All,

The release went great. Lynx was healthy and responded to release as expected.

Thanks for all your involvement, have a good weekend

John DeP

Hi everyone,

I wanted to share with all of you that I updated Wildlife Division leadership on this morning's teleconference and they requested we do not put a radio-collar putting a radio-collar on the lynx. With that said, I think we should consider putting in a "chip." Is that still possible? What's involved or how does it happen?
