Hi John,

Hope all's well. Here is a new overall merge for 4/12/17 that included two more location areas from Kim over at UT Div of Wildlife.

I've included the two locations in their own file too for your use. The UT data is stored as two separate data because they had differing raw projections and it was just easier to create this one standalone.

Both of the final record data sets are in the wolverine projection and I have metadata with them.

Hope this helps, Ed
