We go by what is on the sheet you've attached. If you have further questions about survey time frames, you can contact PJ Harmon, botanist, at the WVDNR 304-637-0245

Hi Liz and Tiernan,

When we met with you two back in November 2014 to discuss the MVP bat study plan, I was handed a sheet (attached) detailing the recommended survey windows for federally endangered plants. I have recently had someone mention that they think the survey window of 5/1 to 9/30 for the running buffalo is incorrect, and that it should actually be from April to June. I was not able to find these dates online, so I only have the sheet from the meeting to reference. Could you shed some light on the issue?

Thanks!

Valerie
