Hi Tiernan: Hold off on conducting any review until I can confirm whether MVP was able to complete their planned tree-cutting along Pocahontas Road. We do know that the tree sitters on top of Peters Mountain in the pipeline ROW are still in place and have precluded cutting at that location.

Tiernan - can you please assist Mr. Abing in determining which type of habitat this location is in?
Cindy and I are both out.

Thanks,
Troy

Again due to protesters blocking access, it may not be possible for MVP to complete some tree cutting along areas of Pocahontas Road that where planned widening of the road needs to occur. Is the entirety of Pocahontas Road in the same category of bat habitat (i.e. "unknown use summer habitat" or Unknown use spring staging/fall swarming habitat")?

I can probably get more specific as to where road widening is to occur, but I am under a time crunch.
