Hey Tiernan,

Just to confirm what we spoke about yesterday regarding the bat study plan:

- Everything looks good – just make sure to follow the 2015 Summer Survey Guidelines, especially with regards to net site determination along linear corridors
- ESI will need to adjust their proposed net sites once NLEB buffers are released
- Telemetry requirements for NLEB will be same as for Ibats
- May limit # of NLEB radio-tagged to 5 for every 10 KM of linear projects? You will need to check with Barb

I forgot to ask you about clarification regarding plant surveys, specifically the ones we addressed in the cover letter that was included with the bat study plan. Do you have specific lat/longs of areas along the project corridor where we should focus our survey efforts?

Thanks,

Valerie

Hi Tiernan,

A copy was supposedly delivered to your office (see attached UPS delivery confirmation). However, here is a PDF copy in the meantime.

Please let us know if you have any comments!

Thanks,

Valerie Clarkston
