Thx again for your work on this Sue, both for you scientific expertise and your patience!

On a related note, I just had a detailed call with Vicki Finn and Tom Meiwald in SciApps. They were wanted to get coordinated in several projects that overlap with our office. two of those projects involve fisher and marten. Tom is working on fisher modeling in WA state, and Marten modeling for the OR Connectivity group (using HexSim and working with Nathan S and Bruce M.). I asked him to connect with you guys on those projects. SciApps at the national level has some money they are putting towards some of this work. I brought them up to speed on our fisher and marten work, mostly in the context of the listing efforts and the CCAAs, but also tried to connect them with NCASI and Katie M. Tom may reach out to you all.

Tom is also working on modeling flycatchers and red-legged frogs as part of the OR Connectivity project, as well as working with Jesse D. on condor modeling. He may reach out to Jeff D. on that, but pls feel free to shoot him a note as well. I also mentioned Mark and marisa re the corridors project and if this fit into the connectivity project he was working on. Thx.

Paul

Subject: FW: Latest version of fisher rule

FYI, the fisher rule was surnamed by the regional solicitor and is now with Gary Frazer.

Subject: Re: Latest version of fisher rule

Here's the version (surnamed by Kerry) that went to Bridget and is now with Gary. As well as a track changes version that shows changes after her first review, RSOL edits, and PRB/HQ edits.

Subject: Latest version of fisher rule

Hi Angela and Dan,

Is there a version of the fisher rule with RDs and regional SOL surname (or, if Kerry didn't surname, then the one that went through her last review last week) that you can pass along?

Thanks.

Sue
