

[3/11 12:29 PM] Galloway, Shaughn L
Did you want the broken apart OR/CA NCSO?

[3/11 12:29 PM] Galloway, Shaughn L
Or just as one boundary?

[3/11 12:38 PM] Glenne, Gina
Just as one boundary please and thank you.

[3/11 12:40 PM] Galloway, Shaughn L
Do I need to keep the boundary split for records or can I continue to maipulate it?

[3/11 12:40 PM] Galloway, Shaughn L
manipulate*

[3/11 12:41 PM] Glenne, Gina
We should preserve the version of the boundary you used for the acreage calculations.

[3/11 12:53 PM] Glenne, Gina
I think the SSN and NCSO boundaries you just made aren't right? They're coming up with a bunch of stuff inside them???

[3/11 12:54 PM] Galloway, Shaughn L
Uhhhhhhh

[3/17 11:04 AM] Glenne, Gina
I'm going to send you the tables I put in the fisher rule. Folks are reacting to the percentage of private in SSN. Can you double check those numbers for me??

[3/17 11:09 AM] Galloway, Shaughn L
Um yes

[3/17 11:09 AM] Galloway, Shaughn L
Like there isn't enough private?

[3/17 11:09 AM] Glenne, Gina
I just sent the tables to you. They match what you sent me.

[3/17 11:09 AM] Glenne, Gina
No, we didn't think there was that much private.

[3/17 11:11 AM] Galloway, Shaughn L
Are they reacting to the total number of acres with the SSN total polygon which is much larger than what is in the critical habtiat polygons?

[3/17 11:11 AM] Galloway, Shaughn L

habitat*

[3/17 11:12 AM] Glenne, Gina

I don't think it is a big deal. Just want to make sure it is right.

[3/17 11:12 AM] Glenne, Gina

And yes, that could be part of the reaction.

[3/17 11:15 AM] Galloway, Shaughn L

From what I have in the excel table it looks correct to me. I can rerun the numbers to see if there was an issue with the calculation if we think its necessary.

[3/17 11:18 AM] Galloway, Shaughn L

With the boundary as is, you are pulling in a substantial portion of the Sierra Nevada foothills and parts of the cenral valley which will be mostly private. It runs from essentially Tejon ranch just south of Bakersfield to approximately Modesto. That is a really large area.

[3/17 11:19 AM] Glenne, Gina

How long would it take you to run it again?

[3/17 11:19 AM] Galloway, Shaughn L

I don't think too long, but I also do not think it will change anything.

[3/17 11:20 AM] Galloway, Shaughn L

Like I said it is a really large area.

[3/17 11:20 AM] Glenne, Gina

If it takes 15 minutes it would be worth it.

[3/17 11:21 AM] Galloway, Shaughn L

I can show you my screen if you would like

[3/17 11:21 AM] Glenne, Gina

I believe you.

[3/17 11:21 AM] Galloway, Shaughn L

Running it now

[3/17 11:21 AM] Glenne, Gina

Let me chat Dan and see if he's OK with the answer

[3/17 11:23 AM] Glenne, Gina

Dan says we're good. Thanks for checking!
