Hey Troy - I requested the map. I've received several requests from landowners in WV to develop a map that depicts the tree clearing "zones" and provides information of when tree should be cleared in those areas. I discussed this request with Paul Friedman and we decided that a map would be helpful to answer landowner questions, so he sent MVP an email.

I'm just trying to stay in the loop. Who from FWS requested this map. And why?

Thanks,
Troy

Subject: [EXTERNAL] Map of Bat Area Tree Cutting - MVP Pipeline Route

Dear MVP – FWS asked me to ask you all to please generate a map of all bat areas along the pipeline route where trees were cut prior to March 31. They said it should match Table 5 in BO for habitat for Indiana Bats. Also indicate any area where trees were NOT cut prior to 3/31/18. Thanks – Paul
