Hi Bob,

I'm working on some of the wolverine science issues with Jodi and others. Would you be open to me sharing your shapefile with the person below?

Happy to chat on the phone if you prefer.

Thanks John

Can you contact bob directly and ask? I don't want to do anything without his approval and I'm currently out of office. JB

Hi Jodi,

Is it possible to share the Inman fig 3 shapefile with others outside of FWS? Steve and I talked about trying to identify avalanche chutes within Inman's habitat areas using slope and aspect. I spoke to the person who runs this group <http://www.avalanchemapping.org/Avatlas.htm> about it. I'd like to send him Inman's shapefile so he can send me the avalanche chutes he has identified within those polygons. I want to use them to validate predicted chutes I come up with.

Thanks John
