

Possible Questions to Ask Forestry Personnel at Rozol MB Presentations:

Background: Little information exists about the distribution of mountain beavers. It would help in selecting future fisher release sites if there was better information about where mountain beavers are, and where people are controlling them, using any methods.

- 1) Where do you do mountain beaver control?

More fisher releases are planned for Fall 2017 in Mt. Rainier National Park and Mt Baker-Snoqualmie National Forest.

- 2) Would you be interested in being on the mailing list for information about these releases?
