Hey Sumalee

Thanks for your reply. I am looking forward to her response. If the route has changed from what is on the current maps and what I sent to you with the 1/4 mile circle around the mouth of the cave then I would like to have the current route going by the cave if she can provide that. My opinion is that these have not changed and the route is within the 1/4 mile circle. The reason I say that is there has been no surveying on my property that I am aware of. I haven't been notified by certified letter in order for them to do that. I believe they are telling you one thing and doing another. Anyway just my opinion.

Thanks for your time and I look forward to the response

Have a great day

Mike

Hi (b) (6),

By way of this email I am forwarding your question/concerns to Megan Stahl, she is my main point of contact for the pipeline. I expect she might be able to provide resolution on whether the maps and GIS layers you've been provided are the most recent route alignment. Additionally, she should be able to schedule someone to flag the current route alignment, if that is something you would be interested in seeing.

Best,

Sumalee

Hey Sumalee

3-22-17

This is (b) (6) from Giles County and Canoe Cave.

I got in contact with the county after our last conversation when you told me that MVP was outside the 1/4 mile 4d rule with the route of their pipeline. I thought that the line was moved without MVP going through proper channels of doing a survey on my property. After speaking with Giles County and having them send me the route map through my property the route hasn't changed according to the files that was sent to Giles

County. I am sending you the e-mail that was sent to the county with the GIS files by Maurice Royster. If you would take a look and let me know what is going on.

Let me know you got this and I look forward to hearing from you soon.

Thanks and have a great day

(b) (6)

Gentlemen,

I haven't had time to review them but attached are the most recent GIS files received today from Pittsburgh office.

Have a great weekend!

/m
