Good morning, Tiernan. I am the biologist working on MVP at FERC and wanted to reach out to you if you would like to discuss issues that you are having with the applicant. Nancy told me that you were confused about the schedule and deadlines. To my knowledge, at this point in the process we are requesting your comments on the draft BA that MVP has submitted to your office. We will incorporate your comments in the final BA (which FERC will officially submit to FWS at a later date). Paul is the MVP project manager at FERC, and he has not set a definite schedule. Typically Section 7 consultation for an EIS is ongoing until FERC gives the applicant the Notice to Proceed to begin construction (Section 7 has to be complete in order for the applicant to begin construction), so you should not feel pressured to make any official determinations at this point in time.

Feel free to give me a call at 202-502-8081 anytime this week.
