Kim,

I just sent out an email a few minutes ago. Did you get it?

Mike

Kim and Ernie,

Can you be available to discuss this tomorrow 2 pm or later? I can provide my conference call number and pass code.

Mike

Mike et al.

Let me know when your review is complete. My concern about the Roanoke logperch habitat assessments is that the surveyor acknowledges that habitat may be present but then discounts it due to lack of occurrence data. The way that we would handle this is to assume presence since habitat is present recognizing the fact that presence/absence surveys will not work for this species. I would like your thoughts on this.

Kim:

Happy New Year.

We received several survey reports & all were distributed to regional biologists back in November 2015. I do not recall any of our regional biologists providing comments.

Suggest you contact Mike Pinder about the FESE Roanoke logperch surveys. I need to re-read survey report...we can discuss after.

Thanks

Hi Ernie,

Have you reviewed the Roanoke logperch surveys for this project? If so I would like to discuss comments you may have or intend to make regarding this report. Let me know when you would be available.

Kim
