---

For Utah, looks like some unconfirmed data, but they do have one trail cam record and we will receive that one. It should correspond to get general data that GAP had for the norther Wasatch.

I told them to not go to the effort for the unconfirmed data now and just the what they have form the camera.

Hope this helps.

Okay. Wyoming will also be sending GIS-formatted data. I provided your email so it may come directly to you.

Sounds good I can take a look at this too.

Just sent an email to USFS R4 in Utah for data and they are looking into it.

They will supply UT DWR contact too for possible data.

State of Montana has GIS-formatted data on wildlife distributions, including ungulates (elk, deer, bighorn sheep). Here is the link:

[http://data.mtftp.opendata.arcgis.com/datasets?sort\\_by=name&q=Wildlife&keyword=wild](http://data.mtftp.opendata.arcgis.com/datasets?sort_by=name&q=Wildlife&keyword=wild)

But we can talk about this later.
