Hi Brian,

I am currently reviewing the survey reports for this project. Did you/VDGIF approve Casey Swecker to conduct mussel surveys for this project? He is not currently on our approved Atlantic Slope mussel list.

He is on our approved fish surveyor list.

thanks,

Kim

Kim,

We did issue them a collection permit. They definitely have mussel experience and have helped with the mark-recap surveys so they were familiar with the area and species. I would not approve them for the approved surveyor list though since they do not have experience with all the species needed.

Brian
