game reserves, and game organisations that have had outstanding success in their work to conserve [the] natural environment, to protect free-roaming animals in the wild and to manage game according to principles of sustainability shall be eligible for the Edmond Blanc prize."

The prize was awarded to Nyae Nyae Conservancy and stakeholders, including professional hunter Stephan Jacobs of SMJ Safaris and the Ministry of Environment and Tourism.

It was presented to chief Tsamkxao ≠Oma, who explained traditional hunting methods to the modern trophy hunters gathered from around the world.

"We hunt without noise," he said. "In the past we would track an animal and then stay with it until the meat was finished. But this would chase other animals away, because of our smell."

Wishing to conserve and keep wildlife in the conservancy, the chief said they have created large hunting areas, away from the villages, to sustain wildlife for generations to come.

Referring to the changes since the conservancy was formed in 1998, the chief said that hunting is now done according to quotas set by the Ministry of Environment and Tourism based upon game counts.

Traditionally the San people only hunted what they needed to eat, said Tsamkxao ≠Oma, and the quota system also ensures that game is conserved.

In motivating the prize for Nyae Nyae, Rolf Baldus, a German economist who has published widely on conservation issues, said Nyae Nyae, located in the so-called Bushmanland in the north-east of Namibia, covers an area of approximately 900 000 hectares of wilderness, which is rarely found in Africa today.

"Sustainable hunting is one way to conserve and carefully develop [San] culture," writes Baldus. "It promotes wildlife conservation with clear measurable results through sustainable use of wildlife," and: "Through community involvement ... it has combated wildlife crime and continues to do so."

Poaching in the area is at a very low level.

Stephan Jacobs is the current professional hunter contracted by Nyae Nyae conservancy.

In a brief history of conservation hunting in Nyae Nyae, he stated that in 1970 there were no elephants in the area. They first migrated from the Zambezi area in 1971, and when the legendary hunter Volker Grellmann obtained the first hunting concession in the area, there were 80-100 bull elephants in Nyae Nyae.

Today there are between 1 500 and 2 000 elephants in the conservancy, according to Jacobs.

The hunter went on to state that conservation hunting actively conserves wildlife, and that plains game and lion numbers have increased dramatically in Nyae Nyae.

Modern hunting of game, including buffalo and a quota of nine elephants in 2019, is done with rifles, but tracking is still done on foot using the skills of San trackers who cover up to 30 kilometres a day.

Employment of trackers is one of the benefits of conservation hunting. Others include the employment of conservancy rangers and cash benefits to what was one of the poorest communities in Namibia, said Jacobs.

Almost all of the N$2 million paid out to conservancy members in each of the last two years comes from conservation hunting, which

also pays for water holes for game.

Meat for the community is also a vital benefit of sustainable hunting for a poor community, he said, with 30 tonnes being distributed.

Namibia, in its presentation to the CITES convention later this year, will argue that the sustainable use of wildlife brings financial and social benefits to rural communities and conservation benefits to wildlife.

In motivating the Edmond Blanc prize, Dr Baldus stated that Nyae Nyae "has followed strictly all Cites rules and fulfils fully the expectations of Cites that hunting protected species contributes to their conservation."

Edmond Blanc Prize Awarded to the Nyae Nyae Conservancy and Stakeholders 10 May 2019

sustainable wildlife use. The International Council for Game and Wildlife Conservation (CIC) has been awarding game reserves, conservation associations and organizations since 1928, choosing one area every second year, honoring those that have had outstanding success in their work to conserve the natural environment, to protect free-roaming animals in the wild and to manage game according to principles of sustainability. During the closing ceremony of this year's 66th General Assembly, Namibia, the Edmond Blanc Prize was given to the Nyae Nyae Conservancy and Stakeholders, and was awarded to Stephan Jacobs for their work as professional hunters within the conservancy. A short dance was performed on stage to commemorate the occasion, which was followed by Chief Tsamkxao ≠Oma of the Nyae Nyae conservancy giving his thoughts as the Chief Bobo. He spoke of the changes since the creation of the conservancy, with particular mentions to the use of designated areas specifically for the purposes of hunting. Nyae Nyae's dedication to the use of modern hunting practices, and their adoption of hunting regulations and quotas, was also highlighted.

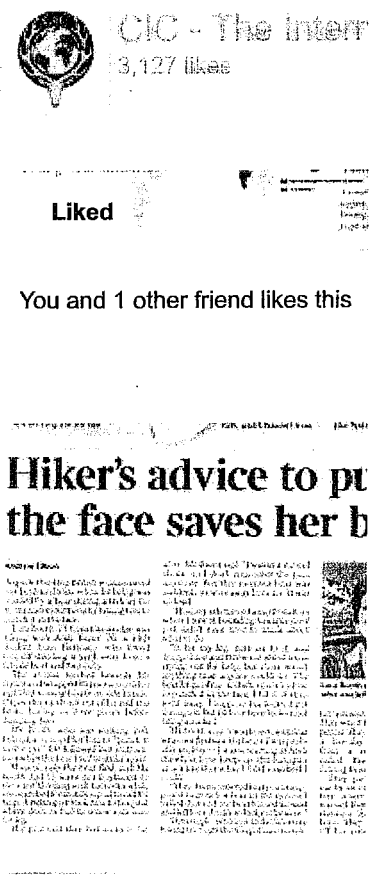
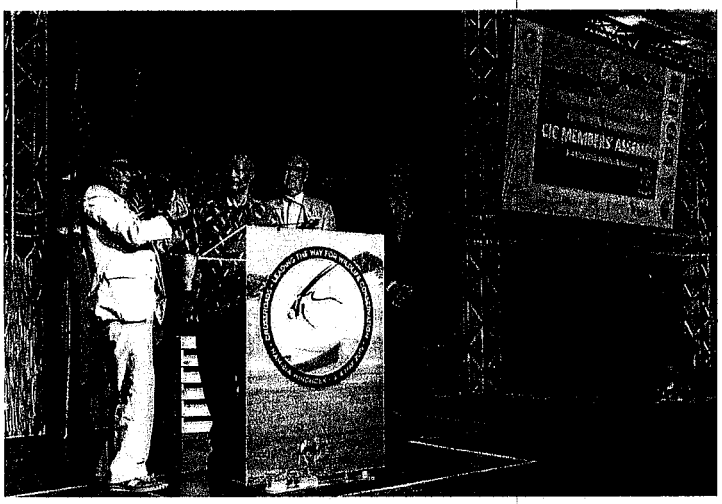
Stephan Jacobs then took the stage to give a statement on his experience as a professional hunter at the Nyae Nyae conservancy. He opened by stating the huge difference in elephant numbers, as well as lions and plains game, since the introduction of the conservancy in 1998; elephant numbers were estimated to be between 80-100 in 1978, with the current elephant population numbering between 1500 and 2000. Supplying water to these elephants was noted as one of their most significant achievements, with the average elephant bull consuming 250l of water a day.





The contributions of trophy hunting and what is has achieved for Nyae Nyae were emphasized, which includes providing 85% of the conservancy's income, funding a number projects including a cash benefit (in 2017/18 more than 2 million Namibian dollars was given to conservancy members as cash benefits). Meat distribution, totaling more than 50 tonnes of meat per year, and job opportunities were regarded as additional benefits.

Mr. Jacobs also stressed the importance of the Sun people, who provide knowledge of traditional hunting techniques (such as tracking) and how to coexist with wildlife when living amongst them. He gave an overview of a typical day in his life as a professional hunter, which includes tracking and identifying elephants that are suitable to be hunted – on average they look through 80-100 elephant bulls before finding one sufficient in size, age and other characteristics.

Achievements of the Nyae Nyae Conservancy

Nyae Nyae was considered for this prize on the basis of their outstanding achievements in conservation, fulfilling multiple criteria set out by the CIC. Their work in the sustainable use of wildlife has yielded clear and measurable results through an increase in the number of wildlife, particularly in the restoration of elephant numbers in the conservancy. Aggregating data from aerial surveys, moonlight waterhole and foot transect counts, it was found that elephant numbers have increased at an average rate of 3.0% per year between 1998 and 2015. Much of this is due to the work that Stephan and his team have done in the creation of new boreholes that provide water to elephants – water can be considered a limiting factor to elephant population growth in this arid area.

Their approach to community involvement in conservation was also commended. The model, which incorporates ideas of community based natural resource management, shifted the majority of revenues to the local San people. Nyae Nyae's community led approach gave local

community members a reason to care about wildlife, and provided the San people with employment opportunities. Stephen works closely with the San on hunts, making good use of their tracking abilities. In addition, the San's involvement in anti-poaching measures has led to the control of general poaching within the conservancy.

Their dedication to conducting responsible hunting was recognized as a further achievement by the CIC. Nyae Nyae has consistently elected professional hunters, acting as lease-holders for a five year period in the conservancy, that have shown their ability to successfully manage the conservational and socio-economic responsibilities associated with the role. In regards to their methodology when it comes to hunting, much care goes into choosing animals with the suitable characteristics. For the case of elephants, only older, post-productive elephant bulls are selected for this purpose. The hunting results of recent years are also impressive; the average weights of the tusks of all trophies were consistently well over 70 lbs with a positive, upwards trend – this is unmatched in Africa today.

The CIC would like to congratulate Mr and Mrs. Jacobs, as well as the Nyae Nyae Conservancy and stakeholders, on this achievement and we hope that their work can inspire others in the

sustainable wildlife use community to work towards even greater successes going forward.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Whitworth	Jared	Wayne	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			(b) (6)

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Hardinsburg	KY	40143	Breckinridge	U.S.A.
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions* [50 CFR 13.11(d)].
2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS And South African Elephant.

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Same As Page 1. A self-addressed envelope is enclosed.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Jared Whitworth
   (b) (6)
   [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

a. ~~Leopard~~ Elephant (~~*Panthera pardus*~~ Loxodonta Africana) Quantity: 1 (~~Limited to the import of two per calendar year~~). If you wish to import a ~~leopard~~ elephant taken in ~~northern or western~~ South Africa, please use form 3-200-20.

b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: ____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, Please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
N/A

b. Date wildlife is to be hunted:
N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
N/A

6. **IF THE ANIMAL HAS ALREADY BEEN TAKEN**, please enter the following:

   d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   South Africa
   Associated Private Nature Reserves - Umbabat Private Nature Reserv
   Hoedspruit

   e. Date wildlife was hunted: May 26th 2018 to June 07th 2018

   f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   Graham Sales Safaris

   g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
   Life-Form Taxidermy
   No 7 Aluminum Road // PO Box 763
   White River
   Mpumalanga South Africa 1240

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
   Please See Attached.

8. Complete name and address of overseas person or business shipping the trophy to you.

   a. If you are applying to import a trophy directly from **Namibia**, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name:
   Business Name: Life-Form Taxidermy
   Address: No 7 Aluminum Road / PO Box 763
   Address:
   City: White River
   State/Province: Mpumalanga
   Country, Postal Code: South Africa 1240

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement. N/A

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

   Taxidermist/Broker's signature: _____ Date: _____

10. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying to import a leopard trophy, I und[redacted]ard trophies in one calendar year.

Applicant's signature (b) (6) Date: 06/11/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. **All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).**

TO OPERATE AS A WILDLIFE TRADER – TAXIDERMIST.

SPECIAL CONDITIONS UNDER WHICH PERMIT NO: 4683

1. No animals, trophies or derivatives may be received without written proof of legal acquisition.
2. This permit authorizes the collection of legally hunted trophies nationally.
3. This permit authorizes the conveyance of processed or unprocessed trophies to other Taxidermist or shipment agents excluding rhino horn and elephant tusks.
4. This permit authorizes the holder of the permit to be in possession of trophies or derivatives during the processing process.
5. This permit authorizes the holder to trade trophies, parts and/or derivatives excluding elephant ivory and rhino horn.
6. The holder of this permit must keep a register which inter alia include the following:
   - Full name and contact details of person who handed in trophy,
   - The date received;
   - The specie and sex of animal,
   - Quantity,
   - Permit number.
7. The name of the owner, destination of trophy and date collected, must be indicated for all collected items.
8. As from April, all shipments to other countries must be inspected by a representative from the Department. All CITES export permits must be endorsed and crates sealed with a Departmental seal before leaving the Province. NB to be left out.
9. This permit and register must be kept updated and on the premises and must be available to a representative of this Department for inspection purposes.

RE: Comments: Proposed 2018 offtakes in Umbabat PNR complex

The approval of the animal offtakes for 2018/19 season, listed in a letter (dd 09/12/2017) from Dr. Peel wrt game removals 2018 in APNR v6, refer.

The proposed quotas, 2017 aerial census data, and table with some calculations on the various species populations in these letters, formed the base of the evaluation of the proposed offtakes. On request, the results of your predator counts were forwarded, indicating that 17 lion and 38 hyena were recorded. It is noted that the hyena count is regarded as conservative.

The proposed offtake levels are regarded as sustainable. The efforts to improve the demographic studies on several species are welcomed.

From a wildlife management perspective, the proposed levels of removal as indicated in Table 1 is supported, as long as it takes place within the legal framework that is in place. This includes the relevant legislation, norms and standards and veterinary regulations.

Mpumalanga
TOURISM AND PARKS AGENCY

Table 1: Umbabat PNR complex proposed offtakes 2018

Species	Category	Commercial	Non-Commercial
Elephant Bulls	+50 years	1	0
	30-40 years; 40lbs/side	2	0
	20-30 years; 30lbs/side	1	0
Buffalo	Bulls Classic >12y	1	0

To: managementauthority@fws.gov

Division Of Management Authority,

I am sending this supplemental information with the hope that it will help in my request for PRT identification number: MA97814C-0 Elephant Permit. I have attached document 18.Umbabat Quota MTPA that show a census was completed to allow for the removal of the Elephant. I have also attached Letter to Jared Whitworth which talks about how the money, that I spent for this animal, is being used for conservation efforts to control poaching. I appreciate your help in obtaining this permit.

UMBABAT

5 March 2019

Attention: Mr Jared Whitworth

Re: Elephant Hunt within the Umbabat Private Nature Reserve – 2018

Dear Mr Whitworth,

The Umbabat Private Nature Reserves annually conducts commercial hunts, with international clients predominantly from USA and Europe. These hunts occur via Outfitters, in your case Graham Sales Outfitter.

In response to your query on allocation of funds received from these hunts, we'd like to confirm that 100% of the funds received return to the Reserve.

There are a few expenses that the reserve encounters in order to facilitate the hunts, for instance, accommodation, Reserve Representative appointment and tips for the camp and skinning staff.

All the remaining funds allocate towards the running of the Reserve. Those expenses predominantly Anti-Poaching forces and game security (about 60%) and Wardenship and Specialist studies (40%). There is a growing legal expense the Reserve is encountering on an annual basis, essentially incurred by conformity to the demands for good governance.

I'd like to assure you that no member's of the Executive committee receive any financial benefit of any kind in return for the administration of the reserve.

The executive committee of the Reserve facilitates the application hunting process in the following manner: the approval of the expenditure to conduct census's, specialist studies and reports, appointment of appropriate anti-poaching forces, ensuring Reserve compliance with the Hunting Protocol, submissions to Kruger National Park (the Reserves neighbours) and the Nationally appointed authority (Mpumalanga Parks and Tourism Agency (MTPA) in the Umbabat's case), with specific reference to off-take requests, adjustments thereto and finally approval thereof by the MTPA – the permit issuing authority. The expenses are incurred since the Reserve subscribes to the principal of "best practice".

Attached, please find a copy of the approval of the Umbabat Hunting quota for the 2018, received from the MTPA. The MTPA is a government department, whom has authority delegated to it in terms of the legislation of South Africa and the Department of Environmental Affairs – we sincerely hope this letter assists with the importation of your trophies into the USA.

At the time of (2018), and the year preceding (2017) your hunting in the Umbabat Reserve, I was the Chairman of the Reserves Executive committee, and as such feel it appropriate that I respond to your query and request.

I am still an executive member, i.e. Vice-chairman.

Kindest regards,

Lenny Willson Vice-chairman

Type of Activity:
Import of Sport-hunted Trophies of Southern African Leopard, African Elephant, and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
WASIF HASAN LATEEF	WASIF HASAN LATEEF		

2. Date of birth (mm/dd/yyyy)	3. Occupation	4. Affiliation/ Doing business as (see instructions)
(b) (6)		

5.a. Telephone number	5.b. Alternate telephone number	5.c. Fax number	5.d. E-mail address
(b) (6)			(b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Westlake Village	CA	91362	Ventura County	USA

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☐ If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue:_____ No ☑

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: N/A (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Lupane, Zimbabwe
   b. Date wildlife was hunted: 03/22/2018
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

      1.Processed goods made out of my Elephant skin(Finished products like Belts, Carry case,Tail, Feet)
      2.Ivory

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

      4 Josiah Chinamano Road, Belmont, Bulawayo, ZIMBABWE

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Name:	Trophy Consultants International (T.C.I.)(Formerly - Taxidermy Enterprises (Pvt) Ltd).
Address:	4 Josiah Chinamano Road,
City:	Belmont,
State/Province:	Bulawayo,
Country, Postal Code:	ZIMBABWE

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature (b) (6) Date: 06/12/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

Ashar Hasan Lateef
(b) (6) Westlake Village, CA-91362,USA.

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Ashar Hasan Lateef,
(b) (6)

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Dear officer,

Thank you for your email.

Yes, I have hunted my elephant successfully and eagerly awaiting my import permit, the required details are provided below.

1) Dates of hunt – 19 March 2018 to 29 March 2018
2) Date Elephant shot – 23 March 2019
3) Concession where Elephant shot – Gwaii Small Scale, Matabeleland South, Zimbabwe
4) Grid Reference – S19*12.583 E027*49.331

My applicaon for filed for this one and only hunt of mine.

Please let me know if you need anything else.

Best Regards
Wasif

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
PHILLIPS	WALLACE	S.	IV

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
	(b) (6)		lilley@well-usa.com

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
COLLEGE STATION	TX	77845	BRAZOS	USA

2.a. Mailing address (Include if different than physical address; include name of contact person if applicable)
WELL WORLDWIDE ENERGY LOGISTICS, ATTN: LYNETTE LILLEY, 17401 ALDINE WESTFIELD RD.

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
HOUSTON	TX	77073	HARRIS	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions (50 CFR 13.11(d)).

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 06/01/2018

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   FEDEX ENVELOP ATTACHED

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   LYNETTE LILLEY
   281-606-2400
   EMAIL: llilley@well-usa.com

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

ELEPHANT: LOXODONTA AFRICANA

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

NAMIBIA: EISEB CONSERVANCY

   b. Date wildlife was hunted:

JUNE 25, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

JJN WASSERFALL
P.O. BOX 1677
WINDHOEK, NAMIBIA

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

REISER TAXIDERMY
BRAKWATER
WINDHOEK, NAMIBIAA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). ATTACHED

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	J.N. BLAAUW
Business Name:	P.O. BOX 11908
Address:	WINDHOEK NAMIBIA
City:	
State/Province:	
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

NONE

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

THEY WERE USED FOR CONSERVATION

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

NO

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

(6) [X] Revoked [ ] [redacted]
(date written to assist data)

If Grantor is a partnership or LLC, signatory certifies that he/she has full authority to execute this instrument on behalf of Grantor and shall state the names of all members and/or directors on a separate addendum to this document, and said the power shall in no case have any force or effect beyond two years from the date of its execution.

Grantor further authorizes Grantee to act as its agent in signing or endorsing export documents; i.e. commercial invoices, shipper's export declarations, Automated Export System records, bills of lading, insurance certificates, drafts and any other documents necessary to the successful completion of any export transaction on its behalf.

If Grantor is a U.S. Principal Party to Interest (USPPI) in an export transaction then the Grantor/USPPI hereby certifies that all statements and information contained in the documentation provided to Grantee relating to exportation are true and correct. Furthermore, Grantor/USPPI understands that civil and criminal penalties may be imposed for making false or fraudulent statements or for the violation of any United States laws or regulation on exportation. Grantor/USPPI undertakes to determine any export license requirements and to obtain, for export purposes, any export license or other official authorization.

All services and transactions are subject to WELL's Terms and Conditions of Service (NCBFFA 6/04) which are included in this document for which Grantor expressly acknowledges receiving a written copy. To the extent provided by law, WELL's liability as a Customs Broker is limited to $50.00 (19 USC 1641(f)).

IN WITNESS WHEREOF, the said Grantor has caused these presents to be sealed and signed:

(signature) (b) (6) [redacted]

(capacity) (7)
[If Duly Authorized Representative, supporting documentation must be provided]

(print name) (8) X Wallace S. Phillips IV

(date) (9) X

If you are the importer of record, payment to the broker will not relieve you of liability for Customs charges (duties, taxes, or other debts owed Customs) in the event the charges are not paid by the broker. Therefore, if you pay by check, Customs charges may be paid with a separate check payable to the "Bureau of Customs and Border Protection" which shall be delivered to Customs by the broker (19 CFR 111.29). If you elect to make payment with a check made payable to the Bureau of Customs and Border Protection, arrangement must be made in advance.

RE: PRT- MA97891C-0 Wallace Simpson Phillips

Dear Anna;

We refer to the above referenced permit application for an elephant that was submitted on 6/22/18.

The permit application that was originally submitted did not contain answers to question 9 parts a, b and c. We have obtained the information and wish to submit it and have it incorporated into the original application under consideration.

9a. A population study was recently completed by the Ministry of Environment and Tourism in Namibia. Their findings were that the population of elephants in 1975 was 7,500 and in 2017 the population was 22,700 which represents an annual growth of 4.5%. Additionally, the report estimated that the country can only support 22,000 elephants. Overpopulation will result in destruction of habitat and more conflicts with humans. Therefore the population will support the hunting that is being done and will even require additional relocation efforts or hunting to maintain recommended population levels.

9b According to the outfitter, the government of Namibia gets 1% of the trophy fee of $35,000USD. 65% of the trophy fee goes directly to the Eiseb community and is used however they wish. The remaining 34% goes to the outfitter and is used for all the costs of running the safari. 18 People are employed by the outfitter.

9c. In addition to the funds mentioned above The outfitter provides an additional 10,000 per year to the Eiseb community. The outfitter also provides additional services to the community. For example, this year, the outfitter is busy installing two waterholes which will provide clean water for the villages.

Hopefully, with this additional information, you will be able to process and approve the permit application. Should you need additional information, please contact the undersigned.

Sincerely,

John Rulon CHB

Re: Application for Permits to Import Sport-Hunted Trophies

Dear Chief Cogliano:

Enclosed please find three import permit applications. The first is for a permit to import a sport-hunted elephant trophy from the Mahango Game Park concession in Namibia. The Mahango area is part of the Zambezi Region of Namibia, and holds the country's largest elephant population, which is increasing. (See enclosed AfESG Status Report.) This operator, Thormahlen & Cochran, has been in business almost two decades and has carefully stewarded this concession. We will be submitted a report from this operator by separate cover. Please consider this information, as well as information in the DMA's files and submitted by Conservation Force and Namibia's Ministry of Environment and Tourism, in making a positive enhancement finding for this applicant.

The second applicant, who has two separate application forms, is hunting lion, elephant, and leopard on Sango Ranch in the Save Valley Conservancy in Zimbabwe. Conservation Force and Zimbabwe's Parks and Wildlife Management Authority have submitted extensive documentation about the healthy elephant and lion population in SVC and the benefits generated by regulated hunting. Please refer to that information, including the October 2016 Non-Detriment Finding and January 2016 report, describing the SVC's strong wildlife management. Please also see the attached declaration from Wilfried Pabst. This declaration was not ultimately submitted in court, but it remains a sworn statement that reflects the healthy wildlife populations in SVC. Please consider all this information in making positive enhancement findings and non-detriment findings for this applicant.

Please do not hesitate to contact us if you have questions about these applications or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ELEPHANT trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA
T: (504) 837-1233
F: (504) 837-1145
E: cf@conservationforce.org

Signed: (b) (6) [redacted]

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
LYNCH	BOBBY	GLEN	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
MOLINO	FL	32577	ESCAMBIA	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in *Title 50 Part 13 of the Code of Federal Regulations* and the other *applicable parts in subchapter B of Chapter I of Title 50*, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   AFRICAN ELEPHANT, LOXODONTA AFRICANA

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   MAHANGO PARK
   NAMIBIA

   b. Date wildlife was hunted:

   04/11/2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

ANTON MYNHARDT ALBERTS

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

THE YELLOW SHARK HOLDINGS (PTY) LTD.
PO BOX 8413 - WINDHOEK
WINDMILL PARK UNIT 7, DANTE STREET
PROSPERITA, WINDHOEK, REPUBLIC OF NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: ANTON MYNHARDT ALBERTS
Business Name: THORMAEHLEN & COCHRAN SAFARIS
Address: PO BOX 90911
City: KLEIN WINDHOEK
State/Province: 9000 WINDHOEK
Country, Postal Code: NAMIBIA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) _____ Date: 06/08/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

SSC Species Survival Commission

AFRICAN ELEPHANT SPECIALIST GROUP

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 ± 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km^2, which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 ± 3,580, 9,165 ± 2,016, 14,097 ± 2,678 and 13,116 ± 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 ± 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N≠a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 ± 1,940, 3,638 ± 1,164, and 6,413 ± 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 ± 2,289 for Khaudum, 61 ± 115 for N#a Jaqna (Kolberg, 2004) and 967 ± 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuangali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

DECLARATION OF SAVÉ VALLEY CONSERVANCY
IN SUPPORT OF MOTION TO INTERVENE

I, Wilfried Pabst make the following declaration in support of the attached Motion to Intervene.

1. I make this declaration based upon my personal, first-hand knowledge.

2. I make this declaration on behalf of Savé Valley Conservancy ("SVC"). I own the Sango Ranch, one of the properties that together form the conservancy. I am involved in all aspects of operating SVC and decision-making related to the management of habitat and wildlife, poaching control, community investment, research, and similar issues.

3. SVC is one of the largest private game reserves in Africa. It is in the South East Lowveld of Zimbabwe and provides approximately 3,500 km^2 of diverse wildlife habitat for healthy populations of elephant, lion, leopard, buffalo, rhino, and rare African Wild Dogs.

4. SVC consists of privately-, government-, and community-owned properties aligned under a constitution to manage animal populations on a landscape scale. Each property operates its own tourist lodges offering different types of accommodations in varied ecological settings. While

predator spoor count is conducted as well. A Technical Advisory Committee recommends evolving best wildlife management practices.

8. SVC's anti-poaching efforts are extensive. Approximately 200 game scouts patrol the various ranches to pick up snares and keep meat poaching under control. A special team of 30 to 40 highly-trained scouts, the Special Species Protection Unit (SSPU), combats elephant and rhino poaching specifically. Annual anti-poaching expenses (ranger salaries, training, vehicles, equipment, petrol, and other necessities) are almost $500,000. We hope to expand the SSPU to 50 individuals at the cost of another $100,000 per year.

9. In the past 25 years, SVC's elephant population has quadrupled from the original, translocated individuals. The population is estimated at 2,200. Elephant management is guided by an adaptively-implemented plan incorporating regulated hunting to achieve management targets. The annual hunting quota is seven elephants, representing only 0.3% of the population. Those few hunts generate significant revenue that is reinvested in management and protection, including for the large black rhino population, which is not currently hunted.

10. After SVC was established and as ungulate populations increased, lion began to re-colonize the conservancy and thirteen lions were reintroduced, including ten on Sango ranch. After an initial lag period, the population has flourished. Annual monitoring began in 1999. Since 2007, annual monitoring is conducted using track index surveys in a research project co-sponsored with the African Wildlife Conservation Fund. In 2011, those survey results were verified using a baited call-up. Prey availability models suggest SVC's carrying capacity for lion is approximately 271. The 2015 population was estimated at 284. This suggests lion have reached the ecological carrying capacity, even though responsibly hunted.

and schools, providing computer equipment, etc. SVC entered into an agreement with local Chiefs to share revenues from regulated hunting and sales of game meat.

16. Over 90% of SVC's hunting clients are U.S. citizens—and this percentage is 100% on some properties. SVC relies on these U.S. clients to fund its extensive anti-poaching efforts and science-based elephant and lion management. At least three U.S. hunters have applied for permits to import lion or elephant trophies hunted in SVC in 2015, 2016, and 2017.

17. SVC's revenues will decline if elephant and lion trophies are not importable into the U.S. Consequently, its excellent management efforts will suffer. The quotas will not change (and did not change when the U.S. Fish and Wildlife Service suspended the import of elephant trophies from Zimbabwe or listed the lion as threatened under the U.S. Endangered Species Act). However, the willingness of U.S. citizens to pay premium prices was reduced by these policy decisions, and in turn, SVC's revenues were reduced. These revenues will be cut further if imports remain closed. Unfortunately, the conservancy's elephant, lion, rhino, and other wildlife populations will pay the price if anti-poaching efforts and community investment and conflict mitigation expenditures must be reduced as well.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

WWF LIFE	- World Wide Fund for Nature: Living in a Finite Environment programme

Definition of Terms

"Background Study": This refers to the *Background Study for Elephants* prepared under the Ministry of Environment and Tourism's **Transboundary Mammal Project** (Martin 2005).

"Caprivi" and "Caprivi Strip": The word 'Caprivi' is used throughout the Plan to refer to the 'peninsula' of land extending eastwards from the north-eastern corner of Namibia as far as its junction point with Botswana, Zambia and Zimbabwe at the confluence of the Chobe and Zambezi Rivers. The phrase 'Caprivi Strip' is reserved for the narrow 'isthmus' connecting the broader part of the peninsula to the main body of Namibia.

"Population and Subpopulation": In this report, the term subpopulation is loosely used to refer any geographically distinct subdivision of the overall population within a country.

"Kasane Workshop": A workshop was held in Kasane, Botswana on 30th November and 1st December 2002 in which representatives of the Namibian Ministry of Environment and Tourism and the Botswana Department of Wildlife and National Parks participated with the aim of collaboration on joint management issues affecting the buffalo population shared between the two countries. The *Background Study for Southern Savanna Buffalo* (Martin 2002) was presented at the workshop.

"Windhoek Workshop": A workshop was held in Windhoek on 23rd September 2003 in which representatives of the Namibian Ministry of Environment and Tourism and the Botswana Department of Wildlife and National Parks participated with the aim of collaboration on joint management issues affecting roan, sable and tsessebe. The *Background Study* and *Management Plan for Roan, Sable and Tsessebe* (Martin 2003) were presented at the workshop.

ACKNOWLEDGEMENTS

This plan is based on a draft elephant management plan researched, coordinated and prepared for the Ministry of Environment and Tourism (MET) by Rowan Martin in 2005, as part of The Transboundary Mammal Project of the MET, Namibia, facilitated by the Namibia Nature Foundation and the World Wildlife Fund's LIFE Programme.

EXECUTIVE SUMMARY

The status of elephants in the southern African region

The African elephant has achieved huge prominence in global conservation issues in the past 20 years. Few other species are capable of arousing emotions, polarizing viewpoints and causing controversy to the extent that *Loxodonta africana* has done. Within Africa opinions are divided on the subject of elephant management and the situation is no less contentious than in the international arena.

Elephants are classified as *Endangered* in the IUCN Red Data Book. In 1989, rightly or wrongly, the species was listed on Appendix I of CITES and legal trade in ivory was effectively banned. Although the Namibian elephant population was transferred to Appendix II in 1997, conditions attached to the listing have made it almost impossible for ivory to be traded.

In 2002, the population in the whole of Africa was estimated at about a half million elephants. The southern African region holds more than half of this population and, projecting at normal population growth rates, it is likely to be around 350,000 - 400,000 animals in 2007. Clearly, elephants are not threatened in southern Africa and this raises the question whether they can be validly classified as endangered at the continental level.

The largest concentrations of elephant in southern Africa are in a central zone extending across the continent between latitudes 15º - 20º south of the equator (**Map 1**). Within this zone, Botswana and north-western Zimbabwe hold some 250,000 elephants. The rapid expansion of these populations into neighbouring countries is affecting biodiversity and human livelihoods.

The 'elephant problem' is central in initiatives to create transfrontier conservation areas (TFCAs) in the region. The need for elephants to have access to far larger areas than those in which they are currently confined is recognized and, for many, TFCAs are seen as the solution to the increase in elephant populations. Unfortunately, a problematic legacy of national boundaries, coupled with a lack of coherent land-use planning in all of the participating countries including the Kavango-Zambezi (KAZA) TFCA (Angola, Botswana, Namibia, Zambia and Zimbabwe) means that this TFCA will undergo a long and difficult birth. Any respite arising from the increased range is likely to be short lived: at current rates of population increase, elephants will remain overabundant.

It would be highly desirable if a common management approach for elephants could be developed amongst the countries sharing the elephant range. However, the corollary to this is that, in the absence of any agreement with neighbouring countries, it cannot reasonably be expected that Namibia will not undertake management interventions in the best interests of its local peoples and conservation concerns.

The status of elephants in Namibia

Elephants occur across the entire north of Namibia (**Map 2**) with two main sub-populations in the north-east and the north-west. In 2004 the total population was estimated at over 16,000 animals and, allowing for underestimates on aerial surveys, the true number in 2007 is likely to be closer to 20,000.

The north-western population is about 4,000 animals and includes the elephants in Etosha. This appears to be growing at about 3.3% per annum and expanding its range. Elephants are being seen as far south as the Ugab River and in all of the river catchments which flow westwards to the Atlantic Ocean in the north. As yet, the extreme north-western part of the potential range along the Kunene River has not been re-colonized although elephants were present in this area until 1990.

The north-eastern population will probably reach 16,000 animals this year. The recent increases are well in excess of normal growth rates (which are less than 5% per annum) and must be attributed to the migration of the northern Botswana population (which consists of about 160,000 elephants) and the north-western Zimbabwe population of about 90,000 elephants.

The conservation status of elephants in Namibia is more than satisfactory – their numbers already exceed what many would consider desirable for the available habitats and they have been identified as a possible threat to other rare and valuable species which Namibia is trying to conserve. There are no limiting factors preventing an increase in their numbers.

Elephants are classified as *Specially Protected Game* under Namibian law. The original justification for such a listing may well have disappeared. To achieve the objectives of this Management Plan, several revisions to the legal provisions for elephants under Namibian legislation would be desirable.

Under Namibian environmental legislation, management plans are required for species that are rare or valuable and that share boundaries with neighbouring countries. Elephants are not rare but they are potentially valuable and, within multi-species wildlife systems, could provide a financial and economic return that greatly exceeds that possible from alternative land uses. A management plan that treats elephants as a valuable resource could transform the primary land use in northern Namibia.

The issues

In both the north-west and the north-east, conflicts with humans are escalating due to the increase in elephant and human population numbers. The benefits that communities receive from elephants on their land do not come close to compensating them for their losses. Farmers are not free to defend their livelihoods from elephant depredations and the current arrangements for control of problem elephants are too tardy to be effective. A potential threat to elephants is the inception of a wave of illegal hunting or retaliatory shooting by dissatisfied people.

In north-western Namibia, elephant populations have considerable latitude for increasing their range and the situation may not require management interventions for many years. However, in the north-east, the escalating levels of conflict between humans and elephants and the damage to vegetation suggest that the time for action has already been reached.

Initially, the problem in the north-east may appear intractable: the Caprivi, Khaudum and Nyae Nyae areas lie on the periphery of the largest elephant population in Africa. Management interventions carried out in isolation in Namibia will not affect the core elephant populations from where the problems emanate. The huge number of elephants south of the Caprivi presents Namibia with a management challenge: however, notwithstanding any decision by Botswana

and Zimbabwe not to manage their elephants, Namibia should take full advantage of the opportunity presented. The justification is that elephants are causing significant hardships for people and threatening conservation objectives in the north-east.

Namibia's short-term problem is to accommodate the current increase in elephants. However, it is not the long-term solution. Elephants do not regulate their own numbers at levels which maintain savanna woodland habitats – a process which culminates in population crashes. In the long term population reductions may be necessary. In the north-west, the management requirement may simply be to increase the range available to elephants: in north-eastern Namibia not only does the range need to be increased but, in some areas, the population may need to be reduced (**Fig.1** at the end of this Summary).

Technically, there are no good reasons why more land in Namibia should not be available to elephants. The highest valued land uses over most of this arid country (**Map 3**) are those based on management of natural resources. Moreover, the full potential is far from being realized at present due to national and international policy constraints that place wildlife at a competitive disadvantage with land use based on exotic species. Were subsidies to be removed from the domestic livestock industry and were it possible for elephant to play their full economic role in land use systems, it could reasonably be expected that large additional areas of land would be converted to wildlife management in areas where relatively low human densities would enable the co-existence of people and elephants, as elsewhere in the country – for example, parts of the northern Kavango, central northern regions and in the Eastern Caprivi. This would remove the short-term limiting factor of providing additional ranges for elephant.

The technical arguments for greater areas of Namibia to be put over to natural resource management will not, on their own, bring about the needed changes to remove this limiting factor for elephants. It will require a high level of political commitment and the correct suite of incentives to induce landholders (both communal and private) to convert to a land use based primarily on wildlife. The high level of political commitment is already in place. In a speech delivered on 3rd February 2004, His Excellency the Founding President, Dr Sam Nujoma, made the visionary statement that wildlife would be restored throughout the north of Namibia, that ownership of wildlife would be conferred on local peoples and that the economy would be transformed by diversification based on wildlife uses.

For elephants, two factors mitigate against realizing the Founding President's vision. The first is that the full value of elephant commodities (ivory, elephant skin and meat) cannot be realized due to international trading constraints. The second is that elephants in Namibia are effectively State property – which was clearly not the President's intent. These two major disincentives need to be addressed before the conditions for increasing elephant range will be achieved.

Full devolution of rights over elephants to landholders (on both communal and private land) is a prerequisite for creating the incentives to allow elephant populations to expand. It is a necessary but not a sufficient condition. Large areas co-managed between the State and relevant landholders will be necessary to provide viable ranges, to distribute the pressure of elephants on habitats and to allow population increase and expansion.

The Vision Statement developed under the current UNDP/GEF assisted project in Namibia provides for co-operation between stakeholders to achieve this far-sighted concept. Linkages

would be established under a co-management system which would both secure and increase the available range for elephant (**Map 4**).

In the north-east, elephant population reduction may be necessary. However, there are no simple answers to the question of how many elephants need to be removed – either to conserve biological diversity or to reduce conflicts between humans and elephants. The starting premise may be that the option of zero use is not a reality – elephants will be harvested illegally and unsustainably if facile attempts are made to debar their use. These all point towards a need for imaginative and innovative management. The aim should be to avoid routine cropping or culling programmes which attempt to impose constancy on naturally fluctuating ecosystems. The challenge is to make it sustainable, requiring an adaptive management approach.

Combining adaptive management with the arguments for co-management results in a classic situation where the principles of adaptive co-management in complex bio-economic systems need to be applied. The individuals who are most affected by elephants are those living in the north-east: together with the State authorities, they should decide how elephants should be managed.

MANAGEMENT PLAN

A feature of this management plan is just how few actions are needed to bring it to fruition. Success relies on a few administrative masterstrokes which will cost next to nothing – rather than a long list of expensive management activities. It would be as well for MET not to enter any co-management forums with preconceived moral positions on elephant. Having accepted that the solutions to the current 'elephant problem' may lie in innovative management inspired by the values of local people, a *tabula rasa* (or clean slate) is needed to accept with an open mind all options presented.

Vision, Goal, Objectives, Strategy and Actions

The Vision Statement begins with a preambular statement which expresses Namibia's desire to work with neighbouring countries and the international community to enhance the status of elephants, clarifies Namibia's position on elephants and draws attention to the fact that a policy of total protection for elephant will result in their available range being reduced to State protected areas and a decrease in their numbers. In contrast, a policy of sustainable use, as enshrined in the Namibian Constitution, will result in the expansion of the range available to elephants and an increase in their numbers. The goal and objectives then follow.

The **Strategy** consists of five actions which are listed below and shown in **Fig.2** (at the end of this Summary).

(1) **Devolution of authority for landholders, both communal and private, to manage elephants on their land**. This is a prerequisite for co-management institutions to be formed.

GOAL

Namibia wishes to carry the maximum number of elephants that is consistent with the conservation of biological diversity AND the wishes of those primary stakeholders who have elephants on their land

SOCIAL OBJECTIVE

1. **To reduce conflict between elephants and people**
2. **To create conditions under which elephants are a benefit to people**

ECOLOGICAL OBJECTIVE

1. **To increase the range available to elephant**
2. **To conserve biological diversity in State protected areas and promote the conservation of habitats outside State protected areas in the elephant range**

ECONOMIC OBJECTIVE

To enable the full economic potential of elephants to be realized according to the provisions for sustainable use in Namibia's Constitution

(2) **Representations on the location of veterinary control fences**. This is a matter for the Ministry to pursue from the outset of the management plan. The influence of veterinary fences on the current elephant range both in Namibia and in the region is profound. In the vicinity of the Mahango Core Area within Bwabwata National Park, there is a bottleneck caused by the veterinary fences on the southern boundary of the Caprivi and along the international border between Botswana and Namibia, which affects the entire regional range for elephant across the central southern African region (**Map 5**).

(3) **The removal of the CITES constraints affecting Namibia's ability to trade in ivory.** These constraints exert a negative effect on conservation of elephant in Namibia and act as a disincentive to the adoption of wildlife management as a primary form of land use. However, the management plan is worth pursuing even if the full value of elephant products cannot be achieved immediately – there are substantial values to be derived from elephants through tourism and international trophy hunting even if they fall short of the ideal.

(4) **Establish co-management institutions between the State and primary stakeholders.** Namibia's record of an expanding wildlife industry over the past 10 to 20

years is impressive. The present mosaic of parks, conservancies and commercial farms provides a sound foundation for the 'scaling up' of institutions needed for the management of elephant.

The new high-level institutional structure proposed for the State wildlife agency under the MET/UNDP/GEF project is ideally suited to this from a geographical perspective. The new divisions, subdivisions and sections are well matched to the elephant ranges that will require co-management institutions.

(5) **Apply adaptive management principles to the decisions of co-management institutions.** The agenda for co-management institutions would include the setting and allocation of trophy hunting quotas, problem animal control and population reductions.

The realization of the objectives in the Vision Statement should follow sequentially (**Fig.2**). Reduction of elephant populations in the north-east should help to conserve biological diversity; local communities should receive increased benefits from elephants and, hence, conflict will be reduced. With full devolution of rights over elephant, the incentives will be present for the elephant range to increase. The full economic objective will only be achieved when the permanent elephant range has expanded across northern Namibia (**Map 4**) and the last CITES constraints have been removed.

Risks

Given the escalating human-elephant conflict and the extreme modification of habitats in north-eastern Namibia, **the greatest risk to Government's position is to do nothing**. Failure to implement the necessary devolutionary measures and enter into co-management carries the real risk that local people will take matters into their own hands or, worse still, collaborate with illegal hunters from neighbouring countries. Inactivity will not simply result in the *status quo* being maintained. Since the 1970s, elephant populations have collapsed in an apparently inexorable process across Africa and it has occurred where the State has claimed ownership of elephants.

There is little risk that any management interventions could have an adverse effect on the status of elephant populations in Namibia. Populations are expanding and being augmented by migration from Botswana and Zimbabwe. Provided the effects are properly monitored, experiments in management will provide a learning experience.

Finance and Capacity

This management plan differs from other species management plans in that very little funding is required to implement it. The main costs lie in co-ordination and implementation of management activities that arise from co-management decisions. The potential income from elephant management is substantial and should more than cover these costs. Even if the full value of ivory and elephant skin is not achieved, the revenue from tourism and sport hunting will provide some 75% of the amounts required.

If elephant sport hunting were combined with reduction of elephant populations in the north-east, the expected revenue would be some **N$13 million** in the State protected areas (a total of 14,000km^2 including the Caprivi Forest Reserve) which would meet the present budget allocations for the north-east and would meet at least two-thirds of the budgets proposed under the MET/UNDP/GEF project. In the communal lands, the net

income/hectare (**N$8.7**) should more than offset the costs which elephant are presently causing through crop raiding and other damage. These figures do not include the net income of safari operators which would be about N$9.7/ha.

Transboundary Co-operation

Most of the management activities identified for potential co-operation and collaboration between Botswana and Namibia at the Kasane Workshop (2002) and Windhoek Workshop (2003) repeat themselves in this Management Plan.

The desirability of collaboration on elephant management among the countries participating in the KAZA TFCA was stated on the first page of this executive summary. A common approach to hunting quotas, problem animal control and population reductions would have the beneficial effect of not causing elephants to move from one country to another to escape different management regimes. This plan is structured so that the management of elephants on Namibian soil is not dependent on decisions by neighbouring countries: it is, first and foremost, a national plan. However, because it is based on adaptive management, decisions taken in co-management forums could be flexibly adjusted to accommodate collaborative management.

There are strong grounds for forming an alliance among Angola, Botswana, Namibia, Zambia and Zimbabwe specifically aimed at more effective performance in the CITES forum – based on the fundamental premise that all wildlife products should have value and legal trade is beneficial for conservation.

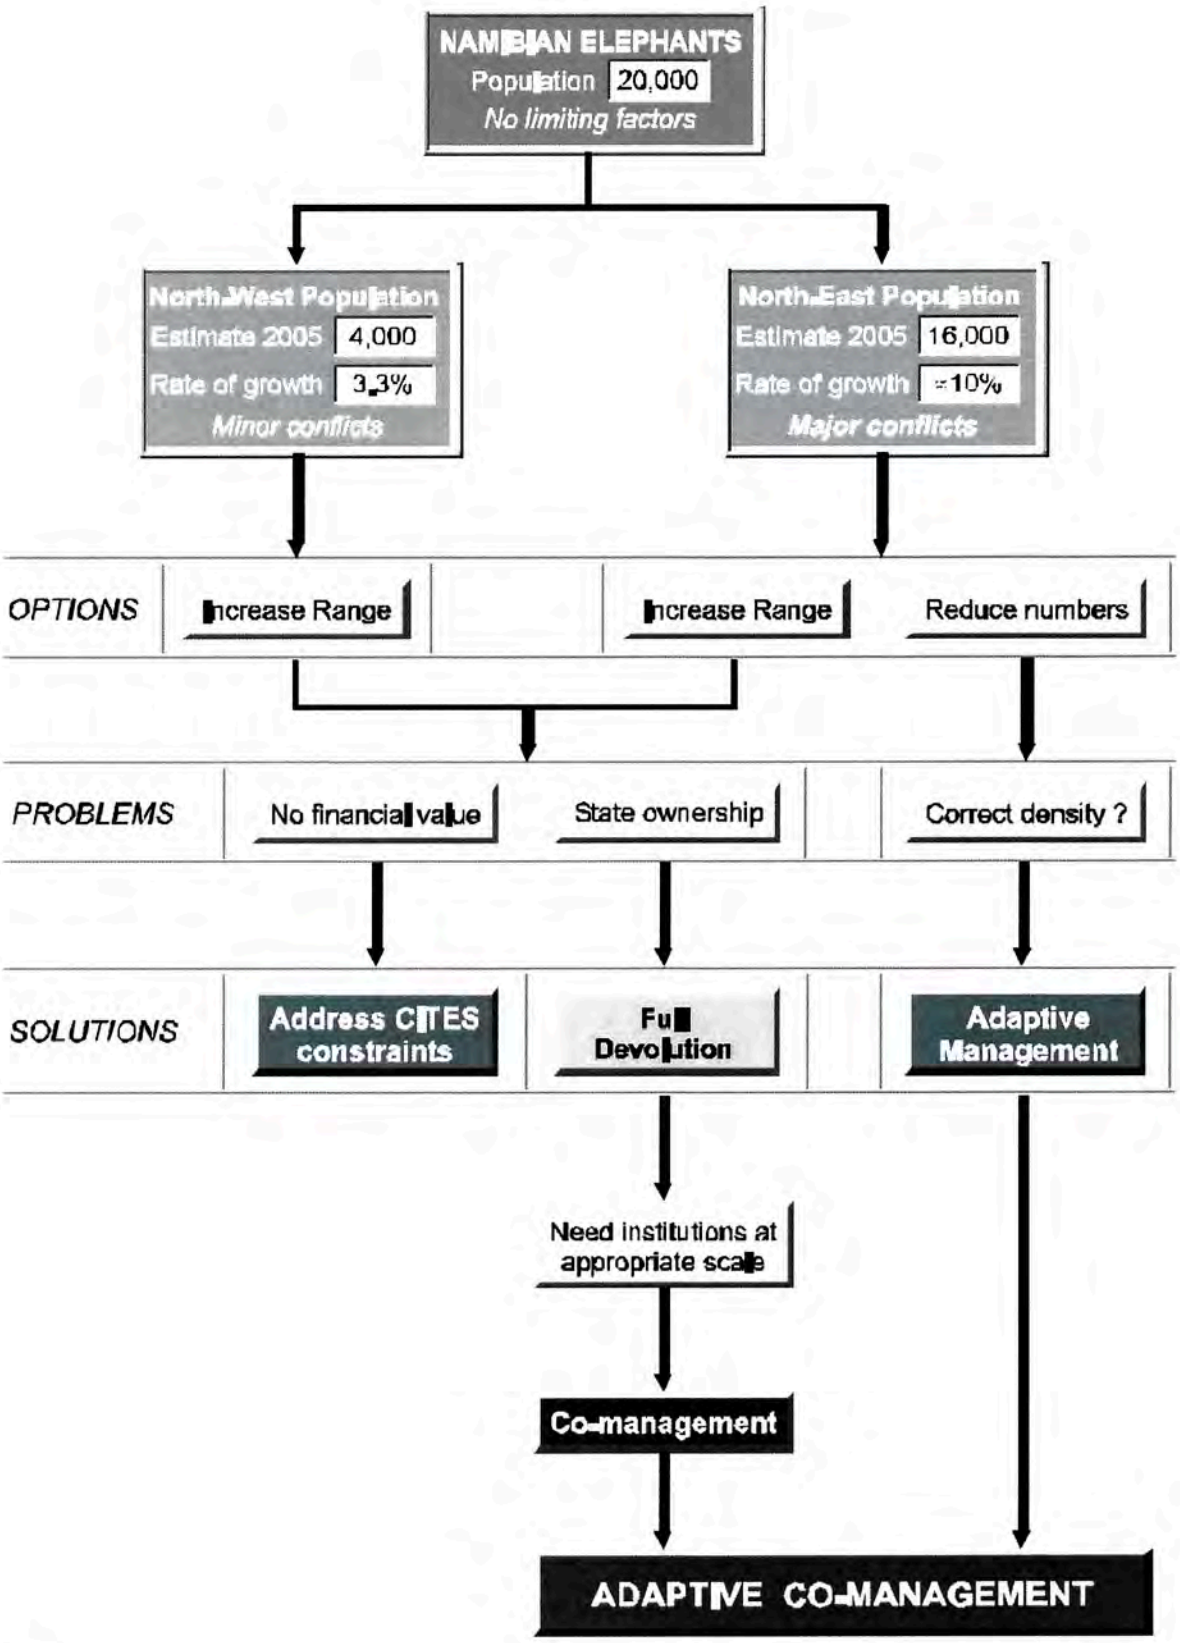

Fig. 1: Management of the Namibian Elephant Population – Options, Problems and Solutions

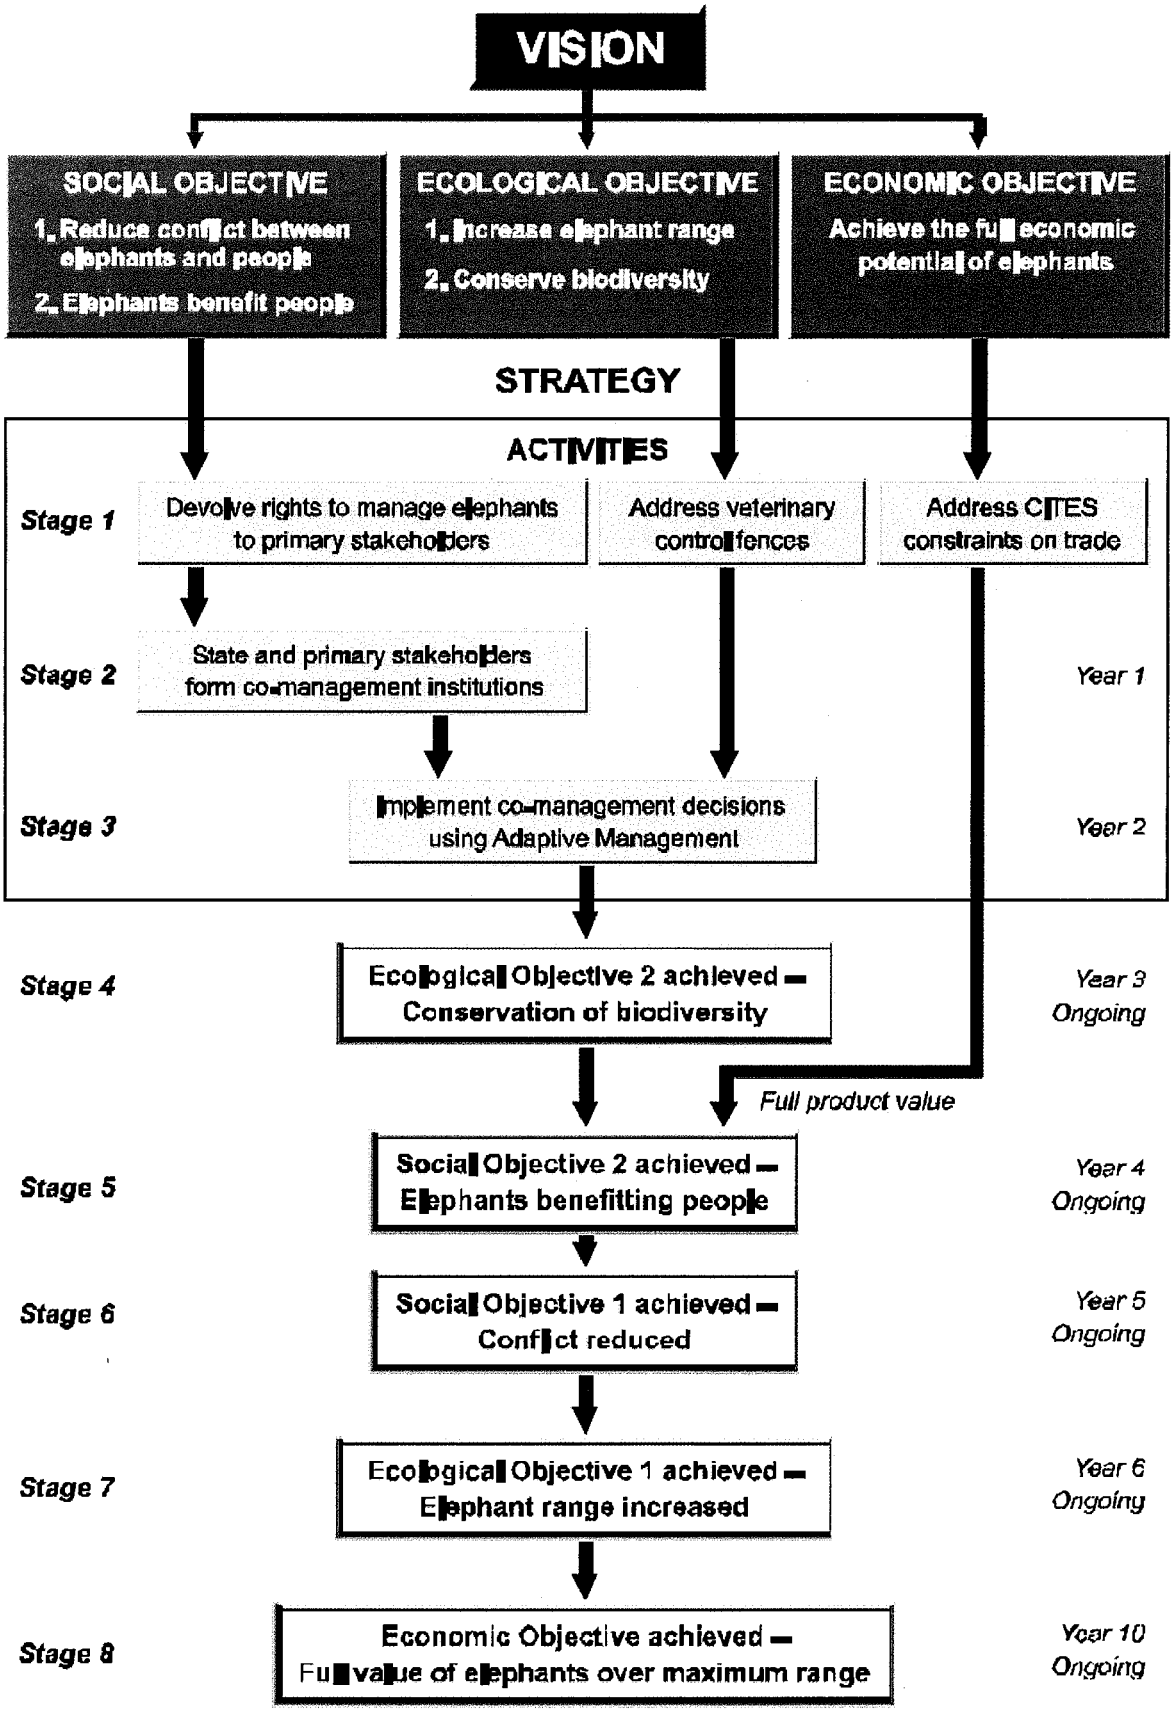

Fig. 2: Strategy for Management of the Namibian Elephant Population

INTRODUCTION & BACKGROUND

This Species Management Plan should be read in conjunction with the Background Study for Elephants prepared under the Transboundary Mammal Project of the Ministry of Environment and Tourism (MET) in April 2005.

Conservation Status and Significance

The taxonomy of Macdonald (2001) places the Savanna Elephant *Loxodonta africana* in the Family ELEPHANTIDAE, the only family in the Order PROBOSCIDEA (mammals with trunks) which is one of three Orders in the Superorder SUBUNGULATA (elephants, dugongs and hyraxes) which is part of the Infraclass EUTHERIA (placental mammals) in the Subclass THERIA (mammals bearing live young) in the Class MAMMALIA (mammals).

In the IUCN Red Data Book (Hilton-Taylor 2000), the species is classified as *Endangered*. This classification is based less on the actual numbers of elephant and more on the fact that the population is fragmented and has suffered recent catastrophic declines in some countries.

The African elephant was listed on Appendix I of CITES[1] at the 7th Meeting of the Conference of the Parties held in Lausanne in 1989. At the 10th CITES meeting in Harare in 1997 the elephant populations of Botswana, Namibia and Zimbabwe were transferred to Appendix II which, in theory, enables these countries to trade in ivory and elephant products. In practice, numerous obstacles have been placed in the way of trade – "*the Conference of the Parties has . . . adopted increasingly complex requirements for trade in elephant products that have all but ensured that such trade does not take place*" (MET 2004).

The distribution of elephants in southern Africa is shown in **Map 1**. It is emphasized that the elephant range shown on the map is no more than a 'snapshot' in time. The rapid expansions that are taking place in elephant populations in southern Africa, particularly in and around the Caprivi, will make any map outdated within a year. In 2002, the population in the whole of Africa was estimated at 560,904 elephants (African Elephant Database, AfrESG 2002).[2] More than half of this population is in southern Africa[3] and more than half of this is in Botswana (DG 2004). Projecting at normal population growth rates, the elephant population in southern Africa is likely to be around 350,000 to 400,000 animals in 2007. It is clear that elephants are not threatened in southern Africa and this raises the question whether they can be validly classified as threatened at the continental level.

The conservation status of elephants in Namibia is more than satisfactory – their numbers already exceed what many would consider desirable for the available habitats. Indeed, Namibia might want to avoid habitat changes of the sort that have happened in large parts of the elephant range in northern Botswana as a result of an overabundance of elephants (DG 2004, p7). In all other species management plans prepared thus far concerning ungulate species of the north-east, elephants have been identified as a possible threat to other species.

---

[1] Convention on International Trade in Endangered Species of Wild Fauna and Flora

[2] "Definite" – 402,067; "Probable" – 59,024; "Possible" – 99,813

[3] "Definite" – 246,592; "Probable" – 23,722; "Possible" – 26,098; Total – 296,412

The economic contribution which elephant could make to the wildlife industry and to land use values in northern Namibia is very high, especially if the present elephant range can be consolidated and expanded southwards in the central area between the north-western and north-eastern populations. For non-hunting tourism, this contribution would come more from expanding the elephant range than from increasing numbers in the present range.

Under a high quality trophy hunting regime, elephants could bring in a net income of about US$120,000 for every 1,000 animals in the population. In the north-east of the country where elephant densities are reaching a level of 1/km^2, the net financial return should be of the order of US$1.20/ha (N$7.50/ha). When added to the present net returns from existing wildlife management without elephant hunting, this could result in a doubling of income. The present levels of exploitation of elephant for sport hunting on communal land in the Caprivi, eastern Kavango and Otjozondjupa regions (NNF 2004) are well below sustainable off-take levels and could be significantly increased for the benefit of local people.

In economic terms, the 'net value added' to land use values by the inclusion of sport hunting on commercial farms in the north of Namibia is, in all cases, more than double the value of the cash income (Barnes & de Jager 1995) and this relationship should hold true for the enhanced income obtained by adding elephants to the species mix.

Were the Ministry to combine elephant sport hunting with the reduction of elephant populations through culling in the State protected areas in the north-east of the country (a total of 14,000km^2 including the Caprivi Forest Reserve), the expected income would be some N$13 million which would meet the present costs of maintaining and managing these areas. If a similar management regime were practised by the conservancies in the north-east, the increase in income would also be substantial and should more than offset the costs which elephant are presently causing through crop raiding and other damage.

Elephants are classified as *Specially Protected Game* under Namibian law (Schedule 3, Nature Conservation Ordinance, Order No.4 of 1975). The original justification for such a listing may well have disappeared. However, designating the species as *Protected Game* (Schedule 4) or as *Huntable Game* (Schedule 5) or as a *Problem Animal* (in terms of Section 53(1)) would not introduce any greater flexibility in the management of the species as long as the provisions of section 37 (hunting of game to protect grazing, cultivated lands and gardens) expressly exclude elephants from being hunted either by private landholders (subsection 37(1)(a)(i)) or communal lands residents (subsection 37(1)(a)(ii)) in defence of their own livelihoods. To achieve the objectives of this Management Plan, several revisions to the legal provisions for elephants under Namibian legislation would be desirable.

Populations

Elephants occur across the entire north of Namibia (**Map 2**) with two main subpopulations in the north-east and the north-west. The subpopulations are not genetically isolated since they are weakly linked through the 'occasional' range in the central area which includes a small resident population of about 20 animals in the Mangetti.

The north-western range appears to be expanding at present. Elephants are being seen as far south as the Ugab River and in all of the river catchments which flow westwards to

the Atlantic Ocean in the north. As yet, the extreme north-western part of the potential range along the Kunene River has not been re-colonised although elephants were present in this area up until 1990.

Estimates of numbers are shown in the table below. In 2004 the total population was estimated at over 16,000 animals and, allowing for underestimates on aerial surveys, the true number in 2005 is likely to be closer to 20,000. The north-western population appears to be growing at about 3.3% per annum and there are movements of elephants in and out of Etosha National Park. The recent increases in the north-eastern population are well in excess of normal growth rates (which are less than 5% per annum) and must be attributed to migration from the northern Botswana population (about 150,000 elephants) and the north-western Zimbabwe population of about 50,000 elephants. The huge number of elephants south of the Caprivi presents Namibia with a management challenge.

Estimates of elephant numbers in Namibia

	NORTH-WEST		**NORTH-EAST**	
	Etosha National Park	Kunene and Erongo regions	Khaudum & Nyae Nyae	Caprivi East & West
Aerial surveys began in	1966	1968	1977	1978
Highest estimate	*2,800*	*800*	*4,815*	*8,726*
Year	*(1983)*	*(2004)*	*(2004)*	*(2004)*
2004 Estimates	2,057	800	4,815	8,726
Subpopulation Totals	**2,857**			**13,541**
2005 Projection	2,656	1,033	5,658	10,268
Rounded to nearest hundred	2,700	1,000	5,700	10,200
Subpopulation Totals	**3,700**			**15,900**
Total population projected for 2005		**20,000**		*rounded to nearest thousand*

Notes:

The numbers given for 2004 are aerial survey estimates except for the Kunene and Erongo regions which are based on estimates by Loutit and Leggitt.

The 2005 projections for the North-west are based on a population growth rate of 3.3% and a correction factor of 25% for undercounting.

The 2005 projections for the North-east are based on population models (see *Background Study*) which include a correction factor of 25% for undercounting.

In addition to the numbers shown, an additional 76 elephants are on private land in northern Namibia.

Limiting Factors and Threats

At present no factor is preventing an increase in numbers of elephants in Namibia. Elephant populations might increase faster with the addition of more water points[4], with the removal of veterinary fences[5] or with less competition from cattle[6] but, even with these constraints, the information presented in the *Background Study* suggests that elephant are increasing at the maximum possible rate.

In both the north-western and north-eastern subpopulations, conflicts with humans are escalating due to the increase in elephant and human population numbers. In the extreme north-west, these conflicts are relatively minor because human populations are sparse and few crops are grown, although this may not be true for the Cuvelai area north of Etosha. In the north-east, crop damage incidents are a major problem.[7]

The benefits which communities are receiving from elephants on their land are small. The number of elephants hunted as trophies and problem animals is low and does not come close to compensating communities or individuals for their losses. Farmers are not free to defend their livelihoods from elephant depredations and the current arrangements for control of problem elephants are too tardy to be effective. O'Connell (1995) found an extremely hostile attitude towards wildlife among the Caprivi peoples and the inception of conservancy projects did little to ameliorate this attitude. With all conservancies being in a fledgling stage, there is a 'wait-and-see' attitude among their members. The recent rapid increase in the numbers of elephant in the Caprivi may be due to a temporary tolerance of elephants while conservancies are in their formative stage. The situation is finely balanced and it would require little in the way of disincentives for the entire edifice to collapse. A potential threat to elephants is the inception of a wave of illegal hunting by dissatisfied people.

The factors which should influence decision-taking and the options, difficulties and possible solutions to elephant management in Namibia are shown in a simplified diagram (**Fig.1**). In the north-west of Namibia elephant populations have considerable latitude for increasing their range and the situation may not require management interventions for many years. However, in the north-east, the escalating levels of conflict between humans and elephants suggest that the time for action has already been reached. Initially, the problem in the north-east appears intractable: the Caprivi, Khaudum and Nyae Nyae areas lie on the periphery of the largest elephant population in Africa. Management interventions carried out in isolation in Namibia will not affect the core elephant populations from whence the problems emanate.

Perhaps a shift in thinking is needed away from narrow preoccupations with biological diversity to a fuller consideration of the opportunities presented by the current situation. In the previous section, the exodus of elephants from Botswana and north-western Zimbabwe was portrayed as a challenge rather than a problem.

---

[4]For example, in the multiple use zone of Bwabwata.

[5]For example, removal of the international boundary fence along the southern boundary of Bwabwata and along the eastern boundary of Khaudum and Nyae Nyae would greatly facilitate east-west linkages in the regional elephant range.

[6]In a study of the Caprivi Region, Schlettwein (*et al.* 1991) saw the greatest threat to large wild herbivores as the extreme grazing pressure exerted by 96,000 head of cattle – a number which the authors expected to rise to 260,000 by 2000.

[7]In 2003 there were 253 separate incidents involving elephants in the Caprivi and 985 recorded instances of crop damage.

The importance of creating conditions which allow wildlife to compete with domestic livestock as a form of land use is referred to in several places in the *Background Study* and it might be salutary to consider how cattle farmers would react to the present situation if the focus were on cattle and not elephants. If, within the midst of a group of cattle farms, one farmer produced an overabundance of cattle to the extent that the beasts moved onto adjacent properties and, if that farmer made no effort to recover his cattle and was not overly concerned about his neighbours making use of the plentiful resource, the normal human reaction would be to accept the bonanza and use it. It is proposed that exactly this attitude should be adopted by the Namibian authorities towards the elephants in the north-east. Namibia should take full advantage of the opportunity presented by the overflow of elephants from the large and thus far unmanaged elephant populations of Botswana and Zimbabwe. The justification is that elephants are causing significant hardships for people and threatening conservation objectives in the north-east.

Namibia's short-term problem is to accommodate the increase in elephants, which is currently happening. Elephants have a propensity to eat themselves (and other species) out of house and home no matter how great the range available to them – a process which culminates in population crashes. In the long term, population reductions may be necessary. In the north-west, the management requirement may simply be to increase the range available to elephants: in north-central and north-eastern Namibia not only does the range need to be increased but, in some areas, the population may need to be reduced (**Fig.1**).

Technically, there are no good reasons why more land in Namibia should not be made available to elephants. The highest valued land uses over most of this arid country (**Map 3**) are those based on management of natural resources (Brown 2004). Moreover, the full potential is far from being realized at present due to national and international policy constraints, which place wildlife at a competitive disadvantage with land use based on exotic species. Were subsidies to be removed from the domestic livestock industry and, were it possible for elephant to play their full economic role in land use systems, it could reasonably be expected that large additional areas of land would be converted to wildlife management where human densities are relatively low and where co-existence with elephants is possible, as elsewhere in Namibia – for example, in most of the northern Kavango, parts of the central northern regions and in eastern Caprivi. This would remove the short-term limiting factor of providing additional range for elephant.

The technical arguments for greater areas of Namibia to be put over to natural resource management will not, on their own, bring about the needed changes to remove this limiting factor for elephants. It will require a high level of political commitment and the correct suite of incentives to induce landholders (both communal and private) to convert to a land use based primarily on wildlife. The high- level political commitment is already in place. In a speech delivered on 3rd February 2004, His Excellency the Founding President, Dr Sam Nujoma, made the visionary statement that wildlife would be restored throughout the north of Namibia, that ownership of wildlife would be conferred on local peoples and that the economy would be transformed by diversification based on wildlife uses.

For elephants, two factors mitigate against realizing the President's vision. The first is that the full value of elephant commodities (ivory and elephant skin) cannot be realized

due to international trading constraints.[8] The second is that elephants in Namibia are effectively State property – which was clearly not the President's intent. These two major disincentives need to be addressed before the conditions for increasing elephant range will be achieved. The options for tackling the CITES constraints are discussed fully in section 2c of the *Background Study* and briefly under the *Strategy and Actions* in this plan. The devolutionary requirements for elephants are also dealt with under the *Strategy and Actions*. A threat to fulfilling the Vision lies in a possible perversion of the intent of policy during the course of putting it into practice (Corbett & Jones 2000).

Full devolution of rights over elephants to landholders (on both communal and private land) is a prerequisite for creating the correct suite of incentives for elephant populations to expand. It is a necessary but not a sufficient condition. As a result of the arid environment in Namibia, elephant have large home ranges and this has major portents for management, both within Namibia and across national boundaries. No single protected area is a self-contained range for elephants and, in the north-east, the national parks in Caprivi are small (e.g. Mahango, Mamili and Mudumu) and very much at the mercy of the land use surrounding them. The desirability of cooperation with conservancies and surrounding communal lands has been emphasized in all of the previous studies in this series.[9] A key difference between the institutions needed for elephant management in the Caprivi and those in the north-west is that they would have to include stakeholders who are not included in conservancies. Unlike the other species in Caprivi for which management plans have been prepared, elephant are not rare or endangered and, indeed, they are a threat to those species which are.

A process of 'scaling up' is necessary to match institutions with ecological imperatives (Murphree 2000). Large areas co-managed by the relevant landholders and occupiers will be necessary to provide viable ranges, to distribute the pressure of elephants on habitats and to allow population increase and expansion. The Vision Statement developed under the UNDP/GEF-assisted project in Namibia (UNDP 2005) provides for co-operation between stakeholders to achieve this far-sighted concept. Linkages would be established under a co-management system which would both secure and increase the available range for elephant (**Map 4**).

In the north-east, elephant population reduction may be necessary. However, there are no simple answers to the question of how many elephants need to be removed – either to conserve biological diversity or to reduce conflicts between humans and elephants. It would be a mistake to attempt to hold the elephant population of the north-east at some constant level (or, conversely, to attempt to maintain a constant harvest from it). Such a "Command-and-control" approach (Holling & Meffe 1996) is likely to have adverse effects on the resilience of ecosystems.

This all points towards a need for imaginative and innovative management. An acceptance is necessary that there are no scientific recipes which avoid all the pitfalls in what is a 'complex system'. The starting premise may be that the option of zero use is

---

[8]Elephant are perhaps the only species where, if markets were working properly, the commodity value of an elephant bull is actually higher than the value which can be realized from trophy hunting.

[9]Martin (2004) stated that successful conservation of the wetland grazers was unlikely to be achieved without co-management institutions for the full extent of the floodplain habitats in the Caprivi.

not a reality – elephants will be harvested illegally and unsustainably if facile attempts are made to debar their use. The aim should be to avoid routine cropping or culling programmes which attempt to impose constancy on naturally fluctuating ecosystems and to introduce an element of randomness into the system. The challenge is to make it sustainable and this requires an adaptive management approach (Holling 1976).

Combining adaptive management with the arguments for co-management presents a classic situation where the principles of adaptive co-management in complex bio-economic systems (Ruitenbeek & Cartier 2001) need to be applied. The individuals who are most affected by elephants are those living in the north-east: together with the State authorities, they should decide how elephants should be managed.

Background and Rationale for the Management Plan

The African elephant has achieved huge prominence in global conservation issues in the past 20 years. Few other species are capable of arousing emotions, polarizing viewpoints and causing controversy to the extent that *Loxodonta africana* has done. In 1989, rightly or wrongly, the species was listed on Appendix I of CITES and legal trade in ivory was effectively banned. Because of the high profile of the species, every range country seeking credibility in the international conservation arena should have a management plan for elephant.

The southern African region holds more than half of the African elephant population and the largest concentrations of elephant are in a central zone extending across the continent between latitudes 15º-20º south of the equator. Within this zone, Botswana and north-western Zimbabwe hold some 200,000 elephants. The expansion of these populations into neighbouring countries is affecting biological diversity and human livelihoods. In recent years, divided opinions on the subject of elephant management have characterized debate in southern Africa and the situation is no less contentious than in the international arena. The topic is now in the political realm and demands for elephant management plans are coming from all stakeholders.

The 'elephant problem' is central in initiatives to create transboundary conservation areas in the region. The need for elephants to have access to far larger areas than those in which they are currently confined is recognized and, for many, TFCAs are seen as the solution to elephant population increases. Unfortunately, a lack of coherent land use planning in all of the participating countries[10] in the KAZA TFCA, coupled with a legacy of national boundaries which are an "outrage to geography and all common sense", (Fisch 1999) means that this TFCA will undergo a long and difficult birth. And shortly after parturition, the 'elephant problem' will rear its ugly head notwithstanding the additional range which is available. National management plans are needed to anticipate the reality that TFCAs will not solve the elephant problem.

Under the present Namibian environmental legislation, management plans are required for species which are rare or valuable and which share boundaries with neighbouring countries. Elephants are not rare but they are potentially valuable and, within multi-species wildlife systems, could provide a financial return which greatly exceeds that possible from alternative land uses. A management plan which treats elephants as the

[10]Angola, Botswana, Namibia, Zambia and Zimbabwe.

valuable resource that they are could generate sufficient income to meet the conservation costs of the elephant range in Namibia.

This plan has no relationship to standard Government five-year budgeting plans – except insofar as the required operational expenditure for State Protected Areas needs to be maintained continuously above the minimum threshold needed for effective management and law enforcement. The achievement of a greater range for elephant and the capacity to carry greater numbers of elephant is subject to many factors being favourable – including success in conservancy development, a reversal of the present spread of unplanned settlement and land clearance, mitigation of the effects of veterinary fences and the creation of institutions with local stakeholders that allow co-management of elephant populations over substantial areas.

Plan Structure

In each of the preceding species management plans under the Transboundary Mammal Project, it has been found necessary to make minor adjustments to the *pro forma* layout that formed part of the terms of reference. Some additional small changes have been made in this plan – to suit the specific requirements for the species.

The style of the plan differs slightly from previous plans. Throughout the text, there is more narrative discussion and less of the conventional 'bullet point' approach. Recognizing that any decisions to manage elephant are potentially controversial, the plan gives due weight to the concepts and philosophy on which management should be based. The plan advocates that elephant management decisions are made in a co-management forum with other primary stakeholders and, because of this, it is impossible to predict in advance what those decisions will be or to spell them out in a concise sequence of required activities. The emphasis is more on predicting the outcomes of certain actions rather than advocating particular management interventions.

(1) The plan begins with a **VISION STATEMENT** which incorporates a **GOAL** and three objectives – a **SOCIAL OBJECTIVE**, an **ECOLOGICAL OBJECTIVE** and an **ECONOMIC OBJECTIVE.** The Vision builds on evolving Namibian policy.

(2) A set of **ACTIONS** needed to achieve the objectives follows and, taken together, these actions comprise the **STRATEGY**. The points are made that complex interactions exist among the objectives that are not amenable to 'linear programming' and an **ADAPTIVE MANAGEMENT** approach is needed for all interventions.

(3) The **RISKS AND ASSUMPTIONS** implicit in the plan are then detailed – the most severe risk being that attached to doing nothing.

(4) **FINANCE AND CAPACITY**: In previous plans detailed budgets have been prepared for implementation – based on the assumption that the plan might be submitted for donor funding. This plan is unique in that the income from elephants should more than meet all implementation costs and it is recommended that the plan is not submitted to donors. An estimate of typical income from elephant management is presented in **Appendix 1**.

(5) The key issues on which **TRANSBOUNDARY COOPERATION** is desirable are highlighted, and it is noted that the principles on which this management plan is based could be extrapolated to the larger scale of a trans-frontier conservation area.

MANAGEMENT PLAN

VISION, GOAL AND OBJECTIVES

This Vision Statement consists of a preambular section and an operative section in which the overall goal and objectives are stated. Following the Vision Statement, a sequence of actions is presented which, taken together, comprise a strategy to achieve the objectives.

This is the Vision Statement of the MET and not necessarily that of the other primary stakeholders in Namibia – who are those people in communal lands and on private land where elephants occur. For this reason some care has gone into the phrasing of the Vision Statement so that the State does not appear to speak on behalf of the other stakeholders with whom it hopes to enter into co-management arrangements. The overall goal makes it clear that the Ministry will be guided by the wishes of the other stakeholders.

If it were adopted, this Vision Statement could be seen as Government's policy for elephants. Several points need to be made: –

(1) Notwithstanding any sensitivity to other stakeholders, it is completely valid for Government to state its policy. The assumption is that the policy is already informed by the wishes of the stakeholders.

(2) Policy is a statement of Government's intent and, as such, it should be focused on the larger issues and not burdened with details.

(3) Policy precedes legislation. Laws are made to give effect to policy.

(4) Policy is essentially experimental and, at the outset, there should be an awareness and acceptance that it may need to be changed. Implementation of policy is 'adaptive management' at the highest level (Lee 1993).

VISION

RECOGNIZING that elephants are of global, regional and national conservation concern;

CO-OPERATING with neighbouring countries and the international community to achieve the security of the species and enhance its biological status;

PARTICIPATING fully in transboundary initiatives which, *inter alia*, will extend the range available to elephants;

REGARDING the elephant as a highly desirable species to be conserved as part of the biological diversity and natural wealth of Namibia and noting that there are unique adaptations among Namibian elephants to arid environments;

RECORDING the fact that Namibia has a secure and viable population of elephants which is expanding at the moment and becoming overabundant in some areas;

WILLING to continue to commit public funds to the promotion, protection and management of the species;

BEING AWARE that in recent historic times elephants were found throughout Namibia but that to return to this situation will require a high economic value to be attached to the species;

PROMOTING wildlife management as the optimum land use in the arid environment of Namibia and treating elephants as one of many valuable species in the diverse large mammal community occurring in Namibia;

NOTING the potential financial and economic contribution that elephants could make as part of wildlife-based land use were it not for national and international policy constraints;

DRAWING ATTENTION TO the high costs entailed in conserving the species that include the damage that elephants inflict on human livelihoods and the reduction in biological diversity that results from an overabundance of elephants;

EMPHASISING that a policy of total protection for elephant will result in their available range being reduced to State protected areas and a corresponding decrease in their numbers;

CONVINCED that a policy of sustainable use, as enshrined in the Namibian constitution, will result in the expansion of the range available to elephant and an increase in their numbers;

Accordingly, the Ministry has the following goal and objectives –

STRATEGY AND ACTIONS

Simple as the objectives are, they will not be achieved by 'linear programming' within each objective. To achieve the ecological objective of increasing elephant range requires certain actions to be taken in the social and economic categories. The social objectives of reducing conflict and achieving a flow of benefits require actions to be taken in the ecological and economic realms. The full economic objective will not be achieved until all of the other objectives are in place.

While all the actions and outcomes appear to be inextricably linked, it is possible to present them in a sequence which leads logically to the achievement of the objectives.

GOAL

Namibia wishes to carry the maximum number of elephants that is consistent with the conservation of biological diversity AND the wishes of those primary stakeholders who have elephants on their land

SOCIAL OBJECTIVE

1. **To reduce conflict between elephants and people**
2. **To create conditions under which elephants are a benefit to people**

ECOLOGICAL OBJECTIVE

1. **To increase the range available to elephant**
2. **To conserve biological diversity in State Protected Areas and promote the conservation of habitats outside State Protected Areas in the elephant range**

ECONOMIC OBJECTIVE

To enable the full economic potential of elephants to be realized according to the provisions for sustainable use in Namibia's Constitution

The actions, when taken together, comprise a strategy and this is outlined below as shown in **Fig.2**.

A feature of this management plan is just how few actions are needed to bring it to fruition. Success relies on a few administrative masterstrokes which will cost next to nothing – rather than on a long list of expensive management activities.

(1) **Devolution**

Devolution of authority for landholders, both communal and private, to manage elephants on their land is a prerequisite for the other stages in the management plan. Co-management arrangements cannot be entered into as long as the stakeholders around the table (other than the State) have no rights over the species. It will be impossible to create the conditions under which the elephant range can expand without the correct suite of incentives – which includes full empowerment at the outset. The State does not have the answers as to how many elephants there should be in all the parts of the range (and there may be no right or wrong answers) and it needs the other stakeholders to help to decide this.

Many planners and bureaucrats see devolution of authority as a step-by-step process where communities are granted powers incrementally as they demonstrate the ability to manage. This is a 'Catch 22' situation (Murphree 2000). Authority is a prerequisite for responsible management and should not be held out as the reward for it. In some cases, State authorities cannot see why the end goals of wildlife management require complete devolution. Devolution carries with it the responsibility for organization, management, control, self-sufficiency and, above all, for developing resourcefulness. These attributes cannot be imposed. They must be developed experimentally in the local setting and, without authority, such experiments are defective. The stimulus for the development sought within this management plan will arise not from the anticipation of future entitlement but from the imperative of immediate empowerment.

The MET may fear that complete devolution of authority for elephants could have wider ramifications – establishing precedents that would affect all other large mammal species in Namibia. This need not necessarily be the case. The devolution could be clearly labelled as 'experimental' and justified by the current prominence and urgency of elephant issues. In any case, the Ministry hopes that shortly after devolving these rights, it can enter into co-management arrangements in different parts of the elephant range – this will probably result in stronger controls on elephant exploitation than could be implemented by the State on its own.

In Zimbabwe during the 1970s and 1980s, wildlife authority was almost totally devolved to landholders except for Specially Protected Species (a legal category of wildlife where the State retains powers to control exploitation). Elephants in Namibia are in such a category. It is of interest that, in the years after devolution, all wildlife species increased in abundance except for Specially Protected Species. By limiting the rights of landholders to hunt, crop, breed, capture, translocate and sell these protected species, the incentives were not present to bring about their increase. Elephants are abundant in Namibia and there is no sound conservation reason why they should be classified as specially protected. Perhaps the only legal control that needs to be maintained is that of ensuring that all ivory is sold through the central Government outlet in order to satisfy CITES accountability requirements.

(2) **Veterinary control fences**

The influence of veterinary fences on the current elephant range, both in Namibia and in the region, is profound. There is a bottleneck in the vicinity of Mahango Core Area within Bwabwata National Park that affects the entire regional range for elephant across the central southern African region, (**Map 5**) caused by the veterinary fences on the southern boundary of Caprivi and along the international border between Botswana and Namibia. The compression of elephants in this narrow isthmus has undoubtedly been responsible for the woodland destruction in Mahango. This is a matter for the MET to pursue from the outset of the management plan.

The recent migration of elephant into Namibia indicates that these fences are less than effective. The boundary fence between Khaudum and Botswana is frequently breached over a large section (Beytell *pers. comm.*) and the fence on Caprivi's southern boundary is in a similar state (Booth *pers. comm.*). However, there should be little cause for elation over this: the fences undoubtedly impede movement of elephants up and down the Kavango River and act against the maintenance of spatial linkages between the subpopulations. There is a danger that the authorities in both countries will suddenly become conscious of the *status quo*, attempt to repair the fences and, at the same time, demand that elephants are killed as problem animals.

Cumming (2005) has called for the veterinary profession to re-examine its methods of disease control as the southern African region moves into transboundary wildlife management over very large areas. Methods of control that were developed in the 1960s and applied at national levels may no longer be appropriate at the international scale where collaborative efforts are being made between governments to move to the higher-valued land uses offered by wildlife tourism.

(3) **Constraints on trade**

CITES constraints on trade in ivory and elephant products are exerting a negative effect on Namibia's aspirations for conservation of elephant and, more generally, acting as a disincentive to the adoption of wildlife management as a primary form of land use.

The listing of the Namibian elephant population on Appendix II of CITES is accompanied by an annotation which makes trade in ivory and other elephant products very difficult. The achievement of full market prices for elephant commodities is needed to realize the ultimate objectives of this management plan. For this reason, the removal of the particular constraints affecting Namibia should be tackled with renewed vigour by the Government at an early stage in the inception of the management plan.

The options open to Namibia to achieve the removal of the current CITES annotation limiting its ability to trade are discussed in the *Background Study* and it may not be strategic to present them here. One of the options is to accept the *status quo*. The perspectives included in Namibia's submission to the 13th CITES meeting in Bangkok in 2004 to amend the annotation affecting Namibian elephants (MET 2004) are extremely powerful and provide the justification for rejecting this option. Namibia has reiterated its determination to oppose measures imposed externally that act detrimentally towards conservation, local people and national development.

It cannot be denied, however, that there are substantial values to be derived from elephants through tourism and international trophy hunting (which is not debarred under the Namibian annotation) even if they fall short of the ideal. The management plan is worth pursuing, even if the full value of elephant products cannot be achieved overnight and even if performance under the Economic Objective is lower than it should be.

(4) **Co-management**

Namibia continues to make huge progress in the development of conservancies on communal land. Namibia currently has 50 registered and about 20 emerging conservancies, with 220,620 people living in registered conservancies managing wildlife over an area of more than 118,704 km^2, including expanding elephant populations. The wildlife range on commercial farmland in the north of the country is increasing – particularly in areas where it is hoped that the elephant range can be expanded. These very positive developments are recognized in the Vision Statement of UNDP (2005) and are seen as a way to link protected areas across the country and to provide a continuous range for elephants across the north of Namibia.

It is important that the momentum continues: further evolution of policy is needed to allow new co-management institutions for larger areas to emerge. The present mosaic of parks, conservancies and commercial farms provides a sound and essential foundation for the 'scaling up' of institutions (Murphree 2000) and, as they stand, partnerships can be entered into among neighbours. But there is a difference between partnerships and full co-management institutions. The needs of elephant provide the vehicle for co-management – no tract of land in Namibia is large enough to be a self-contained management unit for elephant.

Ruitenbeek & Cartier (2001) would have it that a co-management institution cannot simply 'be imposed on a group of innocent bystanders'. It is something that should emerge naturally from a complex bio-economic system. The devolution of rights over elephants creates the conditions for emergence – it should stimulate the formation of institutions based sensibly on geographic areas. Here, too, there is scope for applying another principle – *no institution should be larger than the problem it is trying to solve* (Martin 1999b). Each new co-management institution should be related to the range of an elephant subpopulation and should include only those stakeholders on whose land elephants occur (which would include, in some areas, communal residents who are not organized into conservancies). The high-level institutional structure proposed for the State wildlife agency under the MET/UNDP/GEF project (UNDP 2005) is ideally suited to this from a geographical perspective. The new divisions, subdivisions and sections are well-matched to the elephant ranges that will require co-management institutions.

The State will be part of each co-management institution formed to manage elephants but its new role should be very different from a 'command-and-control' function. The operating point on the management continuum defined by Ruitenbeek & Cartier (2001) should be close to the *laissez faire* end of the spectrum.

At an early stage in the formation of the co-management institutions, a voting procedure may need to be established that could be based on the size of the landholding for which each stakeholder is the responsible authority within the elephant range. On this basis, the State might dominate decision-taking in the north-west: in eastern Caprivi, where Mudumu and Mamili national parks are relatively small, the communal land stakeholders should have the major say.

(5) **Adaptive management**

At this stage management interventions required in north-western Namibia are minimal: elephant densities are low and the population is in the process of re-colonizing its former range. Perhaps the only agenda for a co-management institution would be the allocation of trophy quotas.

In north-eastern Namibia, the migration of large numbers of elephant from Botswana, habitat modification in national parks and escalating levels of conflict between humans and elephants may require significant management interventions. The co-management institutions[11] in the north-east would need to address trophy hunting quotas, problem animal control (PAC) and population reductions.

Trophy hunting

In the absence of any other management (including PAC), the proportion of an elephant population that can be hunted for trophies is about 0.5%. These trophies would all be males over 30 years old. If the north-eastern population is about 16,000 animals, the maximum trophy quota would be about 80 animals of which 50 would come from the Caprivi and 30 from the Khaudum/Nyae Nyae area.

These might be the quotas set from 2007 onwards. Under adaptive management, the ages of the elephants killed should be monitored and, in succeeding years, the quotas should be adjusted upwards or downwards according to the criterion that there should be some animals among those killed that have reached an age of 40 years. If monitoring were based on tusk weights (which is considerably easier), there should be several tusks greater than 22 kg in the quota and the average tusk weight should not be much less than 19 kg.

Under a co-management system, it would not be necessary to allocate hunting quotas to particular conservancies or protected areas. The total income from all the trophies could be shared according to landholdings (or other agreed criteria) at the end of the year.

The sustainable off-take of trophy hunting quotas is affected by any other management interventions taking place at the same time (PAC and culling) and the effects are discussed below.

Problem animal control (PAC)

If PAC is restricted mostly to male elephants 15 years and older, the maximum sustainable off-take is about 1.5% of the total population. As the problem animal off-take is increased, the trophy hunting quota must be reduced to remain sustainable and, when the level of PAC reaches 1.5%, there are insufficient animals reaching an age of 30 years to allow sport hunting. The relationship is shown in the table below.

PAC off-take %	0	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1	1.1	1.2	1.3	1.4
Trophy off-take %	0.50	0.45	0.40	0.36	0.32	0.26	0.22	0.18	0.12	0.11	0.08	0.05	0.03	0.02	0.01

Percentage off-takes are of the total population

The present system for dealing with problem elephants is clearly unworkable, particularly in the Caprivi. Elephants identified as problem animals must first be offered to a hunting concessionaire. The professional hunter is not allowed to shoot after dark which means that on most occasions the offending animal will not be killed in the act of crop raiding. If the hunter is unsuccessful in selling the animal as a trophy to a hunting client, MET staff

[11]There would probably be three such institutions in eastern Caprivi and Kavango.

may then destroy the animal subject to the current delegations of authority by the Minister.

Under a fully devolved co-management system, each stakeholder might be responsible for PAC in his/her landholding or authorized control officers would be present as needed in different parts of the area.[12] Being aware of the impact of PAC on trophy hunting, the co-management committee might prescribe guidelines to minimize the number of animals killed.[13]

Population reduction

Culling entails the removal of entire elephant herds with the aim of reducing population numbers or limiting the rate of population increase. By removing entire herds, the age structure of the female segment of the age pyramid remains unaltered and no selective pressures arise from the practice. The overall age structure of the population does become skewed in favour of males and this permits a higher percentage quota for trophy hunting, although it does not result in a greater number of male trophies over a period of years than would be obtained from a population which is not subjected to culling (because of population growth).

For a population growing at 4.6% per annum (a typical growth rate for savanna elephant), **an off-take of 3% of the total population will stabilise numbers**: a higher percentage off-take will reduce the population. This entails an off-take of about 30 animals for every 1,000 animals in the population. If culling is combined with trophy hunting, quotas can be raised to 1% of the population and an additional 10 males over the age of 30 years would also be removed annually.

If the sole consideration of the MET was to limit vegetation damage inside national parks, it might not seem necessary to confer with other stakeholders on any management decision to reduce elephant numbers in State protected areas. However, given the movements in and out of parks, a more sensible strategy is to manage the population both inside and outside parks with the other stakeholders for multiple objectives.

There are no simple prescriptions for the 'correct elephant densities' either to conserve biological diversity or reduce levels of human/elephant conflict. The worst mistake that could be made would be to attempt to hold the elephant population of the north-east at some constant level or to attempt to maintain a constant harvest from it – because this has adverse effects on ecosystem resilience. The rational approach is adaptive management (Holling 1976). Learning will only occur by exploiting the resource (Hilborn & Ludwig 1993) and monitoring progress towards the desired situation. By joining with

[12]In the late 1960s and early 1970s a PAC system which was in place in Caprivi where Chiefs Mamili and Liswani III (Salambala) had their own hunters authorised to hunt problem animals and obtain meat for feasts. These hunters were armed with .458 and .375 rifles. A quota was issued to each chief, problem animals were reported and dealt with within 24 hours, the tusks from the problem animal were registered, sold on the chiefs' behalf and the funds were deposited into the chiefs' account for community development. The system worked well (B. Beytell, *pers. comm.*).

[13]If commodity markets for elephant products were functioning properly, there would be little financial advantage in selling an elephant as a sport hunting trophy – the same animal would earn as much killed as a problem animal.

other stakeholders in deciding the nature and extent of any management interventions, the MET will place itself in a strong political position both nationally and internationally. The implementation of any population reductions will not be difficult to defend since the decisions will have been taken democratically.

Cropping

Namibia has stated firmly in its submissions to CITES (MET 2004) that no elephant will be killed for the sole purpose of realizing its value in the ivory trade.

Throughout Africa, elephants have been killed by local peoples for both ivory and meat for centuries. One of the primary reasons that colonial powers sought territories in Africa was because of the natural wealth of ivory (Parker 2004). Ansell (1960, page 50) remarks on the damage to crops in the Luangwa Valley, Zambia, but notes that elephant were seen by local people as valuable animals because of the meat they provided.[14]

It would be as well for MET to enter any co-management forum with no preconceived moral position on elephant. Having accepted that the solutions to the current 'elephant problem' may lie in innovative management inspired by the values of local people, a *tabula rasa* is needed to accept with an open mind all options presented.

The above actions comprise the strategy for elephant management.[15] Two of the actions are no more than enlightened administrative decisions to be taken within the Ministry. The veterinary fence issue requires the MET to confer with the Directorate of Veterinary Services in Namibia and carry its representations into the transboundary forum with Botswana. The ongoing struggle with CITES lies in the political and administrative realm. The adaptive management decisions affecting exploitation of the elephant population are not for prescription in this management plan: they will emanate from the enlarged forum of co-management institutions. They will take into account a wider range of social, ecological and economic factors than have previously characterized elephant management and, because of this, there is a real opportunity to advance knowledge on elephant management.

The objectives in the Vision Statement should be realized sequentially.

> **Ecological objective 2**, that of conserving biological diversity, should be the first to be realized since it is not dependent on achieving the full financial value for elephants. It requires only pro-active decisions from the co-management forums. It will, of course, result in costs which may have to be met from the fiscus in the first instance: however, as success is achieved in the CITES forum, the costs of ongoing population reductions can be met from the return from elephant products.

---

[14] In the 1960s, every local person in the Luangwa Valley received a half-pound of meat weekly from elephant control.

[15] In the discussion of limiting factors the provision of artificial water, competition with cattle and the effects of veterinary fences were mentioned as additional factors influencing elephant populations. These are discussed more fully in the *Background Study* (pages 65-66) together with the effect on habitats of elephants and fire acting in combination. Rather than deal with these as stand-alone topics in this management plan, it is preferred to treat them as agenda items to be addressed by co-management institutions.

Social objective 2, that of elephants benefiting people, should be realized next. The full suite of benefits will only be realized when elephant commodities achieve their real market value: however, sufficient benefits may flow in the early stages from trophy hunting, PAC and population reductions to maintain the positive momentum needed to achieve the other objectives. An important factor enters the equation here. Once the stakeholders feel secure that they really are in control of elephant management, the demands for quick financial benefits are likely to lessen and they will begin to think more deeply about the very complex problems involved in managing elephants.

Social objective 1 - that of reducing conflicts between elephants and people, should follow. Here, too, the effects of devolution will be paramount. As long as the stakeholders see elephant management as a State responsibility, it pays them to make a huge fuss about all elephant incidents which affect their livelihoods. Following devolution, the responsibility for solving the problem rests squarely in their court. And, for the first time, they will have to grapple with multiple competing factors which affect their livelihoods. If all elephants are eliminated, crop raiding problems will be solved: however, the larger income from good wildlife husbandry will also be lost. It must be remarked that there is little possibility of eliminating elephants: dispersal from the large Botswana population will replenish stocks continuously.

Ecological objective 1 - that of increasing the elephant range in Namibia, will depend on a number of factors. The achievement of the previous objectives should create the incentives for a transformation in land use. The State can assist at the national level by removing perverse incentives which favour other less productive forms of land use and, in particular, by bringing the veterinary fences issue under scrutiny. As transboundary wildlife initiatives gain momentum, economic multiplier effects should speed up the process, tipping the scales in favour of wildlife management. The international struggle over the ivory trade is unlikely to be won in the first rounds of the contest and may require incremental demonstrations of success to convince sceptics that policies are working.

The Economic Objective - that of achieving the full value of elephants over the maximum potential range in Namibia, is also dependent on progress with the previous objectives.

If the elephant range can be extended as far south as shown in **Map 4**, about half of Namibia (400,000 km^2) would contain elephants. If the full commodity values for elephant are finally achieved, under a sustainable use management regime involving elephant male trophy hunting and culling to prevent elephant population increase above a density of 1/km^2, the net financial return per unit area could be as high as US$3/ha (**Appendix 1**). The net income would be about US$120 million. Using the multipliers implicit in Barnes & de Jager (1995) the 'net value added' in economic terms would be more than double this amount.

Impacts

The impact of achieving the highest valued of land use is likely to be considerable – Namibia could improve its economy by an order of magnitude. It will provide the revenue for effective State conservation, elevate the standard of living for landholders with elephants and create the incentives for more land to be put under wildlife. Ultimately, it could revolutionize land use practices throughout the region and pave the way for TFCAs.

Monitoring

Monitoring of a range of specific biological parameters is implicit under adaptive management. The detailed requirements for making sport hunting quotas sustainable and achieving the aims of any population reductions are detailed in the *Background Study*. The 'Event Book' system (NNF 2004) is already producing the needed information for conservancies on conflict between elephants and humans. The annual record of revenues and incomes earned from State protected areas, conservancies and other communal land will provide the information needed to assess progress towards achieving the economic objective.

RISKS AND ASSUMPTIONS

Given the escalating human-elephant conflict and the extreme modification of habitats in north-eastern Namibia, the greatest risk to Government's position is to do nothing. The architects of Botswana's elephant management plan (DG 2004) have recommended that Namibia does not take a passive approach on the issue (G.C. Craig, *pers. comm.*). Failure to implement the necessary devolutionary measures and enter into co-management carries the real risk that local people will take matters into their own hands or, worse still, collaborate with illegal hunters from neighbouring countries.

Inactivity will not simply result in the *status quo* being maintained. Since the 1970s, elephant populations have collapsed in an apparently inexorable process across Africa.[16] Invariably it has happened in countries where the State asserts that it owns all wildlife and attempts to regulate all wildlife use. Murphree (2000) describes this 'Big Government' syndrome as one where the State's "authoritative reach exceeds its implementational grasp". The most spectacular population crashes have occurred in countries that have banned all exploitation of elephants, yet corruptly continued to feed the ivory trade (Parker 2004). These same countries have also been in the vanguard of those proposing an ivory ban.

There is little risk that any management interventions could have an adverse effect on the status of elephant populations in Namibia. Populations are expanding and being augmented by migration from Botswana and Zimbabwe. Provided the effects are properly monitored, experiments in management will provide a learning experience.

Assumptions

(1) Adequate funding will be available to the Directorate of Parks and Wildlife Management (DPWM) through the fiscus to maintain its essential functions in State protected areas (see FINANCE AND CAPACITY).

(2) Present legislation which prevents the devolution of rights over elephant will be amended.

---

[16]AfrESG (1998) and Martin (1986) document the decline of elephant populations in various countries since the 1970s. Among the more spectacular population crashes have been those in Kenya, Tanzania, Uganda and Zambia.

(3) MET is willing to enter into co-management of elephants with legitimate stakeholders.

(4) The devolution of rights over elephant and the establishment of co-management institutions will create the conditions for an expansion of the present elephant range beyond State protected areas, create linkages between State protected areas and improve the security of existing populations.

(5) Botswana and Zimbabwe will not take steps to limit their elephant populations. Whether or not they do will have little impact on this management plan as an institutional structure will have been set up to cope adaptively with changing situations.

(6) Namibia will be successful in convincing the Parties to CITES that the democratic policy it is pursuing carries the greatest long-term prospects for conservation and rehabilitation of elephant populations. If this assumption is not satisfied, it does not invalidate the management plan: it simply means that the transition to higher-valued land use systems based on wildlife and the expansion of the elephant range will take longer.

Risks

(1) If the assumptions are satisfied, the risk of an outbreak of illegal hunting of elephants among Namibian citizens is minimal. However, successful conservation of elephants in Namibia may attract illegal hunters from outside its borders – particularly from poorer countries whose local peoples are not benefiting from wildlife.

(2) There is a real risk that veterinary control measures, even though not directed at elephant, could continue to prejudice the objective of expanding the elephant range. Without expansion of the elephant range, the problems of conflict between humans and elephants and damage to wildlife habitats will require more intensive management. The solutions to this problem do not lie solely within Namibia's borders and this risk becomes an externality. The establishment of robust democratic co-management institutions will greatly strengthen the Ministry's position in tackling the problem and, even if the *status quo* of veterinary fences does not change, management solutions may emerge from within such institutions.

(3) If Namibia alienates some Parties to CITES through taking extreme measures to re-establish its sovereignty over elephants, there may be reprisals that affect other aspects of financial aid to Namibia. This will have to be handled in the political realm. Namibia's moral position is strong and it will be a pity if pragmatism has to override morals – particularly where it prejudices long-term prospects for conservation and rural development.

(4) If Namibia undertakes management interventions that involve culling or cropping from elephant populations, there will almost certainly be a regional and international outcry. From the experience that Namibia already has with the publicity surrounding elephants, it takes no stretch of the imagination to visualize the extremes to which the propaganda might go.

It is here that co-management is vital. If Namibia can present to the outside world a unified position supported by its citizenry, it should be able to weather the storm.

FINANCE AND CAPACITY

This management plan differs from all previous species management plans in that very little funding is required to implement it. The main costs will lie in co-ordination (liaison in setting up co-management institutions) and implementation of any management activities that arise from co-management decisions (problem animal control and population reductions). The potential income from elephant management is substantial and should more than cover these costs. The State or primary stakeholders may have to advance funds for certain activities to take place and it is strongly recommended that this is the financial mechanism used. Because of the controversial nature of elephant management, it would be wise not to compromise any decisions taken between the Ministry and primary stakeholders by seeking either international donor funding or local NGO funding to support implementation.

The current project to strengthen the system of national protected areas (UNDP 2005) should provide the necessary funding and capacity for MET to carry out its normal functions, including law enforcement. The close alignment between the UNDP project and the management plan for elephant bodes well for forming co-management institutions. Under the project, northern Namibia would be managed under two main divisions: the north-west (which includes Etosha National Park) and the north-east (which includes the Bwabwata, Mamili, Mudumu and Khaudum national parks and Waterberg Plateau Park).

The income from elephants would be unable to contribute much to Government budgets for the north-west. There is no sport hunting of elephants in the State protected areas and no management interventions are proposed. Outside the State protected areas, income earned from trophy hunting accrues to conservancies rather than to the State.

In the north-east, elephant could play a significant role in meeting conservation costs. The potential earnings from an elephant population managed for trophy hunting while keeping numbers constant are given in **Appendix 1**. The extent to which this revenue would contribute to park conservation costs is shown below.

	Caprivi	Khaudum & Mangetti
Protected areas with elephants (km^2)	9,956	4,142
Required conservation budget under UNDP (2005) – N$ million	13.9	4.8
Cost/hectare N$	13.91	11.59
Potential revenue from elephant management N$/ha	8.71	8.71
% contribution of elephants	63	75
Present conservation budgets (approx) – N$ million	9.9	3.4
Allocation/hectare N$	9.94	8.28
Potential revenue from elephant management N$/ha	8.71	8.71
% contribution of elephants	88	105

It would more-or-less meet the present budget allocations for the north-east and would meet at least two-thirds of the budgets proposed under UNDP (2005). Even if the full value of ivory and elephant skin is not achieved, the revenue from sport hunting will provide some 75% of the amounts given in the table.

Over and above the revenue which would accrue to State protected areas (N$8.7/ha), an additional N$9.7/ha would be earned by safari operators. This figure is dependent on the assumed proportion of gross income that safari operators would pay the landholder (MET or local community) for the 'rental' of the trophy hunting concession including trophy fees. If a rental higher than 25% can be secured, the primary stakeholders would achieve a larger part of the total net income (N$18.4 per hectare) from this elephant management regime.

Over and above the costs assumed in Appendix 1, additional costs could arise for such items as the annual aerial census of elephant populations, provision of artificial water and control of fire. However, in previous species management plans (Martin 2002, 2003, 2004) detailed budgets have been prepared for these items and it would be duplication to resubmit them here. Moreover, to put forward budgets for management activities which are the prerogative of co-management institutions yet to be established would be premature.

TRANSBOUNDARY COOPERATION

Whilst recognizing the larger goal of creating a major transboundary conservation area extending from the north of Namibia eastwards through Angola, Botswana, Zambia and Zimbabwe, the initial strategy guiding the Transboundary Mammal Project was to build incremental initiatives with Botswana based on individual rare or valuable mammal species of common interest to both countries. Given the extensive range of elephants and the high profile of elephant issues in the KAZA TFCA region, the time may have come for the subject to be discussed in a broader consultative forum.

Most of the management activities identified for potential cooperation and collaboration between Botswana and Namibia at the Kasane Workshop (2002) and Windhoek Workshop (2003) repeat themselves in this Management Plan.

(1) Maintaining liaison between wildlife departments and communities managing wildlife on either side of the international border;

(2) Maintaining linkages between species subpopulations;

(3) Ensuring compatible forms of land use on either side of the international boundary;

(4) Expanding the available range for the species – which includes dialogue on veterinary control fences;

(5) Co-operating on law enforcement directed at illegal hunting;

(6) Controlling fire;

(7) Collaborating on aerial surveys to improve population estimates.

The issue of joint management of this species is a topic which has not arisen with the other species which have been the subject of transboundary dialogue. It would be highly desirable if a common management approach for elephants could be developed, in the first instance, between Namibia and Botswana but, after that, with the other countries sharing the elephant range.

So far, Botswana and Zimbabwe have not announced their intentions regarding elephant management. This plan is structured so that the management of elephants on Namibian soil is not dependent on decisions by neighbouring countries: It is, first and foremost, a national plan. However, if Namibia's neighbours expressed a wish to enter into large-scale joint management of elephants, there is nothing in the plan to preclude this. Indeed, Namibia would welcome the initiative. It is an extension of the co-management policy approach which Namibia will pursue at the national level.[17]

The corollary to this is that, if there is no agreement with neighbouring countries, it cannot reasonably be expected that Namibia will not undertake management interventions in the best interests of its local peoples and conservation imperatives. Namibia would, of course, keep its neighbours fully informed of its management decisions.

The management activities on which collaboration might occur are: –

(8) Setting hunting quotas and monitoring the sustainability of hunting

Both Botswana and Namibia allow sport hunting of elephants and the trophies are derived from a shared population. This is a test case for developing workable transboundary institutions which, in the first instance, result in cooperation on quota setting and, ultimately, lead to income sharing.[18] Some of the problems which might arise in co-management are (a) the fact that Botswana allows citizen hunting of elephants at reduced charges; (b) the present Botswana elephant quota is not distributed among areas in proportion to elephant population numbers (DG 2004, page 13); and (c) the uncertainty that exists about the relationship between trophy quality and quota setting.

(9) Problem animal control

With the escalating conflicts between humans and elephants in both countries, there are sound reasons to share experiences gained from PAC, including successful deterrents which do not involve killing elephants.

---

[17]The issue may not be as simple as this. Namibia's co-management institutions would be based upon a far-reaching devolutionary policy. Co-management extending to neighbouring countries would need to be underpinned by the same principles for it to be entirely successful. The Utopian situation would be achieved when the TFCA was being managed jointly by local communities and their governments through a cascading structure of genuine co-management institutions.

[18]At the Kasane Workshop, the opportunity to develop such an institution involving Salambala Conservancy in Namibia and the Chobe Enclave community in Botswana was identified. These communities are directly opposite one another on the Chobe River and are almost certainly hunting from the same populations.

(10) Population reductions and/or sustainable harvesting of elephants

Although it was decided in 1991 to limit the Botswana elephant population to 60,000 animals, no population reductions took place (DG 2004, page 4) with the result that the population is now in the vicinity of 150,000 animals. Most rural communities in northern Botswana feel that there are too many elephants and that the number should be reduced (DG 2004, page 10). However, the practicalities are daunting: it would require the removal of some 5,000 animals annually simply to prevent further increase.

From the perspective of those Botswana stakeholders who seek to reduce human/elephant conflict and prevent further habitat modification, Namibia's removal of a substantial number of elephants in the Caprivi Region would be unlikely to achieve the desired objective. More likely would be a reduction in elephant dispersal and migrations through Caprivi causing increased pressure on habitats in Botswana. There are obvious grounds for collaboration.

Were Botswana to pursue a policy of consumptive utilization of elephants, the sustainable off-takes would be very high. DG (2004, page 12) estimate that the removal of 5,000 animals annually would yield about 20 tonnes of ivory, 4,000 tonnes of meat (wet weight) and 325 tonnes of dried salted hide. The constraints imposed by CITES reduce the value of this resource and lead logically to another area where collaboration would be beneficial.

(11) CITES constraints on trade in elephant products

At the time elephants were listed on Appendix I of CITES in 1989, a strong institution[19] was formed within the southern African region to contest the listing. At the Meeting of the Conference of the Parties in Kyoto in 1992, this alliance was able to introduce several resolutions which significantly affected the Treaty.[20] This institution was fundamentally altered in 1996 and, since then, has faded into obscurity. If the southern African countries still hold the fundamental viewpoint that all wildlife products should have value, there are strong grounds for resuscitating the alliance between states to perform more effectively in the CITES forum.

IMPLEMENTATION PROCESS & UPDATE PROCEDURES

Timing and Duration of Plan

Implementation of this plan should commence as soon as possible because of the rapidly changing situation of elephants in Namibia and the southern African region.

From the outset, an adaptive management monitoring programme should underpin the implementation of the Plan and test the underlying hypotheses regarding the response of elephant populations and habitats to various management interventions. The objectives, hypotheses and management activities in the plan should be modified as needed to take

[19]SACIM – the Southern African Centre for Ivory Marketing, which included Botswana, Malawi, Namibia and Zimbabwe and which maintained liaison with Mozambique and South Africa.

[20]Among these resolutions was one that recognised that trade could be beneficial for wild species and another that altered the criteria for listing species on CITES Appendices.

into account externalities which may arise (and almost certainly will arise) during implementation.

The first draft of this Species Management Plan was completed in April 2005 and was reviewed during April-May 2005. Following comments and decisions from the Directorate of Parks and Wildlife Management and the Directorate of Scientific Services in the MET, a second draft was submitted to the Ministry by June 2005. Subject to any further revisions which might arise from inter-ministerial discussions or transboundary liaison with Botswana, a Final Plan should be ready for adoption before the end of 2007.

This should be followed by meetings between the MET and primary stakeholders to discuss implementation. Central to the plan are the devolutionary aspects and the establishment of co-management institutions. Notwithstanding any modifications made as and when necessary during implementation, there should be a mandatory review of the plan every two years – preferably synchronized with the results from elephant population surveys. If any changes are needed in the plan, the document should be modified, updated and re-approved.

Appendix 1: Income from Elephant Management

The potential income from sustainable use of an elephant population management has been analyzed using the population model of Martin (2000). The management regime entails culling to prevent population increase combined with trophy hunting of males. Assumptions and formulae used in the model are as follows –

(1) The management treatment is applied to a population of 1,000 animals in an area of 1,000 km^2 (i.e. at a density of $1/km^2$). In the absence of any management this population would increase at a rate of 4.56% per annum. The percentage of the population to be culled is selected so that the population does not increase.

(2) Culling entails the off-take of complete elephant herds and includes males up to the age of 10 years. The probability of a male older than 10 years being present in a herd is set as: –

$$P_a = e^{-0.015\,(Age - 10)}$$

(3) An off-take of 3% of the population is sufficient to stabilize numbers. This percentage may seem low when taken from a population which, in the absence of culling, increases at 4.6% per annum. The explanation lies entirely in the preponderance of females in the off-take.

(4) It is assumed that 75% of all elephant calves between the ages of 2 to 8 years will be captured rather than killed. These would be sold to zoos and to approved local and regional buyers wishing to domesticate elephant or begin new wild populations.

(5) The change in the age structure of the population caused by culling allows a greater percentage quota for trophy hunting of males. A quota of 1% of the population is sustainable.

(6) To calculate the values of ivory, skin and meat obtained from the culling operation, the following formulae were used for males and females of specific ages: –

Ivory Weight of two tusks: –

$$I_{Age} = 1.88\,(0.1 + 0.2\,(Age - 2.5)^{1.2937})\ \text{kg}$$

$$I_{Age} = 1.88\,(0.1 + 11\,(1 - e^{-0.016\,(Age - 2.5)^{1.2742}}))\ \text{kg}$$

The multiplier for two tusks (*1.88*) is from Rodgers (*et al* 1978) and the formulae for the weight of one male and one female tusk are based on Pilgrim & Western (1986).

$$Price/kg = US\$\,(50 + 110 \cdot I_{Age}^{0.5})$$

Body weights

$$W_{Age} = 5{,}200\,(1 - e^{0.006\,(Age + 1.5)^{1.7}})\ \text{kg}$$

$$W_{Age} = 3{,}500\,(1 - e^{0.00892\,(Age + 1.5)^{1.7}})\ \text{kg}$$

Dressing out percentage = ***33%*** (wet weight); Price/kg wet meat = ***US$1.00***

Skin weight (dry, both sexes)

$$S_{Age} = 0.373\,W_{Age}^{0.67}$$ Price/kg dry skin = ***US$5***

The table on the next page gives the results of the management programme averaged over 100 years. It is assumed that markets for all products are operating normally.

FINANCIAL VALUE OF ELEPHANT MANAGEMENT PROGRAMME

Assumed values *(all figures in US$)*

Area	1,000	km^2	Exchange rate 1US$ = N$	6.2	
Elephant population	1,000	animals			

SPORT HUNTING

Trophy male quota	1.0	% of total population per year=	10	animals
Trophy fee US$	10,000	charged by operator		
Daily rate US$	1,000	charged by operator		
Minimum hunt days	14	Client charged for 14 days if elephant bull included in hunt		
Operating costs US$	200	per day (Safari operator's costs)		
Operator' rental	25	% of gross income (paid to landholder – MET or community)		
Weight of skin	100	kg dry skin/animal (assumes hunter takes 20% of skin)		
Body weight (adult male)	5,000	kg		

POPULATION REDUCTION

Culling quota	3.0	% of total population per year=	30	animals
Culling cost US$	300	per animal		
Calf capture US$	300	per animal (2-8 years old)		
Selling price for calves US$	1,000	per animal		
Capture success	75	% of animals 2-8 years old		
Price of skin US$	5	per kg (assumes markets operating)		
Dressing out percentage	33	% of body weight		

Meat value US$	1	per kg (wet weight)

Age-specific tusk weights, ivory prices, body weights and skin weights as per formulae on previous page

Conservation Force v.5/8/18
Operator Enhancement Questionnaire

1. Name of area operator: Peter Thormahlen

   a. Years in business: 20

   b. Name of company conducting hunt: Thormahlen & Cochran Safaris

   2. Name of concession: **Mahango NP** **Size in km²: 30,000 ha**

   a. Land tenure: __ Government lease X__ Community _ Private ranch __ Private conservancy

   b. Length of concession agreement: 4 years Can it be renewed? __ Yes _X_ No

   c. Length of renewal, if applicable: Auction every 4-5 Years

   d. Estimated total amount received in trophy fees last year, if applicable: $400,000

   e. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: Government Concession – none of the above required

   f. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Nearest town is Divundu. Map, attachment 1,

   g. If the concession borders a national park, please provide the park name: _____Concession is Mahango National Park_____

h. Description of general and distinctive habitat features and any water features: Biotype is made up of Kanago River, Riverine Area, as well as Miombo Forest area

3. Are there any communities living in the concession? Yes _X_ No

   a. If so, estimated number of people or villages in the concession?

4. Are there communities bordering this concession? X_ Yes __ No

   a. If so, estimated number of people or villages around the concession? Divundu Town Area, Kavango Tribe

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	**abundance**	1,000-1,500	stable	MET Game Count Surveys
Lion	average	20	stable	MET Game Count Surveys
Leopard	abundance	100	upwards	MET Game Count Surveys

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Hippo	abundance	500	upwards	MET Game Count Surveys
Crocodile	abundance	1,500	upwards	MET Game Count Surveys
Roan Antelope	abundance	400	upwards	MET Game Count Surveys
Kudu	abundance	1,000	upwards	MET Game Count Surveys
Sable Antelope	abundance	400	upwards	MET Game Count Surveys
Prey species	Abundance: zebra, giraffe, baboon, Steenbuck, grey duiker, impala, reedbuck	7000+	upwards	MET Game Count Surveys

Wildlife monitoring in the Park is done by Ministry of Environment & Tourism (MEFT)

6. Total employment number: __5_____

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	4	2
Trackers	4	3
Anti-poaching scouts/rangers	0	
Other anti-poaching	Namibia Game Department - MET	
Cooks/housekeepers	2	2
Community coordinators		
Managers	1	1
Biologists		
Others: _____	2	2

7. Number of staff employed in the off-season: 13 - anti-poaching excluded.

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	0		
Managers	2	1	2014-2017
Maintenance	2	2	2014-2017
Road opening/construction			

Community relations personnel			
Others: _____			

8. Anti-poaching efforts:[2]

   a. Number of anti-poaching staff: National Park -MET is doing Anti-Poaching

   b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? both

   c. Months during which anti-poaching patrols are conducted: every month

   d. Number of anti-poaching patrols per month: Anti-poaching is done 24/7 in the National Park by Park Officials

   e. Description of anti-poaching equipment, vehicles, etc.: Patrol 4x4 cars and on foot.

   f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? Namibian Government - MET

   g. Do you offer rewards to poaching informants leading to arrest? __ Yes _X_ No

   h. Do you offer rewards to poaching informants upon conviction? Yes _X_ No

   i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? The anti-poaching campaign done by Parks personnell

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts				
Equipment				
Vehicles				
Petrol				
Rewards paid				
Other: _____				
Other: _____				
TOTALS				

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered				
Elephant carcasses observed				
Lion carcasses observed				
Leopard carcasses observed				
Ivory poachers arrested				

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Meat poachers arrested				
Other poachers arrested				
Poachers convicted				
Snares/gin traps collected				
Firearms confiscated				
Vehicles confiscated				
Bicycles confiscated				
Boats/nets confiscated				
Tusks recovered				
Other: _____				

The Game Department does not share information. Poaching is a sensitive issue and therefore no information in this regard is available to us to complete the above table. However, because of all the anti-poaching programs run in the area, poaching of antelope is zero, or so little that we don't know of any incidents.

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? _X_ Yes _ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)? __voluntary and donated by our overseas clients – mostly USA citizens who donates school stationary to schools in the area.

c. Does the company provide game meat to nearby communities? x_ Yes __ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: All the game meat hunted by us and as per the allocated quotas of the Minister of Environment and Tourism, go to the local community

Yearly the following Game is harvested:
Elephant x 2 @ 4,500 kg per carcass @N$22 / kg = N$198,000
Hippo x 4 @ 1,500 kg per carcass @N$22 / kg = N$132,000
Buffalo x 4 @ 800 kg per carcass @N$22 / kg = N$70,400
Kudu x 2 @ 120 kg carcass @N$22 / kg = N$5,280
Giraffe x 1 @ 750 kg carcass @N$22 / kg =N$16,500
Sable x 2 @ 150 kg carcass @N$22 / kg =N$6,600
Roan x 2 @ 150 kg carcass @N$22 / kg =N$6,600
Impala x 4 @ 50 kg carcass @ N$22 / kg = N$2,640

TOTAL = N$438,020.00

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.

National Park -Park Officials on duty

f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in?

There is a Government Fund that refunds the community for damages.

Species	Damage caused	Consolation paid 2016	Consolation paid 2017	Consolation paid 2018
Elephant				
Lion				
Leopard				
Other				

g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? _____US$_____

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)	$1,750	$3,500	$4,000	20 blue bags @ $200 per bag = $4000, or N$55000. Clients donate $200, we will up the bag to the total of $200 with the necessary school or educational supplies, identified by the local schools.0-
Education (e.g., school fees, supplies)				
Health (e.g., clinics, offices)				
Health (e.g., medical salaries, equipment)				
Community scout salaries				
Other community anti-poaching				
Local government activities				
Water infrastructure improvements				
Sports teams funded	$500	$500	$500	

Construction materials donated				
Other: _____				
Other: _____				
TOTALS	$2,250	$4,000	$4,500	

11. How many U.S. clients did the company have in the past three years, what percentage of the company's clients were from the U.S., and what fees did they pay?

Please note: we operate in South Africa and Namibia, and the figures below, is for the whole operation

	Hunting elephant	Hunting lion	Hunting leopard	Hunting all species
Number of U.S. clients	2015: 4 2016: 9 2017: 5	2015: 2016: 2017:	2015: 2 2016: 9 2017: 9	2015: 126 2016: 110 2017: 141
Percentage of U.S. clients	2015: 99 2016: 98 2017: 100	2015: 2016: 2017:	2015: 100 2016: 98 2017: 99	2015: 95 2016: 96 2017: 97
Trophy fees paid by U.S. clients	2015: 220000 2016: 495000 2017: 275000	2015: 2016: 2017:	2015: 42000 2016: 225000 2017: 256000	2015: 303 715 2016: 1075 000 2017: 997 375

12. Approximate dollar amount and/or percentage of the company's revenue from U.S. clients: _95%

13. Other information: Please provide a narrative of other enhancement information about the operation, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes, restocking), management activities, research, etc.

Thormahlen & Cochran operates on other conservancies in Namibia, namely:
Na#Jaqna
Ondjou
Kabulabula
We built camps in Na Jaqna, Ondjou, and Kabulabula. Thormahlen & Cochran donate all the camps to the Conservancies. We deliver all the meat that we hunt, to the conservancies, and donate to every local school the blue bags. We are building roads, and are responsible for the water and electricity supply for the camps. We employ the local community as staff and currently employ 5 to 6 conservancy members as staff . We are also responsible for the training of the staff to be able to serve the overseas clients. To date we have 32 community members employed in the various camps. We also have social responsibilities towards the conservancies: we built a school hostel, a community hall, drilling of waterholes, making cutlines, building roads etc. We are buying protective clothing to the game guards and uniforms for the personnel on an annual basis and opened another drilling hole for N$460,000.

14. I declare that the foregoing is true and correct.

RE: PRT # 98648C, Applicant Bobby Lynch, elephant Namibia
Supplement to Existing Application

Ms. Brisendine:

This is a supplement to the existing application, PRT #98648C, for Bobby Lynch for his elephant trophy from Namibia

Answers to Question 9 of the import permit application:

9a. Do you have any information regarding the population status or trend data on the species hunted?

Please reference the National Elephant Management Plan for Namibia that we have included.

9b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Trophy fees for this hunt were around $80,000. The hunt area is part of a Community Concession in a National Park, the operator works with MET and the government for all conservation efforts and community efforts on the land. Trophy hunting brings in income to pay for game guards and anti-poaching activities and meat harvesting and distribution provides a valuable dietary supplement to the community members.

9c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Please reference the attached Operator Enhancement Report for Mahango National Park

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

Re: Application for Permits to Import Sport-Hunted Trophies

Dear Chief Cogliano:

Enclosed please find three import permit applications. The first is for a permit to import a sport-hunted elephant trophy from the Mahango Game Park concession in Namibia. The Mahango area is part of the Zambezi Region of Namibia, and holds the country's largest elephant population, which is increasing. (See enclosed AfESG Status Report.) This operator, Thormahlen & Cochran, has been in business almost two decades and has carefully stewarded this concession. We will be submitted a report from this operator by separate cover. Please consider this information, as well as information in the DMA's files and submitted by Conservation Force and Namibia's Ministry of Environment and Tourism, in making a positive enhancement finding for this applicant.

The second applicant, who has two separate application forms, is hunting lion, elephant, and leopard on Sango Ranch in the Save Valley Conservancy in Zimbabwe. Conservation Force and Zimbabwe's Parks and Wildlife Management Authority have submitted extensive documentation about the healthy elephant and lion population in SVC and the benefits generated by regulated hunting. Please refer to that information, including the October 2016 Non-Detriment Finding and January 2016 report, describing the SVC's strong wildlife management. Please also see the attached declaration from Wilfried Pabst. This declaration was not ultimately submitted in court, but it remains a sworn statement that reflects the healthy wildlife populations in SVC. Please consider all this information in making positive enhancement findings and non-detriment findings for this applicant.

Please do not hesitate to contact us if you have questions about these applications or need further information.

Sincerely,

Regina Lennox

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Noble	Samuel	Edward	JR

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Scottsboro	Alabama	35769	Jackson	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the ertify that the information submitted in this application for a permit is complete and se statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6)

6/13/2018

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Samuel Noble, JR
(b) (6) [redacted]
Scottsboro, AL 35769

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

(1) Loxodonta Africana Elephant
(1) Panthera leo Melanochaita Lion

b. Sex (if known). male + male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Sango Ranch, Save Valley Zimbabwe - Masvingo

b. Date wildlife is to be hunted:

June 22 - July 11 2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Zambezi hunters

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Winston Taylor
Business Name: Zambezi Hunters
Address: P.O Box BW 1330 Borrowdale
City: Harare
State/Province: Zimbabwe
Country, Postal Code:
– Tel: 263.4.882223

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two l

Applicant's signatu (b) (6) _____ Date: 6/13/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

African Elephant Status Report 2016

An update from the African Elephant Database

C.R. Thouless, H.T. Dublin, J.J. Blanc, D.P. Skinner, T.E. Daniel, R.D. Taylor, F. Maisels, H. L. Frederick and P. Bouché

Occasional Paper of the IUCN Species Survival Commission No. 60

SSC Species Survival Commission

AFRICAN ELEPHANT SPECIALIST GROUP

Zimbabwe's annual declared export quota of elephant trophies remains unchanged since 2007 at 1,000 (tusks as hunting trophies from 500 animals) (CITES, n.d.-b). In 2015, the US Fish and Wildlife Service removed its 'non-detriment' finding, thus banning the import of elephant trophies into the USA (USFWS, 2015a).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Zimbabwe is 82,630 ± 8,589 at the time of the last survey for each area. There may be an additional 1,635 to 1,805 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 78,839 km², which is 97% of the estimated known and possible elephant range. There remains an additional 3% of the estimated range for which no elephant population estimates are available.

There has been a decline of just over 10,000 elephants from surveyed populations since the AESR 2007 and an increase of about 1,000 in guesses, mostly from previously unsurveyed areas in North West Matabeleland. Although there have been large losses from the Sebungwe and Lower Zambezi populations, these have been partially compensated by increases in Gonarezhou and North West Matabeland.

The major populations of the Lower Zambezi Valley (including Mana Pools National Park), Sebungwe (including Matusadona and Chizarira National Parks), North-west Matabeleland (including Hwange and Zambezi National Parks) and the south-east Lowveld (including Gonarezhou NP) were surveyed in 2014 using **aerial sample counts** (including block counts in hilly areas) as part of the Great Elephant Census.

The estimate from the Lower Zambezi Valley in 2014 was 11,656 ± 2,259 (Dunham et al., 2015c). The previous comparable estimate was 19,297 ± 2,527 in 2001 (Mackie, 2002). The 2014 figure replaces an estimate from the AESR 2007 of 19,981 ± 2,392 from 2003 (Dunham, 2004). This survey was less comparable than the 2001 one because it covered a slightly smaller area. There was an approximately 40% decline in the 13 years between 2001 and 2014. The observed carcass ratio of 6% is not as high as one would expect given the rate of population reduction and might suggest that the level of poaching has reduced in recent years. The corridor between the Mavuradonha Wilderness Area and the rest of the Zambezi Valley range has been changed to **possible range** (Packenham quoting Varden, pers. comm., 2016).

The 2014 estimate for Sebungwe was 3,407 ± 1,215 (Dunham et al., 2015b) which replaces an estimate of 15,024 ± 2,133 from a 2006 survey (Dunham et al., 2006a). The observed carcass ratio of 30% indicates an unsustainably high offtake of elephants. There were almost no elephants left in the communal areas, with the main surviving sub-populations in Matusadona and Chizarira National Parks and the Chirisa Safari Area. Wildlife scouts reported 70-100 elephants in Kavira Forest Land at the western end of Sebungwe (M. Sebele pers. comm. in Dunham et al., 2015b).

The 2014 estimate for North-west Matabeleland was 53,991 ± 7,711 (Dunham et al., 2015a), which replaces an estimate of 49,310 ± 7,051 from 2001 (Dunham & Mackie, 2002). There was no significant difference between the totals although the increased carcass ratio of 7% from 3% in 2001 is a worrying sign. Other aerial sample counts were carried out in 2006 and 2007 but they were not

NUMBERS AND DISTRIBUTION
CONT.

Some 20 bull elephants were photographed, and there was a further unverified report of 40 elephants, near Mangwe Dam in the vicinity of Home Farm and Greystone Ranches, across the border from Francistown in Botswana (Robertson and Winch, pers. comm. in Dunham, 2015) replacing a guess of three from 2002 (Dunham & Mackie, 2002). A helicopter total count enumerated 174 elephants on Shangani Ranch near Bulawayo (Edwards, pers. comm. in Dunham, 2015) and this replaces a guess of 60 from 2001 (Dunham & Mackie, 2002).

There was a **total aerial count** of 212 elephants in 2014 in the Zimbabwe section of the Mapungubwe Transfrontier Conservation Area which includes Tuli Safari Area, Sentinel, Nottingham and River Ranches (Selier & Page, 2015). This replaces an estimate of 82 from 2001 (Dunham & Mackie, 2002).

There were **informed guesses** in 2014 of 500-600 in Bubye Valley (Leathem & English pers. comm. in Dunham, 2015), and 100 on Bubiana Conservancy (Drummond pers. comm. in Dunham, 2015) in the south of Zimbabwe, replacing guesses of 53 and 50 respectively (Dunham & Mackie, 2002). An old estimate of ten elephants in the Mambali Communal Lands on the Botswana border has been retained from the AESR 2007 (Dunham & Mackie, 2002). A report of 54 elephants on Nuanetsi Ranch is recorded as a **new population**.

RE: PRT No. MA98649C/ MA09644C / MA09883C
African Elephant Trophy/ Zimbabwe/ Sam Noble Jr.

Dear Chief Cogliano:

Please be advised that we would like to that for the following PRT numbers, we would like to add the following information as supplement to our existing application:

PRT No. MA98649C (July 2018, Sango, Savé Valley)
MA09644C (2016, Sango, Savé Valley)
MA09883C (2016, Masvingo) closed

For Question 8 on the application, name of oversees person/ business shipping the trophy, we would like to change this from, Zambezi Hunters to TCI. Please see the complete address below. This is also where the trophy is being stored.

The current location of the Trophy: Trophy Consultants International, 4 Josiah Chinamano Road, Belmont, Bulawayo, Zimbabwe.

Please also can you confirm for the applications for 2016, PRT No. MA09644C is for the elephant harvested in Savé Valley and PRT No. MA09883C is for the elephant harvested in Masvingo. If this is reversed, can you please let us know via email at permits@conservationforce.org.

Please do not hesitate to contact us if you have questions about these permit applications.

Sincerely,

John J. Jackson III

Ms. Brisendine:

The document attached is to be included as supplement to all original import permit applications filed with the U.S. Fish and Wildlife Service listed above.

Since filing these applications we have received additional documentation of conservation efforts for elephants in Zimbabwe that further detail the elephant populations as stable and growing. The CAMPFIRE document strongly argues the importance of trophy imports and the

value that they provide to communities in Zimbabwe through income flows from tourism and hunting which serve to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat.

The Campfire document details the drastic effects that COVID-19 has had and is having on Zimbabwe's tourism and hunting market, which is in a state of collapse. It is leaving the country uncertain of how wild-life and anti-poaching programs will be supported on the ground in the coming months. This information can be used to predict what might transpire if trophy hunting and imports were to cease to exist and the tragic outcome it could have on the conservation efforts of wildlife in the area.

We ask that you please consider these documents when making your decision on enhancement in each import permit application.

Please feel free to contact me if you have any questions regarding this mater.

Cordially,

Aimee Korver
Permits Paralegal

1. CAMPFIRE communities Concern on Import Bans

Open Letter to the United States Fish and Wildlife Service

Dear Dr Mary Cogliano

CAMPFIRE Communities Concern on Import Bans

CA/MPFIRE Association, otherwise known as the Community Areas Management Program for Indigenous Resources in Zimbabwe wishes to register its opposition to continuing campigns for the banning of trophy imports. We are fully aware that the general outrage in both print and social media against sport hunting, which many distant voices refer to as unethical, is aimed at influencing policy action by importing countires.. These arguments, none of which are supported by science, are based on a perfected art of global misinformation and do not represent the views of rural communities who live side by side with wildlife. To us as a people with substantial wildlife populations, trophy hunting is indispensable for conservation and rural livelihoods.

Zimbabwe has one of the most resilient and successful conservation programs in Africa. Its conservation efforts have historically enabled local communities to thrive on sustainable livelihoods in biodiversity-rich landscapes. At least 800 000 households or 2.5 million people (out of a national population of 16 million) benefit directly and indirectly from the sustainable use of wildlife and tourism related investments in their areas. However, our ever growing elephant population has increased the levels of conflict between humans and wildlife in recent years, which, together with recurrent droughts that threaten food security, have made traditional livelihoods more difficult, especially for subsistence farming communities that live in the wildlife rich areas of the country.

Communities in CAMPFIRE areas reside in an environment where conflict between humans and wildlife is common, as both compete for the limited available land and water resources. But this comes at a high price: people in Zimbabwe are paying with their lives for tolerating wild animals in their areas. As recently as 23rd March 2020, Barnabas Mwinga, a 50 year old man, was killed by an elephant in his field in front of his wife and young daughter in Gonono Ward, Mbire District. He is one of seven other people that have needlessly lost their lives to wildlife attacks throughout the country since the beginning of 2020, in addition to the 41 killed in 2019. Yet despite this high cost, wildlife is still highly valued by rural communities who continue to tolerate massive crop destruction and livestock losses from wildlife without compensation. For example, elephant poaching in Mbire District where Barnabas Mwinga was recently killed has gone down from a peak of 40 in 2010 to only 3 elephants poached in 2019 (Figure 1). The decline in poaching incidents is a result of collaborative efforts between the Safari Operator and the hunting clients who invest nearly $100,000 annually into an anti-poaching unit.

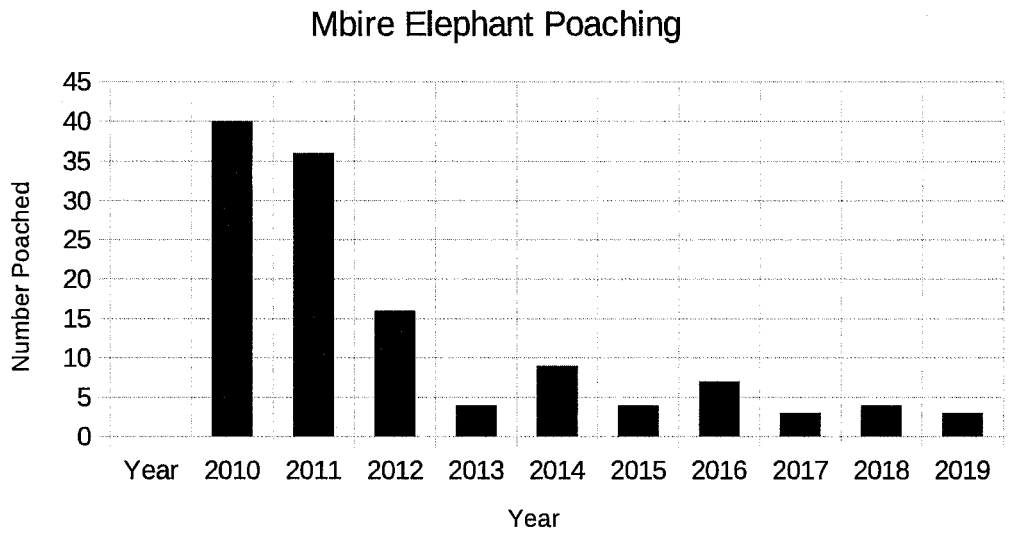

Figure 1: Mbire Elephant Poaching Trends (Source – Mbire Rural District Council)

The aim of the CAMPFIRE programme is to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat. For nearly 30 years, trophy hunting, which relies heavily on the American market, has been cautiously implemented in the absence of other tourism opportunities to achieve this goal. Not only has it resulted in increasing food and livelihood security of rural people, it has also played a role in undermining the drivers of poaching and mitigating human and wildlife conflict. The net impact is seen in securing wildlife habitat and assisting in the regeneration of degraded landscapes.

The financial resources to succeed with this programme in CAMPFIRE areas are heavily dependent on the sustainable hunting of big game, especially elephants. The monies generated from these activities finance the local economies, social services as well as anti-poaching efforts and wildlife management at the District and Ward levels. For example, as can be seen from Table 1 below, the total number of elephants hunted as trophies over nine years is 807 out of a cumulative quota of 1381, from an estimated national population of 83,000 elephants. Hunting quotas are set at no more than 0.5% of the population estimate compared to an elephant population growth of 5% to 6% annually. The levels of off-take (58%) also demonstrate that while hunting is based on controlled numbers for each species annually, it is not uncommon for a client to pay for a full hunt and enjoy the wild experience, but not take a trophy. It is also important to note that communities do not view international hunting clients just as tourists, but as vital conservation partners.

Table 1: Trophy Hunting Quota Summary and Income: 2010-2018

All Districts:	**Elephant**	**Lion**	**Leopard**	**Buffalo**	**Hippo**	**Crocodile**	**Total**

Source: *The Role of Trophy Hunting of Elephant in Support of the Zimbabwe CAMPFIRE Program: Vernon Booth* (in progress).

District and Ward-level institutions in the CAMPFIRE areas rely on income from hunting to provide significant local livelihood benefits (income, jobs, skills) and social services (schools, clinics, irrigation schemes, boreholes) in remote regions where agriculture is marginal and there are very few jobs or other sources of cash income. Table 2 and Table 3 below summarise the impact of pre- and post-elephant trophy import suspension expenditure on the CAMPFIRE programme at the District and Ward level. The District administration costs absorb 89% of the budget with 30% devoted to law enforcement. With the suspension of elephant trophy imports to the USA and Europe in 2016, expenditure on law enforcement dropped from 33% to 9% as a result of District administration having to offset the human and wildlife costs which increased from 1% to 33%. At the Ward level, 46% of the budget is allocated to administration and 54% to community benefits (45% devoted to social services, Table 3).

Table 2: District level expenditure on administration and community benefits: 2010-2018

	Administration			**Community Benefits**			
All District Expenditure	**Administration**	**Law Enforcement**	**Management**	**Assistance to Wildlife Victims**	**Social Services**	**Total**	**Average/ year**

With growing awareness from several years of CAMPFIRE implementation, communities have been demanding their rightful place in the management of wildlife resources for their own benefit. To accommodate this, CAMPFIRE has undergone a review of its policy framework to enable communities to reap greater and more tangible benefits from living in harmony with nature. A key aspect of this review is to establish Community Conservancies that redefine ways in which communities can benefit more from wildlife and other income generation opportunities, as well as the mitigation of human and wildlife conflict. This initiative is being directed under the Global Environment Facility (GEF) 5 and 6 cycles covering five districts with the aim of developing innovative ways to improve the management of wildlife for the benefit or rural people. If trophy hunting and trade here was stopped, the impact on local livelihood would be severe, and both poaching and changes to alternative land use would increase. Non-consumptive tourism currently plays virtually no positive conservation role in the CAMPFIRE areas (<4% of overall income is generated through tourism). Instead of banning the import of trophies, more international oversight and support is needed from importing states, and of in-country CITES controls, to ensure sound sustainable management e.g. quota-setting, permit allocation, independent population surveys; building robust, equitable and transparent benefit allocation mechanisms at local level, particularly where communities have elected to invest their land and time in Community Conservancies.

STOP PRESS: The pressure for imports bans comes at the worst possible time as the Covid-19 pandemic has severely disrupted income flows from tourism and hunting. The collapse of both markets leaves rural people and safari operators with virtually no income, and it is uncertain how wildlife protection and anti-poaching programs will be supported on the ground in the coming months. What remains clear is that trophy import bans will seriously undermine conservation in Zimbabwe, and indeed open floodgates for rural people to destroy wildlife and wildlife habitat through conversion of land for other subsistence uses, even if unviable.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Bock	Brian	K	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6) [redacted]			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Black Hawk	South Dakota	57718	Meade	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee–attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6) [redacted] 06/24/2018

Signature of applicant or officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Brian Bock
(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

African Bush Elephant L. Africana Loxodonta

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Country-Zimbabwe Management Area-Sijarira Forest City-Bulawayo

b. Date wildlife was hunted:

October 15, 2014

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Outfitter- Jimba Safaris
PH- Tim Lamprecht
PH Number- 192

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Matabeland Taxidermist
16 Birmingham Road
Belmont Bulawayo Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Sijarira hunting permit # 209 Trass-2074858

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Metabeland Taxidermist
Business Name:	16 Birmingham Road
Address:	Belmont Bulawayo Zimbabwe
City:	
State/Province:	This is the company that is handling/holding my trophy but until permit is issued the name of the shipper is unknown.
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Not as of yet.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Funds paid to hunt went to pay Salaries, Anti-pouching, Camp supplies and employee uniforms

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Yes the operator confirms funds spent benefitted the are by providing jobs and a much needed food source for the locals.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

    Applicant's signatu(b) (6) Date: 06/24/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C; see instructions for details. **Instructions on how to make your application complete and help avoid unnecessary delays are attached.**

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Kunz	Thomas	James	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number
(b) (6) [redacted]	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (DBA)
2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Cascade	WI	53011	Sheboygan	USA

2.a. Mailing address (include if different than physical address, include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001

OMB Control No. 1018-0093
Expires 08/31/2020

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting, please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Thomas Kunz (b) (6) [redacted]

OMB Control No. 1018-0093
Expires 08/31/2020

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed, been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name:

Elephant

b. Sex (if known): Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Zimbabwe Railway 35 in Hwange District Mat North Province s18*49.369 e027*07030 Sep 23 2015

b. Date wildlife was hunted:

September 23 2015

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Wayne Van Den Bergh PH License 369 Nyamazana Safaris

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Trophy consultants International 4 Josiah Chinamano Road Belmont Bulawayo Zimbabwe Contact Paula

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: PAULA
Business Name: TROPHY CONSULTANTS INTERNATIONAL
Address: 4 JOSIAH CHINAMANO ROAD
City: BELMONT, BULAWAYO
State/Province:
Country, Postal Code: ZIMBABWE

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Yes I did meet with the game warden in Hwange park He told me the problem is poaching not hunting

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Trophy Fees 10,000.00 parks and wildlife Management Authority and land owner

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Has multiple water holes on farm 35 four the wildlife Burns the grass to bring in lush new green grass

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

(b) (6) as on Page 1

(b) (6) Clackamas OR 97015

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Jeff Owens (b) (6)

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   Loxodonta africana Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   South Africa

   b. Date wildlife is to be hunted:
   Starting June 2, 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   Quagga Safaris

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   South Africa, Limpopo Province, Maseke Game Reserve / Balule (Arctic 156kt, Square 150kt Morelag SKV, TR4 155KTT Parsons 155kt, Mopani Di Marueng, Limpopo

   b. Date wildlife was hunted:
   June 1 to June 10 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

MR. SOREN Burkal Nielsen + Quagga Safari's

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Trophy Solutions Africa
11 Sixth Ave
Polokwane 0699 South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Enclosed

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: Trophy Solutions Africa
Address: 11 Sixth Ave
City: Polokwane 0699
State/Province:
Country, Postal Code: South Africa

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

8 permitts are issued in 2018 in this Conservatory Next to Kruger National Park fences where removed a few years due to Overpopulation in the Park

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

The Trophy fee + license fee was $57.000 This is critical to Conservation, Anti poaching in the area the 8 permits will total more Dollars for the Park than the tourist will Bring collectively. Esential for Conservation!

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

All of the meat was taken (I witnessed) it is donated to the local Orphanages as well as the Hospital. A total of Approx 2500 lbs. to the local Village

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

    Applicant's signature: (b) (6) Date: 7/14/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Ashbrook	Howard	J	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Claysville	PA	15323	Washington	United States

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)
(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Claysville	PA	15323	Washington	United States

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of **$100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions (50 CFR 13.11(d)).

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other applicable parts in subchapter B of Chapter I of Title 50 and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Howard J. Ashbrook
(b) (6)
Claysville, PA 15323

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Howard J. Ashbrook
(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

[LOXODONTA AFRICANA] ELEPHANT

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

District- VHEMBE, Province - LIMPOPO, Game Farm - SINGELELE NATURE RESERVE, MUSINA 0900 LIMPOPO, South Africa (ZA)

b. Date wildlife was hunted:

May 15, 2017 to May 20, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Petrus C. Jansen, 1 East Crescent, Musina 0900, Limpopo Province, South Africa

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Moredou Taxidermy, P.O. Box 323, North West Province, Farm Moredou Schweizer-Reneke 2780 South Africa (ZA)

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). [see attached]

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Hilgard Pieter Kotze
Business Name:	Farm Moredou
Address:	P.O. Box 323
City:	Schweizer-Reneke 2780
State/Province:	North West Province
Country, Postal Code:	South Africa (ZA)

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

N/A

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

$18,500 [all inclusive cost for hunt of elephant]

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

N/A

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ Date: Jul, 19 2018
07/19/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

CONDITIONS FOR PERMIT NO. 209281

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports Exports and Re Exports of CITES and Non-CITES species and any products thereof, live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport

Import permits are not valid unless the imported consignment is accompanied by a valid ***(original)*** export permit from the country/ province of origin ***(if required)***, which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

THIS PERMIT:

1. a) Shall not be transferable;
   b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
   c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animal's leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import.
   d) Shall be subject to the provisions of any other law and or regulation;
   e) Shall be valid for one consignment only,
   f) This permit is subject to the compliance of Veterinary and Agricultural requirements and to the compliance of IATA Live Animal Regulations.

2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone ***and*** confirm per fax a minimum of ***48 hours*** prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
   a) Name / Company Name of Importer / Exporter;
   b) Name of Airline and Warehouse where intended inspection will take place;
   c) Date and Time of Import / Export / Re-Export;
   d) Date and Time of intended inspection (subject to approval)
   e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number,
   f) The applicable permit number/s and relevant expiry dates; and
   g) Detailed packing list as per condition 7.

3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours ***(07:00 – 15:30)***:
   Office: +27 (11) 390-3687/ 2311
   Fax: +27 (11) 390-1720

4. All relevant documentation, including ***original*** permit/s ***(CITES permits must include original and coloured copy)***, Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing lists must accompany the consignment/s.

5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.

6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
   a) Details of Importer and Exporter (Names, addresses and contact numbers);
   b) Waybill number/s and name of carrier, flight number, date and time;
   c) Transport container number/s;
   d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof,
   e) Common name of species (in full),
   f) Number per species per container (actual number exported / imported); and
   g) Applicable permit number/s

7. If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country/ province within ***14 working days*** after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement,*** for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

9. Only A person authorized thereto by the Premier or Minister may make any alteration on the permit.

10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.

12. Permit holder/s or their delegated agent/s must inform the Environmental Management Inspector official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

1 (one)	Impala	*Aepyceros Melampus*	Skull/horns bleach and flat skin tanned
1 (one)	Sable	*Hippotragus Niger*	Shoulder mount and back skin tanned
1 (one)	Nyala	*Tragelaphus Angassii*	Shoulder mount and 2x feet (2x Hatracks)

* - Also refer to attached Packing List

Nature of packaging: **WOODEN CASE(S)**
Number of parts or packages: **6 (Six) items**
Reference number of CITES certificate: **209281**

II. **Destination of the game trophies:**

These game trophies will be transported by: Aeroplane (*means of transport*) from: Johannesburg International Airport (*place of loading*) by: Logwin Globistics, P. O. Box 360, Isando, 1600 (*shipping agent*) to:
Mr. Howard Ashbrook, (b) (6) [redacted] **U.S.A.** (*name and address of consignee*).
Identification of transport / seal number (s): **Not available on signing date**

III **Health Attestation by Official Veterinarian**

I, Dr R E Murapa the undersigned official veterinarian responsible for inspection and certification for **Môredou Taxidermy (ZA 8/25)**, certify that the game trophies above:

a) have undergone full processing at an officially approved taxidermy regularly inspected by official veterinary personnel;

b) have been packaged, immediately after treatment, without being in contact with other products of animals origin likely to contaminate them in individual, transparent and closed packages so as to avoid any subsequent contamination;

c) ~~in the case of trophies consisting solely of hide or skin,[1] they have either been:~~

~~salted and dried[1]~~

~~or~~

~~wet-salted for a minimum of 14 days before dispatch~~

~~or~~

~~Dry-salted or wet-salted on the following date ..... and, according to the declaration of the transporter, the hides and skins will be transported by ship and the duration of transported will be such that they will have undergone a minimum of 14 days of salting before they reach the border inspection post.[1]~~

d) in the case of game trophies consisting solely of bone, hooves, claws, antlers or teeth,[1] they have either been:

- have been immersed in boiling water for an appropriate time so as to ensure that any matter other than bone, horns, hooves, claws, antlers or teeth is removed;

or

- have been disinfected with a product authorised by the competent country of dispatch, in particular with hydrogen peroxide where parts consisting of bone are concerned.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Costa	Lawrence	P	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. (b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Nottingham	NH	03290	Rockingham	USA
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable) (b) (6)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Nottingham	NH	03290	Rockingham	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Lawrence Costa
(b) (6) [redacted]
Rumford, ME 04276

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

NA

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   African Elephant - Loxodonta africana
   b. Sex (if known).

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   NA

   b. Date wildlife is to be hunted:

   NA

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   NA

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   Bwabwata National Park East GPS S 17° 41.998
   Kongolia Tanzania E 023° 22.041

   b. Date wildlife was hunted:
   8/31/17 - 9/12/17

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Ndumo Lodge Kalambezo, Zambezi Region Namibia
Prof Hunter Karl Stompke

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Titus Schmidt
The Yellow Shark Holdings (PTY)LTD Olympia-Windhoek
Managing Director PO Box 81413 Republic of Namibia
+264 (0)61 304030

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). See Attached

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Titus Schmidt
Business Name: The Yellow Shark Holdings (PTY)LTD
Address: PO Box 81413
City: Olympia - Windhoek
State/Province:
Country, Postal Code: Namibia

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

NO

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

See attached

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

NO

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trop

Applicant's signature: _____ (b) (6) _____ Date: 9/18/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Dear Ms. Mary Arsenault,

The following is in response to your request regarding the status of the application.

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry
Supervisory Policy Specialist

Dear Ms. Mary Arsenault,

The following is in response to your request regarding the status of the application.

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry
Supervisory Policy Specialist
USFWS/Division of Management Authority
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803
1-800-358-2104, ext. 1976 or 703-358-1976
Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

We do not accept applications via fax or e-mail.

Sign up for our e-newsletter to learn how we're working around the globe to protect species and their habitats!

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity:_____(Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity:_____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   N/A

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Mawana Game Reserve, South Africa

   b. Date wildlife was hunted: July 17, 2016

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

   Tusks, Trunk, Skin panels and Skull

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   Spirit of Africa Taxidermy
   PO Box 1611/37 Ogilvie Rd, Howick, 3290 South Africa

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Name:	Spirit of Africa Taxidermy
Address:	PO Box 1611
City:	37 Ogilvie Road
State/Province:	Howick, 3290
Country, Postal Code:	South Africa

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: Atty. In Fact for Robert Kiyosaki **Date:** 03/10/2017

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:_____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

SAN FRANCISCO

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

HUNTER INT'L BROKERAGE SERVICES, INC.
5674 Stoneridge Drive, Suite 209
Pleasanton, CA 94588

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Vanessa Tabugan
Tel# (925) 417 5270 / e-mail: import@b.hunter-international.net

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

CUSTOMS POWER OF ATTORNEY

and

Acknowledgment of Terms and Conditions of Service

Social Security number (b) (6)

Date of birth (b) (6)

Know all men by these presents: That, Robert T Kiyosaki
(Full legal name of individual)

residing at (b) (6) Phoenix AZ 85016
(Residential or physical mailing address, P.O. Box is not accepted)

hereby constitutes and appoints: HUNTER INTERNATIONAL BROKERAGE SERVICES, INC., its officers, authorized employees and duly appointed sub-agents to act for and on its behalf as a true and lawful agent and attorney of the grantor named above for and in the name, place, and stead of said grantor from this date and in all Customs Districts, and in no other name to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, carnet or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandise shipped or consigned by or to said grantor, to perform any act or condition which may be required by law or regulation in connection with such merchandise to receive any merchandise deliverable to said grantor:

To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make sign, declare, or swear to any statement, supplemental statement, schedule, supplemental schedule, certificate of delivery, certificate of manufacture, certificate of manufacture and delivery, abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district:

To sign, seal and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise;

To sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated by said grantor;

To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantor's name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor;

And generally to transact at the customs houses in any district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent and attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents the forgoing power of attorney to remain in full force until notice of revocation in writing is duly given to and received by a District Director of Customs.

The undersigned grantor of this power of attorney hereby agrees to HUNTER INTERNATIONAL BROKERAGE SERVICES, INC. Terms and Conditions of Service, which are attached hereto and incorporated herein by reference.

IN WITNESS WHEREOF, the said (Print full legal name) Robert T Kiyosaki

has caused these presents to be sealed and signed: (Signature) (b) (6)

(Capacity) _____ (Date) March 4th 2015

Important note: If you are the importer of record, payment to the broker will not relieve you of liability for Customs charges (duties, taxes or other debts owed Customs) in the event the charges are not paid by the broker. Therefore, if you pay by check, Customs charges may be paid with a separate check payable to the "U.S. Customs Service" which shall be delivered to Customs by the broker. Importers who wish to utilize this procedure must contact our office in advance to arrange timely receipt of duty checks.

(Mandatory requirement to validate this POA: provide a CLEAR copy of your passport or driver's license or have this document notarized and mail to our office at Hunter Int'l., 5674 Stoneridge Drive, Ste 209, Pleasanton, CA 94588, tel (925) 417-5270, fax (925) 417-0170)

FALLS CHURCH VA 22041-3803

CHIEF, BRANCH OF PERMITS, DMA

Permittee:
ROBERT T KIYOSAKI
(b) (6)
PHOENIX, AZ 85016
U.S.A.

Authority: Statutes and Regulations: 16 USC 1539 (a); 50 CFR 17.40 (e).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Conditions and Authorizations:

A. Authorized to import the sport-hunted trophy of one African elephant (*Loxodonta africana*), taken in South Africa for the purpose of enhancement of the survival of the species.

B. Specimen may not be sold or transferred for any financial remuneration.

C. U.S. Threatened Species: tusks must be marked as per [50 CFR 17.40(e)]. In accordance with the African Elephant Conservation Act, raw ivory, including sport-hunted trophies that are wholly or partially ivory, may not be re-exported from the U.S.

D. **Trophy must have been taken during the 2016 hunting season.**

E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit issued by the Management Authority of South Africa.

F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.

G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. **This permit can be photocopied.**

H. Valid for use by permittee named above.

I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

>
> I just tried calling you but was unable to reach you. The application you've referenced is a request to renew a permit to import a trophy of an elephant taken in South Africa. Please be aware that on March 1, 2018, we withdrew our country-wide enhancement findings for elephants, and we now make our enhancement findings on an application-by-application basis. The original permit we issued for this import request was based on the country-wide finding that we later withdrew, and we must now make a separate enhancement finding on this permit renewal request.
>
> The application is currently under review. Due to the government lapse in appropriations in 2018, staff vacancies, and additional CITES and ESA listings, our office has a large back-log of permit applications, and I can't give you a definitive date of when this application will be processed. Feel free to check back with me at the end of March, and I will update you on our progress.

Subject: Re: [EXTERNAL] Fwd: PRT# MA10493C/0 RENEWAL FOR BRUCE BARANY

We filed for **RENEWAL** of this 2016-2017 elephant permit in **January 2018** and have not had any update since April 2019 when we were told that the application is assigned to another biologist.

Can you kindly let us know when we can expect to receive this permit? I can send you a prepaid Fedex label if required.

Appreciate hearing from you.

Kind regards.

This application has been received by our office and has been assigned to one of our Biologist. It is currently at a pending status. Please be aware that we have a significant number of applications pending, and we process applications in the order they are received in the office. The staff member working on your application has been notified of your inquiry. If there is a need for additional information or clarification on information provided in your application, the staff member will contact you directly.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
KARTES	DALE	F	

(b) (6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Naches	WA.	98937	Yakima	USA

(b) (6) [redacted]

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Naches	WA	98937	Yakima	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Coppersmith Global Logistics
Attn Jennifer House
3100 S 176th St.
Ste 120 SeaTac, WA 98188

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Dale Kartes
(b) (6)

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Elephant - one
Blue Wildbeast - one
Impala - Two

b. Sex (if known).

All males

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Mapungubwe Game Reserve
(Province) Limpopo, South Africa
(District) Hembe (Physical Address) All days

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Mapungubwe Game Reserve
(Province) Limpopo, South Africa
(District) Hembe (Physical Address) All days

b. Date wildlife was hunted:

10/10/2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

MR E. Small

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

SAFARI TAXIDERMY
47 Goud street
LABORIA, POLOKWANE, RSA

MR E Small
P.O. Box 123
Alldays 0909

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). South African Hunting Register Trophy export application (Enclosed) → AND ORDINARY Permit

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: SAFARI TAXIDERMY
Business Name:
Address: 47 Goud street
City: LABORIA
State/Province: POLOKWANE
Country, Postal Code: RSA

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Yes - is provided with this Application

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

NO

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

included material

Elephant Management Plan Annual Report for year 2016

Survey Data will be conducted every 2 years and the next survey is planned for June 2019 (Dr. Gerhard De Beer)

Management Actions

Fences:

The condition of the Fences are deteriorating on our Northern boundary along Limpopo River and Eastern area bordering with Mapungubwe National Park due to elephant activity. The fence from middle Modena North up to Den Staat rd have been repaired. North from here the elephant activity are just impossible to keep up the fence.

Along our Western Boundary with Breslau and Eendvogelpan, the electrical fences have been completed but we had to repair the Breslau fence once, and Eendvogelpan fence once during 2016 due to elephant activity.

Our Southern fence are in fairly good condition with elephant breaking threw but gets repaired.

The South Eastern Fence bordering Lauriston and Montique are constantly being broken, by elephants and neighbours keep feeding along fence to attract animals including elephants.

Degraded Area's:

On farms Parma and Montrow, a lot of erosion repair work has been done, as well as on Vergenoegd and Kruidfontein. The dam wall that broke on Vergenoegd washed away a lot of roads but was filled and repaired.

We have lost the dam walls at Vergenoegd, due to elephants working of the walls going over the walls to drink and bath in the water. This damage will still have to be assessed. The wall at Lelie dam showed deterioration and we do not think it will withstand this coming rainy season. This wal was repaired in 2014 to the extent of R2milj

Fire Management Plan:

Due to sparse ground cover and a very good road system, our fire risk is extremely low. We do have adequate fire-fighting equipment and personnel.

Water Provision:

We have three big dams that supply the main water to the animals and also the Limpopo River on our West and North. One of these dams were extensively damaged by elephants, and another is close to the point of the dam wall washing away. Another supply in the form of a borehole will supply water the animals during the drier period.

Game Management

Game Census Frequency:

Due to a lot of hunting, tourism and surveying activity we had during 2016 and a lot of helicopters were use, the game-count was on-going and reported daily when people were out for their activities. On 29 July 2016 till 5 August 2016 till 9th October 2015 an official game count was conducted at the waterholes as well as with the use of 2 helicopters.. This accounted for a total of 396 elephants for the period. Some groups could have been counted twice at different waterhole. This correlate with previous counts ref EMP(Elephant Management Plan)

On 8 February 2016 a Nature Conservation Officer flew with helicopter on the property and elephants were recorded. These groups were monitored by helicopter from the 7th February till 9th February and was a total of 158 elephants at one-time on the property.

Professional hunters and guides are instructed to record sightings especially elephant.

Helicopter Pilots were also task with reporting sightings and was then recorded by Eugene Small.

Any sightings by guests and owner were also recorded.

A drone was acquired and this will be used to identify groups of elephant.

Desired Stocking Density:

The desired stocking density is reflected in our Management plan and is <1 elephant per sq km but at this stage it is 9,6 elephant per sq km (EMP) (Ex max 100 elephant EMP Pg 124 Section 4:12)

Current Stocking Density:

As per our census with reference to Section E 5.4 Page 137, we have 240 resident and 240 migratory elephants. The Model stocking rate should be 100 Max. (Stocking Capacity Section 4:12 C Pg 124)

The damage to our infrastructure and environment are a sign of increased elephant activity.

Alterations to stocking density can be made after Habitat Condition Assessment this year if needed.

Herd numbers were in access of 80 animals per herd. 115 Near Pontdrift area, 81 near Somervile

In 2013 a herd of 236 stayed on Mapungubwe Game Reserve and was chased a few months later by helicopter back to Botswana. (Refer to Nature Conservation officials)

Game Management Action:

An application has been submitted for 10 Cities elephants to be hunted. We are in the process to apply for more Cities elephant permits, after we suffered severe damage to one of our main dams due to the elephants. This must be issued in advance so that the hunting of these animals can be arranged and staggered to chase them out of the area during the year.

We would also like to add another 5 elephants on a management quota that will not be for export, but will be hunted as first a means to try to get to the model stocking rate down to a maximum of 100 animals and also a means to get the elephants to move back to Botswana.

Elephant Management

Desired Total elephant Population Range:

As indicated by our EMP the desired range is 100 individuals.

Desired Adult Sex Ratio Range:

Elephant Census Frequency:

Elephant census are done on an on-going process and for this all staff are motivated to report elephant activity. All tourist and guides are also asked to report any elephant activity and report and record elephant sightings.

Census Methods:

Any aircraft that are used for transport or game capture must report any elephant activity and numbers. This is then recorded.

A drone will be used to photograph groups and individuals as weather and time permits.

Method of elephant reduction

An application has been submitted for 10 Cities elephants to be hunted. We are in the process to apply for more Cities elephant permits, after we suffered severe damage to one of our main dams due to the elephants. This must be issued in advance so that the hunting of these animals can be arranged and staggered to chased them out of the area during the year

We would also like to add another 5 elephants on a management quota that will not be for export, but will be hunted as first a means to try to get to the model stocking rate down to a maximum of 100 animals and also a means to get the elephants to move back to Botswana.

Financial losses due to elephant activity

Dams;

An amount of just over R2milj was spend in 2014/2015 on repairing and strengthening Lilly dam as well as main dam.

Elephant activity has already start to work of the wall again.

Vergenoegd dam, which was our second biggest dam on the property, wall was washed away with the rain we had on 19 March 2016. The elephants has worked off the dam wall to an-extend that it could not cope with the water anymore. (This dam wall withstood the 2000 and beyond flooding)

Our preliminary quote for repair for this dam wall, will be around R8milj.

Fences;

Fences remains a huge expense as we cannot keep up with maintaining repairs.

We started with electrification but even this get destroyed by the elephants.

The cost of our plains-game species that are escaping is also a big concern.

Fence repairs for 2016 was R260 000.00 for labour only.

Water supply lines;

The water supply to our main lodge Naledi is impossible to maintain as it is just getting to expensive to repair the elephant damage, and we have to make use of inferior boreholes, with water not fit for human consumption so all drinking water have to be bought.

Electrical Cables:

The electrical cable supplying electricity to Naledi Lodge are constantly dug up and pulled apart.

The cost for fault finding and repair was R118 200.00 for 2016

Trees;

Most of our protected trees are destroyed as per our Management Plan. These all have monetary value and we are busy with an assessment.

Conclusion

In 2013 we admitted a Management Plan for our elephant problem as was requested by Nature Conservation.

Wild Life at Mapungubwe Game Reserve 2016

On 29 July 2016 till 5 August 2016 an official game count was conducted at the waterholes as well as with the use of 2 helicopters. This count was focused on elephant numbers but plainsgame were also counted.

Farms that were monitored were: Pontdrift, Modena,Parma, Princess Royal, Montrow, Sommerville, Bultpan, Vergenoegd, Onrus, Kruidfontein we used 2 x Robinson R44, helicopters as well as manned waterholes.

On 5 August only Parma, Somerville and Kruidfontein were counted the morning.

ELEPHANT

NB: THESE ELEPHANT HERDS COUNTED ON PONTDRIFT AND MODENA ON, 29 July to 31 July 2016, MOVED BETWEEN MAPUNGUBWE NATIONAL PARK, BOTSWANA AND US DURING THIS PERIOD AND DID NOT MOVE OVER THE TARR ROAD TO PARMA. NONE OF THESE ANIMALS COULD BE IDENTIFIED AS INDIVIDUALS WE SAW BEFORE.

29 July 2016 Pontdrift 16 Elephants (3 x Elderly bulls, 4 x calves 6 x Adult cows, 3 x sub adults

30 July 2016 Pontdrift 48 Elephants. (2 x elderly bulls, 19 x adult cows, 14 x sub adult, 6 x young bulls (sub-adult), 2 x infant, 5 x calves

31 July 2016 Pontdrift 14 Elephants. (2 x elderly bulls, 4 x adult bulls, 4 x cows, 2 x calves, 2 x sub adult)

29 July 2016 Modena 89 elephants. (6 x adult bulls, 11 x calves, rest cows and sub-adults)

30 July 2016 Modena 115 elephants. (5 x adult bulls, 3 x infant, 18 x calves, rest cows and sub adults)

31 July 2016 Modena 121 elephants. (6 x adult bulls, Rest cows, calves sub-adult)

The main lodge is situated at Parma and also one of our big dams

1 August Parma 87 elephants. (2 x Adult bulls, 9 x sub adult bulls, 6 x infant, 10 x calves, 21 x cows, 39 x other)

2 August Parma 7 elephant bulls

3 Aug Parma 94 elephants. (9 x bulls, 9 x sub-adult, 6 x infant, 10 x calves, 21 x cows, 39 x other)

4 Aug Parma 87 elephants. . (2 x Adult bulls, 9 x sub adult bulls, 6 x infant, 10 x calves, 21 x cows, 39 x other

5 August Parma 26 elephants. (3 x adult bulls, 11 x cows, 5 x calves, 7 x sub-adult))

Somerville do not have open water but the elephants drink at Lilly-dam situated on the boundary between Somerville and Princes Royal.

1 August Somerville 59 elephants. (2 x elderly bulls, 3 x adult bulls, 31 x cows, 13 x calves, 10 x sub adult) (*NB. These animals are in three herds and they were also recorded at Lilly-dam drinking at different times*)

2 August Somerville 59 elephants. (2 x elderly bulls, 3 x adult bulls, 31 x cows, 2 x infant, 11 x calves, 10 x sub adult)

3 August Somerville 59 elephants. (2 x elderly bulls, 3 x adult bulls, 31 x cows, 2 x infant, 11 x calves, 10 x sub adult)

4 August Somerville 65 elephants. (1 x elderly bull, 7 +3 x adult bulls, 31 x cows, 13 x calves, 10 x sub adult) NB:*The 7 bulls was counted day before on Parma.*

5 August Somerville 67 elephants. (1 x elderly bull, 7 +3 x adult bulls, 31 x cows, 13 x calves, 12 x sub adults)

One of our big dams is situated on Vergenoegd, more or less in the centre of Mapungubwe Game Reserve, and this dam's wall broke due to elephant activity. There was still water right through the year available though, for the elephants. The helicopter was used from 1 till 5 August and physical counting at the water was conducted from 29 July till 5th August 2016

1 August Vergenoegd 118 elephants. (1 x elderly bull, 8 x adult bulls, 4 x infant, 15 x calves, 41 x cows, rest sub adult) *NB. These elephants came in four separate groups to the water from 10:30 in the morning till 15:00 in the afternoon.*

2 August Vergenoegd 88 elephants (8 x adult bulls, 11 x calves, rest cows and sub adult)

3 August Vergenoegd 108 elephants (11 x calves, 4 x bulls recorded.)

Another big dam is situated at Bultpan at the southern part of Mapungubwe Game Reserve and a lot of elephant activity could be seen but no herds were recorded over this period but only bulls. The elephant herds moved into this area at night and during the day moved to Vergenoegd where they were recorded.

29 July 2016 Bultpan 9 elephants. (All adult bulls, one specific group were 5 bulls together)

30 July 2016 Bultpan 5 elephant bulls

31 July 2016 Bultpan 4 elephant bulls

Kruidfontein is situated on the southern western boundary along the Limpopo river and elephants are moving across from Botswana onto the Reserve. We have seen elephant movement from Kruidfontein through the farm to Botswana on the Northern boundary for the last 3 years which was not recorded before. Bull groups number from 3 to 6 elephants, as well as lone bulls which seems to be the younger adult ones.

29 July 2016 Kftn 23 elephants. (2 x adult bulls, 3 x sub adult bulls, 9 cows, 4 x calves, 5x sub-adult)

30 July 2016 Kftn 17 elephants. (6 x adult bulls, 7x cows, 3 x calves, 4 x sub adult) *NB: 6x bulls were together around my house at KFTN*

31 July 2016 Kftn 97 elephants. (This herd came onto the farm from Botswana and move onto Vergenoegd, which was counted in daytime at the water to be 118 animals.

1 August 2016 Kftn 12 elephants. (3 x adult bulls, 4 x cows, 3 x calves, 2 x sub-adult)

2 August 2016 Kftn 6 x elephant bulls.

3 August 2016 Kftn 17 elephants. (6 x adult bulls, 7 x cows, 3 x calves, 4 x sub-adult)

4 August 2016 Kftn 67 elephants. (6 x adult bulls, rest one herd came in from Botswana)

5 August 2016 Kftn 89 elephants (6 x adult bulls, 4 x infant, 13 x calves, rest cows and sub adult)

(Infant <1 year, calves 1-3 years, juveniles 3-5 years, sub adults 6-10 years, Young adults 10-21, adults 21-35 years, older adults 36-50 years and elderly adults > 50 years)

2.1 Study area

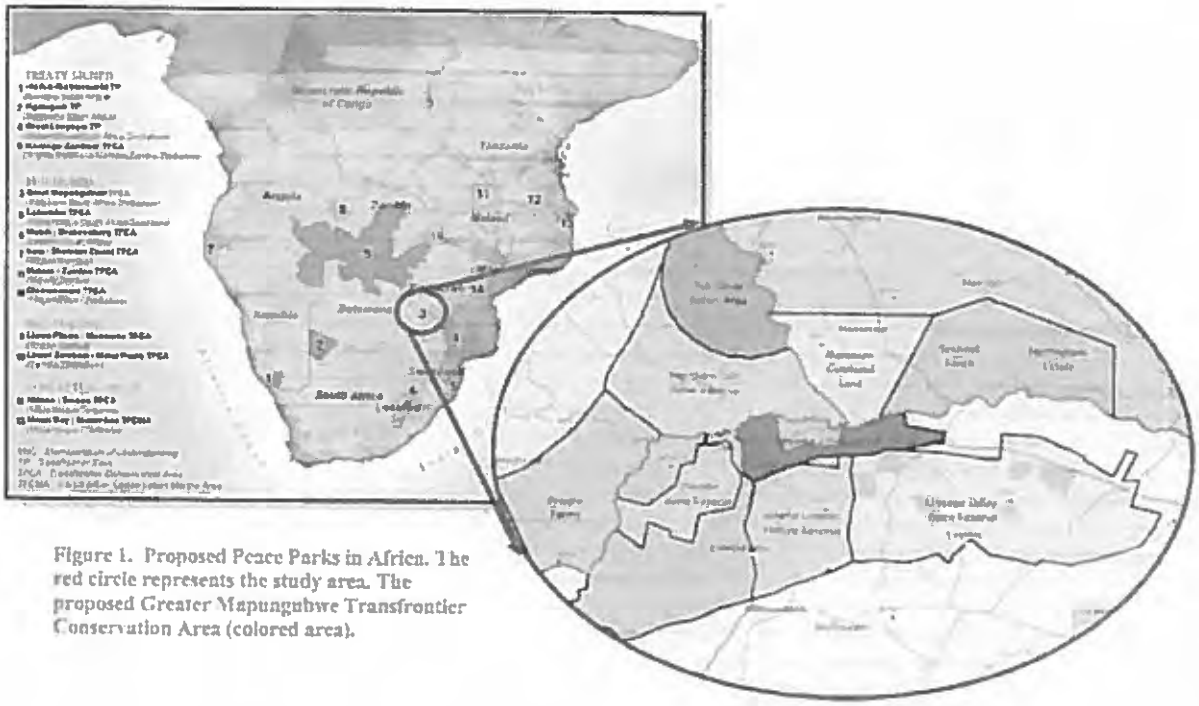

Figure 1. Proposed Peace Parks in Africa. The red circle represents the study area. The proposed Greater Mapungubwe Transfrontier Conservation Area (colored area).

The Greater Mapungubwe Transfrontier Conservation Area (GMTFCA) is one of the 10 Peace Parks created in Southern African, based on International partnerships promoting wildlife conservation, ecotourism and job creation.

The GMTFCA is an area of utmost importance and chosen by Peace Parks to protect because of the rich and unique biodiversity, the cultural heritage of the archaeological treasures of Mapungubwe and because it is home to the largest population of elephants protected on private land in Africa.

The fieldwork will take place on three reserves:

- Vhembe Game Reserve = Mapungubwe Private Nature Reserve (MPNR),
- Mapungubwe National Park (MNP),
- Venetia Limpopo Nature Reserve (VLNR)

USFWS Finding Good For South Africa Wild Lion Import Permits

Oct 02, 2017 Leave a comment

The U.S. Fish & Wildlife Service (FWS) announced the continuation of its positive enhancement finding for the import of legally hunted wild and wild-managed lions from South Africa into the United States. This finding allows the import of wild and wild-managed lions hunted in the 2017, 2018, and 2019 seasons.

There are approximately 2,200 wild lions and 800 wild-managed lions in the country. The positive enhancement finding from the FWS concludes that well-regulated and monitored hunting is beneficial to the species and not a driver of population decline.

The FWS, along with CITES, have recognized the importance hunting plays in conservation. In October 2016, the FWS stated "that sport hunting of wild and wild-managed lions does contribute to the long-term conservation of the species in South Africa," and explained that, "lions are not in trouble because of responsible sport hunting." Wild and wild-managed lions are most threatened by habitat loss, loss of prey and retribution killings during human-wildlife conflict.

According to the FWS, "The presence of private reserves has increased the number and diversity of wildlife in South Africa, thus fueling the hunting industry, which funds the ongoing success of private reserves. It appears that without the hunting industry, these reserves, which have become islands of wilderness in a sea of civilization in much of South Africa, would not be economically viable, and therefore would not exist."

According to the FWS, information received from South Africa's Department of Environmental Affairs reveals that four private reserves in Africa are listed as having wild lion populations at this time. These include the Mapungubwe Game Reserve in Limpopo Province; the Khamab Kalahari Reserve in North West Province; the Associated Private Nature Reserves in Mpunalanga Province; and the Kalahari Oryx Private Game Reserve in Northern Cape Province. Hunters wishing to obtain information about whether the FWS has or will issue import permits for lions taken from these areas should contact the FWS directly.

The majority of lions harvested in South Africa are captive-bred. As SCI reported in October 2016, the FWS made a negative finding for the import of captive-bred trophies. The positive enhancement finding for wild lions does not affect that finding. As a result, hunters continue to be unable to import legally hunted captive-bred lions from South Africa into the United States.

SCI will continue to work with wildlife authority agencies, in conjunction with professional hunting associations, to provide a clear link between the hunting of lions and the enhancement of the species. Scientific principles, not the emotionalism of anti-hunters, should provide the foundation for the management of wildlife and habitat.

Operator Enhancement Questionnaire

1. Name of area operator: Mapungubwe Game Reserve
   a. Years in business: 24 years
   b. Name of company conducting hunt: Mapungubwe Game Reserve
   2. Name of concession: Mapungubwe Game Reserve Size in km^2: 250
   a. Land tenure: __ Government lease __ Community X Private ranch __ Private conservancy
   b. Length of concession agreement: N/A Can it be renewed? __ Yes __ No
   c. Length of renewal, if applicable: N/A
   d. Estimated total amount received in trophy fees last year, if applicable: $ 210 000
   e. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: _ Approved Management plan by Nature Conservation and annual report.
   f. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Alldays Limpopo Province. See attach Map
   g. If the concession borders a national park, please provide the park name: _ Mapungubwe Nat Park
   h. Description of general and distinctive habitat features and any water features: Mopane bushveld with 3 big dams
3. Are there any communities living in the concession? No
   a. If so, estimated number of people or villages in the concession? N/A
4. Are there communities bordering this concession? No
   a. If so, estimated number of people or villages around the concession? N/A
5. Relevant game populations in the concession:[1] See attached documents

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant				
Lion				
Leopard				
Prey species				

6. Total employment number: 11
   a. Please identify the number and type of all employees:

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Type	Total number of this type	Number of this type who are local/from nearby communities

RAHMQVIST FOUNDATION CENTRE

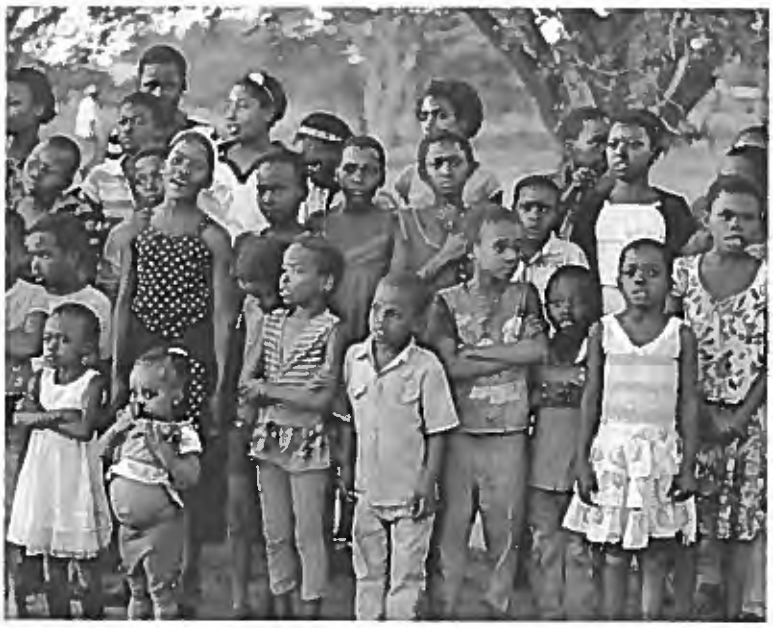
"'All children are entitled to a good start in life with care and a safe shelter. I therefore founded Rahmqvist Foundation in order to build and run an orphanage, to give homeless and vulnerable children a safe place to grow up in."

LEIF RAHMQVIST
Founder and Protector

BACKGROUND

Close to my ranch Mapungubwe Game Reserve, in South Africa there is the town of Alldays. It is a small country town with lots of poverty, homelessness, unemployment and disease. There are many children having lost one or both their parents to AIDS and other diseases. The children are often living in very vulnerable situations, without any adult care. Their one meal a day they get by a Drop-In Centre run by local women. This is not the way children shall live! All children are entitled to a good start in life with shelter and proper care! I therefore founded Rahmqvist Foundation in order to build and run an orphanage to give children a place where they can be safe, get enough to eat, hygiene, health care, education, a bed of their own and not at least to play.

More about us



ORPHANAGE

To strengthen the orphanage organization we are establishing a partnership with Norsa Community Care.

Read more

SKILL SCHOOL

We are now taking the next step in the project through the start-up of Rahmqvist Foundation Skill School. The skill school will offer young people leaving school a professional training to be bricklayers, seamstresses, bakers, chefs, masseuses or hairdressers. We have successfully trained two courses of four woman each to became seamstresses, six chef's and still full time training for 2018

WANT TO HELP?

Rahmqvist Foundation Centre is a charity project. We feed 162 children every day, with meat harvested from my ranch Mapungubwe Game Reserve by local and foreign hunters. Extra funds raised go directly to the Centre and to the benefit of the children. We are extremely grateful for all contributions, large and small, from individuals, businesses, organizations, schools and others!

RE: Import Permit - African Elephant from Namibia

Dear Sirs / Madams:

Enclosed you will find the following:

1. Completed and signed Federal Fish and Wildlife Import Permit Application Form;
2. Copy of Namibia Permit to Hunt Trophies and supporting docs (including elephant);
3. Copy of CITES Export Permit for Loxodonta africana (African elephant);
4. Copy of Namibia Permit to Export Trophies (other animals);
5. Photos of ivory from elephant; and
6. $100.00 check payable to U. S. Fish and Wildlife Service.

Please be so kind as to process the enclosed import permit application for the elephant taken in the Nye-Nye Conservancy during October, 2017. If I have overlooked something you require to process the import permit application or other information you require, please contact me by phone (b) (6) or by email (b) (6)

Thank you.

Sincerely,
(b) (6)
Tom L. Lewis

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Lewis	Tom	L	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Great Falls	Montana	59404	Cascade County	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)
same as above

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Ms. Jennifer House, Import Analyst, Coppersmith Global Logistics, 3100 S. 176th Street, Suite 120, Seattle, Washington 98188

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Tom L. Lewis (b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

loxodonta africana (African elephant)

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Nyae-Nyae Conservancy, Namibia. Nearest city or town is Tsumkwe, Namibia.

b. Date wildlife was hunted:

October 1-12, 2017.

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

S. M. Jacobs, P. O. Box 601, Grootfontein, Namibia. SMJ Safaris, same address.

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

African Shipping Services CC, P. O. Box 86877. Eros . 46 TV Moore Street . Southern Industrial Area, Windhoek, Namibia.

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). See attached.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	S. M. Jacobs, SMJ Safaris
Address:	P. O. Box 601
City:	Grootfontein
State/Province:	
Country, Postal Code:	Namibia

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

I understand the population status of African elephant in the Nyae-Nyae Conservancy is stable or expanding with many mature animals. I observed hundreds of elephants while hunting the conservancy.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

The trophy fee for the elephant was $45,000. There was a also a daily rate plus trophy fees for several other animals I took at Nyae-Nyae. From these funds the San people received payouts for their livelihood, waterholes for elephants and game were financed, people were employed, meat provided, etc

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

In the Conservancy, the San or Bushman community benefits directly by financial payments made by hunting operators. Over 90% of the income to the Conservancy is derived from the hunting concession outfitter. These funds provide for anti-poaching, waterhole development, and income to the people.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: [redacted] Date: 8-10-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Barry, Anna <anna_barry@fws.gov> Thu, Oct 25, 2018 at 9:44 AM
To: (b) (6)

Dear Mr. Tom Lewis,

The following is in response to your request regarding the status of your application.

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry

Dear Mr. Lewis,

I sent a response earlier today, but, unfortunately the message bounced back.

Anna Barry

Subject: Tom Lewis PRT #03109D
To: (b) (6)

Dear Mr. Tom Lewis,

The following is in response to your request regarding the status of your application.

As background, on March 1, 2018, in response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species like the African elephant. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We review each application received for the import of sport-hunted African elephant and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized. Therefore, your application is pending at this time.

Sincerely,

Anna Barry
Senior Biologist
USFWS/Division of Management Authority
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803
1-800-358-2104, ext. 1976 or 703-358-1976
Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT* You may have noticed that our **application forms expired 5/31/2017. The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted.* ***We do not accept applications via fax or e-mail.***

Sign up for our e-newsletter to learn how we're working around the globe to protect species and their habitats!

Thank you, Tom, your note. Your application, PRT-03109D, is currently pending. Our office is in the process of making the necessary findings on sport-hunting in Namibia related to your application.

Thank you,
Emma

Good afternoon,

Application 03109D continues to be under review. Please be aware that we have a significant number of applications pending, and we process applications in the order they are received in the office. The staff member working on your application has been notified of your inquiry. If there is a need for additional information or clarification on information provided in your application, the staff member will contact you directly.

We appreciate your time and consideration.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Sullivan	James	F.	Jr.

(b) (6)

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

(b) (6)

ent #, Suite #, or Room #; no P.O. Boxes)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Sallisaw	OK	74955	Sequoyah	USA

2.a. Mailing address (include if different than physical address, include name of contact person if applicable)

(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
Sallisaw	OK	74955	Sequoyah	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

(b) (6)

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

James F. Sullivan, Jr.

(b) (6)

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

L. africana (Common name: Elephant)

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Republic of South Africa, Province of Limpopo, District of Mopani, Croc Ranch, near city of Phalaborwa

b. Date wildlife was hunted:

June 29, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Zander Osmers Safaris with Zander Osmer and Charl Osmer

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Life Form Taxidermy, No. 7 Aluminum Road, White River, Mpumalanga, 1240
Republic of South Africa, Attention: Annelle Scott, Office Supervisor

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). The permit is attached as requested.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	Life Form Taxidermy
Address:	No. 7 Aluminum Road, White River
City:	Mpumalanga
State/Province:	Limpopo
Country, Postal Code:	Republic of South Africa

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

The population in the area was very healthy and trending upward. There was actually an overabundance of elephants in the area and they were causing extraordinary damage to habitat.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

I believe the fees were approximately $400.00 US. They were paid to the Government. I paid a trophy fee of $40,000 US which was split between the concessioner of the hunt area and the PH. The meat was distributed to the nearby village. The concession of the hunt area used fees for protecting the area.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

I specifically inquired into this matter and was told by the concession holder and PH that they both contribute their own time and money (and equipment - helicopters) for breeding, protection and health of the elephants. Many indigenous villagers are employed by PH and the concessionary.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

    Applicant's signatu[redacted] Date: 08/13/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Supplemental Information
To
Federal Fish and Wildlife Permit Application
Section E. 9.
(for James F. Sullivan, Jr.)

The concession hunted contained, according to information provided by the manager and the PH, a healthy, well diversified (in sex and age), population of elephants that freely ranged in an area of (to the best of my recollection) approximately 80,000 acres.

The elephants were naturally divided into several herds and while hunting and searching for tracks of a mature bull, the damage to the trees and browsable food supply was very, very noticeable.

The concession is regulated by the Limpopo conservation officials and the permit process is very strict. We were kept waiting several days while the Limpopo officials completed their tasking of confirming the need to take a mature bull from the herd on the property.

In talking with the manager of the concession and by simple observation it is easy to understand that the cost of such an operation (containing many, many species of animals in addition to the elephants) is enormous. The maintenance of the property to protect it from poachers, to allow access to sick animals, to fight fires and to provide employees of the concession with access to protect the animals and to observe the habitat and the condition of the property and the animals has to be enormous.

The manager of the concession advised me that every penny made from the hunt goes back into the property and the animals to continue the operation. He advised me that even with the abundance of the population and the resulting damage to the habitat that permits were scarce and that revenue was suffering.

Many employees of the concession were observed and the improvements to the concession were readily observable. The only revenue for the operation is from hunters and photographic safaris. The revenue from this and other hunts provides the revenue for the enormous amounts of money spent for the conservation of elephants and other species. The meat from the elephant was portioned out among the villagers and the process was quite amazing to observe. The villagers lined up with sacks and bowls to take their portion of the meat from the elephant.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a Last Name	1 b First Name	1 c Middle Name/Initial	1 d Suffix
Dewett	Justin	C	

2 Date of Birth (mm/dd/yyyy)	3 Telephone Number	3 a Alternate Telephone Number	4 E-mail address
(b) (6)			(b) (6)

Section B: Complete if applying on behalf of a business, cor

1a. Name of business, agency, Tribe, or institution	1.b. Doing business as (DBA)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1 a Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1 b City	1 c State	1 d Zip code/Postal code	1 e County/Province	1 f Country
Shreveport	LA	71101	caddo	USA

2 a Mailing address (include if different than physical address, include name of contact person if applicable)
(b) (6)

2 b City	2 c State	2 d Zip code/Postal code	2 e County/Province	2 f Country
Shreveport	LA	71101	Caddo	USA

Section D: All applicants MUST complete

1 Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U S. FISH AND WILDLIFE SERVICE in the **amount of $100**. Federal, Tribal, State, and local government agencies and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2 Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting, please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Darbi Rice [redacted] Shreveport, LA 71101

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Darbi Rice [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

African Elephant - Loxodonta

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Zimbabwe, South Stangani Ranch, nearest city Gwem G.P.S. = 35 K 0738704 7840479

b. Date wildlife was hunted:

ACTING CHIEF ECOLOGIST

ACTING DIRECTOR CONSERVATION

ACTING DIRECTOR GENERAL

BOARD CHAIRMAN

SECRETARY FOR ENVIRONMENT WATER AND CLIMATE

MINISTER OF ENVIRONMENT WATER AND CLIMATE

[redacted]

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Hallamore Hunts, Lou Hallamore

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Zimbabwe
4th Josiah Chinamano Rd Belmont Bulawayo Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Trophy Consultants International
Business Name:
Address: 4 Josiah Chinamano Rd
City: Belmont
State/Province: Bulawayo
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

2017 Offtake Quotas form attached.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

I ~~don't~~ do not remember the fee.
However, fees are used to employee workers
Keep & Maintain Hunting grounds etc.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

NO

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Robert ShiFFlett
(b) (6)
Afton, VA 22920

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Robert ShiFFlett
(b) (6)

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Elephant : Quantity - (1)

a. Leopard (*Panthera pardus*) Quantity: ____ (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.

b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: ____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

N/A 5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, Please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE ANIMAL HAS ALREADY BEEN TAKEN**, please enter the following:

   d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   South Africa: Lephalale, Limpopo province

   e. Date wildlife was hunted: August 18, 2017

   f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   RH Heuser
   Kwalata Wilderness
   Lephalale

   g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   African Legacy Logistics
   Johannesburg, South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

   see attachment

8. Complete name and address of overseas person or business shipping the trophy to you.

   a. If you are applying to import a trophy directly from **Namibia**, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name: Brett Piddock
   Business Name: African Legacy Logistics
   Address:
   Address: 40 Kokkewiet Street
   City: Johannesburg
   State/Province: Gauteng province
   Country, Postal Code: South Africa

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

N/A 9. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _[redacted]_ Date: 08-26-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. **All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).**

HUNTING SPECIAL CONDITIONS Permit no: 1354

1. This permit does not absolve the holder thereof in obtaining any other permit, licence, certificate or document as may be required by any other relevant legislation from any province or country.
2. This permit must be signed by the permit holder and must be in his/her possession for the duration of the hunt.
3. This permit does not allow the hunting with a bow and arrow or any other prohibited method unless specified on the permit.
4. This permit does not authorise the hunting during the night, unless specified on the permit
5. This permit does not allow the hunting of listed species which is under the influence of a tranquilising, narcotic, immobilising or similar agent,
6. If a wounded animal crosses into a neighbouring country, province or property the Department as well as the country where the animal entered into must be notified within 24 hours
7. No driving of listed species for the purpose of hunting is authorised.
8. The Department reserves the right to nominate an official to be present during any or all hunts conducted in accordance with this permit.
9. The outcome of the hunt in the case of TOPS threatened species must be reported within two working days after the listed species was hunted, the hunt terminated or in the case where the hunt was not successful. This office reserves the right to inspect the hunting sight or any relevant product of such hunt.
10. In the case where trophies will not be exported from RSA the permit holder must immediately apply for a TOPS Possession Permit in the case of TOPS species
11. Elephant tusks must be marked by an Environmental officer
12. A TOPS Ordinary permit is required to convey any part of any TOPS specie hunted to any facility within the country, except a taxidermy
13. The Department may require scientific information or material from the animal hunted.
14. The non-compliance with the permit details as well as these special conditions will result in criminal charges and may influence the granting of similar permits to the permit holder.
15. Issued in terms of the Limpopo Environmental Management Act 2003, Act no. 7 of 2003.
16. An elephant/ crocodile may not be hunted next to the water's edge of an international border
17. In the case of dangerous game the minimum calibre requirement is a 375.
18. This permit does not absolve the applicant from conforming to the norms and standards for hunting
19. No put and take system of hunting is allowed
20. No animal may be hunted in a controlled environment
21. The use of dogs may only be used to flush birds or track wounded animals
22. All non-residential clients must be accompanied by a PH.

RHINO

23. The Department must be informed 48 hours before the hunt takes place and a representative of the Department must be present during the hunt.
24. The horns may not be separated from the rest of the trophy.
25. The horns must be micro chipped on the property where the hunt took place, unless already micro chipped.

26. The PH register must be completed and signed immediately after the hunt.
27. The hunting permit and the copy of the PH register must accompany the trophy when being transported between destinations

LARGE PREDATORS

28. No large predator may be hunted if released in an area adjacent to a holding facility for large predators
29. May not be hunted by means of bait except in the case of leopard, lion and hyena where dead bait may be used
30. May not be lured by sound or any other induced luring method to be hunted
31. May not be hunted in an enclosure and in the case of lion of 1000 ha and release at least 7 days before the hunt.
32. The use of a spot light may only be used in the case of hunting leopard and hyena.

PERMIT NUMBER O: 1354 /

STANDARD PERMIT CONDITIONS

1. This permit is not transferable.
2. Any unauthorised alteration to this permit shall render it invalid.
3. This permit is subject to the provisions of any applicable law in force during the period of validity of the permit.
4. This permit is valid only within the province where it was issued.
5. The holder of the permit shall, at the request of a person authorised in terms of applicable legislation so to demand, forthwith produce such permit to such person.
6. This permit shall be invalid until such time that it is signed by the permit holder.
7. This permit shall be deemed invalid when it is lost or destroyed and no copy thereof shall be such issued.
8. This permit may be withdrawn by an authorised person if the execution of any activity may be detrimental to the welfare of any wild animal or the safety of any person, provided that the permit holder is given notice of such intention and be granted the opportunity to appeal to such withdrawal.
9. The prescribed fees paid for the issuing of this permit shall not be refunded.
10. If the holder of this permit contravenes or fails to comply with any permit condition or requirement to which this permit is subject, he or she shall be guilty if an offence.
11. This permit shall be subject to any applicable norms and standards in existence at the time of issuance of this permit.

SPECIAL CONDITIONS

1. This issuing authority shall determine the species and restricted activities for which this permit will apply.
2. If this permit applies to hunting , the holder of this permit must:

    a. Have a copy of this permit authorising the hunt, on his or her person during the hunt;
    b. Within 21 days after the hunt, furnish the issuing authority with a written return on the hunt stating:
        (i) the permit number and date of issuance of the permit;
        (ii) the species, sex and number of animals hunted; and
        (iii) the location where the hunt took place.
    c. Return the original permit to the issuing authority forthwith after expiry of the permit.

To be completed by landowner after completion of the hunt:

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Cherish Senrud
(b) (6)
[redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

a. Leopard (*Panthera pardus*) Quantity: ____ (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.

b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: ____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

c. African Elephant from Zimbabwe Quantity: 1 (2 tusks

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, Please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE ANIMAL HAS ALREADY BEEN TAKEN**, please enter the following:

d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
Makuti Pool, Mashonaland West
Harare, Zimbabwe

e. Date wildlife is to be hunted:
09-01-2014 to 09-14-2014 (animal already harvested)

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Warren Thorn

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

National Parks (ZPWMA)
P.O. Box CY 140, Causeway, Harare, Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from **Namibia**, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: National Parks (ZPWMA)
Business Name:
Address: P.O. Box CY 140 Causeway
Address:
City: Harare, Zimbabwe
State/Province:
Country, Postal Code:

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _[redacted] Date: 4-03-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. **All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).**

CERTIFICATE OF OWNERSHIP OF IVORY AND RHINOCERUS HORN

(Issued in terms of section 77 of the Parks and Wildlife (General) Regulations, 1990)

Specified officer's signature and date-stamp

Cert. No 107587

Name NICK ANTHONY SENGUD

(b) (6) [redacted]

Address PARKWAY SPRING CREEK NEMBA, USA

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Bowman	William	R	Jr.

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (include if different than mailing address; include Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Dandridge	Tennessee	37725	Jefferson	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Same as Page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Same as Page 1 (myself)

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA African Bush Elephant

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Already Hunted

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Maseke Game Reserve, Archie 156 KT, Phalaborwa, South Africa

b. Date wildlife was hunted:

1 June thru 8 June 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Fritz Rabe
Fritz Rabe Adventures
HO #ZA/LP/87383

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Trophy Solutions Taxidermy
PO Box 12043 Bendor
Polokwane, South Africa 0713

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Attached

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	Trophy Solutions Taxidermy
Address:	PO Box 12043 Bendor Park
City:	Polokwane, South Africa 0713
State/Province:	Customs Code: 20302458
Country, Postal Code:	State Vet Registration Code: ZA 8/117
	info@trophy-care.com Phone: +27 15 880 0888

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Attached

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Attached

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Attached

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: (b) (6) Date: 8-29-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Responses to para 9

South African Hunting Permit for Export

Photos of Meat Distribution from hunted Elephant

9.

a. According to CITES, elephant populations are on the rise in South Africa with an annual growth rate of approximately 5%. Additionally, the CITES report states that "Elephant populations in South Africa's protected areas (this hunt occurred in one of these areas) are under no major threat and statistics show that poaching in South Africa is well under control." This hunt occurred on the Maseke Game Reserve which is approximately 35,000 acres. The reserve is part of the Associated Private Nature Reserves (APNR) collective which are land holdings adjacent and open to Kruger National Park. Collectively they represent 450,000 acres of land dedicated to conservation. These protected reserves utilize a combination of eco-tourism and hunting to financially support the reserve and to maintain animal populations at a number compatible with available food sources. Game counts are measured against browse/grazing requirements for each species and a suitable hunting quota is allocated annually. An estimated population of 400 plus elephant reside on the Maseke reserve and those numbers are increasing annually. At the current population numbers, five to seven elephant are allocated for hunting each year. As the populations increase those numbers may rise. These hunts are fully authorized by the APNR and fully sanctioned by CITES. All required legal paperwork must be submitted and all required permits must be issued prior to the hunt taking place. (See our attached permit authorizing this hunt).

b. The trophy fee paid for this hunt was distributed as follows:

* R 5000 to South African Nature Conservation Department.

* R 10,000 to processing, bagging, freezing, and distribution of this elephant meat to the local Drop In Center of 235 orphans and needy children.

* R 100,000 to Balule Nature Reserve Ecological monitoring and Anti-Poaching budget.

* R 222,222 to supporting the local community that owns the land.

* The balance goes to managing the reserve itself for road maintenance, paying game rangers, internal anti-poaching untis, pumping water to established waterholes on the reserve, fence repair, etc. The reserve has 5.4% of the western boundary of the Kruger National Park and must repair and maintain all boundary fences to mitigate elephant/human conflicts.

c. Conservation benefit to elephant is realized in the establishment and maintaining of these reserves which provide a natural habitat and environment in which they may live. Waterholes are built and pumped throughout the reserve which not only benefits elephant but all species of wildlife residing there. Anti-poaching units are trained and deployed upon these reserves to police poaching activities and species population growth is maintained through sustainable use conservation efforts (hunting) to ensure ample food remains available for all species within the reserve.

HUNTING SPECIAL CONDITIONS- APNR

1. This permit does not absolve the holder thereof in obtaining any other permit, licence, certificate or document as may be required by any other relevant legislation from any province or country.
2. This permit must be signed by the permit holder and must be in his/her possession for the duration of the hunt.
3. This permit does not allow the hunting with a bow and arrow or any other prohibited method unless specified on the permit.
4. This permit does not authorise the hunting during the night, unless specified on the permit
5. This permit does not allow the hunting of listed species which is under the influence of a tranquilising, narcotic, immobilising or similar agent,
6. If a wounded animal crosses into a neighbouring country, province or property the Department as well as the country where the animal entered into must be notified within 24 hours
7. No driving of listed species for the purpose of hunting is authorised.
8. The Department reserves the right to nominate an official to be present during any or all hunts conducted in accordance with this permit.
9. The outcome of the hunt in the case of TOPS threatened species must be reported within two working days after the listed species was hunted, the hunt terminated or in the case where the hunt was not successful. This office reserves the right to inspect the hunting sight or any relevant product of such hunt.
10. In the case where trophies will not be exported from RSA the permit holder must immediately apply for a TOPS Possession Permit in the case of TOPS species
11. Elephant tusks must be marked by an Environmental officer
12. A TOPS Ordinary permit is required to convey any part of any TOPS specie hunted to any facility within the country, except a taxidermy
13. The Department may require scientific information or material from the animal hunted.
14. The non-compliance with the permit details as well as these special conditions will result in criminal charges and may influence the granting of similar permits to the permit holder.
15. Issued in terms of the Limpopo Environmental Management Act 2003, Act no. 7 of 2003.
16. An elephant/ crocodile may not be hunted next to the waters edge of an international border
17. In the case of dangerous game the minimum calibre requirement is a 375.
18. This permit does not absolve the applicant from conforming to the norms and standards for hunting
19. No put and take system of hunting is allowed
20. No animal may be hunted in a controlled environment
21. The use of dogs may only be used to flush birds or track wounded animals
22. All international clients must be accompanied by a PH
23. In the case of RSA clients , trophies or derivatives may not be sold, donated or exported from the borders of RSA
24. The hunt must take place within the requirements as set out in the hunting protocols for the APNR
25. The Department reserves the right to monitor or attend any hunt within the APNR

RHINO

26. The Department must be informed 48 hours before the hunt takes place and a representative of the Department must be present during the hunt.
27. The horns may not be separated from the rest of the trophy.
28. The horns must be microchipped on the property where the hunt took place, unless already microchipped.
29. The PH register must be completed and signed immediately after the hunt.
30. The hunting permit and the copy of the PH register must accompany the trophy when being transported between destinations

LARGE PREDATORS

31. No large predator may be hunted if released in an area adjacent to a holding facility for large predators
32. May not be hunted by means of bait except in the case of leopard and hyena where dead bait may be used
33. May not be lured by sound or any other induced luring method to be hunted
34. May not be hunted in an enclosure and in the case of lion of 1000 ha and release at least 24 hours before the hunt
35. The use of a spot light may only be used in the case of hunting leopard and hyena.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Taunton	Oscar	David	Jr

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
			(b) (6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Argyle	Texas	76226	Denton	USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions (50 CFR 13.11(d)).
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

David Taunton (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana, African bush elephant

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

South Africa, Mpumalanga, Hoedspruit,Timbavati Private Nature Reserve
GIS -24.3879921 31.3372014

b. Date wildlife was hunted:

May 6, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Madubula Safaris Pty Ltd, John Abraham

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Life Form Taxidermy. 7 Aluminium Street, White River, South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Cecil Cunningham
Business Name:	Life Form Taxidermy
Address:	7 Aluminium Street
City:	White River, Mapumalanga
State/Province:	South Africa, 1240
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

No

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

License fees were paid directly to MTPA (Mpumalanga Game Department) by the Outfitter. Trophy fees were paid to the Reserve by the Outfitter, these fees were used to fund the AntiPoaching Unit and Anti Poaching efforts in the area. Part of the trophy fees were also utilized for conservation of the remaining population. These include active patrols in the area, maintaining of access roads, perimeter roads, suitable watering points and payment of salaries. The TPNR (Timbavati Private Nature Reserve) has a scientific approved management plan in place for elephants and is strictly controlled by the Kruger National (Park hunting protocol

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The safari outfitter is also the Professional Hunter and has been actively involved in the conservation not only of Elephant but also of other species for the past 27 years. He has a track record of funding conservation and anti poaching efforts in the Province on a number of reserves including the Venetia Limpopo Nature Reserve, Klaserie Private Nature Reserve and Timbavati Private Nature Reserve.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: [redacted] Date: 09/03/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Same as page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   David J. Hessler, (b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

[X] No [ ] Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

      Loxodonta africana africana

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

      N/A

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

      Namibia, Mashi Conservancy, Katima Mulilo

   b. Date wildlife was hunted: November 9, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Omujeve Safaris / Gideon Cloete

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Omujeve Safaris / Ongombo West Section 2 / Number 56 / Windhoek, Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). SEE ATTACHED PERMIT NO. 175919

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].
Name: Gideon Cloete
Business Name: Omujeve Safaris
Address: Ongombo West Section 2 / Number 56
City: Windhoek
State/Province: Namibia
Country, Postal Code:

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

SEE ATTACHED STATEMENT: Namibia Elephant Fact Sheet - 2018

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Approximately $55,000. Over half of the funds are reinvested into the community area to employ anti-poaching units, arm/train anti-poaching units, provide employment to locals and establish water points for the surrounding wildlife to utilize.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

The funds go to the people of the Mashi Conservancy to provide income and support the financial needs of the conservancy. The conservancy working with the outfitter established work programs/employment to over 25 people, who otherwise would have very little opportunity. These opportunities allow for people to earn a living working in the safari industry vs. turn to poaching and illegal hunting of all species, including elephants, for revenue.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

    Applicant's signature: (b) (6) _____ Date: 9-7-2018

    David J. Hessler

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

No trophy hunter may hunt unless accompanied by a professional hunter, master hunting guide or hunding guide.

This permit must be kept on the person of the permit holder at all times while hunting.

Only guide(s) as specified on the permit may conduct the hunt.

Namibia Elephant Fact sheet- 2018

Namibia's total elephant population has increased from an estimated 7500 in 1995 to 22711 in 2017 based on Namibian Ministry of Environment and Tourism study. This represents a 5.1% increase in population each year. It is important to note that these numbers include the impact of both legal and illegal offtakes. Namibia cannot support more elephants than its current numbers meaning the relocation to neighboring countries and offtake must offset exiting growth estimates. 2017 legal offtake numbers were 175 which still allowed for increase in total numbers of over 1400 if the 5.1% average increase was maintained. Relocation to neighboring countries is revenue negative and must be funded. If legal offtake at current rates is increased, significant funding could be used to provide relocation services and prevent overpopulation which degrades habitat for all wildlife and is not sustainable. Total relocation and offtake numbers should be in the area of 1000 elephants per year to maintain current population levels. If a conservative legal offtake of 250 elephants is used, the estimated increase in conservancies is US$ 1,937,460.

Dear Mr. Hessler:

Your application was received September 14, 2018, and is currently being reviewed.

As background, on March 1, 2018, in response to a D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service (Service) informed the public that it is revising its procedure for assessing applications to import certain sport-hunted species. We have withdrawn our countrywide enhancement findings for a range of species across several countries, including elephants and lions. In their place, we intend to make findings for trophy imports on an application-by-application basis.

The Service is continuing to monitor the status and management of these species in their range countries. We will review each application received for import of sport-hunted trophies and evaluate the information provided in the application as well as other information available to us regarding the status and management of the species to ensure that the hunting program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized.

Respectfully,

George D. Villavicencio

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Amy Wicklund Phone: (b) (6) Email: info@legendstaxidermy.com

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta africana

b. Sex (if known). unknown

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Hunting Area: Sango Ranch-Save Valley Conservancy, Bikita, Masvingo, Zimbabwe. Nearest city is Masvingo.

b. Date wildlife was hunted:

August 25th 2017 through September 8th, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Zambezi Hunters

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Trophy Consultants International 4 Josiah Chinamano Road Belmont Bulawayo Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). see attached copies

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	Trophy Consultants International
Address:	Trophy Consultants International 4 Josiah Chinamano Road
City:	Belmont
State/Province:	Bulawayo
Country, Postal Code:	Zimbabwe

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Please see attached

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Please see attached

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Please see attached

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: Hans J Thumlert Date: 9/11/18

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

SPECIAL POWER OF ATTORNEY

I, the undersigned **MIGUEL** (b) (6) **SAENZ**, passport number (b) (6) residing in (b) (6) ; hereby authorize **LEGENDS TAXIDERMY STUDIOS** to submit on my behalf the Federal Fish and Wildlife Permit Application Form # 3-22-20 for my Elephant.

This document shall be construed and interpreted as a limited and special power of attorney which is valid only for the purposes and entity stated herein and may not be uses for any other transaction or by any person not named.

Please see below.

9(a) Sango Ranch is a member of the larger Save Valley Conservancy in south eastern Zimbabwe which covers an area of over 650,000 acres (of which Sango is 160,000 acres) with no internal fencing so the elephant and other wildlife are free to roam the extent of the conservancy. The Save Conservancy developed an elephant Management Policy in 2007 with USFWS funding and since then has seen the elephant population steadily increasing from an estimated 1018 (2007) to just under 2000 (2017). Chart below is up to 2013 when, due to the reduced income for properties from permit issues, full SVC aerial surveys were stopped.

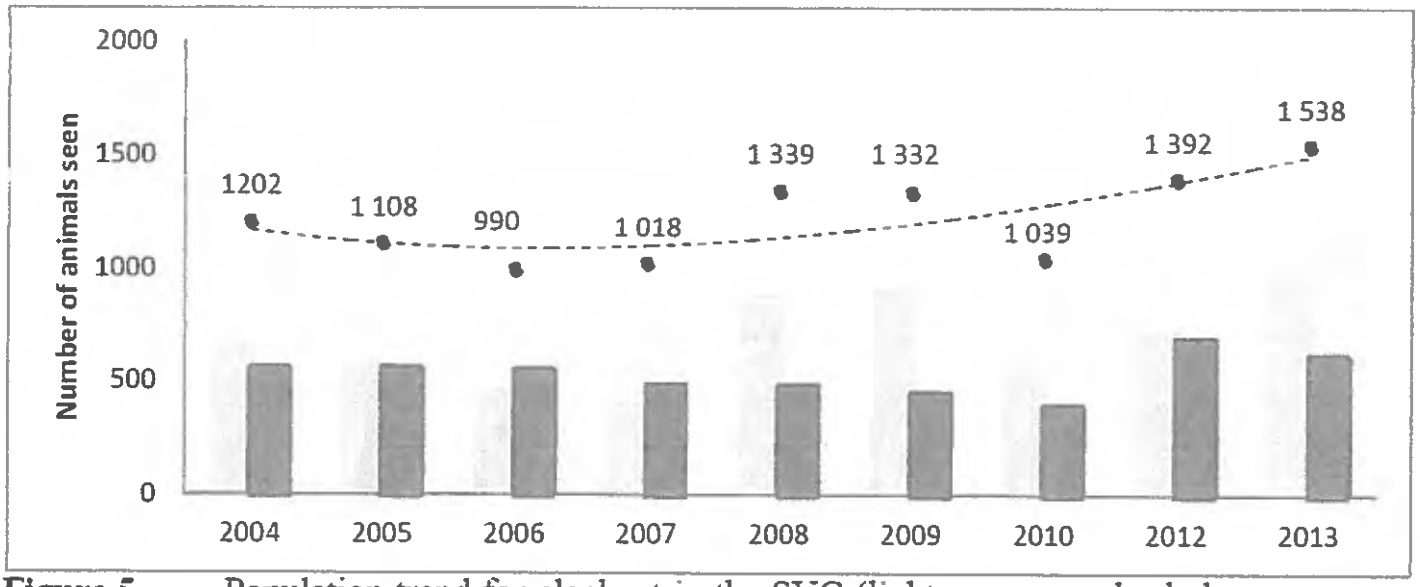

Figure 5 Population trend for elephant in the SVC (light-grey – north: dark-grey – south).

9b The fee paid by client to shoot the elephant is USD19,500.00 and was used to cover the conservation costs of managing Sango Ranch. The income does not cover full costs of running the property and the owner has to supplement.

9c The owner of Sango Ranch supplements the ranch income with a further US$300,000 – 400,000 annually to ensure effective management of the wildlife populations. The Save Conservancy has a population of over 100 black rhino of which over 50% occur on Sango at any one time. This requires high levels of security to ensure adequate protection which benefits all other populations including elephant. There is currently an estimated over abundance of elephant in the SVC and there is a permit for the live sale of 120 elephant to be removed from Sango ranch to be taken to the Zambezi Valley.

Hope this will help.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country).

Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Namibia, Caprivi, Omujeve Safaris region
   b. Date wildlife was hunted: August 18, 2018

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): Tusks and back skin

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Omujeve Safari
POBox 9453
Windhoek Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Corne Kruger
Business Name: Omujeve Safari
Address:
Address: POBox 9453
City: Windhoek
State/Province: Namibia
Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy,** please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Coppersmith Global logistics
114 Southfield Parkway Suite 170
Forest Park, GA 30297

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

Bryan Gorhan
(b) (6)
Tuscaloosa AL 35406 (Envelope included for mailing permit)

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Bryan Gorhan
(b) (6)

12. **Disqualification Factor**. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☒ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

The following is a list of how Trophy Elephant hunting in Nambia helps to preserve the Elephant population.

1. A significant part of the trophy fee goes directly to elephant conservation
2. Preservation of elephant herds require vast amounts of land to provide adequate forage. Hunting concessions allows for large expanses of land that is mostly uninhabited, is not farmed and no cattle grazing.

3 Trophy Elephant hunting only allows for the taking of old bulls who are usually on their last set of teeth and would be faced with starvation within 10 years. Allowing a value to be placed on the older bulls provides for herd protection from poaching as the Hunting concession actively seeks the help of the local people to prevent poaching.

4. Hunting concessions provide much needed meat to the local tribal people.
5. Hunting concessions provide jobs for local tribal people By adding value to an animal the local people view as destructive and harmful to their tribe, the elephant is then protected from poisoning.
6. Careful monitoring of the. Elephant herds by Hunting concessions along with the Government game scout provides for accurate numbers to control over hunting.

7 The Hunting outfitter is a native Namibian who resides in Namibia so all profits are kept in Namibia and add to the Namibian economy and therefore supports stability of the area elephants inhabit

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
GALLMANN	KAREN		

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			matt@genuslogistics.com

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
ANGELICA	NY	14709		US
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   GENUS LOGISTICS 161-15 ROCKAWAY BLVD ST 205 JAMAICA NY 11434 SASE INCL FEDEX / MATT MAYERS

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   MATT MAYERS 718 790 0216 MATT@GENUSLOGISTICS.COM

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA, ELEPHANT

b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

SOUTH AFRICA, FARM BLINKWATER

b. Date wildlife was hunted:

10/21/2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

MPC BARNBERGER
PO BOX 286
LEPHALALE SOUTH AFRICA 1555

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

MPC BARNBERGER / WARTHOG SAFARIS
PO BOX 286
LEPHALALE SOUTH AFRICA 0555

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). PH REGISTER,

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	MPC BARNBERGER WARTHOG SAFARIS
Address:	PO BOX 286
City:	LEPHALALE
State/Province:	
Country, Postal Code:	SOUTH AFRICA 0555

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

    Applicant's signature: _____ Date: _____

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Ms. Nelson,

Please find the attached Notices of Representation for applicants, Karen Gallmann and Brett Parker.

Ms Gallmann has import permit applications for a lion and an elephant from South Africa.

Mr. Parker has an import permit application for a lion from South Africa.

Please let me know that you have received these documents and if you have any questions.

Thank you,

Aimee Korver

OMB Control No. 1018-0093
Expires 08/31/2020

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

James A. Kesteloot
(b) (6)
[redacted]

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Jim Kesteloot
(b) (6)
[redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

[X] No [ ] Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   African Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   Namibia - Zambezi Region
   Caprivi Strip
   Sobbe Conservancy
   Nearest City :Katima Mulilo, Namibia

   Sobbe
   Conservancy
   S17 56.061 • E023 44.125

   b. Date wildlife was hunted:

   April 30, 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Ndumo HuntingSafaris - Owner Karl Stumfe
Professional Hunter - Fred Bezuidenhout
+264 811 285 416

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Pronto Air & Ocean Freight
PO Box 11388, Klein Windhoek / B1 Hwy North, Plot 42, Brakewater Windhoek
Peter de Villars - +264 614 02993 - +264 81657 4666

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). License Attached - # 177996

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Peter de Villars
Business Name: Pronto Air & Ocean Freight
Address: PO Box 11388, Klein Windhoek / B1 Hwy North, Plot 42, Brakewater Windhoek
City: WIndhoek
State/Province: Namibia
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Population is Stable to a 6% increase in the
population.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

$20,000.00 in trophy fees to the Sobbe Conservancy

$ 5,000.00 to the Anti-Poaching Team

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

-15 Sobbe Conservancy Jobs were created and are employed as a result of my Safari.
-100 % of the Meat was donated to the Sobbe Conservancy Community.
this feeds the whole Sobbe village and gives them much needed protein.
-$5,000.00 went to the Anti-Poaching team.
This helps fund the costs of transportation, Food, and necessary equipment to support the
much needed Anti-Poaching Teams

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that I may only import two l

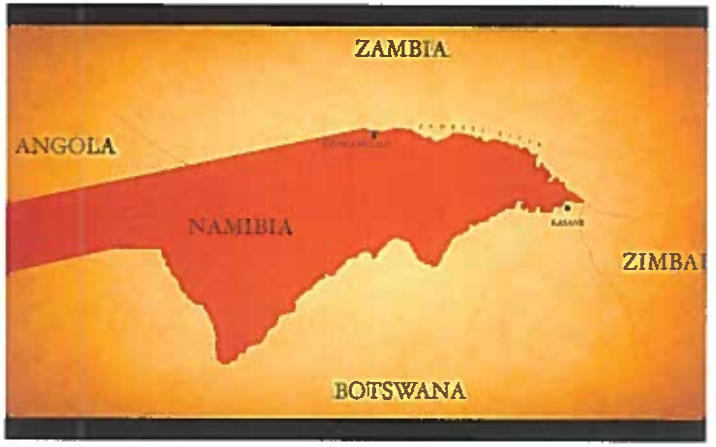
Caprivi Safari



James A. Kesteloot
Caprivi Safari

One of the Villages in the Sobbe Conservancy

James A. Kesteloot
Caprivi Safari

One of the Villages in the Sobbe Conservancy.
Every morning would start with a visit to the village to see if the "problem" Elephant had come in the night.

The older Male Elephants destroy the Village crops, forcing the villagers to build fires and post guards to try and keep the problem elephants out.

James A. Kesteloot
Caprivi Safari

The local Village Farmers would try different methods to try and keep the elephants out of their crops.
This picture shows how they use wire with pop cans to make noise hoping to scare the elephants out. The noise also lets the farmers know the elephants were back.

In many cases the villagers would shoot at the problem elephants with 00 buck shot to try and scare them off.
Sometime this would work, however the elephants come back in a few days or a few hours.

James A. Kesteloot
Caprivi Safari

Professional Sobbe trackers looking for the specific tracks of the problem elephant.

Listen was the local Game Ranger that was there to oversee the entire hunt.

James A. Kesteloot
Caprivi Safari

After 16 days of hunting the problem elephant, our paths finally crossed.
As you can see 20 plus villages were there to help process and distribute the meat to the village.

Very Happy Sobbe Village.
The elephant that kept getting into their crops was finally taken care of and they received 100% of the meat.

In Summary:

- $20,000.00 trophy fee for 1 elephant went to the Sobbe Conservancy; plus additional trophy fees for other animals taken.
- The Sobbe Conservancy received 100% of the meat.
- This took care of a problem Elephant that otherwise would destroy village crops and possibly hurt someone.
- More that 15 Sobbe people have jobs as a result of my and all other safaris in this area. (Trackers, Skinners, Cooks, Kitchen, Cleaning help, etc.)
- $5,000.00 from my safari goes to the anti-poaching group that protects the wildlife from poachers.

Shipping – Packing List - Contact Information

Hello,

I sent the attached application in February 2, 2019.

I never received an acknowledgement or permit number back from your SPITS System.

This was for a Leopard from Tanzania in July 2018.

Check number #5316 cleared on March 19, 2019. (also attached)

This was during the shutdown and was sent in regular mail.

I currently have an Elephant permit # 09890D from September 2018.

Also, just received my Mozambique Leopard permit # 34627D today.

(3-25-19) This was for my Leopard from September 2018.

In Summary, I currently have 3) application permits in with you.

1) Elephant Namibia 2018
1) Leopard Tanzania 2018
1) Leopard Mozambique 2018

Can you please send me the Permit # for the above and attached.

(b) (6)

Also, if I could get a status on the Elephant I would appreciate it.

Thank You

James A. Kesteloot

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

James Arthur Kesteloot

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 0 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: 0 (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life-size mount, claws, horns, tusks). Full Leopard

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted: Salambala Farm (Closest Town Katima Mulilo), NAMIBIA
   9-9-2016

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

   Full

   d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   Reisner Taxidermy
   Windhoek, Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business	JAPSIE BLAAUW
Name: Address:	OMUJEVE SAFARIS
Address:	ONGOMBO WEST SECTION 2, NUMBER 56
City:	Windhoek
State/Province:	NAMIBIA
Country, Postal Code:	

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

   I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

   Taxidermist/Broker's signature:_____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: Rosella Quartarone for Scott N. Roberts (POA) Date: 12-27-2017

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

SEE ATTACHED PREPAID FEDEX LABEL TO: Safari Specialty Importers, 758 Sheldon Rd, Wallkill NY 12589

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Rosella Quartarone, SAFARI SPECIALTY IMPORTERS
845-943-5943 or eMail info@safarispecialtyimporters.com

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
McCann	Matthew		

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			matt@genuslogistics.com

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

(b) (6) [redacted] #, Suite #, or Room #, no P.O. Boxes)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Richfield	OH	44286		US

2.a. Mailing address (include if different than physical address, include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   GENUS LOGISTICS 161-15 ROCKAWAY BLVD ST 205 JAMAICA NY 11434 SASE INCL FEDEX / MATT MAYERS

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   MATT MAYERS 718 790 0216 MATT@GENUSLOGISTICS.COM

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA, ELEPHANT

b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

SOUTH AFRICA, HOOGGENOEG 184 JS MIDDLEBURG

b. Date wildlife was hunted:

8/1/2016

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

HERCULES OLIVER
341 KLIPRIVER
MIDDLEBURG SOUTH AFRICA 1050

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

BULLS EYE TAXIDERMY
OPEN SEASON FARM, CORNER
MELKRIVER AND STERKSTROOM ROAD
VAALWATER 0530 SOUTH AFRICA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). PH REGISTER, MPUMALANGA ELEPHANT HUNT PERMIT

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	BULLS EYE TAXIDERMY
Address:	OPEN SEASON FARM, CORNER
City:	MELKRIVIER AND STERKSTROOM ROAD
State/Province:	VAALWATER 0630
Country, Postal Code:	SOUTH AFRICA

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: 8/25/19

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if I the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982.

Re: Applications for Permits to Import Sport-Hunted Trophies

Dear Acting Chief:

Enclosed please find three applications for permits to import sport-hunted trophies.

- The first applicant is hunting an elephant on a Game Management Area in Zambia. Funds from the hunting are used for community support and anti-poaching. Fifty percent of the animal fees are directly shared with the resident community, and at least 50% of the harvested game meat is shared with the community. This area maintains healthy populations of elephant and other species. Please consider the enclosed information and information in the DMA's files regarding the benefits of elephant hunting in Zambia, including the Non-Detriment Findings and responses to information requests, in making a positive enhancement finding for this applicant.
- The second applicant is hunting a lion in the Lower Lupande Game Management Area in Zambia, with Werner van Noordwyk/Kwalata Safaris. That area has a healthy lion population. The company invests extensively in anti-poaching (>$57,000/year), pays the salaries of community game scouts, and distributed $27,500 in game meat to the community, among other things. The company is contractually bound to fund community projects of at least $15,000/year. Please see the attached report, which was previously provided to the DMA. We will send an updated report soon. Please consider this report and other information received from Conservation Force and Zambian authorities and operators in making a positive enhancement finding for this applicant.
- The third applicant hunted an elephant at the Save Valley Conservancy in Zimbabwe. Conservation Force and Zimbabwe's Parks and Wildlife Management Authority have submitted extensive documentation about the healthy elephant population in SVC and the benefits generated by regulated hunting. Please refer to that information, including the October 2016 Non-Detriment Finding and January 2016 report (related to the African lion) and describing the SVC's strong wildlife management. Please also see the attached declaration from Wilfried Pabst. This declaration ended up not being submitted in court, but it remains a sworn statement that reflects the healthy elephant population at SVC. Please consider all this information in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my application for a permit to import a threatened-listed, wild-managed African Elephant.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my elephant trophy at the following address:

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

SAME

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

JIM LESSIG (b) (6) [redacted]

(b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   LOXODONTA AFRICANA
   b. Sex (if known).
   MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   ZAMBIA - LUAWATA HUNTING BLOCK
   GPS CO-ORDINATES S12.40783 E032.17170

   b. Date wildlife is to be hunted:
   JULY 7, 2018 – JULY 20, 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   SITATUNGA RANCHING & SAFARIS LIMITED

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: AADIL DAYA
Business Name: SITATUNGA RANCHING & SAFARIS LIMITED
Address: P.O. BOX 39498, PLOT #7301, KAMBALA ROAD, LIGHT INDUSTRIAL AR
City: LUSAKA
State/Province:
Country, Postal Code: ZAMBIA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?
350 - 800 ELEPHANTS

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
? AMOUNT. THE COMMUNITY & GOVERNMENT RECEIVE PART OF THE FUNDS. COMMUNITY USES FUNDS TOWARDS IMPROVING SCHOOLS, CLINICS, ETC. GOVERNMENT & SAFARI OPERATOR USE FUNDS TOWARDS GAME MANAGEMENT, SCOUT SALARIES, REHAB OF ROADS & ANTI-POACHING.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
THE SAFARI OPERATOR HAS EMPLOYED ADDITIONAL GAME SCOUTS FOR ANTI-POACHING & IS SOLELY FUNDED BY OPERATOR. THE OPERATOR SINKS BOREHOLES FOR THE COMMUNITY IN STRATEGIC LOCATIONS WITHIN THE COMMUNITY. THE & OPERATOR GIVES MEALIE MEAL, CLOTHING & BLANKETS TO ABOUT 3,000 FAMILIES PER YEAR

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;

(2) Was legally obtained by the hunter through hunting for his or her personal use;

(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and

(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:

(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;

(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and

(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
   Applicant page one.

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No ✓ Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   ELEPHANT

   b. Sex (if known). MALE / BULL

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted: 08/01/2015 – 08/14/2015

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   ZIMBABWE
   SAVE CONSERVANCY
   SANGO LODGE, MASVINGO PROVINCE

   b. Date wildlife was hunted: 08/01/2015 – 08/14/2015

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:
   ZAMBEZI HUNTERS, THIERRY LABAT, PH.

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

   Name:
   Business Name: ZAMBEZI HUNTERS
   Address: 2 PECKHAM Rd. NEW IANDOS ~~AVE~~
   City: NEW IANDOS, ~~AVE~~. HARARE ZIMBABWE
   State/Province: MASVINGO
   Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. DECLARATION OF SAVÉ VALLEY CONSERVANCY
IN SUPPORT OF MOTION TO INTERVENE

I, Wilfried Pabst make the following declaration in support of the attached Motion to Intervene.

1. I make this declaration based upon my personal, first-hand knowledge.

2. I make this declaration on behalf of Savé Valley Conservancy ("SVC"). I own the Sango Ranch, one of the properties that together form the conservancy. I am involved in all aspects of operating SVC and decision-making related to the management of habitat and wildlife, poaching control, community investment, research, and similar issues.

3. SVC is one of the largest private game reserves in Africa. It is in the South East Lowveld of Zimbabwe and provides approximately 3,500 km^2 of diverse wildlife habitat for healthy populations of elephant, lion, leopard, buffalo, rhino, and rare African Wild Dogs.

4. SVC consists of privately-, government-, and community-owned properties aligned under a constitution to manage animal populations on a landscape scale. Each property operates its own tourist lodges offering different types of accommodations in varied ecological settings. While

predator spoor count is conducted as well. A Technical Advisory Committee recommends evolving best wildlife management practices.

8. SVC's anti-poaching efforts are extensive. Approximately 200 game scouts patrol the various ranches to pick up snares and keep meat poaching under control. A special team of 30 to 40 highly-trained scouts, the Special Species Protection Unit (SSPU), combats elephant and rhino poaching specifically. Annual anti-poaching expenses (ranger salaries, training, vehicles, equipment, petrol, and other necessities) are almost $500,000. We hope to expand the SSPU to 50 individuals at the cost of another $100,000 per year.

9. In the past 25 years, SVC's elephant population has quadrupled from the original, translocated individuals. The population is estimated at 2,200. Elephant management is guided by an adaptively-implemented plan incorporating regulated hunting to achieve management targets. The annual hunting quota is seven elephants, representing only 0.3% of the population. Those few hunts generate significant revenue that is reinvested in management and protection, including for the large black rhino population, which is not currently hunted.

10. After SVC was established and as ungulate populations increased, lion began to re-colonize the conservancy and thirteen lions were reintroduced, including ten on Sango ranch. After an initial lag period, the population has flourished. Annual monitoring began in 1999. Since 2007, annual monitoring is conducted using track index surveys in a research project co-sponsored with the African Wildlife Conservation Fund. In 2011, those survey results were verified using a baited call-up. Prey availability models suggest SVC's carrying capacity for lion is approximately 271. The 2015 population was estimated at 284. This suggests lion have reached the ecological carrying capacity, even though responsibly hunted.

and schools, providing computer equipment, etc. SVC entered into an agreement with local Chiefs to share revenues from regulated hunting and sales of game meat.

16. Over 90% of SVC's hunting clients are U.S. citizens—and this percentage is 100% on some properties. SVC relies on these U.S. clients to fund its extensive anti-poaching efforts and science-based elephant and lion management. At least three U.S. hunters have applied for permits to import lion or elephant trophies hunted in SVC in 2015, 2016, and 2017.

17. SVC's revenues will decline if elephant and lion trophies are not importable into the U.S. Consequently, its excellent management efforts will suffer. The quotas will not change (and did not change when the U.S. Fish and Wildlife Service suspended the import of elephant trophies from Zimbabwe or listed the lion as threatened under the U.S. Endangered Species Act). However, the willingness of U.S. citizens to pay premium prices was reduced by these policy decisions, and in turn, SVC's revenues were reduced. These revenues will be cut further if imports remain closed. Unfortunately, the conservancy's elephant, lion, rhino, and other wildlife populations will pay the price if anti-poaching efforts and community investment and conflict mitigation expenditures must be reduced as well.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Re: 60 day notice of intent to sue for failure and refusal to process elephant trophy import permit applications.

Dear Ladies and Gentlemen:

This is a 60-day Notice of Intent to Sue under the Endangered Species Act, 16 U.S.C. Sec. 1531 et seq. ("ESA"), for failure and refusal to process elephant trophy import permit applications in violation of the Administrative Procedures Act, 5 U.S.C Sec. 553 et seq. ("APA"), the Rules and Regulations of the Department implementing the ESA, *see* 50 CFR Part 17, the Special ESA Elephant Regulations, 50 CFR 17.40, regulations implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora, Mar. 3, 1973, 27 U.S.T. 1087 (hereinafter "CITES"), *see* 50 CFR Part 23, and the general permitting regulations of the United States Fish and Wildlife Service ("USF&WS" or "Service"), *see* 50 CFR Part 13.

This notice is on behalf of Dallas Safari Club ("DSC"), their members who desire to engage in trophy sport hunting of African elephants, outstanding elephant trophy import applicants, DSC conservation partners, including Sango Safaris, the Namibia Ministry of Environment and Tourism, the Namibian Association of CBNRM Support Organisations ("NASCO"), and the individual permit applicants set forth on Attachment A to this letter.

The African elephant (*Loxodonta africana*) is listed as threatened under the ESA and is regulated under an ESA section 4(d) special rule [50 CFR 17.40(e)]. The 4(d) special rule lists the requirements for the import of sport-hunted trophies. Under paragraph 17.40(e)(6)(i)(B), for the USF&WS to issue a threatened species permit under 50 CFR 17.32, authorizing the import of a sport-hunted elephant trophy, the Service must make a determination that the killing of the trophy animal will enhance the survival of the species.

Pursuant to the APA, the Service is required to process these permit applications and make a decision on them within a reasonable time. 5 USC 558(c). 50 CFR 13.11 provides

that permit applications will be processed "as soon as possible." And 5 USC 706 provides for judicial review of "agency action unlawfully withheld or unreasonably delayed." Moreover, the delay is denial without appeal in violation of 50 CFR 13.29 or judicial review, *see* APA section 706. The delay also conflicts with the duty the Service has under the ESA to recover the listed species and the enhancement that the permitting would encourage, thus violating 16 U.S.C. 1533(f) and 16 U.S.C. 1540.

A "hold" has been put on the processing of all elephant trophy import permit applications since November 2017 after President Trump issued two "tweets" on 17 and 19 November 2017 on his Twitter account @realDonaldTrump. The effect of this hold following the President's tweets has been to injure conservation efforts designed to protect the African elephant. This hold is further injurious to the people of the countries the elephants inhabit as the local population benefits from controlled sport hunting of elephants, a fact the Service has previously acknowledged.

Although positive enhancement determinations for Zambia and Zimbabwe were made immediately before the "hold" in November 2017, Namibia and the Republic of South Africa enhancement findings were neither new nor disputed. The positive enhancement determination for Zambia had not been suspended. By any standard, the countries of Botswana, Namibia, South Africa, Tanzania, Zambia and Zimbabwe have done nothing to deserve this mistreatment, and breach of treaty, law and regulations. A "tweet" is not a proper rule making. Moreover, this hold has been extended to all elephant trophy imports including from countries where the Service had longstanding positive enhancement findings that were the "gold" standard.

Subsequently, on March 1, 2018[1], the Service issued a memorandum in response to the D.C. Circuit Court's opinion in *Safari Club Intl., v. Zinke*, 878 F.3d 316 (D.C. Cir., 2017) which withdrew enhancement findings, including the enhancement findings for Zambia and Zimbabwe, and stated that

> All of the above referenced findings are no longer effective for making individual permit determinations for imports of those sport-hunted ESA-listed species. However, the Service intends to use the information cited in these findings and contained in its files as appropriate, in addition to the information it receives and has available when it receives each application, to evaluate individual permit applications. The Service is continuing to monitor the status and management of these species in their range countries. At this time, when the Service processes these permit applications, the Service intends to do so on an individual basis, including making ESA enhancement determinations, and CITES non-detriment determinations when required, for each application. The Service intends to grant or deny permits to import a sport-hunted trophy on a case-by-case basis pursuant to its authorities under the ESA and CITES.

[1] https://www.fws.gov/international/pdf/memo-withdrawal-of-certain-findings-ESA-listed-species-sport-hunted-trophies.pdf

> As part of the permitting process, the Service reviews each application received for import of such trophies and evaluates the information provided in the application as well as other information available to the Service as to the status of and management program for the species or population to ensure that the program is promoting the conservation of the species. Each application must also meet all other applicable permitting requirements before it may be authorized.

This determination was not made as the result of the rule making proceeding ordered by the court in *Safari Club Intl. v. Zinke,* and would appear directly inconsistent with the court's opinion. Nonetheless, despite the statements contained in the Service's March 1, 2018, memorandum, all elephant import permits have remained on "hold." This is true for pre-act elephant trophies and renewal applications for elephant trophy import permits predating the "hold." The Service is not processing elephant import permits on a case by case basis or on any basis whatsoever. This lack of action is contrary to the law and applicable regulations.

The Service is unlawfully employing the "hold" on elephant trophy import permitting to elephant trophy imports from all countries, and even to the simple renewal of elephant import permits and to pre-act elephant trophies. The "hold" has been applied unlawfully to the detriment of the very best and most successful elephant management programs in Africa. The broadly applied "hold "was not a duly noticed and made rule making, was arbitrary, capricious and irrational, and greatly threatens the elephant and range nation programs the ESA and CITES aim to encourage and enhance. Indeed, the "hold" jeopardizes and obstructs years of conservation activities in Southern and a substantial part of Eastern Africa.

Tanzania, Zambia, Zimbabwe, Mozambique, Botswana, Namibia and South Africa hold an estimated 340,000 elephants out of a continental total of 415,000, i.e. 82 per cent of the elephants of Africa. The conservation success of these countries is linked to policies incorporating sustainable use of natural resources, based on science and aiming at improving livelihoods of rural communities while maintaining vast tracts of unspoiled habitat and ecosystems.

The tolerance by the rural citizens of Southern and Eastern Africa of elephants is increased through hunting revenue sharing systems in place throughout the region. The presence of substantial herds of elephants risk serious devastation of the crops on which the rural African population depend. Without the revenue generated by sport trophy hunting, the population would view the elephant more as pests than as a natural resource. Moreover, overpopulation of elephant threatens the habitat of other threatened species. *See* Statement of Sango Safaris, Attachment B.

The "hold' obstructs 70 per cent of the revenue of the Community Conservancy Program in Namibia. All tourist safari hunting of elephant occurs in community

conservancy areas. Likewise the hold obstructs the same percentage of the revenue of the 700,000 families which depend on the CAMPFIRE Program in Zimbabwe. The "hold" undermines the community Wildlife Management Areas in Tanzania that are intended to provide incentivizing livelihoods to rural communities and to act as corridors for elephant and other species between protected areas. The "hold" obstructs the community program in Zambia which largely relies upon tourist safari elephant hunting. The "hold" largely blocks the developing elephant conservation strategy in Botswana that recently has lifted the suspension of tourist safari hunting. Tourist safari elephant hunting had previously been 70 per cent of community revenue in that country.

Therefore, the "hold" is jeopardizing conservation efforts in these countries and threatens the livelihood of more than one million persons and the biodiversity of millions of hectares of pristine wilderness. Without the management and revenues from tourism hunting, these lands are being encroached and converted to agro-pastoral land, leading to the unavoidable extinction of wildlife and natural habitats, and the collapse of ecosystem services.

The successful elephant conservation as well as the control of poaching largely depend upon the sustainable use conservation strategy in the form of elephant tourist safari hunting in each of these countries. The elephant populations and programs in these countries cannot be sustained without the revenue generated by safari hunting and U.S. import of the trophies; hence the "hold" is *the* major threat to the survival of the largest remaining elephant populations in Africa. Hundreds of thousands of elephants are in jeopardy and more than a million families are being deprived of the realization of their single most valuable natural resource because of this illegal "hold."

Finally, tourist safari hunting of elephant is governed by sound administrative systems in all countries that include scientific based quotas supported by CITES non-detriment findings, law enforcement largely funded or carried out by safari hunting operators on the largest share of wild habitat, regulatory permitting, and community-based conservation programs, most of which was supported by over one-hundred million dollars of USAID funding because of its conservation and humanitarian merit.

In conclusion, on behalf of DSC, its members, outstanding elephant trophy import applicants, and DSC conservation partners, and for the reasons stated in this notification, we intend to sue under the Endangered Species Act for failure and refusal to process elephant trophy import permit applications.

Respectfully,

Scott Tobermann
DSC President

Attachment B

STATEMENT OF SANGO SAFARIS OF SAVE VALLEY SAFARIS, ZIMBABWE

Sango Safaris represents a 60,000 hectare property, situated within the Save Valley Conservancy ("SVC") in the South Eastern Lowveld of Zimbabwe.

The annual 2018 aerial survey, carried out every September/October for the past 20 some years showed a population of 665 elephant on Sango last year. As an average in recent years we have from 600 to over 900 elephants on Sango at any given moment. Our ecologically established carrying capacity ranges between 200 to 300 elephants. Therefore, we have at any given moment between 400 to 700 too many elephants on Sango with devastating destruction not only to the food base of the species causing the destruction but with dire consequences for all other plains game animals.

For example the Elephants' destruction as well as decreasing rains have resulted in our zebra and wildebeest herds dropping from 1,500 to 2,000 to around 600 of each species today. Similar numbers are experienced for all other grazers. Aerial Survey numbers for elephants on Sango since 2009 are as follows:

No. Elephants	Year
654	2009
462	2010
393	2012
648	2013
474	2014
497	2015
949	2016
684	2017
665	2018

The latter shows a current density of 1.1 elephant per square kilometer, whilst the recommended density is 0.2-0.3 per square kilometer for the dry Savanna areas we occupy.

The continued high density of elephant has and is having a very negative affect on Sango's habitats. For example the baobab trees of which we have an abundance are often hundreds if not thousands of years old. Approximately 90 per cent of all of our baobab trees are now suffering damaged by elephants. If this remains unaddressed Sango will have lost all its baobab trees in a matter of a few years.

Sango practices "sustainable utilization" and is proactive in the use of its excess animals, which income funds our further conservation efforts. To this end, Sango moved 100 live elephants to reduce their numbers and to help restock the Zimbabwe National Parks area in 2018. Such translocation solutions do not exist regularly as most national parks and private conservancies within a survivable translocation distance from Sango are overstocked with elephants as well.

The annual elephant hunting quota amounts to three older bulls for Sango and seven in total for the SVC. All funds generated from hunting flow fully towards running, protecting and maintaining the property and specifically its wildlife assets and the underlying habitats. This includes employment for 135 local people (44 of whom are anti-poaching scouts) provision of water for wildlife, fire breaks, road and infrastructure maintenance and a full time ecologist.

Sango forms the largest single property within the SVC. The most recent SVC elephant numbers are from a 2017 Aerial survey, (2,390 km2 of operating properties) and showed that SVC was home to 2038 elephants. This is an average of 0.85 elephant per km2 when the recommended density is 0,2-0,3 Km2. As per above formula this implies that we have approximately 1,500 elephants too many. However, we believe that the total elephant population in the SVC amounts presently to some 2,500 animals.

Elephant safaris bring in between $60 - 70,000 for each elephant. WWF recommends a trophy hunting quota of 0.75 per cent of an elephant population whilst we are not even hunting half of that quota. So the SVC and its members are prejudiced of a potential $420-720 thousand that can be used for conservation. This negatively affects, employment of local people, water pumping, fire break maintenance, etc. Our highly successful rhino anti-poaching efforts cost about $500-600,000 per year. Under the most adverse conditions we have grown our rhino population from some 42 animals in the mid 1990's to about 190 today.

If the hunting income is thus disallowed from sustainably using our elephant population, we would no longer be able to fund the protection of our highly endangered rhinos. Is there anything more proactive in conservation than using the income from one species present in excessive numbers to protect another which is highly endangered? By denying the importation of trophies into the USA major income is no longer available for the protection of endangered and highly endangered species. Our poachers would welcome this action by the US Government; we highly successful conservationist do not.

Mr. Brisendine,

Please see the attached letter and document to be included with all applicants listed, which should be all outstanding elephant import permit applications for trophies coming from Zimbabwe that were filed through Conservation Force.

If you have any questions regarding this matter, please do not hesitate to contact me.

Thank you,

Aimee Korver

Ms. Brisendine:

The document attached is to be included as supplement to all original import permit applications filed with the U.S. Fish and Wildlife Service listed above.

Since filing these applications we have received additional documentation of conservation efforts for elephants in Zimbabwe that further detail the elephant populations as stable and growing. The CAMPFIRE document strongly argues the importance of trophy imports and the

value that they provide to communities in Zimbabwe through income flows from tourism and hunting which serve to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat.

The Campfire document details the drastic effects that COVID-19 has had and is having on Zimbabwe's tourism and hunting market, which is in a state of collapse. It is leaving the country uncertain of how wild-life and anti-poaching programs will be supported on the ground in the coming months. This information can be used to predict what might transpire if trophy hunting and imports were to cease to exist and the tragic outcome it could have on the conservation efforts of wildlife in the area.

We ask that you please consider these documents when making your decision on enhancement in each import permit application.

Please feel free to contact me if you have any questions regarding this mater.

Cordially,

Aimee Korver
Permits Paralegal

1. CAMPFIRE communities Concern on Import Bans

Open Letter to the United States Fish and Wildlife Service

Dear Dr Mary Cogliano

CAMPFIRE Communities Concern on Import Bans

CA/MPFIRE Association, otherwise known as the Community Areas Management Program for Indigenous Resources in Zimbabwe wishes to register its opposition to continuing campigns for the banning of trophy imports. We are fully aware that the general outrage in both print and social media against sport hunting, which many distant voices refer to as unethical, is aimed at influencing policy action by importing countires.. These arguments, none of which are supported by science, are based on a perfected art of global misinformation and do not represent the views of rural communities who live side by side with wildlife. To us as a people with substantial wildlife populations, trophy hunting is indispensable for conservation and rural livelihoods.

Zimbabwe has one of the most resilient and successful conservation programs in Africa. Its conservation efforts have historically enabled local communities to thrive on sustainable livelihoods in biodiversity-rich landscapes. At least 800 000 households or 2.5 million people (out of a national population of 16 million) benefit directly and indirectly from the sustainable use of wildlife and tourism related investments in their areas. However, our ever growing elephant population has increased the levels of conflict between humans and wildlife in recent years, which, together with recurrent droughts that threaten food security, have made traditional livelihoods more difficult, especially for subsistence farming communities that live in the wildlife rich areas of the country.

Communities in CAMPFIRE areas reside in an environment where conflict between humans and wildlife is common, as both compete for the limited available land and water resources. But this comes at a high price: people in Zimbabwe are paying with their lives for tolerating wild animals in their areas. As recently as 23rd March 2020, Barnabas Mwinga, a 50 year old man, was killed by an elephant in his field in front of his wife and young daughter in Gonono Ward, Mbire District. He is one of seven other people that have needlessly lost their lives to wildlife attacks throughout the country since the beginning of 2020, in addition to the 41 killed in 2019. Yet despite this high cost, wildlife is still highly valued by rural communities who continue to tolerate massive crop destruction and livestock losses from wildlife without compensation. For example, elephant poaching in Mbire District where Barnabas Mwinga was recently killed has gone down from a peak of 40 in 2010 to only 3 elephants poached in 2019 (Figure 1). The decline in poaching incidents is a result of collaborative efforts between the Safari Operator and the hunting clients who invest nearly $100,000 annually into an anti-poaching unit.

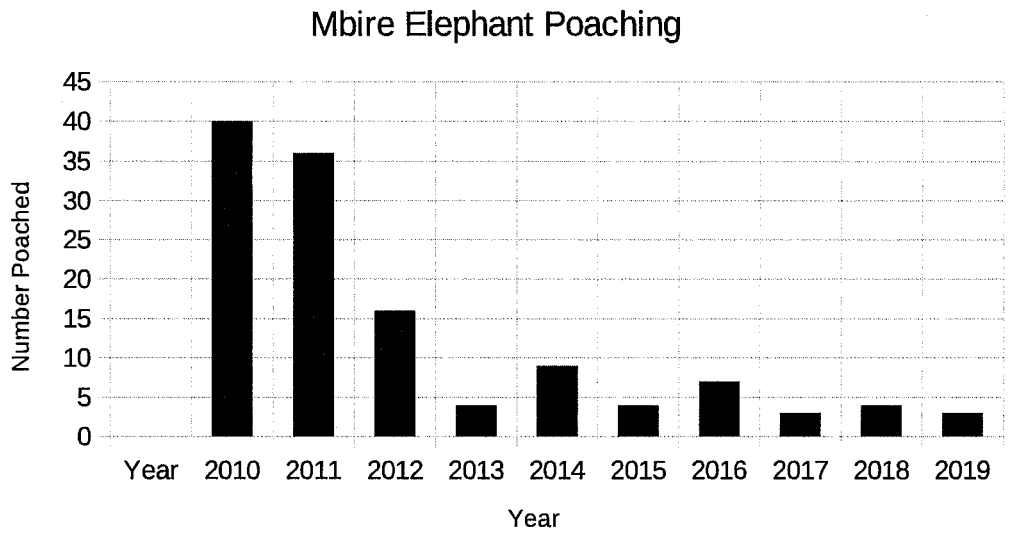

Figure 1: Mbire Elephant Poaching Trends (Source – Mbire Rural District Council)

The aim of the CAMPFIRE programme is to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat. For nearly 30 years, trophy hunting, which relies heavily on the American market, has been cautiously implemented in the absence of other tourism opportunities to achieve this goal. Not only has it resulted in increasing food and livelihood security of rural people, it has also played a role in undermining the drivers of poaching and mitigating human and wildlife conflict. The net impact is seen in securing wildlife habitat and assisting in the regeneration of degraded landscapes.

The financial resources to succeed with this programme in CAMPFIRE areas are heavily dependent on the sustainable hunting of big game, especially elephants. The monies generated from these activities finance the local economies, social services as well as anti-poaching efforts and wildlife management at the District and Ward levels. For example, as can be seen from Table 1 below, the total number of elephants hunted as trophies over nine years is 807 out of a cumulative quota of 1381, from an estimated national population of 83,000 elephants. Hunting quotas are set at no more than 0.5% of the population estimate compared to an elephant population growth of 5% to 6% annually. The levels of off-take (58%) also demonstrate that while hunting is based on controlled numbers for each species annually, it is not uncommon for a client to pay for a full hunt and enjoy the wild experience, but not take a trophy. It is also important to note that communities do not view international hunting clients just as tourists, but as vital conservation partners.

Table 1: Trophy Hunting Quota Summary and Income: 2010-2018

Source: *The Role of Trophy Hunting of Elephant in Support of the Zimbabwe CAMPFIRE Program: Vernon Booth* (in progress).

District and Ward-level institutions in the CAMPFIRE areas rely on income from hunting to provide significant local livelihood benefits (income, jobs, skills) and social services (schools, clinics, irrigation schemes, boreholes) in remote regions where agriculture is marginal and there are very few jobs or other sources of cash income. Table 2 and Table 3 below summarise the impact of pre- and post-elephant trophy import suspension expenditure on the CAMPFIRE programme at the District and Ward level. The District administration costs absorb 89% of the budget with 30% devoted to law enforcement. With the suspension of elephant trophy imports to the USA and Europe in 2016, expenditure on law enforcement dropped from 33% to 9% as a result of District administration having to offset the human and wildlife costs which increased from 1% to 33%. At the Ward level, 46% of the budget is allocated to administration and 54% to community benefits (45% devoted to social services, Table 3).

Table 2: District level expenditure on administration and community benefits: 2010-2018

With growing awareness from several years of CAMPFIRE implementation, communities have been demanding their rightful place in the management of wildlife resources for their own benefit. To accommodate this, CAMPFIRE has undergone a review of its policy framework to enable communities to reap greater and more tangible benefits from living in harmony with nature. A key aspect of this review is to establish Community Conservancies that redefine ways in which communities can benefit more from wildlife and other income generation opportunities, as well as the mitigation of human and wildlife conflict. This initiative is being directed under the Global Environment Facility (GEF) 5 and 6 cycles covering five districts with the aim of developing innovative ways to improve the management of wildlife for the benefit or rural people. If trophy hunting and trade here was stopped, the impact on local livelihood would be severe, and both poaching and changes to alternative land use would increase. Non-consumptive tourism currently plays virtually no positive conservation role in the CAMPFIRE areas (<4% of overall income is generated through tourism). Instead of banning the import of trophies, more international oversight and support is needed from importing states, and of in-country CITES controls, to ensure sound sustainable management e.g. quota-setting, permit allocation, independent population surveys; building robust, equitable and transparent benefit allocation mechanisms at local level, particularly where communities have elected to invest their land and time in Community Conservancies.

STOP PRESS: The pressure for imports bans comes at the worst possible time as the Covid-19 pandemic has severely disrupted income flows from tourism and hunting. The collapse of both markets leaves rural people and safari operators with virtually no income, and it is uncertain how wildlife protection and anti-poaching programs will be supported on the ground in the coming months. What remains clear is that trophy import bans will seriously undermine conservation in Zimbabwe, and indeed open floodgates for rural people to destroy wildlife and wildlife habitat through conversion of land for other subsistence uses, even if unviable.

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

To Whom it May Concern,

Attached you will find the zipped file of information to add as a supplement to the Import Application # 85343C for Mr. Bryan Ottmers. This import permit application is for an elephant trophy from Zimbabwe. This trophy was taken in 2015.

Please let me know if you have any question and that you have received these documents.

Thank you,

Aimée *Korver*

SAVE VALLEY CONSERVANCY: ELEPHANT COLLARING REPORT (2018)

SAVÉ VALLEY CONSERVANCY ELEPHANT COLLARING REPORT DECEMBER 2018

Operations Report

Compiled by: Don Jooste

INTRODUCTION

Limited knowledge is available when considering the dispersal movements of the elephant population within the Savé Valley Conservancy (SVC). With a relatively young, exponentially increasing elephant population, it is a known fact that young elephants, especially bulls, will continually disperse. The dispersal of these younger bulls are generally unknown to Management of the SVC. What has however become clear is that the human wildlife conflict pertaining to elephants in the neighboring communities has increased. Therefore it was proposed to collar a total number of four bulls within the SVC system. Four elephant bulls were collared in mid-December of 2018 under permit numbers *46 (2)(e) & (g)01/2018 & 46 (2)(e) & (g)22/2018 Ref: D/277*. The collaring of elephant would allow for the SVC to generate a greater understanding of elephant movement especially pertaining to the mitigation of Human-Wildlife Conflict. With greater knowledge at the disposal of the SVC more informed decisions can be made to reduce Human-Wildlife conflict within the immediate communities surrounding the SVC.

PROCEDURE

The darting was conducted by Josh Mostert, dangerous drugs license number: *DDL 2018/34*. The darting exercise was also monitored by National Parks Ranger, Livison Ashliani, based at Senuko Ranch. Professional Hunter, Guy Whittall, license number *421*, accompanied the darting crew for safety reasons. All necessary National Park representatives were informed about the operations. The darting was conducting over a total of five days, from the 12th to the 17th of December 2018. Four elephant bulls were darted on the following dates:

1. *14/12/2018*
2. *14/12/2018*
3. *15/12/2018*
4. *17/12/2018*

The elephants were darted on Humani Ranch (1 & 2) and on Sango Ranch (3 & 4). All four elephants that were darted were young bulls with an estimated age ranging from 20 – 35 years. The targeted elephant bulls were all considered to be of non-trophy quality, and below an acceptable age of harvesting and/or possessing ivory which was deemed below average for trophy quality specific to the area. (*Please see attached appendices for data gathered from collared bulls)*

All four elephant bulls were successfully darted without any incidents. The bulls were darted on foot. All four elephant bulls were fitted with Satellite Collars manufactured by AWT. The collars are programed to 6 GPS readings per day or one reading every four hours, which allows for an accurate, energy saving monitoring program. With the readings set to the abovementioned, the batteries on the collars will in theory last for an estimated 24 – 36 months depending on various external factors. All data recordings of the four elephant bulls collared can be seen in Appendix I.

By collaring these four elephants, it is hypothesized that the SVC will generate a greater understanding of elephant movements. It is furthermore hypothesized that these elephant will help identify elephant dispersal patterns. Younger bulls such as the collared individuals will also be more likely to move beyond the identified boundaries of the SVC. Within monitoring these movements, the SVC will gather a greater understanding of Human-Wildlife Conflict. This information will enable the SVC to identify areas that are prone to Human-Wildlife Conflict which will allow the SVC to apply adaptive management to minimalize conflict and/or loss due to problem animal control.

Data from the abovementioned monitoring program will shed light on the limited knowledge within key elephant populations found in the Lowveld of Zimbabwe. The SVC has been monitoring its wildlife since 2004 by making use of annual aerial surveys, supplying both

landowners and Zimbabwe National Parks & Wildlife Authorities with population trends over the years. Positive population trends indicate a healthy elephant population within the SVC.

With the opportunity to now understand and gather data on elephant movement, Zimbabwe National Parks & Wildlife Authorities alongside the SVC will gain a greater understanding of the species movements which would hopefully assist in Human-Wildlife Conflict mitigation. This will produce information where communities and wildlife could potentially coexist with minimal loss to both wildlife, as well as human sustainability in the form of crops.

Data reports from information and movement statistics gathered from these collars will be provided to National Parks on an annual basis.

Appendix I.

HUNTING PERMIT

PARKS AND WILDLIFE ACT [*CHAPTER 20:14*]

Permission is hereby granted on the authority of the Minister of Environment and Natural Resources Management in terms of the Parks and Wildlife Act [*Chapter 20:14*],

to Sango

of Save Valley Conservancy

and co-hunter .....

of .....

Firstly to hunt in Hunt Number or Section: Sango-(Chanuruwe & Sabi) the Masvingo Area, such number of animals as is indicated in column "A" below against the name of the animals specified. Such hunting shall be conducted during the period extending between 01/01/2015 and 31/12/15 (inclusive dates).

Animal	A	B	Animal	A	B	Animal	A	B
Antbear	1		Elephant (m)	1		S. Hyena	1	
Baboon	15		Francolin	20		Hyrax	10	
Buffalo (m)	21		Geese	10		Impala (m)	80	
Bushbuck(m)	10		Genet	8		Jackal B/B	4	
Bushpig(m)	10		Giraffe (m)	9		Klipspringer	2	
Civet cat	6		Grysbok	2		Kudu (m)	20	
Crocodile	2		Guinea Fowl	10		Leopard (m)	8	
Ducks	20		Hare	10		Mongoose	10	
Duiker	4		Hippo	1		Monkey	10	
Eland (m)	15		Honeybadger	6		Nyala (m)	3	

Secondly to remove from the Hunting Area such number of animals as indicated in column "B" above against the name of the animal specified. An animal specified may be removed in whole or in part unless there is a condition on this permit prohibiting such removal.

Thirdly to sell, within a period of six months from the second date which appears above, the trophies of such number of animals as may be indicated in column "B" above against the name of the animal and subject to any other regulations which may be in force governing movement, sale or export of wildlife trophies.

The holder of this permit shall not permit any other person to hunt the animals specified in addition to such holder and his co-hunter appointed at the time of issue of this permit.

This permit is issued strictly subject to the terms and conditions which appear on the reverse hereof.

OPERATOR ENHANCEMENT REPORT

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. OPERATOR INFORMATION
   a. Name of Area Operator: Zambezi Hunters
   b. Years in business: 20 +
   c. Name of Company conducting hunt: Zambezi Hunters
   d. Closest town to hunt location: Birchenough Bridge
   e. Country where hunt will take place: Zimbabwe

2. CONCESSION
   a. Name of Concession: Sango- Save Valley Conservancy
   b. Area in Km^2: Sango is 600KM2
   c. Land tenure: Title deed with, German Bilateral Investment Agreement (BIPPA)
      Government Lease Community Private Ranch X Private Conservancy
   d. Length of Concession Agreement: Privately owned land
   e. Can it be renewed? Yes N/A No
   f. Length of Renewal, if applicable: N/A
   g. Estimated total amount received in trophy fees last year, if applicable:
      $ 264 150.00
   h. Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:
      Privately owned, Sango is professionally run ecologically and has community support programs
   i. Please provide the Concession location and nearest City: Birchenough Bridge is the closest town, Mutare the closest City
   j. Please attach a map or maps with the boundaries marked and showing the nearest City
   k. If the Concession borders a National Park, please provide Park name: N/A
   l. Description of general and distinctive habitat features and any water features:
      Savanna woodland with three main rivers, Msaize, Mokoreand Save river. Granite hills in the western area of Sango

3. COMMUNITIES IN THE CONCESSION
   a. Are there any communities living in the Concession? Yes No **NO**
   b. If so, estimated number of people or villages in the Concession? N/A
   c. Are there communities bordering this Concession? Yes . **Yes** No
   d. If so, estimated number of people or Villages around the Concession? 400,000

4. RELEVANT GAME POPULATIONS IN THE CONCESSION:[1]

	RELATIVE ABUNDANCE		3-YEAR TREND	HOW IS IT

[1] The FWS Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Species Name	Dense	Avg.	Sparse	Estimated Population	Up	Down	Stable	Monitored?
Elephant	x			600			x	Aerial survey
Lion	x			76			x	Spoor and camera trap survey
Leopard	x			115			x	Spoor and camera trap survey
Prey species	x			thousands			x	Aerial survey

5. LOCAL COMMUNITY PARTICIPATION

a. Total employment number: 130 full time staff + 8 managers
b. Please identify the number and type of all employees:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF THIS TYPE WHO ARE LOCAL/FROM NEARBY COMMUNITIES
PROFESSIONAL HUNTERS	6	All Zimbabwean's
TRACKERS	10	Most are from the local community
ANTI-POACHING SCOUTS/RANGERS	44	All from local community
OTHER ANTI-POACHING		Sango hosts the Save Valley Special Species anti-poaching unit
COOKS/HOUSEKEEPERS	20	All from local community
COMMUNITY COORDINATORS	NA	
MANAGERS	8	All Zimbabwean's
BIOLOGISTS	1	English Ecologist
OTHERS:	50	

6. Number of staff employed in the off-season: 130

a. Please identify the number and type of staff that are engaged when the season is not open:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF LOCALS /FROM NEARBY COMMUNITIES	WHEN EMPLOYED?
ANTI-POACHING STAFF	44		
MANAGERS	8		
MAINTENANCE	12		
ROAD OPENING /CONSTRUCTION	13		
COMMUNITY RELATIONS PERSONNEL	1		
OTHERS:	60		

7. ANTI-POACHING EFFORTS:[1]

a. Number of Anti-Poaching staff: 44
b. Are Anti-Poaching Patrols conducted during the hunting season, off-season, or both?
Hunting season: Off-season: Both seasons: **BOTH**
c. Months during which Anti-Poaching Patrols are conducted: All year
d. Number of Anti-Poaching Patrols per month: +/- 370 patrols per month
e. Description of Anti-Poaching equipment, vehicles, etc.:
Full time manager with vehicle, 14 radios, 30 shotguns , uniforms , etc.

[1] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

7. ANTI-POACHING EFFORTS: *[CONTINUATION]*

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?

Full time Anti Poaching Manager

g. Do you offer rewards to poaching informants leading to arrest? Yes x No

h. Do you offer rewards to poaching informants upon conviction? Yes x No

i. Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2017	SPENDING 2018	SPENDING 2019	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS			$114,200	
EQUIPMENT			17,700	
VEHICLES			20,000	
~~PETROL~~ DIESEL			9,700	
REWARDS PAID			16,200	
OTHER: _____				
OTHER: _____				
TOTALS			$178,300	

j. What currency are the expenditures given in? US dollars

8. ANTI-POACHING RESULTS:

CATEGORY	2017	2018	2019	REMARKS
POACHING INCIDENTS DISCOVERED	120	135	162	
ELEPHANT CARCASSES OBSERVED				
LION CARCASSES OBSERVED				
LEOPARD CARCASSES OBSERVED				
IVORY POACHERS ARRESTED				
MEAT POACHERS ARRESTED	120	135	162	
OTHER POACHERS ARRESTED				
POACHERS CONVICTED				
SNARES/GIN TRAPS COLLECTED				
FIREARMS CONFISCATED				
VEHICLES CONFISCATED				
BICYCLES CONFISCATED				
BOATS/NETS CONFISCATED				
TUSKS RECOVERED				
OTHER: _____				

9. COMMUNITY INVESTMENT:[3]

a. Does the Company contribute money or goods/services to local communities?
YES Yes No

b. If so, what percentage or amount is shared, how often, and why (e.g.: required by law, required by contract, voluntary contribution)?
N/A

c. Does the Company provide game meat to nearby communities? Yes **Yes** No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:
Sango supports school and Chiefs functions with approx. 1 200kgs meat per year

e. If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.
N/A

f. Please describe any consolation payments made to local residents damaged by game species
N/A

g. What currency are the expenditures reported in?

SPECIES	DAMAGE CAUSED	CONSOLATION PAID 2017	CONSOLATION PAID 2018	CONSOLATION PAID 2019
ELEPHANT				
LION				
LEOPARD				
OTHER				

a. Please describe any community projects paid for by the Company:
ongoing support for 4 schools and maintain 9 boreholes approx. cost US$6,500/year

b. What currency are the expenditures reported in?

TYPE OF PROJECT	SPENDING 2017	SPENDING 2018	SPENDING 2019	REMARKS
EDUCATION (E.G.: CLASSROOMS, OFFICES)				
EDUCATION (E.G.: SCHOOL FEES, SCHOOL SUPPLIES)				
HEALTH (E.G.: CLINICS, OFFICES)				
HEALTH (E.G.: MEDICAL SALARIES, EQUIPMENT)				
COMMUNITY SCOUT SALARIES				
OTHER COMMUNITY ANTI-POACHING				

[3] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

9. COMMUNITY INVESTMENT: *[CONTINUATION]*

TYPE OF PROJECT	SPENDING 2017	SPENDING 2018	SPENDING 2019	REMARKS

RE: Elephant Lawsuit Case No. 19-CV-3696 - Sango Information

To Aimee Korver <permits@conservationforce.org>

Dear Aimee,

Please find attached the enhancement questionnaire answered to the best of our ability. Crane Safaris took over as Operator for Sango in 2019. I don't have any financial data for Zambezi Hunters for years 2017 and 2018. I hope that this will aid your case.

If I can be of further assistance please do not hesitate to contact me.

Please may you confirm receipt of email.

Kind Regards,

Natalie

Sent by email

Subject: Trophy hunting in the Savé Valley Conservancy, Zimbabwe

Dear Mr. Jackson

The purpose of this letter is to support the many safari operators, Professional Hunters, and international clients who hunt in the Savé Valley Conservancy (SVC) by explaining how hunting, conservation, and community assistance work hand in hand under the umbrella of the SVC to support a vital wildlife resource. It is my hope that this message can be communicated to the US Fish and Wildlife Service by yourselves and/or safari operators in support of trophy import permits for animals hunted in the Conservancy.

Background

The Savé Valley Conservancy is located in southeastern Zimbabwe along the Save River which runs along its eastern boundary. The Conservancy originally consisted of 24 adjacent properties aligned since 1992 under a constitution which commits its property-owning Members to the wise management of ecological resources and wildlife within its boundaries. In spite of resettlement during Zimbabwe's Land Reform Program, 18 properties are operational today and we protect wildlife and its habitat on over 700,000 acres. The SVC is designated to become part of the Greater Limpopo Trans Frontier Conservation Area, an international Peace Parks initiative linking national parks and conservation areas in Zimbabwe, South Africa, and Mozambique.

The SVC is home to many rare and endangered species. Our professional husbandry has protected and grown all species but specifically including:

202 black and white rhino (75% black) grown from a starting population of 42
2700 elephants, grown from a starting population of 560
~400 lions

158 African Wild Dogs, the densest population in Africa
1448 giraffe

In addition we have healthy but partly measured populations of ~ 400 leopards, an estimated well over 100 pangolin, hundreds of insects as well as reptile species, and well over 400 bird species, including many species of vultures and raptors.

Role of Trophy Hunting

The economic underpinning of the SVC that makes landscape scale conservation possible is well monitored and sustainable trophy hunting carried out by individual Members on their properties. Each property works with different safari operators and Professional Hunters. A large majority of hunting clients who come to the SVC each year are from the United States and it is vital to the SVC that they be allowed to import their trophies into the US. Trophy income is derived from hunting a small percentage (<5%) of mostly older male members of a given species and funds the growth and protection of entire populations. Trophy hunting is the basis of exceptional wildlife growth rates in the SVC, allowing us to relocate excess animals to repopulate national parks.

Income from trophy hunting is almost entirely devoted by Members to fence maintenance, game scouts and anti-poaching, maintenance of roads and firebreaks, operation of pipelines and water points for wildlife, and community assistance. In other words it covers from 60 – 100% of the costs of successful wildlife conservation. The cost of maintaining and protecting the wildlife resource is, on average, US$9 per acre annually. Conservancy Members assist the communities that surround the Conservancy in many ways: building schools and clinics, drilling boreholes, creating irrigation schemes, providing books, computers, and scholarships as well as jobs and protein.

Members pay levies to the Conservancy to support a small staff which manages programs that allow central management of wildlife and quota setting, recognizing that wildlife on any one property are part of one population living within Conservancy boundaries. Conservancy management programs include an annual aerial survey of the Conservancy wildlife population, allocation of sustainable off-take quotas to individual Member properties, and trophy quality monitoring. The SVC supports outside research on key species management issues and handles large scale relocation of excess animals when over-populations stress the Conservancy's habitat and carrying capacity. In 2018 we relocated 100 elephants. In 2020, we will relocate another 600 elephants, about 2,500 plains game animals, two prides of lions, and at least one pack of wild dogs to Zimbabwe's national parks. This is a clear win-win for all parties involved and an operation which would be infeasible without sustainable trophy hunting.

With donor support the Conservancy spends over US $500,000 annually to manage, employ, and equip 56 highly trained and professionally led scouts who form a Special Species Protection Unit (SSPU) that protect our large population of rhino. The SSPU is in effect a security overlay which operates in conjunction with, and in support of, separate anti-poaching scout teams employed by Members. The success of the SSPU is attested by the positive growth rates in our black and white rhino populations (see attachment.)

Conclusion

Again, I am writing on behalf of the many safari operators, PH's, and international clients who hunt in the Savé Valley Conservancy. Without trophy hunting, there would be no Conservancy. The SVC is in an arid region where wildlife and associated tourism are a preferred land use. Indeed, the decision by founding Members of the SVC to change land use to wildlife and form the Conservancy was driven by repetitive droughts that proved cattle ranching, the prevailing land use, was uneconomical and ecologically unsound.

I ask that you support the importation of trophies harvested by US clients in the Savé Valley Conservancy. Doing so protects a large natural landscape and far more species than just those which are hunted in sustainable and low numbers.

Sincerely yours,

Weldon Schenck
Chairman, SVC

I thank David and Graeme Cumming, Kevin Dunham, Mike Jones, Alistair Pole, Fay Robertson, Clive Stockil, Roger Whittall and all of the Savé Conservancy members for valuable discussions which have helped me clarify my own thoughts on managing the elephants.

Introduction

The terms of reference for this study required the consultant to –

- review the options for the management of elephant in the Savé Valley Conservancy (SVC);
- assess the ecological, economic and social implications for the various management options, concentrating on those deemed relevant for the SVC;
- make recommendations on the best management options for the SVC; and
- present the report to the SVC members at the annual quota meeting planned for early December of this year, 2006.

In a review of the elephant research programme in the Savé Valley Conservancy last year (Martin 2005c), I took note of the responses to a questionnaire administered by Anderson (2005) on the aspirations and wishes of the members of the SVC regarding the elephant population and the information has been used to guide this study. The management recommendations made in the course of that review are presented in **Appendix 1** (page 34) and do not differ greatly from those contained in this study.

This study builds upon the preliminary modelling done in the original review with an emphasis on the financial values attached the various management options. The work adds considerably to understanding the population response to management actions. The Savé Valley elephants fall in the category of a 'small population' with an irregular age structure and this gives rise to some unexpected outcomes.

This report should have been completed before the annual quota meeting held in the Conservancy on the 5th December 2006. I found myself in a situation shortly before the meeting where I could complete either the report or the presentation of the results but not both and, with the agreement of the Technical Advisory Committee, it was decided to focus on the presentation. With hindsight, this was probably a good choice because the presentation led to a stimulating discussion of the issues and resulted in a management decision being taken which needed further analysis. The meeting also made me acutely aware of the practical issues which would arise in trying to implement the management actions – particularly with regard to population reduction and setting hunting quotas – and I believe I have now addressed these aspects.

The modelling work has been very, very interesting. It may have added to the understanding of the population dynamics of 'small elephant populations' not just for Savé but in general. The methodology is equally applicable to large populations but copes with the peculiar situations which arise when there are only small numbers in each age class and none at all in some age classes. It also deals with the inherent time lags which are implicit in the response of a population of long-lived animals to various management treatments. The method of quota setting which has been developed in this study is, I believe, the first time a classical control system has been practically applied to elephants (and perhaps any large mammal species).

The study has generated copious amounts of data and it would be very easy to spend several months including all the results in the final write-up. However, the report is overdue and I shall confine myself only to the most relevant findings – particularly those which pertain to the decision taken at the December meeting.

The Issues

A rapidly increasing elephant population

With no management intervention, the Savé Valley elephant population would theoretically reach some 8,000 animals by the year 2050 (**Appendix 2**, page 36). However, it is highly likely that a drought or illegal hunting would act to limit the population before this. The population exceeded 0.3 elephants/km^2 in 2003 – the density at which vegetation damage becomes markedly noticeable (Cumming, *pers.comm.*).

Elephants and habitats

A large body of literature exists, much of it from work done in Zimbabwe, that habitats are significantly modified when elephant densities exceed fairly low thresholds (Anderson 1973, Barnes 1983 & 1985, Laws, Parker & Johnstone 1975, Murindagomo 1992, Swanepoel & Swanepoel 1986, Thomson 1975). Coulson (1992) showed that when elephant densities reach 0.5/km^2 the expected loss of mature *Acacia tortilis* tress was about 60%. Craig (1992) predicted that elephant densities exceeding 0.3/km^2 would result in a 50% loss of *A. tortilis*, a 70% loss of *Brachystegia boehmii* and a 40% loss of *Baikiaea plurijuga*. Martin (1974) showed that even before the loss of the dominant canopy trees in *Brachystegia* woodland became noticeable, numerous sub-dominant tress and shrubs had disappeared or become greatly modified. Martin (1992) estimated that to retain a full canopy tree cover in *A. tortilis*, *B. boehmii* and *B. plurijuga* woodlands required elephant densities less than 0.2, 0.1 and 0.3/km^2 respectively. Robertson (1993) states that *Brachystegia* woodland did not survive later than the 1970s in any protected area of Zimbabwe where elephant density during the dry season exceeded 0.5 /km^2 and that regrowth will not progress beyond wooded grassland when elephant density exceeds 0.2-0.5/km^2. Cumming (*et al* 1997) examined elements of biological diversity in the lower Zambezi Valley and showed that biological diversity was lower in the State protected areas than outside them – largely due to the presence of high densities of elephants acting in combination with fire.

The arguments are compelling for limiting elephant densities in Savé Valley to a level not much higher than they are at present (i.e. well below 0.5/km^2). Almost all respondents to the questionnaire survey stated that a diversity of animals and plants was of the highest importance to them (Anderson 2005, section 2.6, page 9) and this goal will undoubtedly be compromised if elephant are allowed to increase much beyond their present levels.

Inter-specific competition

A population of any species is effectively competing with another species if it eats any of the food required by that species (Sinclair 1974)

The south-east Lowveld of Zimbabwe is a semi-arid area with limited carrying capacity for both domestic livestock and wildlife. Allowing elephants to take up most of the available carrying capacity must inevitably have a negative impact on the other large mammal species in the Conservancy. Of these species, buffalo are more valuable to the Conservancy than elephants – providing at least one-third of the annual income from safari hunting. To create the 'space' for other more valuable species to expand means ensuring the elephant population takes up no more than its theoretical 'share' of the available resources.

Relationships with neighbouring communities

The Savé Valley members have recognised the importance of maintaining good relationships with the communal lands bordering the Conservancy. A Trust has been established to conduct all the 'corporate level' business of the Conservancy and the shareholding in the Trust includes all SVC landholders and 18 communal land wards with contiguous boundaries (10% shareholding).

The elephant population in the Conservancy offers a significant potential to benefit these communities since all income from culling operations and trophy fees accrues to the Trust. Equally, the elephants could be perceived negatively if the only experience communal land residents have of them is in the form of crop raiding problem animals. The areas surrounding the conservancy are poor and protein-starved – which inevitably gives rise to illegal hunting in the Conservancy for survival needs. A circular communication from Dr. Peter Lindsey who is advising the SVC on social issues (**Appendix 3**, page 37) highlights the problem and the opportunities which an elephant cropping programme could present.

Barrett & Arcase (1995) have criticised the concept of passing benefits to neighbouring communities from areas where wildlife is protected, stating that the practice raises unwarranted expectations and can lead to a positive feedback spiral. Hopefully this situation can be avoided in the SVC because the neighbouring communities are genuine stakeholders.

CITES

Elephants are listed on Appendix I of the Convention on International Trade in Endangered Species of Fauna and Flora. Although Zimbabwe entered a Reservation at the time of the listing, its ivory cannot be traded on the international market because of an absence of potential importing countries with similar Reservations. This significantly reduces the income which should accrue to the stakeholders in the SVC Trust – including local communities. Far from contributing to the conservation of elephants, the ivory trade ban reduces the incentives for sustaining the species. It would be rational for the members of the Conservancy to place their management emphasis on enhancing other wildlife species which are more valuable.

The SVC has the option of storing its ivory until legal markets are opened or trading the product in defiance of CITES. The latter option can be legally achieved simply by the granting of an import permit endorsed by the CITES Scientific and Management Authorities of the importing country to the effect that they believe that the transaction is in the interests of conservation of the species. The Scientific and Management Authorities of the exporting Party (Zimbabwe) would state on the export permit that the ivory had been obtained in a manner that was not detrimental to survival of the species and in accordance with the laws of the country. Interpreting the Convention strictly, the importing country should also have entered a Reservation at the time of the listing of the elephant on Appendix I – however, there is no action that could be taken against the exporting or importing country under the CITES Treaty should they decide to grant such permits.[1]

1. Advice from PeterDollinger, the CITES Scientific Authority for Switzerland (the CITES depositary country).

Complex systems

The ecological, economic and social issues surrounding the management of elephants in the Savé Valley Conservancy can be considered a Complex System (Holling 2001 – a resumé of this paper is given in **Appendix 4**, page 38). The **Adaptive Cycle** is shown in **Fig.1** below.

Ecological, economic and social systems have a tendency to build up 'capital' to the extent that they become brittle and have low resilience (the "conservation" stage in Fig.1). They are then likely to crash, releasing their accumulated wealth, and a period of re-organisation then follows where new capital begins to appear. This is followed by another phase of exploitation. The timing of these various phases is not uniform and the so-called cycle may not conform exactly to the shape shown in Fig.1.

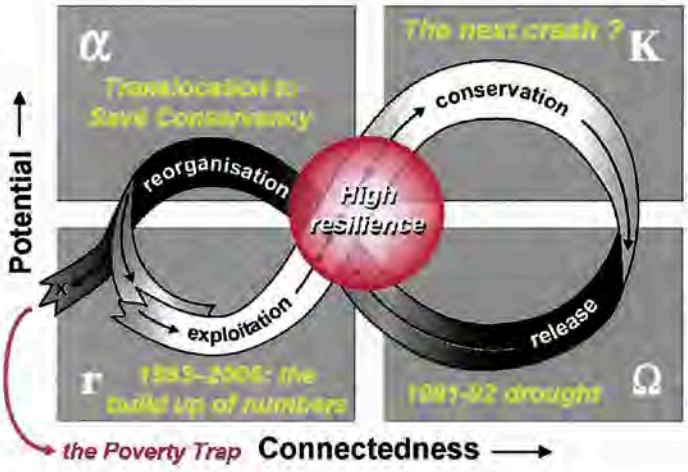

Figure 1: The Adaptive Cycle

In savanna ecosystems, if the 'crash' results in severe depletion of vegetation and soil erosion, the cycle may be unable to repeat itself and the system is caught in a so-called "poverty trap" – which could happen if the elephants in Savé were allowed to increase to a high population density.

The life history of the elephants in Savé Conservancy shows a remarkable conformity with the adaptive cycle concept. The elephant population in Gonarezhou National Park was relatively high in 1991 (over 5,000 animals) and a severe drought precipitated a population crash. Over a thousand elephants died in the park and some were translocated to Savé Conservancy. This can be seen as period of reorganisation and, if the principle is accepted that humans are an implicit component of a "panarchy", then the fact that the translocation was not a spontaneous act of the elephants is neither here nor there. The relocated elephants established themselves in the Conservancy and began to increase in numbers after 1992 to the point where their present density is once more a matter for concern.

If management interventions are now made to prevent an increase in the population, it is apparent that the elephants will be contained in the rapid growth phase of the adaptive cycle where resilience is high (see figure). The question arises whether, by holding the elephant population in this state, the resilience of either the elephant population or the ecosystem might be reduced. It seems unlikely that it would have a damaging effect on the elephants but it is possible that some other components of the ecosystem could be adversely affected.

The dangers of attempting to hold a species population at some constant level (or conversely attempting to maintain a constant harvest from it) have been well-documented. Walker (1989) points out –

> ***"The most complex and desirable ecosystems that we wish to conserve are markedly unstable (non-constant), and achieving our conservation goals depends on their remaining that way. It is the continued instability of these systems which allows for the coexistence of their many species, whether or not the systems have strong internal regulation. ... Unfortunately, conservation management is often intuitively opposed to this."***

Owen-Smith (1989) points out the conservation dilemma which this imposes on African ecosystem managers. Frequently, large mammal populations increase in numbers to the point where they are destroying their habitats and reducing biological diversity: at the same time, attempts to regulate such populations at constant levels may hold equal conservation dangers in the long term. Successfully holding populations at the selected "carrying capacity" may entail a stasis which is unfavourable for certain other species in the ecosystem, reduces resilience and ends up in the pathology defined by Holling (1993).

> ***"In many cases of renewable resource management, success in managing a target variable for a sustained production of food or fibre leads to an ultimate pathology of more brittle and vulnerable ecosystems, more rigid and unresponsive management agencies and more dependent societies ..."***

This all points towards a need for imaginative and innovative management. Routine cropping programmes which attempt to impose constancy on naturally fluctuating ecosystems should be closely monitored and, if necessary, an element of randomness may need to be introduced into the programme or major alterations in direction made at short notice. The present situation where Savé Conservancy is obliged to submit management plans to the government wildlife agency at the beginning of each year removes the flexibility needed to make sudden changes and reduces the adaptive capacity of managers (Martin 1999b).

The challenge is to make the management sustainable and to do this requires an adaptive management approach. Without experimenting, the resilience question is impossible to answer.

Members' wishes

Elephant densities for properties in the south of the conservancy appear to be higher than those in the north. Most properties in the south would like to see a reduction in densities and most properties in the north would prefer an increase. **This is the first conflictive situation which an elephant management programme would have to address. The second is the desire of some property owners engaged primarily in safari hunting for greater numbers of elephant so that the quota of trophy bulls can be increased.** Both of these concerns are addressed in this study.

All survey respondents accepted that ultimately there will be a need to control elephant population numbers (Anderson 2005, Section 6.3, p35). If this is the case, then **the only question is when ?** Although a number of respondents to the questionnaire did not view the impact of elephants on habitats as particularly serious when answering section 3 (*Perceived elephant contributions and impacts*), the impression is given in section 4.2 (*Elephant impact at habitat level*) that concerns may be higher than the earlier statements suggest.

At the meeting held in the Conservancy on 5th December 2006, the members decided unanimously that the elephant population should be gradually reduced by an offtake of 50-100 animals per year until it is below 1,000 animals. It should be maintained below 1,000 animals by a sustainable annual offtake.

A key consideration in reaching this decision was the need to benefit the communities neighbouring the Conservancy. A strong preference was expressed that **the culling offtakes should result in a continuous flow of benefits** rather than a large windfall as would arise from a major population reduction.

Savé Valley Conservancy is not a national park – **it is a bold experiment in wildlife management as a land use. The primary concern of members must lie in development.** The use of land should be viable, should outcompete alternative land uses and must be sustainable. Conservation will be achieved as a byproduct of the quest for sustainability.

Elephants are a valuable resource which could contribute significantly to the development of the Conservancy – but they also have the potential to threaten its sustainability.

Characteristics of the Elephant Population

The Savé Valley conservancy covers an area of some 3,400km^2 of which about 840km^2 (25%) is not being operated commercially at the moment due to the disruptions caused by the Fast Track Land Resettlement Programme. However, elephants have access to this additional area. The area was once populated by a substantial elephant population but the majority were eliminated in the 1950s during a major campaign against Foot-and-Mouth disease in order to make land available to cattle. The cattle industry failed to fulfil expectations and resulted in significant land degradation – with the result that farmers are now restoring the wildlife populations. The area is semi-arid with an annual rainfall varying from 300-500mm.

Surveys in 2004 and 2005 counted 1,276 and 1,201 elephants in the conservancy implying an overall density of about 0.36 elephants/km^2. Using the data of Mockrin (2000, table 1),[2] I have constructed a starting population of 592 animals in 1993 for use in the population model described below. I have not followed the age class allocations of Mockrin for the large introductions – preferring rather to assume that these would have had the age structure of the parent population from which they were captured. Where no data exist for ages and sexes of other groups introduced, they have been allocated to age classes either using random numbers or qualitative information.

Martin (2000) developed a general population model for elephants which has been used in several consultancies (e.g. Martin 2005a). The model behaves in a manner similar to the Leslie matrix (Leslie 1984) but the calculations of births and deaths are separated into successive operations because it is designed to cycle within the row operations of a computer spreadsheet. This model is extremely detailed and permits testing of expected breeding performance and the response to various management regimes (illegal hunting, culling, capture of live animals, problem animal control and sport hunting). It costs all management activities and estimates the income from ivory, elephant skin and sport hunting. Several modifications have been made to the model for specific application to the Savé Valley elephant population –

(1) The start-up population is a best estimate of the numbers and age structures of the elephants introduced to the Conservancy in 1992-93 and includes a small population which was resident in the Conservancy.

(2) The model deals with the analytic problem of small numbers of animals in each age class. Random numbers are used to select the animals required when fractions arise from percentage offtakes for natural mortality, illegal hunting, sport hunting and culling.

(3) Management regimes can be entered into the model, e.g. hunting and culling can be programmed to begin in specified years and to alter at a later stage.

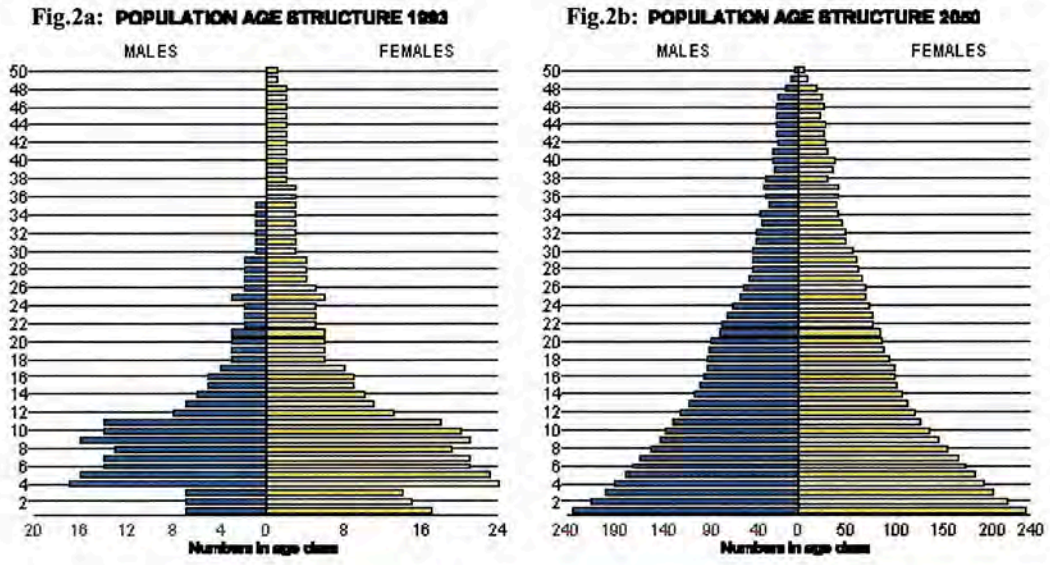
(4) The model contains a unique automatic hunting quota setting feature based on classical control system theory.

A brief description of the model is contained in **Appendix 5** (page 40). The model is available to the Conservancy as part of this consultancy.

2. This table includes all introductions of elephant to the conservancy beginning in 1982 and takes into account animals which escaped and animals which died soon after introduction. To these I have added the estimated 10 animals which remained on Humani Ranch after the main population was eradicated in 1971-72.

Elephant numbers and population growth rates

The Savé Valley elephant population has not yet achieved a stable age structure and will not do so until the year 2050 (**Figs 2a** & **2b** below). Knowledge of the rate of growth of the population in any particular year before this is of limited value – it can be expected that the growth rate will be higher than 6% in some years before it achieves a stable age structure. However, in the absence of any management, the rate of growth will eventually stabilise at about 4.5% (**Fig.3**).



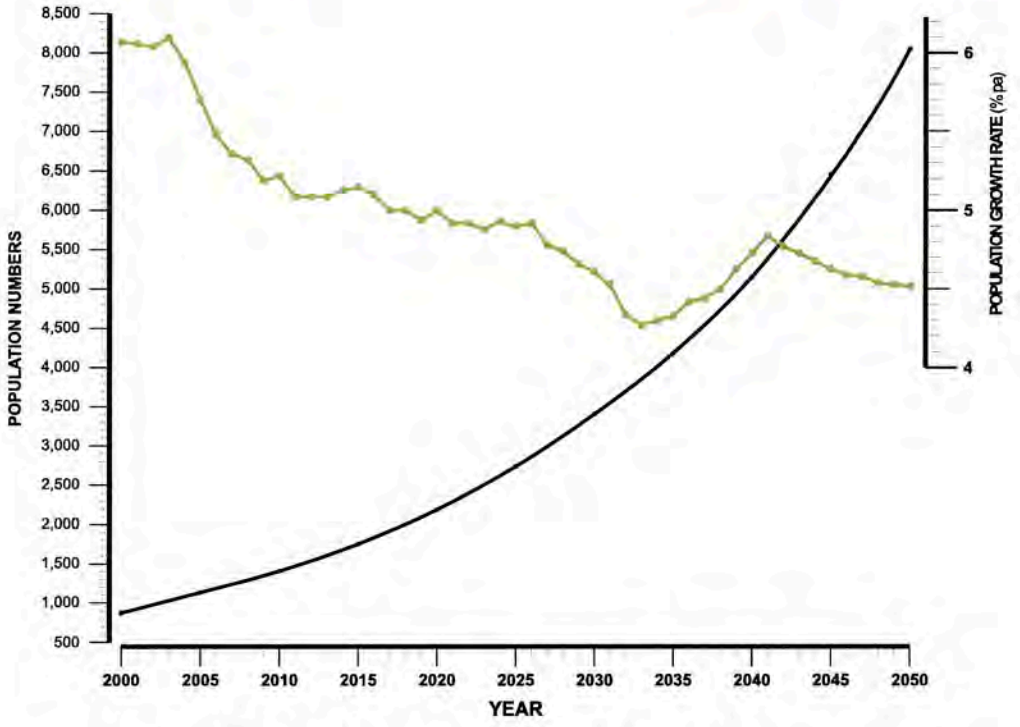


Figure 3: Population numbers and growth rates

Elephant biomass

In a recent study done in the Caprivi, Martin (2006) used the relative contributions of ungulate species to sport hunting income in relation to their metabolic biomass to establish an 'optimum' population size for elephant (**Appendix 6**, page 44). In relation to the income that they earn and the amount of resources they consume, elephants ranked 23rd in value in a list of 27 ungulate species. Buffalo are by far the most valuable species contributing about one-third of the total income from sport hunting.

The management tools available to enhance the status of the more valuable ungulate species are limited but one obvious way is to ensure that inter-specific competition for resources is not constraining the growth of populations. In a number of other rare and valuable species studies in Namibia [Buffalo (Martin 2002); Roan, Sable & Tsessebe (Martin 2003); Reedbuck, Waterbuck, Lechwe & Puku (Martin 2004); Elephants (Martin 2005a) and Hippo (Martin 2005b)] it was emphasized that the increasing elephant population was a both a direct and indirect threat to other species. To create the 'space' for other more valuable species to expand means ensuring the elephant population takes up no more than its theoretical 'share' of the available resources. To achieve this in the Caprivi, **the metabolic biomass of elephants should not exceed more than 25% of the available carrying capacity** (Appendix 6).

The metabolic biomass for various sizes of the elephant population in Savé Valley Conservancy are given in **Table 1** below –

Table 1: Metabolic biomass and elephant population size

Weight of an average individual in the population (kg)	2,100
Metabolic biomass = $(Wt)^{0.75}$	310
Metabolic biomass (Livestock Units)	3.18

	METABOLIC BIOMASS (Livestock Units)			Stocking rate
Population	Males	Females	Total	hectares / LU
750	1,109	1,218	2,327	146
1,000	1,537	1,573	3,110	109
1,250	1,975	1,806	3,781	90
1,500	2,501	2,280	4,781	71
1,750	2,815	2,514	5,329	64
2,000	3,312	2,887	6,199	55
2,250	3,636	3,204	6,840	50
2,500	4,127	3,549	7,676	44

At a stocking rate of 1 livestock unit/20 ha the available carrying capacity for the Conservancy is about 17,000 LUs. Applying the criterion that the elephant population should not exceed 25% of this implies **a maximum population of about 1,300 elephants.**

Illegal hunting

Illegal hunting is assumed to affect both sexes and all age classes equally. The effects of increasing offtakes on population growth is shown in **Fig.4** below. The population can sustain offtakes of up to 3.75% per annum. Higher percentage offtakes result in a population decline but, because the offtake declines with the population size (being a percentage), the decline is not rapid (e.g. in the year 2100 under an offtake of 4% the population will decrease to 873 animals; 4.25% – 673 animals; 4.5% – 530 animals).

It is more realistic to examine unsustainable illegal hunting in terms of fixed offtakes. For the scenario shown where illegal hunting begins in 2004, the maximum fixed offtake which can be sustained is 47 animals. For higher offtakes, the year in which extinction occurs is shown below.

Fixed offtake	48	50	60	70	80	90	100	animals
Extinction	2108	2075	2041	2031	2025	2021	2020	year

In theory, a population capable of growing at 4.5% per annum should be able to sustain an offtake of 4.5% if it is applied evenly to all age classes: in practice, the limitations of a 'small population' preclude this. Because whole numbers have to be removed, rounding effects dictate that the maximum offtake must be lower than the theoretical maximum. This is not simply an artefact of the modelling process but a syndrome which would affect the real population.

In all population simulation runs in this study a fixed illegal offtake of 5 animals is included.

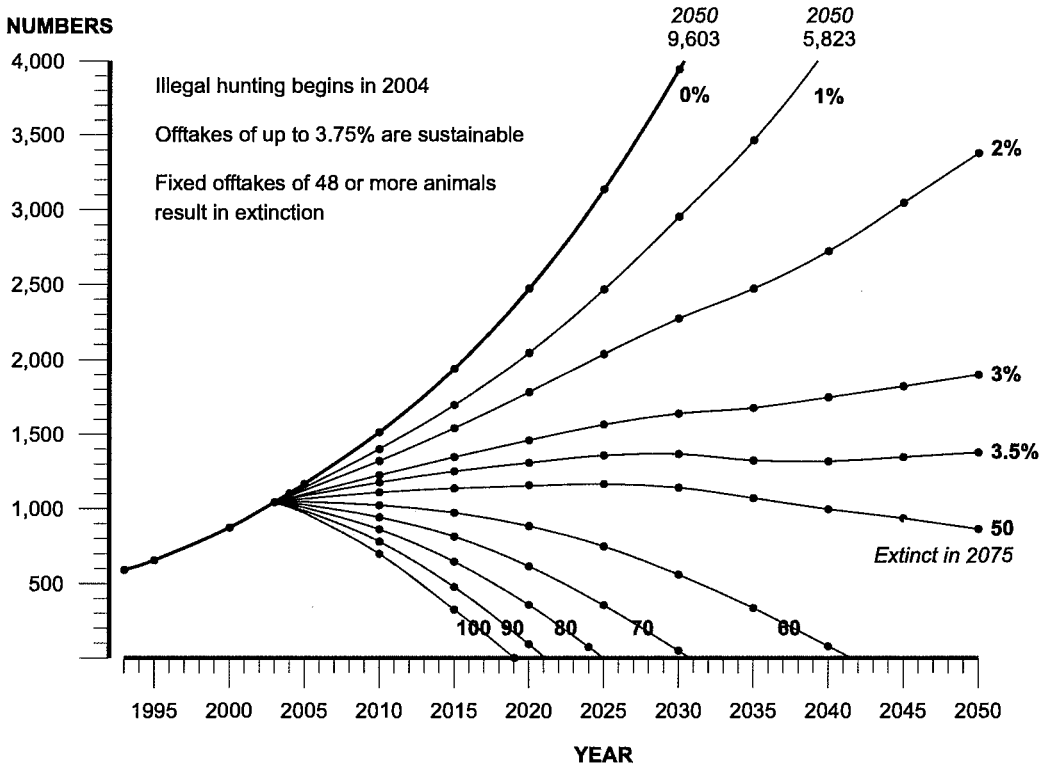

Figure 4: Effects of illegal hunting on population numbers

Problem animal control

The Conservancy's main concern is the negative effect of Problem Animal Control (PAC) on trophy hunting. Problem animals are not directly subtractible from the trophy quota because they are drawn from a wider pool of males than are sport hunting trophies. Two scenarios have been simulated (**Fig.5** below). The first is the unmanaged population (no culling) and the second is a 2.9% annual cull[3] . The modelling conditions are –

(1) The starting population in 1993 is that shown in Fig.2 (page 8);

(2) PAC runs from 2003;

(3) PAC affects males aged 15 years and older with equal likelihood;

(4) For both the relationships in Fig.5 automatic quota setting is in place (see **Appendix 8**, page 56) to regulate the mean tusk weight from trophy hunting at 20kg.

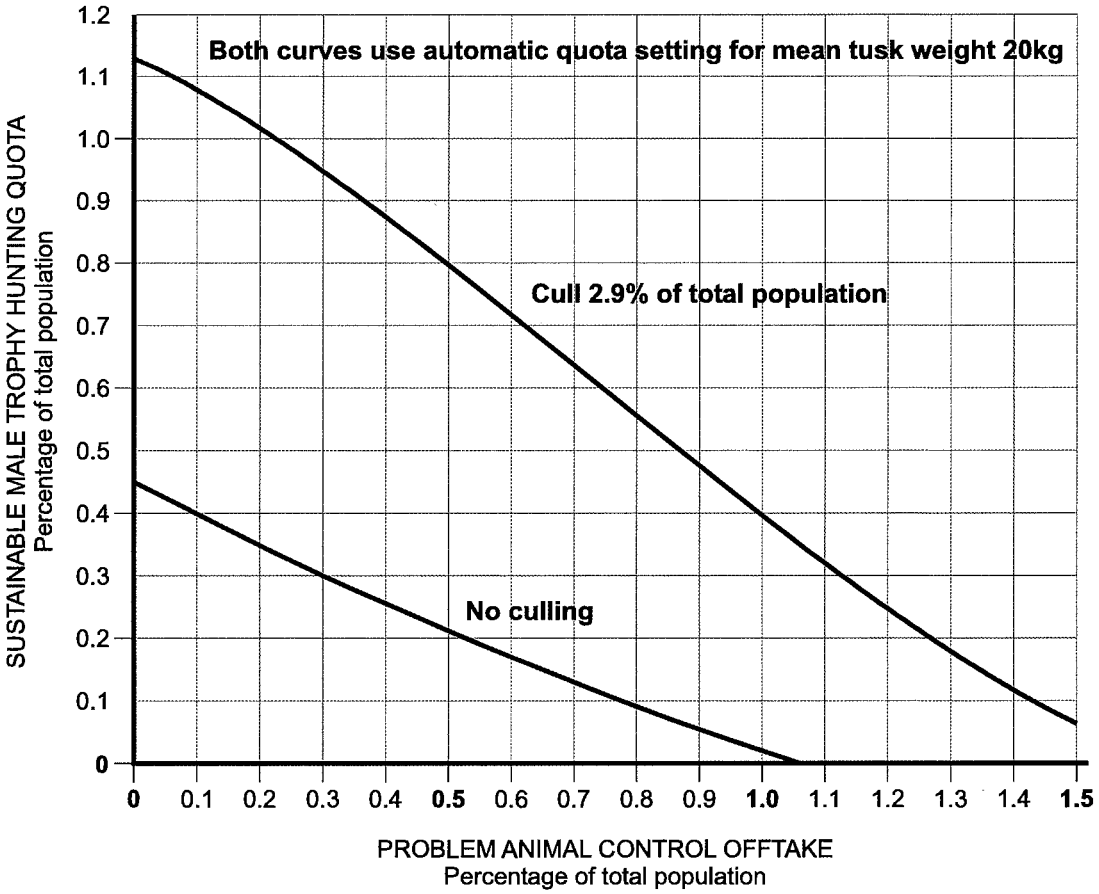

Figure 5: Relationship between Problem Animal Control and Trophy Hunting

3. With this culling percentage applied in 2007, the population increases from about 1,200 animals at the start to about 1,400 animals in 2033 and the declines slowly to about 900 animals in 2200.

The negative effects of PAC are much greater for the unmanaged population than the culled population. With zero PAC offtake, the sustainable quota to achieve a mean tusk weight of 20kg is 0.45% in the unmanaged case and 1.13% when culling is in place. If the level of PAC rises to 0.5% of the total population, the sustainable trophy hunting quota drops to about 0.2% of the population in the unmanaged case and 0.8% when culling is in place. The potential for sport hunting becomes zero at PAC levels of 0.7% and 1.4% respectively.

The past history of problem animal control outside Savé conservancy would suggest that it is an ongoing process and allowance should be made for it in quota setting. A fixed offtake of 5 animals (0.5% of a population of 1,000) has been incorporated into all of the modelling scenarios which follow.

Trophy hunting

The relationship between tusk size and age for elephants is shown in **Fig.6** below (based on Pilgrim & Western, 1986). Male elephants achieve a tusk size of about 15kg (each side) when they reach 30 years old and this has been taken as the minimum age for trophy hunting in the population model. There is a significant scatter in tusk weights for any given age (a 20% scatter is shown in the figure but the variability may be even higher than this).

In the population model, tusk weights are calculated for age class and the overall mean tusk weight for any given hunting season is the average of these data.

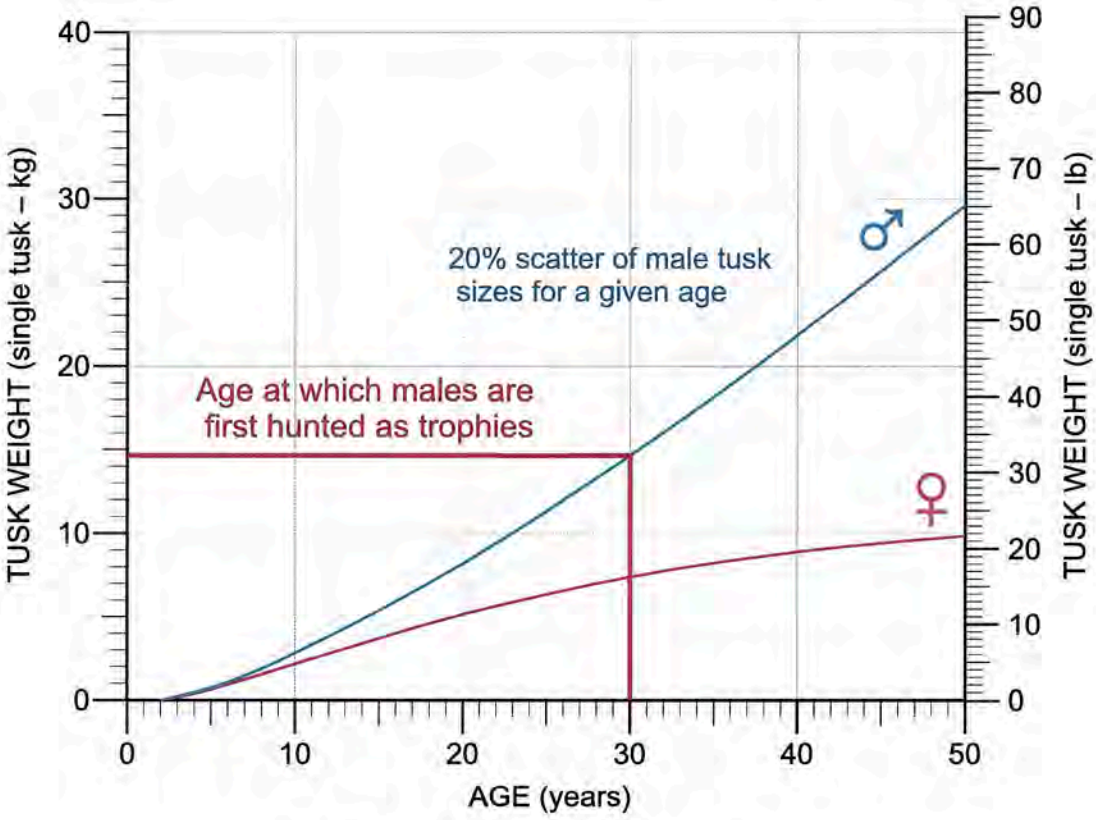

Figure 6: Tusk weight versus age

Some members have expressed the wish that the population might be managed to produce the odd male with 80lb tusks.[4] It will be observed that the mean tusk weight for the oldest age class (50 years) is only 65lb a side. There is a large scatter of different tusk sizes for any given age and it is quite possible that, although the mean tusk weight for a 40 year old animal is 48lb a side, there will be some 40 year olds which reach considerably higher tusk weights – perhaps even 80lb.

Built into the population model is a facility to specify the selectivity of trophy hunting – ranging from 100% selectivity where the animals are eliminated strictly in order of age beginning with the oldest – to zero selectivity where every male older than 30 years has an equal chance of being killed. The effects of levels of hunting from zero to 0.5% of the population are shown in a set of diagrams in **Appendix 7** (page 48).

A method of quota setting for male elephant hunting has been developed in the course of this study which automatically sets the optimum quota for each year based only the desired trophy size and the record of past mean tusk weights (**Appendix 8**, page 56). The method maintains a specified mean trophy weight regardless of the size or age structure of the population to which it is applied but it is particularly useful for small populations (less than 1,000 animals) with an uneven age structure. The effect of applying this method of quota setting to an unmanaged population to achieve a constant mean tusk weight of 20kg is shown in **Fig.7** on the next page.

Trophy hunting quotas can be substantially increased once the population is being subjected to culling. This is demonstrated in the final subsection **Culling and Hunting** (page 19).

The subject of hunting elephant females was raised by two respondents in the questionnaire survey (Anderson 2005, section 6.3, page 36) – particularly if culling were to take place. The effect of hunting females (with culling in place) has been tested in the model and there are no technical reasons why a portion of the culling quota should not be marketed for cow hunting. Some caveats are necessary. Trophy cows were hunted in Chirisa Safari Area in the 1980s and it took no more than a few years before all cows carrying large tusks were eliminated from the population. This could have implications for male trophy hunting, since the genes for large male tusks are carried by both males and females.

Cow hunting carries several other negative implications. The classic practice of removing complete cow herds has the beneficial effect of placing no selective pressures on the female portion of the population age pyramid. Trophy hunting will eliminate the older age classes and the long term effects of this selection are difficult to predict – it could affect the body of knowledge carried within the elephant population or, as stated above, result in a decrease in male trophy quality. The removal of an adult female from a herd undoubtedly carries with it considerable trauma for the surviving animals. If Savé Conservancy wishes to win friends and influence people, then the practice of cow hunting is very likely to produce more enemies than culling will – particularly as the numbers to be culled to limit the population are fairly small.

---

4. It may be of interest to note that while the net value of a mature elephant male as a sport hunting trophy is about US$20,000, its commodity value would be even higher if markets were operating for the sale of ivory. A 48 year old male with a pair of tusks weighing 28 kg each produces ivory worth US$35,000 and, with the value of skin (114kg worth US$600) and meat (1,700kg worth US$1,700), the commodity value of the animal is over US$37,000.

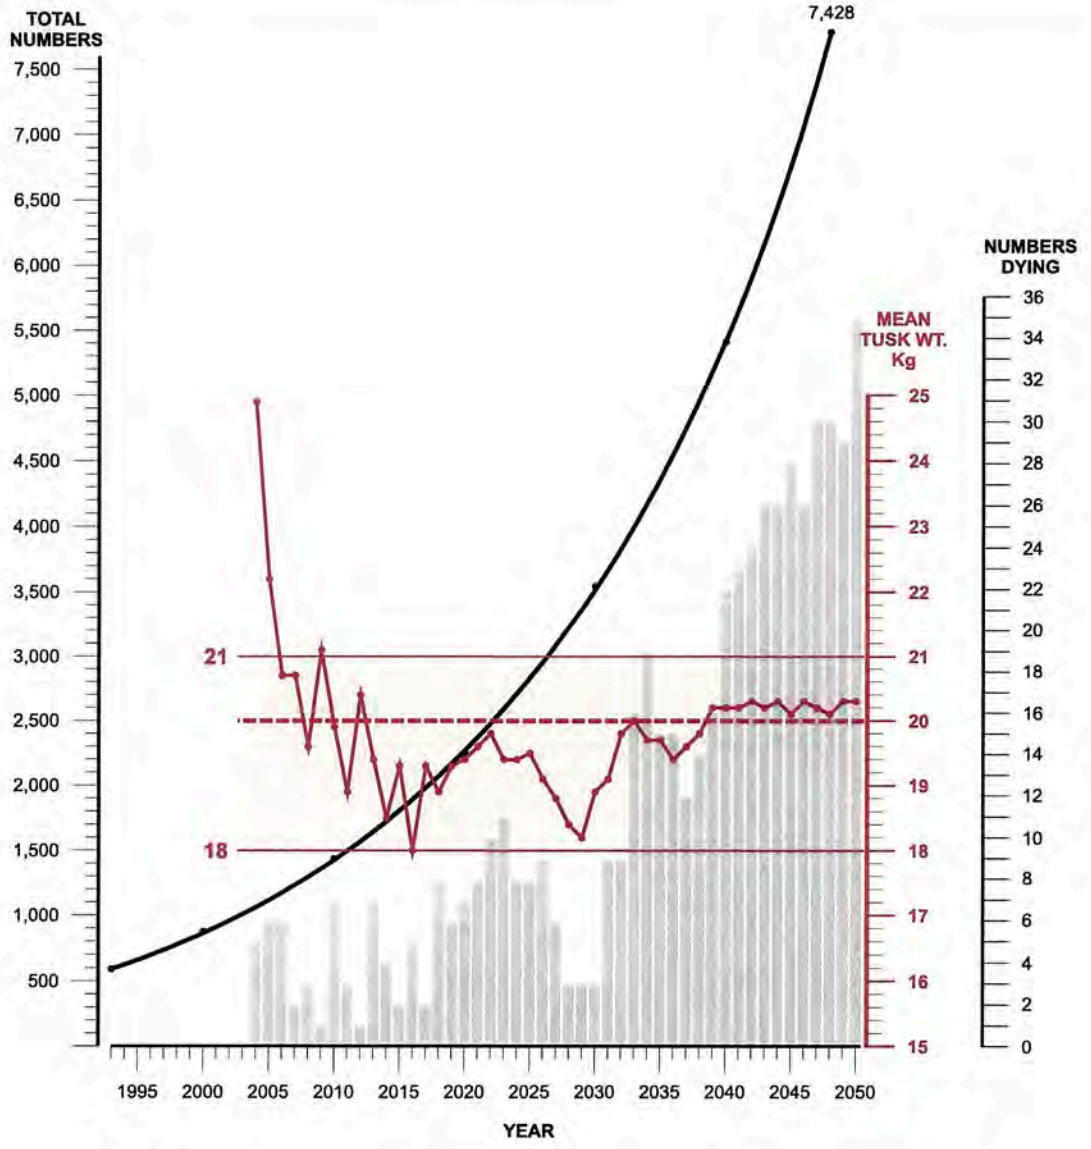

Figure 7: Automatic setting of hunting quotas in an unmanaged population

After the first few years of hunting the automatic quota-setting system maintains the mean tusk weight within about 2kg of the specified level (20kg per tusk) during the difficult period up until 2050 when the age structure of the males is highly irregular. After 2050 the age structure of the population stabilises and the mean trophy weight is maintained within less than 0.25 kg of the desired level. The hunting quota at this stage is 0.45% of the population.

Culling

A large range of options has been tested for possible culling regimes for the Savé Valley elephant population. However, most of these become irrelevant in view of the decision taken in December 2006 that the population should be reduced to below 1,000 animals by an annual offtake of 50-100 animals and should produce a more or less constant harvest thereafter to maintain the population below 1,000 animals.

In a large elephant population (10,000 or more) with a stable age structure, an offtake of about 3.3% of the total population taken from cow herds is sufficient to prevent population increase. Because the Savé Valley population is smaller, has not yet achieved a stable age distribution (and will not do so for another 40 years) and is subjected to losses from illegal hunting and problem animal control, a lower offtake is required. The effects of culling on the present elephant population have been examined for a range of percentage offtakes (**Figure 8** below).

Culling entails the removal of complete breeding herds and affects all females and all males up to the age of 10 years unselectively. The proportion of males older than 10 years included in breeding herds (and being culled) declines with age in the model. In addition to the culling each year, 5 animals are killed illegally, 5 are killed as problem animals and trophy hunting is in place with quotas being set automatically. The population in 2006 is slightly under 1,200 animals and culling begins in 2007.

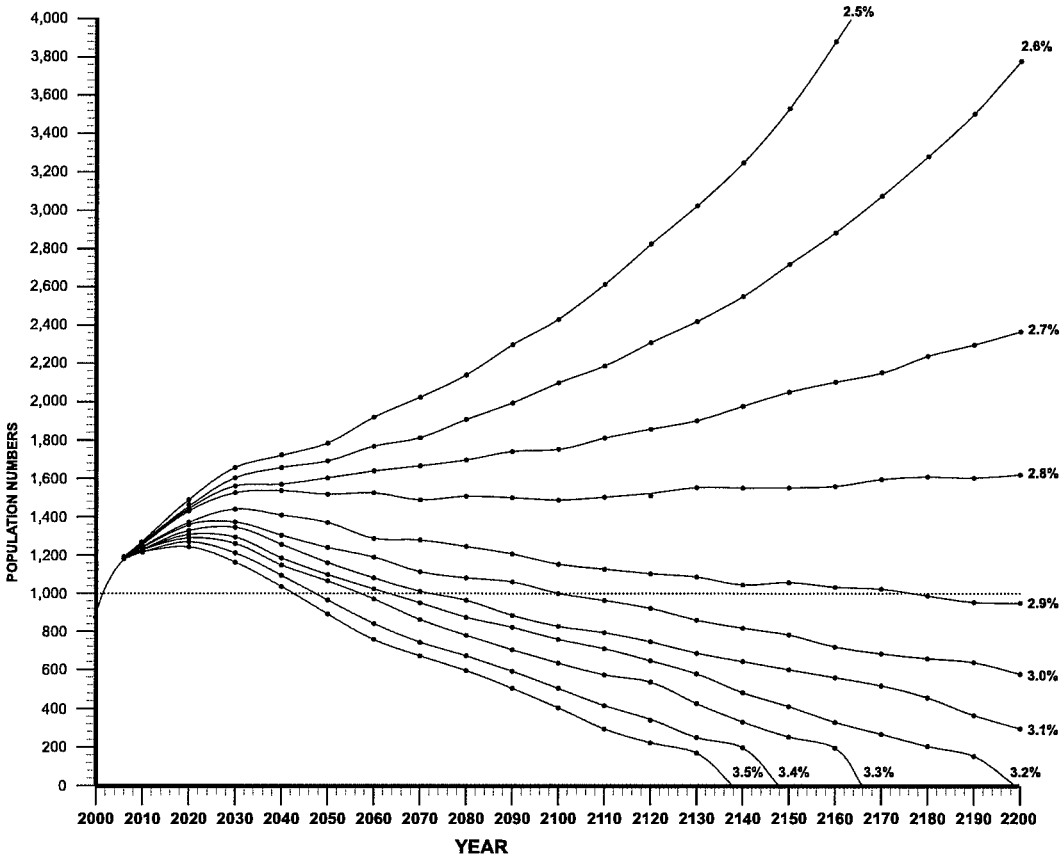

Figure 8: Response of the SVC population to various culling offtakes (%)

A culling offtake of 2.8% applied in 2007 when the population is about 1,200 animals will maintain the population at a more or less constant level. The conditions change slightly for smaller or larger population sizes at the start. If culling is initiated when the population is 1,500 animals it requires an offtake of 2.9% to hold the population constant and, if it is initiated when the population is 750 animals, 2.7% is sufficient. This is partly a 'small population' effect but it is also caused by the fact that the various fixed offtakes (PAC and illegal hunting) amount to a higher percentage of a small population than a large one.

The effects of very small differences in the percentage culling offtake are marked. The curves shown in **Fig.8** assume that present Savé elephant population is about 1,200 animals in 2007 when culling starts. **What if the population is not 1,200 animals ?** Errors of $\pm$ 20% in survey estimates are common. The offtake implied by 2.8% of 1,200 animals is 34 animals at the start. If the true population is 1,500 animals, this offtake is only 2.3% at the start. As the curves of **Fig.8** show, an offtake of 2.3% is not going to cause the population to decrease at all – in fact, it will increase at 2.5% at the inception of culling and, because it is a fixed offtake, the growth rate will increase with time. If the population **is** 1,500 animals, the minimum fixed offtake which will cause it to decline is 55 animals.

There is a second problem with the notion of simply applying a fixed percentage offtake to the population, even assuming that the population estimate of 1,200 animals is correct. The range of percentages which will cause the population to decrease in a gradual manner is between 2.9% and 3.1%. A 2.9% cull will take 170 years to reduce the population below 1,000 animals, a 3.0% cull will take 90 years and 3.1% will take 60 years. Higher offtakes (e.g. 3.5% will achieve the reduction in 40 years) will require to be adjusted to a sustainable offtake immediately after the population has dropped below 1,000 animals. If the objective of reducing the population below 1,000 animals is to be achieved in a reasonable time span, it will require higher offtakes at the start and a reduction in culling pressure once the threshold has been crossed.

This presents a quandary. In order to implement the Conservancy's decision on population reduction we require a method which, firstly, will ensure that the population is reduced below 1,000 animals in a reasonable period (say 15-30 years), secondly, will work whether the true population size is 1,000 animals or 1,500 animals and, thirdly, will satisfy as far as possible the desire for a continuous stream of benefits.

One possible method is to remove a fixed annual offtake from the population until it has dropped below 1,000 animals or decreased by 20%, whichever is the greater, and then to change over to a fixed percentage offtake which will maintain the population at the desired level. This method relies only on being able to detect a change of 20% in the population – which is not an unreasonable demand from air surveys with a reasonable high sampling intensity and prior stratification to reduce the confidence intervals. **The method has one very significant feature** – the time taken for the population to decrease below 1,000 animals (or change by 20%) allows an estimate to be made of what the starting population must have been in 2007 and identifies which of the trajectories shown in **Fig.9** on the next page is most likely to be the correct one.

As stated above, the minimum offtake which will cause a reduction in a population of 1,500 animals is 55 animals per year. If the offtake is set initially at 60 animals per year (which falls within the range agreed at the SVC Quota meeting in December 2006), it ensures that a decrease will happen and allows some striking deductions to be made from the data.

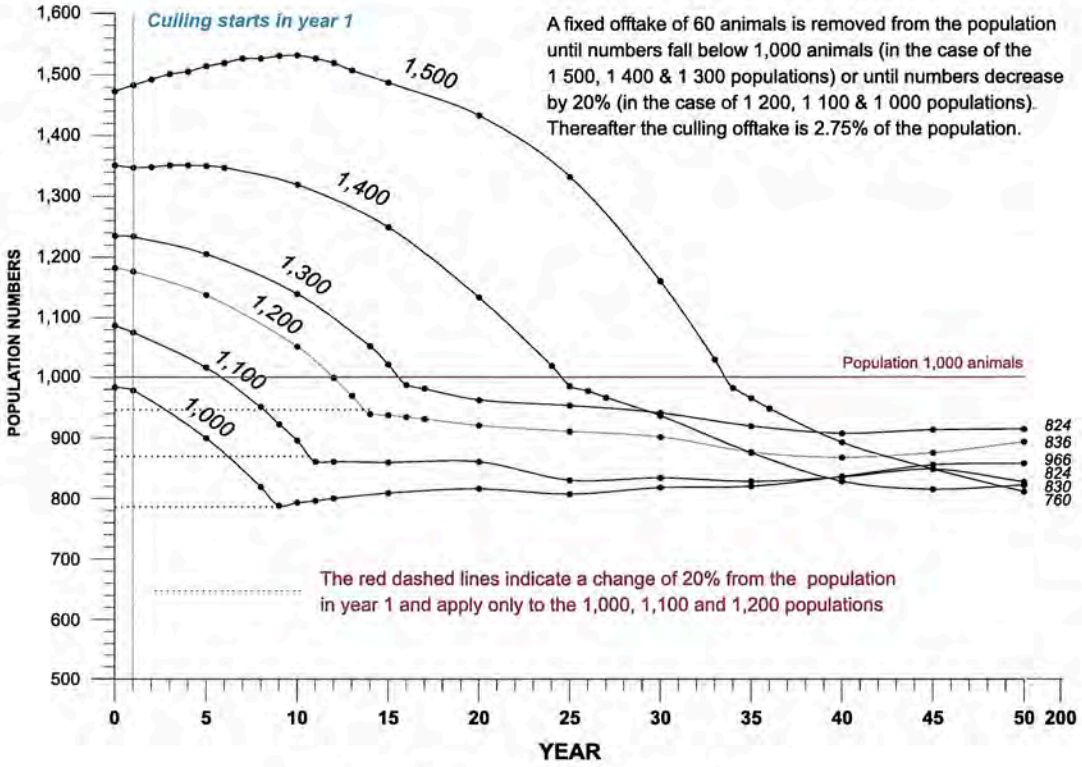

Figure 9: Combined culling regime

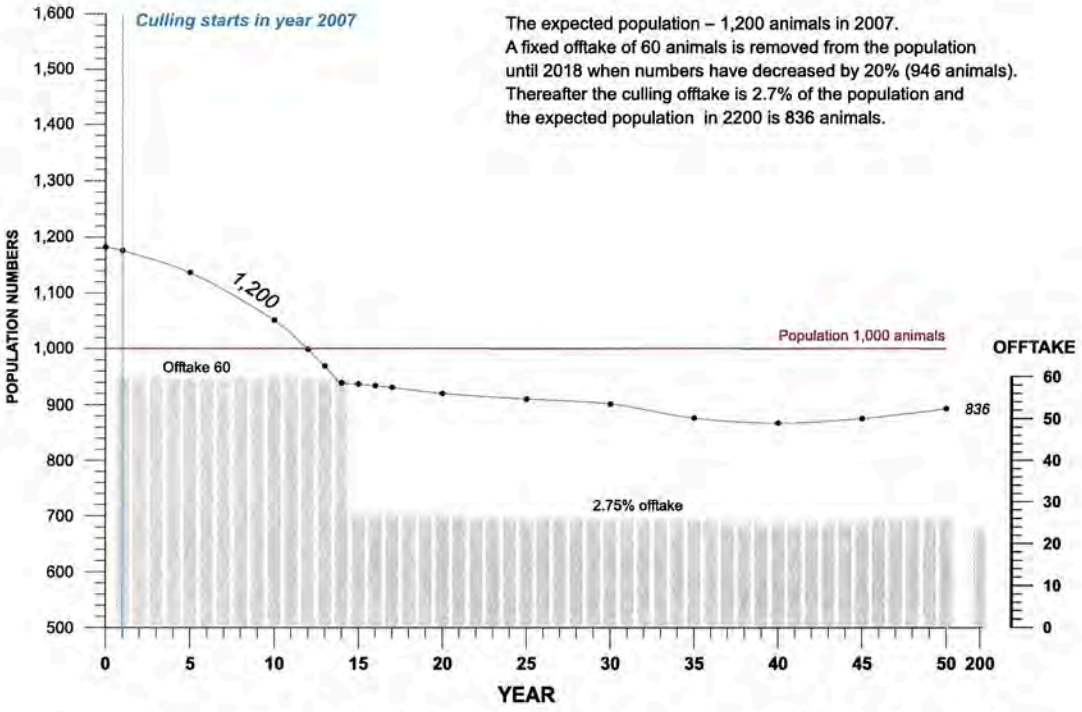

Figure 10: Culling regime applied to a population of 1,200 animals in 2007

If the population in 2007 was 1,500 animals, applying a fixed offtake of 60 animals will result in the population falling below 1,000 animals after 35 years; if the population had been 1,400 animals it would take 25 years; if the population had been 1,300 animals it would take 16 years. A population of 1,200 animals (the expected population – see **Fig.10** on the previous page) would decrease by 20% (946 animals) in 14 years; 1,100 animals would decrease by 20% (869 animals) in 10 years; and, if the initial population had been as low as 1,000 animals, the time taken to fall by 20% (786 animals) would be 9 years. **The time taken for these thresholds to be reached, assuming they can be measured, is a good indicator of the starting population.**

This culling regime is advocated as part of the **Recommended Management Programme** (page 28). However, an important caveat needs to be made: the timings given in the previous paragraph are affected by the extent of illegal hunting and problem animal control. Any reductions in these two forms of exploitation results in the time taken for each of the possible population sizes (1,000-1,500) to be extended before switching over to a percentage cull. Moreover, the culling offtake required to maintain the population below 1,000 animals increases when there is no other exploitation of the population and, in the case when this exploitation is zero, a 3% cull is needed to achieve the objective.

In the questionnaire survey, if elephant numbers were to be reduced most members favoured translocation of live animals where this was feasible but accepted that culling might have to be the fall-back option (Anderson 2005, section 6.3, page 35). From a public relations point of view, it would seem strategically sensible to explore all options for translocation of elephant prior to initiating culling and to use this option wherever possible even if a slight financial loss were incurred. However, elephant are a valuable resource and it does not make sense to forego the potentially high income from elephant products if the members and local communities have to bear substantial costs arising from translocation.

Some Conservancy members have indicated they would like to see fewer tuskless females in the population. An experimental approach could be adopted towards this aim by deliberately selecting cow herds for culling which contain a high proportion of tuskless females. It would be inadvisable, however, to shoot tuskless cows selectively from herds which are not going to be culled in their entirety. This would defeat the objective of maintaining the normal age structure of breeding herds and would be disruptive. Conventional thinking is that the removal of a complete herd minimises trauma and disturbance.

Culling complete breeding herds results in significant changes to the age structure of the population as a whole. The combined effects of culling, illegal hunting and problem animal control are demonstrated in **Appendix 9** (page 64). The effect on trophy hunting quotas is discussed in the next subsection.

Culling and trophy hunting

The effect on the age structure of the population under this type of culling regime is to produce a surplus of males from the age of 15 years old upwards. This allows an increase in the proportion of males which can be hunted as trophy animals. **Even with a fairly high level of problem animal control, sport hunting quotas can be doubled** (see **Appendix 9, Figs.A9.4 & A9.5**). At a level of 0.25 % PAC, quotas of up to 0.8% of the population are sustainable. This result may seem counter-intuitive but it should not puzzle a cattle farmer. The available 'grazing' is being re-allocated to a population which consists of a constant group of breeding females and a group of males which, in the absence of harvesting, would increase to outnumber the females.

The process of adjustment of the upper part of the male age pyramid takes some time and, if hunting offtakes are decided upon in the conventional manner, quotas cannot be increased to the maximum in the year that culling starts – it takes some 30-40 years before the age structure stabilises to the culling regime. However, the automatic quota setting method developed in this study deals with the problem satisfactorily and keeps the quota at all times close to the maximum sustainable level. Under the culling regime specified on page 18, and using the quota setting method described in **Appendix 7** (page 48), the quotas associated with a specified mean tusk weight of 20kg are shown in **Fig.11** below.

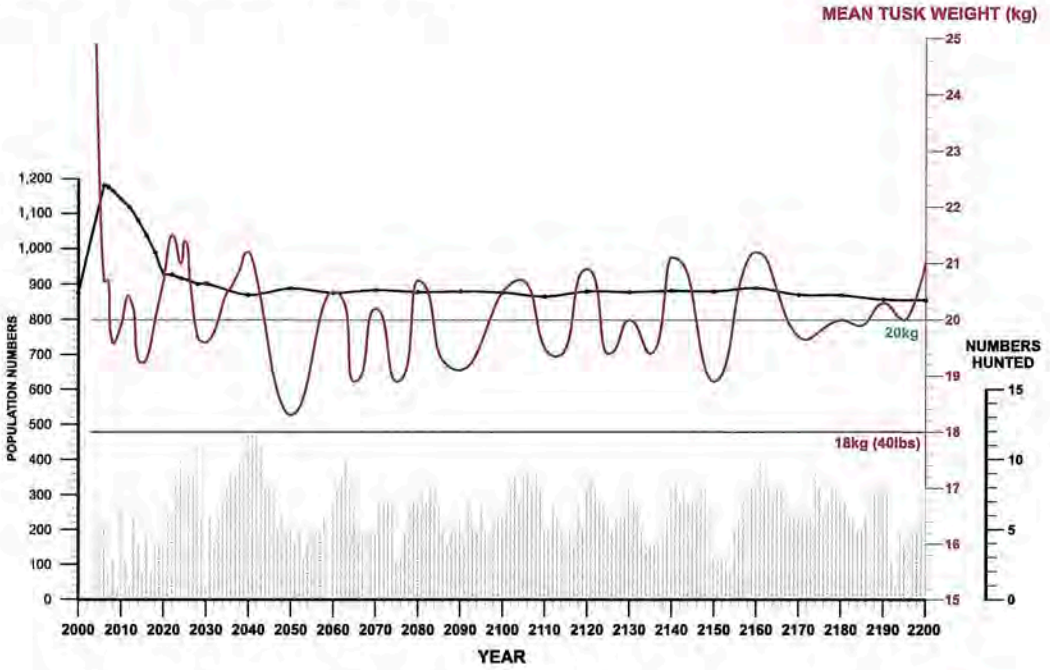

Figure 11: Automatic quota setting for the recommended culling regime

The mean tusk weight remains within ± 1kg of the desired level for most of the 200 year scenario and the method copes well with the two difficult periods near the start (around 2012 and around 2030) when the age structure of the adult males is particularly ragged. Most of the fluctuations in the mean tusk weight are caused by adjustments in the age structure and the effects of problem animal control and illegal hunting.

The facility to set quotas automatically provides a method of examining the required quota levels to achieve specified mean tusk weights. Curves are shown in **Fig.12** below for both the culling and no culling situations. In both cases, the 1993 Savé Valley elephant population has been used as the starting point and there is no other exploitation of the population (no PAC or illegal hunting). In the culling scenario, culling at a level of 3.3% begins in the year 2007 and, in all cases, the population increases for a number of years before beginning to decline. For each data point, once the population falls below 1,000 animals the culling offtake is adjusted to maintain the population between 900-1,000 animals until the year 2200. More than one data point was done for each specified mean tusk weight and the quota was taken as the average quota value over the years 2101-2200 when the age structure was stable.

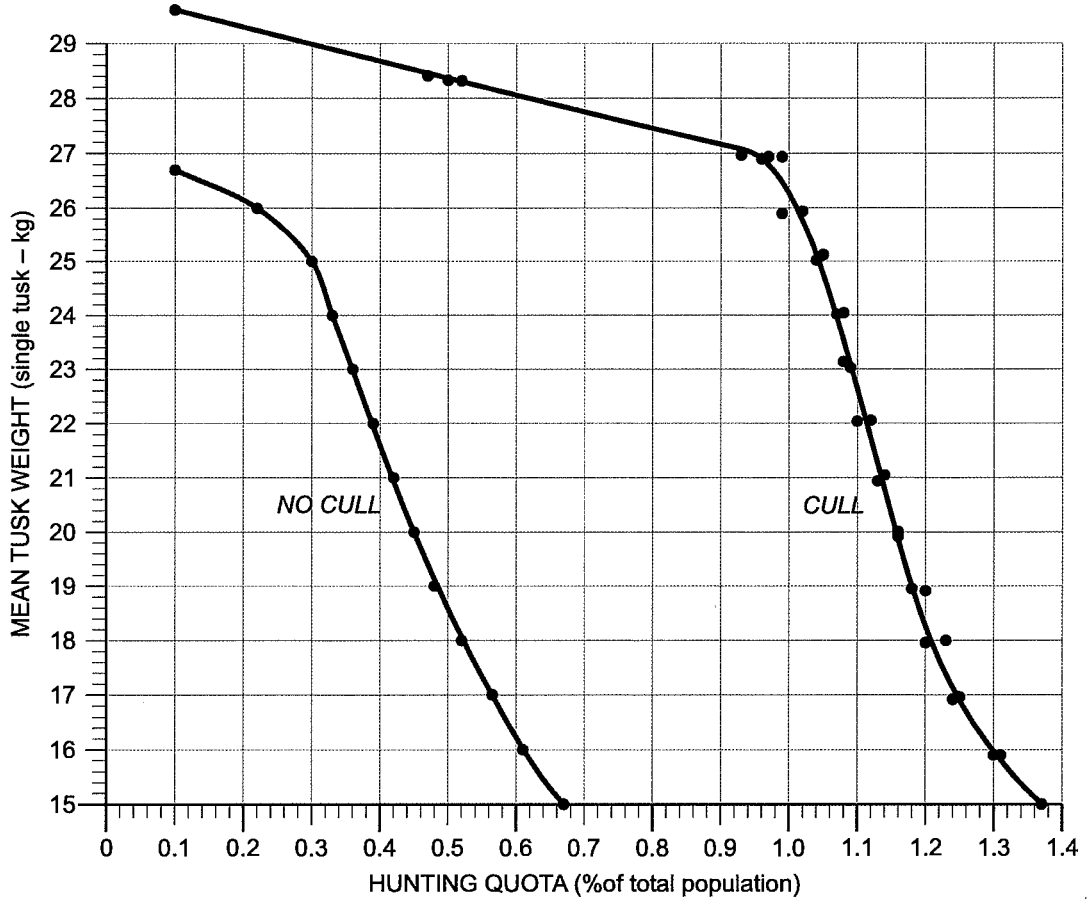

Figure 12: Relationship between mean tusk weights and hunting quotas

The results are fairly striking. Under the culling scenario, mean tusk weights greater than 25kg are possible with quotas greater than 1% of the total population. In the absence of culling, to achieve the same mean tusk weight requires the quota to be no more than 0.3%. A mean tusk weight of 20kg – a value which would satisfy most Conservancy members – is obtainable under the culling scenario with a quota of 1.16%: with no culling the corresponding quota is 0.45%.

Management of the Elephant Population

Goal and objectives

The following are suggested –

GOAL

The Conservancy wishes to carry an elephant population which earns a significant income for its members at the same time as sustaining biological diversity

ECONOMIC OBJECTIVE

To realise the full economic potential of elephants

ECOLOGICAL OBJECTIVE

To limit habitat damage and interspecific competition with other valuable wildlife species

SOCIAL OBJECTIVE

To reduce conflict between elephants and neighbouring people and to generate benefits from the elephant population

Management options

In view of the decision taken by the members' at the Quota Meeting in December 2006 to reduce the population gradually to less than 1,000 elephants, the need to review a range of options falls away. Only a few brief comments will be made here –

No intervention: This was never a serious option. In Anderson's 2005 survey (Section 6.3, p35) all respondents accepted that ultimately there would be a need to control elephant population numbers. Numerous advisors to the Conservancy have recommended that the population should be limited sooner rather than later (e.g. Martin 2005c).

Contraception: A plethora of arguments can be given against considering this as a method to limit the population but perhaps only two are necessary.

The Savé Valley Conservancy is not in the business of conservation for conservation's sake. It is a wildlife producer for the long term benefit of its members (including neighbouring local communities) and for the economy of the nation at large. Having successfully established a productive elephant population there is no logic whatsoever in stopping that production. It should be used to benefit the Conservancy and its neighbours.

The long term effects of applying a biological selection pressure on a large wild mammal species are unpredictable and very likely undesirable. The Conservancy has opted to use wild animals as a form of land use because domesticated species such as cattle have proved unsuccessful – the genetic modifications made to cattle over the years have rendered them unable to adapt well to the conditions of the south-east lowveld. It would be a pity to change the characteristics of elephants in the same way.

The fact that contraception is even considered in some situations as a potential solution to to overpopulation is a tacit **acknowledgement that elephants do become overabundant**. Often the same groups that advocate contraception are reluctant to concede that elephants cause a reduction in biological diversity and modify landscapes in an unacceptable manner.

Capture and translocation of complete elephant herds: Many conservationists see the translocation of elephants as the antidote to culling. Where numbers are considered overabundant in one locality, elephants can be moved to start new populations or re-establish populations which have been wiped out in other areas. This is unlikely to solve overabundance in Savé Conservancy in the long term – it may gain a little breathing space for a short period. Ultimately, elephants will double in numbers within 15-25 years and quickly reach densities where they become a problem again.

Translocation of elephants is expensive and the costs are only likely to be met through donor funding. However, the Conservancy would be well advised to consider this option first and use it when funds are available. The 'green' lobby is unlikely to be sympathetic if the SVC embarks on culling without exploring all alternative options to killing surplus elephants.

One important point needs to be made here: the proposed management programme treats elephants as valuable assets belonging to the SVC stakeholders. Culling should generate about US$100,000 annually which can be re-invested to enhance the wildlife status of the Conservancy. **In weighing up whether to co-operate on a translocation exercise which achieves the same as culling, the Conservancy should seek not only that all costs are met by outside agencies but also that their financial return is no less than they would have achieved through the culling option.**

Scenario modelling

A range of financial scenarios have been explored which were presented to the SVC members on 5th December 2006. These scenarios examined the expected financial returns from managing the Savé Valley elephants for population sizes ranging from 750-2,500 animals and included all income from hunting, culling and natural mortality. In view of the decision taken at the meeting, these analyses become less important but it is worth reiterating the conclusions drawn from them.

(a) There is remarkably little difference in the accumulated net income achieved from population sizes of 750–2,500 animals. With smaller populations (less than 1,250 animals) income accrues early from culling operations and earns interest: with larger populations (1,500 animals or more) little income is earned at the start but ultimately there is a slightly higher income from trophy hunting. However, the accumulated income up to the year 2050 from every scenario is between US$40-$50 million.

(b) Although ultimately a large population will earn slightly more income (disregarding the economic loss of habitat degradation), the return per live elephant in the population decreases progressively with population size (**Fig.13** below).

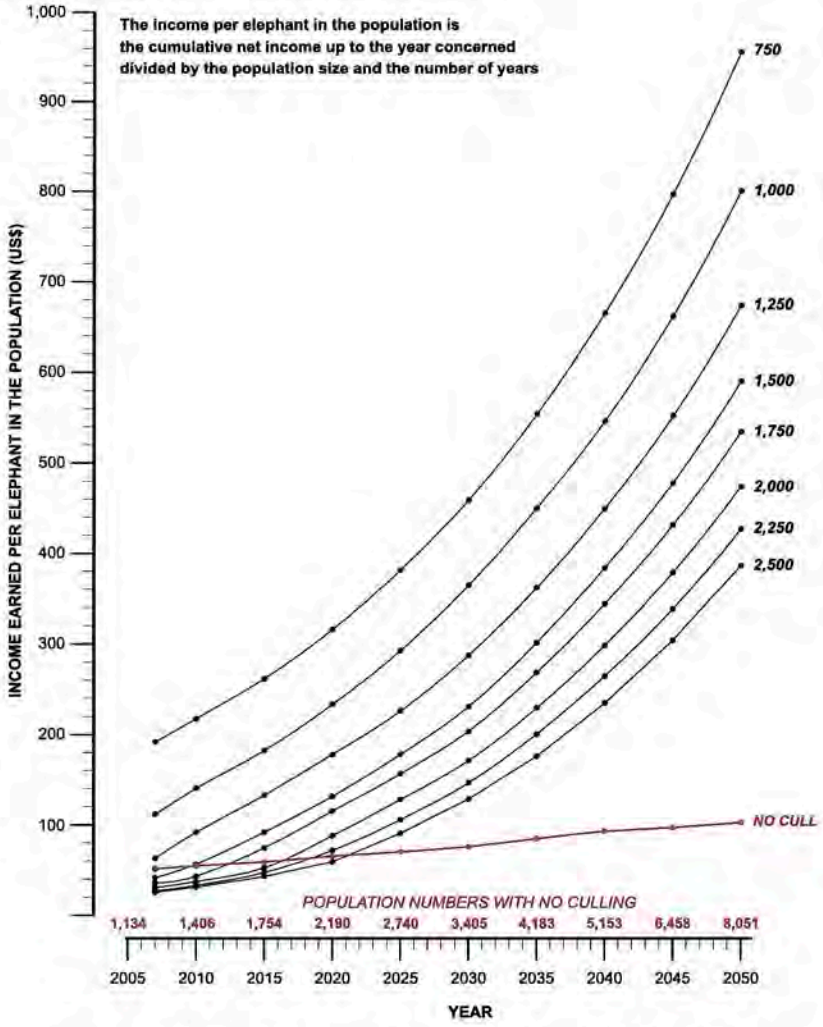

Figure 13: Financial return per elephant in the population

The single scenario arising from the decision to limit the population to less than 1,000 animals is now examined. The assumptions which underlie this analysis are listed below.

BIOLOGICAL ASSUMPTIONS

Longevity: **50** years

Age at first parturition: **12** years

Fecundity: **0.25** calves/year

Central mortality: **0.5** % (see page 41)

Population age structure in 1993 as shown in **Fig.2a** (page 8)

MANAGEMENT ASSUMPTIONS

Illegal hunting: **5** animals per year from 2004

Problem animal control: **5** animals per year from 2003

Hunting quotas set automatically and maintain mean tusk weight at **20kg**

Culling is according to the management recommendation given on page **18**

FINANCIAL ASSUMPTIONS

Interest of **5%** accumulates on all income annually from 2007

Safari Hunting

Elephant bull trophy fee: **US$10,000**

Daily rate: **US$1,000**

Minimum length of hunt: **20** days

Operating costs: **US$500** per day

Culling

Price of live calves 3-10 years old: **US$8,000** (see discussion on the next page)

Price of wet meat: **US$1** per kg

Dressing out proportion: **33** %

Price of dry salted skin: **US$5** per kg

Ivory prices: as shown in **Fig.14** on the next page

Natural mortality

All tusks from animals dying naturally within the Conservancy will be recovered

Sale of live calves

It was a standard practice in culling operations carried out by National Parks during the 1970s and 1980s to capture as many calves as possible between the ages of 3-6 years old for sale as live animals to any interested buyers. In all cases the income from such sales exceeded the commodity value of their meat and skin. The advent of the market for domesticated elephants has significantly 'altered the equation'. Martin & Jones (2000) estimated that the highest land use value possible for wildlife lay in the returns from using domesticated elephant in the tourism industry.

In December 2006 a large tourism operator in Zimbabwe was asked about the demand and prices which a supply of young elephants to be used for domestication could command. The advice was that the demand was high (notwithstanding the slump in the tourist industry) but that the maximum number of elephants the market would stand was about 5 animals per year. However, if such a supply were possible, the elephants would fetch prices around US$8,000 each indefinitely – a larger supply would reduce the price. Suitable elephants would be males or females between the ages of 3-10 years. Given the current controversy about capturing young elephants from the wild for domestication,[5] the SVC may be ideally placed to satisfy this market.

Ivory values

Because the African elephant is listed on Appendix I of CITES, ivory from Zimbabwe cannot be traded legally at present (see discussion on page 3). The Conservancy should store all ivory *in situ* pending the re-opening of legal markets or, alternatively, until mechanisms are established to sell the ivory at its real value.

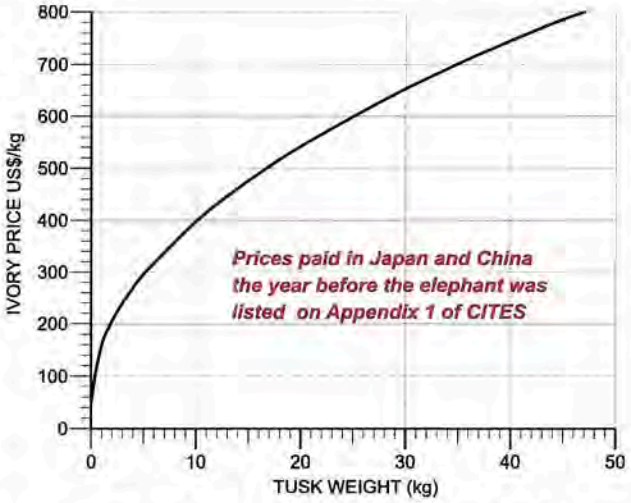

Figure 14: Ivory price versus tusk weight

The Conservancy could request Government to submit a proposal to CITES which would enable the SVC to sell ivory despite the general ban. Given the fact that the Savé Valley elephant population was established through the efforts of its members with the full support of Government and that any returns from ivory would benefit the stakeholders (including local communities), such a proposal would challenge the global politics of conservation.

In the analysis which follows, all income which should accrue from ivory is separated from other income in order not to give the impression of a higher potential return from elephant than will actually be the case in the immediate future.

5. Shearwater (Pvt) Ltd captured young elephants in October 2006 from elephant herds in Hwange National Park with Parks' permission but have found themselves the target of law suits from the NSPCA and court orders to release the elephants back into wild. One argument that has been used against them is that such elephants should only be acquired through legitimate culling operations (Martin 1999a). The SVC would be able to satisfy this requirement.

The expected income from an elephant population managed between 750-1,000 animals under the culling scenario outlined on page 18 is shown in **Table 2** below. The figures given are the average values over the period 2007-2057 rounded to the nearest US$1,000. There is a marked drop in the culling income in the year 2020 when the transition takes place from a fixed cull of 60 animals per year to an annual offtake of 2.75% of the population. However, this is compensated for by the improvement in trophy hunting quotas as the age structure stabilises after 2020.

Table 2: Annual income under assumed conditions

	GROSS	COSTS	NET	LAND USE
TROPHY HUNTING				US$/hectare
Safaris	187,000			
Meat	10,000			
Skin	3,000			
Subtotal	200,000	62,000	138,000	0.41
CULLING				
Calves	40,000			
Meat	14,000			
Skin	7,000			
Ivory	40,000			
Subtotal	101,000	11,000	90,000	0.26
FOUND IVORY	37,000	—	37,000	0.11
TOTALS	**338,000**	**73,000**	**265,000**	**0.78**

The net income attributable to ivory in **Table 2** is **US$77,000** per annum (about 29%). Without this amount, the realisable annual income for the Conservancy decreases to US$188,000 and the land use value from elephant management drops to US$0.55/ha. This is a substantial 'tax' on wildlife management.

The scenario shown in **Table 2** has been remodelled assuming that there is no illegal hunting and no animals are lost to problem animal control (**Table 3** below).

Table 3: Annual income with no illegal hunting or problem animal control

	GROSS	COSTS	NET	LAND USE
TROPHY HUNTING				US$/hectare
Safaris	318,000			
Meat	17,000			
Skin	5,000			
Subtotal	340,000	106,000	234,000	0.69
CULLING				
Calves	40,000			
Meat	18,000			
Skin	8,000			
Ivory	50,000			
Subtotal	116,000	11,000	105,000	0.31
FOUND IVORY	32,000	—	32,000	0.09
TOTALS	**488,000**	**117,000**	**371,000**	**1.09**

Problem animal control and illegal hunting are a staggering loss in net income to Savé Conservancy – well in excess of US$100,000 per annum. A fixed offtake of 5 problem animals per year results in the average potential hunting quota[6] having to be dropped from 1.12% of the population to 0.67% – a net financial loss of US$97,000 per year. With no illegal hunting, the initial culling offtake of 60 animals persists up until the year 2028 (under the assumed scenario it is 2020) and, when the transition is made to a fixed percentage of the population, it requires a 3% offtake from the population to maintain it below 1,000 animals. This increases the net income from culling by US$13,000 per year. The income from found ivory decreases slightly when there is no illegal hunting or PAC (US$32,000 versus US$37,000) – this would appear to be because the increased hunting quotas and culling offtakes leave fewer animals to die of old age.

The issues raised by Peter Lindsey in **Appendix 3** (page 37) regarding the relationship between neighbouring peoples and illegal hunting assume a very real urgency under this finding.

The cumulative income earned from elephant management over the period 2007-2050 (which includes 5% annual interest) is shown in **Fig.15** below., By the year 2050 the Conservancy should have accumulated earnings of **US$40 million** from its elephant management. Of this amount, US$9 million is made up of potential ivory income so that the realisable income is reduced to about US$31 million. Sport hunting contributes 77% and culling 23% of the realisable income.

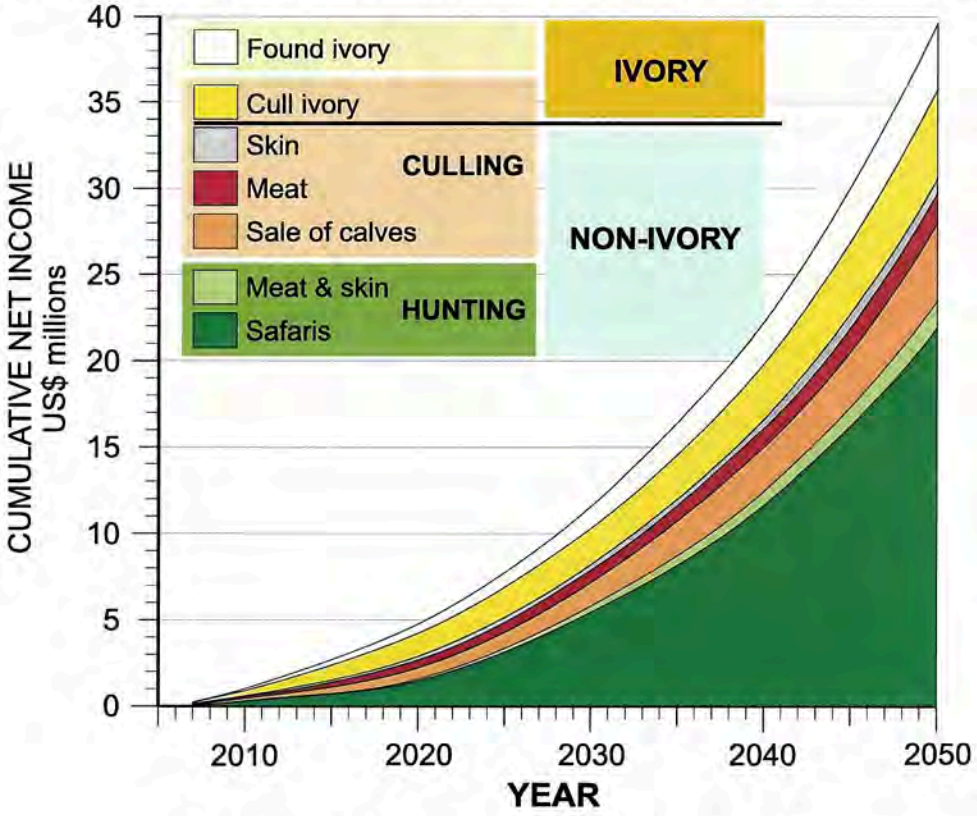

Figure 15: Cumulative income from management

6. When there is no PAC or illegal hunting, the automatic quota setting performance is improved if the constant governing the integral component in the formula given in **Appendix 8** (page 63) is changed from C = 0.03 to C = 0.005.

Recommended Management Programme

Given that –

- At present the Savé Valley elephant population is contributing far less than its available potential to the development of the Conservancy and its neighbouring peoples;
- Conflict with elephants is escalating in the communal lands surrounding the Conservancy resulting in a high level of problem animal control which, in turn, is reducing the income-earning potential of the population;
- Poverty is general in the areas adjacent to the Conservancy and this is giving rise to illegal hunting of elephants in the Conservancy for meat, further reducing the higher-valued management options;
- Over the next 50 years there is little difference between the maximum earnings possible from the elephant population in the Conservancy whether it is managed at a level as low as 750 animals or as high as 2,500 animals: however, the earnings per individual elephant in the population become progressively less the larger the population;
- Extensive modification of habitats takes place at elephant densities greater than 0.3/km^2 – and this level has already been exceeded in the Savé Valley Conservancy;
- Direct and indirect competition with other ungulate species is likely when the metabolic biomass of elephants is more than 25% of the available carrying capacity – and the population is at this level;

The Savé Valley elephant population should be maintained below 1,000 animals and managed for the maximum sustainable returns for the stakeholders, including neighbouring communities

In recommending how to achieve this, every effort has been made to use techniques which do not rely on accurate annual estimates of population numbers.

1. **Culling**: Beginning this year, complete cow herds totalling about 60 animals should be removed annually until the population falls below 1,000 animals or, if the current estimate indicates the population is close to1,000 animals, until there is a decrease of 20% in the number. Thereafter, an annual cull of 2.7% of the population estimate should maintain the population between 750 and 1,000 animals.

   The overall returns from culling will be increased if a limited number of live elephants are captured from the herds being culled for sale to the domesticated elephant market (page 25).

   Noting that some Conservancy members want more elephants on their properties and others want fewer, **population reductions should take place only those properties where the owners and managers want fewer elephants**. Management should be done at the scale of the entire conservancy but the actual sites where elephant will be removed should be by agreement amongst the members. This falls into the category of 'source-sink' population reduction. It should have the desirable effect of discouraging elephants from going onto properties or into vegetation types which managers want protected.

2. **Hunting**: The method of setting hunting quotas for trophy elephant developed in this study (page 13) should be applied to the population since it maximises quotas, maintains a given average trophy size, copes well with irregular age structures and automatically takes into account external factors such as PAC. It does require a complete and accurate record of tusk weights in each hunting season.

3. **Problem Animal Control**: Close liaison is needed with National Parks staff and neighbouring communities on this matter since the financial losses to the Conservancy from PAC are extremely high (page 26). Every effort should be made to reduce the numbers of animals killed on PAC including experimenting with non-lethal deterrents.

4. **Illegal hunting**: Illegal hunting for meat is achieving the lowest-valued use of a potentially valuable resource. Since neighbouring communities are stakeholders in the Conservancy, this is a self-defeating practice. It is possible that a regular and substantial supply of meat from culling operations and a raising of awareness about the financial implications will reduce the incentive for illegal hunting.

This management programme has not addressed the resilience question raised under **Complex Systems** (page 4) in the **Issues** section at the beginning of the report. In attempting to impose too inflexible a management programme on the elephants, there is a risk that other components of the ecosystem may lose resilience. This issue is raised again in the next and final section – **Research and Monitoring**. Perhaps, it is legitimate to use the ultimate cop-out at this stage: no elephant management programme that has been undertaken in Zimbabwe has ever persisted for very long or gone according to long term plans. The greatest threat may not lie in a loss of resilience caused by rigid management – rather it may lie in an ability to do any effective management as a result of rapidly changing externalities.

It was mentioned at the end of the section on **Complex Systems** (page 5) that the present system of seeking National Parks approval in advance to undertake management activities is not conducive to the adaptive and flexible management needed in the environment of the south-east Lowveld (Cumming 2005). The SVC should seek to change this *status quo* by negotiation with the government agency. **Far more emphasis should be placed on reporting at the end of a management year rather than on 'approval' at the start of the year.**

Research and Monitoring

Martin (2005c) reviewed the Savé Valley elephant research programme and was critical of a number of the projects. The schedule of research projects reads as a long list of 'essential' information needed prior to the taking of any management decisions.

There is no continuum between having a large amount of technical ecological data and taking management decisions (Bell 1983). The elephants, habitats, people, politics, management and economics in Savé Valley Conservancy constitute a complex system in which the outcomes of various management options will not easily be predicted by reductionist science. Ultimately, decision-taking may be based on aesthetic preferences as to the appearance of landscapes or the economic factors affecting commercial operations. Indeed, the aspirations of the SVC members may provide a higher-order basis for decision-taking.

There should, however, be concerns about the perceptions of research and monitoring which appear in the report on the SVC members' aspirations for the elephant population (Anderson 2005). It is clear not only from the members' opinions but also from the manner in which the questionnaire is structured that many see a distinct separation between research and monitoring. Research is seen as the carrying out of discrete one-off studies which (hopefully) answer a question after which 'the file can be closed'. One respondent to the questionnaire (Anderson 2005, section 8, page 31) questioned this approach, expressing a view that the greater need was for monitoring. If more than lip-service is to be paid to the concept of adaptive management then **there should be no conceptual difference between research and monitoring.**

In a situation such as that affecting the Savé Valley elephants, **adaptive management is the research vehicle.** The research process consists of making hypotheses, carrying out management actions, monitoring the outcome of those actions and modifying either the management actions, hypotheses or objectives as a result of the findings. Few studies have a valid life outside of this process. Hilborn and Ludwig (1993) state that "in many cases the only way to learn about sustainability is to exploit the resource". This is the basis of adaptive management.

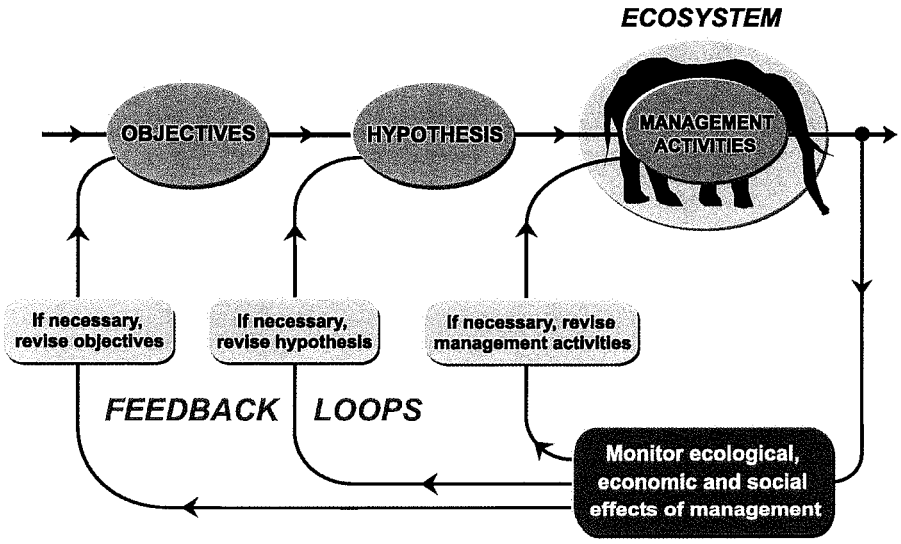

Figure 16: Adaptive Management

An elegant description of adaptive management is given by Bell (1986) –

> ***"The concept of Adaptive Management is simple and might equally be well be described as common sense. In this concept, conservation and wildlife management are seen as being based on a set of disciplines, ecology, sociology, and economics, which are exceedingly complex and poorly understood. Therefore, conservationists and wildlife managers characteristically operate in situations where the outcome of their actions is uncertain. Whenever we do something in these areas, we are never certain that the results will be as we expect, and we can be confident that there will be at least some unexpected side effects.***
>
> ***We argue, therefore, that the profession of wildlife management as a whole must be consciously structured to cater for these uncertainties, as well as for changes in value systems, policy and technical capabilities. This means that the profession as a whole must be organized as a self-testing and self-evaluating system operating by feedback in relation to clearly defined objectives. In particular, each act of management or management procedure must designed to serve as a test of the theory on which it is based. It must have a clearly designed objective, a defined procedure, preferably including controls, a means of recording and reporting progress in relation to the objective, and a means of evaluating the procedure on the basis of which to decide whether to continue, improve or discontinue it as appropriate."***

All research and monitoring needs to be seen as a potential overhead cost for the conservancy. Although donors may fund particular studies, any project which has to be continued after donor funding ends requires to be scrutinised critically because of its implications for the conservancy overhead management costs. Reflecting on the definition of adaptive management given above, Bell (pers.com.1998) observed that it "*was written in the days when we felt we should be doing more research to reduce uncertainties. These days it should be stated as part of the definition of adaptive management that intensive levels of research which will result in a system being too expensive, and hence unsustainable, cannot and should not be attempted.*"

From the intensive population modelling work done in this study and from the discussions held at the Quota Setting Meeting in the Conservancy in December 2006, my perceptions of research priorities have shifted slightly since the review done on the Savé Valley elephant research programme in 2005. At that time I advocated a major research thrust into obtaining a better understanding of the age structure of mature adult males in the population since it seemed critical to the management of trophy hunting. I no longer regard that as a priority since the method of automatic quota setting developed in this study is based solely on the mean tusk weight from hunting and requires no knowledge of the numbers or ages of the adult males.

At that time I also was concerned that whilst the skewing of the age pyramid caused by culling might produce more trophy males it might also cause an increase in male biomass which would defeat one of the main objectives of the culling – that of reducing the impact on habitats. I have since tested that scenario and found it to be far less significant than I feared.

Record-keeping

The highest priority for the Conservancy is to keep accurate records of the results of its management activities. *Inter alia* this must include a complete record of all elephant mortality from culling, hunting, problem animal control and illegal hunting; trophy records;[7] meat, hide and ivory production from elephants; financial records of all earnings due to elephant (at the corporate level); and quantitative and qualitative socio-economic information relating to elephants and neighbouring communities.

The Conservancy is engaged in a real-life adaptive management experiment and this monitoring is vital not only for its own survival but also for the broader knowledge of wildlife management as a land use. The outcomes of the all the population modelling scenarios in this study are no more than hypotheses to be tested under adaptive management. These hypotheses include assumptions about the fundamental population dynamics of elephant, their response to various management treatments and the potential earnings from elephants in the market place. The validity of the model needs to be tested and the model needs to be updated and improved using the real data from field results.

Population numbers

In testing various culling scenarios in this study, it is apparent that all of them could be a long way off target if the estimates of elephant population numbers are grossly inaccurate. The culling regime advocated is robust and does not require annual elephant surveys: however, it does require periodic surveys (e.g. every five years) which have a high degree of accuracy and precision. For standard strip count air surveys this implies prior stratification of the conservancy based on previously observed elephant densities and a relatively high sampling intensity. Any 'total count' survey method should be modified into a 'block count' format so that standard errors and confidence intervals can be calculated.

In the review done in 2005, I felt that the absolute number of elephants was not the key issue for decision-taking and that adaptive management based simply on the trends in vegetation change could provide the basis for deciding annual culling offtakes. A new factor has entered into the equation which alters this perception. The desire of the members to avoid any large initial culls and to derive a steady stream of benefits from elephant harvesting does require a better knowledge of elephant numbers – particularly because the response of the elephant population to any given culling offtake contains unexpected delays.[8]

Since survey costs will ultimately be borne by the Conservancy, the emphasis should be less on frequent surveys and more on precise and accurate surveys at longer time intervals.

---

7. It was apparent at the quota setting meeting in the Conservancy in December that the record of hunting trophies was severely deficient.

8. For example, an annual cull of 60 animals from a population of 1,500 animals will allow the population to increase for 8 years before it begins to decline. It takes another 25 years for the population size to fall below 1,000 animals but it takes only another 15 years for it to go extinct.

Vegetation monitoring

Although there is a need for an unbiased system to assess the overall status of habitats, the impact of elephants on vegetation is not uniform and **a general system may not capture sites of specific concern.** There is a strong case for identifying the areas where elephants are having a noticeable impact at the moment and areas where they might have an unwanted impact. Simple monitoring systems which are easy to maintain – such as photopanoramas – should be established in the selected sites and plans made to monitor them annually (Dunham & Robertson 2002).

Resilience

The question of possible negative impacts of constant harvesting on the resilience of both the ecosystem and the elephant population remains unanswered. Before any simplistic research project is framed to answer it, there is merit in calling a round-table discussion of relevant persons to tease out the questions which need to be asked and the indicators which might provide some measure of larger scale ecosystem changes resulting from the culling. In a discussion at the start of this study, Graeme Cumming (pers.comm. December 2006) asked the question "Resilience of what to what ?" and it seems to me that without some clarity of the ecosystem components which one might expect to be adversely affected by culling, the forebodings will remain vague. It may well be that the first indicators of unwanted change will be detected by the Conservancy members themselves and this will provide the basis for the next steps in investigation.

Other studies

Despite having spent weeks modelling different population scenarios for the Savé Valley elephants, I feel there are many more aspects to be explored. It was only at a fairly late stage in this study that I discovered the full impact of problem animal control and illegal hunting on the production from the population. Two avenues of further exploration suggest themselves.

The automatic quota setting method for trophy hunting can be used as a 'reverse tool' to give information about the extent of processes for which there are no data (e.g. at present the Conservancy does not know how many problem animals are killed outside their boundaries because National Parks does not provide them with this information). In a population where there is culling but no problem animal control, the expected quota for trophy males which are being managed to produced a mean tusk weight of 20kg should be around 1.15% of the population. If the actual quota to produce this tusk weight is as low as 0.5% of the population, it is a clear indicator that problem animal control must be accounting for a large number of potential trophy males. Some population modelling would enable the relationship to be calibrated.

In a population where there is culling but no illegal hunting, it requires at least a 3% offtake from the population to prevent it increasing. If it turns out in practice that an offtake of 2.7% is sufficient to limit the population, then this is an indication that somebody else is using 0.3% of the production !

Appendix 1

Management Recommendations made in November 2005

These recommendations were made by the consultant last year as part of a review of the elephant research programme in the Savé Valley Conservancy (Martin 2005c).

We are ready to examine a provisional management programme which, firstly, goes some way towards satisfying the desires expressed by members in Anderson (2005) and, secondly, leads logically to an associated research programme.

1. It has been argued that the safest option is to **act immediately in limiting the population**. Costs are lower, damage is pre-empted, and the impact of small culling operations is low.

   I do not believe that population reduction should wait until some quantitative 'thresholds of potential concern' have been crossed (such as South African National Parks seem intent upon employing). Such indicators are unlikely ever to supercede the ability of perceptive managers to detect situations which are not to their liking.

2. Taking note of the potentially conflicting situation where some members want more elephants and others want fewer, it is suggested that **population reductions take place only those properties where the owners and managers want fewer elephants**. Management should be done at the scale of the entire conservancy but the actual sites where elephant will be removed should be by agreement amongst the members.

   This would fall into the category of 'source-sink' population reduction. It has the desirable effect of discouraging elephants from going onto properties or into vegetation types which managers want protected.

3. **Management should be aimed at limiting elephant damage to key habitats.** This implies that vegetation monitoring sites need to be established in these key habitats. The number and location of these sites is a subject for a separate study. The work already done by Baker (1994), Du Toit & Du Toit (1994) and recommendations from Roberston & Dunham (2002), and Dunham & Roberston (2002) provide an adequate basis for deciding on these sites. The vegetation mapping currently being done by Robertson (2005) may provide additional insights into the monitoring requirements. Two important points need to be made with regard to this monitoring –

   If the aim is to reduce damage to key habitats, then **the ongoing numbers of elephant to be removed from the population must be decided from the results of this monitoring and not from percentage offtakes applied to aerial survey estimates.**

   Because of the lag effects in vegetation recovery following elephant population reduction, **counts of numbers of canopy trees may not be the appropriate indicators for decision-taking**. Once a woodland has been destroyed, many years may have to pass before it will be restored. An index of its recovery may lie in the recruitment of woody plants of the dominant tree species into younger and smaller age classes. Ultimately, decisions to remove animals may have to fall back on the aesthetic perceptions of the conservancy owners and managers – and these decisions may be entirely qualitative.

4. Some conservancy members would like **larger numbers of elephant in order to increase trophy hunting quotas**. It has been pointed out that, in the absence of any other management, the numbers of elephant which can be hunted sustainably is linearly proportional to the size of the population. To make any significant difference to present trophy hunting quotas requires substantial population increases (200 additional animals for every bull which can be placed on quota).

   One way to increase trophy hunting quotas is to carry out conventional culling (or translocation of complete herds). It may seem counter-intuitive but it is a process of re-shaping the population age pyramid to produce a surplus of adult males for the same numbers of animals on the land. However, the process requires detailed monitoring because the net biomass on the land may increase – even if numbers are less. Also, since the major damage to vegetation is done by adult males, population reductions may not be as effective as hoped for in conserving vegetation. These issues point the way to a major research focus.

Appendix 2: Modelled Growth of the Savé Valley Elephant Population

Running the model with the initial cohort shown in **Fig.2a** (page 8) results in population of about 1,254 animals in the year 2007. The initial growth rate of population is about 5% in 1994 rising to a peak of about 6% in 2003 when the large group of subadult females under the age of 10 years reaches maturity and stabilising at 4.7% when the population reaches a stable age structure after about 50 years. Population growth remains above 5% until the year 2015.

It takes 50 years to get rid of the various 'bulges' in the age pyramid and the population in the year 2050 would be about 8,000 animals – which is somewhat academic since management interventions will have been made well before this time.

The age structure of the starting cohort can be varied considerably from the values used here without significantly affecting the results of the modelling. The 'normal' rate of growth of an elephant population which has achieved a stable age structure is between 4.5 and 5% per annum. Observed growth rates which exceed this are seldom the result of any increased breeding performance but are rather an artefact caused by the population having not achieved a stable age structure.

Mockrin (2000) quotes Calef (1988)'s figure of a growth rate of 7% for an elephant population. With a stable age structure such growth rates are almost impossible to achieve – even by setting mortalities equal to zero and fecundities at one calf every three years.

This calls into question the value of any study attempting to establish the age and sex structure for the population –

(1) The results of the study will be true for a moment in time only – it will take 50 years before the age structure stabilises;

(2) The apparent growth rate derived by comparing the young of year with the total population is a meaningless statistic – until the stable age structure is achieved;

(3) Once management interventions are made the age and sex structure will alter anyway;

(4) Given the possible synchronising of births caused by seasonal effects in an area such as Savé Valley, the measurements would have to be continued over a minimum of four years to overcome these cyclical effects;

(5) Finally, it is difficult to see what the data would be used for. They are not needed for management decisions.

#	Year	Pop	No/km²	Rg %

Appendix 3

Elephant cropping and an opportunity to address an underlying cause of the poaching problem

Transcript of an e-mail communication from Peter Lindsey to various SVC stakeholders, 8 December 2006

I was not at the recent quota meeting, but I believe that the decision was taken to crop elephants annually starting this year, given parks permission. I believe that this represents a potentially very useful opportunity for the conservancy to utilize the meat to address one of the underlying causes of the severe poaching problem currently affecting the conservancy.

The statistics we are collecting on poaching within SVC show very clearly that there is a major spike in poaching incidences in the late dry season. This coincides with the time when food shortages in the neighbouring communal lands are at their worst. During the interviews we have done (through Steven Matema, the masters student working with us from UZ) with people in the communal lands who buy meat from poachers, one thing that came out strongly was that poached bush-meat was often the only option that people have for buying game meat (without walking many kilometers through the conservancy). Many people indicated that the lack of legally supplied game meat creates a huge market for poached meat. So, if game meat was cropped and sold at an affordable price on the boundary of the conservancy at several points close to population centres (or actually at the centres) during the late dry season, this may help to remove one of the key underlying causes for poaching.

As you all know, snaring is extremely wasteful (67% of animals killed in snares rot) and so replacing illegal supply of bush-meat with a legal supply should help achieve sustainability of off-take. I believe that in the long run the conservancy needs to do more to utilize protein resources occurring in the conservancy to address the causes of poaching. Potential protein sources are varied and include things like mopane worms, quelea and fish as well as game meat. I don't believe that this need represent a cost to the conservancy, as the protein could be sold and much of it is not utilized at the moment anyway.

I spoke informally to some people from Veterinary Services in Chiredzi this week and asked them what the legal issues would be regarding selling game meat outside of the fence. They said that they did not foresee a problem with this but that they advise that if the conservancy would like to sell meat outside of the fence, that it should meet with Veterinary Services to discuss the issue.

I suggest that the conservancy think seriously about developing a coordinated programme of making sustainably harvested game meat available for sale at an affordable price in the communal lands neighbouring the conservancy during the late dry season. The elephant cropping programme provides an excellent opportunity to do this. I believe that such a programme would be much more effective if it were coordinated, and did not involve individual ranchers doing their own thing. Perhaps this would be an opportunity to kick start the Save Valley Conservancy Trust by making meat available to them somehow, possibly as part of their proposed stake holding in the conservancy. The Trust really needs to get started, and perhaps this is an opportunity to do that.

I just wanted to share my thoughts on this issue and to see what the conservancy members thoughts are on this suggestion.

Appendix 4

Understanding the Complexity of Economic, Ecological, and Social Systems

A Précis of Holling (2001)

For any framework to be useful in assessing information about the internal factors and external influences that interact to determine sustainability, it must satisfy the following criteria –

- Be "as simple as possible but no simpler" than is required for understanding and communication.
- Be dynamic and prescriptive, not static and descriptive. Monitoring of the present and past is static unless it connects to policies and actions and to the evaluation of different futures.
- Embrace uncertainty and unpredictability. Surprise and structural change are inevitable in systems of people and nature.

The Adaptive Cycle

Three properties shape the adaptive cycle and the future state of a system –

- The inherent potential of a system that is available for change, since that potential determines the range of future options possible. This property can be thought of, loosely, as the "wealth" of a system.
- The internal controllability of a system; that is, the degree of connectedness between internal controlling variables and processes, a measure that reflects the degree of flexibility or rigidity of such controls and their sensitivity to perturbation.
- The adaptive capacity; that is, the resilience of the system, a measure of its vulnerability to unexpected or unpredictable shocks. This property can be thought of as the opposite of the vulnerability of the system.

These three properties – wealth, controllability, and adaptive capacity – are general ones, whether at the scale of the cell or the biosphere, the individual or the culture. They are the properties that shape the responses of ecosystems, agencies and people to crisis.

Four key features characterise an adaptive cycle, with its properties of growth and accumulation on the one hand and of novelty and renewal on the other –

(1) Potential or wealth increases incrementally in conjunction with increased efficiency but, in the process, an increasing rigidity develops.

(2) This results in an increasing vulnerability (decreased resilience) to external threats. The system becomes an accident waiting to happen. A break can trigger the release of accumulated potential and the system then moves abruptly into a phase of reorganization.

(3) Innovation then occurs in pulses or surges when uncertainty is great, potential is high and controls are weak, so that novel recombinations can form. This is where low connectedness allows unexpected combinations of previously isolated or constrained innovations that can blossom into new opportunities.

(4) Those innovations are then tested. Some fail, but others survive and adapt in the next phase of growth.

It is as if two separate objectives are functioning in sequence. The first maximises production and accumulation; the second maximizes invention and reassortment. The two objectives cannot be maximized simultaneously but only occur sequentially. And the success in achieving one inexorably sets the stage for its opposite. The adaptive cycle therefore embraces two opposites: growth and stability on the one hand, change and variety on the other.

Panarchy

Panarchy is the hierarchical structure in which systems of nature and humans are interlinked in never-ending adaptive cycles of growth, accumulation, restructuring and renewal. **The functioning of those cycles and the communication between them determines the sustainability of a system.**

A dynamic hierarchy serves two functions. One is to conserve and stabilize conditions for the faster and smaller levels; the other is to generate and test innovations by experiments occurring within a level. Each level is allowed to operate at its own pace, protected from above by slower, larger levels but invigorated from below by faster, smaller cycles of innovation. The whole panarchy is therefore both creative and conserving. The interactions between cycles in a panarchy combine learning with continuity.

Understanding hierarchies shifts attention away from the small-scale view that has characterised much of biological ecology to a multiscale and landscape view that recognizes that biotic and abiotic processes can develop mutually re-enforcing relationships over ranges of scale.

This process can serve to clarify the meaning of "sustainable development". Sustainability is the capacity to create, test and maintain adaptive capability. Development is the process of creating, testing and maintaining opportunity. The phrase that combines the two, "sustainable development", therefore refers to the goal of fostering adaptive capabilities while simultaneously creating opportunities. It is therefore a term that describes a logical partnership.

Human systems exhibit at least three features that are unique – features that change the character and location of variability within the panarchy and that can dramatically enhance the potential of the panarchies themselves. Those three features are **foresight, communication,** and **technology**.

Under conditions of crisis, the elements of a prescription for facilitating constructive change are as follows –

– Identify and reduce destructive constraints and inhibitions on change, e.g. perverse subsidies;

– Protect and preserve the accumulated experience on which change will be based;.

– Stimulate innovation and communicate the results in a variety of fail-safe experiments designed to probe possible directions in a way that is low in costs in terms of human careers and organizational budgets.

– Encourage new foundations for renewal that build and sustain the capacity of people, economies and nature to deal with change.

– Encourage an understanding of change and communicate it to people at different levels of administration and governance, engaging them in the process of change.

The era of ecosystem management via incremental increases in efficiency is over. We are now in an era of transformation, in which ecosystem management must build and maintain ecological resilience as well as the social flexibility needed to cope, innovate, and adapt.

Appendix 5

Reproductive Parameters and Population Model

The biological parameters which determine the population dynamics of elephants are summarised in the table below. Sources of data include Craig (1984, 1992), Dunham (1988), Hanks (1972), Laws (*et al* 1975), Lindeque (1988), Martin (2004) and Smithers (1983).

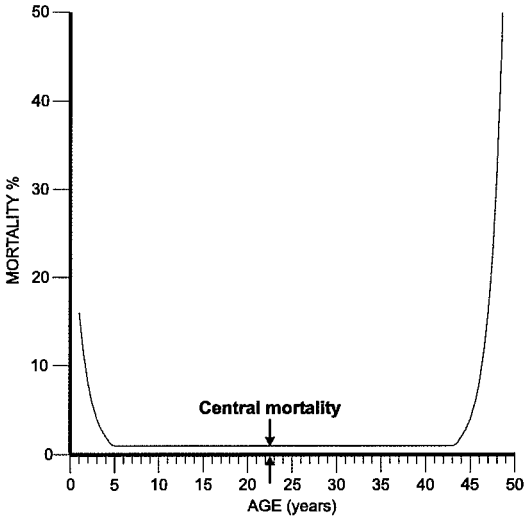
Reproductive Parameters for Savanna Elephant

Seasonal breeding	Most populations have a distinct breeding peak during the rainy season although births may occur in any month of the year
Gestation	22 months
Age at first conception	The median age is probably about 10 years old but in favourable conditions some females may conceive as early as 8 years of age. Laws (*et al* 1975) recorded conception being delayed until 19 years of age in a high density population in Uganda.
Age at first parturition	In populations not suffering density-dependence effects, about 50% of the 12 year-old females will produce calves and by the age of 15 all females will have produced their first calves.
Fecundity (adults)	The effect of seasonal breeding results in most elephants producing a calf every four years throughout their life after their first parturition. Fecundity may decline in the last few years before death.
Longevity	Elephants are generally assumed to live to about 60 years old. On the basis of age criteria deficiencies, Craig (1992) considered it more likely that the age of senescence was about 50 years old.
Mortality (adult females)	Other than in times of environmental stress (drought or disease), natural mortality is very low – probably less than 0.5% per annum
Mortality (adult males)	Mortality is slightly higher than in females. Young males between the ages of 20-25 years have been recorded as suffering a higher mortality than the other adults in the population.
Mortality (juveniles)	Data on calf mortality are difficult to collect. Work on elephant life tables suggests that in normal conditions juvenile mortality does not exceed 10% in the first year of life.

Fecundity: Lindeque (1988) derived average fecundities for the female elephants in Etosha National Park in 1983 and 1985 from two shot samples which included 103 and 214 females respectively. His finding was that, over their main breeding life span, the females were producing almost exactly one calf every four years (i.e. a fecundity of 0.25 including calves of both sexes). In 1983 no animals under the age of 12 years were pregnant or lactating but in 1985 one quarter of the animals in the 9-12 year old age group were pregnant. An assumption of the model is that there will always be sufficient adult males with which to breed – an assumption which may not be satisfied if, for example, sport hunting quotas are too high. In all of the population simulations carried out in this study a mean fecundity of 0.25 has been assumed for mature animals and the age at first parturition has been spread across the age groups in the manner shown below –

Age	0 - 9	10	11	12	13	14	15	16 - 43	44	45	46	47	48	49	50
Fecundity	0	0.03	0.08	0.125	0.175	0.225	0.25	0.25	0.25	0.225	0.175	0.125	0.08	0.03	0

Mortality: I use the term 'central mortality' to refer to the mortality during the main part of an elephant's lifetime from 5-43 years old (see figure opposite). Age-specific mortality in the model is set by means of a 'template'. It is only necessary to specify the central mortality for the population and the curves for juvenile mortality and senescence are adjusted automatically. In the example shown below, the mortality for each age class is derived by multiplying the number in the template by the central mortality of 0.5%. The mortality for males in the age classes 20-25 years is doubled.



Age	1	2	3	4	5	6 - 42	43	44	45	46	47	48	49	50
Template	16	8	4	2	1	1	1	2	4	8	16	32	64	100
0.5%	8	4	2	1	0.5	0.5	0.5	1	2	4	8	16	32	50

Given the above fecundities and mortalities, the rate of growth for an elephant population with a stable age distribution is slightly less than 5%. If all mortality is set to zero (apart from the animals which die at the age of 50 years), the maximum growth rate rises to 5.7%. The various recorded cases in the literature where elephant populations appear to have increased at up to 7% per annum (e.g. Hall-Martin (1980) – Addo National Park) are invariably in situations where a stable age distribution has not been achieved. Although, in theory, a fecundity of one calf every 3 years is possible such a rate is likely to be an episodic event. Synchrony of calving among females following a drought could also give the effect of a very high rate of increase for a single year. However, averaged over four years the result is no different to that which would be obtained with a fecundity of 0.25.

In the tables below I examine the effect of natural mortality on an elephant population. The fecundities are as specified on the previous page and the mortality template is as shown above (i.e. juvenile mortality increases with the central mortality). Once natural mortality exceeds the threshold at which the population can maintain itself, it is of more interest to express the decline as a 'half-life' i.e. the time it take the population to halve.

Response of an elephant population to changes in natural mortality

(a) Effects of changes in overall mortality on population growth rate

Natural mortality %	0	0.25	0.5	0.75	1	1.25	1.5	2	2.25	2.5
Rate of population growth %	5.70	5.11	4.56	3.99	3.42	2.84	2.26	1.09	0.00	Decline

Half-life (years)	150	100	50	25	10	9	8	7	6	5	4	3	2	1
Natural mortality %	2.5	2.6	2.8	3.5	5.4	5.8	6.1	7.0	8.1	9.8	11.8	15.4	21.5	36.6

The effect of varying juvenile mortality independently of adult mortality is examined below. The specified mortality in the first row is for animals under one year old. Mortality is halved for each subsequent age class up to 5 years old. The adult mortality has been set at 1%.

(b) Effects of changes in juvenile mortality on population growth rate

Juvenile mortality %	5	10	15	20	25	30	35	40	45	50
Rate of population growth %	4.35	3.95	3.51	3.07	2.62	2.16	1.65	1.17	0.40	-0.12

It is apparent from table (b) above that an elephant population can tolerate very high levels of juvenile mortality – it is only when mortality reaches 50% that the population begins to decline. The same is not true for adult female survival. A mortality of more than 2.5% causes the population to decline.

The population simulation model consists of 12 linked spreadsheets which operate as a 'birth-pulse' system. The spreadsheets are as follows –

A – The main reproductive, management and financial parameters are defined here.

B – The **starting population** is defined here by setting the numbers in all male and female age classes. The model runs on a counter for each iteration and in the first year it uses the population defined here. In all successive years, the 'running cohort' is the population from the year before (obtained after completion of the mortality calculations on spreadsheet **J**).

C – This sheet is used for density dependence and is not functional in the Save Valley model.

D – The calculation of the annual **breeding** of the population is done here. Average female fecundities for each age class (see table at the bottom of page 40) are arranged in a row vector and multiplied by the numbers of females in each age class. The resulting vector is summed to give the total crop of calves which is then halved to give the numbers of male and female calves (the sex ratio at birth is assumed to be 1:1). The numbers in each age class of the existing vectors of males and females are then advanced by one cell (i.e. each animal ages by one year) and the new crop of calves is inserted is the first cell of each vector. This is the population at the start of the management year.

Five spreadsheets then follow, each dealing with a particular management activity. All of these spreadsheets contain algorithms which deal with the problem of small numbers in each age class by ensuring that an integer number of animals is deducted from amongst the age classes. Where, for example, an offtake of (say) 0.5% demands that 7 animals must be removed from 20 age classes, the individuals are selected by random numbers with the probability of selection rising with each age class if previous random selections fail to produce the desired number.

E – The losses due to **illegal hunting** are calculated and subtracted from the population.

F – **Culling** entails the removal of animals in breeding herds (all males up to the age of 10 years and all females age classes). For males older than 10 years there is a probability less than unity which declines with age of their inclusion in the numbers culled. This sheet allows the specification of either a percentage offtake or a fixed number from the population to begin in any selected year. It also allows a the parameters to be changed in a later year and it provides for 'pulsed' culling where culls are carried out (say) once every two or three years.

Provision is made for a specified number calves between the ages of 3-10 years to be captured and sold as live animals as part of the culling operation.

G – This sheet handles the **live capture** of elephant herds. Males older 30 years are excluded. The facility has not been used is this study.

H – **Problem animal control** (PAC) includes males and females older than 14 years of age. The sheet allows females to be excluded from PAC and, for Savé Valley, all the simulations have included males only.

I – **Sport hunting**: Females have been excluded from all the scenarios examined for Savé Valley and it is assumed that only males aged 30 years and upwards will be hunted. The sheet allows for specification of a percentage offtake, or a set of percentage offtakes specified as part of 'hunting regime' or automatic quota setting through the control system defined on Sheet **R**. Mean tusk weights from the hunting offtake are calculated from age-specific allometric schedules.

This completes the spreadsheets analysing the management regime. For each sheet the total amount of meat, skin and ivory generated is calculated from allometric relationships and costed.

J – **Natural mortality** is the last of the spreadsheets on which population numbers are modified in the course of an annual cycle. The mortality schedules are as specified earlier in this Appendix and the analysis is performed simply by multiplying the numbers in each age class by the age-specific mortality in row vector operation. However, elaborate precautions are taken to handle the small numbers problem, i.e. if a total of 5 animals is required to die, the algorithms ensure that this number is taken from the full range of age classes.

This sheet also calculates the total amount and value of ivory expected to be recovered from animals dying naturally.

After natural mortality has been applied the final population vectors (males and females) become the starting population for the next year.

K – This sheet summarises each year of management giving the numbers at the start of the year, the numbers of animals dying in each category of management and through natural mortality, the population at the end of the year. The population growth rate is calculated and the results are graphically displayed.

The spreadsheet software is set to 'manual operation', and the model is advanced one year at a time by a keypress. By keeping the key depressed, the model will run continuously within the speed limitations of the computer. Any particular run of the model is terminated on this page by the Reset button.

L - This sheet keeps an overall record of the results for each year in any run of the model, including all of the population dynamics information, the management information (offtakes, mean tusk weights etc.) and a full financial record of all gross and net income earned from management.

R – This sheet performs automatic hunting quota setting and the method is described in a separate Appendix.

M-Q and **S-V**: These sheets are used for secondary data analysis and are not part of the population simulation.

Appendix 6

Elephant Biomass in Relation to Other Ungulate Species

Excerpt from a recent study done in the Mudumu North Complex on the Kwando River in the Caprivi, Namibia (Martin 2006)

The ecological carrying capacity for wildlife could be expected to be slightly higher than the sustainable stocking rate for cattle given that amongst the wildlife ungulate species are grazers, browsers and mixed feeders capable of deriving a greater productivity from the vegetation than cattle which are solely grazers.

In the past 30 years it has become apparent that the many of the stocking rates recommended for cattle by livestock specialists have, in fact, been unsustainable. The south-east lowveld of Zimbabwe which has an annual rainfall between 300-500mm cannot sustain cattle populations at stocking levels much higher than 1 livestock unit/20 ha over any length of time (Price Waterhouse 1994). Stocking rates have generally been higher than this on commercial farms in the area over the past 50 years and this has resulted in severely degraded grass swards and soil erosion.

The rainfall in the Mudumu North Complex is between 500-650mm and, on a simple linear ratio, the sustainable carrying capacity for grazers might be around 1 LU/14ha. Heath (1991) examined the metabolic biomass proportions of grazers, mixed feeders and browsers in a typical mopane savanna wildlife community and found the ratio to be about 27%:57%:15% respectively. Treating the mixed feeders as if they were 100% grazing animals and adjusting the carrying capacity only for the browsing animals in the wildlife system would result in a carrying capacity of 1 LU/12ha for the MNC. In order not to imply too great a precision and rounding down for the fact that the mixed feeders are not 100% grazing animals, a carrying capacity of about **1LU/10ha** might be a 'ballpark' figure for the Mudumu North Complex wildlife population – taking into account the presence of mixed feeders and browsers in the wildlife community.

At a present stocking rate of 1 livestock unit/17ha, the Mudumu North Complex would appear to be at about 60% of its wildlife carrying capacity. However, **the ceiling will be reached by the year 2012 if the elephant population continues to increase at its present rate**. A situation where elephants constitute 80% of the total wildlife metabolic biomass may not be optimum from a financial point of view or aesthetically desirable. The question is whether there is any objective method on which to decide this issue?

International safari hunting may provide a vehicle for examining the question. For reasons that are not always amenable to logic, some species are valued more highly than others in sport hunting. One management approach might be to placed a greater emphasis on enhancing the status of those species whose financial contribution per unit of metabolic biomass is the highest.

In the safari industry there are certain key species which are the "pegs" on which hunts of a given duration can be "hung". For example, elephant are seldom sold on hunts of less than 21 days – during the course of which it becomes possible to sell various other species most of which would not attract an overseas hunter to Africa in their own right. It would probably be incorrect accounting to say that the number of 'hunter-days' attributable to elephant is 21 because amongst the other species hunted there might be a few which themselves are "pegs" which could have generated shorter safaris in their own right (e.g. buffalo and lion). In order to compare the profitability of species in sport hunting it is necessary to take into account both the trophy fees for each species and the number of 'hunter-days' which the species generates, i.e. –

Species value = No. on quota x (Trophy fee + No. of hunter days x Daily rate)

The Namibian safari industry tends to differ slightly from others in Africa in that the daily hunting rates tend to be lower and the trophy fees tend to be higher.[9] In general safari hunting clients take both factors into account in choosing where to hunt.

The sport hunting values of the various ungulate species in the Caprivi,[10] including species which might be introduced, are estimated in the table below.[11] The analysis is based on the estimated maximum number of the species which could be carried in 100km^2 assuming that it is the only species to occupy the area.

Comparative Ungulate Species Value in Sport Hunting

Stocking Rate 10 ha/LU Daily rate US$ 1,000

#	Species	Livestock Units (LUs)	No. in 100km^2 N	Hunting Quota %	Hunting Quota N	Trophy fee US$	Hunter days N	Quota value US$	Rank #
1	Elephant	3.18	315	0.5	2	10,000	15	50,000	23
2	White rhino	2.47	405	0.5	2	7,500	10	35,000	26
3	Hippo	1.47	682	0.5	3	5,000	3	24,000	27
4	Black rhino	1.56	640	0.5	3	15,000	10	75,000	21
5	Giraffe	1.47	682	2.0	14	1,500	2	49,000	24
6	Buffalo	1.00	1,000	2.0	20	5,000	8	260,000	9
7	Eland	0.81	1,234	2.0	25	1,500	1	62,500	22
8	Zebra	0.54	1,837	5.0	92	750	1	161,000	13
9	Roan	0.51	1,956	2.0	39	5,000	2	273,000	8
10	Gemsbok	0.44	2,279	2.0	46	1,000	1	92,000	18
11	Sable	0.43	2,314	2.0	46	5,000	5	460,000	3
12	Wildebeest	0.47	2,122	2.5	53	1,000	1	106,000	17
13	Waterbuck	0.45	2,246	2.5	56	2,000	1	168,000	12
14	Kudu	0.41	2,467	2.5	62	750	1	108,500	16
15	Hartebeest	0.38	2,613	3.0	78	750	1	136,500	14
16	Tsessebe	0.31	3,211	3.0	96	1,500	1	240,000	10
17	Sitatunga	0.35	2,876	3.0	86	5,000	5	860,000	1
18	Lechwe	0.24	4,126	3.0	124	1,500	1	310,000	6
19	Puku	0.22	4,589	3.0	138	1,000	1	276,000	7
20	Bushpig	0.19	5,196	3.0	156	300		46,800	25
21	Warthog	0.18	5,623	3.0	169	500		84,500	19
22	Impala	0.15	6,790	3.0	204	500	0.5	204,000	11
23	Reedbuck	0.14	7,096	3.0	213	750	1	372,750	4
24	Bushbuck	0.13	7,622	3.0	229	500	1	343,500	5
25	Duiker	0.08	12,818	3.0	385	200		77,000	20
26	Oribi	0.06	17,374	3.0	521	500	0.5	521,000	2
27	Steenbok	0.05	20,539	3.0	616	200		123,200	15

9. For example, in Namibia the trophy fee for a buffalo is about US$5,000 but the daily rate for hunting is about US$500. In Zimbabwe, a buffalo trophy fee would be about US$2,000 but the daily rate for hunting would be about US$1,000. Thus, a 10 day buffalo hunt in Namibia would generate US$10,000 whereas in Zimbabwe it would generate US$12,000. However, this situation reverses if, for example, the number of hunter-days expected from a buffalo is 4 – the Namibia operator would earn US$7,000 and the Zimbabwean operator would earn US$6,000.

10. Carnivores and non-mammalian species are not included because they do not enter into the carrying capacity calculations.

11. Trophy fees are from Humavindu (2001) and hunter-days for each species are from Martin (2002).

The exercise in the table has been done for comparative purposes only and does not imply that any species population would necessarily achieve the implied density. However, the outcome is extremely interesting. Many of those species traditionally considered the most valuable in the safari industry turn out to be less valuable when metabolic biomass is taken into account. Elephants, for example, rank near the bottom of the list – although they command a high unit sport hunting value, their financial performance is reduced by the fact that few of them can be carried sustainably in the given area. The most valuable species are those whose unit safari hunting value is disproportionately high in relation to their metabolic biomass. They can be stocked at a fairly high level and, on paper at least, produce greater returns than other species. Under this criterion, sitatunga, oribi, sable, reedbuck – and so on – become the highest ranking species.

To make best use of these findings, I begin by arranging the species in the order of rank which they appear in the table on the previous page and assign some realistic maximum population numbers which they are capable of reaching under 'natural' conditions in the Mudumu North Complex (see table on the next page).

From the expected numbers, the metabolic biomass of each species population has been calculated. Working in order of the species value ranking, this metabolic biomass has been deducted sequentially from the total allowable metabolic biomass provided by a stocking level of 1 LU/10ha applied to the total available wildlife area in the Mudumu North Complex (3,647 km^2).

Beginning at the top of the table, the maximum potential sitatunga population on the Kwando River has been estimated at 75 animals. The metabolic biomass of this population is 26 livestock units which when deducted from the available biomass of 36,473 LUs leaves a balance of 36,447 LUs. The remaining species, in order of rank are treated in the same way. As the lowest valued species at the bottom of the table are approached, elephants (ranked 23rd out of 27 species) have been moved to the bottom of the table so that the desired biomass for all other species can be calculated before addressing the question of elephant numbers.

When this exercise was embarked upon, it was not known whether the assigned estimates for all the species populations would produce a total biomass greater or smaller than the so-called carrying capacity. It so transpired that, even using fairly optimistic population densities, the total metabolic biomass of all species excluding elephant adds up to less than the available carrying capacity. **This then provides a basis for deciding on the size of the elephant population**. By taking the remaining available livestock units after the values for all other species have been deducted and dividing the figure by the unit livestock value for an individual elephant, the result is that **a population of 3,093 elephants would complete the full carrying capacity for the Mudumu North Complex**. The present estimate for the elephant population is 6,000 animals.

A number of aspects of this exercise could be challenged – including the basis for deciding which are the most valuable species, the financial values given to each species in sport hunting and the estimates assigned to the 'maximum' population of each species. But perhaps none of these affect the underlying principle at stake – that of deliberately managing to increase the numbers of the most desirable species. The management tools to achieve this are limited but one obvious way is to ensure that inter-specific competition for resources is not constraining the growth of populations. In all the Rare and Valuable Species studies it has been emphasized that the increasing elephant population is a both a direct and indirect threat to other species. To create the 'space' for other more valuable species to expand means ensuring the elephant population takes up no more than its theoretical 'share' of the available resources.

Optimum Stocking of Ungulates in the Mudumu North Complex

Reference numbers in the first column refer to the species rankings established in Table 12
Reference numbers in the second column are the numbers assigned to species in Appendix 4

Effective wildlife area	3,647 km²	Floodplain	133	Riverine woodland	127
Stocking Rate	10 ha/LU	LUs	36,470	Daily rate US$	1,000

#	#	Species	Livestock Units (LUs)	Max Density N/km²	Pop. No. N_{max}	Metab mass LUs	LU Balance LUs	Hunting Quota %	Hunting Quota N	Trophy fee US$	Hunter days N	Quota value US$
1	17	Sitatunga	0.35	–	75	26	36,444	3.0	2	5,000	5	20,000
2	26	Oribi	0.06	–	200	12	36,432	3.0	6	500	0.5	6,000

Appendix 7

Elephant Male Trophy Hunting

The population model described in **Appendix 5** (page 40) has been used to test the effects of different levels of trophy male hunting quotas on the age structure of an elephant population and the mean trophy weight corresponding to different quota levels.

Tests were carried out on a population set initially at 592 animals in1993 with the age structure shown in **Fig.2a** (page 8) and the population was allowed to increase unchecked. A hunting selectivity of 25% for animals with larger tusks was used in the model. The selectivity was applied as follows –

(a) The proportion which each age class forms of the total number of huntable age classes is calculated:

$$P_a = 100 / (\text{No. of age classes}) = 100/21 = 4.76\ \%$$

For zero selectivity, each age class would contribute this proportion of whatever quota was set.

(b) The actual proportion expected to be contributed by the oldest age class (50 years) is then calculated as –

$$P_{50} = P_a + S\,.\,(100 - P_a) = 4.76 + 0.25\,(100 - 4.76) = 28.57\ \%$$

– where S is the selectivity expressed as a fraction.

(c) The next age class (49 years) contributes –

$$P_{49} = (100 - P_{50})\,.\,(1 + S\,.\,N_R) / (N_R + 1) = (100 - 28.57)\,.\,(1 + 0.25 \times 19)/20 = 20.54\ \%$$

– where N_R is the number of age classes remaining

(d) The next age class (48 years) contributes –

$$P_{48} = (100 - P_{50} - P_{49})\,.\,(1 + S\,.\,N_R) / (N_R + 1) = (100 - 49.11)\,.\,(1 + 0.25 \times 18)/19 = 14.73\ \%$$

(e) This process is continued until an expected proportion has been calculated for each of 21 age classes (the values are shown in the table on page 49). As hunting pressure is increased, it is not possible for the upper age classes to supply the number of animals demanded and so the required quota is progressively transferred to lower age classes until it has been satisfied.

Hunting quotas from zero to 0.8% of the total population were tested for a large unmanaged population (10,000 animals). A quota of 0.8% of the population results in the removal of all huntable males and at 0.7% the only surviving males are 30 years old . The 'optimum' quota is about 0.5% which allows some males in the population to reach an age of 39 years. The results are shown in the table and figure on the next page.

Being a 'small' population with an irregular age structure, a quota of 0.5% of the Save Valley elephants will result in no males older than 34 years in the year 2020. However, as time passes and the population is able to adjust, some males would reach the age of 40 years old with a 0.5% quota once a stable age structure has been achieved. It is of interest that once hunting quotas exceed 0.1% of the population, mortality from trophy hunting completely replaces natural mortality for males older than 30 years.

Response of the adult male age structure of a population to various levels of hunting quotas

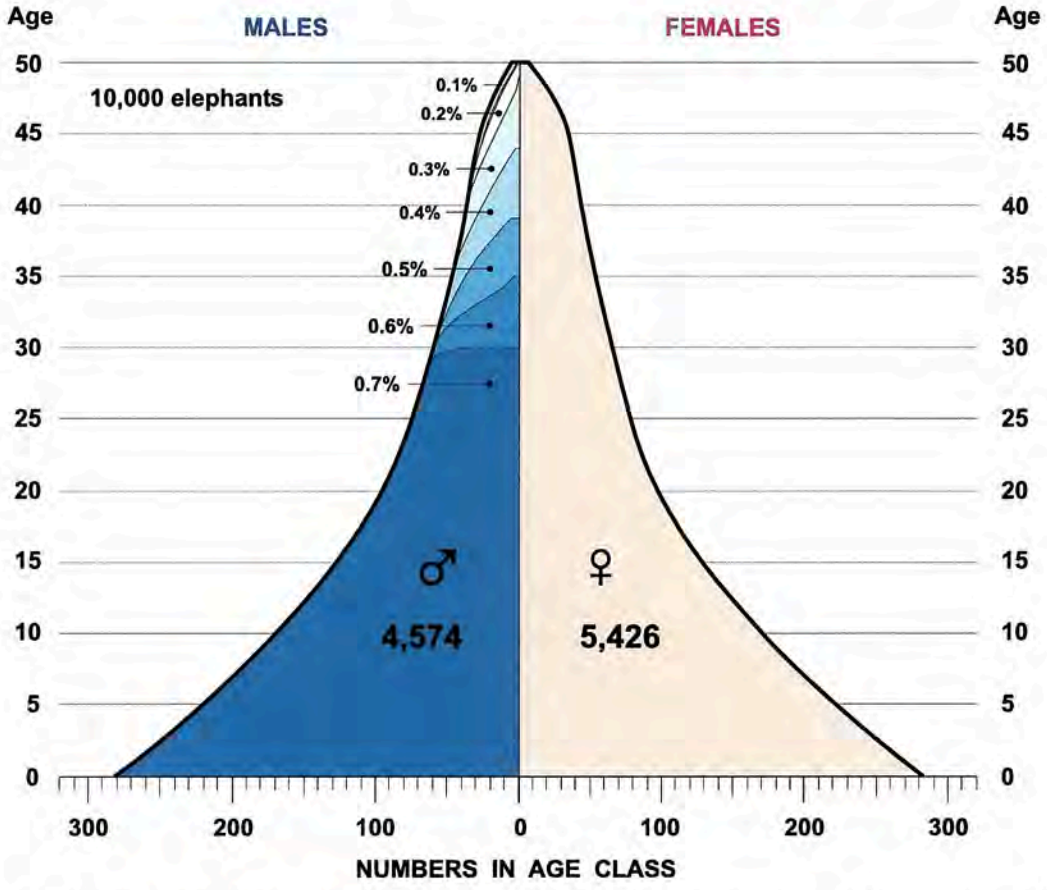

Fig.A7.1: Effects of trophy hunting on the age structure of an unmanaged elephant population

The figures (**Fig.A7.2 - Fig.A7.7**) which follow apply to the Savé Valley elephant population under a regime of no management (no culling) with hunting quotas ranging from zero to 0.5% of the total population. All of the population simulations assume a fixed offtake of 5 elephants hunted illegally and 5 elephants (males older than 15 years) killed as problem animals every year.

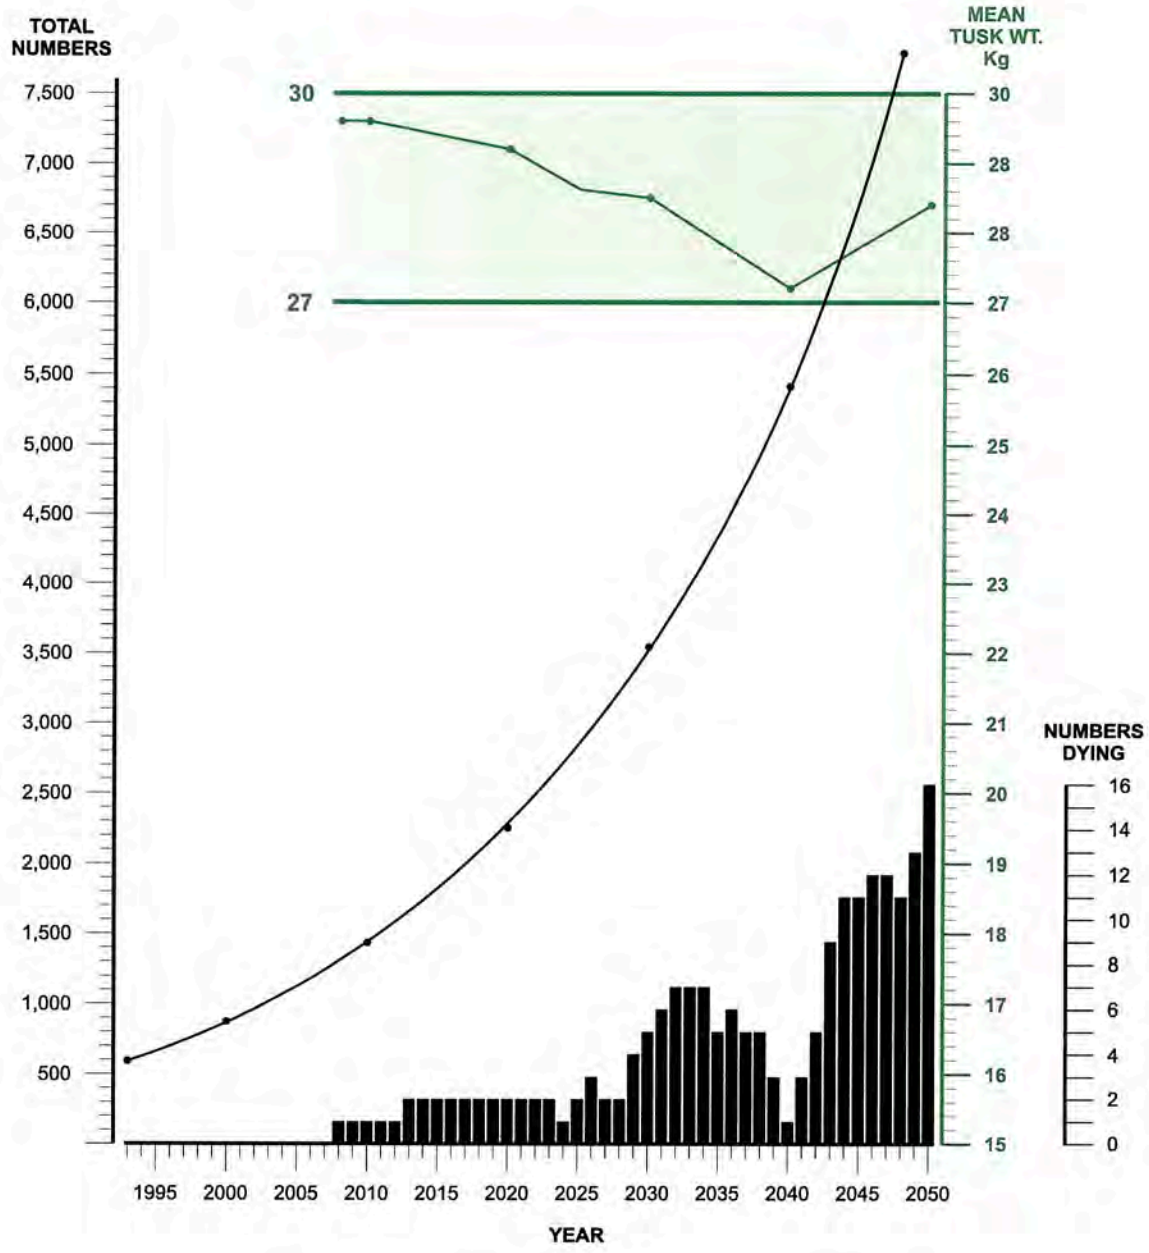

Fig. A7.2 : Mean tusk weights from natural mortality

Tusk weights range from 27-30kg

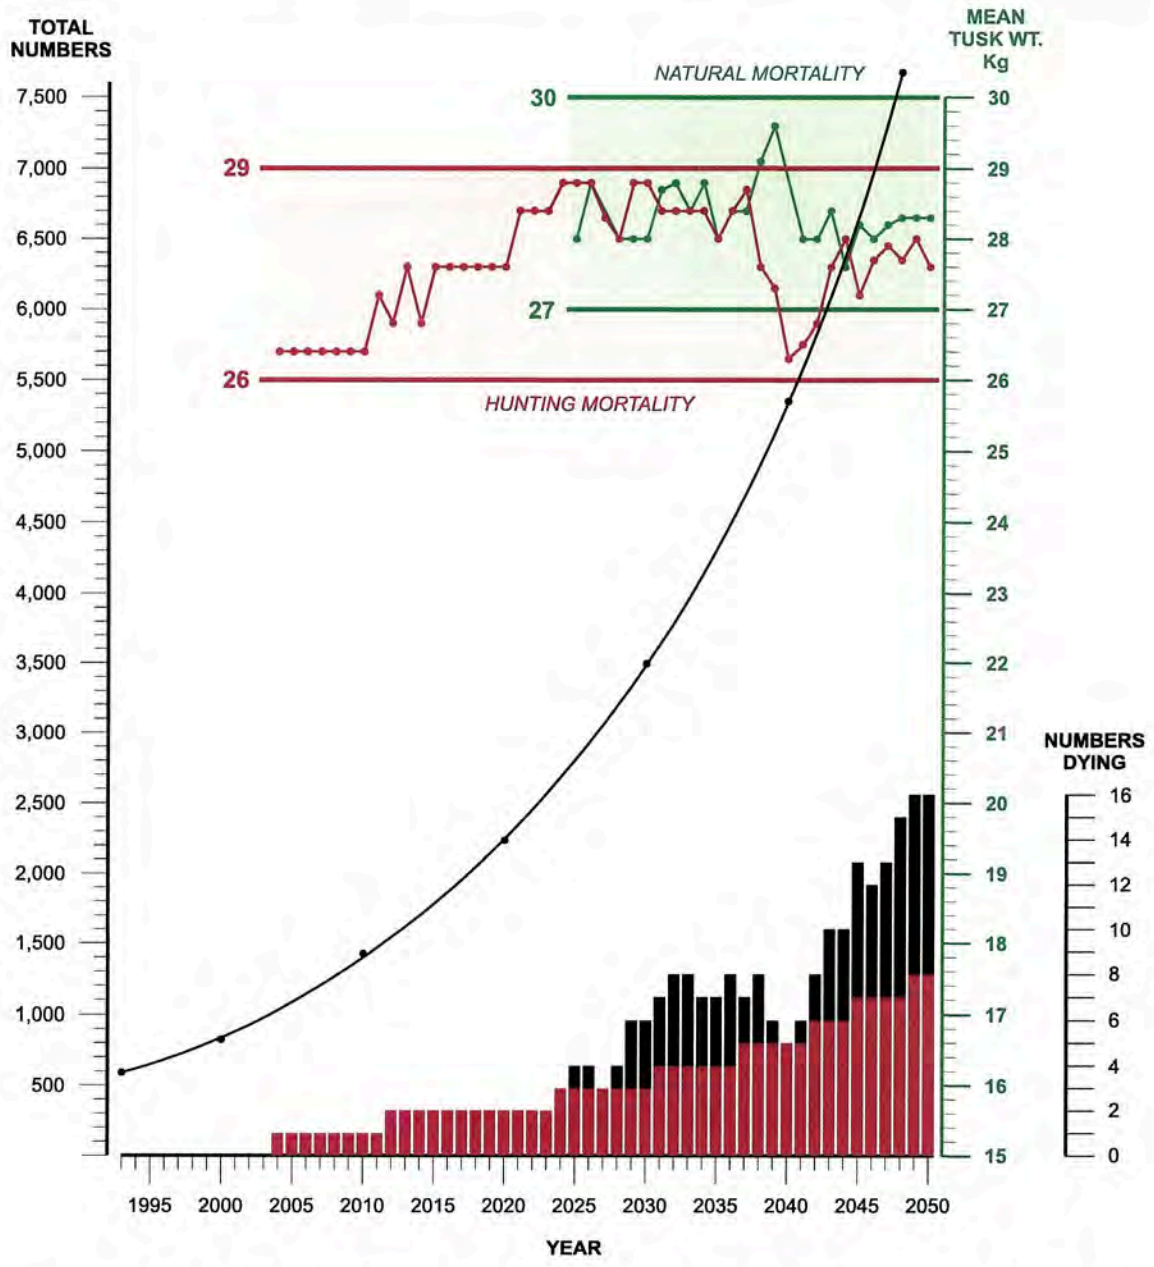

Fig. A7.3 : Mean tusk weights from natural mortality and a hunting quota of 0.1%

With a low hunting quota (0.1% of the population), some males die naturally producing tusks between 27-30kg. The mean tusk weight from hunting is between 26-29kg.

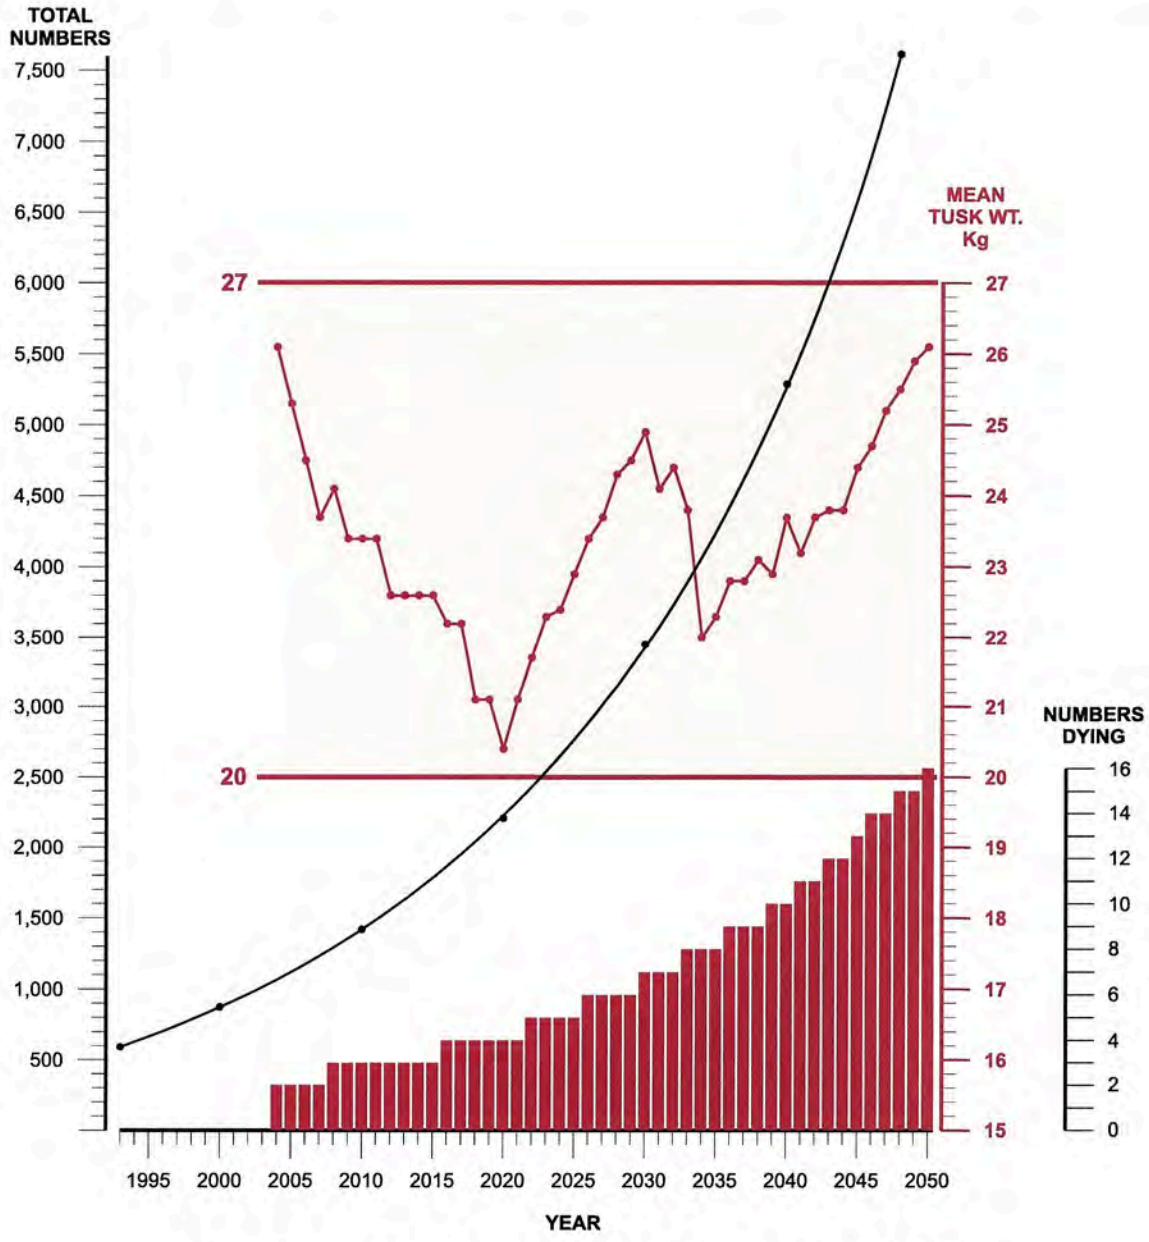

Fig. A7.4 : Mean tusk weights from a hunting quota of 0.2%

With hunting quotas of 0.2% or more, hunting mortality completely replaces natural mortality. The mean tusk weight from a quota of 0.2% lies between 20-26kg.

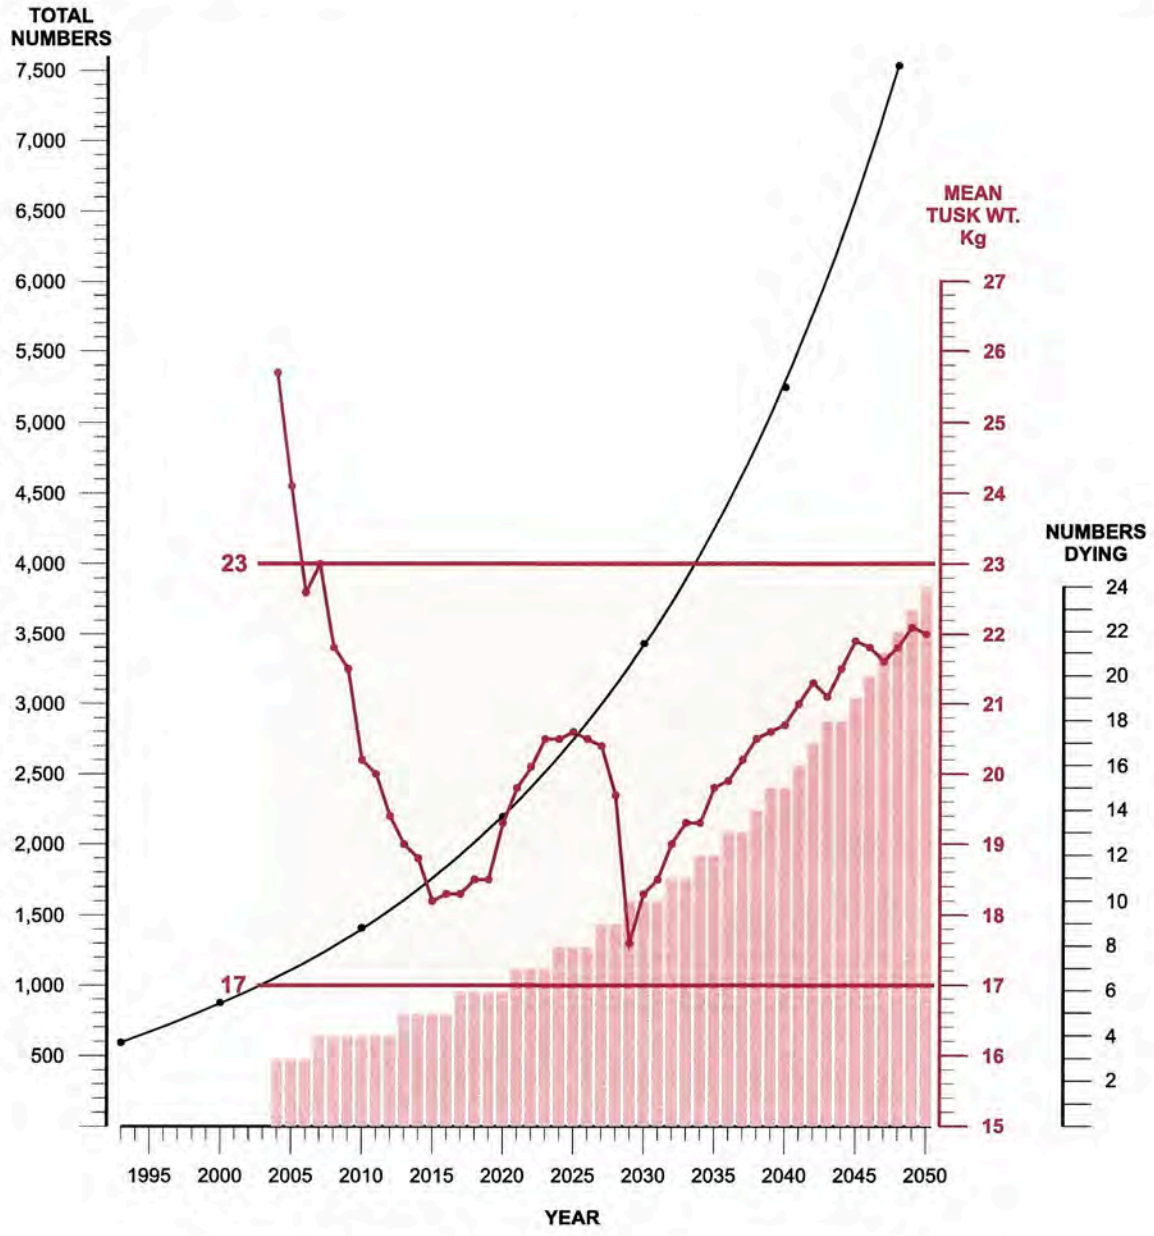

Fig. A7.5: Mean tusk weights from a hunting quota of 0.3%

The mean tusk weight from a quota of 0.3% lies between 17-23kg. Peculiar to the adult male age structure of the Savé Valley population are two vulnerable periods – the first occurs between 2010-2018 and the second between 2027-2032. If hunting quotas are not reduced during these periods, the hunting may 'collapse' for several years and the mean trophy size will be reduced to less than 15kg – the typical size of 30 year old males.

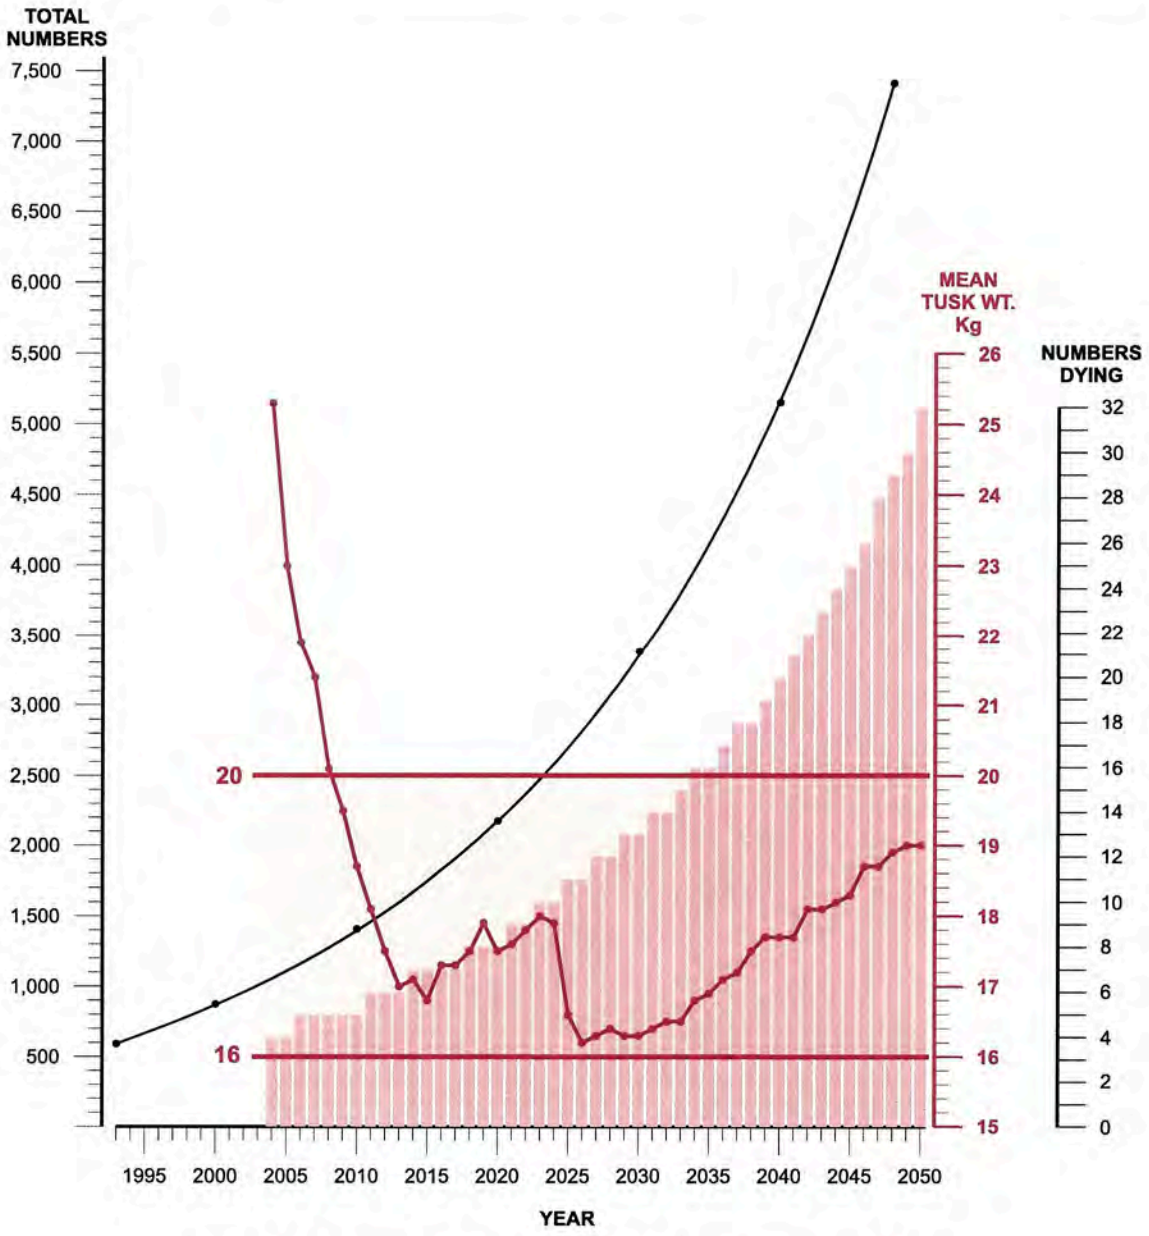

Fig. A7.6 : Mean tusk weights from a hunting quota of 0.4%

The mean tusk weight from a quota of 0.4% lies between 16-20kg. As a result of quotas being too high during the two vulnerable periods mentioned under the previous figure, the mean tusk weight remains lower than 18kg (less than 40lbs a side) up until about 2042.

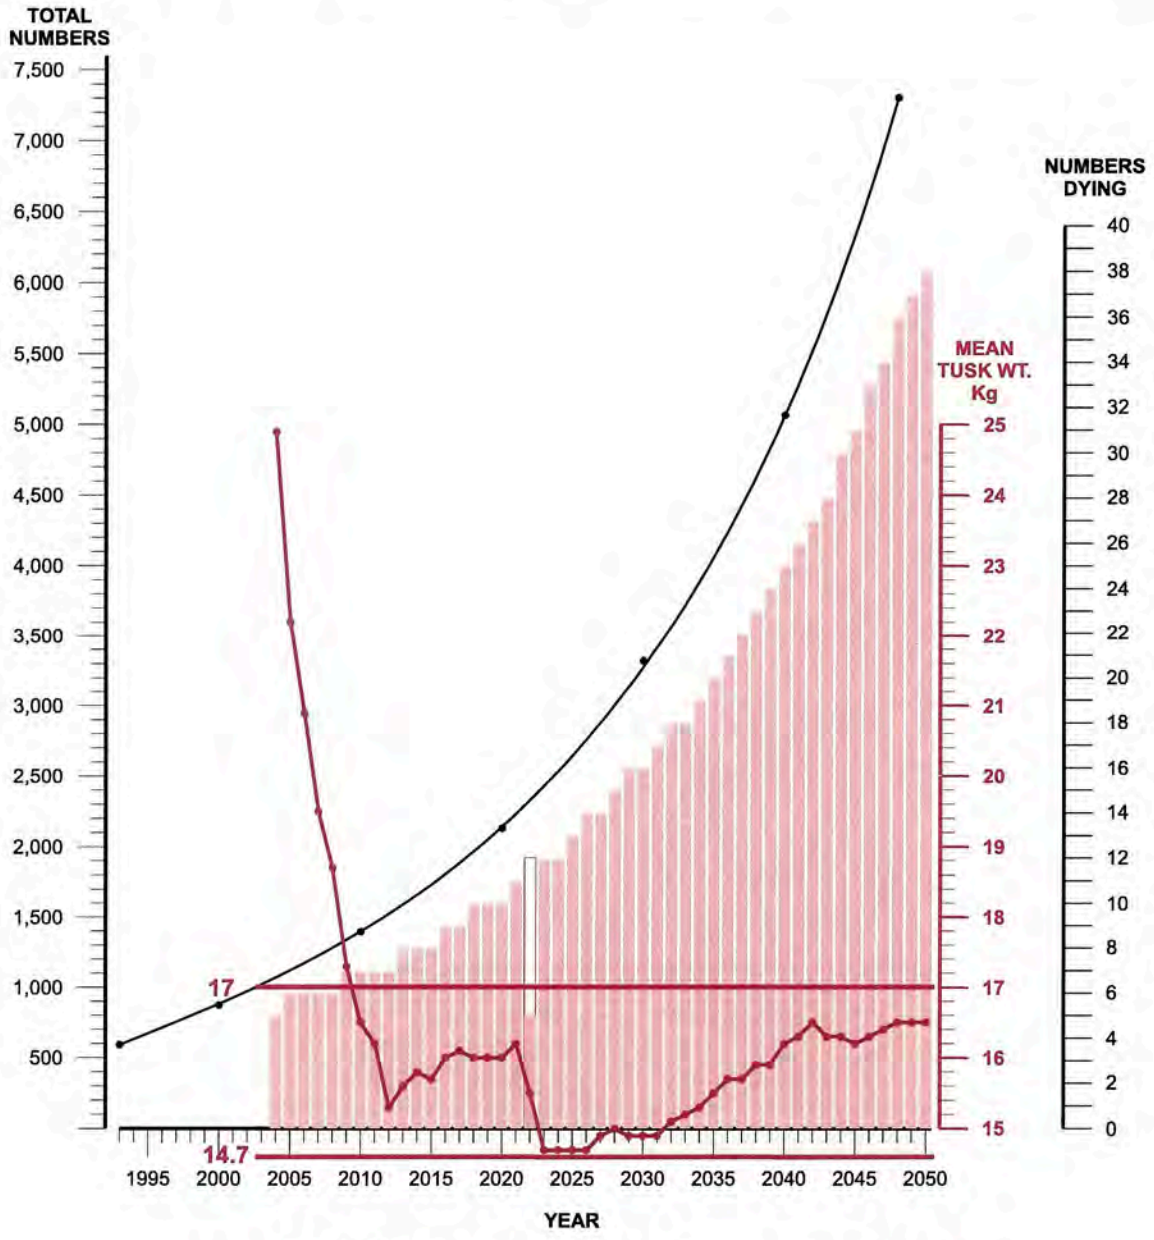

Fig. A7.7 : Mean tusk weights from a hunting quota of 0.5%

For the first 40 odd years after the inception of hunting in the Savé Valley, the mean tusk weight from a quota of 0.5% would lie between 15-17kg. In the year 2022, the model predicts that it would not be possible to obtain the set quota of 11 animals and only 5 trophies would materialise. In a population with a stable age structure the mean trophy weight for a quota of 0.5% should lie above 18kg – however, if such a quota were applied to the SVC population, it would not achieve this expected value until well after 2050. The automatic quota setting method (see **Fig.7**, page 14 in the main part of this report) averts this catastrophe.

Appendix 8
Automatic Setting of Hunting Quotas Based on Classic Control System Theory

Some years ago I gave a lecture on the application of control system theory at the University of Trondheim in Norway (Martin 1999c) a part of which is reproduced here as an introduction to the method.

ADAPTIVE MANAGEMENT: THE APPLICATION OF FEEDBACK

R.B. Martin (September 1999)

Introduction

Advocates of adaptive management are generally content to state that monitoring will take place and the results will be used as negative feedback. Bell (1997) has demonstrated the potential for positive feedback in a wildlife management system. The application of feedback to any system which is to be controlled is a complete science in its own right (cybernetics) – and ecosystem managers should be aware of the pitfalls which can arise when feedback is incorrectly applied and be aware of the elements which go into designing effective and efficient control systems.

A Control System

In the schematic control system shown in **Figure 1**, a nominal input is applied to the system to be controlled. The actual output from the system is compared with the desired output and the difference is fed back to the input via a "Transfer Function" which calculates the amount of feedback to apply in order to bring the desired and actual outputs closer to each other. The feedback (which is now in the same units as the 'input' after conversion through the transfer function) is added to the nominal input to the system to make the correction.

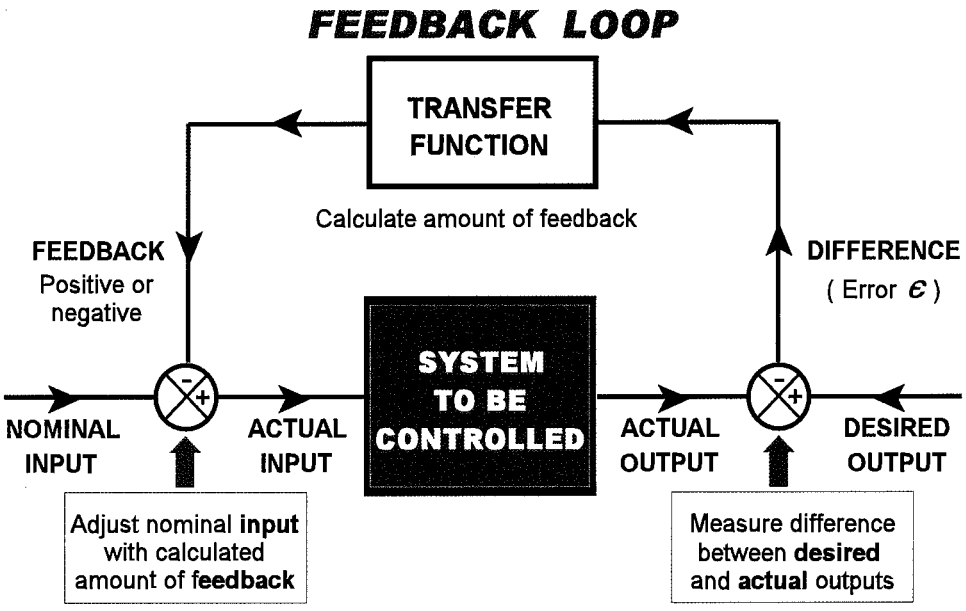

Figure 1: ELEMENTS OF A CONTROL SYSTEM

If, for example we were to apply this to an ecosystem in which we were attempting to control elephant numbers in order to conserve mature trees, the nominal input might be a reduction of the elephant population by 1,000 animals. The output would be measured in actual tree cover and this would be compared with the desired amount of tree cover. The difference would be fed through the transfer function and applied as feedback in the form of an additional number of elephants to be removed. From the outset, time lags would play a large part in this control system.

Feedback in Control Systems

The simplest form of feedback system is one which simply makes proportional corrections to the inputs based on the magnitude of the 'error'. The Transfer Function (F) results in feedback given by –

$$F = a.\epsilon$$

– where a is a constant and ϵ is the error.

The shortcomings in such a method are –

- it makes no allowance for any inherent time lags in the system it is controlling;
- when it reaches the point where the desired output is the same as the measured output, at this stage the error becomes zero and there is no quantity available to maintain the feedback;
- the manager has to wait until once more the system strays away from the desired condition before he can apply a proportional amount of correction. Because of this, there is a temptation to build a very high 'gain' into the system – i.e. small positive or negative differences from the desired output are hugely amplified and fed back to the input.

During the build-up phase the feedback is positive(see **Figure 2**): negative feedback only starts to operate once the actual output exceeds the desired output. Control based only on the error usually results in the actual output overshooting the desired output during this build-up phase.

Problems then arise because of the "Dead Zone" either side of the desired output level. Only when the actual output exceeds some threshold will the feedback mechanism 'kick in' and, by this time, the actual output is usually well on its way to being more (or less) than the manager would like. This results in an oscillating output around some mean value and if the system has a time lag in responding to changes in the input (as all real life systems do) the oscillations can become relatively large.

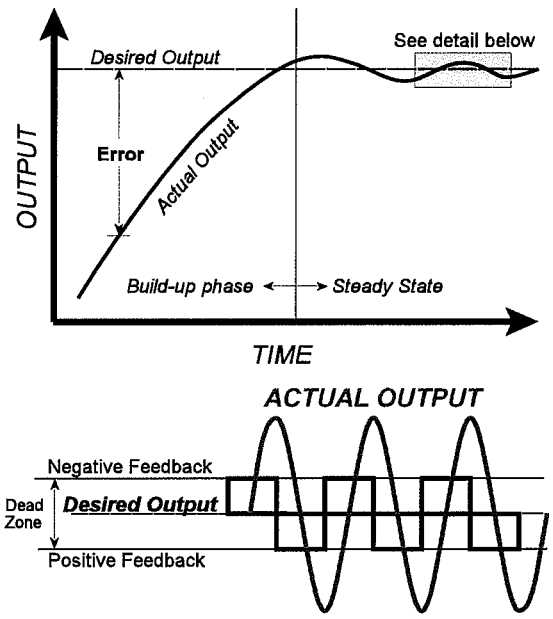

Figure 2: Control based on the error

To start improving matters, the first thing we need to know about is the inbuilt time lag of the system. In a simple engineering case, we would apply a fixed input at a particular level and measure how quickly the system adjusts to that input. To use engineering nomenclature, we determine the response (time-constant) of the system to a step-function – which is the time taken for the response to reach 63.2% of its final level.

$$\tau = 1\text{-}e^{-1}$$

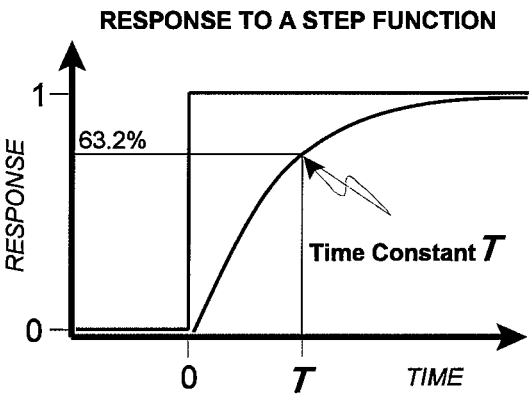

Figure 3: Response to a step function

Within ecosystems there will be multiple time constants — trees and elephants grow slowly, mice and grasses run on cycles of a year or less. However, depending on the aspect of the ecosystem to be managed, it is not inconceivable that some fixed perturbation could be applied and the response measured – this would be good adaptive management. For example, if the concern was the effects of elephants on trees, it might be decided to remove a known number of elephants and measure the rate at which the trees regenerated.

For the next improvement, we need to add a few 'strings to our bow' beyond simply relying on the 'error' for feedback. The minimum set of information which will provide a 'complete' control system is –

(1) the error – the difference between the actual condition and the desired condition;

(2) the derivative of that error – the rate at which the change is taking place; and

(3) the integral of that error – the past history of the departures from the desired condition.

Mathematically, our control function can be expressed as –

$$F = \alpha e + \beta \frac{de}{dt} + \gamma \int_0^t e.dt$$

where – α, β and γ are constants;
e is the error; and
t is time

I don't want the introduction of mathematics (calculus, in particular) to become the point of departure from a commonsensical understanding of the concepts I am trying to put across. The simple elements of adaptive management from an ecosystem manager's point of view are that he/she should be aware not only of the difference between the actual and desired condition, but also how quickly change is taking place and the past history of changes.

Let us examine the behaviour these three parameters display during the build-up phase in a control system (**Figure 4**). Imagine a system where the actual condition is a long way from desired condition and where feedback, which has contributions from all three parameters, is being applied to bring the system to the point where it is controlled (we will return to the 'how' in a moment).

At the start, the error is large and the integral of the error is zero (the integral is no more than the area under the curve – see inset at the bottom of Fig. 4). As the actual output begins to move towards the desired control level, the derivative is high – i.e. the slope of the trajectory is steep. The error and the derivative of the error are providing the major influence on the feedback – which, at this stage, is positive.

In the intermediate phase when the actual output is still some way from the desired output all three parameters are contributing to the control.

As the output gets closer to the desired level, the error decreases and, if the control system is correctly designed, the curve begins to level out and the derivative decreases.

The integral, which has been steadily increasing in value over the past history of this trajectory, now begins to take over control As the actual level reaches the desired level, the error and the derivative of the error disappear completely. The integral, however, is not zero. It has stopped increasing because the area between the actual level and the desired level is zero and it now sits at a constant value. It is this value which maintains the 'input' to the system at exactly the correct amount to achieve control.

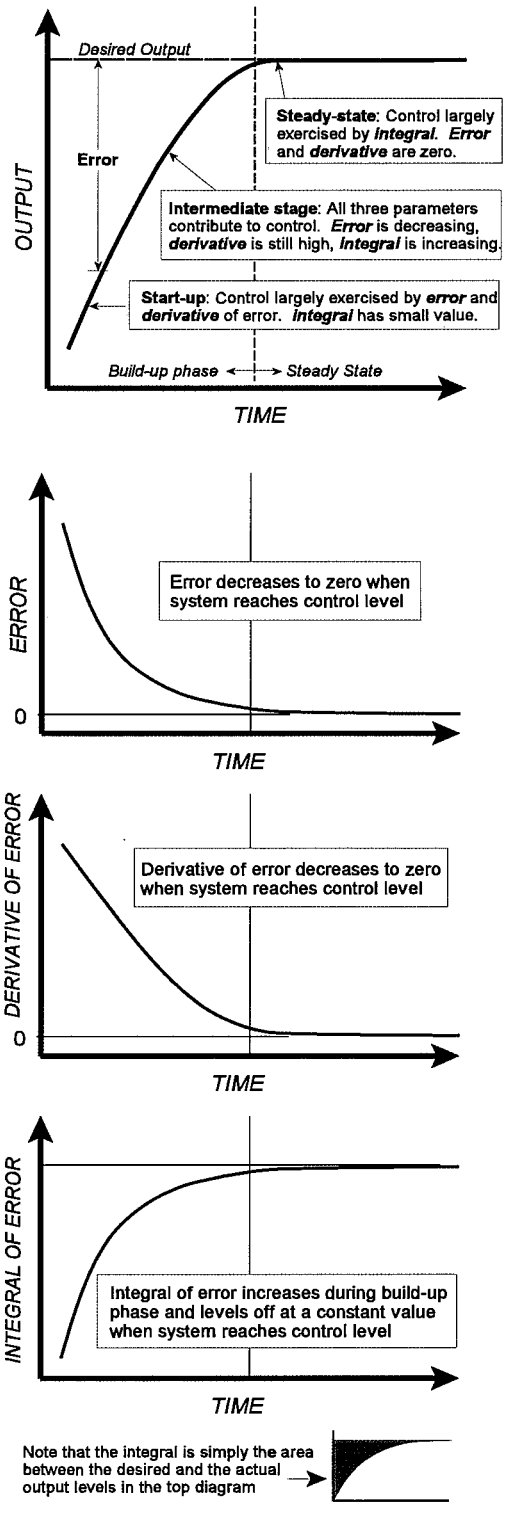

Figure 4: Effects of error, derivative of error and integral of error on control system

So much for the 'start-up'. In real life we will not be dealing with too many start-ups but will more interested in maintaining control of a working system. Each of the three parameters plays a particular role in doing this (**Figure 5**). Imagine our actual level now moving above the desired level – caused by some externality. The negative feedback swings into action. If the change is large the negative feedback will be provided by the error and, depending how fast the change takes place, the derivative will also contribute to the feedback. If the change happens rapidly – i.e. our actual level suddenly begins to move sharply away from the desired level, the derivative provides immediate negative feedback – even for small changes. If the change happens gradually, the integral responds by subtracting from its nominal value the small increment in area caused by the output level being above the desired level and slightly lowering the overall input.

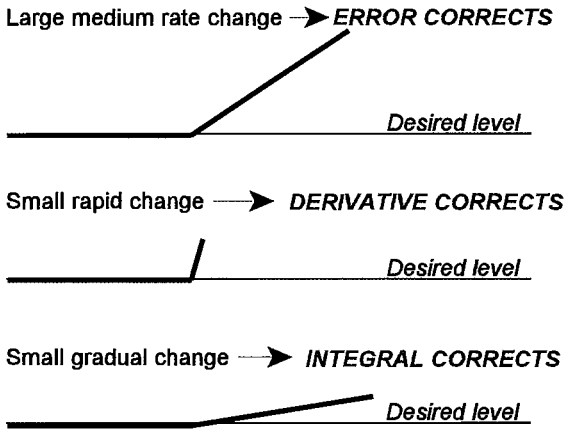

Figure 5: Control under steady-state conditions

I think you can see the practical application of this without worrying about the mathematical niceties. In real life we apply such control systems automatically and unthinkingly all the time. In driving a motor car from A to B we will go through the start-up process, i.e. bringing our car up to speed smoothly. We will accelerate at the start (when the error and the derivative of the error are large) but as we approach our desired cruising level the foot will relax on the accelerator pedal to exactly that level which maintains the speed (the integral is now working). Suddenly we become aware of a speed-trap ahead (our cruising speed is above the speed limit) – the derivative takes over and we do a rapid deceleration. Because of the instantaneous nature of this adjustment, the integral term is hardly affected and within a short while control is restored at the original cruising speed.

What is now left to discuss is the choice of constants governing the relative contributions which the error, the derivative of the error and the integral of the error should make to the feedback system.. These are dependent on the time-constant of the system to be controlled. In the engineering world, elegant formulae exist for calculating the values in a way which give critical damping to the control system – i.e. at start-up it will increase at the maximum rate possible to reach the desired level and, for all subsequent perturbations, it will inject negative (or positive) feedback in exactly the right doses to restore control.

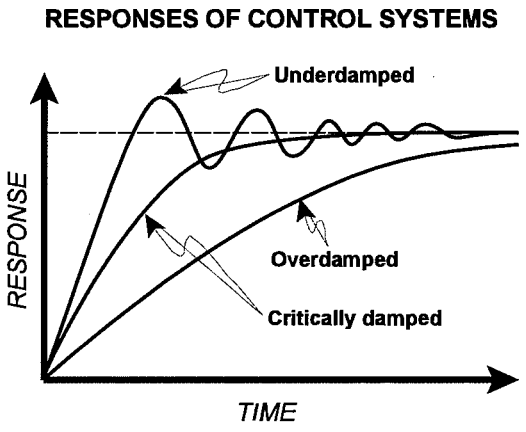

Figure 6: Influence of constants on performance of control system

However, this optimisation process is not denied to the ecosystem manager who does not have a grasp of Laplace Transforms or functions of a Complex Variable. In setting up simple models, I have found that, with a few iterations, workable values for the three constants can be arrived at with little difficulty.[12] It is quite easy to set two of the constants to zero and watch how the system behaves under the influence of the remaining one (e.g. the integral), in order to get quick approximations.

Conclusion

All of this shows considerable promise for looking at such concepts as resilience, processes and time lags in ecosystems. But it is necessary to watch out for the trap of conceiving of everything in terms of "equilibrium resilience" as defined by Holling and Meffe (1996). Whilst it is useful, if not essential, to grasp the elements of control systems, it would be an abuse of adaptive management to apply it to constraining ecosystem behaviour to narrow limits as is so laudable in a an engineering control system design. The ecosystem is itself a dynamic living entity — not passive in the nature of an engineering system. Many of the perturbations it responds to are not applied by man - variations in climate being one example. "Ecosystem resilience" is a far broader concept allowing for wide swings in the state of the measured variable(s) which encapsulate the status of the ecosystem. And how to accommodate this concept needs thought.

---

12. The author has used this approach to model self-regulation in elephant populations. The constants can be adjusted to provide constant regulation at any given level or, alternatively, to cause the population to follow stable limit cycles of any frequency and amplitude (Caughley, 1976).

I have applied exactly such a system to the setting of hunting quotas in this study. The parameter which we wish to control is the mean tusk weight of trophies and this is also the variable we have to measure. The transfer function is –

$$F = A \,.\, \epsilon + B \,.\, \frac{d\epsilon}{dt} + C \,.\, \int \epsilon \,.\, dt \quad \ldots\ldots\ldots\ldots \quad ①$$

where – ϵ is the difference between the actual mean tusk weight and the desired mean tusk weight averaged over all of the hunting trophies in any given hunting season

and A, B and C are constants

This function is used to modify the quota Q_i in any given year as follows –

$$Q_i = Q_{i-1} + G \,.\, F_{i-1} \quad \ldots\ldots\ldots\ldots\ldots\ldots \quad ②$$

where – Q_i is the hunting quota for the year concerned (% of the total population);

Q_{i-1} is the hunting quota for the previous year;

G is a constant (the "gain" of the system); and

F_{i-1} is the value of the transfer function derived from the previous year

If the value of F_{i-1} is such that it would result in a negative quota, a logical condition is used to limit the value of Q_i to 0.1%.

The system is arithmetically simple to apply. Three columns are set up and, in the first, the error is tabulated – i.e. the difference between the desired mean tusk weight and the actual mean tusk weight for the year concerned. In the second the derivative is calculated. Because the minimum time interval for the population modelling (and quota setting) is one year, the term ***dt*** in the derivative can be ignored and the value required is simply the difference between the last year's error and the present year's error. Of course there is no value for the derivative in the first year of the exercise because the slope of the curve can only be determined from two data values. In the third column the integral is simply the cumulated sum of all errors to date.

The three terms are added together in a fourth column using the constants A, B and C shown in formula ① above. In a fifth column the quota for the next year is set using formula ②. An example of the process is given in **Table A8.1** on the following page.

I included a fourth term in the quota modifier expression based on hunting success which is not shown in Table A8.1 . The quota is adjusted downwards if the full hunting quota set for any particular year is not achieved. However, in the population simulations this situation did not arise so it is not shown in the table.

In the table below the population is subjected to a cull of 60 animals per year from 2007-2020 and 2.75% of the population from 2021 onwards. This is the management regime recommended in the main section on culling (page 15). The fluctuations in the quota are caused by the irregular shape of the population age structure (see **Fig.2**, page 8).

Under some circumstances the control system performs slightly better when the gain of the system (Constant G) or the constant determining the contribution of the integral (C) is reduced – this prevents undamped oscillations in the quota at high levels of problem animal control.

Appendix 9

Effects of various Forms of Exploitation on the Age Structure of an Elephant Population

All of the following analyses are based on the population model described in **Appendix 5** (page 40). In order to obviate the effects of an irregular age structure such as that of the Savé Valley elephants, a large population of 10,000 animals has been used. The results are directly applicable to a smaller population of 1,000 animals simply by dividing all numbers by 10.

The age structure of an elephant population subjected to no exploitation is shown in **Fig.A9.1** below. This is the stable age structure of a population increasing at slightly under 5% per annum. Central mortality (see page 41) is 0.5% and average female fecundity after puberty is 0.25 calves per year. There are slightly more females than males because of a differential mortality between the sexes during the ages 20-25 years old – male mortality has been increased by 0.5% for these 5 years to cater for intra-specific fighting.

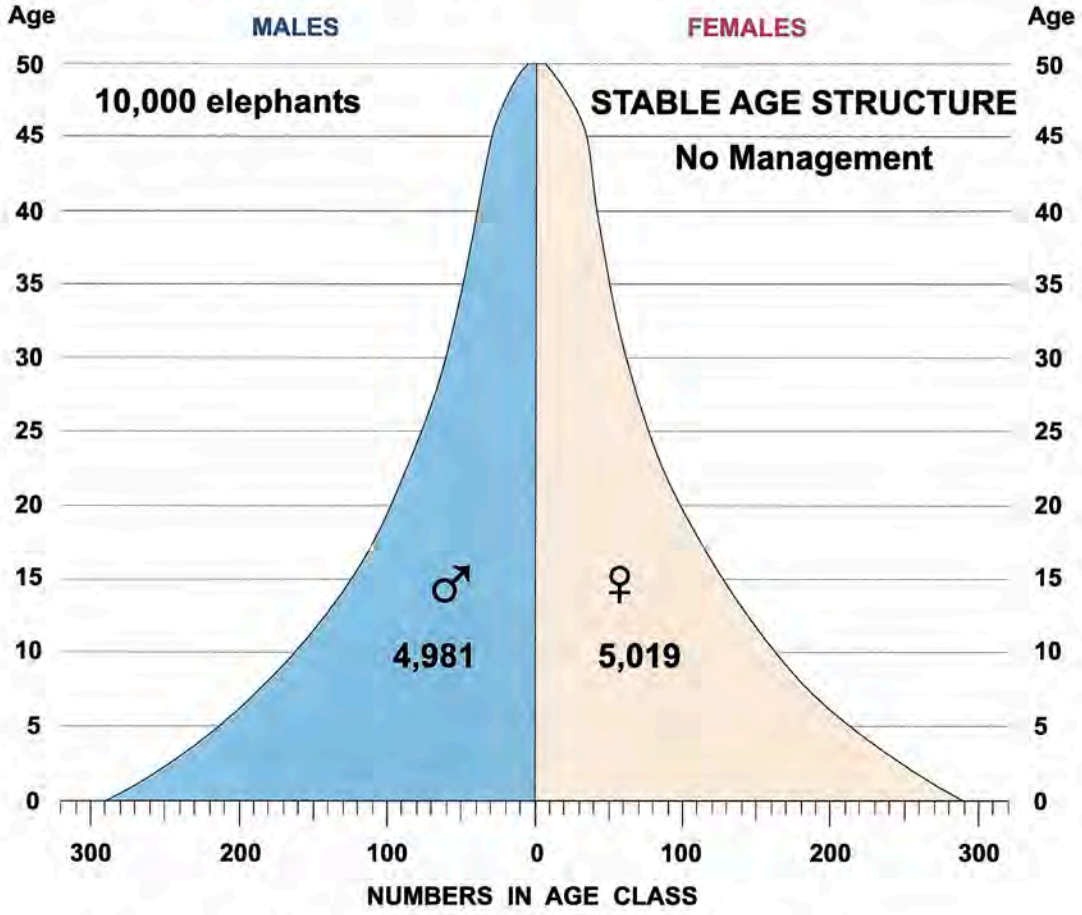

Fig.A9.1: Stable age structure for an unexploited elephant population

In the population model it is assumed that illegal hunting affects all animals in the population with an equal probability of being killed. Under this assumption, illegal hunting has no effect on the shape of the age structure but simply affects the growth rate of the population.

Culling

The culling of complete breeding herds causes the age structure of the population to be skewed towards males. Culling affects all females and all males up to the age of 10 years with equal probability of death. For males older than 10 years, the model uses a declining probability with age of a male being included in a culling operation. In practice, males carrying large tusks are almost invariably excluded from culling because of their value as sport hunting trophies.

Under a culling offtake of 3.3% and an illegal hunting offtake of 0.1%, an initial population of 10,000 animals increases for about 22 years reaching a peak of 11,200. Thereafter it declines, falling below 10,000 animals after 54 years. The age structure shown in **Fig.A9.2** below is that which is in place in the year when the population falls below 10,000 animals (Year 54). The sex ratio is 5.8 males : 4.2 females.

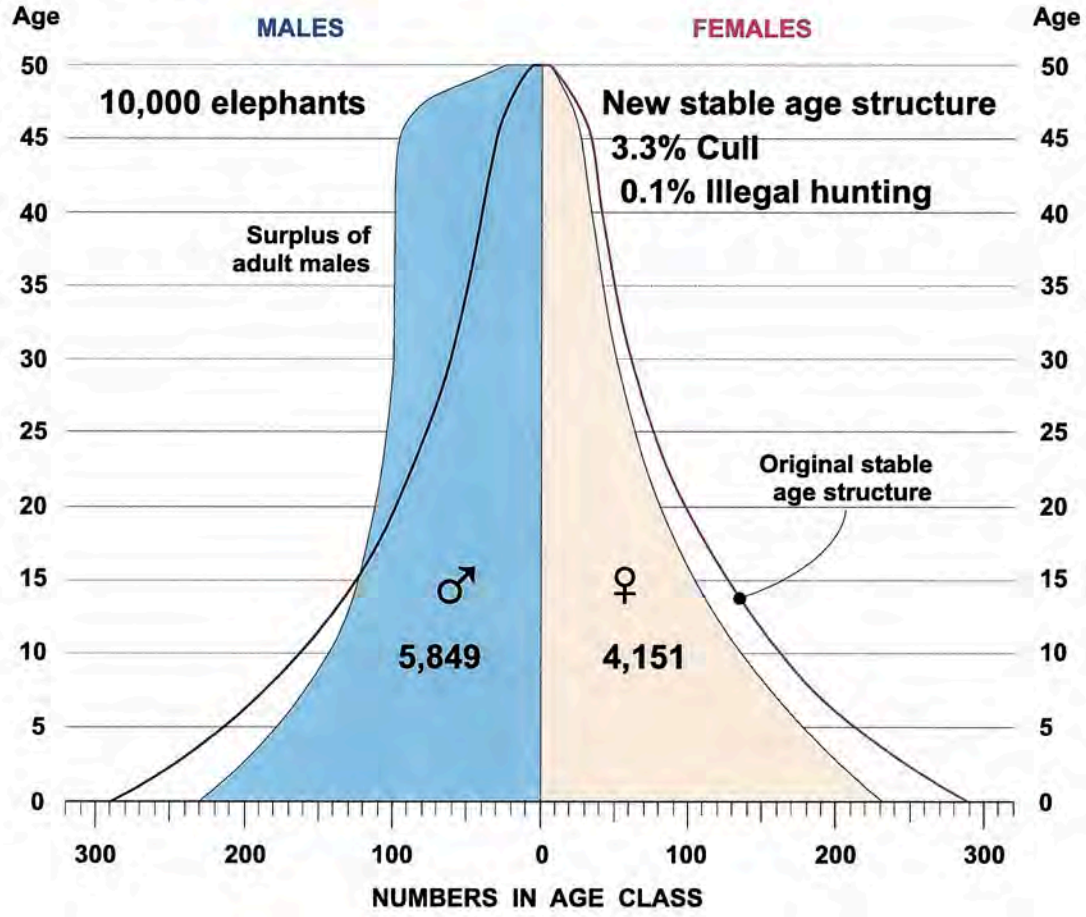

Fig.A9.2: Age structure under culling regime

Problem Animal Control

For the purposes of modelling the Savé Valley population, problem animals are defined as males aged 15 years and older. Females are excluded from PAC.

A PAC offtake of 0.25% of the total population has the effect of reducing the surplus of males shown in the previous figure and causing the shape of the age pyramid to widen slightly for all age classes other than those included in PAC (**Fig.A9.3** below).

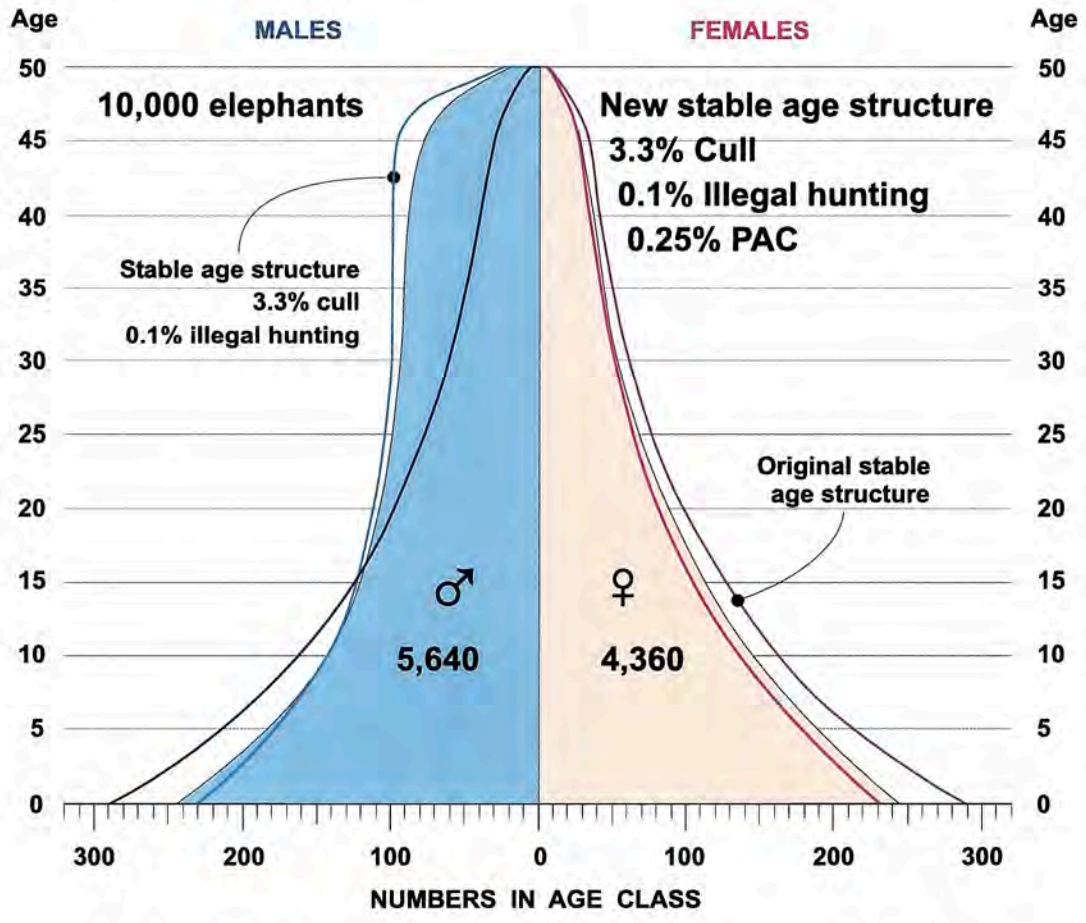

Fig.A9.3: Added effect of Problem Animal Control on the Age Structure

This age structure is used as the starting point for examining the effects of different levels of trophy hunting quotas in **Fig.A9.5** on page 68.

Trophy hunting

In the absence of culling, the maximum sustainable trophy hunting quota from an elephant population is about 0.5% (**Fig.A7.1**, page 49) – this should yield a mean tusk weight of slightly under 19kg per side (see **Fig.12**, page 20). At this level of hunting no adult males survive beyond 40 years of age. The sustainable trophy quotas possible from a population subjected to culling are more than double this – 1% or more. In **Fig.A9.4** below, the population is subjected to a 3.3% culling offtake[13] and there is no illegal hunting or problem animal control.

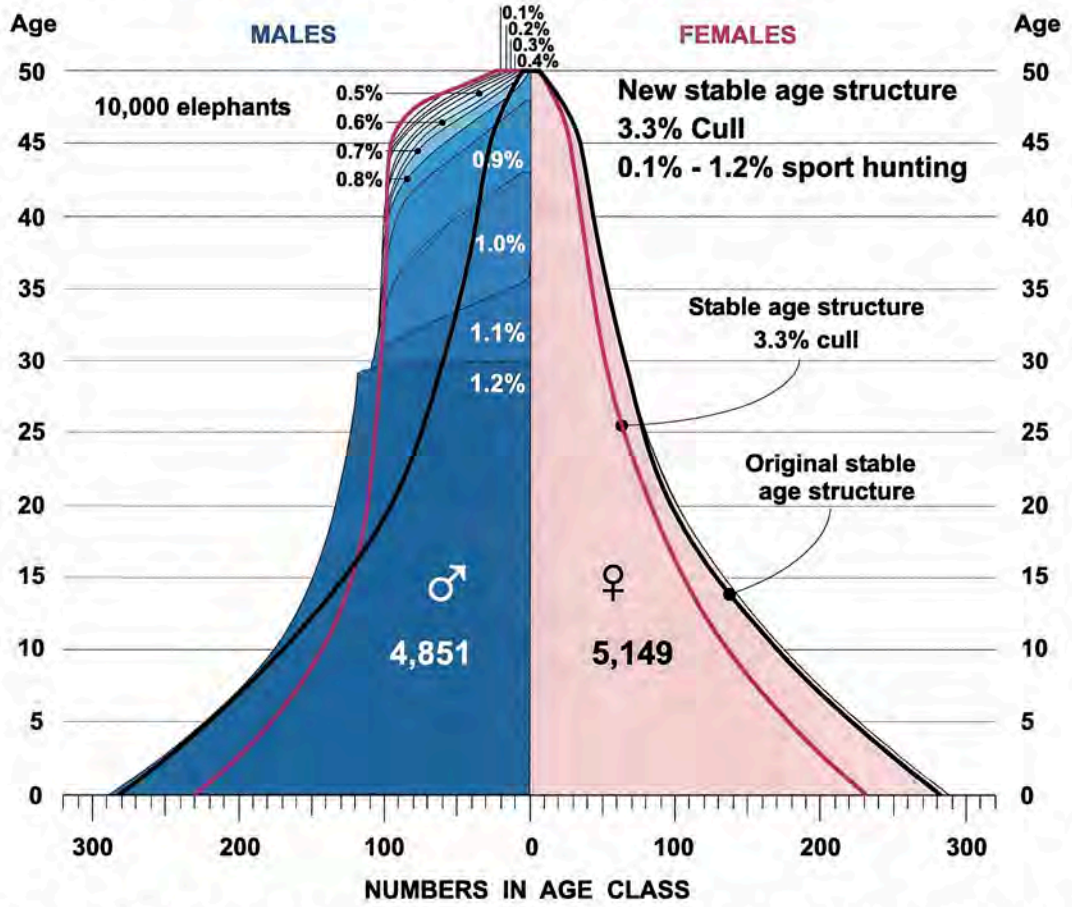

Fig.A9.4: Effect of hunting quotas on population age structure with a 3.3% culling offtake

At a quota of 1.2% of the population, all males reaching the age of 30 years are killed in that same year and none survive to become 31 years old. However, a quota of 1% of the population ensures that some males survive to over 40 years old and, for quotas less than 0.9% of the population, there will always be some males surviving to 50 years old and dying naturally. Under this regime, the age structure expands significantly in the lower age classes and closely approximates that of the 'unculled' population.

13. When the two highest quota levels (1.1% & 1.2%) are applied, a cull of 3.3% is no longer able to cause the population to decrease. For these two values, the culling offtake was increased to 3.5% 25 years after the start of culling (if 3.5% is applied at the start the population declines before the age structure can stabilise).

In examining the implications of this for the Savé valley elephants, it is necessary to take into account both illegal hunting and problem animal control. Using the stable age structure shown in **Fig.A9.3** tests have been done for various percentage offtakes (**Fig.A9.5** below).

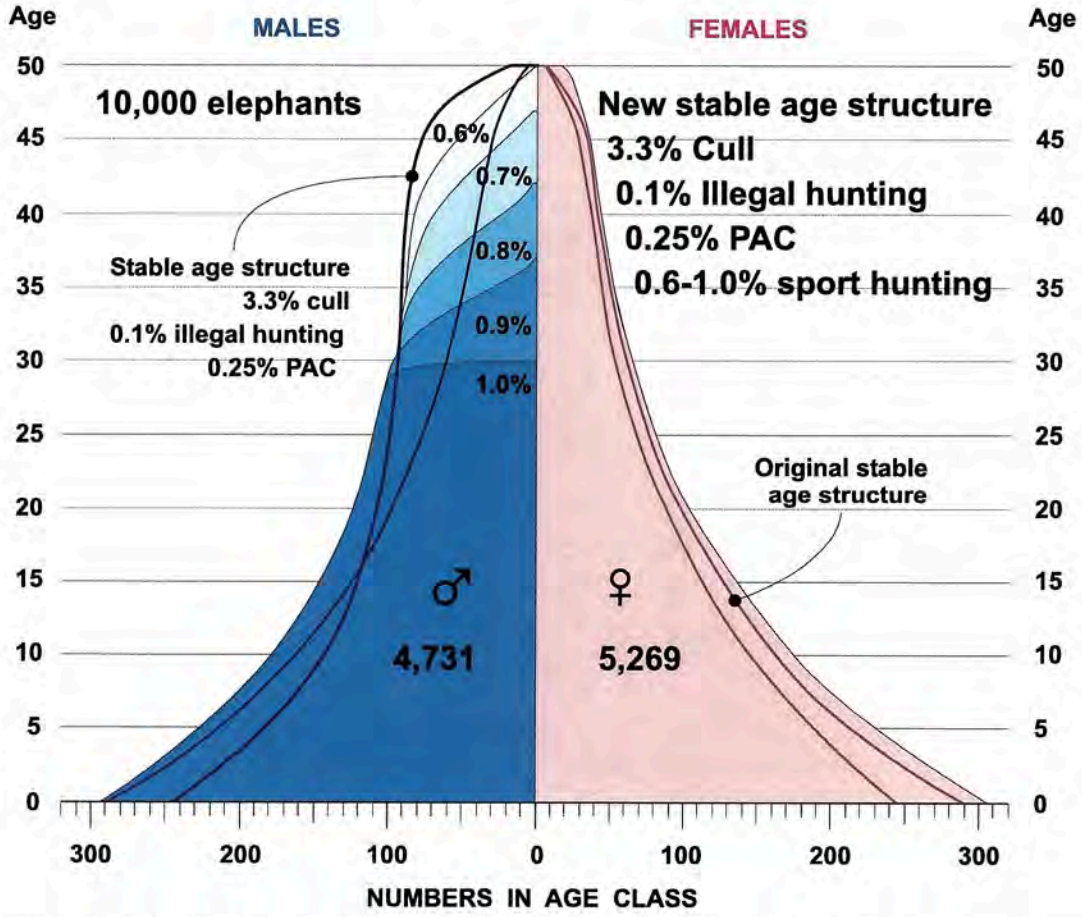

Fig.A9.5: Hunting quotas for a combined regime of culling, PAC and illegal hunting

The sustainable hunting quotas decrease significantly from those possible when there is no illegal hunting or problem animal control (**Fig.A9.4** on the previous page). If it is desired to have some males maturing beyond 40 years, the maximum sustainable quota is about 0.8% of the population.

RE: PRT # 85343C, Applicant Bryan Ottmers, elephant from Zimbabwe
Supplement to the Import Permit Application

Ms. Brisendine:

This is a supplement to the existing application, PRT # 85343C, for Bryan Ottmers for his elephant trophy from Zimbabwe.

Answers to Missing section of Application:

6b. Date the Wildlife was taken: August 9th, 2015.

7.Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

See the attached permits.

9a. Do you have any information regarding the population status or trend data on the species hunted?

Zimbabwe's elephant population is almost 20% larger than in 1997, when it was down-listed to Appendix II of CITES and the FWS made a positive enhancement finding to allow the import of elephant trophies. (See Zimbabwe Elephant Management Fact Sheet attached for references and further information). In the Save Valley Conservancy it is reported that there are over 2,700 elephants currently that have grown from a starting population of 560. This population is expected to steadily increase for the next 30 years, due to the Elephant Management Plan that has been implemented for the Save Valley Conservancy (see attached).

9b. In-order-to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Members of the Save Valley Conservancy spend almost all trophy fees on fence maintenance, game scouts, anti-poaching, maintenance of roads, operation of pipelines and water points for wildlife, and community assistance. (See letter from Save Valley Conservancy on Trophy Hunting). It covers anywhere from 60-100% of the cost for successful wildlife conservation in the area.

Levies are also paid to the Conservancy to provide staff to monitor programs that allow central management of wildlife and quota setting, recognizing that wildlife living on any one property are part of one larger population living within Conservancy boundaries.

An elephant collaring program was established for Save Valley Conservancy in 2018 and a report on the findings is included.

9c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Please reference the Operator Enhancement Report provided by Zambezi Hunters – please see the e-mail attached stating that Crane Safaris has since taken over operating in Sango- therefore no previous financial data was available for the 2017 and 2018 years for Zambezi that were on record.

Please refer to these documents and the hundreds of pages of information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by the government authorities in Zimbabwe., outfitters, and others, in making a positive enhancement finding and issuing an import permit for this elephant trophy.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

Aimee Korver

APPLICANT:

BRYAN OTTMERS

ZIMBABWE

ELEPHANT MANAGEMENT

FACT SHEET

SHORT FACT SHEET—ZIMBABWE ELEPHANT MANAGEMENT (updated May 2018)

- Zimbabwe maintains the second-largest elephant population in the world, which has grown from under 5,000 in 1900 to over 83,000 today. It is larger than the elephant populations of West and Central Africa combined. It is almost the same size as the populations of all of Eastern Africa.

Region / Country	Estimated Elephant Population (2016 Report)[1]
West Africa	11,489
Central Africa	24,119
Southern Africa - Zimbabwe alone -	293,447 - 82,630 -
Eastern Africa	86,373

- Zimbabwe's elephant population is almost 20% larger than in 1997, when it was downlisted to Appendix II of the Convention on International Trade in Endangered Species (CITES) and the FWS first made a positive enhancement finding to allow the import of elephant trophies.[2] Zimbabwe's elephant population is stable over the last 15 years, despite rapid growth of the country's human population, which increased by 24.33% between 2000 and 2016.[3]

- Hunting offtakes are a fraction of a percent and have no biological impact on the overall elephant population (i.e., do not cause population declines). Average annual offtakes between 2010-2013 were 0.276% of the total population. Moreover, hunters target older bull elephant that have already reproduced and spread their genes. Removal of older bulls tends to increase population growth rates.[4]

- Zimbabwe's wildlife authority, the Zimbabwe Parks and Wildlife Management Authority (ZPWMA), is a "parastatal." It is separate and largely funded separately from the Central

[2] This annotation is for "the exclusive purposes of allowing ... trade in hunting trophies," among other things. Zimbabwe's elephant population has grown from 66,000 to approximately 83,000. See Zimbabwe's downlisting proposal, https://www.cites.org/sites/default/files/eng/cop/10/prop/E-CoP10-P-27.pdf.

[3] Zimbabwe's population has grown from 12.22 million in 2000 to 16.15 million in 2016. World Bank, https://data.worldbank.org/country/zimbabwe?view=chart.

[4] ZPWMA (April 2014, July 2015); R.B Martin, Background Study (Apr. 2005).

government. ZPWMA was not disrupted by the 2017 Presidential transition. President Mnangagwa has confirmed that ZPWMA is proceeding with "business as usual."[5]

- Hunting areas in Zimbabwe are over three times the size of the national parks. The elephant habitat includes approximately 27,000 km^2 in National Parks, 18,900 km^2 in Safari Areas, over 50,000 km^2 in Communal (CAMPFIRE) Areas, and 7,000 km^2 in private conservancies.[6] Communal (CAMPFIRE) Areas (90%) and private conservancies are almost wholly funded by hunting revenues, which justify the dedication of this space to nature in place of alternative uses like livestock.

- Hunting fees make up a significant portion of ZPWMA's revenues. Trophy and concession fees generated almost $5.1 million for ZPWMA in 2014. Over half of these fees were paid by U.S. clients. Approximately 80% of ZPWMA's revenues are allocated for law enforcement. Put simply, hunting revenues from U.S. hunters pay for most of the anti-poaching across Zimbabwe's elephant range. And the FWS suspension of elephant trophy imports reduced ZPWMA's revenues by almost 14% in 2014 compared to 2013. The suspension has reduced the revenues available for ZPWMA (as well as CAMPFIRE communities and individual operators) to combat poaching.[7]

- Poaching in Zimbabwe has generally been kept under control so as not to have a national effect. Hunting operators support this successful control of poaching by funding their own patrol teams, paying salaries for community scouts, and assisting ZPWMA with equipment, rations, petrol, and other needs. Hunting operators are the first line of defense against poaching. For example, a sample of 15 operators spent approximately $1.32 million in 2015 to protect an area exceeding 28,000 km^2.[8] One operator, Charlton McCallum Safaris in the Dande/ Mbire areas, spends an average of $85,000/year on anti-poaching. From 2010 to 2016, their efforts led to an 80% decline in elephant poaching in an important border region.[9]

---

[5] ZPWMA Website, http://zimparks.org/about-zimparks/; see also news reports of the transition in Zimbabwe, e.g., http://www.thezimbabwemail.com/main/mnangagwa-swears-new-cabinet/; https://citizen.co.za/news/news-africa/1746240/mnangagwa-names-new-zimbabwean-cabinet/.

[6] UN Protected Planet, https://protectedplanet.net; CAMPFIRE Association of Zimbabwe Press Statement (November 2017), http://campfirezimbabwe.org/index.php/news-spotlight/26-press-stateme...1. Elephant habitat in Zimbabwe also includes over 10,000 km^2 in Forest Areas managed by the parastatal Forestry Commission.

[7] Note that hunting and concession fees are considerably higher than this, but because of the grant of "appropriate authority," hunting fees accrue to the landholder on communal and private land, not to ZPWMA. "Appropriate authority" incentivizes landholders to maintain and increase wildlife populations because they retain the benefits of the sustainable use. ZPWMA (April 2014, July 2015).

[8] ZPWMA (October 2016).

[9] Dande Anti-Poaching Unit Website, http://dapuzim.com/.

- Regulated hunting also reduces poaching by incentivizing greater tolerance among the rural communities who live side-by-side with dangerous game species. Hunting provides most of the revenue in CAMPFIRE Areas and averaged $2.2 million/year prior to the FWS suspension of elephant trophy imports. Elephant hunting alone generated approximately $1.6 million per year (65-70% of the total on average). Most elephant are hunted in CAMPFIRE Areas (55 compared 49 in government areas in 2014).[10]

- Revenues from regulated hunting are invested in game monitoring and community projects such as boreholes, classrooms and clinics, food purchases, and other livelihood improvements for Zimbabwe's rural poor. Approximately 200,000 families directly and another 600,000 indirectly benefit from CAMPFIRE revenues. Because of these benefits, poaching and problem animal control are low in CAMPFIRE Areas. This tolerance exists even though elephant destroyed over 7,000 hectares of crops and claimed the lives of approximately 50 people in CAMPFIRE communities between 2010 and 2015.[11]

- There is no evidence that ivory poaching—in Zimbabwe or anywhere else—is tied to terrorism, and that claim has been debunked by credible research, although it is often repeated in popular media.[12] In any event, regulated hunting reduces the poaching: in the Southern African countries that depend upon regulated hunting as a conservation tool (including Zimbabwe), poaching levels are the lowest in Africa. According to CITES' Monitoring the Illegal Killing of Elephants (MIKE) data, Southern African countries have the lowest Proportion of Illegally Killed Elephant (PIKE). PIKE is used to assess whether poaching levels are unsustainable. It has never risen above the sustainability threshold in Southern Africa, even in 2011, when the recent poaching crisis was at its highest level. PIKE has declined in Zimbabwe's MIKE sites since 2011.[13]

- Zimbabwe's National Elephant Management Plan (2015-2020) is the most up-to-date plan in Africa. Responding to the FWS' concerns, this new plan identifies specific action items, outputs, and Key Performance Indicators to measure the success of plan implementation. The national plan is supplemented by four regional action plans with the same framework to address the unique challenges of each range.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Blake	Robert	Whitney	

(b) (6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)

(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
The Woodlands	TX	77375	Harris	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

(b) (6) [redacted]

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country
The Woodlands	TX	77375	Harris	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the [illegible] I certify that the information submitted in this application for a permit is complete and [illegible]y false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Same as page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Robert Whitney Blake
   (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonto africana, elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Namibia, Omusati Region, Uukwaluudhi Conservancy, 14°29' 24.1" E 18°01' 32.1" S, approximately 70 kilometers east of Opuwo

   b. Date wildlife was hunted:

06/14/2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Kabous Grunschloss, Jamy Traut Hunting Safaris

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Kings Taxidermy
27 Bahnhof Street Otjiwarongo, Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
Namibia Permit 180128

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Kabous Grunschloss
Business Name:	Jamy Traut Hunting Safaris
Address:	871 Cadmium Street
City:	Tsumeb, Oshikoto Region Namibia 9000
State/Province:	
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

9a. Do you have any information regarding the population status or trend data on the species hunted?

According to the Namibian Ministry of Environment and Tourism game census, the elephant population North of Etosha National Park is stable to increasing.

Etosha National Park estimated elephant population 2911 (September 2015)

Northwestern Namibia (excluding Etosha National Park) estimated elephant population 1716 (October 2016)

9b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

I paid Jamy Traut Hunting Safaris $24,000 in trophy fees for direct benefit to the Uukwaluuhdi Conservancy with oversight from the Namibian Ministry of Environment and Tourism.

This elephant hunt was led by two officers from the Namibian Ministry of Environment and Tourism, Ranger Michael Mumbalu and Assistant Ranger Gabriel Nuunyango. These officers accompanied myself, Professional Hunter Kabous Grunschloss and the Uukwaluudhi Conservancy Game Scout to inspect numerous village farm plots raided by three bull elephants on a nightly basis. We tracked these specific bulls, taking the largest and oldest of the three.

Trophy fees benefit the Uukwaluudhi Conservancy as follows:

- Compensation to farmers for crop losses and elephant damage to fences and water tanks
- Salaries of game scouts and anti-poaching personnel
- Conservancy management staff salaries

9c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species hunted?

Jamy Traut Hunting Safaris directly assists Namibian Ministry and Conservancy officials with anti-poaching patrols.

Each hunting camp utilized by Jamy Traut Hunting Safaris employs approximately 25 to 30 local people (chefs, cleaners, skinners, trackers).

Jamy Traut Hunting Safaris has purchased solar panels and electrical submersible pumps for use by the conservancies. Wild game activity was clearly evident at these wells.

Jamy Traut Hunting Safaris is actively involved in management of human-wildlife conflict with elephants.

Jamy Traut Safaris is also working with the Africat Foundation in northwest Namibia to monitor leopard and lion populations. Assistance includes providing trail cameras as well as sharing observations and photos documented during safari and scouting operations.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in e(b) (6) opard trophy, I understand that I may only import two leo

Applicant's signature: [redacted] ate: 10/08/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Well Worldwide Energy Logistics, Inc.
   17401 Aldine Westfield Rd. Houston, Texas 77073 c/o Lynette Lilley281-606-2400 xt 2402

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Lynette Lilley 281-606-2400x2402
   Llilley@well-usa.com

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Elephant- Elephamtidae

   b. Sex (if known). male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Namibia, Capriv Strip, Baninu and Kasika, Katima Mulilo

   b. Date wildlife was hunted:

August 30,2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

JN Blaauw

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Reiser Taxidermy
PO Box 11908, Plot 43 Brakwater, Windhoek Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
INCLUDED

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	JN Blaauw	ph BUSINESS ADDRESS
Business Name:	c/o Reisner Taxidermy	JN Blaauw
Address:	PO Box 11908, Plot 43 Brakwater	PO Box 1677 Academia
City:	Windoek	WHK
State/Province:	Namibia	Tel: 264-811464959
Country, Postal Code:		

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

The Namibian government(Games Department) has a cities approved game management plan for elephants.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

The government fee was a 1% of the Total price. The Trophy was 65% which all go to the Kasika Community Eastern Capri. IThe rest of the 34% is going to the outfitter which is used for running cost (includes 18 people of Kasika Community that are employed by us) the rest is profit.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The outfitter Sponsor US $10 000 every year to the community as they will use that for any of there activities. also the outfitter is currently busy to install 2 waterholes.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Bezzina	Lance	A	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6) [redacted]			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Dubuque	IA	52003	Dubuque	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best [illegible] understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Lance Bezzina (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana/ African Elephant

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Republic of South Africa, Klaserie Private Nature Reserve Limpopo province near Hoedspruit city

b. Date wildlife was hunted:

Sept 2, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Magnum Hunting Safaris
Wulf Schwerdtfeger

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

THABA MAHAKA TAXIDERMY
32 ROODEPOORT PLOTS, POLOKWANE, LIMPOPO, SOUTH AFRICA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). INCLUDED / see attached
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	THABA MAHAKA TAXIDERMY
Address:	32 ROODEPOORT PLOTS
City:	POLOKWANE
State/Province:	LIMPOPO
Country, Postal Code:	SOUTH AFRICA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?
See attached

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
See attached

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
see attached

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ (b) (6) _____ Date: 10/22/2018

Be aware that there may be addition[redacted]l requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA AND FLORA

In answer to question 9 a, b and c:

a. The population status of the elephants in the Klaserie and greater Kruger park has increased since implementation of conservation and hunting. The hunting with trophy fees has provided funds for "the elephant project" as below that as you can see from the objectives not only monitors the sheer number of elephants it also monitors their impact on the environment, movements and co-existence with man.

b. The trophy fee was $38,500 and daily rate of $500/day. These fees provide monies to not only "the elephant project" but also "The Ground Hornbill Project" and Rhino anti-poaching activities (see below).

c. There are three conservation projects going on in the Klaserie Private Nature Reserve and the information is below. My hunting dollars from answer "b" (above) went to pay for this.

The Klaserie Private Nature Reserve (KPNR) is one of the largest privately-owned nature reserves in South Africa covering some 60,000 hectares and is part of the greater Kruger National Park. It is an entirely non-government organization involved in the full spectrum of Nature Conservation.

The KPNR was established in 1969 and was officially proclaimed a nature reserve in 1972 with Jan de Necker as the founding chairman and Van Reenen Van Vuuren as the first warden. The reserve is run by an executive committee comprising members or landowners who are elected at the AGM and operate through the reserve's warden Colin Rowles. Colin circulates a monthly report to all the members keeping them informed of the weather, the condition and status of the fauna and flora and any other matter of general interest.

The KPNR is a member of the Association of Private Nature Reserves (APNR), a cooperative organization established to coordinate the interests of its members and to act as a single body in interacting with government entities. The association comprises Klaserie, Timbavati, Umbabat and the Balule.

We are deeply committed to the non-profit organization Eco Children (formerly Children's Eco Children) which is in an initiative of the Klaserie Private Nature Reserve. Eco Children has been very successful in interacting with the children of the local community from a hands-on conservation education perspective and through a 'whole school development' approach. Eco Children has a specific focus on the environment and on education, and the significance and importance of both to our lives and the future of our country.

We host The Ground Hornbill Project which is sponsored by The Fitzpatrick Institute of African Ornithology and directed by Professor Phil Hockey. There are two other research projects within the APNR. The elephant research project operating under the umbrella of "Save the Elephants" founded by Dr Ian Douglas Hamilton and the "Tembo" project currently studying buffalo. This is one of the projects hosted by the Resource Ecology group of the University of Wageningen in the Netherlands.

There are various commercial operations within the KPNR ranging from rustic bush camps and walking trails to luxury game lodges. It is the Reserves policy to keep the commercial and thus human impact to a minimum as it is the mission to make the KPNR as near a pristine environment as possible.

The Elephant Project

Research commenced in 2003 as Save the Elephants – South Africa, and draws on data collected over almost two decades. The research contributes towards the long-term survival of the African elephant, thereby maintaining the vital diversity of our world. If elephants are to survive, we need scientific knowledge and an intimate understanding of their movements and needs.

Our quest involves delivering research solutions which acknowledge elephants as an integral part of the ecosystem they occupy. We work towards achieving a greater understanding of the complex relationships that elephants have with each other and their surroundings, including the people with whom they share their world.

SCIENTIFIC OBJECTIVES

1. To conduct research into how habitat resources, the need for safety and the social presence of other elephants influence observed patterns in elephant movements.

2. To understand the abundance, movements and conservation importance of the remaining large tusked bulls within the Great Limpopo Transfrontier Park (GLTP) and to use these flagship individuals as educational tools to address broader conservation concerns.

3. Relate elephant occurrence to their effects on the vegetation and infrastructure where elephants and man co-exist.

4. To determine the level of sensitivity between selected tree-nesting birds and the impact of elephant on trees used as nesting sites. (See the Ground Hornbill Project below.)

5. To assess the efficacy of experimental mitigation methods aimed at reducing the effects of elephants in localized areas.

6. To further our understanding of how elephant mortality rates differ between South Africa and other African range-use states in view of the escalating illegal trade in ivory.

Methods

Our overall research program within GLTP represents a long-term study focused on understanding what motivates elephant movements from core conservation areas such as the Kruger National Park (KNP) into peripheral Protected Areas along its western, eastern and northern borders.

OBJECTIVE 1

We track elephant movements using advanced GPS and GMS technology in order to understand their habitat use. By identifying specific elephants, we study population dynamics and objectives relating to the drivers of elephant movements.

OBJECTIVE 1&2

We identify, track and monitor large-tusked and potentially large-tusked individuals to record their movements and fitness, in terms of annual musth cycles. In doing so, we are offering them a measure of protection. We have deployed a number of collars on large-tusked bulls, some of which have gained public support and recognition.

OBJECTIVE 3&4

We provide information on the effects of elephants as drivers of ecosystem change in relation to indicator species such as large trees (primary) and selected tree nesting birds (secondary). Individual trees are monitored over time to establish rates of change in important landscape features.

OBJECTIVE 5

We experiment with methods of alleviating the impact that elephants have on trees by wire-netting large trees or using beehives as natural deterrents, thus increasing food security for other species including humans. This information contributes towards improving our knowledge of the ecological processes that promote the sustainable coexistence of elephants, their habitats and people.

OBJECTIVE 6

We monitor and compare elephant mortality rates and causes thereof within the continental context. The southern states (Botswana, Namibia, South Africa and Zimbabwe) have become the last stronghold for the African elephant due to uncontrolled poaching to the north of these borders.

We initiate research projects as well as collaborate with established research sites across the southern states to deepen our understanding on how different land-use practices influence the movements, survival and the conservation significance of elephants.

Research Activities (4):

1. Identify

IDENTIFYING INDIVIDUAL ELEPHANTS IN ORDER TO STUDY POPULATION DYNAMICS

Western Kruger National Park (APNR)

Since 1996: An extensive individual elephant ID database of 1500+ elephants.

Northern Kruger NP (Makuleke Concession)

Since 2008: An ID database of 100+ bulls and the identikits of 11 independent breeding herds

2. Track

TRACKING ELEPHANTS USING ADVANCED TECHNOLOGY (GPS-SATELLITE AND GPS/GMS COLLARS) TO UNDERSTAND HABITAT USE

Western Kruger National Park

Since 1998: 62 collaring operations including 17 re-collaring's.

We currently have distribution data spanning 10 years from 8 herds and 29 bulls (ranging in age from 12 to 50 years).

Eastern Kruger National Park

December 2006: 7 GPS-satellite collars fitted on elephant bulls.

The focus is to gain a better understanding of elephant movements, their routes and under what environmental conditions they move into the new Limpopo NP in Mozambique. A secondary aim is corroborate or refute the results of our research efforts to the west of KNP.

Northern Kruger National Park (Makuleke Concession)

October 2008: 12 GPS-satellite collars fitted on elephants (6 bulls, 6 cows).

2012: 9 of these elephants were re-collared

This project is in collaboration with the Kruger National Park, the Makuleke Community and The Wilderness Safari Trust.

3. Monitor

MONITORING INDIVIDUAL TREES OVER TIME TO ESTABLISH RATES OF CHANGE IN IMPORTANT LANDSCAPE FEATURES

In 2004 we initiated an individual tree monitoring program. We are currently surveying 2971 individually labelled trees to determine their survival rate and the influences of accumulative elephant impact, wind toppling, insect attack or the effects of fire.

On an annual basis, we monitor 62 large trees used by southern ground hornbills as nesting sites to understand the influence of elephant impact on these sites.

We monitor 226 trees used by raptors and white back vultures as nesting sites to understand the influence of elephant impact on these sites.

4. Experiment

EXPERIMENT WITH VARIOUS METHODS OF ALLEVIATING ELEPHANT TREE IMPACT AND PROVIDE SCIENTIFIC KNOWLEDGE TO ALL STAKEHOLDERS.

Testing the efficacy of wire netting large trees in order to protect them and to foster positive human-elephant interactions, as large trees are considered to be of ecological and aesthetic importance to landowners.

Establishing an experimental site where bees will be used as a deterrent for elephant impact, thereby providing food security for other species, including humans.

The Southern Ground-Hornbill Project

The Southern Ground-Hornbill *Bucorvus leadbeateri* is a conservation icon of South African savannas. During the 20th Century its range and population size in South Africa decreased by some two thirds, with the birds disappearing from much of their historical range. Such a rapid decrease in the population of a long-lived, slow-breeding animal is of great conservation concern and, based on IUCN (International Union for Conservation of Nature) criteria, the official conservation status of Southern Ground-Hornbills in Southern Africa has been elevated from Vulnerable to Endangered.

The reasons for their decline are mainly habitat loss and persecution. Poisoning is also a concern since Ground-Hornbills are carnivorous they are sometimes the unintentional victim of poisoning by consuming carcasses laced with poisoning aimed at killing off livestock predators such as leopard and jackal. Because of the Ground-Hornbills' complex social structure and slow breeding rate, self-reintroduction would, at best, be very slow. This means that reintroduction programs are probably imperative to improve the species' precarious conservation status.

Various organizations are working together now to ensure the long-term survival of this species in the wild. Together we form the Ground Hornbill Action Group and meet at various times in the year to discuss our findings, achievements and future plans. Organizations such as the Percy Fitzpatrick Institute of African Ornithology, Mabula Ground-Hornbill Project, Endangered Wildlife Trust's Large Birds of Prey Working Group, Johannesburg Zoo, Pretoria's National Zoo, Mpumalanga Parks and Tourism, and others put together a Recovery Plan for the species to guide all involved and to lay out goals and objectives for the coming years.

SNAPSHOT OF SOUTHERN GROUND-HORNBILLS IN SOUTHERN AFRICA

- There are approximately 3000 birds left in the wild in southern Africa
- Their distribution extends from as far south as the Eastern Cape in SA all the way up to Kenya
- In South Africa the total number is estimated to be around 1500 birds, most of them occurring here in Kruger National Park as well as the Limpopo River Valley
- Groups comprise an alpha pair as well as numerous male sub-adult helpers. It is not yet fully understood where females go when they leave the group at a young age
- They nest in large cavities in trees, occasionally in cliffs
- They are very competent fliers but they fly low at canopy height
- They are strict carnivores eating snakes, lizards, insects, tortoises, birds
- Their closest relative is the Abyssinian or Northern Ground-Hornbill *Bucorvus abyssinicus*

HISTORY OF THE PROJECT IN THE APNR (ASSOCIATED PRIVATE NATURE RESERVE)

The Institute started monitoring groups of ground-hornbills in the APNR in 2000, and erected some 30 artificial nests in 2002 and 2003. The original rationale for this study was an exploration of social behavior in the world's largest cooperatively breeding bird.

The Fitztitute's Southern Ground-Hornbill Research Program aims to gain a scientific understanding of the environmental conditions which promote the survival and successful reproduction of these birds.

We will use this knowledge to:

• Gain a scientific understanding of the environmental conditions that promote the survival and successful reproduction of Southern Grounds-Hornbills.

• Provide the scientific information to guide reintroduction programs such that their efficiency and efficacy are optimized.

PROJECT RATIONALE

In many cases, however, the drivers of local extinctions are known, and in some instances these are no longer operative. Because of the groundhornbills' complex social structure, self-reintroduction would, at best, be very slow. This means that reintroduction programs need to be considered in an attempt to improve the species' precarious conservation status. Given this set of circumstances, the Southern Ground-Hornbill Research and Conservation Program has the following overarching aims:

To gain a scientific understanding of the environmental conditions that promote the survival and successful reproduction of Southern Ground-Hornbills.

To use this knowledge to identify areas previously occupied by ground-hornbills that are now suitable for their reintroduction.

To provide the scientific information to guide reintroduction programs such that their efficiency and efficacy are optimized.

KEY RESULTS

The Percy FitzPatrick Institute has been monitoring group distribution, composition and breeding performance of ground-hornbills at the APNR since the breeding season of 2001/2002. We now have reproductive data spanning nine breeding seasons. In 2009/2010, MSc student Gwyneth Wilson analyzed the first eight years of data from this long-term monitoring to determine the factors influencing differences in reproductive performance between groups. There were major differences in reproductive success amongst the 23 ground-hornbill groups monitored within the APNR. Over the period 2001-2008 there were some highly successful groups that bred and fledged a chick almost every year, whereas other groups either did not breed or did not rear a single chick over the same period. During 2001–2008 (184 possible group breeding years) there were a total of 67 breeding attempts by 17 of the 23 groups.

RHINO PROTECTION

The Klaserie Private Nature Reserve is as vulnerable to Rhino Poaching as are all SA's parks.

Hunting dollars along with other donations and revenue have allowed the following:

- The Establishment of a dedicated anti-poaching rhino unit
- Accommodating the new anti-poaching unit in a separate newly established camp designed specifically for these operations
- Employment of a new team of field rangers dedicated to rhino poaching
- The specialized training of the new field rangers in anti-poaching techniques
- The equipping of the new field rangers team with gear, munitions and communication equipment
- The acquisition of a new 4x4 vehicle for the anti-poaching team
- The acquisition of a specially trained tracker dog - Koevoet
- Community awareness projects both within and outside the Klaserie through Childrens' EcoTraining
- The establishment of motion sensor programs
- Klaserie intelligence sharing and co-operation with adjoining Reserves including Kruger National Park
- The establishment of reward programs in exchange for information leading to the apprehension of poachers
- Klaserie participating as an active participant in Game Reserves United (GRU) coordinating anti-poaching efforts amongst all Game Reserves forming part of the Greater Kruger National Park

- The establishment of new and technologically improved fences along our boundaries
- Increased surveillance within the reserve and along its boundaries with using cellular and camera technology
- Participating in fund raising projects to raise money for anti-poaching initiatives
- The establishment of a separate "Klaserie Private Nature Reserve Save the Rhino Fund" which is audited annually
- SARS approval for donations to and by this new fund to be income exempt and
- Increasing public awareness of the plight of Rhinos in the electronic and print media through the Klaserie Chronicle published by Childrens EcoTraining

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Daniel Cabela
(b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Loxodonta africana
   African Elephant

   b. Sex (if known)

   Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted: N/A

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

   Bwabwata West National Park
   Caprivi, S 18 09° C 162 E 021 42° C 495
   Nearest City: Rundu (bigger town) Divundu (very small)

   b. Date wildlife was hunted:

   1 August 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
Hunting Outfitter: HuntaFrica Namibia
Professional Hunter: J.H. Pienaar

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:
Trophaendiens LC cc
Po Box 21068, Windhoek
Namibia, Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Attached

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].
Name: JH Pienaar (Jakobus Hugo) +264 81 124 3299
Business Name:
Address: Farm Hester 407 / P.O. Box 1100 Gobabis
City: Gobabis, Omaheke
State/Province:
Country, Postal Code: Namibia 9000

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Please see attached

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Please see attached

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Please see attached

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to resul[redacted]o import an elephant trophy, I understand that I may import no more[redacted]ar.

    Applicant's signa[redacted] Date: 10-17-18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Answers for Question 8 and 9 a-c

8. Person / Business shipping your trophies:

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: ___1___ (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: All days, Property name Mapungubwe
   b. Date wildlife was hunted: 6-23-2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): 2 - 4-feet and tail - 2 Ears

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
PLOT 114, BASHEWA P.O BOX 11526
Tigerport, Pretoria 0056 South Africa

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Rupert DEDEKIND
Business Name: Universal Trophy Services
Address: PLOT 114, BASHEWA
Address: P.O Box 11526
City: TIGERPORT, PRETORIA 0056
State/Province:
Country, Postal Code: South AFRICA

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States

Applicant's signatu (b) (6) Date: 12/15/2017

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Catherine Cockey, Wildlife Inspector 410-694-9590
BWI Air Cargo Complex
Building F, Suite 1500 Baltimore MD 21240

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

RE: Import Application of Zimbabwe Elephant Trophy for Jonathan Jones

Dear Chief Cogliano:

Enclosed please find the permit application to import an elephant trophy from Zimbabwe for Jonathan Jones. Also attached to the permit application is enhancement information provided by the Lodzi Hunters Safari Company. Please refer to the hundreds of pages of enhancement information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by Zimbabwe authorities, outfitters, and others, in making an enhancement finding for Elephant trophy imports.

Please do not hesitate to contact us if you have questions about this permit application.

Sincerely,

John J. Jackson III

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that the attorney, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

IMPORT OF SPORT-HUNTED TROPHIES
~~(Appendix I of CITES and/or ESA)~~

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Jones	Jonathan	Grant	

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Pelham	NY	10803	Westchester	USA

2.a. *Mailing Address (include if different than physical address; include name of contact person if applicable)*

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

(1) Is raw, processed, or manufactured;

(2) Was legally obtained by the hunter through hunting for his or her personal use;

(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and

(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:

(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;

(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and

(iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Grant Jones (b) (6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Loxodonta Africana - African bush elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   Tsholotsho South hunting concession near the town of Tsholotsho, Zimbabwe

   b. Date wildlife was hunted: August 18, 2018

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   Lodzi Hunters (safari company); Marthinus (Tinie) Kok (professional hunter)

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   TCI (taxidermist), 4 Josiah Chinamano Rd, Belmont, Bulawayo, Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name:
Address: TCI, 4 Josiah Chinamano Rd, Belmont, Bulawayo, Zimbabwe
City:
State/Province:
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   Yes. See attached page.

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   US$35,000. The concession is part of Zimbabwe's CAMPFIRE program (please see more below in 9.c.). Hunting generates about 90% of the CAMPFIRE program income, with elephant hunting contributing up to 70% of annual income. American hunters make up 60% of the clients in CAMPFIRE areas.

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

   This concession is part of Zimbabwe's CAMPFIRE program, which has a combined 2.4 million beneficiaries, made up of 200,000 households that are directly involved in the program. Another 600,000 households benefit indirectly from wildlife related income. Wildlife income is used for administration, field patrols, monitoring of hunts, problem animal control, water provision, and fire management. Communities have drilled boreholes, constructed seasonal roads, erected fencing to keep out wildlife, purchased tractors, and directed drought relief food. Children benefit from the construction of schools. Communities also benefit from the donation of elephant meat.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature: (b) (6) _____ Date: 10/7/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Jonathan Grant Jones
(b) (6)
Pelham, NY 10803
(b) (6)

Question 9.a.
Do you have any information regarding the population status or trend data on the species hunted?

Answer: The greater Hwange National Park area, which includes an unfenced border with the Tsholotsho South concession, contains an estimated 40,000 elephants. A sustainable population is 20,000.

Question 9.b.
In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Answer: US$35,000. The concession is part of Zimbabwe's CAMPFIRE program (please see more below in 9.c.). Hunting generates about 90% of the CAMPFIRE program income, with elephant hunting contributing up to 70% of annual income. American hunters make up 60% of the clients in CAMPFIRE areas.

Question 9.c.
Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

Answer: This concession is part of Zimbabwe's CAMPFIRE program, which has a combined 2.4 million beneficiaries, made up of 200,000 households that are directly involved in the program. Another 600,000 households benefit indirectly from wildlife related income. Wildlife income is used for administration, field patrols, monitoring of hunts, problem animal control, water provision, and fire management. Communities have drilled boreholes, constructed seasonal roads, erected fencing to keep out wildlife, purchased tractors, and directed drought relief food. Children benefit from the construction of schools. Communities also benefit from the donation of elephant meat.

Ms. Brisendine:

The document attached is to be included as supplement to all original import permit applications filed with the U.S. Fish and Wildlife Service listed above.

Since filing these applications we have received additional documentation of conservation efforts for elephants in Zimbabwe that further detail the elephant populations as stable and growing. The CAMPFIRE document strongly argues the importance of trophy imports and the

value that they provide to communities in Zimbabwe through income flows from tourism and hunting which serve to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat.

The Campfire document details the drastic effects that COVID-19 has had and is having on Zimbabwe's tourism and hunting market, which is in a state of collapse. It is leaving the country uncertain of how wild-life and anti-poaching programs will be supported on the ground in the coming months. This information can be used to predict what might transpire if trophy hunting and imports were to cease to exist and the tragic outcome it could have on the conservation efforts of wildlife in the area.

We ask that you please consider these documents when making your decision on enhancement in each import permit application.

Please feel free to contact me if you have any questions regarding this mater.

Cordially,

Aimee Korver
Permits Paralegal

1. CAMPFIRE communities Concern on Import Bans

Open Letter to the United States Fish and Wildlife Service

Dear Dr Mary Cogliano

CAMPFIRE Communities Concern on Import Bans

CA/MPFIRE Association, otherwise known as the Community Areas Management Program for Indigenous Resources in Zimbabwe wishes to register its opposition to continuing campigns for the banning of trophy imports. We are fully aware that the general outrage in both print and social media against sport hunting, which many distant voices refer to as unethical, is aimed at influencing policy action by importing countires.. These arguments, none of which are supported by science, are based on a perfected art of global misinformation and do not represent the views of rural communities who live side by side with wildlife. To us as a people with substantial wildlife populations, trophy hunting is indispensable for conservation and rural livelihoods.

Zimbabwe has one of the most resilient and successful conservation programs in Africa. Its conservation efforts have historically enabled local communities to thrive on sustainable livelihoods in biodiversity-rich landscapes. At least 800 000 households or 2.5 million people (out of a national population of 16 million) benefit directly and indirectly from the sustainable use of wildlife and tourism related investments in their areas. However, our ever growing elephant population has increased the levels of conflict between humans and wildlife in recent years, which, together with recurrent droughts that threaten food security, have made traditional livelihoods more difficult, especially for subsistence farming communities that live in the wildlife rich areas of the country.

Communities in CAMPFIRE areas reside in an environment where conflict between humans and wildlife is common, as both compete for the limited available land and water resources. But this comes at a high price: people in Zimbabwe are paying with their lives for tolerating wild animals in their areas. As recently as 23rd March 2020, Barnabas Mwinga, a 50 year old man, was killed by an elephant in his field in front of his wife and young daughter in Gonono Ward, Mbire District. He is one of seven other people that have needlessly lost their lives to wildlife attacks throughout the country since the beginning of 2020, in addition to the 41 killed in 2019. Yet despite this high cost, wildlife is still highly valued by rural communities who continue to tolerate massive crop destruction and livestock losses from wildlife without compensation. For example, elephant poaching in Mbire District where Barnabas Mwinga was recently killed has gone down from a peak of 40 in 2010 to only 3 elephants poached in 2019 (Figure 1). The decline in poaching incidents is a result of collaborative efforts between the Safari Operator and the hunting clients who invest nearly $100,000 annually into an anti-poaching unit.

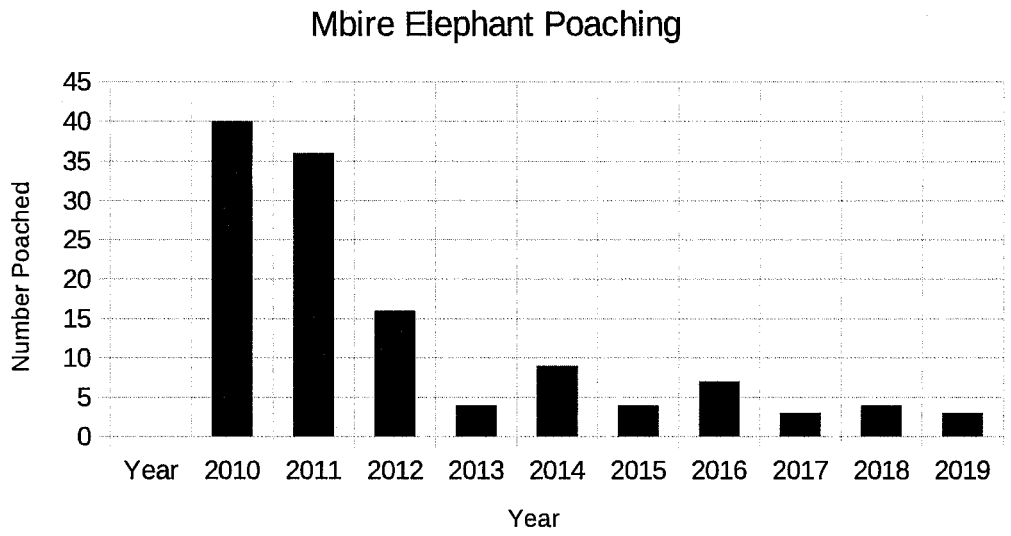

Figure 1: Mbire Elephant Poaching Trends (Source – Mbire Rural District Council)

The aim of the CAMPFIRE programme is to support sustainable community livelihoods in a way that promotes conservation of wild species and habitat. For nearly 30 years, trophy hunting, which relies heavily on the American market, has been cautiously implemented in the absence of other tourism opportunities to achieve this goal. Not only has it resulted in increasing food and livelihood security of rural people, it has also played a role in undermining the drivers of poaching and mitigating human and wildlife conflict. The net impact is seen in securing wildlife habitat and assisting in the regeneration of degraded landscapes.

The financial resources to succeed with this programme in CAMPFIRE areas are heavily dependent on the sustainable hunting of big game, especially elephants. The monies generated from these activities finance the local economies, social services as well as anti-poaching efforts and wildlife management at the District and Ward levels. For example, as can be seen from Table 1 below, the total number of elephants hunted as trophies over nine years is 807 out of a cumulative quota of 1381, from an estimated national population of 83,000 elephants. Hunting quotas are set at no more than 0.5% of the population estimate compared to an elephant population growth of 5% to 6% annually. The levels of off-take (58%) also demonstrate that while hunting is based on controlled numbers for each species annually, it is not uncommon for a client to pay for a full hunt and enjoy the wild experience, but not take a trophy. It is also important to note that communities do not view international hunting clients just as tourists, but as vital conservation partners.

Table 1: Trophy Hunting Quota Summary and Income: 2010-2018

All Districts:	**Elephant**	**Lion**	**Leopard**	**Buffalo**	**Hippo**	**Crocodile**	**Total**

Source: *The Role of Trophy Hunting of Elephant in Support of the Zimbabwe CAMPFIRE Program: Vernon Booth* (in progress).

District and Ward-level institutions in the CAMPFIRE areas rely on income from hunting to provide significant local livelihood benefits (income, jobs, skills) and social services (schools, clinics, irrigation schemes, boreholes) in remote regions where agriculture is marginal and there are very few jobs or other sources of cash income. Table 2 and Table 3 below summarise the impact of pre- and post-elephant trophy import suspension expenditure on the CAMPFIRE programme at the District and Ward level. The District administration costs absorb 89% of the budget with 30% devoted to law enforcement. With the suspension of elephant trophy imports to the USA and Europe in 2016, expenditure on law enforcement dropped from 33% to 9% as a result of District administration having to offset the human and wildlife costs which increased from 1% to 33%. At the Ward level, 46% of the budget is allocated to administration and 54% to community benefits (45% devoted to social services, Table 3).

Table 2: District level expenditure on administration and community benefits: 2010-2018

	Administration			**Community Benefits**

With growing awareness from several years of CAMPFIRE implementation, communities have been demanding their rightful place in the management of wildlife resources for their own benefit. To accommodate this, CAMPFIRE has undergone a review of its policy framework to enable communities to reap greater and more tangible benefits from living in harmony with nature. A key aspect of this review is to establish Community Conservancies that redefine ways in which communities can benefit more from wildlife and other income generation opportunities, as well as the mitigation of human and wildlife conflict. This initiative is being directed under the Global Environment Facility (GEF) 5 and 6 cycles covering five districts with the aim of developing innovative ways to improve the management of wildlife for the benefit or rural people. If trophy hunting and trade here was stopped, the impact on local livelihood would be severe, and both poaching and changes to alternative land use would increase. Non-consumptive tourism currently plays virtually no positive conservation role in the CAMPFIRE areas (<4% of overall income is generated through tourism). Instead of banning the import of trophies, more international oversight and support is needed from importing states, and of in-country CITES controls, to ensure sound sustainable management e.g. quota-setting, permit allocation, independent population surveys; building robust, equitable and transparent benefit allocation mechanisms at local level, particularly where communities have elected to invest their land and time in Community Conservancies.

STOP PRESS: The pressure for imports bans comes at the worst possible time as the Covid-19 pandemic has severely disrupted income flows from tourism and hunting. The collapse of both markets leaves rural people and safari operators with virtually no income, and it is uncertain how wildlife protection and anti-poaching programs will be supported on the ground in the coming months. What remains clear is that trophy import bans will seriously undermine conservation in Zimbabwe, and indeed open floodgates for rural people to destroy wildlife and wildlife habitat through conversion of land for other subsistence uses, even if unviable.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Rossey	Michael	R.	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6) [redacted]			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Cheney	WA	99004	Spokane	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

(b) (6) [redacted] and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the ***hapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and ief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

(b) (6) [redacted]

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Mike Rossey (b) (6) [redacted]

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Safari company - Nyamazana Safaris
Professional hunter - Norman Crooks

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Collett's Wildlife Artistry

15 Josiah Chinamano Rd
Belmont, Bulawayo
Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: Outbound cargo and trophy exporters
Address: 5 Grantham Rd.
City: Belmont Bulawayo
State/Province:
Country, Postal Code: Zimbabwe

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Elephants in Zimbabwe are overpopulated in the Parks and reserves.

The population is increasing in communal lands.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

$10,000 was paid to the native community where the elephant was hunted. I also paid a game scout from the parks dept $80 per day. The fee paid to the community was used for the benefit of the tribal members.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

Boreholes were drilled and maintained for the benefit of elephants and other wildlife.

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

      Loxodonta africana - African Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

      country - Zimbabwe
      region - Metabele land
      concession/farm - Hankano Gwayi
      nearest city - Lupane

   b. Date wildlife was hunted:

      8/2/18 to 8/11/18

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature (b) (6) _____ Date: 8/21/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

OUR REF : **GW/027**

25TH July 2018

The Director
National Parks & Wildlife Authority
Causeway
Harare

Dear Sir/ Madam

RE: APPLICATION FOR A SPECIAL HUNT PERMIT FOR ELEPHANT

Gwai Small scale Farmers Association has granted Nyamazana Safaris authority to hunt an Elephant within our jurisdiction as our 2016 Quota from National Parks and Wildlife.

The client below shall be hunting with the company. Kindly help them in processing their documents and cleaning firearm. **Details of the hunter are as follows:**

Actual Hunt Dates: 2nd AUGUST 2018 TO THE 11th OF AUGUST 2018
Client Name: MICHAEL ROSSEY
Country of Origin: (b) (6) CHENEY WA 9004, USA
Passport Number: (b) (6)
Hunting Area: GWAI SMALL SCALE FARMERS ASSOCIATION - MATABELELAND NORTH
Professional Hunter: NORMAN CROOKS
LICENCE NO. 428
Tras 2 # 80821

Quota Total: 1 X Elephant

Balance of quota 2018: 1 X Elephant;

Yours faithfully

T. Gumbo (Mr.)
For and on behalf of
Gwai small Scale Farmers Association

Suite 114-115 Unifreight House
L. Takawira & Fife Street
P.O Box 1501 Bulawayo Zimbabwe
Tell: +263 9 888091
Cell:0772 667 514

Together as one

The elephant I hunted was on communal land. The people living on the land are subsistence farmers. Elephants can be nuisance animals to them as they break fences and do significant damage to the corn they grow. If elephants are to be tolerated on communal lands, they have to have some economical value, otherwise they will be killed as problem animals or poached for ivory and left to rot.

The meat from the elephant I hunted was consumed by over 100 members of the community and will feed families for several months. The community also recieved $10,000. In a direct cash payment. Community members were also employed as scouts and camp staff providing much needed employment. The meat, employment and fees collected are a significant benefit to the community and give the elephant value far exceeding the damage they cause in the community.

When an elephant has a significant economic impact on the community, poaching among community members is viewed as stealing from everyone in the community and is discouraged.

Without the economic benefit that sport hunting provides to the community, elephants will not be tolerated on communal lands. In Zimbabwe, if elephant populations are to expand outside of government reserves and parks, sport hunting is necessary to provide the economic incentive for communities to tolerate the physical and economic damage they cause.

RE: Import Application of Zimbabwe Lion Trophy for Frank Cavallo

Dear Chief Cogliano:

Enclosed please find the permit application to import an elephant trophy from Zimbabwe for Frank Cavallo . Also attached to the permit application is enhancement information provided by the Zambizi Hunters Safari Company. Please refer to the hundreds of pages of enhancement information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by Zimbabwe authorities, outfitters, and others, in making an enhancement finding for lion trophy imports.

Please do not hesitate to contact us if you have questions about this permit application.

Sincerely,

John J. Jackson III

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III of the non-profit firm Conservation Force as my attorney and legal representative for all matters concerning my applications for a permit to import a lawfully hunted LION trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that the attorney, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Cavallo	Francescomaria	Tiberio	

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b)(6)	(b)(6)	(b)(6)	(b)(6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (if Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
El Campo	Tx	77437	Wharton	U.S.A.

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and th[illegible] ***itle 50***, and I certify that the information submitted in this application for a permit is compl[illegible] nderstand that any false statement herein may subject me to the criminal penalties of 18 [illegible]

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Panthera leo, African lion

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted: 09/16/18

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   Zambezi Hunters

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

   Trophy Consultants International 4 Josiak Chinamano Rd Belmont, Bulawayo, Zimbabw

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	TROPHY CONSULTANTS INTERNATIONAL
Business Name:	4 JOSIAH CHINAMANO ROAD
Address:	BELMONT
City:	BULAWAYO
State/Province:	ZIMBABWE
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   See attached.

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   $44,252

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

   See attached.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy,** please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand [redacted] United States, cannot be re-exported.

    Applicant's signature: (b) (6) Date: 11/13/18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

SANGO
save valley conservancy

PABST HOLDINGS ZIMBABWE PRIVATE LIMITED

31 October 2018

Replies to questions posed by the US Fish and Wildlife Service for the Male Lion hunted by Mr Frank Cavallo.

For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. *Do you have any information regarding the population status or trend data on the species hunted?* *The male lion was hunted on Sango, a 60'000'Hec property within the Save Valley Conservancy (240'000' Hec) Sango carries a lion population of +/- 80 lion and the Save Valley has a population of 223 lion, these figures from the 2017 predator spoor survey. The lion population in the Save Valley has grown from a population of 40 in 2005 to 223 in 2018 due to good management, and abundant prey populations. The recommended sustainable hunting percentage for male lion is 8%,*
Sango could ask for 6 male lions, in the interests of conservation and sustainable utilisation, Sango normally hunts 2.

b. *In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?*

Total fees paid $..... The fees paid to Sango run the property, they help pay; 130 staff of which 44 are game scouts, water pumping and pipe line repairs, fire breaks, infrastructure maintenance etc. Sango also assists 4 local schools that are situated along its boundaries and maintains 9 community boreholes.

c. *Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?* *Sango was founded in 1993 and has since grown a sizable population of wildlife ,the property is funded by sustainable use conservation (Hunting). The success of Sango can be measured by the fact that Sango restocked 1300 plains game animals into the Gonarezhou and Zambezi National Parks in 2013 and translocated 100 elephant to the Rifa conservation area in the Zambezi Valley in 2018 due to over populations on Sango.*

Please contact me if any further information is needed; David Goosen sangohq@sango-wildlife.com

Conservation Force
Operator Enhancement Questionnaire

v.5/8/18

1. Name of area operator: ZAMBEZI HUNTERS

   a. Years in business: 40 YRS

   b. Name of company conducting hunt: ZAMBEZI HUNTERS

2. Name of concession: SAVUTI Size in km²: 6000

   a. Land tenure: __ Government lease __ Community __ Private ranch (Private conservancy

   b. Length of concession agreement: N/A Can it be renewed? __ Yes __ No N/A

   c. Length of renewal, if applicable: N/A

   d. Estimated total amount received in trophy fees last year, if applicable: $114 200

   e. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:
   STANDARD CONCESSION OBLIGATIONS

   f. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city:
   BOTSWANA, NEAREST CITY - KASANE INTERNATIONAL

   g. If the concession borders a national park, please provide the park name: N/A

   h. Description of general and distinctive habitat features and any water features:
   SAVUTI MARSH, MOREMI PARK, 9 DAMS IN MARSH

3. Are there any communities living in the concession? __ Yes (No)

   a. If so, estimated number of people or villages in the concession? N/A

4. Are there communities bordering this concession? (Yes) __ No

   a. If so, estimated number of people or villages around the concession? 3500

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	DENSE	450+	UP	AERIAL COUNT
Lion	DENSE	120	UP	" "
Leopard	DENSE	150	UP	" "
Prey species	DENSE		STABLE	" "

6. Total employment number: 130

   a. Please identify the number and type of all employees:

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Type:	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	[illegible]	
Trackers	[illegible]	
Anti-poaching scouts/rangers	44	
Other anti-poaching	[illegible]	
Cooks/housekeepers	19	[illegible]
Community coordinators	[illegible]	
Managers	[illegible]	
Biologists	1	
Others:	[illegible]	

7. Number of staff employed in the off-season: [illegible]

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff			
Managers			
Maintenance			
Road opening/construction	[illegible]		
Community relations personnel	[illegible]		
Others:			

8. Anti-poaching efforts:[2]

   a. Number of anti-poaching staff: 44

   b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? [illegible]

   c. Months during which anti-poaching patrols are conducted: [illegible]

   d. Number of anti-poaching patrols per month: [illegible]

   e. Description of anti-poaching equipment, vehicles, etc.: [illegible]

   f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? [illegible]

   g. Do you offer rewards to poaching informants leading to arrest? (Yes) No

   h. Do you offer rewards to poaching informants upon conviction? Yes (No)

   i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? USD

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts			11 600	
Equipment			11 000	
Vehicles			NIL	
Petrol Diesel			12 120	
Rewards paid			3 000	
Other:				
Other:				
TOTALS			147 520	

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered			16	
Elephant carcasses observed			NIL	
Lion carcasses observed			NIL	
Leopard carcasses observed			NIL	
Ivory poachers arrested			NIL	
Meat poachers arrested			16	
Other poachers arrested			NIL	
Poachers convicted			16	
Snares/gin traps collected			NIL	
Firearms confiscated			NIL	
Vehicles confiscated			NIL	
Bicycles confiscated			NIL	
Boats/nets confiscated			NIL	
Tusks recovered			NIL	
Other:				

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? (Yes) ___ No

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)? [illegible]

c. Does the company provide game meat to nearby communities? ___ Yes ___ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: [illegible]

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe. NIL

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in? _____

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant				
Lion				
Leopard				
Other				

g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? USD

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)				
Education (e.g., school fees, supplies)				
Health (e.g., clinics, offices)

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Strickler	James	David	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Magnolia	Texas	77354	Montgomery	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)
(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country
Magnolia	Texas	77354	Montgomery	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and [redacted] that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ( ) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

James David Strickler (b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Zimbabwe, Africa, Masikile Ranch, Matetsi Eastern Block Safari Area in Hwange District, 40 Kms northeast of Hwange and 60 Kms southwest from Victoria Falls on the east side of Hwy A8

b. Date wildlife was hunted:

September 24, 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Tshabezi Safaris: PH Monty Jenkinson (license #162)

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Masikile Ranch, Matetsi Eastern Block in Hwange District, Zimbabwe, Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). see Attached

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	Outbound Cargo and Trophy Exporters- Contact Person M. Nash
Address:	5 Grantham Road
City:	Belmont, Bulawayo
State/Province:	Zimbabwe
Country, Postal Code:	Africa +263(0) 9 881531-3

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

The population of Elephant is nearly double Zimbabwe's holding capacity-there are about 85,000 elephant and the holding capacity is around 45,000. The bulk of these numbers are in/around this area.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

The area consists of small scale farms that group together to get a quota-when a trophy is taken the fees are then split with 50% going to the farms and 50% for anti-poaching, water development and administration. All the meat and most of the hide is distributed to the community-nothing goes to waste.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

The main benefit is the anti-poaching teams that are paid monthly to scout and protect the area from poaching.Hunting also funds community employment,helps with problem animal control destroying crops so the animal has value-they want to protect rather than poison or poach the elephant.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature [redacted] Date: 11-14-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from . If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

ZIMBABWE PARKS AND WILDLIFE MANAGEMENT AUTHORITY

MEMORANDUM

To: Director General

From: Area Manager HQ

Date: 21 September 2018

RE: AUTHORITY TO PROCESS SPECIAL PERMIT FOR HUNTING OUTSIDE PARKS ESTATE

Your authority is kindly sought to process the permit for Tshabezi Safaris who have applied for extension of their permit to hunt 1 x elephant with client David Strickler in the following properties:

- Matetsi Eastern Block Safaris in Hwange District Matebeleland North Province.
- Isla Farm in Hwange District Matebeleland North Province.

The original dates were from 17 September 2018 to 22 September 2018 and they want to extend the dates of their hunt to end on 26th of September 2018 under the guidance of professional hunter Monty Jenkinson PH license #162.

Kindly find attached application from the operator and copies of 2018 hunting permit and quota.

Division of Management Authority

Branch of Permits, MS: IA

RCVD MAY 07 2019

5275 Leesburg Pike, Falls Church, VA 22041

Good Afternoon Julia,

Per our conversation I am sending you a copy of the CITES permit for the import of the elephant ivory from my Zimbabwe hunt September 24, 2018. Please let me know if all is in order or if any additional information or forms are necessary. The tusks are currently at the taxidermist in Bulawayo, Zimbabwe.

The original application and check was received by your office on 11/20/2018 at 9:53am and signed for by Darryl. The check has been processed and I have included a statement from the bank showing check number 12874 was processed electronically on 12/18/2018 for the amount of $100. The bank stated the method the check was processed prevents them from having a photo copy of the cancelled check.

I appreciate your help in this matter. Please feel free to contact me at any time if I can be of assistance.

Regards,

(b) (6)

James David Strickler

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix II of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Strickler	James	David	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3 a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1 b. Doing business as (DBA)	
2 Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5 Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7 c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Magnolia	Texas	77354	Montgomery	USA

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)
(b) (6)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f Country
Magnolia	Texas	77354	Montgomery	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of $100 Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee–attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ( ) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

James David Strickler (b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Zimbabwe, Africa, Masikile Ranch, Matetsi Eastern Block Safari Area in Hwange District, 40 Kms northeast of Hwange and 60 Kms southwest from Victoria Falls on the east side of Hwy A8

b. Date wildlife was hunted:

September 24, 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Tshabezi Safaris: PH Monty Jenkinson (license #162)

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Masikile Ranch, Matetsi Eastern Block in Hwange District, Zimbabwe, Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). see Attached

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Dear Darcy,

As I mentioned in my e-mail, I just received the Acknowledgement letter for permit No.38511D on 4/26 and I realized that I forgot to send the $100 check for the processing fee.
Enclosed please find the check for $100 for processing fee for PRT identification number US38511D/9.
Please apply this check for the US38511D/9.

If you have any questions, please let me know.
I often travel to Japan, but you can always reach me via e-mail.

Thank you again for your help.

Sincerely,

Takeshi Hayakawa

James,

It was brought to my attention that we have two application in our system for the same elephant trophy. The Prt #'s are 16392D and 39937D.

I am moving all of the information from Prt # 39937D into the original permit application 16392D.

Please be aware that the permit application you will need to use to communicate with us is ***Prt # 16392D.***

Thank you,

Tim Mac Donald

RE: Import Application of Namibia Elephant Trophy for George Kopecky

Dear Chief Cogliano:

Enclosed please find the permit applications to import an elephant trophy from Namibia for George Kopecky. Also attached to the permit applications is an operator enhancement questionnaire provided by Huntafrica Namibia Safaris. Please refer to the hundreds of pages of enhancement information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by Namibia authorities, outfitters, and others, in making an enhancement finding for lion and leopard trophy imports.

Please do not hesitate to contact us if you have questions about this permit application.

Sincerely,

John J. Jackson III

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III of the non-profit firm Conservation Force as my attorney and legal representative for all matters concerning my application for a permit to import a lawfully hunted ELEPHANT trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

In the case of a permit an ESA endangered listed species this is also a request for Ten Days Notice before the permit is issued so I and my attorney can know of approval as soon as those that may have opposed the issuance of the permit.

~~IMPORT OF SPORT-HUNTED TROPHIES~~
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
KOPECKY	GEORGE	FRANK	SR.

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide B... address in this block; U.S. hunters must provide their U.S. address)
(b)(6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
COLUMBUS	TEXAS	78934	COLORADO	U.S.A.

2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)
SAME.

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of **$100, nonrefundable processing fee.** Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other a... ***Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and a... and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 10...

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1.** If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

   SAME AS PAGE 1 , PRE-PAID FED EX ENVELOPE INCLUDED

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No ✓ Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   AFRICAN ELEPHANT, LOXODONTA, AFRICAN BUSH ELEPHANT

   b. Sex (if known).
   MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   NAMIBIA, BWABWATA WEST NATIONAL PARK
   S 18 09° C 162, E021 42° C495
   NEAREST CITY, RUNDU

   b. Date wildlife is to be hunted: JULY 24 – AUGUST 9, 2019

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   HUNTAFRICA NAMIBIA SAFARIS

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   b. Date wildlife was hunted:

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). NOT HUNTED

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

PROFESSIONAL HUNTER:
Name: J.H. PIENAAR
Business Name: HUNTAFRICA NAMIBIA SAFARIS
Address: P.O. BOX 1100
City: GOBABIS
State/Province:
Country, Postal Code: NAMIBIA
PHYSICAL ADDRESS: FARM HESTER 407 & FARM GOOD HOPE 397, GOBABIS, OMAHEKE, NAMIBIA

PERSON/ BS. SHIPPING TROPHIES:
SEE ATTACHED NEXT PAGE

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   SEE ATTACHED NEXT PAGE.

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   TROPHY FEE # 43,500
   SEE ATTACHED NEXT PAGE ON HOW USED

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

   SEE ATTACHED NEXT PAGE.

8. Person / Business shipping your trophies:

    Applicant's signature: _____ (b) (6) _____ Date: 11/8/2018

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

1. Name of area operator: Huntafrica Namibia Safaris

a. Years in business: 31 years

b. Name of company conducting hunt: Huntafrica Namibia Safaris

2. Name of concession: Bwabwata West National park Size in km^2: 3800

a. Land tenure: Government lease

b. Length of concession agreement: 5 years Can it be renewed? Yes

c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: 1. Yes, Annual Reporting: Detailed report to the Ministry of Environment and Tourism of each client and every animal that was hunted.

2. Poaching control. Yes. By the government as well as the Namibia Defense force and the community rangers 3 .Community employment – all staff employed out of the community 4.Training - the operator provide training in different fields. Eg -drivers, teachers, computer courses, building of training center etc.

d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Rundu (bigger town) Divundu(very small town) . Map follows

e. If the concession borders a national park, please provide the park name: Inside the Bwabwata National Park

f. Description of general and distinctive habitat features and any water features:

Bushveld . The Okavango River forms the Western border.

3. Are there any communities living in the concession? Yes

a. If so, estimated number of people or villages in the concession? One village Omega 1000 people

4. Are there communities bordering this concession? Yes

a. If so, estimated number of people or villages around the concession? Muchiko area 500

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	Dense 2500		Stable	By counts
Lion	Sparse		Up	
Leopard	Dense		Stable	
Prey species	Buffalo, Sable, Roan, Kudu, Impala, Warthog, Waterbuck, Reedbuck, Buschbuck & Duiker			

6. Total employment number: 40

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	2	
Trackers	11	11
Anti-poaching scouts/rangers	20	20
Other anti-poaching	NDF	
Cooks/housekeepers	4	4
Community coordinators	2	2
Managers	1	
Biologists	1	
Others: _____		

7. Number of staff employed in the off-season: 11

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	Full staff		
Managers	1		
Maintenance	0		
Road opening/construction	30 people		
Community relations personnel	1		
Others: _____			

8. Anti-poaching efforts:[2]

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

a. Number of anti-poaching staff: _____

b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? ___Both_____

c. Months during which anti-poaching patrols are conducted: _____Year round _____

d. Number of anti-poaching patrols per month: _____

e. Description of anti-poaching equipment, vehicles, etc.: _____

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? _____Ministry of Enviorment_____

g. Do you offer rewards to poaching informants leading to arrest? __Yes __

h. Do you offer rewards to poaching informants upon conviction? _ __ No

i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? ___Nam Dollar_____

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts	31200	31200	31200	
Equipment				
Vehicles	4x4 vehicle	"		
Petrol	As needed			
Rewards paid				For each person that is arrested the informer receives N$5000 per case
Other: _____				
Other: _____				
TOTALS				

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered				
Ivory poachers arrested				
Meat poachers arrested				
Other poachers arrested				
Poachers convicted				
Snares/gin traps collected				
Firearms confiscated				
Vehicles confiscated				
Bicycles confiscated				

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Boats/nets confiscated				
Tusks recovered				
Carcasses observed				
Other: _____				

10. Community investment:[3]

    a. Does the company contribute money or goods/services to local communities? __ Yes

    b. If so, what percentage or amount is shared, how often, and why 2 Miljlion Nam Dollars (e.g., required by law, required by contract, voluntary contribution)?

    Part of the contract and voluntary_____

    c. Does the company provide game meat to nearby communities?

    d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: _45 ton meat distributed by the community themselves_____

    e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe. _____NOT_____

    f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in? ___Not Applicable in the Park_____

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant				
Lion				
Leopard				
Other				

    g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? _____

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)	80,000	95,000	110,000	
Education (e.g., school fees, supplies)				
Health (e.g., clinics, offices)	-			
Health (e.g., medical	-			

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

salaries, equipment)				
Community scout salaries				
Other community anti-poaching				
Local government activities				
Water infrastructure improvements	1.Borehole and water installation Vaulue : N$ 40,000			
Sports teams funded	11 teams funded every year and a big tournament Vulue N$90,000/year			
Construction materials donated	N$500,000			
Other: _____				
Other: _____				
TOTALS				

11. How many U.S. clients did the company have in the past three years, and what percentage of the company's clients were from the U.S.?

	2015 (number and percentage of U.S. clients)	2016 (number and percentage of U.S. clients)	2017 (number and percentage of U.S. clients)
U.S. clients (total)			
-- hunting lion	-	-	-
-- hunting elephant	6 100%	6 100%	6 100%
-- hunting leopard	2 100%	2 100%	2 100%

12. Dollar amount and percentage of the company's revenue from U.S. clients: _90 %_____

13. Other information: Please provide a narrative of other enhancement information about the company, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes - by Ministry of Enviorment and Tourismn , restocking - through Natural breeding), management activities, Research - by Ministry of Enviornment and Tourism.

14. I declare that the foregoing is true and correct.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Cabela	Richard	J	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b)(6) [redacted]			(b)(6) [redacted]

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b)(6) [redacted]				
1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Sidney	NE	69162	Cheyenne	USA
2.a. Mailing address (include if different than physical address, include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the **amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Rich Cabela (b)(6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Elephant

   b. Sex (if known). male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   Nambia, Bwabwata Wet National park, S 18 09 C 162 E021 42 C 495, Rundu (town) Divundu (town).

   b. Date wildlife was hunted:

   08/12/2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Huntafrica Namibia Safaris

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Kings Taxidermy 27 Bahnoff Str Otijwarongo Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
Included - attached

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	Koos Pienaar
Business Name:	Huntafrica Namibia Safaris
Address:	PO Box 1100
City:	Gobabis
State/Province:	Namibia
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

See attached documents

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

See attached documents

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

See attached documents

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

    Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

    Applicant's signatur[redacted] Date: 11-17-18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Conservation Force v.5/8/18
Operator Enhancement Questionnaire

1. Name of area operator: Huntafrica Namibia Safaris

a. Years in business: 31 years

b. Name of company conducting hunt: Huntafrica Namibia Safaris

2. Name of concession: Bwabwata West National park Size in km^2: 3800

a. Land tenure: Government lease

b. Length of concession agreement: 5 years Can it be renewed? Yes

c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: 1. Yes, Annual Reporting: Detailed report to the Ministry of Environment and Tourism of each client and every animal that was hunted.

2. Poaching control. Yes. By the government as well as the Namibia Defense force and the community rangers 3 .Community employment – all staff employed out of the community 4.Training - the operator provide training in different fields. Eg -drivers, teachers, computer courses, building of training center etc.

d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Rundu (bigger town) Divundu(very small town)

e. If the concession borders a national park, please provide the park name: Inside the Bwabwata National Park

f. Description of general and distinctive habitat features and any water features:

Bushveld . The Okavango River forms the Western border.

3. Are there any communities living in the concession? Yes

a. If so, estimated number of people or villages in the concession? One village Omega 1000 people

4. Are there communities bordering this concession? Yes

a. If so, estimated number of people or villages around the concession? Muchiko area 500

5. Relevant game populations in the concession:[1]

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant	Dense 2500		Stable	By counts
Lion	Sparse		Up	
Leopard	Dense		Stable	
Prey species	Buffalo, Sable, Roan, Kudu, Impala, Warthog, Waterbuck, Reedbuck, Buschbuck & Duiker			

6. Total employment number: 40

   a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	2	
Trackers	11	11
Anti-poaching scouts/rangers	20	20
Other anti-poaching	NDF	
Cooks/housekeepers	4	4
Community coordinators	2	2
Managers	1	
Biologists	1	
Others: _____		

7. Number of staff employed in the off-season: 11

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	Full staff		
Managers	1		
Maintenance	0		
Road opening/construction	30 people		
Community relations personnel	1		
Others: _____			

8. Anti-poaching efforts:[2]

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

a. Number of anti-poaching staff: _____

b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? ___Both_____

c. Months during which anti-poaching patrols are conducted: _____Year round _____

d. Number of anti-poaching patrols per month: _____

e. Description of anti-poaching equipment, vehicles, etc.: _____

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? _____Ministry of Enviorment_____

g. Do you offer rewards to poaching informants leading to arrest? __ Yes __

h. Do you offer rewards to poaching informants upon conviction? _ __ No

i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? ___Nam Dollar_____

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts	31200	31200	31200	
Equipment				
Vehicles	4x4 vehicle	"		
Petrol	As needed			
Rewards paid				For each person that is arrested the informer receives N$5000 per case
Other: _____				
Other: _____				
TOTALS				

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered				
Ivory poachers arrested				
Meat poachers arrested				
Other poachers arrested				
Poachers convicted				
Snares/gin traps collected				
Firearms confiscated				
Vehicles confiscated				
Bicycles confiscated				

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Boats/nets confiscated				
Tusks recovered				
Carcasses observed				
Other: _____				

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? __ Yes

b. If so, what percentage or amount is shared, how often, and why 2 Miljlion Nam Dollars (e.g., required by law, required by contract, voluntary contribution)?

Part of the contract and voluntary_____

c. Does the company provide game meat to nearby communities? __ Yes __ No

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: _45 ton meat distributed by the community themselves_____

Re: Application for Importation of Namibian Sport Hunted Elephant on August 1, 2016

Date: April 3, 2018

Dear Mr. Villavicencio,

Please find my enclosed application 3-200-20 as well as my $100 Application fee.

As noted, I harvested the bull elephant on August 1, 2016 in the Zambezi region of Namibia.

I have attached the CITES export permit from Namibia to Denmark.

My taxidermist (First Class Trophy Taxidermy) is located in Denmark but their tanning and taxidermy technicians are on Hungary. First Class Trophy has indicated that when they apply for Re-export on the CITES permit that they will ship from Hungary to Chicago USA where I will use Coppersmith.

Depending upon the timing of the tanning process I may have some of the tanned hide made into a personal gun case, belt, etc. while in Hungary. These will be indicated on Re-export CITES permit. Please let me know if you need any additional information on this topic.

Thank you very much for your attention and time.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
CALDWELL	MAX	AARON	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

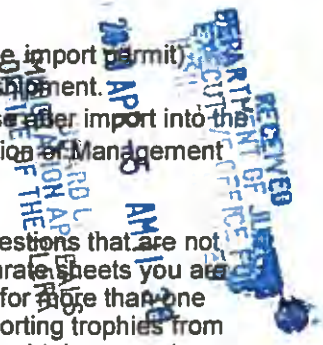
Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.



Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   Page 1 address and name is ok.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Max AARON CALDWELL

   (b) (6)
   (b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

(No) Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
   Loxodonta africana African elephant

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
   N/A

   b. Date wildlife is to be hunted:
   N/A

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
   N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
   Namibia, Wuparo Conservancy, Zambezi Region
   Nearest City is Sangwali

   b. Date wildlife was hunted:
   Harvested August 1, 2016

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
David Muller, Professional Hunter
Dagga Boy Hunting Safaries

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
The elephant is currenty with First Class Trophy Taxidermy in Hungary. It will be re-exported to USA from Hungary.

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). I have included CITES permit to export from Namibia to Denmark. Elephant was then transferred to Hungary by Taxidermist for processing.
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

DEPARTMENT OF THE INTERIOR
EXECUTIVE SECRETARIAT
BOARD OF IMMIGRATION APPEALS
OFFICE OF THE CLERK

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?
During the hunt we saw between 200-500 elephants each day. Each day was different herds. Caprivi is free range, Namibian elephant numbers have risen from 7,600 in 1995 to almost 30,000 in 2018.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
More than 50% of trophy fees go to community funds, as well as all of the meat went to community. In addition, salaries, camp monies, donations, etc. go to community from PH and hunters - Elephant hunting generated roughly 59% of all cash generated by hunting and massive amounts of meat. We saw this first hand.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
Outfitter/PH provides 3 waterholes with solar installations for the community. Also installed watertanks for the whole area and villages. Transport, school fees, medical, and massive amount of anti-poaching efforts through the Namibian Professional Hunting Association. Outfitter donates hunts for anti-poaching fundraiser.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement. N/A

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopar(b) (6)

Applicant's signature: _____ Date: 4/3/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

My importer is Coppersmith in Chicago. I have attached contact information. I have also attached First Class Trophy Contact information.

To: (b) (6) [redacted]

Dear Mr. Max Aaron Caldwell,

The following is in response to your phone call earlier today.

In response to a recent D.C. Circuit Court opinion, the U.S. Fish and Wildlife Service is revising its procedure for assessing applications to import certain hunted species like African elephants. We are withdrawing our countrywide enhancement findings for a range of species across several countries. In their place, the Service intends to make findings for trophy imports on an application- by-application basis. The President has been very clear in the direction that his administration will go.

Please be aware that we continue to seek additional information directly from the relevant foreign Government Authorities to support our permit findings, therefore, applications are still under review.

Sincerely,

Anna Barry
Senior Biologist
USFWS/Division of Management Authority
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803
1-800-358-2104, ext. 1976 or 703-358-1976
Fax: 703-358-2281
E-mail: Anna_Barry@fws.gov

Please be aware that we process application on a first come first serve basis and due to the number of applications we receive some delays are unavoidable.

ALERT You may have noticed that our application forms expired 5/31/2017 . The forms are currently undergoing periodic review by the Office of Management and Budget. Once that process is complete, we will post updated application forms. In the interim, please continue to use the application forms available from our website with the expiration date 5/31/2017. We will continue to accept those forms until new ones become available. However, please check back each time you submit a new application to see whether our new forms have been posted. We do not accept applications via fax or e-mail.

Sign up for our e-newsletter to learn how we're working around the globe to protect species and their habitats!

OPERATOR ENHANCEMENT QUESTIONNAIRE

1. OPERATOR INFORMATION:

Name of Area Operator: **DAWID MULLER** (DAGGABOY HUNTING SAFARIS)

Years in business: **22 YEARS**

Name of Company conducting hunt: **CAPRIVI HUNTING CC**

Closest town to hunt location: **KATIMA MULILO** (ZAMBEZI REGION)

Country where hunt will take place: **NAMIBIA**

2. CONSERVANCY:

Name of Concervancy: **WUPARO CONSERVANCY**

Area in Km^2: **25,000HA**

Land tenure:

Government Lease ____ Community **X** Private Ranch ____ Private Conservancy

Length of Concession Agreement: **5 YEARS**

Can it be renewed? Yes **X** No ____

Length of Renewal, if applicable: **5 YEARS**

Estimated total amount received in trophy fees last year, if applicable: **N/A**

Are there any special obligations under the Concession Agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain below:

ALL OF THE ABOVE

Please provide the Conservancy location and nearest City:

120KM SOUTH WEST OF KATIMA MULILO (ZAMBEZI REGION) **- CLOSE TO SANGWALI VILLAGE**

Please attach a map or maps with the boundaries marked and showing the nearest City:

REFER TO THE "NAMIBIA - ZAMBEZI REGION MAP" ATTACHED

If the Conservancy borders a National Park, please provide Park name:

NKASA RUPARA AND MDUMU NATIONAL PARKS

Description of general and distinctive habitat features and any water features:

SWAMP LAND AND MOPANIE FOREST

3. Communities in the Conservancy:

Are there any communities living in the Conservancy? Yes **X** No

If so, estimated number of people or villages in the Conservancy? **3 Villages / ± 1,550 People**

Are there communities bordering this Conservancy? Yes **X** No

If so, estimated number of people or Villages around the Conservancy? **7 Villages / ± 3,500 People**

4. Relevant Game Populations in the Conservancy:[1]

Species name	Relative Abundance			Estimated Population	3-Year trend			How is it monitored?
	Dense	Avg.	Sparse		Up	Down	Stable	
Elephant	X			500 - 1,000			X	Game Scouts
Lion								
Leopard								
Prey species								

[1] The FWS Import Permit Application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

5. Local Community Participation:

Total employment number: **9**

Please identify the number and type of all employees:

Employee Type	Total number of this type	Number of this type who are local/from nearby Communities
Professional Hunters	1	-
Trackers	2	2
Anti-Poaching Scouts / Rangers	* 12	* 12
Other Anti-Poaching	-	-
Cooks / Housekeepers	4 (2 Cooks / 2 Housekeepers)	3 (1 Cook / 2 Housekeepers)
Community Coordinators	* 1	* 1
Managers	* 2	* 1
Biologists	-	-
Other: Skinners	2	2

Note:

*** Anti-Poaching Scouts / Rangers**

Although they are paid by the Conservancy, money is generated directly by hunting and their salaries as such are paid for by Hunting.

*** Community Coordinators**

This function is done by our Camp Manager who is also one of the Trackers

*** Managers**

One Manager is also one of the Cooks & the other our Camp Manager

6. LOCAL COMMUNITY PARTICIPATION: [CONTINUATION]

Number of staff employed in the off-season: **ALL**

a. Please identify the number and type of staff that are engaged when the season is not open:

EMPLOYEE TYPE	TOTAL NUMBER OF THIS TYPE	NUMBER OF LOCALS / FROM NEARBY COMMUNITIES	WHEN EMPLOYED?
ANTI-POACHING STAFF	12	12	ALL YEAR
MANAGERS	2	1	ALL YEAR
MAINTENANCE	6	6	ALL YEAR
ROAD OPENING / CONSTRUCTION	VARIES	ALL	SEASONAL
COMMUNITY RELATIONS PERSONNEL	1	1	ALL YEAR

7. ANTI-POACHING EFFORTS:[2]

Number of Anti-Poaching staff: **12**

Are Anti-Poaching Patrols conducted during the hunting season, off-season, or both?

Hunting season: Off-season: Both seasons: **X**

Months during which Anti-Poaching Patrols are conducted: **ALL YEAR** (12 MONTHS)

Number of Anti-Poaching Patrols per month: **DAILY**

Description of Anti-Poaching equipment, vehicles, etc.:

TOYOTA HILUX DOUBLE CAB (SPONSORED BY CAPRIVI HUNTING CC)

[2] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

7. ANTI-POACHING EFFORTS: [CONTINUATION]

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution?

CONSERVANCY

Do you offer rewards to poaching informants leading to arrest? Yes **X** No

Do you offer rewards to poaching informants upon conviction? Yes **X** No

Please describe the company's anti-poaching expenditures below:

TYPE OF EXPENSE	SPENDING 2017	SPENDING 2018	SPENDING 2019	REMARKS
SALARIES FOR ANTI-POACHING SCOUTS / RANGERS	259,200	273,600	288,000	YEARLY SALARIES FOR 12 X RANGERS
EQUIPMENT	-	35,000	-	UNIFORMS+
VEHICLES	-	-	150,000	TOYOTA HILUX DOUBLE CAB
PETROL	-	-	-	
REWARDS PAID	-	-	-	
TOTALS	**259,200**	**308,600**	**438,000**	

What currency are the expenditures given in? **N$** (NAMIBIAN DOLLARS)

8. Anti-Poaching Results:

Category	2017	2018	2019	Remarks
Poaching Incidents Discovered	2	2	3	
Elephant Carcasses Observed	1	-	-	
Lion Carcasses Observed	-	-	-	
Leopard Carcasses Observed	-	-	-	
Ivory Poachers Arrested	-	-	-	
Meat Poachers Arrested	2	1	2	
Other Poachers Arrested	-	-	-	
Poachers Convicted	1	-	1	
Snares / Gin Traps Collected	-	-	-	
Firearms Confiscated	1	-	-	
Vehicles Confiscated	-	-	-	
Bicycles Confiscated	-	-	-	
Boats / Nets Confiscated	-	-	-	
Tusks Recovered	-	-	-	
Other: Fines Issued	1	1	1	Cash fines issued by Community for not so serious cases of Meat Poaching

9. COMMUNITY INVESTMENT:[3]

Does the Company contribute money or goods/services to local communities?

X Yes ____ No

If so, what percentage or amount is shared, how often, and why (e.g.: required by law, required by contract, voluntary contribution)?

VARIES - AS PER CONTRACT & VOLUNTARY CONTRIBUTION(S) MADE THROUGHOUT THE YEAR

Does the Company provide game meat to nearby communities? Yes **X** No ____

If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program:

BETWEEN 12,000 AND 15,000KG WITH A VALUE OF ± N$ 350,000
THE MEAT OF ALL ANIMALS HUNTED WITHIN THE AREA, GOES TO THE COMMUNITY

If the Company performs problem animal activities for surrounding communities (e.g.: patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe.

NORMAL PATROLS OF GAME SCOUTS AND HUNTING CREW APPLIES, UNLESS SUMMONED BY LOCALS FOR A SPECIFIC INCIDENT

Please describe any consolation payments made to local residents damaged by game species

LOSS OF COWS OR GOATS WILL BE PAID IF CARCASS CAN BE UTILISED FOR HUNTING
(E.G. USED FOR BAIT WHEN HUNTING CROCODILE)

What currency are the expenditures reported in? **N$** (NAMIBIAN DOLLARS)

SPECIES	DAMAGE CAUSED	CONSOLATION PAID 2017	CONSOLATION PAID 2018	CONSOLATION PAID 2019
ELEPHANT	CROP DAMAGE	-	118,000	PENDING
LION				
LEOPARD				
OTHER				

[3] The new FWS Import Permit Application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

9. COMMUNITY INVESTMENT: [CONTINUATION]

TYPE OF PROJECT	SPENDING 2017	SPENDING 2018	SPENDING 2019	REMARKS
EDUCATION *(E.G.: CLASSROOMS, OFFICES)*	-	-	500	SANGWALI KINDERGARDEN
EDUCATION *(E.G.: SCHOOL FEES, SCHOOL SUPPLIES)*	7,037	3,125	3,125	SCHOOL FEES DONATED, FIRST AID TRAINING & HUNTING GUIDE TRAINING
HEALTH *(E.G.: CLINICS, OFFICES)*	-	-	-	
HEALTH *(E.G.: MEDICAL SALARIES, EQUIPMENT)*	-	-	-	
COMMUNITY SCOUT SALARIES	12,000	15,000	18,000	YEARLY SALARY PAYMENTS
OTHER COMMUNITY ANTI-POACHING	30,000	-	25,000	SPONSORSHIP TO HUAP
LOCAL GOVERNMENT ACTIVITIES	-	-	33,417	ANIMALS TAKEN FOR MET AT THE SANGWALI FESTIVAL
WATER INFRASTRUCTURE IMPROVEMENTS	220,000	-	50,000	CONSTRUCTING COMMUNITY BOREHOLES / SOLAR PUMPS+
SPORTS TEAMS FUNDED	30,000	30,000	30,000	YEARLY SPONSORING OF SOCCER & NETBALL TOURNAMENT
CONSTRUCTION MATERIALS DONATED	78,750	50,000	75,000	SUPPORTING YEARLY COMMUNITY DEVELOPMENT
TOTALS	**377,787**	**98,125**	**235,042**	

Please describe any community projects paid for by the Company:

WE PAY FOR NUMEROUS COMMUNITY PROJECTS, STIPULATED AND AGREED UPON IN OUR 5 YEAR CONTRACT AS WELL AS REQUESTS RECEIVED THROUGHOUT THE YEAR FROM THE COMMUNITY, INCLUDING THE TRADITIONAL AUTHORITY (ELDERS) & WE TRY TO SUPPORT THEM WHERE WE CAN. WE ALSO MAKE MONTHLY CONTRIBUTIONS TOWARDS ANTI-POACHING & YEARLY CONTRIBUTION TOWARDS SPORTS TOURNAMENTS THAT WE HAVE DONE SINCE 2014. WE ALSO CONTINUOUSLY MAKE INFRASTRUCTURE IMPROVEMENTS WHERE NEEDED - ESPECIALLY WITH WATER, ABLUTION FACILITIES+

What currency are the expenditures reported in? **N$** (NAMIBIAN DOLLARS)

10. How many U.S. Clients did the Company have in the past three years, what percentage of the Company's clients were from the U.S., and what fees did they pay?

	Hunting Elephant	Hunting Lion	Hunting Leopard	Hunting all Species
Number of U.S. clients	**2017:** 2	**2017:** N/A	**2017:** N/A	**2017:** N/A
	2018: 1	**2018:** N/A	**2018:** N/A	**2018:** N/A
	2019: 1	**2019:** N/A	**2019:** N/A	**2019:** N/A
Percentage of U.S. clients	**2017:** 100%	**2017:** N/A	**2017:** N/A	**2017:** N/A
	2018: 100%	**2018:** N/A	**2018:** N/A	**2018:** N/A
	2019: 100%	**2019:** N/A	**2019:** N/A	**2019:** N/A
Trophy fees paid by U.S. clients	**2017:** US$20,000	**2017:** N/A	**2017:** N/A	**2017:** N/A
	2018: US$20,000	**2018:** N/A	**2018:** N/A	**2018:** N/A
	2019: -	**2019:** N/A	**2019:** N/A	**2019:** N/A

11. Dollar amount and/or percentage of Company's revenue from U.S. Clients: $ **N/A**

12. OTHER INFORMATION:

Please provide a narrative of other enhancement information about the operation, such as any special Hunting Policies *(e.g.: ageing, size, resting areas)*, Concession Improvements *(e.g.: digging and maintaining boreholes, restocking)*, Management Activities, Research, etc.

HUNTING IN THE AREA IS VERY MUCH AIMED AT HARVESTING OLDER, POST BREEDING MALE ANIMALS. THIS MEANS THAT ANIMALS IN THEIR PRIME ARE GIVEN A CHANCE TO SPREAD THEIR GENES BEFORE THEY ARE HARVESTED.

THE QUOTAS FOR HUNTING SET BY THE GOVERNMENT ARE VERY CONSERVATIVE AND BASED ON A TAKE-OFF OF LESS THAN 3% OF THE POPULATION.

ACCESS TO WATER IS MONITORED THROUGHOUT THE YEAR TO MAKE SURE THAT ALL THE GAME ARE WITHIN EASY REACH OF WATER. THIS MEANS THAT WATER IS PUMPED IN THE AREAS WHERE THERE ARE NO ACCESS TO NATURAL WATER SOURCES.

PANTHERA HAS A FULL-TIME PRESENCE WITHIN THE AREA.

13. I declare that the foregoing is true and correct:

Namibia - Zambezi Region Map.pdf; Operator Enhancement Questionnaire.pdf;

Dear Ms. Barry,

I hope all is well with you and your family during this time.

Please see attached.

This is from the Namibian operator of the area where I harvested my bull elephant in August 2016.

It is my understanding from SCI and others that the USF&W would like this form for each application.

I am not sure if this is correct or not but I wanted to pass along the information. I hope it is helpful and I hope this will help move my application forward.

If there is anything you need from me or anything else I can do please let me know. I will support you in any way possible.

Thank you for your time and your service. It is greatly appreciated!

Max Aaron Caldwell

Dear Ms. Barry,

I all is well and you and your family are healthy during this very difficult time.

I received an email that there is a new process for applying for hunting import permits.

Since I applied more than 2 years ago do I need to do anything?

Thank you for your support and I look forward to your feedback.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Ghilarducci	Frank	W	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)
(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
Sedalia	Colorado	80135	Douglas	U.S.A.

2.a. Mailing address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

Expires 08/31/2020

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Frank W. Ghilarducci

(b) (6) [redacted]

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana . African Elephant.

   b. Sex (if known).

Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Zimbabwe, Chiredzi District, Masvingo Province,
Malpati Communal. GIS 298884 City - Cheredzi

   b. Date wildlife is to be hunted:

Oct 14, 2018

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Threeways Safari P.O. Box 110 Beitbridge Zimbabwe.
P.H. Barend Danial Marais Licence #570

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

Zimbabwe Area - Malpati Communal.
GIS 298884

   b. Date wildlife was hunted:

Oct 14 2018

OMB Control No. 1018-0093
Expires 08/31/2020

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Threeways Safaris P.O Box 110 Beitbridge Zimbabwe
P.H. Barend Daniel Marais Licence # 570

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

Threeways Safari P.O. Box 110 Beitbridge Zimbabwe.

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). See Attached.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: Trophy Solutions Africa
Address: 11 6th Avenue Industria
City: Polokwane
State/Province: Limpopo
Country, Postal Code: South Africa 0699.

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Population Status Malpati Communal = 350

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

$20,000 U.S. Total.
$13,000 U.S went to the Communal + Tribal Lands

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: (b) (6) _____ Date: 11-12-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   PRO CARGO USA — SELF ADDRESSED FED EX ENVELOPE ENCLOSED
   15619 MORALES ROAD — ATTN CINDI RULON
   HOUSTON, TEXAS 77032

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   CINDI RULON 281-220-3176 CINDI.RULON@PROCARGOUSA.COM

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

      LOXODANTA AFRICANA AFRICAN ELEPHANT

   b. Sex (if known). MALE

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   b. Date wildlife is to be hunted:

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

      TIMBAVATI PRIVATE NATURE RESERVE MPUMALANGA DISTRICT NEAR HOEDSPRIT.

   b. Date wildlife was hunted:

      SEPTEMBER 24, 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

PH H.P. du PLESSIS- INTREPID SAFARIS

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

SAFARY TAXIDERMY 47 GOUD STREET LABORIA POLOKWANE RSA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). ATTACHED

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from **Namibia**, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	
Business Name:	SAFARI TAXIDERMY
Address:	47 GOUD STREET
City:	LABORIA
State/Province:	POLOKWANE
Country, Postal Code:	REPUBLIC OF SOUTH AFRICA

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

WE UNDERSTAND THAT THE COUNTRY CENSUS FOR ELEPHANTS AND OTHER WILDLIFE HAS BEEN SUBMITTED TO USFWS DMA HEADQUARTERS. OUR UNDERSTANDING IS THIS SHOWS STABILITY AND GROWTH IN ELEPHANT POPULATIONS.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

MY HUNTING FEE WAS 55,000 US DOLLARS. A PORTION OF THESE FUNDS ARE USED TO FUND THE ANTI POACHING EFFORTS OF THE PRESERVE. 70% OF THE TIMBAVATI PRIVATE NATURE RESERVE IS FUNDED BY FUNDS COLLECTED FROM THE HUNTING COMMUNITY. ADDITIONAL LETTER ATTACHED.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

I PERSONALLY DONATED 3,000 US DOLLARS IN ADDITION TO THE FEES AND TIPS I PAID TO UPGRADE THE COMPUTER SYSTEM OF THE TIMBAVATI PRIVATE NATURE RESERVE. THIS WILL HELP TO IMPROVE THE PARKS DATA MANAGEMENT AND SUPERVISION OF THE ANTI POACHING ACTIVITIES.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: [signature] Date: 11/20/2018

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

ADDITIONAL INFORMATION FOR SECTION 9 FOR DR. ROBERT BURKE ELEPHANT APPLICATION

THE TIMAVATI RESERVE IS IN CHARGE OF BUTCHERING ELEPHANS AND THEY OVERSEE THE DISTRIBUTION OF MEAT TO THE VILLAGES. IT IS ESTIMATED THAT THE MEAT FROM THIS ONE ELEPHANT FEAD 75-100 FAMILIES IN THE LOCAL VILLAGES

ALL OF THE TROPHY FEES PAID GO TO FUNDING THE TIMAVATI PRIVATE NATURE RESERVE. 70% OF THE TROPHY FEE GOES TOWARD ANTI POACHING COSTS. THE FEES COLLECTED FROM THIS ELEPHANT HUNT PROVIDED THE EQUIVALENT OF TWO MONTHS BUDGET FOR THE RESERVE.

BECAUSE OF THIS AND OTHER HUNTS, THERE IS MONEY FOR ANTI POACHING PATROLS AND EQUIPMENT. THE OFFICERS HIRED BY THE RESERVE HAVE BEEN ABLE TO STOP PAOCHING THROUGH CONSTANT PATROLS IN THE RESERVE. DUE TO THESE PATROLS, THEY HAVE NOT HAD A POACHING INCIDENT ON ANY RHINOS OR ELEPHANTS FOR ONE YEAR.

may act through any of its offices or any employees with Power of Attorney on file with this licensed broker as required by the Regional Commission of Customs as a true and lawful agent and attorney of the grantor named above for and in the name, place, steed of said grantor from this date and in all Customs Districts, and in no other name, to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandize shipped or consigned by or to said grantor, to perform any act or condition which may be required by law or regulation in connection with such merchandize, to receive any merchandize deliverable to said grantor: To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make, sign, declare, or swear to any statement, supplemental statement, schedule,, supplemental schedule, certificate of delivery, certificate of manufacture, certificate, and delivery abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district. To sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unlading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owners declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise: To sign and swear to any document, and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unlading, or operation of any vessel or other means of conveyance owned or operated said grantor. To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantors name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor. And generally to transact at the customhouses in said district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930. In which said grantor is or may or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents, the forgoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of customs of the district aforesaid. If the donor of this power of attorney is a partnership, the said the power shall in no case have any force or effect after the expiration of 2 years from the date of its execution. Or until revoked. Pursuant to 19 CFR 111 36(a), election is made waiving the right to receive invoices, supporting documents and correspondences from John Rulon CHB , who is directed to forward all documents and inquiries concerning our imports to their customs brokerage services, to our freight forwarder, who will pay John Rulon CHB, for duties, and services performed on our behalf. It is understood the right to revoke said waiver is continuing.

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982

INTRODUCTION

1.1 PREAMBLE

The Timbavati Private Nature Reserve forms part of the Greater Kruger Park, and is a member of the Associated Private Nature Reserves otherwise known as the APNR. The Timbavati Private Nature Reserve, herein further referred to as the TPNR, describes its vision for the overall long-term goal for the operation, protection and development of TPNR as follows: *To provide for ecologically and aesthetically sustainable (non-consumptive and consumptive) use of the area for its owners, based on wildlife focused recreation, tourism and hunting.*

The purpose of an organisation is the foundation on which all future action is based and must be in line with the overall management philosophy of the association. The purpose of the TPNR is thus defined as follows: *To conserve and maintain important aquatic and terrestrial habitat for wildlife conservation, ecosystem services and geological features whilst providing opportunities and benefits for sustainable nature based tourism and hunting whilst ensuring continued community support and beneficiation.*

Responsible wildlife management practices necessitated the monitoring of wildlife populations, the TPNR thus participates in active population monitoring of all mammalian species including carnivores. The scope of this report is to summarise the results for the annual aerial census conducted during September 2018. Please note that this report only provides information on the annual aerial census and that reports on other species and census techniques are published separately.

1.2 SURVEY AREA

The Timbavati Private Nature Reserve encompasses a total area of 530.2 km^2, and is situated between: -24.190 and -24.198 S and 31.227 and 31.278 E. The reserve forms part of the Greater Kruger Park and is situated directly west of the Houtboschrand and Kingfisherspruit sections. The TPNR furthermore forms part of the Associated Private Nature Reserves, with the Umbabat and Klaserie Private Nature Reserves bordering towards the north and north-west respectively.

The TPNR falls within the Lowveld Bushveld climatic region of South Africa (Kruger 2004). Average rainfall for the area ranges from 500-700mm per annum (Kruger 2004), with the long

term average for the Timbavati Headquarters station in the region of 573 mm per annum. The peak rainfall season for the reserve is between the months of November and March, with the highest temperatures recorded during the months of January and February, this is further characterised by high humidity.

Geomorphology of the TPNR is characterised by an undulating landscape with small crests and long mid-slopes often not abrupt towards a foot slope or drainage line. High points within the landscape are confined towards the east of the TPNR, with the highest point located within the farm of Johnniesdale (520m m.s.l), followed by the Ceylon farm (420m m.s.l). Both of these properties can be located on the eastern boundary of the TPNR. Dolerite pipe erosion surfaces are prominent within the northern section of the TPNR and result in abrupt pedalogical differences.

Hydrology and drainage of the area consists of the Klaserie River, the only perennial river within the area, and eight other non-perennial rivers. Water for game is mainly in the form of earth dams build within drainage lines and pumped water in troughs, usually in the vicinity of infrastructure such as lodges and camps. The TPNR falls within the savanna biome with a further classification by Mucina and Rutherford (2006) at a vegetation unit scale, as part of the following vegetation units; Granite Lowveld (35018 ha), Phalaborwa-Timbavati Mopaneveld (18192 ha) and the Gabbro Grassy Bushveld (709 ha).

The main structural vegetation units within the TPNR can be described as:

- *Colophospermum mopane* veld within the north,
- Open *Senegalia nigrescens/ Sclerocarya birrea* veld with in the central sections, and
- Open *Combretum/ Terminalia* veld within the south.

A well-defined phyto-mass gradient is evident on the TPNR and this can be attributed to the rainfall gradient present, from the dry northern sections to the more mesic southern sections.

A wide verity of ungulates and the full spectrum of the large carnivores occur within the TPNR. Species dominating the landscape include, but are not restricted to: Impala (*Aepyceros melampus melampus*), African Elephant (*Loxodonta africana*), Cape buffalo (*Syncerus caffer*), Giraffe (*Giraffa camelopardalis*), Zebra (*Equus quagga*) and Blue wildebeest (*Connochaetes taurinus*). Primate species include: Chacma baboon (*Papio hamadryas ursinus*) and the Vervet Monkey (*Cercopithecus aethiops*)

Iconic carnivore species include; Lion (*Panthera leo*), Leopard (*Panthera pardus*), Cheetah (*Acinonyx jubatus*), Spotted Hyena (*Crocuta crocuta*) and both Black-backed jackal (*Canis mesomelas*) and Side-stripped jackal (*Canis adustus*). Furthermore, less frequent species within the Greater Kruger region, which might occasionally venture into the TPNR include: Eland (*Tragelaphus oryx*), Roan (*Hippotragus equinus*), Tsessebe (*Damaliscus lunatus*) and Sable (*Hippotragus niger*).

1.3 SURVEY METHOD

The Total Area Count (TAC) survey conducted between 8-10 September 2018 was based on the standard total count method (Norton-Griffiths, 1978). This technique, with a standardised helicopter and flight paths, has been used in conjunction with the Agricultural Research Council (ARC)[1] since 1991. Standardisation is vital for comparison of data over time, with special emphasis on open systems, with trends rather than actual numbers being analysed.

The total of 530.2 km^2 was surveyed, using a bell 206 B Jet Ranger helicopter, with count marker bars fitted to each side of the aircraft. Each marker bar represents a 200m transect on each side of the aircraft when the target height of between 70-90m is reached (Annexure 1). Fight paths are spaced 500m apart, resulting in a total survey strip length of 1566.5 km. Count session duration was limited to the fuel capacity of the aircraft and the sessions per survey day are depicted in (Annexure 1). The survey crew consisted of the pilot, Front Seat Observer (FSO) and two Rear Seat Observers (RSO). Navigation and data collection during the survey was done by means of the "Capture[2]" software program, a multi-disciplinary geo-referencing and data capture program.

All mammalian species encountered during the census were counted, these included all ungulates and carnivores. Other non-mammalian species counted during the survey included:

- Raptors nests,
- Saddle billed Storks,
- Southern-Ground Hornbill, and
- Vulture nests.

[1] Agricultural Research Council, Dr Mike Peel. Range and Forage Institute, Nelspruit.
[2] Capture software, Mike Pingo/ Sunrise Aviation, South Africa.

Weather conditions for the majority of the census period were favourable, with the exception of the last 15 minutes of the first session on 8 September 2018 when sporadic rainfall was experienced and due to the poor visibility, the helicopter was forced to land 15 minutes early, while the weather cleared. Specifics related to climatic conditions are depicted in (Annexure 1).

1.3.1 FIXED-WING-BUFFALO COUNTS.

Individual Cape buffalo and small bachelor herds were counted using the method described above, however in the case of a large herd, a fixed-wing aircraft was used to take high resolution photographs of the herd once encountered. This practise lends itself to more accurate counts and a realistic estimation of natality within these herds.

1.3.2 RHINOCEROS DEMOGRAPHICS

Photographs were taken of each rhinoceros, both black and white, encountered during the survey out of the helicopter. A photograph time and data record time was correlated to ensure all individuals on the photographs were accounted for. Ageing was done by utilizing the rhinoceros ageing guide of Adcock and Emslie (IUCN Publication)[3]. Due to the sensitive nature of this data set, rhinoceros demographics will only be used for specialist reports and not be distributed.

[3] Adcock and Emslie, African Rhino Monitoring Guide/ IUCN, Rhino Specialist Group

RESULTS

2.1 COUNT TOTALS

Results for species of importance are given in (Table 1). Impala (8233), Cape buffalo (1619), Burchell's zebra (856) African elephant (768) and blue wildebeest (635) were the most numerous species counted during the survey. Nyala (24) and bushbuck (2) numbers are low due to habitat selection of these cryptic species (riverine vegetation), and as a result these numbers cannot be seen as a true reflection.

A single Sable antelope bull was also recorded; this animal was seen at the pan close to Mopani camp on the farm Ceylon. Other species seen during the survey are depicted in (Table 2) with the following species counted within the Ngala concession area, warthog (2), impala (33), African elephant (3) and steenbok (1).

Table 1 Important species results (2018 TPNR aerial census).

Species	Count
Blue Wildebeest	635
Cape Buffalo	1619
Duiker	31
African Elephant	768
Giraffe	309
Hippopotamus	103
Impala	8322
Kudu	448
Nyala	24
Black Rhinoceros	** Not disclosed for security reasons*
White Rhinoceros	** Not disclosed for security reasons*
Steenbok	47
Vulture Nest	72
Warthog	196
Waterbuck	282
Burchell's Zebra	856

Table 2 Other species counted during the census.

Species	Count
Black-backed Jackal	3
Cheetah	1
Honey Badger	5
Leopard	2
Lion	16
Ostrich	1
Raptors nest	7
Southern Ground-Hornbill	38
Spotted Hyena	26
Vulture nest	72

2.2 IMPORTANT SPECIES DENSITY AND DISTRIBUTION

The overall animal density of all species counted during the survey was 28.3 animals/km^2. Densities of all important species as depicted in (Table 1) are at 26.2 animals/km^2. Density figures for individually important species are depicted in (Table 3). Important distribution notes are the increase of both Vulture nests and Impala within the north of the TPNR as well as the occurrence of African elephant and Kudu in close proximity to drainage lines. The distribution maps of all significant species within the TPNR are depicted in (Annexures 2 to12).

Table 3 Densities of important species counted during the 2018 Aerial census

Species	Density (no/km^2)
Blue wildebeest	1.20
Cape Buffalo	3.05
Duiker	0.06
African Elephant	1.45
Giraffe	0.58
Hippopotamus	0.19
Impala	15.70
Kudu	0.85
Nyala	0.05
Steenbok	0.09
Vulture Nest	0.14
Warthog	0.37
Waterbuck	0.53
Burchell's Zebra	1.62

2.3 BIOMASS

Total animal biomass for important species over the total survey area was 6381 kg/km^2 (Table 4), using biomass conversions according to Meissner *et.al.,*(1983). African elephant was the single highest contributor to animal biomass with 39% of the biomass assigned to this species followed by Cape buffalo at 27.5%. Other species with high contributions to total animal biomass were impala (9.9%), white rhinoceros (7.7%), giraffe (6.9%) and Burchell's zebra (5.1%).

Table 4 Biomass of important species during the 2018 Aerial census

Species	Biomass kg/km^2	% of Total biomass
Blue Wildebeest	147.37	2.33
Cape Buffalo	1374.62	21.75
Duiker	0.58	0.01
African Elephant	2499.62	39.56
Giraffe	437.26	6.92
Hippopotamus	194.34	3.08
Impala	628.08	9.94
Kudu	114.96	1.82
Nyala	3.31	0.05
Black Rhinoceros	6.16	0.10
White Rhinoceros	486.79	7.70
Steenbok	0.80	0.01
Vulture Nest	0.00	0.00
Warthog	16.64	0.26
Waterbuck	85.13	1.35
Burchell's Zebra	323.02	5.11

Biomass interpretation can be done by grouping the important species into the following broad classes representing feeding habits; Pachyderms, including buffalo, Grazers, Browsers and Intermediate feeders. It is important to note that these broad feeding classes and respective biomass will directly indicate the competition for herbaceous and woody resources on the TPNR.

A comparison between the 2017 and 2018 aerial census results is made in terms of average biomass/ broad feeding class (Figure 1). It is important to note both Cape buffalo and African elephant numbers are higher in the 2018 census. Densities and biomass of species grouped into these broad feeding classes are depicted in (Figures 2 to 4), based on the 2018 census results. Figures 5 to 8 further refer to the trends in herbivore feeding classes, i.e. feeding class 1 to feeding class 4.

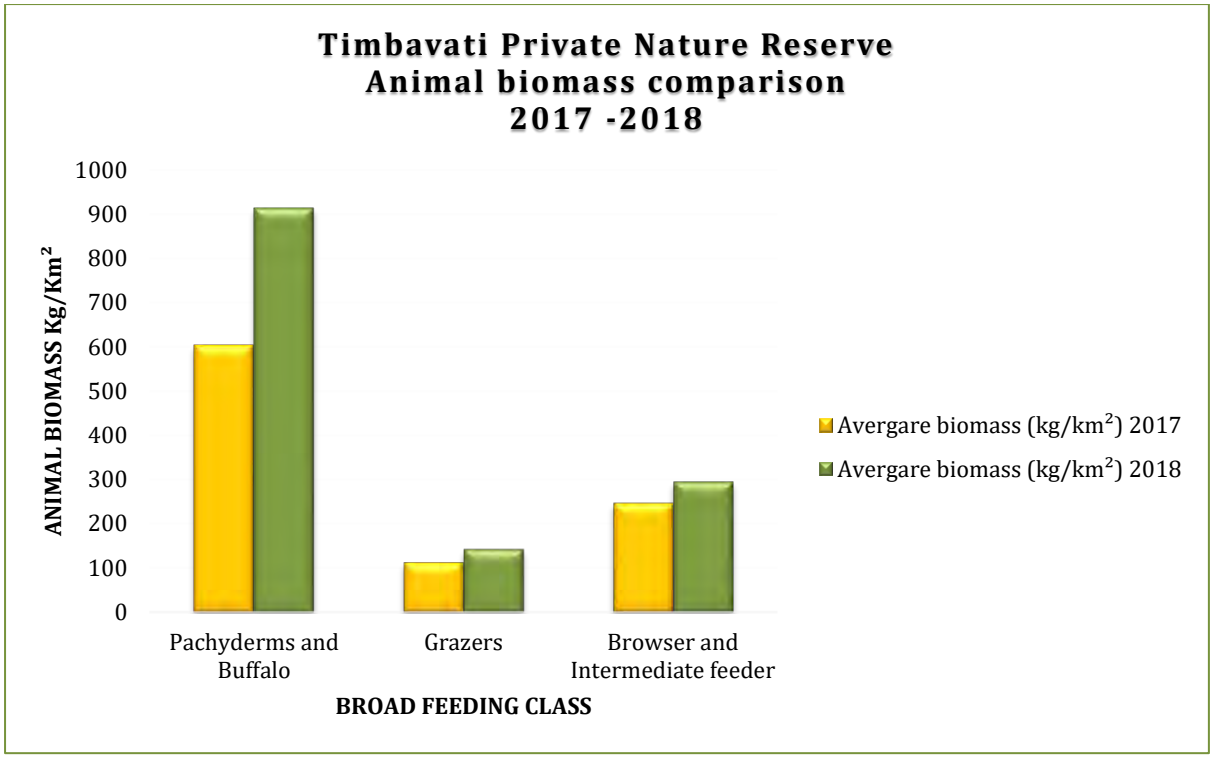

Figure 1 Biomass comparison between 2017 and 2018 for respective broad feeding classes, September 2018.

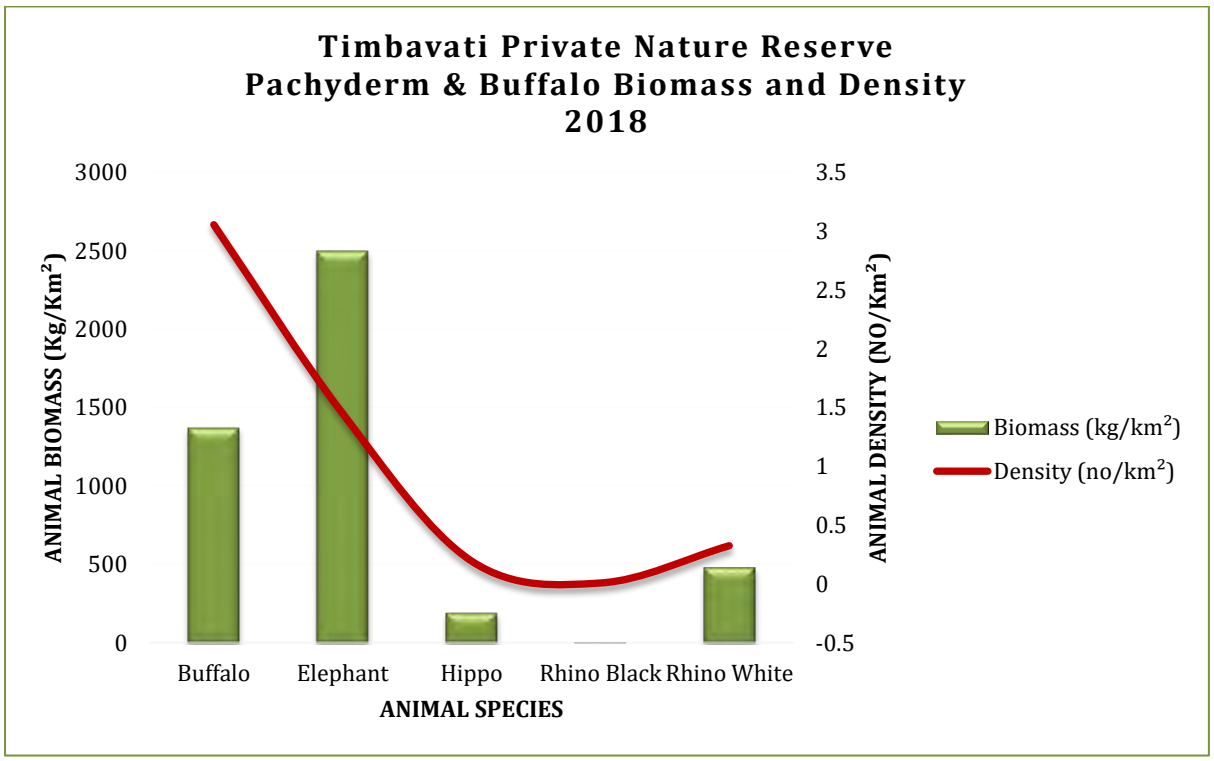

Figure 2 Biomass and density for Pachyderms and buffalo as a broad feeding class, September 2018.

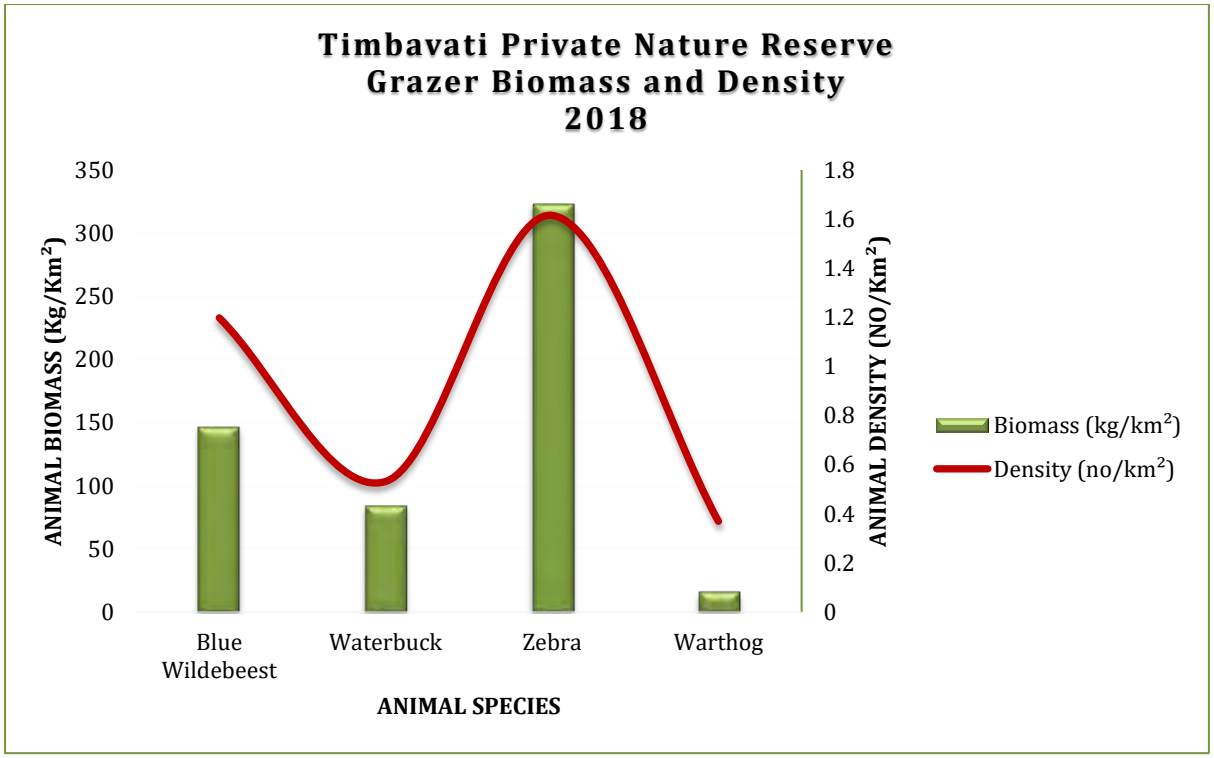

Figure 3 Biomass and density for grazers, September 2018.

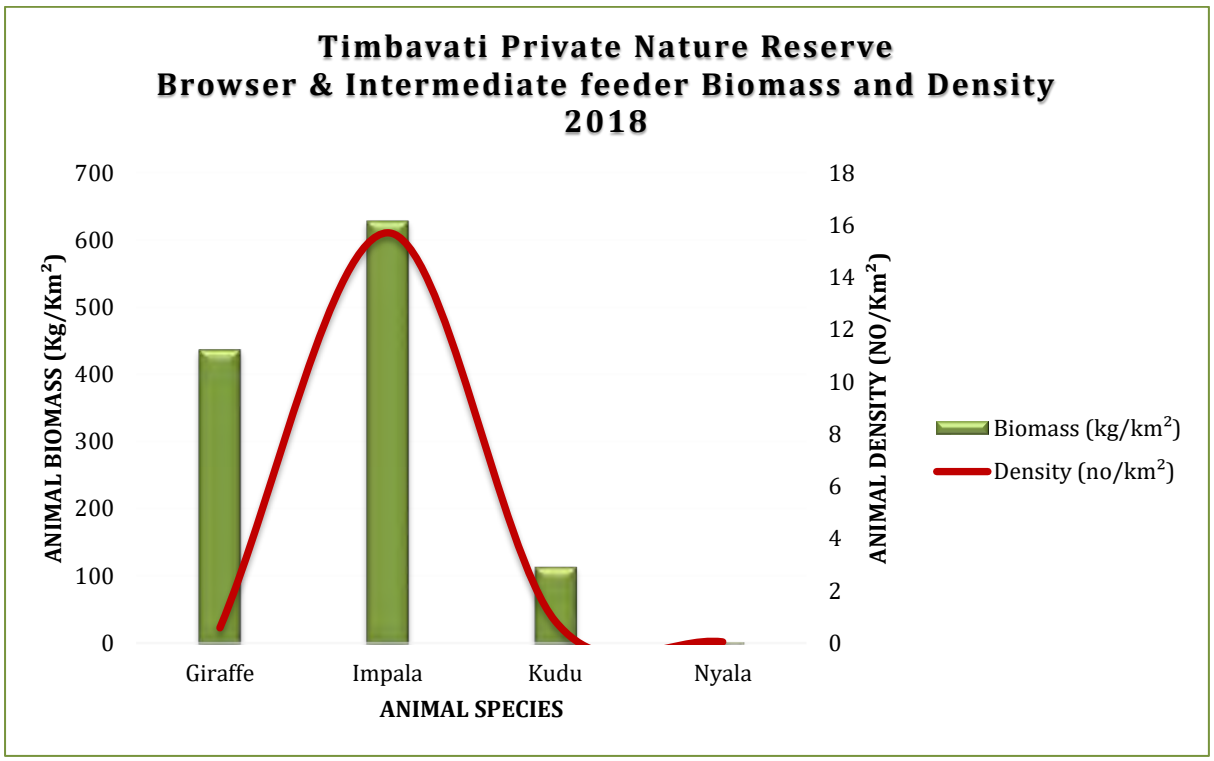

Figure 4 Biomass and density for browser and intermediate feeders, September 2018.

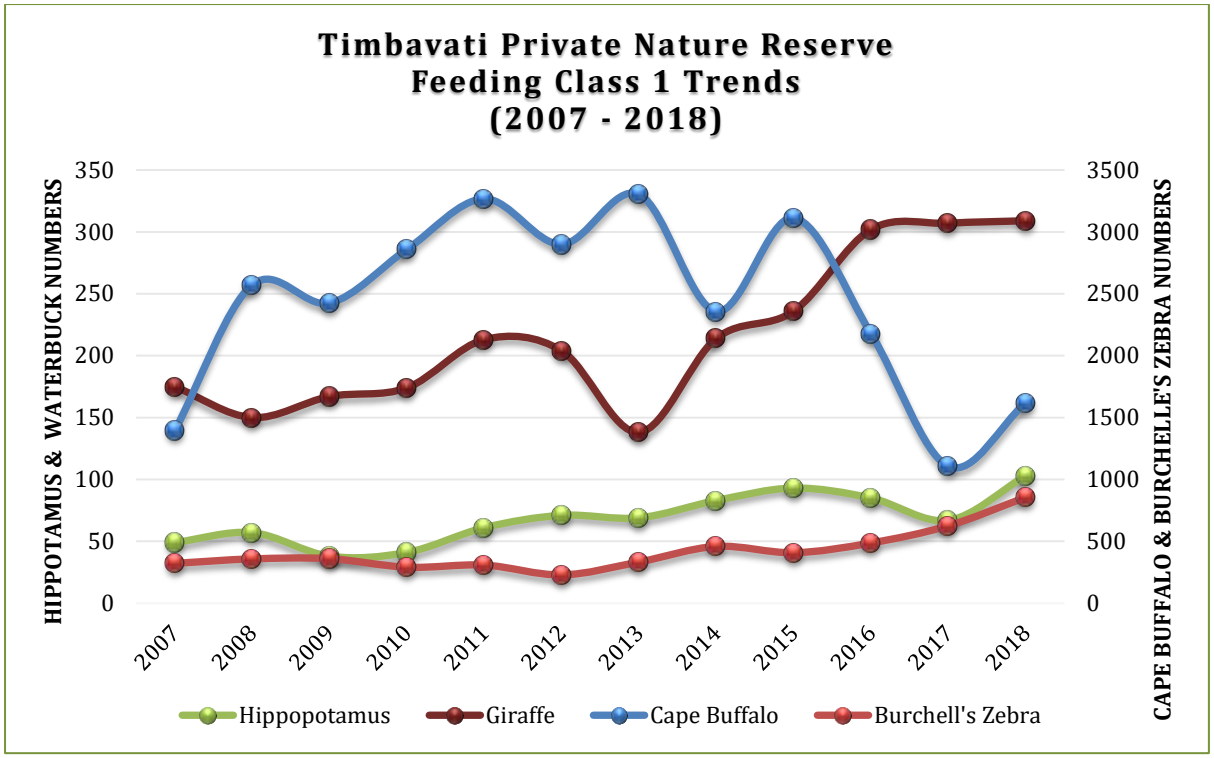

Figure 5 Graph illustrating the feeding class 1 species trends within the Timbavati Private Nature Reserve, 2007 – 2018.

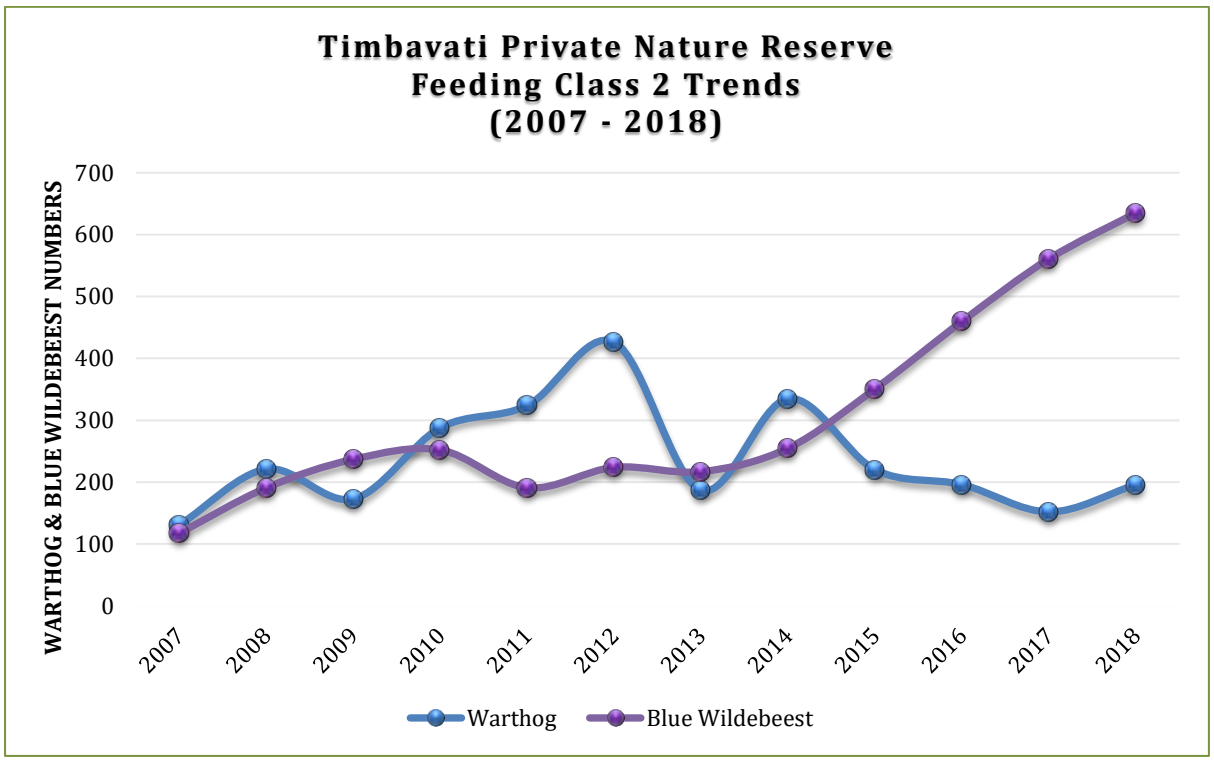

Figure 6 Graph illustrating the feeding class 2 species trends within the Timbavati Private Nature Reserve, 2007 – 2018.

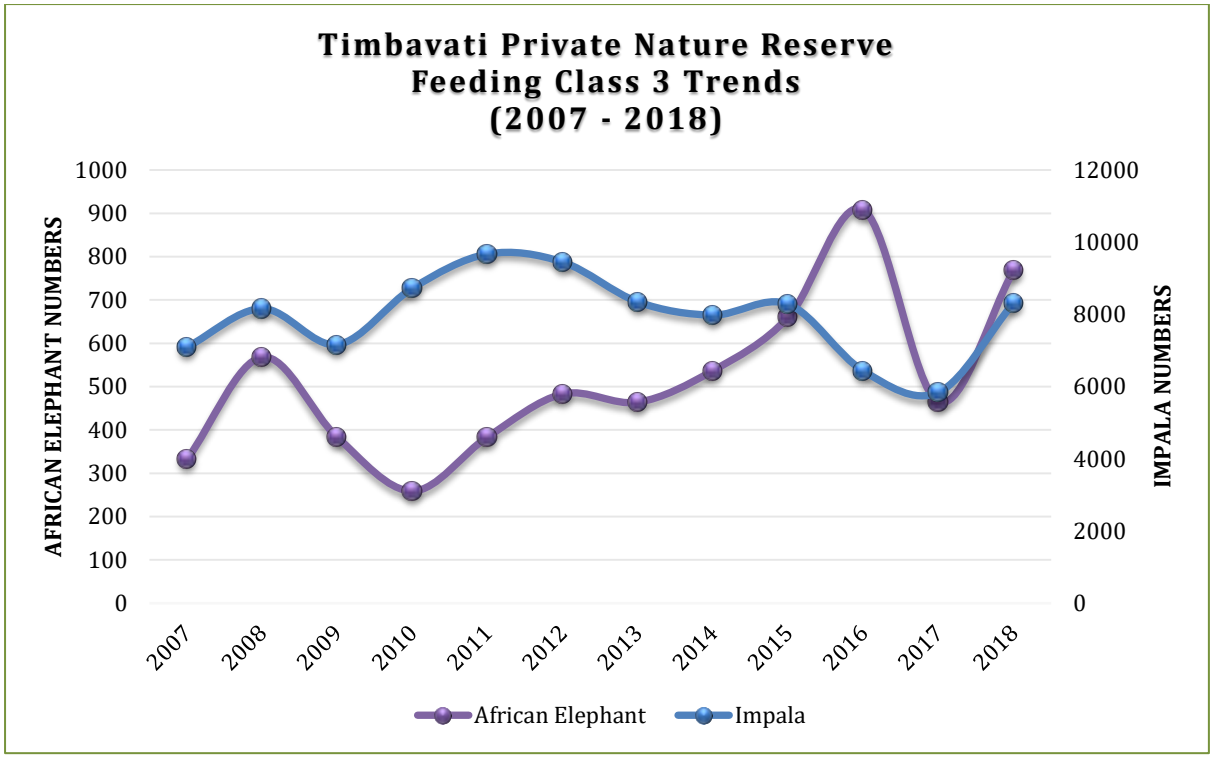

Figure 7 Graph illustrating the feeding class 3 species trends within the Timbavati Private Nature Reserve, 2007 – 2018.

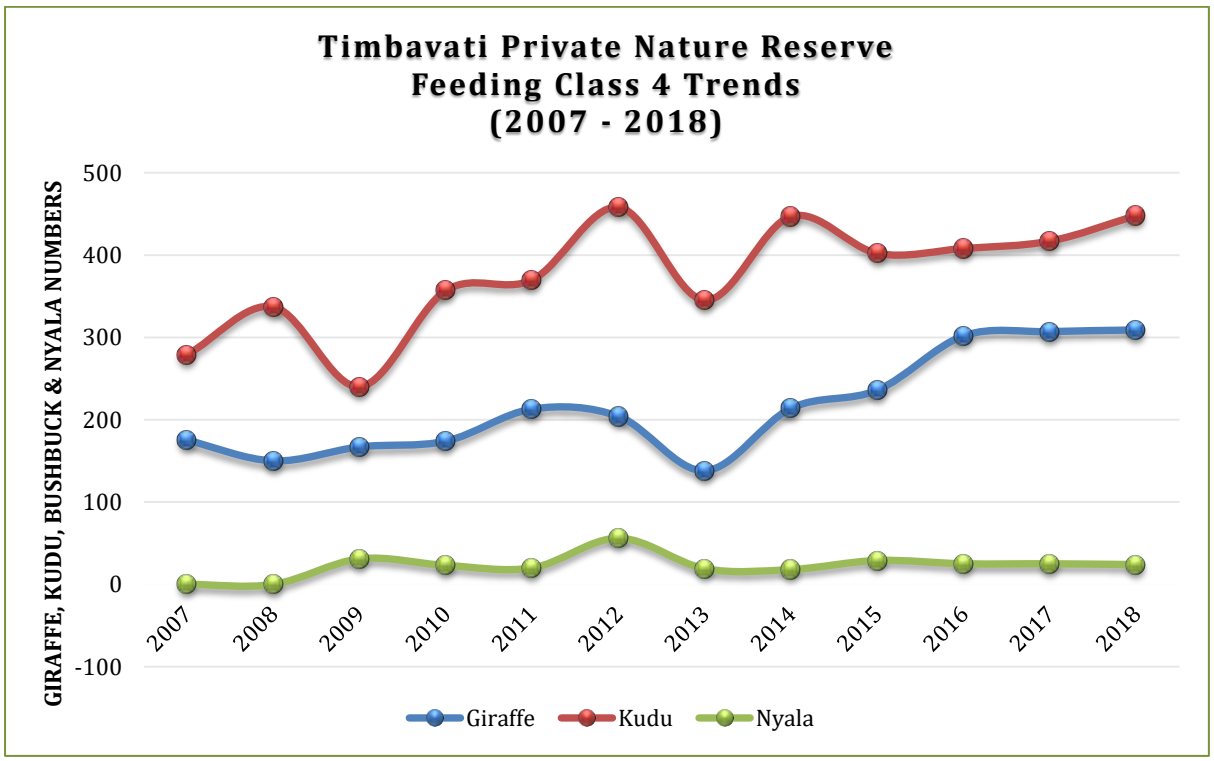

Figure 8 Graph illustrating the feeding class 4 species trends within the Timbavati Private Nature Reserve, 2007 – 2018.

METHOD OF ASSESSMENT

Population numbers as recorded during the 2018 census in general is satisfying if compared to the long term data set (Bosch, 2009). Climatic conditions prevailing from 2015-2017 have negatively influenced population numbers to a varying extend. Populations have shown positive growth according to the 2018 results.

Antelope species such as Nyala, Duiker and Steenbok are difficult to count during aerial surveys due to their cryptic colouration, habitat, size and behaviour if disturbed. These species numbers are given for reference purposes only.

3.1 POPULATION GROWTH

3.1.1 BLACK RHINOCEROS

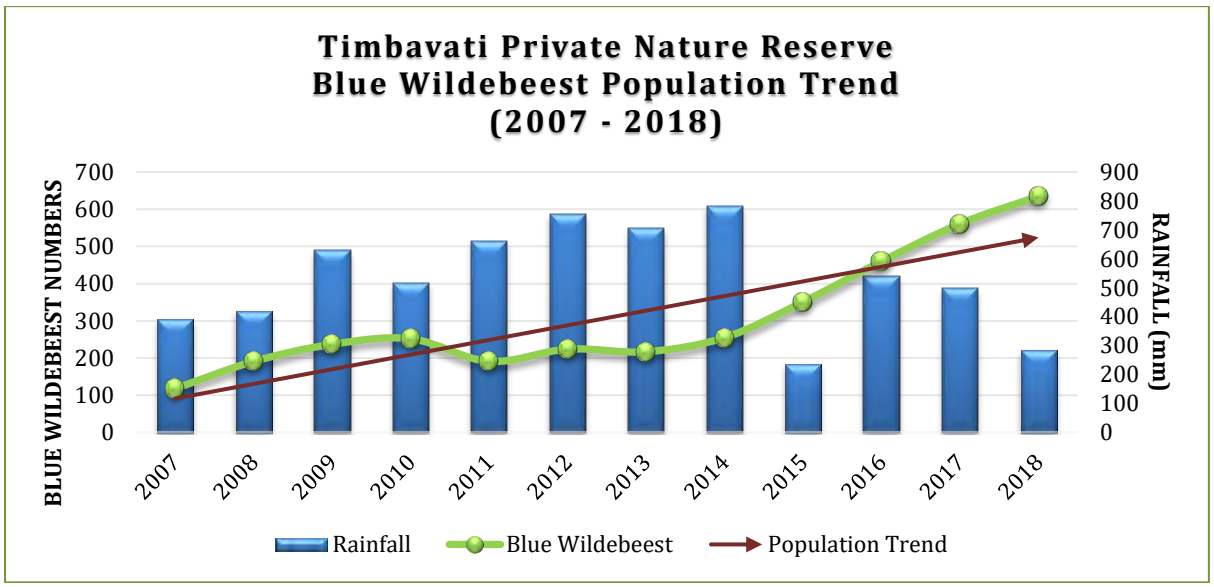
This species have shown a decrease of 20% during the 2018 census. The species is known to have an erratic growth figure within the TPNR. This is mainly due to the movement of only a few individuals within 15% of the TPNR. This species is highly selective in terms of habitat and are also known to be explorative. With the incorporation of Thorny Bush Game Reserve (TBGR) as part of the APNR, new habitat for exploration was opened; movement between the TPNR, Kruger Park and TBGR is inevitable.

3.1.2 WHITE RHINOCEROS

White Rhinoceros have shown an increase of 14% during the 2018 census. Numbers for this species are stable in relation to the long term dataset. A total of 31 calves (0-1,5years of age) were counted during the 2018 census.

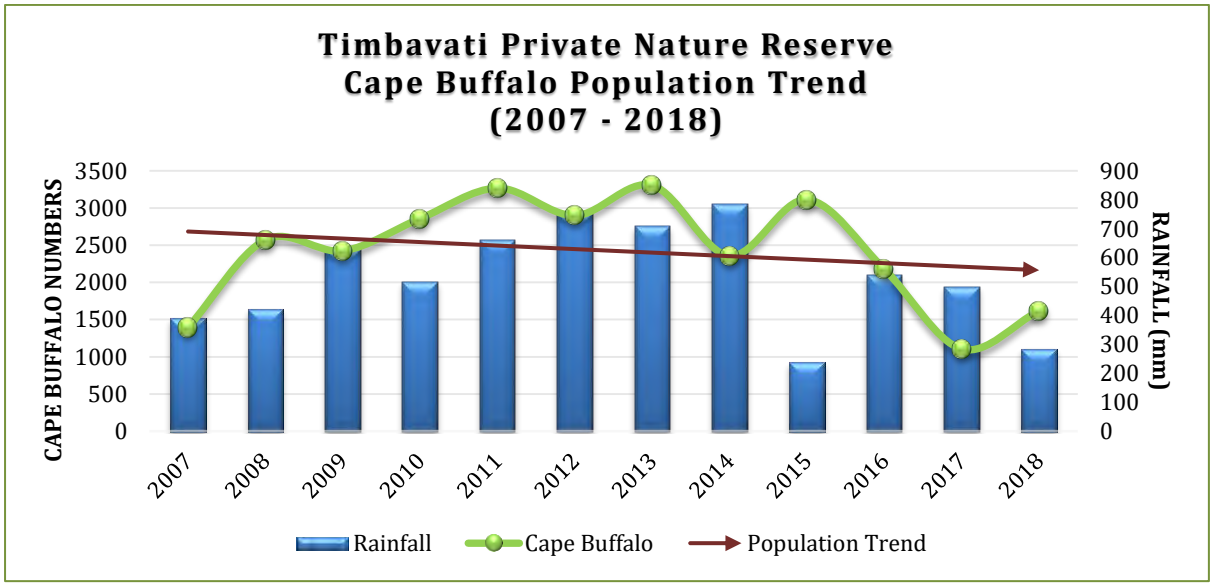
3.1.3 BLUE WILDEBEEST

This ungulate species have shown a 13% increase during the 2018 census. Blue wildebeest have also shown a drastic increase in numbers from 2010 (252) to 2018 (635), incorporation and water policies can be ascribed to this increase in numbers over years.



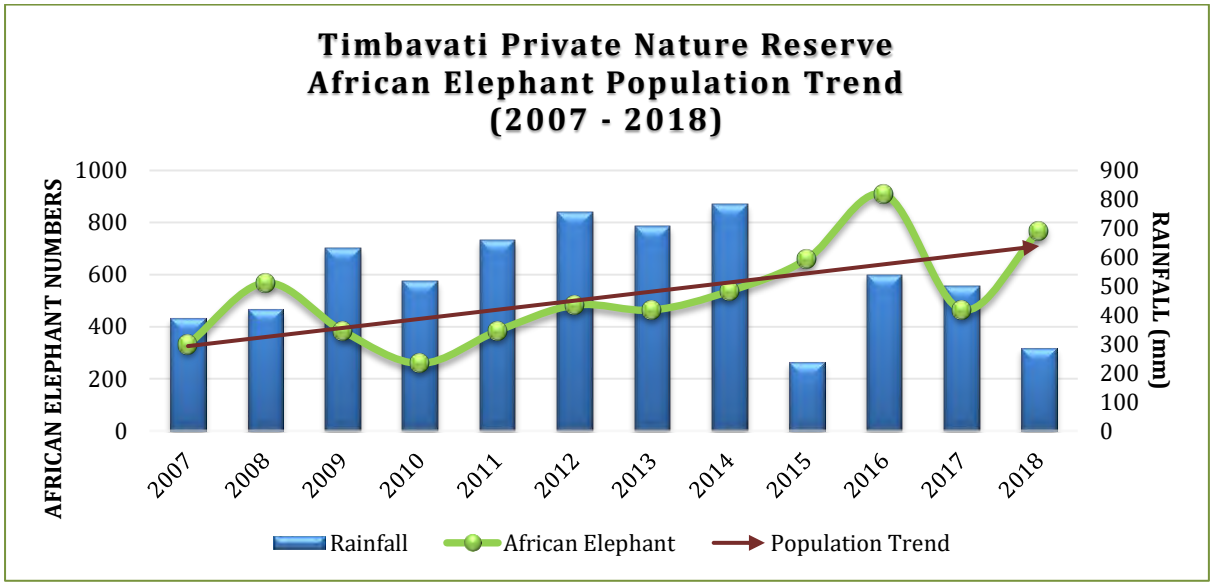
3.1.4 CAPE BUFFALO

Cape buffalo numbers are increasing slowly after the drought period with a 46% increase during the 2018 census. Buffalo herds are becoming larger and more frequently seen on the reserve. The count of 1619 is still low in relation of the long term dataset average of 2400-2500 individuals for the TPNR management area.



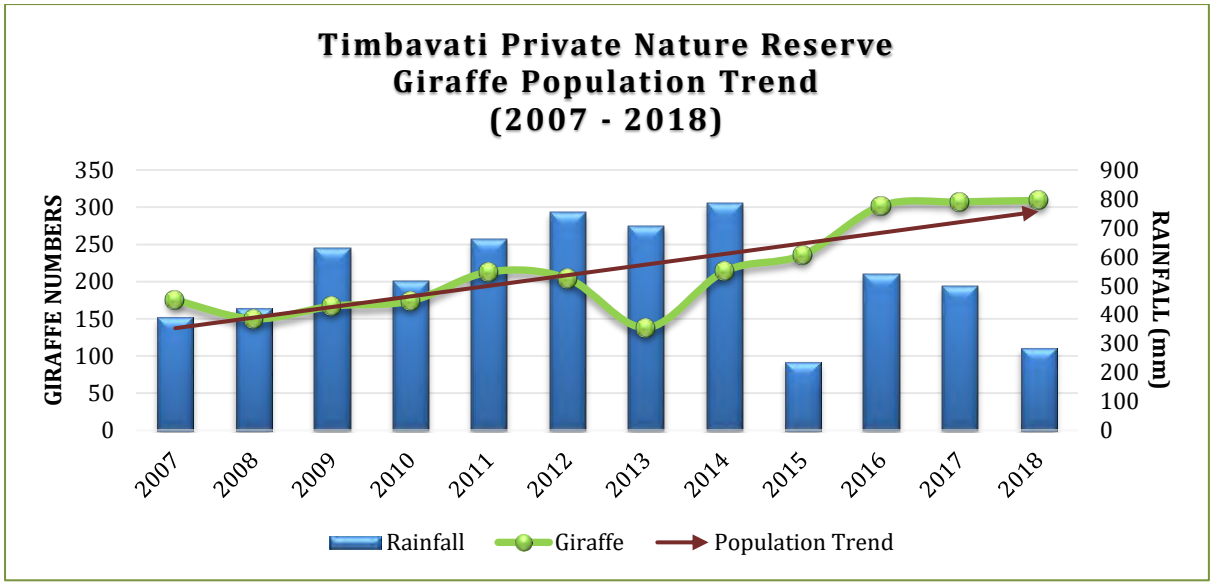
3.1.5 AFRICAN ELEPHANT

This species showed a 65% increase during the 2018 census. Elephant is the species with the highest percentage increase during the 2018 census. This species contributes the most (39%) to overall animal biomass on the TPNR, the constant increase of this species can be ascribed to water policies.



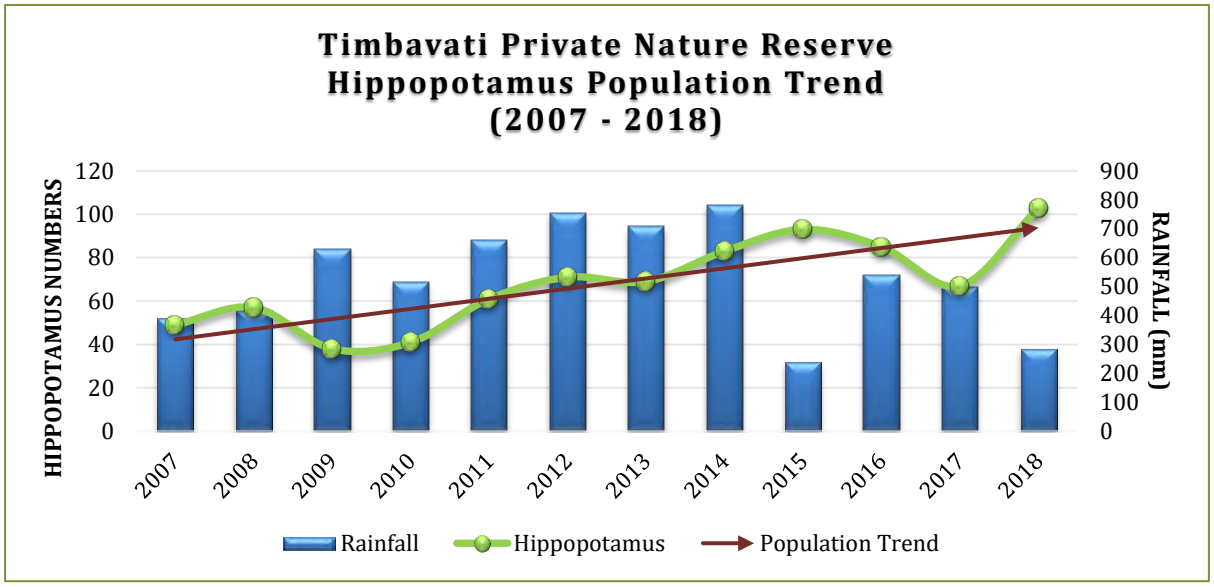
3.1.6 GIRAFFE

This species have shown a 0.7% increase during the 2018 census. The population is stable with little variation as from the 2016 census.



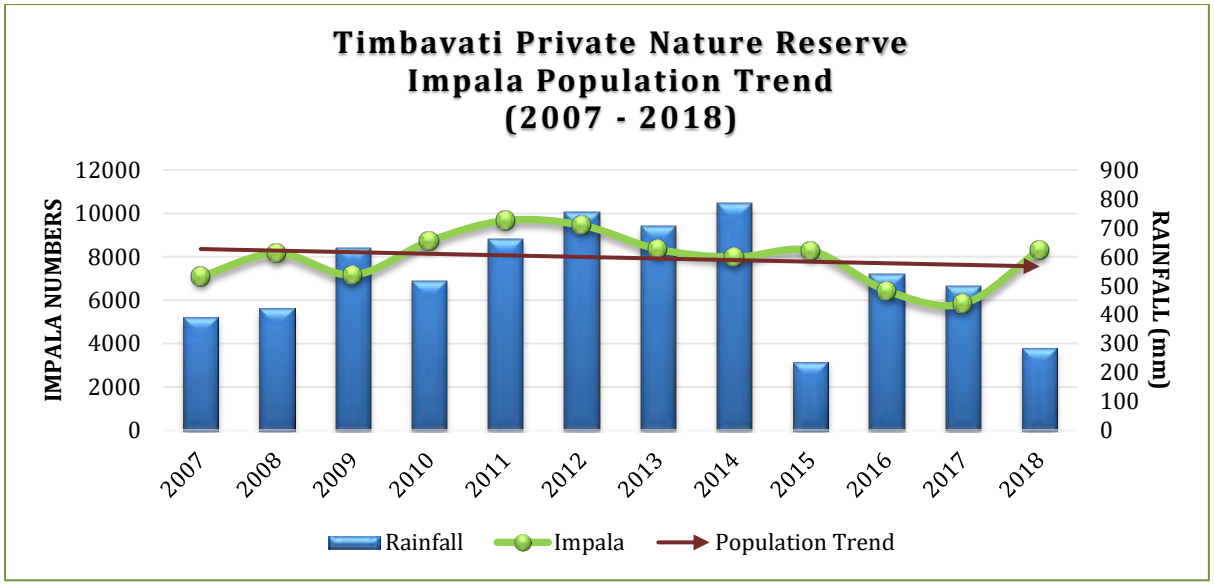
3.1.7 HIPPOPOTAMUS

This species have increased by 54% from the 2017 census. The TPNR hippopotamus population has always been stable with the exception of the 2015 count when habitat conditions during the drought influenced the population negatively.



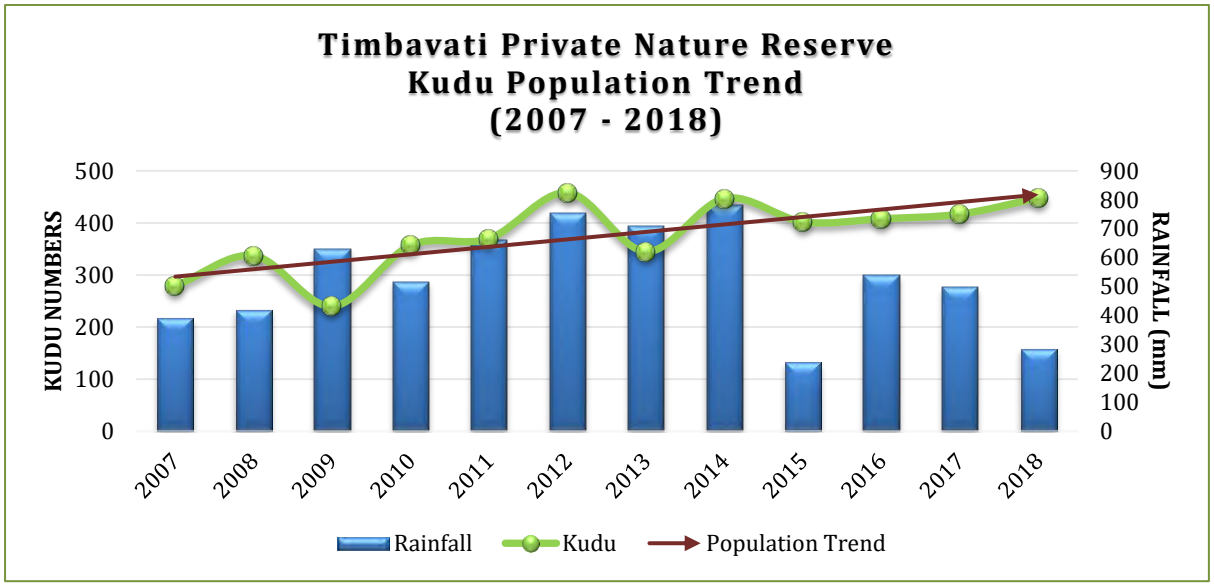
3.1.8 IMPALA

Impala, second to elephant, have the highest percentage increase (42%) during the 2018 census. This species count has always been the highest of all ungulates on the TPNR with fluctuations between years. The increase of this species in particular can be ascribed to water policies.



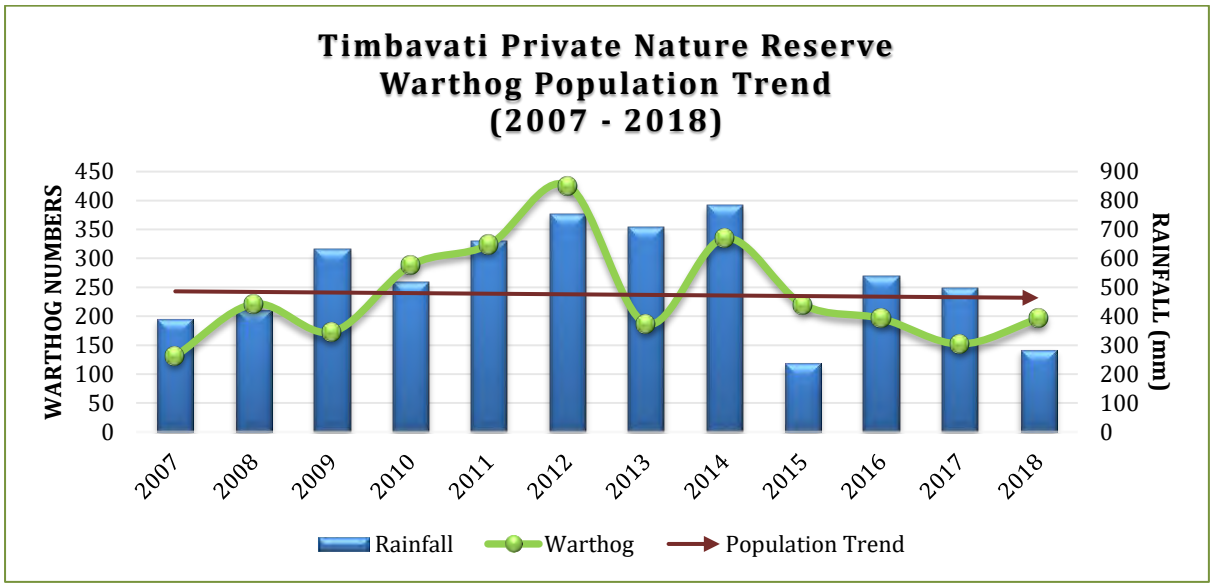
3.1.9 KUDU

Kudu numbers have increased with 7%. This is a welcoming increase as the population showed a decline of 10% during the 2015 census, with a recovery of 1.4% and 2.2% during 2016 and 2017 respectively. The population remains stable.



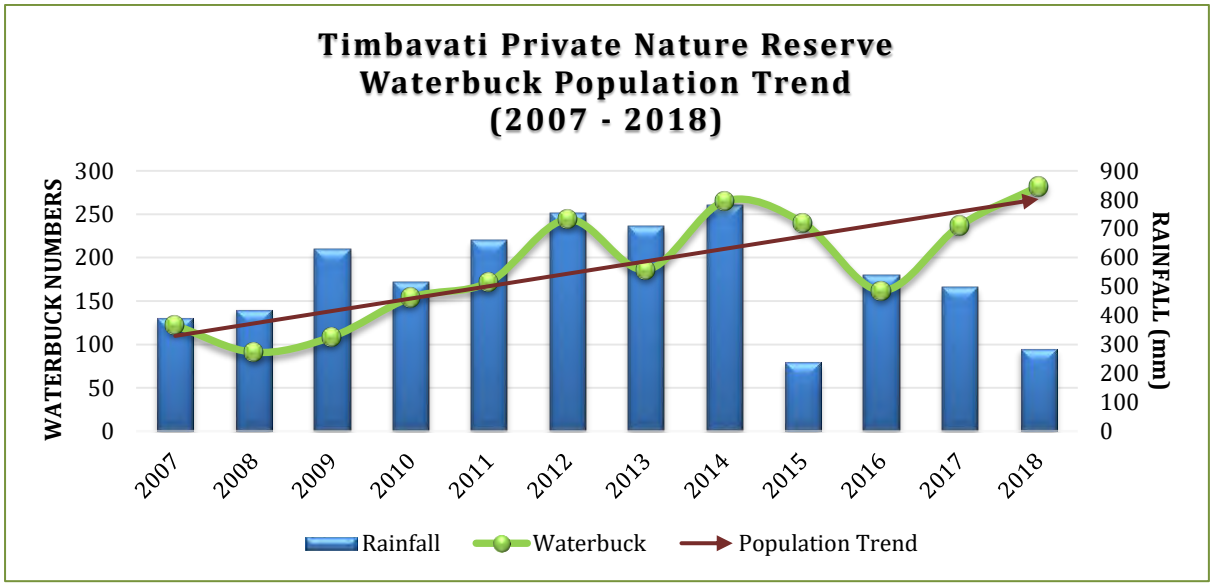
3.1.10 WARTHOG

Warthog numbers have increased by 29% during the 2018 census, the second highest increase after the 2010 increase of 66%. This increase might be short term as this species is known to increase drastically when conditions are favourable after a drought. The population is expected to stabilise when we enter a normal rainfall cycle.



3.1.11 WATERBUCK

This species increased by 19% during the 2018 census. This increase is welcoming as the species have shown a combined 41% decrease for the years 2015-2016. The waterbuck population is stable with climatic factors influencing the decline over the 2015-2016 periods.



3.1.12 BURCHELL'S ZEBRA

This species increased by 37% during the 2018 census. Zebra numbers have started to increase as from 2013 with the exception of 2015 when results showed an 11.1% decrease. The population is stable and with the incorporation of TBGR to the APNR, structural habitat attributes brought about by fire and Elephant impact can be seen as the main drivers of population increase for this species.

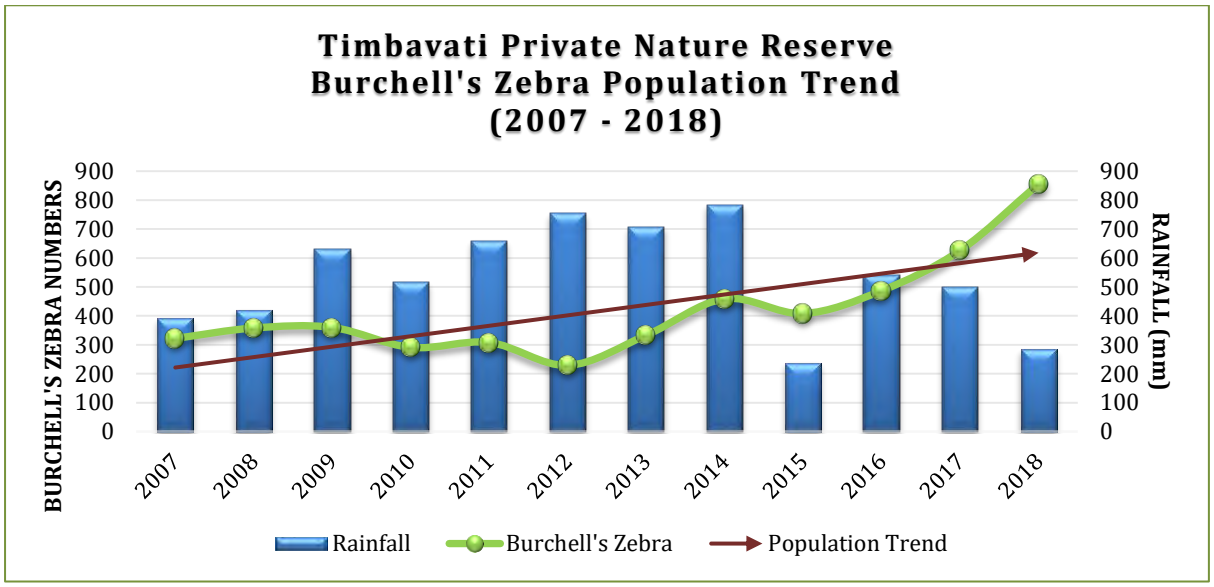


Table 5 Biomass of important species during the 2018 Aerial census

Species	2018	2017	Variance	%Variance
African Elephant	768	465	303	65.2%
Black Rhinoceros	** Removed for security reasons*			-20.0%
Blue Wildebeest	635	561	74	13.2%
Burchell's Zebra	856	626	230	36.7%
Cape Buffalo	1619	1106	513	46.4%
Giraffe	309	307	2	0.7%
Hippopotamus	103	67	36	53.7%
Impala	8322	5844	2478	42.4%
Kudu	448	417	31	7.4%
Warthog	196	152	44	28.9%
Waterbuck	282	237	45	19.0%
White Rhinoceros	** Removed for security reasons*			13.9%

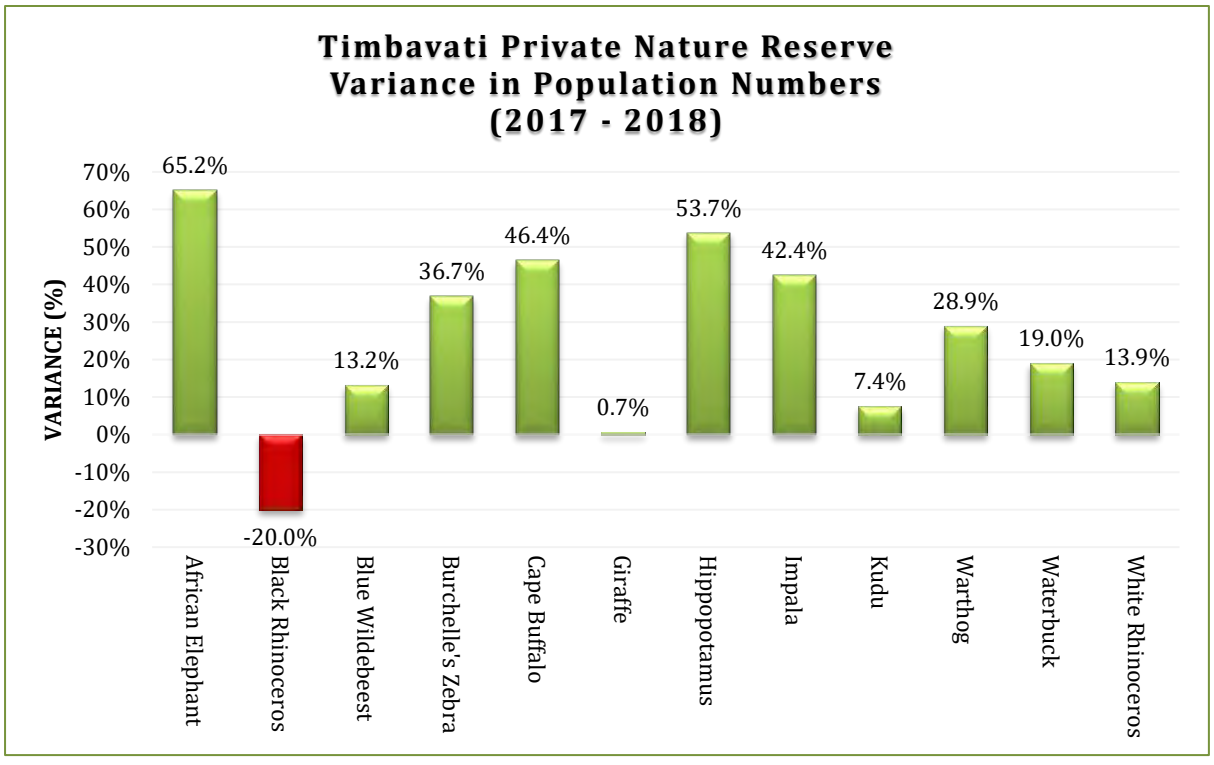

Figure 9 Graph illustrating the variance in population numbers in focus species between 2007 and 2018.

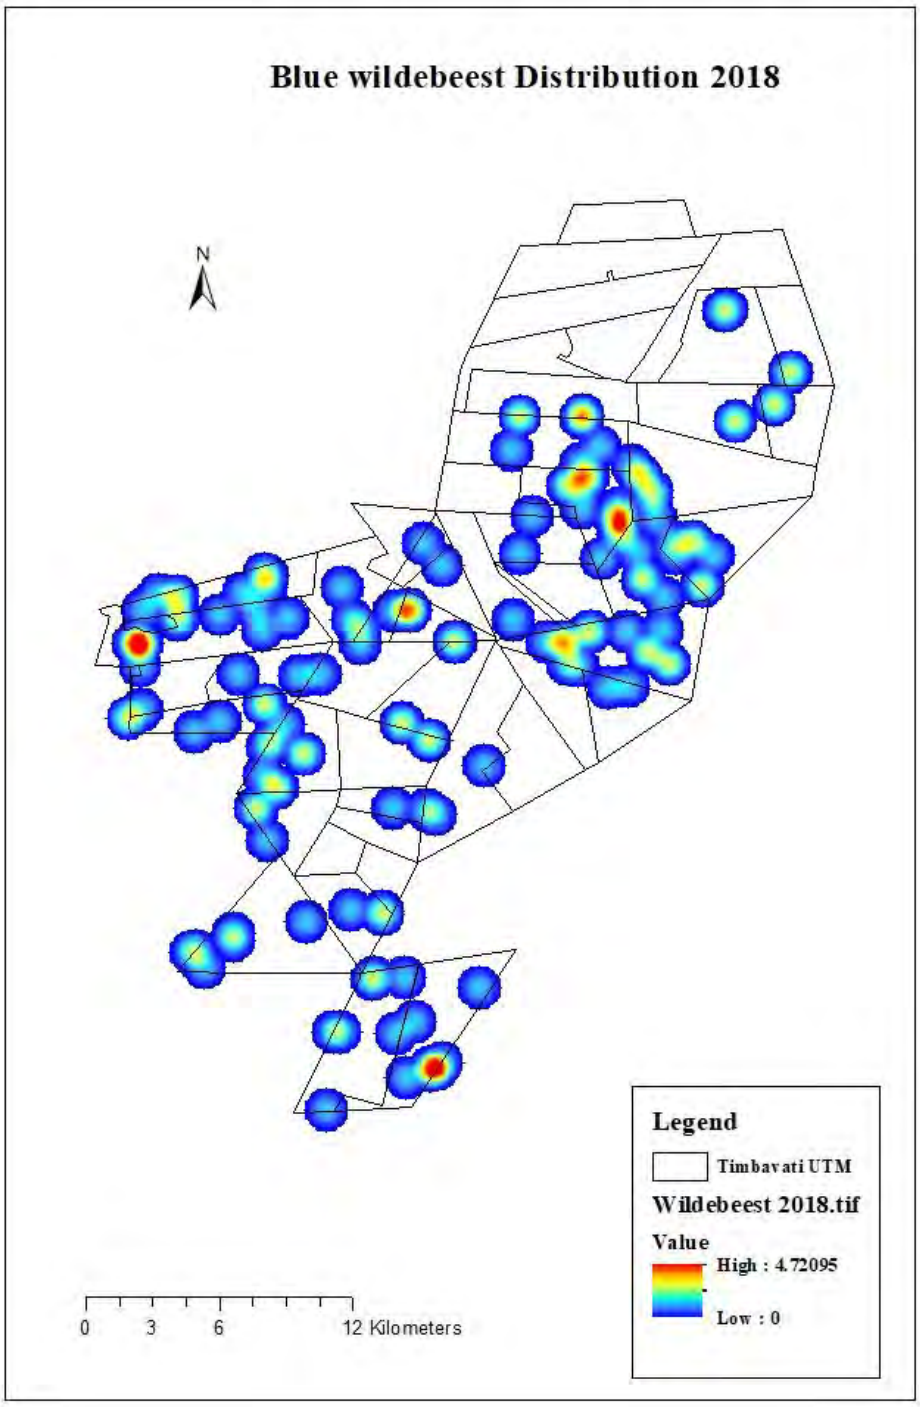
ANNEXURE A – SURVEY PARAMETERS TAC

ANNEXURE 1: Survey parameters Total Area Count (TAC), TPNR 8-10 September 2018.

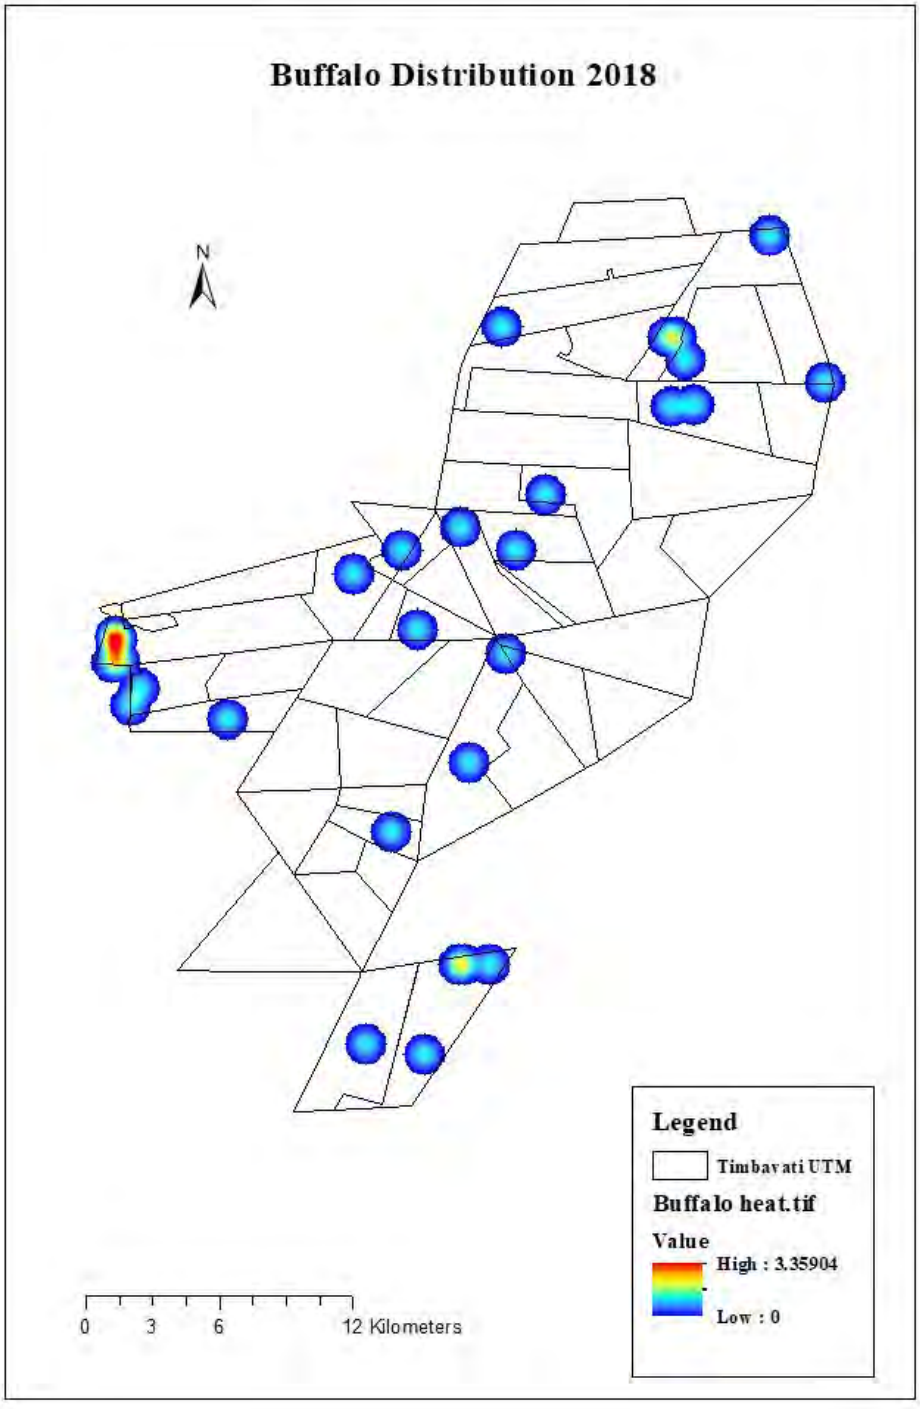
Survey date	8-10 September 2018
Survey area	Timbavati Private Nature reserve. Ngala concession area as depicted
Type of Survey	Total Area Count
Helicopter	Bell Jet Ranger 206 B
Survey Crew	
Pilot:	Mr Mike Pingo (Sunrise Aviation)
Front Seat Observer & data recording	Almero Bosch
Rear Seat Observers	Candice Pierce (one session), Daniel Ball, Edwin Pierce and Kathleen Gibson
Survey strip spacing	500m
Survey height	70-90m
Number of survey sessions	**Day 1:** Session 1: 2h:00 min Session 2: 2h:15 min Session 3: 1h:50 min **Day2:** Session 1: 2h:35 min Session 2: 1h:55 min Session 3: 2h:25 min **Day3:** Session 1: 2h:35 min Session 2: 2h:10 min Session 3: 2h:35 min
Total survey strip length	1566.5 km
Average survey flight speed	90-110 km/hr
Survey time	20.3 hours
Weather conditions	**Day1: 8 September 2018** 19°C-21°C. Light rain within the far South, high clouds, and good visibility on ground.
	Day2: 9 September 2018 15°-23°C. Good visibility during the day.
	Day 3: 10 September 2018 19°-26°C. Good visibility during the day.

ANNEXURE B – DISTRIBUTION MAPS

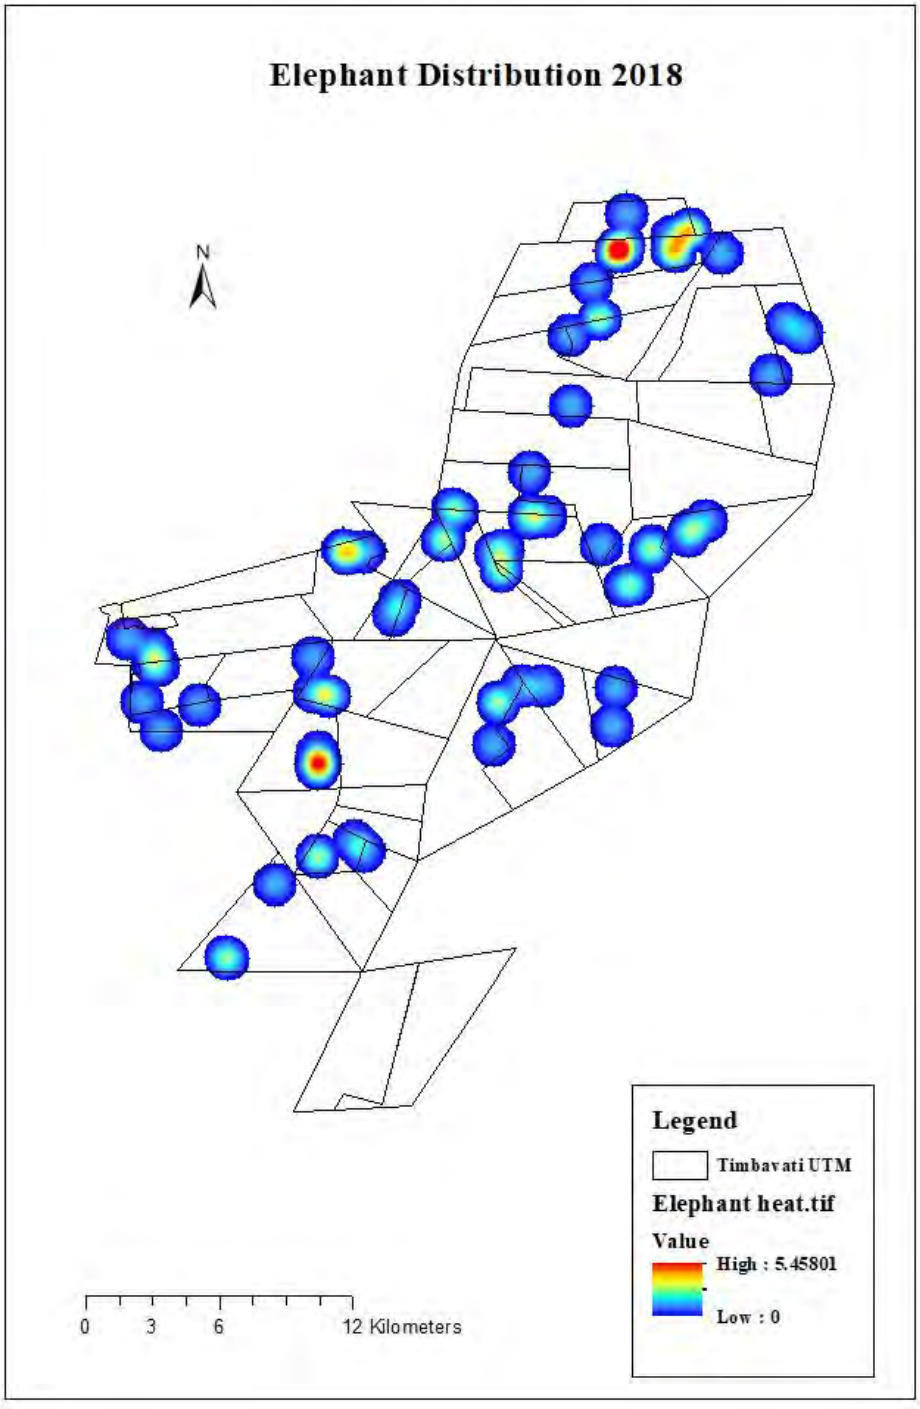
ANNEXURE 2: Blue wildebeest distribution during the 2018 aerial census.



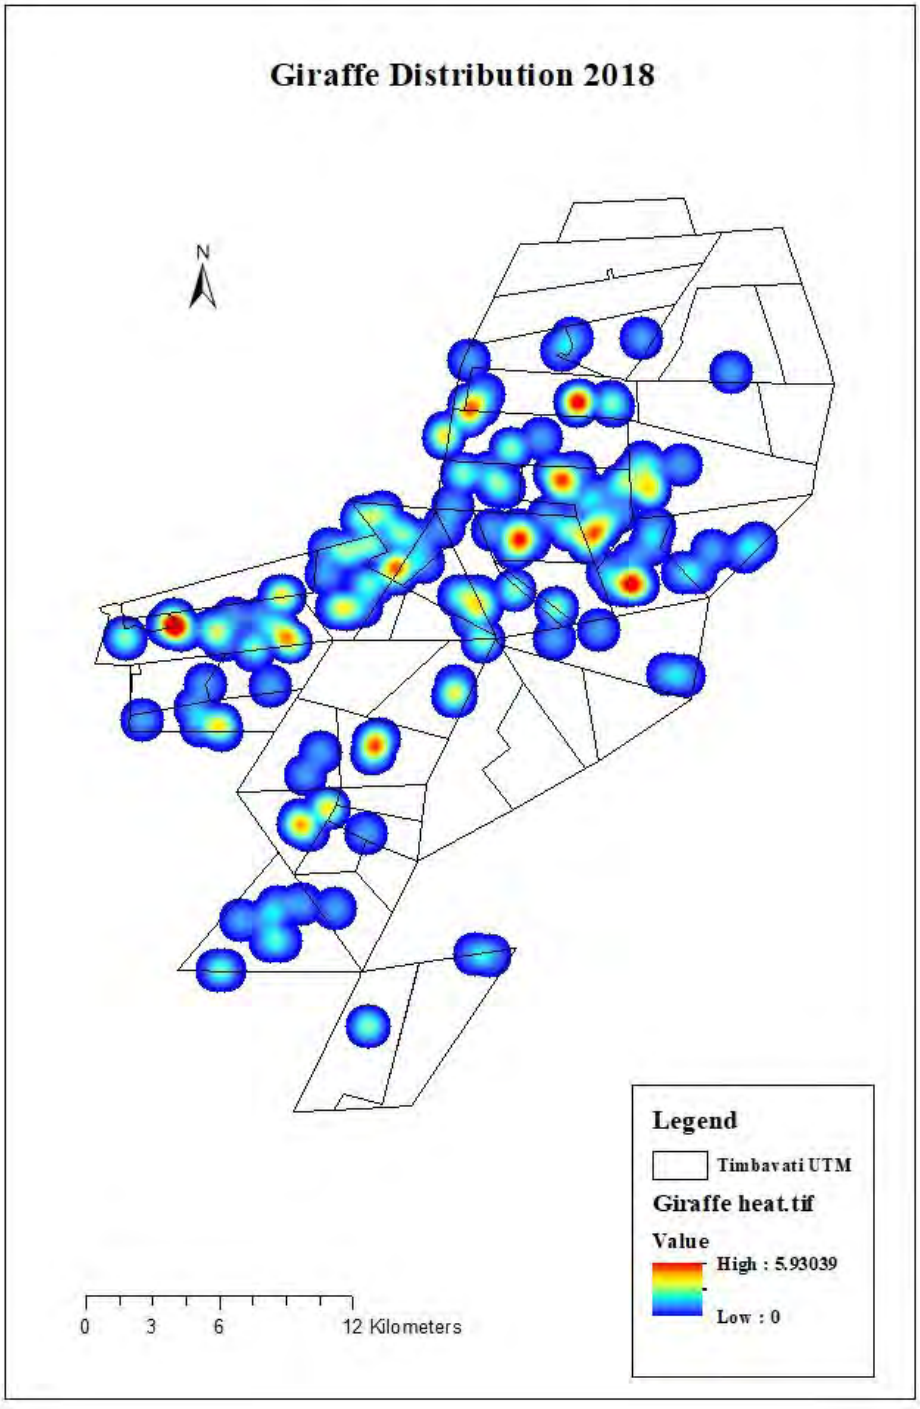
ANNEXURE 3: Cape buffalo distribution during the 2018 aerial census



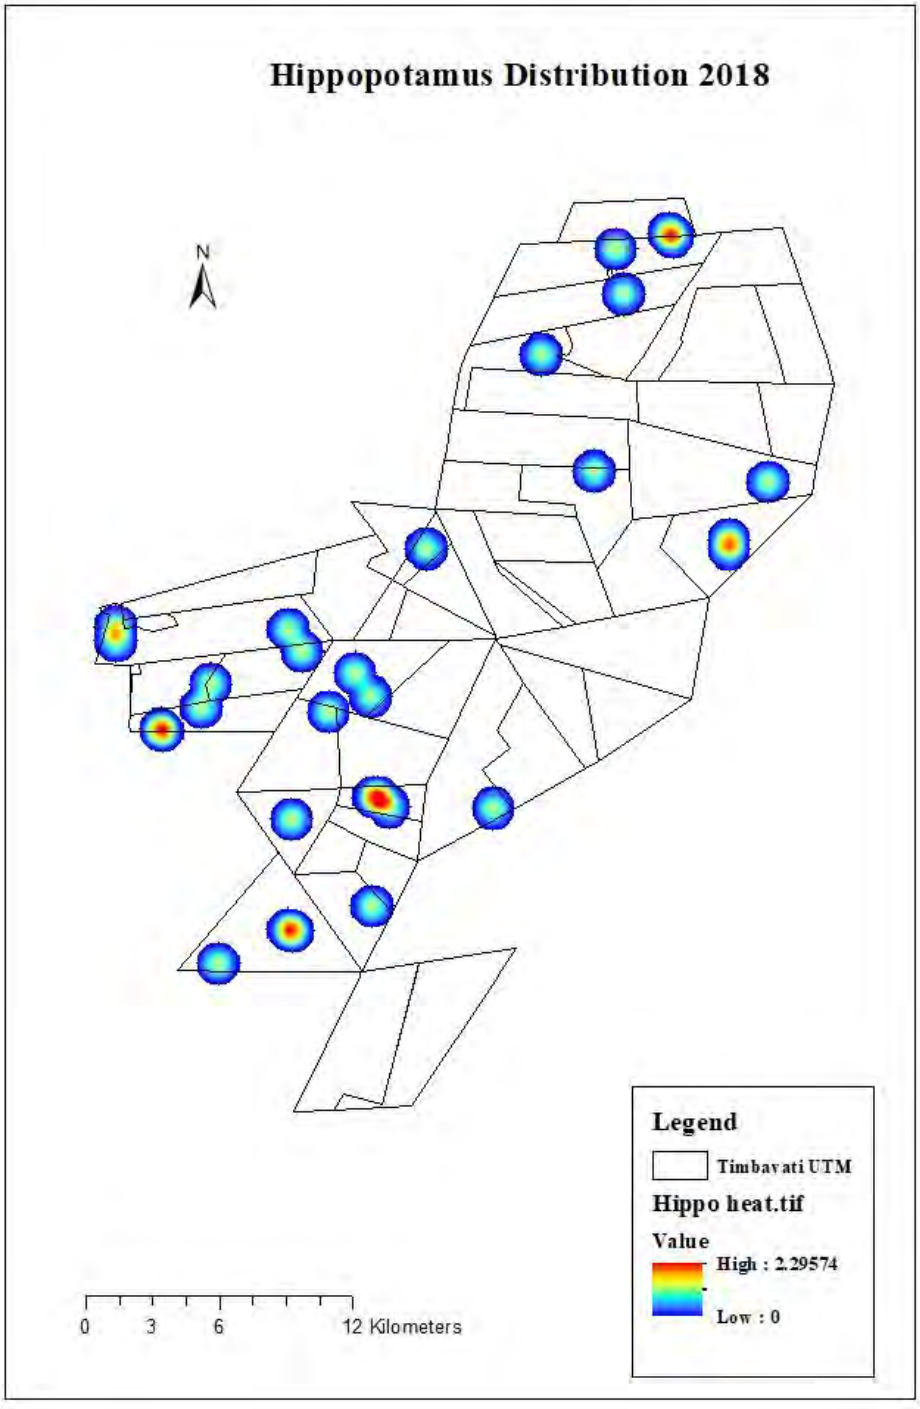
ANNEXURE 4: African elephant distribution during the 2018 aerial census.



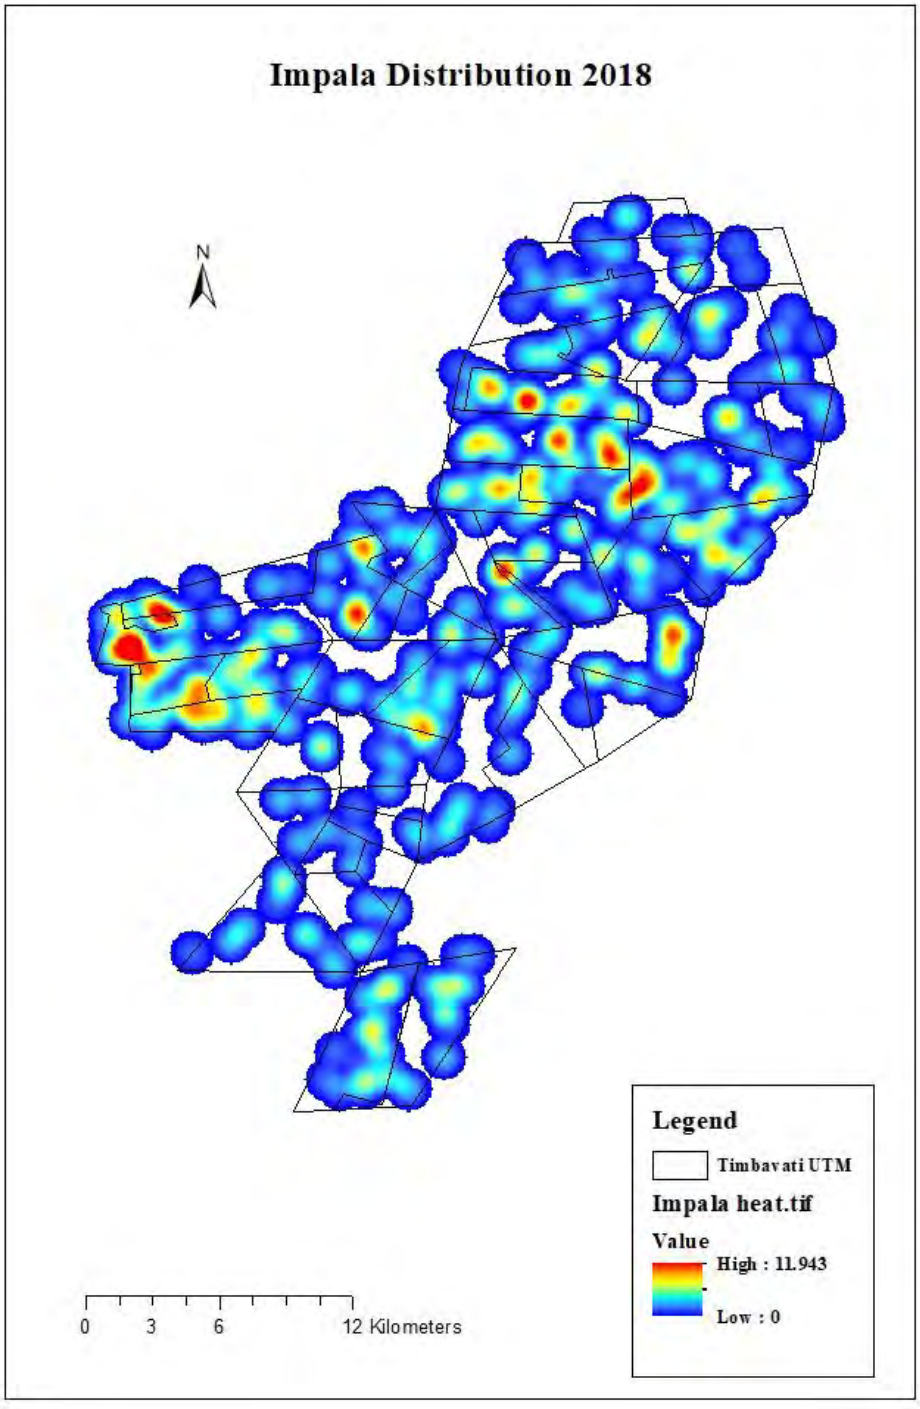
ANNEXURE 5: Giraffe distribution during the 2018 aerial census.



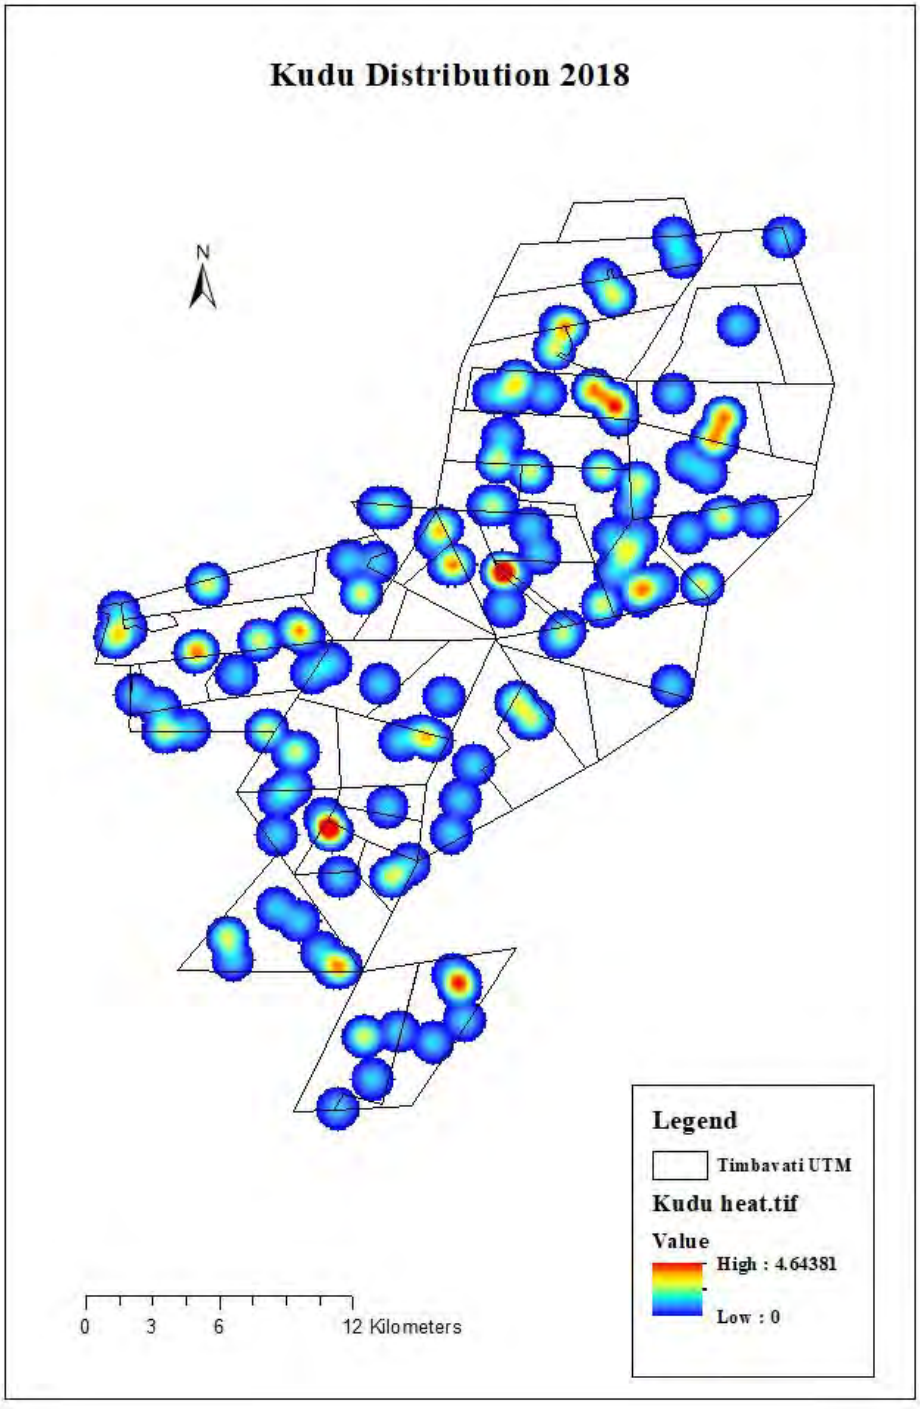
ANNEXURE 6: Hippopotamus distribution during the 2018 aerial census.



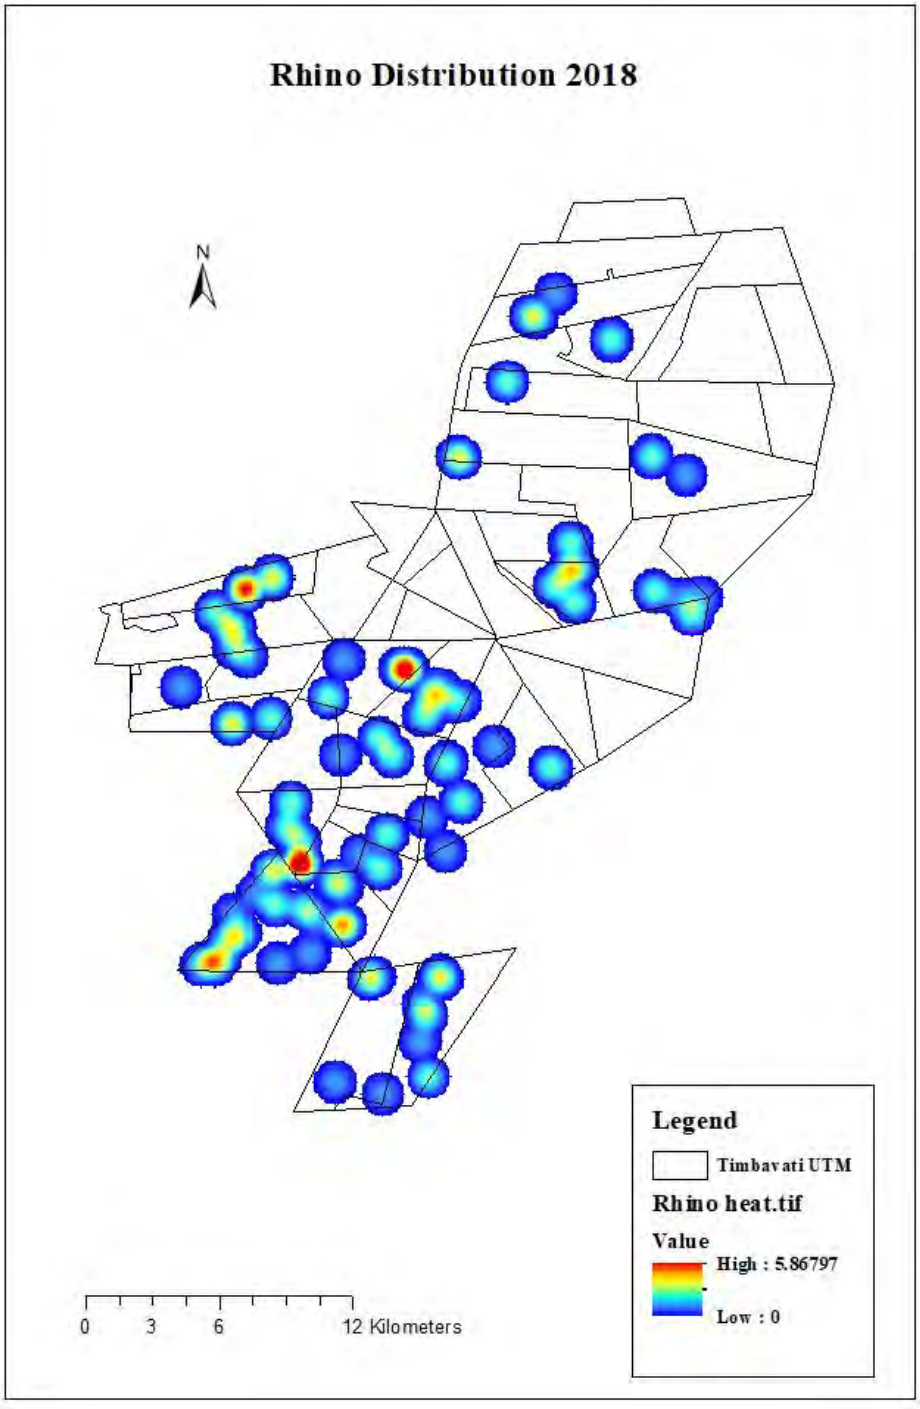
ANNEXURE 7: Impala distribution during the 2018 aerial census.



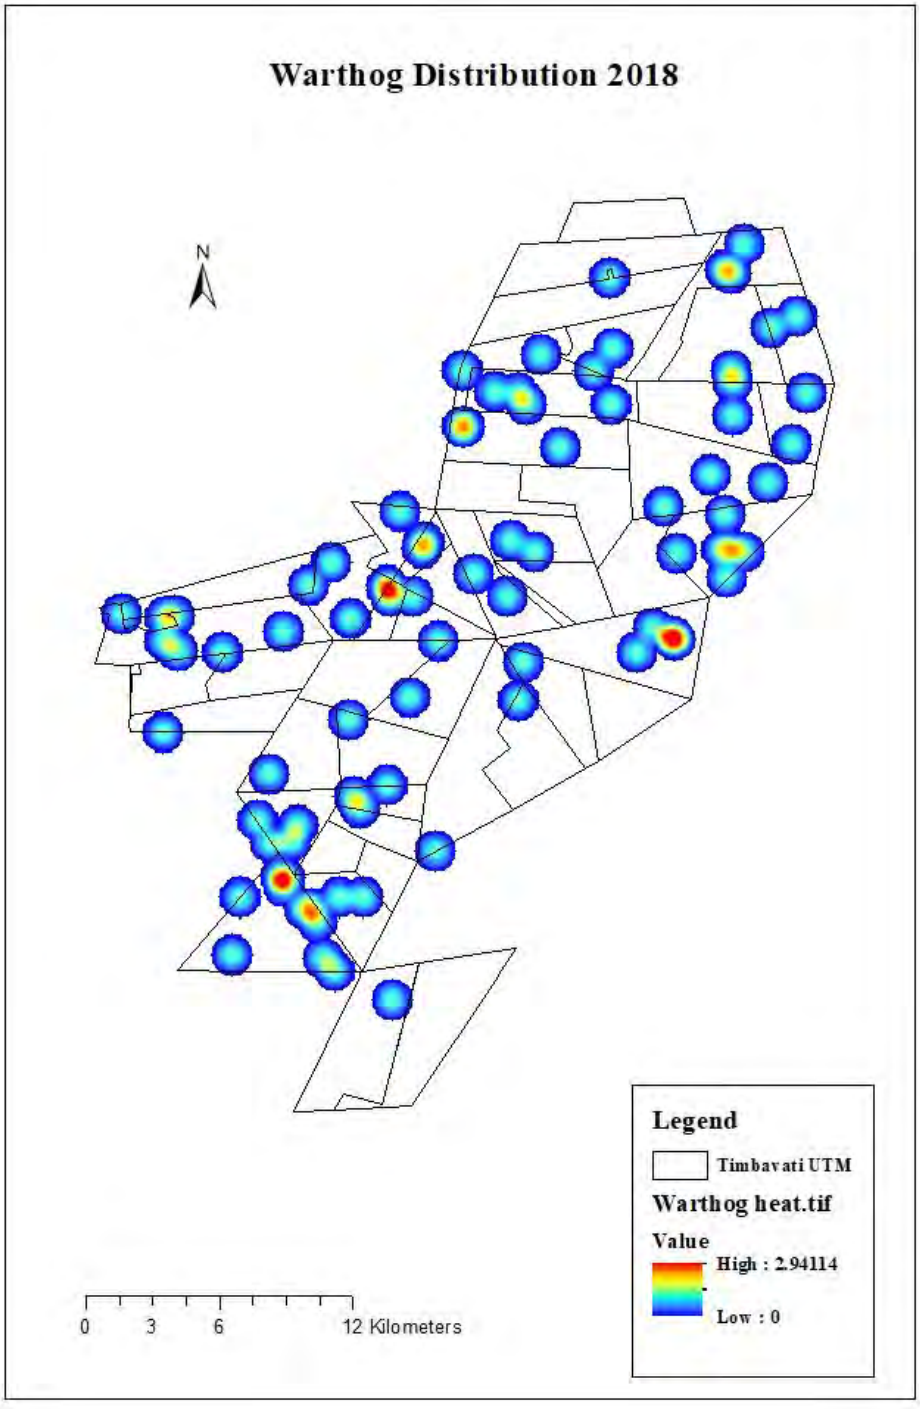
ANNEXURE 8: Kudu distribution during the 2018 aerial census.



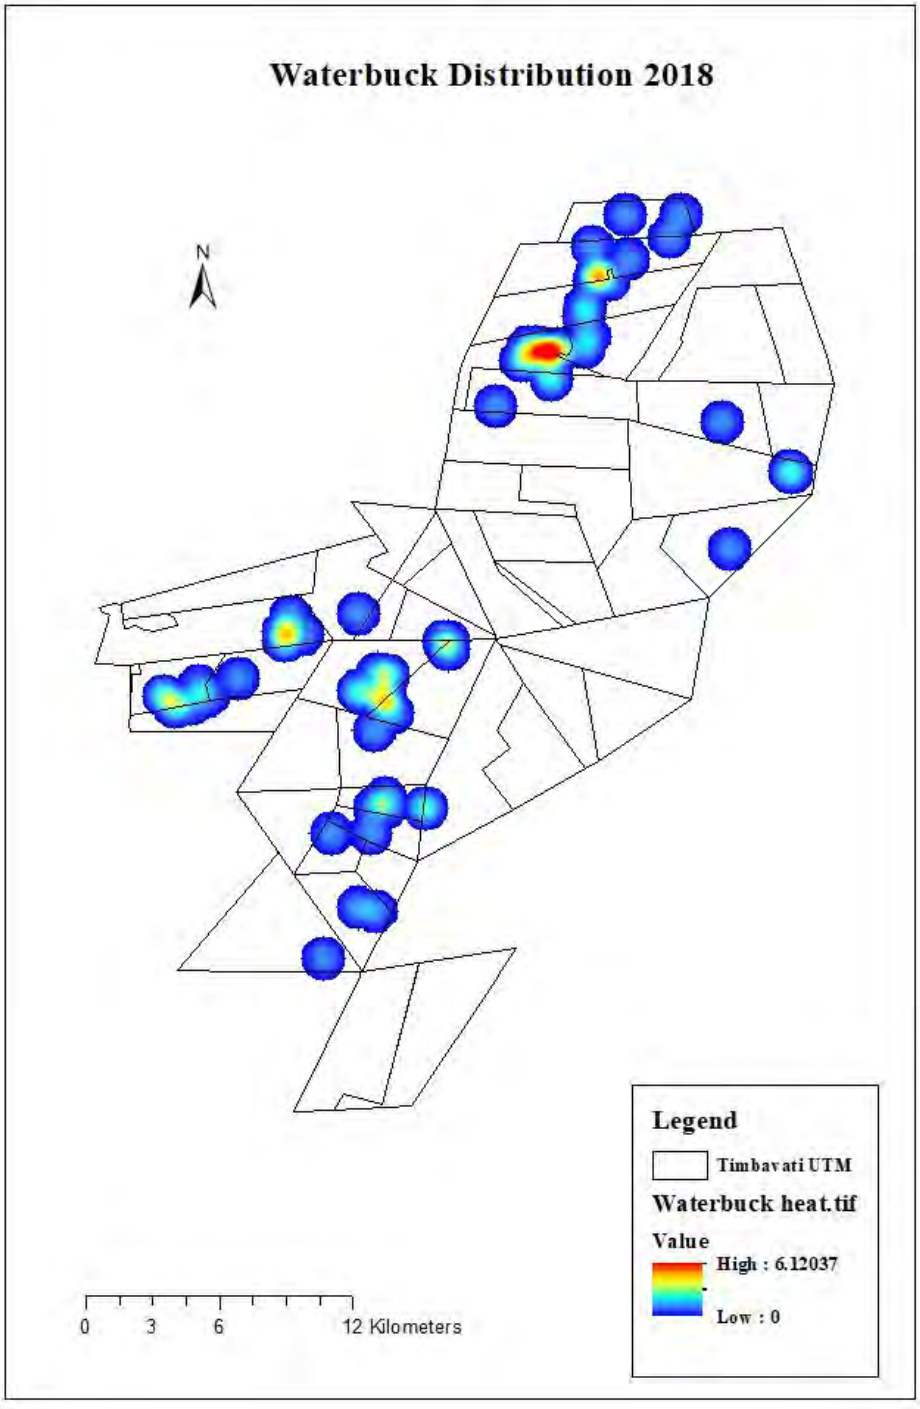
ANNEXURE 9: White Rhinoceros distribution during the 2018 aerial census.



ANNEXURE 10: Warthog distribution during the 2018 aerial census.



ANNEXURE 11: Waterbuck distribution during the 2018 aerial census.



ANNEXURE 12: Burchell's zebra distribution during the 2018 aerial census.

RE: Import Application of Republic of South African Elephant Trophy for Ray Penner

Dear Chief Cogliano:

Enclosed please find the permit application to import an elephant trophy from the Republic of South Africa for Ray Penner. Also attached to the permit application is enhancement information provided by the Mapungubwe Game Reserve. Please refer to the hundreds of pages of enhancement information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by South African authorities, outfitters, and others, in making an enhancement finding for Elephant trophy imports.

Please do not hesitate to contact us if you have questions about this permit application.

Sincerely,

John J. Jackson III

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III of the non-profit firm Conservation Force as my attorney and legal representative for all matters concerning my application for a permit to import a lawfully hunted Elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

In the case of a permit an ESA endangered listed species this is also a request for Ten Days Notice before the permit is issued so I and my attorney can know of approval as soon as those that may have opposed the issuance of the permit.

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Penner	Ray	A	

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b)(6) [redacted]			

Section B: Complete if applying as a business, agency, Tribe, or institution

2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes)
(b)(6) [redacted]

1.b. City	1.c. State	1.d. Zip code/Postal code	1.e. County/Province	1.f. Country
No. Newton	Kansas	67117	Harvey	USA

2.a. Mailing address (include if different than physical address, include name of contact person if applicable)
(b)(6) [redacted]

2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country
No. Newton	Kansas	67117	Harvey	USA

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].

2. Certification. I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
  - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
  - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
  - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

   N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   Conservation Force, 504-837-1233, cf@conservationforce.org

   Ray A. Penner (b)(6) [redacted]

   e-mail (b)(6) [redacted]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

☒ No ☐ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

   Genus: Loxodonta africana, common name: African Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

   N/A

   b. Date wildlife is to be hunted:

   N/A

   c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

   N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

   South Africa, Mapungubwe Game Farm. Alldays

   b. Date wildlife was hunted:

   June 2, 2018

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Somerby Safaris
P.O.Box 141
Kestell 9860 South Africa
VAT No. 4960222968

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Universal Trophy Services
Plot 114
Bashewa, Pretoria, 0056
South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Rupert DeKock
Business Name: Universal Trophy Services
Address: Plot 114
City: Bashewa, Pretoria, 0056
State/Province:
Country, Postal Code: South Africa

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

See Attached

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

I do not know how the funds were used
I Paid $35,000 US Dollars for the hunt.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

See Attached

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: N/A Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: (b) (6) Date: 11/17/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Conservation Force v.5/8/18
Operator Enhancement Questionnaire

1. Name of area operator: Mapungubwe Game Reserve

   a. Years in business: 24 years

   b. Name of company conducting hunt: Mapungubwe Game Reserve

   2. Name of concession: Mapungubwe Game Reserve Size in km^2: 250

   a. Land tenure: __ Government lease __ Community X Private ranch __ Private conservancy

   b. Length of concession agreement: N/A Can it be renewed? __ Yes __ No

   c. Length of renewal, if applicable: N/A

   d. Estimated total amount received in trophy fees last year, if applicable: $ 210 000

   e. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain: _ Approved Management plan by Nature Conservation and annual report.

   f. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Alldays Limpopo Province. See attach Map

   g. If the concession borders a national park, please provide the park name: _ Mapungubwe Nat Park

   h. Description of general and distinctive habitat features and any water features: Mopane bushveld with 3 big dams

3. Are there any communities living in the concession? No

   a. If so, estimated number of people or villages in the concession? N/A

4. Are there communities bordering this concession? No

   a. If so, estimated number of people or villages around the concession? N/A

5. Relevant game populations in the concession:[1] See attached documents

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/ down/ stable)	How monitored?
Elephant				
Lion				
Leopard				
Prey species				

6. Total employment number: 11

   a. Please identify the number and type of all employees:

[1] The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	3	3
Trackers	4	4
Anti-poaching scouts/rangers		
Other anti-poaching	4	4
Cooks/housekeepers	6	6
Community coordinators		
Managers	1	1
Biologists	See Attached	
Others: _____		

7. Number of staff employed in the off-season: _____

   a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff			
Managers			
Maintenance	4	4	Winter
Road opening/construction	7	7	Winter
Community relations personnel			
Others: _____			

8. Anti-poaching efforts:[2]

   a. Number of anti-poaching staff: All staff are used for anti poaching when needed but full time 4

   b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? Both

   c. Months during which anti-poaching patrols are conducted: 12 months

   d. Number of anti-poaching patrols per month: Full time

   e. Description of anti-poaching equipment, vehicles, etc.: Nissan 4x4, clothing camouflage, Binoculars

   f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? Manager

   g. Do you offer rewards to poaching informants leading to arrest? Yes

   h. Do you offer rewards to poaching informants upon conviction? Yes

[2] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

i. Please describe the company's anti-poaching expenditures below. What currency are the expenditures given in? _____

Type of expense	Spending 2015	Spending 2016	Spending 2017	Remarks
Salaries for anti-poaching scouts	R120000.00	R120000.00	R172800.00	
Equipment	R15000.00	R15000.00	R38000.00	Got donations in 2015/16
Vehicles	R110000.00	R160000.00	R234000.00	
Petrol	Not Available	R96 000.00	R156000.00	
Rewards paid	Not available	R27 000.00	R13 000.00	
Other: _____				
Other: _____				
TOTALS				

9. Anti-poaching results:

Category	2015	2016	2017	Remarks
Poaching incidents discovered	seven	eleven	Three	
Elephant carcasses observed	none	none	none	
Lion carcasses observed	none	none	none	
Leopard carcasses observed	none	none	none	
Ivory poachers arrested	none	none	Three	Stole legal ivory Polygraph
Meat poachers arrested	seven	eighteen	four	
Other poachers arrested	eight	Thirty seven	four	Mainly illegal fishing
Poachers convicted	three	Thirty seven	four	Poachers fined
Snares/gin traps collected	187	347	123	Mainly along Orchard
Firearms confiscated	none	none	none	
Vehicles confiscated	none	one	none	
Bicycles confiscated	none	none	none	
Boats/nets confiscated	14	6	15	Nets
Tusks recovered				Tusks never recovered
Other: _____				

10. Community investment:[3]

a. Does the company contribute money or goods/services to local communities? Yes

b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)? We built and maintain Orphanage voluntary in Alldays Attached documents

[3] The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers community investment a "conservation benefit."

c. Does the company provide game meat to nearby communities? Yes our orphanage feed 162 children

d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: Monthly basis. In hunting season 80% of carcasses

e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe. N/A

f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in? N/A

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant				
Lion				
Leopard				
Other				

g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? Orphanage in Alldays See Attached

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)				
Education (e.g., school fees, supplies)				
Health (e.g., clinics, offices)				
Health (e.g., medical salaries, equipment)

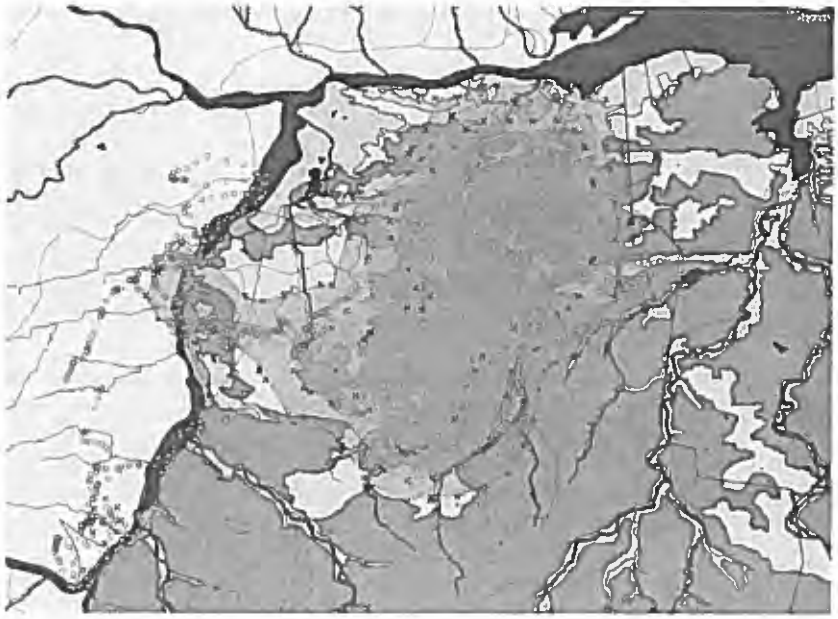
DETAILS OF ELEPHANT COLLARED ON MAPUNGUBWE GAME RESERVE

Collared elephants

Satellite collars are used to gather information on herd structure, dynamics, movement and splitting/merging of groups; In the NTGR , 5 cows and 1 bull have been fitted with a satellite collar of which unfortunately only one collar still works today (referred to as Tuli 2). In VLNR one elephant cow has been collared in September 2011 and whose collar is still functional at present. **Since the 7th of May 2012, a new female elephant has been collared on the Mapungubwe Game Reserve called "LEILA". This elephant Cow is part of a herd of 55 animals.**

The following are the movements of the elephant "LEILA" over one year period, 1 May 2012 till 1 May 2013, send by the Satellite Collar every 30 minutes



As the results show, this group stay on Mapungubwe Game reserve for more than 11 months of the year, where they would stray into Botswana for small periods.

ELEPHANT AERIAL CENSUS OF THE CENTRAL LIMPOPO RIVER VALLEY, SOUTHERN AFRICA REPORT SUMMARY SEPTEMBER 2012

Research Synopsis

In recent times, more and more questions have been asked on whether an increase in elephant numbers will lead to the ultimate destruction of an area.

Elephants are perceived to be a keystone species that determine the structure and composition of their habitats. This contention has in turn lead to claims that elephants at high numbers pose a threat to biodiversity in the conservation areas in which they occur. Little, however, is known on how elephant populations are limited and how co-existence between elephants and trees was achieved in the past. In order to understand elephant and tree dynamics a reliable understanding of what environmental and social factors influence elephant movements and the occupancy of different habitats is needed. This has led to the initiation of the Central Limpopo River Valley elephant research project in 1999 and is an ongoing program.

Since 2000, as part of the project six total aerial counts of the elephant population has been conducted to determine their range and numbers. In recent years the development of the Greater Mapungubwe Transfrontier Conservation Area, developing agriculture, mining, dam construction and increased human densities in the region, have influenced the range and the movements of elephants within the region.

Since 2005, increasing numbers of elephants have moved into Mapungubwe National Park and on several properties in South Africa where fence breakages between properties are reported on a near weekly basis. Extensive poaching and control hunting is also being reported and could influence population numbers and movements dramatically. Aerial surveys provide information on numbers, group structure and distribution that are important baseline data pertinent to basic ecological questions and conservation planning and management.

Methodology

This year's aerial survey of the area was undertaken on the 9th and 10th September 2012.

The methodology was similar to those of previous years. Three fixed wing airplanes (Cessna 206; two C182T) were used to count the study area simultaneously. A team consisting of a pilot, navigator and two observers on each side of the plane were used.

On day one the Northern Tuli Game Reserve (Botswana), the Tuli Block from the Motloutse River to Zanzibar and Sentinel Ranch, Nottingham Estate, River Ranch (Zimbabwe) were counted. On day two the Tuli Circle in Zimbabwe and Mapungubwe National Park, Mapungubwe Private Reserve and farms bordering the Limpopo River in South Africa were counted.

A herd of elephants seen from the airplane.

Results

During the 2012 count a total of 1291 elephants were counted.

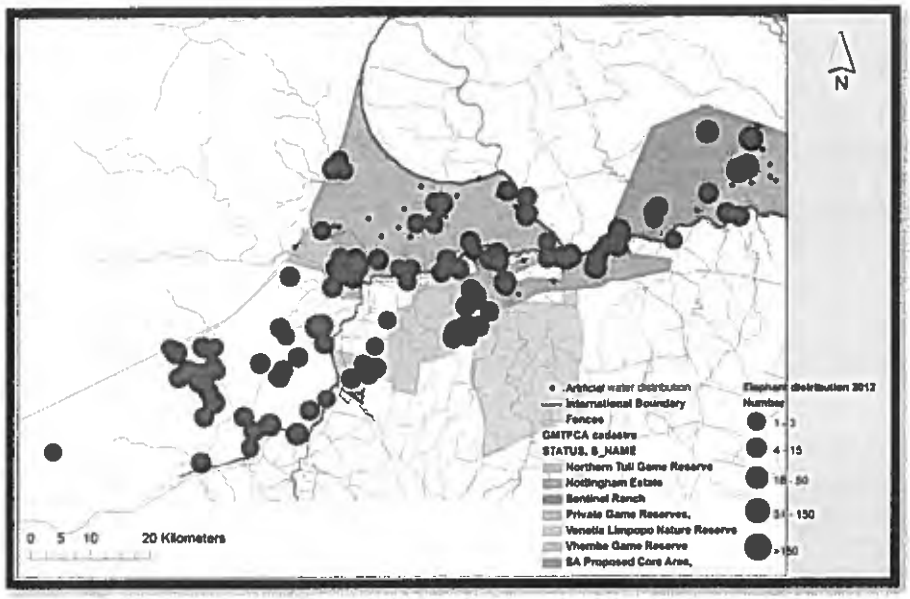


Figure 1: Elephant distribution and group sizes during the September 2012 total aerial count conducted in the Central Limpopo River Valley

Management Area	Total Counted						
	Aug 00	Jul 01	Oct 04	Jun 07	Aug 08	Sep-10	Sep-12
Botswana - NTGR	512	877	291	603	476	461	320
RSA - Mapungubwe National Park	0	10	2	115	33	210	127
RSA - Farms	5	5	5	0	53	72	123
Zimbabwe - Tuli Safari Area	57	0	0	3	0	0	0
Sub total	574	892	298	721	562	743	570
Botswana - BDMRF	373	288	522	244	636	190	368
Zimbabwe - Nottingham & Sentinel	170	104	20	115	31	304	353
Zimbabwe - Zhove Dam	0	0	*250*	0	0	0	0
Sub total	170	104	270	115	31	304	353
Shashe Riverine	120	10	0	0	0	0	0
Botswana - Letsibogo Dam	25	0	150	0	0	0	0
Botswana Communal Area	0	0	0	0	0	0	0
Sub total	145	10	150	0	0	0	0
TOTAL	1262	1294	1240	1080	1229	1237	1291

Table 1: Comparison of the results of the seven total aerial counts of the Central Limpopo Valley elephant population. NTGR – Northern Tuli Game Reserve, MNP – Mapungubwe National Park, TSA – Tuli Safari Area, BDMRF – Baines Drift to Motloutse River Farms, SNRC – Sentinel Ranch, Nottingham Estate, River Ranch Complex, LDNS – Letsibogo Dam and Northern Shashe Area, MTRR – Motloutse and Thune Riverine

The overall elephant distribution remained very similar between counts. Numbers of elephant south of the Limpopo River have increased steadily since 2007, while numbers within the Tuli Block west of the Motloutse River and the Northern Tuli Game Reserve fluctuate between years. The total number of elephants counted within the study area further remains 1200 – 1300, indicating that at least for the dry season this population remains stable. Group sizes are strongly correlated to rainfall with a higher number of small groups within years with low rainfall and fewer but larger groups in years with high rainfall.

RAHMQVIST FOUNDATION CENTRE

"'All children are entitled to a good start in life with care and a safe shelter. I therefore founded Rahmqvist Foundation in order to build and run an orphanage, to give homeless and vulnerable children a safe place to grow up in."

LEIF RAHMQVIST
Founder and Protector

BACKGROUND

Close to my ranch Mapungubwe Game Reserve, in South Africa there is the town of Alldays. It is a small country town with lots of poverty, homelessness, unemployment and disease. There are many children having lost one or both their parents to AIDS and other diseases. The children are often living in very vulnerable situations, without any adult care. Their one meal a day they get by a Drop-In Centre run by local women. This is not the way children shall live! All children are entitled to a good start in life with shelter and proper care! I therefore founded Rahmqvist Foundation in order to build and run an orphanage to give children a place where they can be safe, get enough to eat, hygiene, health care, education, a bed of their own and not at least to play.

More about us

ORPHANAGE

To strengthen the orphanage organization we are establishing a partnership with Norsa Community Care.

Read more

SKILL SCHOOL

We are now taking the next step in the project through the start-up of Rahmqvist Foundation Skill School. The skill school will offer young people leaving school a professional training to be bricklayers, seamstresses, bakers, chefs, masseuses or hairdressers. We have successfully trained two courses of four woman each to became seamstresses, six chef's and still full time training for 2018

Read more

WANT TO HELP?

Rahmqvist Foundation Centre is a charity project. We feed 162 children every day, with meat harvested from my ranch Mapungubwe Game Reserve by local and foreign hunters. Extra funds raised go directly to the Centre and to the benefit of the children. We are extremely grateful for all contributions, large and small, from individuals, businesses, organizations, schools and others!

RE: Import Application of Zambia Elephant Trophy for John Ferguson Jr.

Dear Chief Cogliano:

Enclosed please find the permit application to import an elephant trophy from Zambia for John Ferguson Jr. Also attached to the permit application is enhancement information provided by the Kwalata Safari Company including a map of the area where the hunt will take place. Please refer to the hundreds of pages of enhancement information Conservation Force previously submitted to the U.S. Fish and Wildlife Service, as well as information submitted by Zambian authorities, outfitters, and others, in making an enhancement finding for Elephant trophy imports.

Please do not hesitate to contact us if you have questions about this permit application.

Sincerely,

John J. Jackson III

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III of the non-profit firm Conservation Force as my attorney and legal representative for all matters concerning my application for a permit to import a lawfully hunted Bull Elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that the attorney, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual

1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
Ferguson	John	Wayne	Jr.

2. Date of birth (mm/dd/yyyy)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address
(b) (6)			

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (dba)		
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title	6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address)

(b) (6)

1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Colorado Springs	Colorado	80908	El Paso	United States

2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)

2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount of $100, nonrefundable processing fee**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 100

E. IMPORT OF SPORT-HUNTED TROPHIES *(Appendix I of CITES and/or ESA)*

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:
(1) Is raw, processed, or manufactured;
(2) Was legally obtained by the hunter through hunting for his or her personal use;
(3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
(4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
(i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
(ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
(iii)The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

---

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

   N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

   John J. Jackson III, (504)837-1233, JJJ@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes ____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

   a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Genus: Loxodonta africana, common name: African Elephant

   b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Zambia, Area: Lower Lupande GMA, Region: South Luangwa, City: Mfuwe.

   b. Date wildlife is to be hunted: September, 2019

   b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Kwalata Safaris, Zambia - Werner Van Noordwyk, Professional Hunter: See report.

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

   a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

N/A

   b. Date wildlife was hunted: N/A

   b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

N/A

   c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

N/A

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). I have not yet hunted and do not currently hold any such permits or licenses.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:	EMIAC World-Wide
Business Name:	P.O. Box 753
Address:	Kelvin 2054
City:	Sandton
State/Province:	Republic of South Africa
Country, Postal Code:	

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

   a. Do you have any information regarding the population status or trend data on the species hunted?

   See materials provided by Zambia, Conservation Force, and Attachments

   b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

   With trophy and government fees the hunt will be between 40k-45k.

   c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

   Yes, I have included a Kwalata Safaris enhancement report with this application.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

    Taxidermist/Broker's signature: _____ Date: _____

11. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

    I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

    Applicant's signature: _(b) (6)_ Date: 11/21/18

    Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

KWALATA SAFARIS, LTD.
Address, 6980 KATANGA ROAD LUSAKA
Operator email: kwalatapeter@yahoo.coml

I. DESCRIPTION OF COMPANY AND CONCESSION

Kwalata Safari Company, Ltd. has been operating in Lower Lupande Concession since APRIL 2002. The concession provides habitat for a range of species including buffalo, lion, hippo, kudu, leopard, elephant, impala, bushbuck, hyena, warthog, zebra, giraffe, and waterbuck. Our concession is about 1511 kilometre squared and is in the South Luangwa Safari Area.Lower Lupande is rated under Zambia Government Legislation as one of the Prime Hunting Blocks in Zambia due to the abundance of wild life and cats. We have a lease with the Wildlife Authority for seven years renewable which started in 2015 after the new allocations of hunting blocks in Zambia with the new Government.

The company is a partnership between Peter Chipman and Zaeed Patel and has been operational for more than fourteen years. We employ three professional hunters, four game trackers, ten anti-poaching scouts and eight camp staff (cooks, cleaning, miscellaneous). Altogether our operations support at least 100 dependents in local villages apart from the local employed camp staff and scouts.

We have a written concession plan with anti-poaching and community components.

II. ANTI-POACHING COMPONENT

Kwalata Safari Company maintains two five-man anti-poaching teams at an annual cost of over $25,000. Each team is equipped with a four-by-four vehicle, a motorbike, uniforms and boots, tents, rations, and a satellite phone. Our teams closely cooperate with the Wildlife Authority to conduct almost daily patrols of the concession and the border of the South Luangwa National Park. We supply rations at least twice per month to the government game scouts to ensure they are sufficiently equipped for the patrols as well as transport support and more over and above the above mentioned amount per year.

Our contract with the local community requires that part of the revenues paid to the community be used to fund at least six community game scouts, and additionally we supply rations at least twice per month to these scouts.

We heavily patrol our area, conducting approximately one patrol per day by vehicle and foot. In 2017, our teams picked up about 508 snares and 51 gin traps. Removing snares protects the lion population by reducing incidental snaring. Over the past year we arrested more twenty two poachers, confiscated eight muzzle loaders from them. We also found some evidence of illegal lodging,

WIRE SNARES RECOVERED BY OUR ANTI-POACHING TEAM

IN THE PICTURE ABOVE POACHERS TRAPPED AN IMPALA USING WIRES

If needed, we subsidize the government game scouts. Every month we provide one week's rations to support a dozen Wildlife Authority scouts and contribute $500 in Fuel to the Wildlife Authority.

We also send out road crews approximately every two weeks to check the condition of the roads in the concession, to ensure we are able to patrol effectively.

In 2017 Kwalata Safari Company spent almost $61200 in our blocks on anti-poaching patrols, equipment, and assistance to the Wildlife Authority and community scouts, including by providing 7350 liters of diesel for patrol vehicles. We recorded 363 patrol days and well above 2000 patrol hours. And made over $4200 in payments of rewards. A breakdown of spending on anti-poaching is below.

Item	Spend (USD)	Notes
Scout salaries	25,600	Directly paid and some subsidies to WA
Scout equipment	9000	Clothing, vehicles, rations, phones, tents, etc.
Diesel / petrol	12300	For scouts and WA
Rations for WA and community scouts	8100	
Rewards	6200	For information and arrests
TOTAL	**$61,200**	

Our concession agreement requires that we have an anti-poaching program/plan and report about it to the Wildlife Authority. The Wildlife Authority considers our contributions in determining whether to renew the concession.

III. COMMUNITY PARTICIPATION

A. Community Assistance Component

. We make contributions to the TWO closest villages which are Malama and Kakumbi.

We pledge an annual contribution of at least $15000 in projects to each of two villages. And in return ask for a list of preferred projects of which we develop a work-plan in consultation with village leaders. In 2015 we funded and supplied the following projects at each village's choice:

Village	Projects	Amounts (USD)
Village 1	Funded a sensitization campaign against poaching which was followed up by a workshop for Community Leaders and Parks Employees	13,300
Village 2	Contributed to the eradication of cholera which hit the community	10,010
	Graded the roads leading to the chief palace and Parks offices	5,300
	TOTAL	$28,610

In addition to these direct contributions, we pledge to distribute at least 50% of game meat harvested to the villages. The villages have the choice to eat the meat or sell it.

Our concession agreement requires we have a community assistance program/plan and report on the program to the Wildlife Authority. The Wildlife Authority considers these contributions in determining whether to renew our lease.

IN THE PICTURE ABOVE A SENSITIZATION WORKSHOP GOING ON WITH MEMBERS OF THE COMMUNITY AND DEPARTMENT OF NATIONAL PARKS

B. FUNDS FROM CLIENTS

We also maintain an approximately $12000 fund of client donations which we use for community compensation. Elephants usually destroy crops for the villages and these funds assist to compensate the villagers for losing their crops. This way villagers are encouraged not to poach any animals for food which results in a lot of prey for predators to hunt.

IV. HABITAT PROTECTION AND CONSERVATION DEVELOPMENT

We have enhanced water infrastructure for wildlife in our concession by maintaining four pans to increase water supply and carrying capacity of the concession which gives allot of Antelope Species for Lion/Leopard food chain and habitat for their sustainable and healthy survival.

V. OTHER INFORMATION

A. Prey Base

Kwalata Safari Company's anti-poaching efforts, water provision, and fire management have allowed the lion prey base in our concession to grow over the past five years. We estimate that our Bufallo and Plains Game populations to keep increasing at a rate of 15-20% per annum. In 2014 our Wildlife Authorities flew over the Game Management Areas in a large-mammal survey and counted more than 1000 buffalo on average.

B. Lion Population Tracking

Lion are notoriously difficult to survey or census. To track the lion population trend in our concession, Kwalata Safari Company maintains a lion sightings record in form of camera pictures taken as well as trail camera pictures, sightings, spoor and footprints on individual, groups and passing through cats. Because we keep tabs on the lion in our concession, we are assured that the regulated, limited off take is sustainable. Our wildlife Authorities have also provided us with a data recording sheet to use on all Lion/Leopard Safaris as of 2015 to take record of sightings and record the activities on the specific safari being done.

C. Lion Aging Approach

Kwalata Safari Company has been following an age-based policy for African lion trophies since 2015, when we adopted this Policy after a mutual agreement with our wildlife Authorities and to be conservative in estimating age.

Further the Department of Parks has introduced punitive measures to both the Professional Hunter and the Safari Outfitter who hunts any Lion below five years.This has lessened the careless hunting of Lion under five years because of these strict adhereance rules.The punitive measures include suspension of the Professional Hunters'License and cancellation of the lease agreement for the Safari outfitter with the Department of National Parks.

D. ELEPHANT HUNTING

Our Wildlife Authorities have put up a policy not to Harvest any Elephant that has its tusks weighing less than 15 kilograms.In view of this our Professional Hunters are so selective when Hunting Elephant by ensuring that they comply with this agreement.The wildlife authorities have put up stringent measures to any Professional Hunter who goes against this rule which may even Include withdrawing his Professional Hunting License.

E. U.S. Hunters

Most of our clients are from the United States. These hunters have a conservation ethic and usually contribute above their fees to anti-poaching or our community compensation fund or community assistance programs.

CONCLUSION

Kwalata Safari Company's regulated, sustainable-use based hunting program enhances the survival of the lion and Elephant. Our program helps to preserve and improve available lion and Elephant habitat. Our anti-poaching program serves to protect and grow the lion's prey base and reduces incidental take of lion by meat poachers. And our community participation and assistance program demonstrates the potential value of wildlife (especially lion) to local communities. Recognizing this value causes the communities to want to protect their wildlife and reduces human-wildlife conflicts.

To:'John J. Jackson, III' <jjj@conservationforce.org>

Hallo John.

Good to hear from you Sir.

Find attached the Map of the Zambia hunting concessions.
You will find Lower Lupande on the Eastern Boundary of the South Luangwa National Park just below the town called Mfuwe.

Let me know if this Map is good and will help for you.

We could use this Map probably for all our concession applications when we reply with you all for our areas and if it would help I can send you our concession names that we have for future references.

Best Regards and all the best for the weekend ahead.
Werner.

Subject: John Ferguson - Elephant Hunt

Mr. Noordwyk,

Can you please provide Conservation Force with a map of the location of the hunt for John Ferguson? We will need to provide this for USFWS on the permit application. Also, thank you for providing an operator enhancement report.

Thanks,

John

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit.** If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; http://www.fws.gov/international/permits/by-form-number/index.html) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: Zambia, Chikwa Hunting Block, Luangwa Valley, Eastern Province Nearest Town - Lundazi
   b. Date wildlife is to be hunted: 7/23/16 - 8/21/16
   c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
   a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:
   b. Date wildlife was hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Michael W. Borman
Business Name: Bangweulu Taxidermy Ltd
Address: 4142/K Chifwema Road
Address: New Kasama
City: Lusaka
State/Province: Lusaka Province
Country, Postal Code: Zambia

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

e information attached with this application and the information submitted by Za

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national,** provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, can

Applicant's signature: (b) (6) Date: 9/25/16

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from http://www.fws.gov/le/designated-ports.html. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

    ☐ If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):
    John J. Jackson or Regina Lennox, 504-837-1233, jjw-no2@att.net or regina.lennox@conservationforce.org

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

    ☐ Yes ☑ No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my application for a permit to import an African elephant trophy and an African lion trophy from Zambia.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my lion trophy at the following address:

John J. Jackson, III
Regina Lennox

MEMORANDUM

To: Chief, Division of Management Authority

From: Chief, Division of Scientific Authority Rosemarie Gnam

Subject: General Advice on Importation of Sport-hunted Trophies of African Elephants taken in Zambia in the Calendar Years 2016 and 2017

This General Advice represents our Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) finding for permit applications that you have received, or may receive in the future, for the import of sport-hunted trophies of African elephants (*Loxodonta africana*) taken in Zambia in the calendar years 2016 and 2017.

Please be advised that, based on the available information as of the date of this finding, we are able to determine that the importation of sport-hunted trophies of African elephants taken in Zambia in the calendar years 2016 and 2017, will be for purposes that are not detrimental to the survival of the species. This General Advice applies only to African elephant sport-hunted trophies lawfully taken in Zambia during calendar years 2016 and 2017 (i.e., January 1 through December 31), provided that they are to be imported by the persons who hunted them for personal use or personal display.

This finding is based on the best available biological information and is made consistent with the requirements at 50 CFR § 23.61. In making this finding, the U.S. Fish and Wildlife Service (Service) reviewed the pending applications to import sport-hunted trophies of African elephants taken in Zambia in 2016 and 2017 for any new or additional information to consider. The Service also considered trade information, including trade demand, and other scientific management information available to the Service on the status and management of African elephant populations in Zambia.

This finding does not establish any conditions that must be satisfied for a permit to be granted. The Service monitors the status and management of African elephant populations in Zambia and retains discretion to replace this finding at any time when it no longer reflects the best available biological

information consistent with the requirements at 50 CFR § 23.61. In addition, this finding is subject to new analysis in the context of individual permit applications for import of sport-hunted trophies of African elephants taken in Zambia. The Service reviews and evaluates each individual application to determine whether it includes new or additional information regarding the status of elephants in Zambia such that the requirements of 50 CFR § 23.61 are satisfied. Each application for import also needs to meet all other applicable permitting requirements before it may be granted.

BASIS FOR ADVICE:

On July 23, 2012, we issued a General Advice on the import of sport-hunted trophies of African elephants from Zambia for the calendar year 2012. However, since the Government of Zambia suspended elephant hunting between 2013 and 2014, and we did not receive any application requests to import African elephant sport-hunted trophies taken in Zambia in 2015, we have not made findings for the import of sport-hunted elephant trophies from Zambia since 2012.

In 2015, the Service was informed that the Government of Zambia planned to lift the suspension of the elephant sport-hunting program in Zambia for 2015. On March 4, 2015, the Service sent a letter to the Zambia Wildlife Authority (ZAWA) seeking confirmation on whether Zambia had decided to open a sport-hunting season for elephants in 2015, and if so, asking Zambia to please provide the information we requested to assist us in making our required findings. On April 30, 2015, we received a response from ZAWA to our March 4, 2015, letter, which noted the conclusion and adoption of the National Policy and Action Plan on Elephant Management in Zambia and Management Plan, the rationale for the suspension of the elephant sport-hunting program in Zambia from 2013 to 2014, and the 2015 elephant sport-hunting quota declared to CITES (ZAWA *pers comm.* 2015). In addition, Zambia provided a copy of their "Enhancement and Non Detriment Findings for African Elephant Sport Hunting in Zambia (March 2015)," as well as a document regarding their "Response to USFWS/EU Questions on Zambian Elephant Hunting 2015" to address the questions we posed in our March 4, 2015, letter.

On December 22, 2015, ZAWA sent the Service additional information regarding African elephants in Zambia, including the following documents:

- Possible Explanation for the Elephant Increase in the Kafue Area;
- Revised version (July 2015) of the "Enhancement and Non Detriment Findings for African Elephant Sport Hunting in Zambia;"
- Preliminary Report of the Dry Season Survey of Large Herbivores for Kafue and Luangwa Ecosystems (2013); and
- 65th CITES Standing Committee Meeting Summary – 7 to 11 July, 2014.

In February 2017, the Service hand-delivered a letter to a Department of National Parks and Wildlife (DNPW) official dated January 30, 2017, requesting any new and updated information regarding the management and conservation of elephants in Zambia, including information concerning the distribution, status and trends of African elephant populations in Zambia, and the sustainability of offtake. On March 31, 2017, the Service received a response from DNPW to the

questions outlined in our January 30, 2017, letter, as well as information regarding their 2016 Non-Resident Hunting Quota.

We also received additional information from other sources, all of which is referenced within the text of this document. The new information received from the Government of Zambia and other sources are discussed below as they relate to our finding for sport-hunted trophies of African elephants taken in Zambia in the calendar years 2016 and 2017.

Conservation and Management

1. African elephants are distributed in seven sub-regions throughout Zambia, including the Luangwa Valley, Mid/Lower Zambezi, Kafue, Mosi oa Tunya, Sioma - upper Zambezi, Bangweulu, Nsumbu – Mweru wa Ntipa, Lusenga – Tanganyika, and West Lunga (CoP15 Prop. 5). Zambia's CoP15 proposal notes that each sub-region exceeds 10,000 square kilometers (km^2) in area, and that the total area far exceeds 200,000 km^2. Zambia's Protected Area (PA) network covers 30% of the country (224,075 km^2) and currently falls under the responsibility of the Department of National Parks and Wildlife (DNPW). This includes 20 National Parks covering over 63,587 km^2 (28%) and 34 Game Management Areas (GMA) covering over 160,488 km^2, or 72% of the country's PA network (Nyirenda et al. 2008 and IUCN 1987, as cited in CoP15 Doc. 68 Annex 6b; Zambia Tourism 2017). Most GMAs are inhabited by rural farmers and either surround National Parks or are adjacent to them (CoP15 Doc. 68 Annex 6b). According to the Government of Zambia, "protected areas in Zambia are managed to ensure minimal disturbance and to ensure the maintenance of biodiversity through research and monitoring of key environmental parameters and the provision of security through anti-poaching work by wildlife protection units" (CoP15 Prop. 5).

2. In Zambia, the Ministry of Tourism and Arts has jurisdiction over its National Parks and wildlife (Ministry of Tourism and Arts 2017). The Zambia Wildlife Act No. 12 of 1998, which was the country's primary legislation for wildlife protection, established the Zambia Wildlife Authority (ZAWA) in 1999. ZAWA was responsible for establishing, controlling, and managing Zambia's National Parks and Game Management Areas (GMA), and for the licensing of hunting and control of the processing, sale, import, and export of wild animals and trophies (CoP15 Doc. 68 Annex 6b).

However, in 2015, the Government of Zambia decided to transform the wildlife sector due to operational challenges that ZAWA was facing (ZAWA *in litt.* 2015). As a result, the Zambia Wildlife Authority was disbanded in 2015 and reincorporated as a government department, the Department of National Parks and Wildlife (DNPW). The Government of Zambia also repealed Zambia Wildlife Act No. 12 of 1998, replacing it with Zambia Wildlife Act No. 14 of 2015, which established the Department of National Parks and Wildlife under the Ministry of Tourism and Arts, provided for the appointment of a Director and other officers responsible for National Parks and Wildlife, provided for the transfer of the functions of ZAWA to the Ministry of Tourism and Arts' Department of National Parks and Wildlife and its Director, as well as laid out the regulatory framework and legislation for the management and conservation of wildlife in Zambia (Parliament 2015; ZAWA *in litt.* 2015).

3. The Department of National Parks and Wildlife (DNPW) is responsible for the administration of Zambia Wildlife Act No. 14 of 2015 (Act). According to the Act (Parliament 2015), the functions of DNPW are to:

(a) control, manage, conserve, protect and administer National Parks, Community Partnership Parks, bird and wildlife sanctuaries and Game Management Areas and coordinate activities in these areas;
(b) in partnership with local communities, share the responsibilities of management in Community Partnership Parks and Game Management Areas;
(c) adopt methods to ensure the sustainability, conservation and preservation in the natural state of ecosystems and biological diversity in the National Parks, Community Partnerships Parks, bird and wildlife sanctuaries and Game Management Areas;
(d) encourage the general development of National Parks, Community Partnership Parks, bird and wildlife sanctuaries and Game Management Areas, including the development of facilities and amenities within these areas in accordance with the management plans for those areas;
(e) sensitize and educate the general public on the necessity of wildlife conservation and the importance of wildlife to foster appreciation of the economic and aesthetic value of wildlife as natural assets;
(f) undertake measures to ensure the proper balance between the sustainable use of wildlife and the management of ecosystems in National Parks, Community Partnership Parks, bird and wildlife sanctuaries and Game Management Areas;
(g) enhance the economic and social well-being of local communities in or around Community Partnership Parks and Game Management Areas;
(h) prepare and implement management plans for National Parks, Community Partnership Parks, bird and wildlife sanctuaries and Game Management Areas in consultation with relevant stakeholders;
(i) issue licenses, certificates and permits under this Act;
(j) in partnership with local communities, grant hunting concessions to hunting outfitters and non-consumptive tourism operators in Game Management Areas;
(k) assist and advise the boards in the management of human and natural resources in Game Management Areas and open areas which fall under their jurisdiction;
(l) formulate and advise the Minister on the regulations for the preparation and implementation of general management plans for National Parks, Community Partnership Parks, bird and wildlife sanctuaries and Game Management Areas;
(m) ensure the systematic management of financial, human and natural resources for wildlife conservation so that the abundance and diversity of species is maintained at optimum level;
(n) advise the Minister on the regulations required to conserve, protect and manage wildlife in National Parks, Community Partnership Parks, bird and wildlife sanctuaries, Game Management Areas, open areas and private wildlife estates;
(o) deposit revenue into a fund established by a board and regulate the use of the funds from profits accrued from the revenues payable under this Act in respect of licenses,

certificates and permits issued, hunting concessions granted and services rendered from the use of wildlife within an area of a board as the Minister may prescribe, in consultation with the Director;

(p) regulate trophy hunting operations and non-consumptive tourism operations in Game Management Areas;
(q) grant and regulate tourism block concessions in tourism blocks;
(r) cooperate with persons and organizations with an interest in the activities of the Department and are prepared to assist the Department on a voluntary basis and comply with the requirements set by the Ministry;
(s) regulate private wildlife estates;
(t) carry out commercial activities related to consumptive and non-consumptive tourism; and
(u) carry out any other activities relating to wildlife conservation and management that are necessary to the performance of its functions under this Act.

4. In 2005, Zambia produced a National Strategy for Elephant Management in Zambia, which established the following goal and objectives (CoP15 Doc. 68 Annex 6b):

> *Goal: "Conservation of elephants at population level which promote conservation of biodiversity while providing for sustainable utilization."*
>
> *Objective 1. To mitigate human – elephant conflicts*
> *Objective 2. To reduce poaching levels*
> *Objective 3. To establish and maintain a comprehensive ivory management system*
> *Objective 4. To provide for sustainable elephant utilization*

Management Plans for specific areas (e.g. Lower Zambezi) provide management objectives, activities, and guidelines (CoP15 Doc. 68 Annex 6b).

5. In 2015, ZAWA (*in litt.* 2015) identified the following actions they had implemented since the formulation of the national elephant conservation strategy, in order to achieve effective management of the African elephant:

> *Mitigate human – elephant conflicts*
>
> - ZAWA has developed land use plans in most Game Management Areas and National Parks. A few protected areas are remaining but efforts are being made to ensure that even in these areas Management Zone Plans could be developed so that there is a management guide. This has prevented human encroachment into wildlife areas and hence has reduced human–wildlife conflict.
> - In the event of elephant–human conflict, the area Warden is able to make a decision to control it without having to call headquarters. This has sped up reaction time and prevented damage to property and threat to human life. Camps and offices have been established in elephant conflict hot spots so that there is rapid response to situations. This has also built a positive image about ZAWA.
> - Ivory that is coming from GMAs and open areas is identified and labeled and stored in

the Ivory Strong room. Ivory from different mortalities is also categorized and labeled as such. This helps establish areas of frequent conflicts and management can be alerted about frequency of cases coming through.

- Revenue from the sale of ivory and other by-products obtained from elephant control operations in GMAs and open areas is shared with communities.
- ZAWA has initiated negotiations with the relevant individuals of the state responsible for resettlements so that where practicable, human settlements which have encroached upon or have taken away or altered elephant habitat or blocked elephant movement and migratory routes can be removed or alleviated in a humane and appropriate manner.
- ZAWA has also established a human–wildlife conflict resolution protocol which sets out procedures on how to monitor and document all elephant/human conflicts and effectiveness control measures.

Reduce poaching levels

- Conduct regular and consistent field patrols. Surveillance of protected areas has been increased in all elephant range protected areas: Luangwa, Kafue, Lower Zambezi, and the Sioma Ngwezi areas.
- Developed and implemented proactive law enforcement by using strike force units. This has been effective in the Kafue and Luangwa systems.
- Use specialized law enforcement techniques (ground-air communication, use of Global Positioning System (GPS) units, and night vision binoculars).
- Improved upon intelligence, surveillance, investigation and prosecution skills.
- Developed and implemented forensic techniques in examining elephant specimens to improve handling of court cases to deter potential poachers.
- Improved local community involvement in co-management and benefit sharing.
- Strengthened use of informers.

Provide adequate trained personnel

- Recruited and trained additional law enforcement staff.
- Deployed optimum levels of personnel to maximize area coverage.
- Implemented in-service training to upgrade skills.

Secure and allocate adequate financial resources

- Secured Government financial support. Government has significantly supported ZAWA in obtaining funding so that it can be self-sustaining. It has also supported countrywide aerial surveys of the African elephant so that its status can be understood better.
- Opened an elephant conservation account and attracted funding. ZAWA has been using resources from safari hunting without distinguishing sources from different species. Protection has been on an ecosystem scale so that it is biodiversity that is ultimately protected. However, ZAWA is considering a mechanism of enhancing the protection of certain species, like lion and elephant, because of their status.
- Lobbied and prepared project proposals to cooperating partners for funding. ZAWA has

established an office that is solely for lobbying, writing of project proposals and formation of partnerships with non-governmental organizations (NGOs), private sector, universities and other relevant institutions in order to establish a larger constituency of supporters in conservation.

Establish and maintain a comprehensive ivory management system

- Constructed a modern ivory strong room.
- Procured equipment and facilities for an efficient ivory management system in compliance with CITES.
- Trained personnel in ivory management skills.
- Established and maintained a database.
- Conducted regular auditing of the stock.

Provide a favorable environment for resumption of sustainable elephant hunting

- Monitored elephant populations (including status, trends, sex ratios and age structure).
- Established a database for monitoring internal and external trade controls.
- Complied with CITES, where international trade is permissible.

Strengthen and maintain coordination of elephant conservation in transfrontier areas

- Harmonized land use practices, where possible.
- Participated in the establishment of cross-border/trans-frontier parks.
- Conducted joint elephant research and monitoring.
- Attended consultative meetings through the diplomatic relations, agreements, and protocols.
- Strengthened links with the International Police Organization (INTERPOL) for intelligence information sharing and monitoring of illegal trade between countries, and ensured elephant surveillance throughout its range in the sub region.

6. In 2017, DNPW (*in litt.* 2017) acknowledged further implementation with regard to the National Strategy for Elephant Management in Zambia, including the following actions:

1) A central strong room for ivory stockpiles was built. An Ivory Management System has been put in place – which includes management of ivory stockpiles. The ivory database and comprehensive auditing system have been established. The ivory movement system from source to headquarters has also been put in place. Accountable documents for ivory movement systems have been developed. The ivory stockpile includes identified ivory from the following sources:
    - Natural mortality;
    - Problem animal control;
    - Law enforcement/recovered from poachers;
    - Collected from wildlife estate and/or natural breakage; and
    - Unknown origin, including ivory from other countries,

    as well as coordinates of the source where the mortality or ivory was collected.

2) DNPW monitors collection, registration, weighing and storage of ivory in accordance with the standards recommended by CITES Resolution Conf. 10.9 on *Consideration of proposals for the transfer of African elephant populations from Appendix I to Appendix II.*
3) Monitoring the Illegal Killing of Elephants (MIKE) has been implemented. In addition, the Spatial Monitoring and Reporting Tool (SMART) system is being rolled out across Protected Areas.
4) Coordination of elephant management in Transfrontier Areas - a corridor management strategy has been developed.
5) Implementation of CITES rules and regulations on elephants.
6) Improvement of funding. The Government of Zambia now pays DNPW staff salaries while allowing DNPW to retain all of its revenue, as outlined in the approved annual budget. This increases the amount of resources available for anti-poaching activities.

7. According to DNPW (*in litt.* 2017), although the 2005 National Strategy for Elephant Management in Zambia (Strategy) expired in 2012, the government still implements most of the strategies identified in the plan. However, the Strategy is scheduled for review this year (i.e. 2017). A consultant has since been engaged to facilitate this process, with support from the World Wide Fund for Nature (WWF; known as "World Wildlife Fund" in the United States) and The Nature Conservancy (TNC) (DNPW *in litt.* 2017).

8. In Zambia, the management and sport hunting of elephants is currently regulated by the Zambia Wildlife (Elephant Sport Hunting) Regulations, 2010 (Statutory Instrument No. 107 of 2010); the Zambia Wildlife (International Trade in Endangered Species of Wild Fauna and Flora) Regulations, 2007 (Statutory Instrument No. 61 of 2007), and the relevant provisions of Zambia Wildlife Act No. 14 of 2015 (DNPW *in litt.* 2017). These regulations prescribe rules for sport hunting of elephants; establish the hunting season, minimum trophy size, annual quota, post-hunt reporting, trophy registration, marking, export, and revenue sharing; place restrictions on international trade in endangered species; and provide the mechanism for Zambia's implementation of CITES (Government of Zambia 2007; Government of Zambia 2010; Parliament 2015). However, the Department of National Parks and Wildlife has submitted a revised Statutory Instrument on Elephant Sport Hunting to the Ministry of Justice for finalization, in light of the transformation of wildlife management in Zambia (i.e. the disbanding of ZAWA and creation of DNPW). According to DNPW (*in litt.* 2017), once the draft Statutory Instrument is finalized, the document will be made available to the Service.

9. A Fund is operational in Zambia whereby income from elephant trophy hunting is deposited and then distributed as follows (DNPW *in litt.* 2017):

Animal fees are shared
- 5% of the funds go to the Community Resource Board (CRB) patron (traditional leader or Chief);
- 45% of the funds go to the CRB in the form of community funds; and
- 50% of the funds go to DNPW in the form of conservation funds.

Concession fees are shared

- 5% of the funds go to the CRB patron (traditional leader or Chief);
- 15% of the funds go to the CRB in the form of community funds; and
- 80% of the funds go to DNPW in the form of conservation funds.

According to Zambia's "Guideline on the Use of Community Funds Accrued from Wildlife Management," the community funds are utilized as follows (DNPW *in litt.* 2017):

- 45% of the funds go to wildlife management, including resource protection and escort services;
- 35% of the funds go to community projects such as construction of clinics, roads, schools, and wells; and
- 20% of the funds go to administration of the CRBs.

10. In 2013 and 2014, Zambia decided to close its elephant hunting season because the Zambian government was interested in ascertaining the status of wildlife populations in the Game Management Areas where hunting occurs (ZAWA *pers. comm.* 2015). The government wanted empirical evidence on the population of Zambian animal species, particularly elephants and cats, before awarding the new ten-year hunting concessions to safari operators in the 23 hunting blocks where concessions had expired. To that effect, the government partnered with cooperating partners to undertake a survey in key elephant range areas. According to the Zambian government, results of the survey indicated that it was "safe for Zambia to continue elephant hunting" (ZAWA *in litt.* 2015). As a result, the Government of Zambia decided to reopen elephant sport hunting in 2015 and thus, issued a quota for the 2015 elephant hunting season.

Population Status and Trends

11. The first country-wide population survey of elephants in Zambia was conducted in 2008. In this survey, both stratified sample and total counts (Norton-Griffiths 1978, as cited in CoP15 Doc. 68 Annex 6b) estimated that the elephant population comprised 26,382 ± 4,405 (95% Confidence Limit (CL)) individuals over 166,713 km^2, which is approximately 70% of the protected area network (Simukonda 2009, as cited in CoP15 Doc. 68 Annex 6b). Due to time and funding constraints, the survey did not cover West Lunga (CoP15 Doc. 68 Annex 6b).

12. In 2010, the Panel of Experts noted that according to the African Elephant Database in 1995, 1998, 2002 and 2007 (Said et al. 1995, Barnes et al. 1998, and Blanc et al. 2002, as cited in CoP15 Doc. 68 Annex 6b; Blanc et al. 2007), total population estimates for elephants in Zambia indicated a population that was between a minimum of 16,562 definite elephants and a maximum of 29,229 elephants (the sum of probable, possible and speculative estimates) and did not indicate a clear overall population trend. The Panel pointed out, however, that the 2008 estimate of approximately 26,000 elephants was the highest figure reported to date over this period. Based on this information, the Panel of Experts concluded, at that time, that the African elephant population in Zambia could be considered stable and viable (especially the Luangwa and Kafue subpopulations),

and possibly increasing (CoP15 Doc. 68 Annex 6b).

13. In 2013, a countrywide survey was carried out, but the results were not released (Thouless et al. 2016).

14. In September 2015, an aerial survey of African elephants and other wildlife took place over the core elephant range, constituting four ecosystems in Zambia, as part of the continent-wide Great Elephant Census (GEC). A total area of 84,859 km^2 was sampled at an average intensity of 8% (DNPW 2016b). The four ecosystems where the survey took place were:

- Luangwa Ecosystem (32,819 km^2), comprising the North and South Luangwa, Luambe and Lukusuzi National Parks (NPs); and the Mukungule, Musalangu, Munyamadzi, Lumimba, Lupande and Sandwe Game Management Areas (GMAs);
- Kafue Ecosystem (45,030 km^2), comprising the Kafue NP and the 9 surrounding GMAs except Bbilili;
- Sioma Ngwezi Ecosystem (4,482 km^2), comprising the Sioma Ngwezi NP and the lower West Zambezi GMA; and
- Lower Zambezi Ecosystem (2,528 km^2), which is made up of Lower Zambezi NP, and Chiawa GMA.

Elephant range areas such as Nsumbu and West Lunga NPs, and surrounding GMAs were not included in the survey due to budgetary limitations (DNPW 2016b).

15. The following table summarizes the population estimates derived from the 2015 survey of these four ecosystems in Zambia.

Table 1: Summary of elephant population estimates in Zambia (From: DNPW 2016b)

Area	Population Estimate	95% Range
Kafue National Park	4,813	2,548 – 7,078
Kafue GMAs	1,876	262 – 3,490
Sub-total Kafue Ecosystem	*6,688*	*3,945 – 9,432*
South Luangwa National Park	3,302	2,108 – 4,496
North Luangwa National Park	4,673	2,885 – 6,461
Luambe National Park	54	6 – 131
Lukusuzi National Park	0	-
Luangwa Game Management Areas	5,869	2,761 – 8,976
Sub-total Luangwa Ecosystem	*13,898*	*10,343 – 17,454*
Sioma Ngwezi National Park	*48*	*6 - 126*
Lower Zambezi National Park	973	384 -1,562
Lower Zambezi Game Management Areas	153	16 – 325
Sub-total Lower Zambezi Valley	*1,125*	*512 – 1,739*
Total (Overall Zambia Elephant Range)	**21,760**	**17,237 – 26,283**

Therefore, according to DNPW (2016b), the total African elephant population in Zambia is estimated at 21,760 ± 4,523 individuals. This number is very similar to the total population estimate given by Chase et al. (2016) of 21,759 ± 2,310 individuals, with a 95% Confidence Interval (CI) of 17,232 – 26,286 individuals, as well as the total population estimate provided in the 2016 IUCN African Elephant Status Report (Thouless et al. 2016):

> *The estimated number of elephants in areas surveyed in the last ten years in Zambia is 21,967 ± 4,703 at the time of the last survey for each area. There may be an additional 214 to 314 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 105,461 km^2, which is 62% of the estimated known and possible elephant range.*

According to DNPW (2016b), the current overall population estimate is "similar to the estimate of 26,382 ± 4,405 individuals obtained in the 2008 country-wide survey which statistically was not significantly different (t=2.4, p=0.015)." Thouless et al. (2016) agree that elephant numbers in Zambia "have changed little since the last [African Elephant Status Report] update [in 2006]." The main changes have been a reduction in guesses from isolated small populations such as West Lunga and Bangweulu, and a substantial reduction in the population number in Sioma Ngwezi National Park; however, this makes up a small proportion of the national population (Thouless et al. 2016).

16. Regarding population trends within specific ecosystems, DNPW (2016b) states that it is difficult to obtain strictly comparable data over the years, since not all of the reports indicate the details of the survey area (thus, there may be differences in coverage areas between various surveys). In addition, surveys were conducted in different seasons and the survey methods may vary. However, Table 2 below shows the elephant population estimates where DNPW considered the data to be "comparable."

Table 2. Estimates of Elephant Populations since 2003 (From: DNPW 2016b)

Year	Luangwa Ecosystem	Lower Zambezi NP	Kafue Ecosystem	Sioma Ngwezi NP
2003		1,347		
2004				899
2005		3,417		385
2006			4,273	
2008	12,352		3,455	
2009	18,211			
2011	11,095		3,715	
2013		1,795		133
2015	13,898	973	6,688	48

According to DNPW (2016b) and based on the data indicated above, the 2015 survey results indicate the following:

- Kafue Ecosystem – current estimates for the Kafue ecosystem as a whole are greater than previous estimates (since 2006).
- Luangwa Ecosystem – current estimates for the Luangwa ecosystem as a whole are greater than the previous estimate (in 2011), but comparable to the 2008 population estimate.
- Lower Zambezi NP – current estimate for the Lower Zambezi National Park is less than previous estimates (since 2005), but similar to the 2003 population estimate. DNPW (2016b) states that the system is open to elephant movement across the river from Zimbabwe, so population numbers could potentially change markedly from year to year.
- Sioma Ngwezi NP – current estimate for the Sioma Ngwezi National Park is less than previous estimates (since 2004). DNPW (2016b) states that the trend since 2004 has been "significantly ($p=0.015$) downwards with an exponential decline rate of -0.22."

17. Carcass ratios (the percentage of dead elephants observed during a survey count) are often used as an index of population growth rates, as ratios <8% are typical of stable or growing populations over the previous four years, while higher carcass ratios may indicate mortality in excess of births in the previous four years (Douglas-Hamilton and Burrill 1991). During the 2015 survey, a total of 1,029 elephant carcasses were recorded in Zambia, out of which only 8 were fresh (<1 month old) and 19 were recent carcasses (<1 year old) in the entire combined survey area (DNPW 2016b). The majority of the carcasses observed were older than 1 year. Specifically:

- In the Luangwa Valley Ecosystem overall, a carcass ratio of 1.2% was estimated, which is indicative of an increasing population (DNPW 2016b).
- The Kafue and Lower Zambezi Ecosystems had carcass ratios of 7.02% and 6.33% respectively, which indicate stable elephant populations which are on the "tipping point between population increase and decline" (DNPW 2016b). Most of the elephant carcasses observed in the Kafue and Lower Zambezi Ecosystems were older than one year and no fresh carcasses were seen during the survey, which indicate that the level of poaching or deaths of elephants occurring in these ecosystems prior to the survey was low (DNPW 2016b). However, there may be cause for some concern, given that the carcass ratio for Kafue National Park was 1% in 2008 and increased to 7% in 2015, despite the apparent stability of the population in that area (Thouless et al. 2016).
- A very high carcass ratio was calculated for the Sioma Ngwezi Ecosystem, which increased dramatically from 3% in 2008 to 85.5% in 2015 (DNPW 2016b; Thouless et al. 2016). The survey counted more carcasses than live elephants in both the National Park and GMA, and it was the only place where fresh carcasses were recorded. This ratio indicates either high levels of poaching and/or a seasonally varying population (Thouless et al. 2016), as elephants in Sioma Ngwezi regularly migrate into the neighboring countries of Namibia and Botswana during the dry season (Chase et al. 2013, as cited in Thouless et al. 2016; DNPW 2016b). Most of the carcasses were older than 1 year and the number of total carcasses counted was similar to that estimated in 2013 (DNPW 2016b). Nevertheless, according to DNPW (2016b), the results "suggest a recent or ongoing problem of illegal hunting which has led to a loss of the original population." The survey results conclude

that the population of elephants in Sioma Ngwezi National Park is very unstable and rapidly declining (DNPW 2016b).

- An overall, countrywide carcass ratio of 4.52% observed during the 2015 GEC survey (Chase et al. 2016).
- The fresh-carcass ratio (carcasses <1 month old) observed during the 2015 GEC was 0.1% for Zambia overall (Chase et al. 2016).

18. Therefore, although it is unclear how comparable the data from previous surveys (since 2003) or the methods used in the previous countrywide survey, carried out in 2008, are to the 2015 survey (Thouless et al. 2016), the results show that, overall, the African elephant population in Zambia appears to be stable, but with large differences between different parts of the country (Great Elephant Census 2016). With regards to live elephants, the data suggests that elephant numbers are stable (and may even be increasing) in the two largest elephant ecosystems in Zambia – Luangwa and Kafue, while the population of elephants in the Lower Zambezi appear to be declining. However, in Sioma Ngwezi National Park, on the border with Angola and Namibia, the elephant numbers are declining catastrophically.
The countrywide carcass ratio of 4.52% indicates that the observed deaths are within sustainable levels and that Zambia's overall elephant population appears to be stable, corroborating the live elephant counts. However, with an ecosystem carcass ratio of a staggering 85.5%, more efforts are needed to address the poaching crisis occurring in Sioma Ngwezi.

Sustainability of Offtake

19. In Zambia, African elephant deaths occur as a result of several factors, including: 1) natural mortality; 2) sport hunting; 3) problem animal control (defense of human life and property); and 4) poaching. In order to evaluate whether offtake from sport (trophy) hunting is sustainable, all losses to the African elephant population must be considered.

20. In 2010, the Panel of Experts (CoP15 Doc. 68 Annex 6b) evaluated the sustainability of the total levels of offtake from the elephant population in Zambia. At the time of the Panel's analysis, the overall level of elephant offtake from all legal and illegal causes was estimated to have been a minimum of 208 annually (66 problem animal control (PAC) operations + 47 natural mortalities + 16 unknown + 20 sport-hunting quota + 59 poached), which is equivalent to 0.8% of the 2008 elephant population estimate (26,382 individuals). The Panel noted that even if this value were substantially increased, allowing for undetected natural mortalities and poached elephants, it would still fall within the expected rate of increase of the elephant population (approximately 3 - 5% annually). Therefore, the Panel concluded, at that time, that the overall elephant offtake could be considered as sustainable at the national level, especially given the seemingly stable and possibly increasing overall elephant population since 2002. The Panel of Experts noted that on a regional level, the offtake data indicate a likely decline in the Lower Zambezi, where the 2008 census confirmed both a population decline since 2005 and the highest carcass ratio in the country. The Panel of Experts further noted that levels of illegal activity in the Lower Zambezi needed to be reduced as a first priority (CoP15 Doc. 68 Annex 6b).

21. The Panel of Experts also evaluated the sustainability of legal sport-hunting. An annual CITES national export quota of 20 animals was maintained from 2005, when elephant sport-hunting began in Zambia, through 2010. The CITES export quota was increased to 80 animals for the 2011 and 2012 hunting seasons. The Panel of experts' analysis took into account a potential increase in the sport-hunting quota to 120 animals, as proposed in Zambia's CoP15 proposal. By examining data from the ivory management database, the Panel's analysis also took into account the number of trophy-quality males removed from the population by other causes. In total, the Panel considered a potential total offtake of 131 trophy-quality animals a year, which is equivalent to 0.5% of the 2008 total elephant population estimate. The Panel concluded that this level falls within the range 0.5 - 1% that is widely considered to be the limit to sustainable hunting of trophy-quality males in a healthy elephant population (Martin 1986).

22. The Panel of Experts also assessed whether the hunting of trophy quality males in Zambia was sustainable. The Panel's analysis of ZAWA records showed a steady decline in average tusk weight from 23.1 kilograms (kg) in 2005 to 19.6 kg in 2009. As such, the Panel raised some concern that 2009 trophies are the smallest on record in terms of maximum weight, average weight and length, despite being above (on average) the minimum legal requirements. While the Panel concluded that the legal hunting of trophy quality males is sustainable, it underscored the importance of ongoing monitoring of trophy quality, especially in locations where illegal offtake is relatively high. The Panel also noted that the accumulation of 112 trophy-quality tusks from natural mortality, PAC, and confiscations from 2005 to 2009 represented a large increase from 68 during the years 2000 - 2004 and that this highlights why such offtake should be factored into quota setting (CoP15 Doc. 68 Annex 6b).

Legal Offtake

23. In Zambia, elephant sport hunting begins on May 1st and ends on December 31st (Government of Zambia 2010).

24. In 2015 and 2016, Zambia's annual CITES export quota was set at 160 tusks (80 individuals), which was the same export quota that was set by Zambia for 2011 and 2012. There was no export quota declared to CITES by Zambia for "tusks and other trophies" of African elephants for 2013 and 2014 (CITES 2017), since Zambia decided to temporarily close its elephant hunting season during this time. Each year, the Government of Zambia (2010) also issues a "quota of elephants allocated for sport [hunting that] shall not exceed the [export] quota of elephants notified to the Secretariat of the Convention [on International Trade in Endangered Species of Wild Fauna and Flora] in any one year." This is not an additional quota, it is simply a subset of the annual export quota Zambia declares to CITES each year.

25. Information about the annual quotas, as well as the results of the 2015 and 2016 African elephant hunting seasons in Zambia are shown in Table 3. A total of 15 elephants were harvested between 2015 and 2016, and only male elephants were harvested from these hunts (DNPW *in litt.*

2017).

Table 3. Summary of Elephant Harvest in Zambia 2015-2016 (From: ZAWA *in litt.* 2015; ZAWA *pers. comm.* 2015; DNPW 2016a; DNPW *in litt.* 2017)

Year	Annual Export Quota (individuals)	Government Allocated Hunting Quota (individuals)	Elephants Harvested (individuals)	Location of Harvest (quantity)
2015	80 (160 tusks)	36	3	Lower Lupande (2); Munyamadzi (1)
2016	80 (160 tusks)	30	12	Chiawa (2); Luawata (2); Chikwa (2); Chifunda (1); Nyaminga (1); Nyampala (1); Nyakolwe (1); Nyamvu (1); Mwanya (1)

For 2017, Zambia's export quota has remained at 80 individuals (160 tusks), with the 2017 sport hunting quota set at 30 individuals (DNPW *in litt.* 2017).

26. In Zambia, wildlife is conserved in National Parks, Game Management Areas (GMAs), Open Areas, and Private Wildlife Estates such as ranches. National Parks are exclusively for wildlife habitation, with the exception of tourist lodges and camps, and is exclusively for non-consumptive use. Game Management Areas are multiple use areas buffering the National Parks where humans and wildlife co-exist, while Open Areas are areas for human habitation but wildlife can also exist there. Safari hunting is popular in hunting blocks falling within GMAs, since no consumptive wildlife use is permitted in the National Parks that border GMAs. Resident hunting takes place in both GMAs and Open Areas. Hunting activities also take place in private wildlife estates such as game ranches (ZAWA *in litt.* 2015).

27. According to DNPW (*in litt.* 2017), the open game ranches that participate in elephant sport hunting are located in the Luangwa Valley east of West Petauke GMA. Only hunting blocks located in the Luangwa and Zambezi Valleys are allocated elephants to hunt (DNPW *in litt.* 2017; DNPW 2016a; Protected Planet 2017; Steyn 2014; Kafue River Trust 2017; Anderson et al. 2013; Hunting Report 2013; Wes Hixon's Outdoor Adventures 2016). Each hunting block is allocated only one sport-hunted elephant per year, but may be allowed to hunt a second one if another hunting block within the same ecosystem voluntarily forfeits its elephant quota (this ensures that the total quota is not exceeded) (DNPW *in litt.* 2017). There are no hunting blocks or game ranches located around Siomi Ngwezi NP (where the population has severely declined) that are open to elephant sport hunting.

28. The Government of Zambia sets the sport hunting quota based on the population size, distribution, trophy quality, occurrence of human-elephant conflict, and demand from the community or outfitter. According to DNPW (*in litt.* 2017), the quota "does not exceed 1% of the total elephant population and is always far below the export limit of 80 [individuals]."

29. As mentioned above, trophy quality measurements are used as part of the data set to determine quotas. According to DNPW (*in litt.* 2017), this has been made strict by insisting that hunters only harvest individuals with tusks weighing above 15 kg. Hunters who harvest underweight ivory are penalized (DNPW *in litt.* 2017). ZAWA reported a slight improvement in trophy quality from 17 kg in 2011 to 17.2 kg in 2012 (ZAWA 2015). An analysis performed by DNPW (*in litt.* 2017) of trophy quality of sport-hunted elephants taken in Zambia between 2015 and 2016 showed that the average trophy weight during this period was 19.2 kg. According to DNPW (*in litt.* 2017), "there has not been much change [in trophy weight] in the past 10 years (i.e. 2005 to 2013), which had an average [trophy weight] of 19.21 kg."

30. Elephants killed as a result of conflict between humans and elephants (HEC) are not included in the sport hunting quota allocated by the Government of Zambia each year (ZAWA *in litt.* 2015), because the occurrence of HEC, by and large, does not coincide with hunting by potential clients (DNPW *in litt.* 2017). A summary of human-elephant conflicts in Zambia between 2012 and 2016 is shown in Table 4.

Table 4. Summary of Human-Elephant Conflicts in Zambia (From: ZAWA *in litt.* 2015; DNPW *in litt.* 2017)

Year	Reports of Problem Elephants	Problem Elephants Killed
2012	1,780	25
2013	2,405	20
2014	1,269	27
2015	-	10
2016	-	16

- No information on "Reports of Problem Elephants" was provided by DNPW for 2015 and 2016

Therefore, based on data recorded for the most recent five-year period (2012-2016), it is estimated that an average of 20 elephants are killed annually as a result of conflict with humans.

31. Current records of natural mortalities in Zambia are not available. However, in 2010, based on the accumulation rate of ivory from natural mortalities and breakages known from the ivory management database, the Panel of Experts estimated that on average, the tusks from at least 47 elephants were recovered annually between 2005 and 2009 (plus an additional 16 of unknown origin) (CoP15 Doc. 68 Annex 6b). This figure for annual natural mortality may be outdated; however, given that the current African elephant population estimate is similar to the estimate obtained in 2008 and that, overall, the African elephant population in Zambia appears to be stable, it is the best estimate we have available for Zambia at this time.

32. Based on a sport hunting quota of 30 African elephants, as well as the estimates cited earlier for natural mortality and problem animal control in Zambia, the overall legal offtake of African elephants in Zambia is estimated to be about 113 elephants annually. Considering the current population estimate to be 21,760 elephants, the legal annual offtake would be estimated at about

0.5% of the population. Even if the sport hunting quota allocated by the Government of Zambia matched the export quota of 80 (individuals) declared to CITES, the overall legal offtake of African elephants in Zambia would be estimated to be about 163 elephants annually. Given the current population estimate, the legal annual offtake would then be estimated at about 0.8% of the population. In both scenarios, the figure is less than the annual population growth rate of 3 - 5% and this, in itself would be considered sustainable; however, sustainability is measured against total offtake, including illegal offtake, discussed below.

Illegal Offtake

33. Updates concerning the CITES programs known as Monitoring the Illegal Killing of Elephants (MIKE) and the Elephant Trade Information System (ETIS) were presented at the 17th Meeting of the Conference of the Parties to CITES (CoP17; Johannesburg, September-October 2016).

The ETIS Report presented at CoP17, stated the following (CoP17 Doc. 57.6 (Rev. 1)), with regard to the group of countries of which Zambia was included:

- Falling in the middle in terms of the mean number of seizures, and showing a low mean weight value, this grouping is not particularly noteworthy. Further, none of the seizures have involved large ivory consignments of 800 kg or more so there is little to suggest active organized criminal activity. Assessing governance, the mean rule of law measure shows a negative value which could signal corruption problems, but the very high law enforcement effort ratio seems to indicate generally good performance where ivory trade is concerned. Finally, with a very low market score, this group of countries does not appear to play an obvious problematic role at the retail level.
- In 2014, Zambia was one of only twelve Parties that submitted ivory stock reports with inventory figures. Further, only Germany and Zambia provided information on privately-owned stocks.

34. The CITES MIKE Programme is a site-based system to monitor elephant population trends and the illegal killing of elephants. The MIKE Programme operates in some 60 sites in 30 range states of the African elephant and in 27 sites in 13 range states of the Asian elephant. In Zambia, there is one MIKE site – South Luangwa National Park.

Below is a summary of the carcasses reported to the MIKE Programme between 2002 and 2015 from the one MIKE site (South Luangwa) in Zambia, as well as the Proportion of Illegally Killed Elephants (PIKE) values calculated for each year. A PIKE level of 0.5 or higher translates to a level of illegal annual offtake that is likely to be higher than the annual natural birth rate, indicating that the elephant populations are very likely to be in net decline (CoP16 Doc. 53.1).

Table 5: Carcasses reported to the MIKE Programme from South Luangwa MIKE Site (Zambia): 2002 - 2015 (From: CITES MIKE Programme 2017)

Year	Total number of elephant carcasses	Number of illegally killed elephant carcasses encountered	PIKE Value
2002	4	1	0.25
2003	8	5	0.63
2004	23	15	0.65
2005	4	1	0.25
2006	35	27	0.77
2007	11	0	0
2008	8	7	0.88
2009	14	6	0.43
2010	49	26	0.53
2011	22	14	0.64
2012	34	14	0.41
2013	21	15	0.71
2014	77	41	0.53
2015	83	46	0.55

35. Overall, between 2012 and 2014, 381 elephants were killed illegally across the country (110, 135 and 136 elephants were poached in the years 2012, 2013 and 2014 respectively) (ZAWA *in litt.* 2015). In 2015, 168 elephants were reported to have been poached, with 155 elephants illegally killed in 2016 (DNPW *in litt.* 2017). Therefore, based on data recorded for the most recent five-year period (2012-2016), it is estimated that an average of 141 elephants are illegally killed (poached) each year. Moreover, according to DNPW (*in litt.* 2017), a total of 50 fresh and 22 recent carcasses were recorded in National Parks and GMAs across the country in recent patrols.

36. DNPW (*in litt.* 2017) has reported that poaching of elephants has been recorded in Lower Zambezi, Sioma, South Luangwa, Lukusuzi and Kafue National Parks, and in Game Management Areas such as Rufunsa, Chiawa, West Petauke and Mulobezi.

37. To address the declines in elephant numbers and the ongoing poaching crisis in some areas, especially in Sioma Ngwezi, DNPW is working with partners that include the Security agencies and NGOs to improve anti-poaching efforts, especially in Lower Zambezi and Sioma Ngwezi National Parks. For example, with assistance from WWF and the Peace Parks Foundation (PPF), the Government of Zambia has built new housing for rangers and recruited an additional 30 rangers in Sioma Ngwezi National Park. The Government of Zambia has also approved projects by WWF and PPF under the Kavango-Zambezi Transfrontier Conservation Area (KAZA TFCA) that will see increased funding to support law enforcement activities in Sioma Ngwezi National Park (DNPW *in litt.* 2017).

38. According to DNPW (*in litt.* 2017), the Government of Zambia is committed to combating poaching and to ensure that positive population growth is recorded in all wildlife protected areas. The Government of Zambia, through DNPW, is in the process of starting to revise its elephant conservation strategy with a special focus on those areas that recorded declines in elephant numbers, as well as combating elephant poaching and illegal ivory trade (DNPW *in litt.* 2017). The plan will also look at how to galvanize private sector and NGO participation in elephant protection, especially in Lower Zambezi and Sioma Ngwezi National Parks (DNPW *in litt.* 2017). The elephant conservation strategy is being revised with technical assistance from WWF and TNC in a participatory manner with input from stakeholders that include photographic operators, outfitters, conservation NGOs, the African Elephant Specialist Group, experts, academia, community and other government departments (DNPW *in litt.* 2017).

39. In addition, the Government of Zambia is addressing issues of poaching through other mechanisms. For example, a presidential order was given to all government security agencies to participate in combating wildlife crimes in Zambia (DNPW *in litt.* 2017). To this effect a taskforce was formed which includes the Zambia Army, Air Force, National Service, Police, Intelligence, and the Department of National Parks and Wildlife. DNPW (*in litt.* 2017) states that the level of effort from the Government of Zambia to curb poaching has increased with the issuance of the presidential order, which has contributed to an increase in the number of man-days spent on patrol and the number of arrests of offenders.

40. In 2013 and 2014, law enforcement efforts resulted in the encounter and subsequent arrests of 1,671 and 1,912 suspects from the field respectively (ZAWA 2015). The increase in the number of arrests thus resulted in increased forfeitures and recoveries of items used for illegal purposes. In 2014, 580 firearms were recovered; this is the main weapon used against elephants by poachers in Zambia (ZAWA 2015). In addition, 135 pieces of ivory were recovered in 2013, while 226 pieces of ivory were recovered in 2014 (ZAWA 2015). Table 6 summarizes the prosecution data reported for 2013 and 2014.

Table 6: Prosecution of Offenders for 2013 and 2014 (From: ZAWA 2015)

Description	2013	2014
Number of persons indicted	1,323	1,607
Number convicted	1,338	1,316
Number of individuals fined	465	749
Amount realized from fines imposed on convicts in Zambia (K=Kwacha)	K766,207	K1,053,826

41. According to DNPW (*in litt.* 2017), the Government of Zambia currently allocates about K40million (approximately USD4.4 million) to DNPW annually, of which 75% is used for anti-poaching.

Sustainability of All Offtake

42. In order to evaluate whether offtake from trophy hunting is sustainable, all losses to the African elephant population, including illegal offtake, must be considered. Given the data presented above, the overall level of elephant offtake from all legal and illegal causes is currently estimated to be about 254 elephants annually (20 problem animal control operations + 47 natural mortalities + 16 unknown + 30 sport hunting quota + 141 illegally killed (poached)), which is equivalent to 1% of the current elephant population estimate (21,760 individuals). Just as the Panel of Experts noted in 2010, even if this value were substantially increased, allowing for undetected natural mortalities and poached elephants, or an increase in the sport hunting quota, it would still fall within the expected rate of increase of the elephant population (approximately 3 - 5% annually). Therefore, at this time, the overall elephant offtake can be considered as sustainable at the national level, especially given that the overall African elephant population in Zambia appears to have been stable since at least 2008.

Conclusion

43. Based on the information currently available and data the presented above, we believe that the status of the African elephant population in Zambia and the management efforts of the Government of Zambia are adequate to ensure that the sport hunting of African elephants does not adversely affect the status of the species in Zambia.

44. Overall, the current African elephant population in Zambia appears to be stable, with little change in elephant numbers in Zambia since 2006. However, the 2015 census highlighted some large differences between different parts of the country. Although the data suggests that elephant numbers are stable (and may even be increasing) in the two largest elephant ecosystems in Zambia – Luangwa and Kafue, the elephant numbers in Sioma Ngwezi National Park, which is a small portion (2%) of the national population, are declining catastrophically. The countrywide carcass ratio of 4.52% indicates that the observed deaths are within sustainable levels and that Zambia's overall elephant population appears to be stable, corroborating the live elephant counts. However, with an ecosystem carcass ratio of a staggering 85.5%, more efforts are needed to address the poaching crisis occurring in Sioma Ngwezi.

45. Since the formulation of the National Strategy for Elephant Management in Zambia in 2005, the Government of Zambia has implemented many of the actions identified in the Strategy in order to achieve effective management of the African elephant. Although the Strategy officially expired in 2012, the government still implements most of the strategies identified in the plan. The Strategy is scheduled for review this year (i.e. 2017).

46. We commend Zambia for the transformation of the wildlife sector (with the creation of DNPW) due to the operational and financial challenges that ZAWA was facing, and for stabilizing and improving funding to the wildlife program. The Government of Zambia now pays DNPW staff salaries while allowing DNPW to retain all of its revenue, as outlined in the approved annual

budget. This increases the amount of resources available for anti-poaching activities.

47. Furthermore, we applaud Zambia for taking the step to temporarily suspend the elephant hunting season in 2013 and 2014, on their own, in order to ascertain the status of wildlife populations in the Game Management Areas where hunting occurs. The government wanted empirical evidence on the population of Zambian animal species, particularly elephants and cats, before awarding the new ten-year hunting concessions to safari operators in the 23 hunting blocks where concessions had expired. The Government of Zambia wanted to ensure that it was safe for the country to continue the sport hunting of elephants.

48. We have evaluated whether offtake from trophy hunting is sustainable, given all losses to the African elephant population in Zambia, including illegal offtake. Given the data presented above, the overall level of elephant offtake from all legal and illegal causes is currently estimated to be about 254 elephants annually, which is equivalent to 1% of the current elephant population estimate. Just as the Panel of Experts noted in 2010, even if this value were substantially increased, allowing for undetected natural mortalities and poached elephants, or an increase in the sport hunting quota, it would still fall within the expected annual population growth rate of 3 – 5 %. Therefore, at this time, the overall elephant offtake can be considered as sustainable at the national level, especially given that the overall African elephant population in Zambia appears to have been stable since at least 2008.

49. While poaching has had less of an impact on the overall elephant population in Zambia (Thouless et al. 2016), southwest Zambian elephant populations (i.e. Sioma Ngwezi) continue to experience losses due to poaching. Thus, we are encouraged by the Government of Zambia's continued work and commitment to combating poaching and to ensure that positive population growth is recorded in all wildlife protected areas. The Government of Zambia, through DNPW, is in the process of starting to revise its elephant conservation strategy with a special focus on those areas that recorded declines in elephant numbers, as well as combating elephant poaching and illegal ivory trade.

50. Therefore, we are able, at this time, to find that the importation of sport-hunted trophies of African elephants taken in Zambia in the calendar years 2016 and 2017 will be for purposes that are not detrimental to the survival of the species. However, we do have some concerns, noted below, that we would like to see Zambia address before we make our finding for the 2018 hunting season:

CONCERNS:

1) The Department of National Parks and Wildlife have notified us that they have submitted a revised Statutory Instrument on Elephant Sport Hunting to the Ministry of Justice for finalization, in light of the transformation of wildlife management in Zambia. DNPW has indicated that once the draft Statutory Instrument is finalized, the document will be made available to the Service. We await receipt of this revised Statutory Instrument on Elephant Sport Hunting from Zambia.

2) The 2005 National Strategy for Elephant Management in Zambia officially expired in 2012. Although the Government of Zambia still implements most of the strategies identified in the plan, the Strategy is scheduled for review this year. We strongly encourage Zambia to complete the review process and develop a new or revised Strategy. We would also like to request that Zambia provide us with a copy of the new or revised National Strategy for Elephant Management or Elephant Management Plan, once it is developed and finalized.

3) Given the possible decline in the Lower Zambezi elephant population and the drastic decline in the Sioma Ngwezi NP population (and an ecosystem carcass ratio of 85.5%), as well as a carcass ratio for Kafue National Park that increased from 1% in 2008 to 7% in 2015, we believe more effort is needed in these areas to address poaching, particularly in Sioma Ngwezi. Although we recognize that Zambia has greatly improved its anti-poaching activities, the levels of illegal activity need to be reduced as a first priority, and we will continue to monitor this situation.

4) In 2010, the Panel of Experts' analysis showed a steady decline in average tusk weight from 23.1 kg in 2005 to 19.6 kg in 2009. As such, the Panel raised some concern that the 2009 trophies were the smallest on record in terms of maximum weight, average weight and length, despite being above (on average) the minimum legal requirements. Then, in 2011 and 2012, the average trophy weight declined even further to 17 kg and 17.2 kg respectively. However, an analysis of trophy quality showed that the average trophy weight increased to 19.2 kg between 2015 and 2016. Although the further decline in trophy quality in 2011 and 2012 was very concerning, the increase in trophy quality in 2015 and 2016 is very promising and brings the current trophy quality level close to that of 2009. We would like to see the average tusk weight continue to increase and remain at a high level, and therefore, we encourage Zambia to continue to monitor trophy quality, especially in locations where illegal offtake is relatively high.

Type of Activity

REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT
(For this application, all permits, registrations, and certificates are referred to as a permit.)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. **Instructions on how to make your application complete and help avoid unnecessary delays are attached.**

Section A: Complete if applying as an individual

1.a. Last Name	1.b. First Name	1.c. Middle Name/Initial	1.d. Suffix
Hixson	Robert	L	Jr

2. Date of Birth (mm/dd/yyyy)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address
(b) (6)		(925) 417 5270	import@b.hunter-international.

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution	1.b. Doing business as (DBA)
N/A	
2. Tax identification no.	3. Description of business, agency, Tribe, or institution

4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix

5. Principal officer title	6. Primary contact name

7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (include if different than mailing address; include name of contact person if applicable; include Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City	**1.c. State**	**1.d. Zip code/Postal code**	**1.e. County/Province**	**1.f. Country**
Dallas	TX	75225		USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
-SAME-				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f.Country

Section D: All applicants MUST complete

1. Attach the **nonrefundable application processing fee** in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount identified on page 6 and 7**. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – *attach documentation of fee exempt status as outlined in instructions* [50 CFR 13.11(d)].

2. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50 Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Atty. In fact for Robert Hixson 12/06/2018

Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

Please continue to next page

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for a lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to these application types to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

HUNTER INT'L BROKERAGE SERVICES, INC
5700 Stoneridge Mall Road, Suite 260
Pleasanton, CA 94588

FEDEX RETURN LABEL ATTACHED

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Vanessa Tabugan Tel# (925) 417 5273 / E-mail: import@b.hunter-international.net

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

   ☒ No ☐ Yes

   If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. **Permit number.** Enter the permit number to be reissued/renewed/amended. Prt#: 18US03370C/9

5. Submit the original permit with this application. ATTACHED

6. **Past activities.** N/A

   a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit.
   b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal.

7. **Annual Report**. If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.) N/A

8. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form. N/A

9. **Certification -** Complete one of the statements below and supply any additional documentation requested: (original signature is required)

   a. For **NO CHANGES** to original application:

      I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

   Permittee's signature: _____ Date: _____

   b. For **CHANGES** to original application:

      On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we may need to request additional information regarding the changes after reviewing your initial request.

      I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

   Permittee's signature: [signature] Atty In Fact for Robert Hixson Date: 12/06/2018

All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

CONDITIONS FOR PERMIT NO./s CITES: 171139..... Page 2

PERMIT CONDITIONS FOR THE INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

OR Tambo International Airport is the only port designated for international Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by aircraft within the Gauteng Province.

Import permits are not valid unless the imported consignment is accompanied by a valid ***(original)*** export permit from the country of origin ***(if required)***, which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD, AND SEA)

THIS PERMIT

1. a) Shall not be transferable;
   b) Shall be invalid until the signature of the holder thereof been appended thereto;
   c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspectorate official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspectorate box that's provided at the quarantine station, no more than 14 working days after import;
   d) Shall be subject to the provisions of any other law and or regulation;
   e) Shall be valid for one consignment only;
   f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.

2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspectorate officials, per telephone ***and*** confirm per fax a minimum of ***48 hours*** prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
   a) Name / Company Name of Importer / Exporter;
   b) Name of Airline and Warehouse where intended inspection will take place;
   c) Date and Time of Import / Export / Re-Export;
   d) Date and Time of intended inspection (subject to approval);
   e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
   f) The applicable permit number/s and relevant expiry dates, and
   g) Detailed packing list as per condition 7.

3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspectorate official may be contacted at the following telephone numbers during office hours ***(07:00 – 15:30):***
   Office: +27 (11) 390-3687/ 2311
   Fax: +27 (11) 390-1720

4. All relevant documentation, including ***original*** permit/s ***(CITES permits must include original and coloured copy)***, Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspectorate officer on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.

5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country of destination as shown on the containers must coincide with the country of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.

6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
   a) Details of Importer and Exporter (Names, addresses and contact numbers);
   b) Waybill number/s and name of carrier, flight number, date and time;
   c) Transport container number/s;
   d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
   e) Common name of species (in full),
   f) Number per species per container (actual number exported / imported); and
   g) Applicable permit number/s

7. If this permit is not used, the ***original permit (CITES permits must include coloured copy)*** must be returned to the issuing authority within ***14 working*** days after expiry thereof. Import permits must be returned to the issuing authority within ***14 working days*** after use. Export permits must be handed to a Management Authority of the importing country within ***14 working days*** after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained ***after endorsement,*** for Re-export permit applications. When applying for a Re-export permit, a copy of the ***endorsed import permit*** must be submitted to the Permit office with the application.

9. A person authorized thereto by the Premier may only make any alteration on the permit.

10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.

11. The holder of the permit and / or his delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.

12. Permit holders or their delegated agents must inform the Environmental Management Inspectorate official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.
