No. It was Howard Golden.

I talked w/ Drew about wolverine briefly last week. I included you on an email to Drew's contact earlier today. Is Chris the same person you've already reached out to?

Hi Justin - Were you going to set up a call with Drew Crane (AK)? I would like to update wolverine population (abundance and distribution) for that area. I have not heard back from AK Fish and Game - email sent Feb 3 - but I would like to speak with Service personnel before sending another message so that I am directing my request to the right person, or whether Drew should make that request (see his message below). I also think he should be briefed on the context of the request(s).

FYI - here is his message to Caitlin on Feb 17; I already have the most recent trapping records report.

Actually, Hilary (PB lead) has some contact info from her recent work and will pull that together for you. I also asked Refuges to poll their I&M program for what data they may have.

I just spoke with my contact at the state and he indicated they have quite a bit of information, but would need a more specific request and a little more detail about the context of the request in order to provide it. Could you do that? The link below takes you to trapper harvest reports for the state. It will take a little digging, but wolverine data is found throughout.

<http://www.adfg.alaska.gov/index.cfm?adfg=trapping.reports>

If you can provide a more detailed request, I'd be happy to pass it along to the state.

Thanks

Drew Crane
