Thanks so much to both of you for pulling this together. It is invaluable information for this project!

Hi Betty, Thanks to Emilie figuring out how to do a more effective search, I found one additional for the MT data and found others in ID, OR, WA, CNDDDB, and some in the USFS NRIS data.

Here are the excel tables and I attempted to hide some fields to make it easier to view.

I will work on the source and FWS\_LInk\_ID fields now and we can once that's complete extract those den sites to compile in one data set. We will still need to gather Utah.

Plus I need to look at the extra tables for the WY State data and see if we get den info.

Hope this helps a bit, Ed
