Hey Jennifer -Here are my comments on EQT's response to FERC's data request for MVP:

- EQT stated they will be completing plant surveys, which would most likely occur during the formal consultation process or after a BO has been completed. Because EQT is assuming presence, and has made a LAA determination for multiple plant species, survey results would trigger re-initiation if a BO has been completed. We should discuss this.
- We may want to clarify that there is no take of plants.
- I'm not sure if their response to our question regarding small whorled pogonia (**section m.**) was addressed. They state that sunlight, animal browsing, and competition could impact small whorled pogonia but they do not provide a discussion of these effects. What are your thoughts on their response?

Let me know if you would like to discuss any of these comments.

Thanks,
Tiernan

Hi Tiernan,

Hope you are doing well. Just wanted to follow-up and see what you thought about the response to FERC data request from MVP. I think time is fast approaching for when FERC will likely be putting out the BA (before the FEIS, June 23, right?) and just wanted to make sure they answered our questions sufficiently to make our effects analysis.

Thanks!

Jen

Hello all,

Attached is the privileged version of the Response to FERC data request

The link below provides the MBCP.

I also saved them to our share drive for VAFO folks:

[REDACTED]

[REDACTED]

Could you please review and determine if they addressed our questions/comments by Thursday, June 1, COB and we can have a conference call on Friday or Monday to discuss? Sorry for the short notice but just want to make sure they addressed our questions before FERC issues the BA. I haven't heard anything from them on what their schedule is. I've left a message with Lavinia to see if I can get an update.

Sarah- Could you review the MBCP to double-check they addressed your comments on the earlier draft?

Thanks so much!
Jen

Subject: MBCP and BA Responses to Comments

Jen,

I am writing to provide you with electronic copies of the recent MVP submissions:

1. Migratory Bird Conservation Plan (you should have already received hard copies of this) – link below
2. Responses to comments received on the BA (a hard copy will be coming your way soon) – attached

Click the link below, save the .zip file to a folder on your PC, right click the file and choose “Extract All” from the menu, enter the password below and your files will be uncompressed to a folder for you.

Password to extract contents of .zip file –

Please feel free to call if you have any questions or need anything else.

Thanks,

Megan
