Thanks Bob. I am familiar with some of Tony's recent work (e.g., June 2016 report). I will have a follow-up conversation with him. Was hoping there were additional studies/results for U.S.

Hello Betty,

I am not aware of other road crossing studies with the exception of the genetic based stuff from Canada that is attached. I thought I saw a published paper on this but don't have such in my files. Tony Clevenger's email is apclevenger@gmail.com There were definitely some genetic lab analysis issues identified as part of this work, and I believe that came to surface after this report was written. So it would be essential to ask Tony what that was and how it might have affected the info in the report.

Hope you are well.

Subject: Additional road crossing studies?

Hi Bob - I am reviewing your peer review comments and the Packila et al. 2007 paper. Do you know if additional studies have been conducted regarding road crossings or road crossing mortalities?

Thanks.

FYI - I believe a few Regional Office Staff (Region 6) will be attending the WAFWA meeting in July, perhaps others from our Headquarters office, not sure about Region 1.
