Hi Barb and Tiernan,
Hopefully you've had the chance to look at the email I sent May 18th. It was a draft mitigation prioritization list from the FHWA programmatic. We thought it would be a good place to start our conversation.

Please take a look and get back to us with your thoughts.
Thanks,
Sumalee

Sumalee, Kim & Troy,

We are preparing to submit a revised BA at the end of this week. We are working to get the mitigation section designed/written/finalized. While we were there you mentioned talking with WV and Mark Ford about various strategies that MVP might employ? They are still open to a wide variety of options ranging from on-the-ground mitigation (at locations they can purchase/own), adding to mitigation banks already being designed by others, completing survey activities for various caves, paying money directly to fund research. As such, I am just following up to see if you can provide us any input on what you would like to see included in the document related to these items?

Taina
