Sounds good, thank you John.

yes, keep Justin in the loop, especially if we can pull together a multi-purpose meeting afterall.

Hi Marj,

Sorry you are still under the weather. I just had a conversation with Steve about timing for the in person get together on wolverine. From the sounds of the last call with the group it might be hard to get everyone together in person mid-Feb. What we are thinking is that we should probably go ahead and schedule the in person briefing with NOAA/CU people and the wolverine team + R6 management here at the RO for mid Feb (as soon as we have the model results). We can setup a webinar for those who can't be here in person. We don't think we can afford to wait any longer as the timeline is tight and probably a good idea to get the rest of the team up to speed on what NOAA/CU has produced asap so we can all get wheels turning on how it might be included/applied in the SSA. Would like to get your thoughts on this plan / whether or not you think this is a good/bad idea. Might need to run this by Justin as well?

Best, John
