Thanks Betty, I could join you for the first 30 min, but I have another call I can't get out of at 10am.

Best, John

John - I have to run to the airport right now to pick up my sister. I am pretty sure I can conference you in, but will have to sort this out early Monday morning. Let me know if you are available at 9:30 am for that call.

Betty

Hi Betty,

I'm not sure if you want to talk to Bob I. one on one or not, but I'm happy to join that call with you next week. If he says all the covariates for den sites are covered in his 2013 paper, then no need for me to be on it. If he has others that aren't on there / discussion around chutes etc., might not be a bad idea for me to be on.

Best, John
