Hi John, I will take what you typed above and add that to our Den's metadata. Will pull some of the info from the attached too.

Thanks, Ed

Hi Ed and Betty,

Attached is the section on Modis from the **draft** NOAA report. I used the daily images described in this document to identify meltout date for the den sites in Glacier NP. For all den sites outside of Glacier NP I used the Modis 8-day product, citation below. The modis 8-day product is classified by NASA (snow, no snow, etc.) and downloadable as hdf files. Let me know if you need something else on this.

Best, John
