Thanks so much for doing this. We have been able to pull together some high resolution MODIS data for (some) den years as well as DEM elevation, so your sites should be a helpful addition.

Have a great time in Sweden; wish I could join you and the other wolverine researchers!

Subject: Den locations

Hi Bob - We have pulled together (after much sorting) all of the reasonably credible wolverine den locations based on information we received from various state agencies and USFS. But I don't think they include any of your study results. We did receive 3 from the

MT Natural Heritage Program, but they are from the early 1990s.

Do you have coordinates or GIS shape files for any of your den locations you can send to us, or is there someone else we can contact that might have these?

Thanks so much,
Betty
