Subject: Den Sites
Date: Tuesday, January 17, 2017 7:13:04 PM

Good news, I'm finding them, bad news it's very very slow going.

Have to find them one record by one record.

Actually, find ever record with some form of den in a word, read the record, then if Den classify as such, then the system makes me start from the beginning of the table. I have to start from table beginning each time I find and classify a den. Maybe Emilie and I can figure out a way to not have to start over each time. As doing the ID 802 record file is taking crazy time.

Looks like we will find dens in the following data:

Idaho Data
Washington Dept Fish and Wildlife
CNDDDB

Plus the ones from the MT data emailed earlier.

More on this Wednesday.
