Lara,

Thanks. John and I have not touched base about this project in over two weeks because of the lead up to the wolverine meeting.

I did not understand the last point for the original data. Is all the original data all under I:\GIS\DATA\LANDCOVER\ [look for file name]?

I am trying to minimize time surfing around for files, if you know exactly where they are.

Thanks
Kevin

I sent John this info last week. Much of the final data is on ScienceBase, and nicely documented there. It can also be found (with metadata) at Final: I:\GIS\PROJECTS\20140516_LJ_Range_SageGrouse_Modeling_Prep\DerivedData\FinalDataProducts_NeedQC_metadata\DATA

Intermediates: I:\GIS\PROJECTS\20140516_LJ_Range_SageGrouse_Modeling_Prep\DerivedData\Raster Most do not have metadata.

Original data are in the GIS\Data folder in relevant thematic categories. For example: LANDFIRE is at I:\GIS\DATA\LANDCOVER\USFS

Hope that helps,
Lara

What drive are these in? I am working with John on a sagebrush obligate project and do not want to recreate the wheel. I know you spent a ton of time gathering and processing the datasets!

Thank you
Kevin
