Subject: Projection Notes Wolverine 2017
Date: Thursday, December 21, 2017 2:55:41 PM

For all work involving the Lower 48 and the Northern Territory comprised of Canada and Alaska, we had to use a geographic position system that covered all areas from the southernmost tip of North America to the Pole. We used the following for these efforts, Projection: North America Lambert Conformal Conic; Geographic Coordinate System: GCS North American 1983

For work specific to the lower 48 resulting in values of ownership or other land cover, we used the following, Projection: Albers (with custom settings based on the Greater Sage Grouse effort due to covering the same general area); Geographic Coordinate System: GCS North American 1983
