Ok I discussed briefly with Mike T. on Friday. He seemed shell shocked after the SSA. Proceed carefully.

Hi Steve, I wasn't aware this was the case w them using McKelvey. Unfortunate. I wasn't able to sit in on thurs am when they presented the science case of the SSA. This is the reason we should talk to Craig as he was there and when I asked him about snow later thurs he said they didn't have a lot to say about it???

We apparently used McKELVEY's climate model to asses climate impacts to lynx. Left hand right hand thing.

Hi Steve, I sat in for about 2 hrs on Thurs. I was off Friday. I can give you a download on what limited info I saw. Craig sat in on all of it so maybe the three of us can talk about it when you are back. Lynx has a lot of things in common w wolverine. I haven't seen the paper you are talking about so would like a copy if you have it.
Best, John

Are you/were you in the Lynx SSA meeting? I got pushed on some climate stuff yesterday by Colorado. Pretty interesting.

Thanks for the wolverine article, pretty interesting stuff. Greg got a publication on wolverine abundance and distribution in Canada published in June of 2016. Have you seen that?
