Hi John, Here is the location of the Bearlake roadkill wolverine. It was June 1, 2016. I took the coordinates from the email provided, created an excel, created the data, then projected to our Range-wide Wolverine Projection.

I created metadata, so should be good. On this end I have a record with complete attributes, but this file is same that I used to merge into the overall data.

I'll send you a new all merge data in just a few mins too.

Thanks, Ed
