Hello Kim,

Thank you for getting that to me.

By chance do you have the camera records you mentioned. I know we would be interested in seeing where those fall in relation to our range concept.

Thanks, Ed

Hi Ed,

Here is the coordinate of the wolverine found dead in Utah last year.

Thanks

Kim

Kim,

The coordinates taken by John Owen (not Adam) were:

41° 49.408', -111° 20.659'

I converted these to UTM (zone 12 T, and presumed the datum to be WGS 84):

471406 E, 4630234 N

Actually Adam didn't take any photographs, but the photograph taken by John O. is attached. (Also, I took photographs, as did Mike Christensen, Conservation Outreach).

Hi George,

I can't seem to find the coordinates for the dead wolverine and photo that Adam took. Could you please send me those?

Thanks,
Kim
