I don't know yet...I'm waiting for the revised rule from Angela/Dan...I haven't seen it yet. If you have, use language in that. Otherwise stay tuned

Heidi,

I noticed that the docs you only mention the final rule to list the Southern Sierra Nevada Distinct Population Segment (DPS) of Fisher as an endangered species. This DPS is modified (logical outgrowth) from a previously proposed DPS configuration labeled as the "West Coast Distinct Population Segment of Fisher."

Aren't we going to mention anything about the Northern California DPS being not warranted?

Pam

Will do! Do you know if fisher has gone to HQ yet?

NO...I have not provided anything to anyone. The text is yellow highlighted because it was purely a guess on my part, and intended to be a placeholder and replaced with whatever you send me.

Please shoot me revised Part VII text (just in an email is fine, no need to edit the document itself) when it is available, and I will revise the BP.

Thanks Heidi. Christina Meister has replaced Ivan Vicente at HQ. Did you provide the highlighted info?

I have not squared these with the current version of the rule. So some things would need to be tweaked (e.g., title, rationales if changed from last week).

And I never heard back from Caitlin on what if anything to include for "potential issues," so I put this simple statement: "Legal challenges by non-profit environmental organization(s) are likely as a result of our revised DPS analysis, and not listing the NCSO subpopulation area/DPS."

I've removed the OneDrive docs...don't trust it and formatting of the InfoMemo got whacked.
