Hey Kevin, would like to talk to you and maybe Tack today if you are around about possibilities for a spatially explicit population model for wolverine. It would be a challenge.

Hello Betty,

We will give a report at WAFWA in Vail, CO in early July. Are you attending the wolverine subcommittee meeting? But some camera data will not have been retrieved at that time. Meeting in the fall to finalize analytical approach. Contract to submit a manuscript is for next spring.

Attached is a map of hits, it is a minimum as it has no hits from genetics yet and was made with lots of camera data to still come in.

Subject: Preliminary results from occupancy study?

Hi Bob - Do you have a best guess as to when you might have a preliminary report/results from the multi-state occupancy study? I realize that there might still be camera traps that have not been pulled from the field, but was hoping a preliminary report might be available this summer.

Thanks,
Betty
