Hi Josh and Madeline - No sharepoint site; not something we normally do, but I am copying Justin on this message about your request.

Madeline - The docket on regulations.gov announcing our status review, etc. has lots of material, including a number of recent reports, comment letters, etc. The docket number is FWS-R6-ES-2016-0106. The previous two proposed rules, 2010 and 2013, also have some background material, though a bit dated.

I am attaching the District Court's decision from April 2016, which would be a good starting place.

Hi Betty,

I hope all is going well. Madeline Drake (cc'ed here) is a new biologist in our office and will be the technical lead for us for wolverine. Is there a sharepoint set up for her to start reading some of the background materials? Thanks!

Josh
