Tiernan,

That is correct. There is no need to provide comments on the February 1 study plan.

Thanks,
Megan

Subject: [EXTERNAL] MVP Study Plan for PS-WV3-Y

Hey Megan - Thanks again for arranging yesterday's call. It was very helpful and I think it cleared up some of the confusion. There was one thing from yesterday's meeting that I wanted to clarify with you, and that is if MVP still wants the Service to review and provide comments on their February 1, 2017 study plan? Based on our discussion yesterday, it is my understanding that further lidar and ER imaging has already been performed on this hibernacula and the methods described in the study plan are no longer necessary. If my understanding is not correct and MVP would still like the Service to provide comments on the February 1, 2017 study plan please let me know.

Thanks,
Tiernan
