Sue -

The fisher photos were taken at UTM (WGS 84) 10T 564985E 4810634N. The legal description is T24S R5E section 34. This location is near the Middle Fork Willamette River. This is in Lane County but less than a mile from the Lane / Douglas County line. The property ownership is US Forest Service, Willamette National Forest, Middle Fork Ranger District.

The date and time stamp on the photos is incorrect. The fisher was at the bait site on 1/27/2014 from 03:34 AM until 03:46 AM. We have a total of 34 pictures taken over that time.

The amount of bait in the bobcat size reference photo may seem a bit excessive but we baited heavy as we expected snow to keep us from accessing the site for much of the winter.

Please let me know if you need anything else.
