We cannot call out from our office phones to Canada (our telephone system was hacked awhile back, so international calls are blocked).

It's not cheaper to call me directly (number below)? Otherwise, I am happy to do it this way.

How about Monday at 11:00 am PDT? If that works, here is conference line number and participant passcode:

Call-in number: 866-763-2716

Passcode: 4282237

But it will be just me on the call with you.

Thanks for your reply. Monday should be fine.

I'm not sure of the time zone you are in - I am here in the office 7:15 to 3:45 pm Pacific Daylight Time on Monday. Let me know what hour is best for you and I'll work around that.

Betty

Subject: Wolverine information

Hello Dr. Ray - I am currently working on a status review for the wolverine for the U.S. Fish and Wildlife Service. As you are probably aware, we are preparing this new review in response to a 2016 court decision that vacated our 2014 proposed rule, which withdrew a previously proposed rule (2013) to list the wolverine as threatened under the US Endangered Species Act.

I have been reviewing many publications, comment letters, and reports regarding this species and have spoken to a number of wolverine researchers over the past few months. Bill Harrower suggested I contact you given your extensive knowledge of this

species and to discuss the 2014 COSEWIC Assessment and Status Report on wolverines in Canada. We have also been in contact with other Canadian scientists (British Columbia, Alberta) in order to assess more recent genetic study results as well as harvest/trapping information of wolverine along the U.S.-Canadian border.

Would it be possible to schedule a call with you tomorrow or later in the week? I am teleworking from home today, but can respond by email. I will need to set up a conference line for the call and can send that number to you.

Thank you for your time and I look forward to hearing from you.

Betty
