All:

Please see text below. While this may be an unusual case in most circumstances, it is important to understand the need for further explanation where we have populations that we are evaluating under the DPS policy with differing genetics.

Thanks Doug

Verifiable Occurrence Records:

These are excerpts from both the jaguar proposal and the wolverine proposal. I understand Ron sent some background on the wolverine record use. I also added unofficial excerpts on using best available information, for what folks can pull from them.

International Boundary Questions:

HQ has no national policy or guidance regarding international boundaries.

However, we can discuss the boundaries as they affect the listing determination of the fisher DPS.
