Yeah that shouldn't be a problem. FYI MCI is not one of our LAA species, hope that brightens your day!

Hey Tiernan,

Following up on the email I sent last week. Can you work on getting the draft Ibat baseline completed by next Monday, Oct. 23? I'll work on getting the VA information to you. I've got to tackle the RLP, MCI, and NLEB.

Thanks

Sumalee

Hey Tiernan,

I'm starting to shift gears to think about MVP. Can you look at the ACP BO in the Ibat section and see what kind of information we used and start to gather that if you haven't already?

Some things in particular:

- # of acres the MVP pipeline and ROW/additional workspaces that cross the Appalachian Mountain Recovery Unit in WV. The entire state is in the Appalachian Mountain RU.
- summary of the survey effort - what's been found/detected; summer habitat, fall swarm/spring stage area around hibs/portal searches etc. Any surveys still pending? Also provide or insert in the draft BO the lit. cited for the surveys
- how much clearing will occur in each habitat type (see Table 3 in the ACP BO)

- how many hib. are w/in 5 miles of the action area (see Table 4) - hopefully this is in the BA

I cc'ed Liz in case you had questions that she might be able to help clarify.
Can you send this to me when you get it pulled together, parts at a time is fine?
Thanks,
Sumalee
