**Subject:** Mountain Valley Pipeline: Myotis septentrionalis capture report  
**Date:** Wednesday, June 17, 2015 1:01:39 PM  
**Attachments:** [ESI PN593 Bat Capture Reporting Table 20150616.xlsx](#)

---

Good Afternoon –

As required, please find attached a spreadsheet outlining capture information for three (3) northern long-eared bats from survey efforts last night. Two pregnant NLEB were captured in Harrison County, West Virginia and one lactating NLEB was captured in Montgomery County, Virginia. A radio-transmitter was only attached to the lactating NLEB.

Please contact us if you have any questions or require additional information.

Thank you,

**Daniel J. Judy**
