Hey Sumalee

I have been out of the area for a while and haven't had time to get that set up. I am planning on getting it set up next week.

Thanks a lot for your help

Mike

H (b) (6),

I was wondering if Megan was able to help facilitate having someone come out to check the coordinate of the cave entrance?

Have a good weekend,

Sumalee

Hi (b) (6),

I would ask Megan that question. I assume that is what the MVP land agent was contacting you about, but I don't know that for certain.

OK that's fine. How do we coordinate it? One of MVP's land agents has been in touch with me about this. Should I get in touch with him? Or let Megan coordinate it?

(b) (6),

I think the best way to resolve this issue is to let them come out and double check the cave coordinates. I don't believe they will need to enter the cave, rather stand at the cave entrance.

Hey Sumalee

Thanks for getting back to me on this problem. I am puzzled that MVP thinks that the cave coordinates are incorrect. As I stated with you, my information came from the county. As Megan states the information I have is correct and that information came from the county and the maps were made by the county. There are two openings for the cave as shown on the maps. Wil Orndoff can confirm the coordinates of the cave. He has been in the cave and has that information. I think this will show that the maps are correct and they are well within the 1/4 mile. I don't want anybody in the cave. It is a beautiful resource and needs to be protected. Please let me know if this solution will correct the problem.

Thanks and have a great day.

Mike
