Ok. Torbit asked me to run down these data. We should coordinate so the Canooks don't get confused. I'll send you what I got from Alberta.

Hi Greg, We should probably touch base about this. I have trap data coming in from BC and Alberta, expect it this week or next.
Best, John

Yes, I've been chatting with John Guinotte at USFWS about this and will be sending the spatial data to him, after I send to regions. Should be out in the next week.

Rich

Subject: Requesting Wolverine Mortality Data

Garth,

Good talking to you today. As we discussed on the phone, we (US Fish and Wildlife Service) would like to acquire known wolverine mortality data in BC over the last 10 years (by year) within 200 km of the Canada/US border. We would like to be able to use these data as contributory to our forthcoming status assessment for listing status under the Endangered Species Act. You indicated that these data are likely available in a recently completed assessment/report. If you could forward my contact info to the appropriate personnel that would be able to provide these data, It would be greatly appreciated.

Additionally, you indicated that other analyses regarding demographics and distribution of the BC population may be available in the near future. Once these data/reports are available for release and distribution, we would also appreciate receipt of said information.

Thanks Much,
Greg Watson
