Thank you, Karl! I have seen a few references, but this is a huge help. The focus on Pacific NW region is perfect given that wolverines have been detected recently in Oregon. Much appreciated!

Hi Betty,

Gregg asked me to pass along any recent literature I was aware of that was specific to Washington and dealt with issues surrounding climate change and wildfire.

I hope the attached references do the trick. Most of these are about the Pacific Northwest rather than just Washington. If I come across anything else that's on point, I'll pass it along.

Cheers,

k
