John, Any potential contact names in the new reports you have? We can try to chase down any names and get more info.

Ed

Hi Ed and Betty,

I spoke to Steve yesterday about current range map. He said he thought we needed to extend the wyoming polygon to the south to include the rest of the wyoming range. Also, we probably need to get the coordinate for the wolv that was killed by a car in Utah (Bear Lake). That point would help justify the extension to the south.

Best, John
