Do we know when they last requested bat data? Or when they did surveys? Or what they mean by "close enough"?

b.

Do you know of any new captures along the MVP route?

Hi Sumalee and Tiernan,

As we are wrapping up the BA and BO text, I wanted to reach out to ask if there are any non-MVP bat captures of listed bat species that are close enough to the line that they would affect our impacts analysis? Thank you much for your assistance.

Taina
