Hi Betty and Ed,

I've attached a zip file with a few GIS layers from our wolverine work. For some reason, our Game and Fish e-mail system doesn't like zip files, so I renamed the extension to .zzz to get around this. You should be able to download the folder, rename the extension to .zip, and open everything fine. If not, please let me know, and I'll try to send these as a series of e-mails instead.

In the folder, I have a shapfile each for wolverine detections and non-detections for 2014-2015 surveys and for 2015-2016 surveys. We haven't gone through the photos for the first part of this year yet (we're having some hard-drive issues), so I don't have any preliminary data for that yet. I also included a shapefile each for observations from our internal Wildlife Observation System (WOS), split into Zone 12 and Zone 13 for ease on my end. These are all detections from employees as well as those reported to the Department. Although we try to avoid including unreliable reports in this database, I would recommend taking these sightings with a grain of salt. We do occasionally end up with reports in there that are unverified or coding errors that specify wolverine, but are actually different species. I don't have a great way to separate these out, so I've supplied all data for now.

Hopefully this helps. Please let me know if you have any questions in the meantime.

Thanks,
Nichole

Nichole,

I got a call today from Betty Grizzle (USFWS lead on wolverine listing petition). She was asking for a shapefile showing all of our wolverine detections. This would primarily be from the wolverine monitoring work done recently. However, she would also be interested in getting a shapefile of all our wolverine observations. Could you please get this to her in the next couple of weeks? She also requested we send data to ed_turner@fws.gov. If we can not get her a shapefile, she said a spreadsheet of locations would also work.

Zack

Hi Zack - Thank you for your assistance in our efforts to compile wolverine records.

My contact information is below. The GIS support person assisting me is Ed Turner and his email is ed_turner@fws.gov.

Please let me know if you have any questions.

Betty
