Well, Krott (1959) used cubs, but also "tupus"! I will try to stay out of either camp and use "young," if possible.

It is good to see you are digging deep into things wolverine. Only a true connoisseur would find this question. Now you will have to pick a camp. I have taken the cub camp because the oldest literature I have seen (from Scandinavia, and I don't remember which, used cubs). Plus I did bear work. Plus wolverines are way too tough to be kits. Audrey may be in the kit camp. The safe place is to use "young" Good luck and may the force be with you :)

Hi Bob - I have found in my various readings that young wolverines are sometimes called cubs and sometimes called kits. Is there consensus on this?

Thanks,
Betty
