Sounds great Kim.

Please let me know if you need anything from this end.

If I get the coordinates of the road kill out by Bear Lake, I can include that location on our generic lower 48 distribution map for our staff to review. Simple map showing historically where occurrences seem to have been to give us an extent view. Would be used like the M-56 record we found up in western ND that was a rancher kill.

Thanks again for all your help, Ed

For me to give the wolverine coordinates, I need you to put in a data request with Sarah Lindsey (cced) to ensure proper data sharing.

I'll then quickly send you the 3 locations from 2014-2016 and any hits we may get as we retrieve remote cameras from this winter.

Thanks,
Kim
