Maybe not send any of the den sites maps. We have still not received some data so those are not complete.

For the call: I do want to talk about the Copeland et al. modeling effort in general with the group, and ask whomever is on the call to provide me any available information on threats (besides climate change) based on their local/State/region experiences.

These show the USFS NRIS data (i.e., more credible wolverine reports), rather than all of the observations we collected.
